Students may complete an elective concentration by completing coursework as outlined by the academic department. All concentrations require the successful completion of 12 unique credits. Each concentration includes both required coursework (3-6 credits) that must be completed and a list of optional courses to fulfill the remaining credits (6-9 credits). For more information on concentration options (http://business.gwu.edu/current-students-2/mba-programs-and-concentrations/concentrations), please visit the MBA Current Student (http://business.gwu.edu/current-students-2) website.

The concentration options include:

- Accounting and Advisory Services (p. 481)
- Consulting* (p. 482)
- Entrepreneurship (p. 483)
- Finance* (p. 484)
- Global Management* (p. 484)
- Government Contracts (p. 485)
- Information Systems and Technology Management* (p. 485)
- Marketing Communications and Digital Marketing (p. 485)
- Project Management* (p. 486)
- Sports Management (p. 486)
- Tourism (p. 487)

*Concentration can be completed either on-campus or online.

### WORLD EXECUTIVE MASTER OF BUSINESS ADMINISTRATION

The world executive master of business administration degree program is designed for accomplished managers and professionals to enhance their organizational effectiveness. The program has a general management focus, with a strong emphasis on leadership, global and local environments, and mastery of key business functions. The 16-month, 52.5-credit program includes core courses, integrative topical courses, electives, residencies, consulting practicums, and a leadership coaching component.

Visit the program website (http://business.gwu.edu/programs/executive-education/world-executive-mba) for additional information.

### REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

The following requirements must be fulfilled: 52.5 credits in required courses.

## COMBINED PROGRAMS, SCHOOL OF BUSINESS

### Joint Degree Programs

For all joint degree programs, students must meet the requirements for both degrees in order to receive either diploma. Degrees are conferred simultaneously.

**Master of Business Administration/Juris Doctor (with the Law School)**

Students may work concurrently toward both the Master of Business Administration (M.B.A.) and Juris Doctor degrees. In consultation with their faculty advisors, students in these programs may transfer up to 14 credits of Law School course work to their M.B.A. program and 12 credits of School of Business course work to fulfill requirements for the J.D. Students must be admitted separately to the School of Business and to the Law School. It is possible for a student to complete the requirements for both degrees within four years.

**Master of Business Administration/Master of Arts with a focus on international business (with the Elliott School of International Affairs)**

Students may work concurrently toward both the M.B.A. and Master of Arts (M.A.) degrees. In consultation with their faculty advisors, students in these programs may transfer up to 12 credits of Elliott School course work to their M.B.A. program and 12 credits of School of Business course work to fulfill requirements for the M.A. Students must be admitted separately to the School of Business and to the Elliott School of International Affairs.

**Master of Business Administration/Master of Science in Finance**

**Master of Business Administration/Master of Science in Government Contracts**

**Master of Business Administration/Master of Science in Project Management**

Students may pursue one of three joint degrees where both degree programs are within the School of Business: M.B.A./Master of Science (M.S.) in finance; M.B.A./M.S. in government contracts; or M.B.A./M.S. in project management. Students must be admitted simultaneously to both degree programs to be eligible for the joint degree.

### Dual Degree Program

For dual degree programs, each degree is awarded as it is completed.

**Master of Business Administration/Master of Science in Information Systems Technology**

Students interested in the dual M.B.A./M.S. degree programs in information systems technology may be admitted either simultaneously or consecutively to the two degree programs.

### DOCTOR OF PHILOSOPHY IN BUSINESS ADMINISTRATION

The Doctor of Philosophy in business administration is a highly specialized research degree designed to prepare students who wish to pursue academic and research careers in a particular field of business.

The minimum admission requirement is a bachelor’s degree from a regionally accredited college or university, although most applicants have completed a master’s degree in an appropriate field. Applicants whose degrees are in fields other than their proposed area of focus are expected to obtain the necessary background either before or soon after admission to the program. Scores on the Graduate Record Examination or the Graduate Management Admission Test are required; scores may not be more than five years old. Students from countries where English is not the official language and non-native English speakers are required to take either the Test of English as a Foreign Language (TOEFL) or the academic International English Language Testing System (IELTS). Exceptions may be made for applicants who hold a degree from a university located in a country in which English is the official language and also the language of instruction at the university. Minimum acceptable scores for TOEFL are 600 or above (paper exam) or 100 or above (Internet exam); for IELTS, an overall band score of 7.0 with no individual band score below 6.0. The Doctoral Committee does not use specific cutoff points for grade averages and test scores. In making admission decisions it carefully reviews each applicant’s entire record and makes
its selection on a competitive basis in keeping with enrollment limitations.

The doctoral program consists of two major parts: the pre-dissertation stage and the dissertation stage. The pre-dissertation stage normally involves two years of studies described in an individual study plan developed by the student under the guidance of a committee of at least three faculty advisors. The objective of the dissertation stage is to have the student apply the obtained theoretical and practical knowledge and analytical methods to the resolution of a research problem. The research should be original and result in a contribution, either applied or theoretical, to the existing body of knowledge.

All course work, other educational activities, and required comprehensive evaluations must be completed within five years of matriculation. The total program must be finished in seven years.

The doctoral program is administered and supervised by the Associate Dean and the Committee on Doctoral Studies. For more detailed information on the program, see the Handbook on the Doctoral Program, available in the Doctoral Program Office.

**CERTIFICATE PROGRAMS**

**Post-Master's Certificate Program for School of Business Alumni**

The School of Business offers a post-master's graduate certificate designed to assist master's degree alumni of the school in keeping apace of an ever-changing business climate. Participants may undertake a 12-credit program of study in an existing School of Business field or from a series of specially designed program offerings. Further information is available from the Office of the Dean.

**Graduate Certificate Programs**

In addition, the School of Business offers graduate certificate programs of study in the following fields:

- Graduate certificate in business analytics (p. 489)
- Graduate certificate in walkable urban development (p. 491)
- Graduate certificate in nonprofit management (p. 489)
- Graduate certificate in responsible management (p. 490)
- SAS certificate in business analytics (p. 491)

**GRADUATE CERTIFICATE IN BUSINESS ANALYTICS**

The master of science in business analytics (MSBA) program enhances its business analytics program by offering an external, stand-alone graduate certificate in business analytics.

The certificate is available to current GWSB students as well as those not enrolled in a graduate degree program.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits total, including 10.5 credits in required courses and 1.5 credits in an elective course.

**GRADUATE CERTIFICATE IN NONPROFIT MANAGEMENT**

The graduate certificate in nonprofit management provides an overview of central concepts in managing nonprofit organizations and is intended to meet the needs of students seeking a focused experience in order to prepare for or advance their careers in the nonprofit sector. Certificate students enroll in regular courses of the Trachtenberg School of Public Policy and Public Administration and earn graduate credit.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits.

Other Trachtenberg School of Public Policy and Public Administration nonprofit courses may be offered periodically. With prior approval of the field advisor, certain non-Trachtenberg School courses at GW may be counted toward the elective group.

**GRADUATE CERTIFICATE IN RESPONSIBLE MANAGEMENT**

The graduate certificate in responsible management (CRM) program is designed to enhance the preparation of students as responsible leaders. Students participate in seminars, projects, courses, and service in a variety of topic areas, including global strategy, ethics, corporate social responsibility, international development, peace, energy, and the environment. These academic opportunities provide students with the knowledge, proficiencies, and skills needed to succeed as leaders in governmental, industry, and consumer oversight.

The CRM program is open only to GW graduate students. Students often begin the CRM program as early as their first semester and at least one year prior to graduation.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the School of Business (http://business.gwu.edu) website or additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits, including one required 3-credit course, one required 0-credit course, and 9 credits in elective courses.

GRADUATE CERTIFICATE IN WALKABLE URBAN DEVELOPMENT

The graduate certificate in walkable urban development program provides course work in the practical foundations of walkable urban real estate development and place management. Real estate development in the United States has been transitioning from building and financing single-use properties in the suburbs to building, financing, and managing complex mixed-use projects in walkable urban cores. This program provides students with the tools necessary to finance, develop, and manage these emerging communities.

REQUIREMENTS

SAS CERTIFICATE IN BUSINESS ANALYTICS

The master of science in business analytics (MSBA) program enhances its business analytics program by offering a SAS certificate in business analytics. The certificate is available only to students enrolled in the MSBA effective fall 2016 semester. The certificate program is a result of a confluence of factors—the urgent need for more trained STEM workers in the U.S., the D.C. metro region’s reputation as a focus for business analytics, the growing importance of being able to harness the power of “big data,” and the attractive and lucrative career paths for students with STEM training.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

ACCOUNTANCY

GW Business School’s Bachelor of Accountancy and Master of Accountancy degree programs prepare students to make significant contributions to both private and public organizations in the global economy. In addition to a rigorous program of study, students gain practical experience through internships and the opportunity to study the stock market in a classroom outfitted like a Wall Street trading venue. The faculty coordinates access to executives in high-profile firms and agencies and government officials so that students further their exposure to, and training in, the discipline.

Visit the program website (http://business.gwu.edu/programs/specialized-masters/master-of-accountancy) for more information.

UNDERGRADUATE

Bachelor’s program
- Bachelor of Accountancy (http://bulletin.gwu.edu/business/undergraduate-programs/accountancy)
- Bachelor of Business Administration (p. 456)

Combined programs
- Dual Bachelor of Accountancy and Master of Accountancy (B.Accy./M.Accy.) (p. 467)
- Dual Bachelor of Business Administration and Master of Accountancy (and B.B.A./M.Accy.) (p. 467)

GRADUATE

Master’s program
- Master of Accountancy (p. 469)
ACCY 3101. Intermediate Accounting I. 3 Credits.

ACCY 2001. Intro Financial Accounting. 3 Credits.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.
The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders’ equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisite: ACCY 3101.

ACCY 3106. Financial Statement Analysis. 3 Credits.
Introduction to the analysis and interpretation of corporate financial statements within the context of a company’s industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.
A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.
Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 & ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.
Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments.

ACCY 4301. Auditing. 3 Credits.
A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.
Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.
Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.
ACCY 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.
Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.
The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.
Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Restricted to School of Business graduate degree students. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.
Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.
Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101/MBAD 6211.

ACCY 6110. International Reporting and Control. 1.5 Credit.
International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.
Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisite: ACCY 6101/MBAD 6211. Same as IBUS 6310.

ACCY 6201. Managerial Accounting I. 1.5 Credit.
Effective use of accounting information in decision making and control of organizations. Same as MBAD 6213. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6202. Managerial Accounting II. 1.5 Credit.
Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisite: ACCY 6201/MBAD 6213.

ACCY 6203. Controls, Alignment & the Org.. 1.5 Credit.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.
A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Prerequisite: ACCY 6101/MBAD 6211; corequisite: ACCY 6104.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.
Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisite: ACCY 6101/MBAD 6211; a course in auditing preferred but not required.

ACCY 6401. Federal Income Taxation. 3 Credits.
A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.
Financial and tax accounting for partnerships; formation and operation, distribution to partners, liquidation, and transfer of partnership interests. S corporations are also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.
Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6501. Accounting Information Systems and EDP. 3 Credits.
Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.
ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.
The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

ACCY 6900. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.
Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

DECISION SCIENCES

UNDERGRADUATE

Bachelor's program
- Bachelor of Business Administration (p. 456)

GRADUATE

Master's programs
- Master of Science in Business Analytics (p. 470)
- Master of Science in Project Management (p. 472)

FACULTY

Associate Professors D.F. Cioffi (Teaching), P. Delquie (Teaching), S. Jain (Teaching), H. Khamooshi (Teaching), A. Jarrah, S. Kanungo (Chair), Y.H. Kwak, M.A. Lejeune, S.Y. Prasad

Assistant Professors M. Altug, J.S. Kettunen, M.E. Matta (Teaching)

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DNSC 3401. Introduction to Business Analytics. 3 Credits.
Fundamentals of business analytics: what information it provides, how and when that information is used, and how it affects decision making. Working with uncertainty; understanding the dynamic nature of decision making; using data, regardless of its size; and making decisions with incomplete data. The simulation of real-life scenarios to support optimal decision making. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111.

DNSC 3402. Data Mining. 3 Credits.
The practice of exploring and discovering actionable business intelligence from large amounts of data; concepts, methods, and tools; supervised and unsupervised data mining techniques for discovering relationships in large data sets and building predictive models; regression models, decision trees, neural networks, clustering, and association analysis. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111; Math 1231 or Math 1252.

DNSC 4403. Decision Models. 3 Credits.
Students learn to design and develop decision models using spreadsheet software with specialized decision support add-ins, and to effectively interpret the models' outputs. Commonly used classes of models including, optimization, Monte Carlo simulation and decision analysis. Models discussed span business disciplines including finance, accounting, marketing, human resources, economics, and operations. Prerequisites: DNSC 3401.

DNSC 4404. Essentials of Project Management. 3 Credits.
Theoretical foundations of and practical insights into project management; the role of project management in contemporary business and government organizations; the link between projects and strategy. Project design and development.

DNSC 4900. Special Topics. 0-3 Credits.

DNSC 6201. Introduction to Business Analytics. 1.5 Credit.
An introduction to business analytic concepts, methods, and tools with concrete examples from industry applications; Big Data and the opportunities it has created for businesses to store, organize, and analyze vast amounts of information. Completion of a basic course in statistics prior to enrollment is recommended.
DNSC 6202. Mathematics and Statistics for Management. 3 Credits.
Mathematical and statistical concepts employed in the solution of managerial problems. Applications of functions, elements of calculus, and linear algebra. Introduction to probability, frequency distributions, statistical inference, and regression and correlation.

DNSC 6203. Statistics for Analytics I. 1.5 Credit.
The foundations of statistical methodologies used in business analytics; statistical inference and probability models; methods of estimation, hypothesis testing, contingency table analysis, analysis of regression models and logit and probit analysis. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission.

DNSC 6206. Stochastic Fndn: Prob Models. 1.5 Credit.

DNSC 6207. Applied Probability Models. 1.5 Credit.

DNSC 6208. Computational Optimization. 3 Credits.

DNSC 6209. Forecasting for Analytics. 1.5 Credit.

DNSC 6210. Decision and Risk Analytics. 1.5 Credit.
Concepts, methods, and practical tools to analyze managerial decisions involving risk and uncertainty. Decision tree modeling, the strategic value of information, real options valuation, measurement and incorporation of risk preferences, and Monte Carlo simulation. The roles and limitations of judgment and sensitivity and robustness analysis as means to deal with the ambiguities inevitably present in real situations.

DNSC 6211. Programming for Analytics. 3 Credits.
Accessing, preparation, handling, and processing data that differ in variety, volume, and velocity. The ability to handle and process data is a core capability in the context of any analytics position in the industry. Development of a theoretical grounding in emerging paradigms like schema-less data. The programming environments that will be typically employed include Python and R.

DNSC 6212. Optimization Methods and Applications. 3 Credits.
Linear, network, integer, and nonlinear models and their fundamental underlying analytic concepts and solution methods. Emphasis on development of an intuitive understanding of solution methods and their underpinning theoretical paradigms for effective use of optimization models. Model formulation, solutions, and interpretation of results.

DNSC 6213. Statistics for Analytics II. 1.5 Credit.
Statistical methodologies for business analytics in real world scenarios; introduction of high-level analytical techniques such as hierarchical linear modeling and mixed-effects modeling. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission. Prerequisites: DNSC 6203.

DNSC 6214. Pricing and Revenue Management. 1.5 Credit.
Methodologies for addressing pricing issues; tactical optimization of pricing and capacity allocation decisions; quantitative models of consumer behavior and constrained optimization.

DNSC 6215. Social Network Analytics. 1.5 Credit.
Concepts, methods, and applications of network science; Analyzing real networks and related phenomena such as disease propagation, organizational analysis, social power, and fraud detection. Exposure to Python and R scripts prior to enrollment is recommended.

DNSC 6216. Business Analytics Skills Workshops. 0-1.5 Credits.
A series of workshops covering project management techniques for analytics projects, team dynamics skills, communicating quantitative information, and ethics, security, and privacy policies in analytics.

DNSC 6217. Business Analytics Practicum. 1.5 Credit.
Working in small teams, students apply their analytics skills to projects sponsored by public or private institutions. Each team is advised by a faculty member, and the practicum sponsor designates a mentor to provide guidance to the team for the duration of the project. Prerequisite: MSBA degree candidacy.

DNSC 6218. Time Series Forecasting for Analytics. 3 Credits.
Predictive analysis and blackbox models for time series and econometric forecasting; identifying hidden patterns and structures in the univariate and multivariate time series data and exploiting these for forecasting; use of SAS to apply different forecasting models and methodologies to real life time-series data. Restricted to students in the master of science in business analytics degree program; program approval may be substituted.

DNSC 6225. Business Process Simulation. 1.5 Credit.
Introduction to the compromises and limitations involved in business process design; basic tools used to analyze and improve processes; simulation models using a powerful discrete-event simulation tool. Restricted to students in the master of science in business analytics degree program; program approval may be substituted. Prerequisites: DNSC 6202.

DNSC 6230. Mgt of Technology Innovation. 3 Credits.

DNSC 6234. Procurement & Contracting. 3 Credits.
Principles and concepts essential to effecting large procurement programs. Planning, sourcing, and contractual design for diverse acquisitions. Emphasis on federal government policy with comparison of buying at other governmental levels and the private sector.

DNSC 6235. Communication Strategies in Project Management. 3 Credits.
Communication leadership and management practices that facilitate successful project management; strategies and practices related to communication, change management, and performance reporting.
DNSC 6236. Project Quality Management. 3 Credits.
DNSC 6237. International Project Management. 1.5 Credit.
Augments the basics of project management with theory, practice, and methodology related to global project environment; practical investigation of the cultural environment in the context of managing global projects.
DNSC 6239. Project Governance. 1.5 Credit.
An overview of project governance; models, practices and case studies.
DNSC 6247. Organization, Management, and Leadership. 3 Credits.
Fundamentals of human resource management for project managers. Tools and techniques for success in managing and leading people in a project environment.
DNSC 6250. Project Management Finance. 3 Credits.
DNSC 6251. Optimization Models for Decision Making. 1.5 Credit.
Optimization techniques, including linear programming, sensitivity analysis, networks, integer programming and multiple objective optimization, and nonlinear and evolutionary programming. Prerequisites: DNSC 6202 (equivalent to MBAD 6221 and MBAD 6222 or MBAD 6224).
DNSC 6252. Risk Analysis for Decision Making. 1.5 Credit.
Probabilistic modeling techniques with spreadsheet implementation. Special focus is placed on the concept of risk and methods for analyzing it. Topics include: risk attitudes, risk measures, decision trees, simulation models, game theory, real options approach, and risk communication.
DNSC 6254. Risk Management. 1.5 Credit.
Basic principles of risk management practices. Developing a risk management plan, including identifying, analyzing, mitigating, and monitoring projects risks. Prerequisites: DNSC 6202 or MBAD 6224 or MBAD 6221, MBAD 6222.
DNSC 6257. Cost Estimation and Control. 1.5 Credit.
Methods of developing project estimates during the planning stages and updating the estimates throughout the life of the project; monitoring, reporting, controlling, and managing project cost; relationships between project cost and other parameters, including scope, time, quality, reliability and procurement risk. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.
DNSC 6258. Executive Decision Making. 1.5 Credit.
DNSC 6259. Project Portfolio Management. 1.5 Credit.
Management of an organization's portfolio of projects for the overall success of the enterprise; alignment of projects with an organizations strategy and goals and consistency with values and culture. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.
DNSC 6261. Introduction to Project and Program Management. 3 Credits.
Practical examination of how projects can be managed from start to finish, including specific emphasis on planning and controlling to avoid common pitfalls. Identifying needs, defining requirements, project costing, scheduling, resource allocation, and project politics.
DNSC 6262. Directed Computational Project Management. 3 Credits.
Practical examination of project management concepts by quantitative application using various software tools. Research in real cost data to support project calculations. Prerequisite: DNSC 6254, DNSC 6257, DNSC 6261, DNSC 6267.
DNSC 6263. Managing External Projects. 3 Credits.
Fundamentals of contract management from a project manager’s perspective. The outsourcing process, associated project strategies, and legal elements. Acquisition planning, vendor selection, contract formulation, and performance control.
DNSC 6267. Planning and Scheduling. 3 Credits.
Integrated planning, scheduling, and control systems for planning the scope of a project; optimizing time, cost, and resources; and monitoring and controlling schedules, including those for delayed projects. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.
DNSC 6269. Project Management Application. 3 Credits.
Students will be expected to demonstrate integration of the knowledge accumulated in their study plan and apply integrated knowledge and experience to best practices, a project case history, and a handbook. Prerequisites: M.S.P.M. candidacy or permission of instructor/advisor.
DNSC 6274. Statistical Modeling and Analysis. 3 Credits.
The process of specifying, analyzing, and testing models of human and systemic behavior. Formalization of models; statistical test comparison and selection; computer implementation of univariate, bivariate, and multivariate tests. General linear model: linear regression, analysis of variance, and analysis of covariance. Prerequisite: MBAD 6221 and MBAD 6222.
DNSC 6275. Advanced Statistical Modeling and Analysis. 3 Credits.
Advanced topics associated with the general linear model. Testing for and remediation of assumption violations. Detection of outliers, influential observations, and multicollinearity. Alternative design strategies in the analysis of variance; latent growth analysis; hierarchical linear modeling; testing for interactions and parallelism. Prerequisite: DNSC 6274 or permission of instructor.
DNSC 6276. Exploratory and Multivariate Data Analysis. 3 Credits.
Methods for exploratory and multivariate data analysis. Application and comparison of advanced multivariate analytical procedures. Multivariate and discriminant analysis, LISREL analysis, and canonical correlation. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6277. Applied Forecasting and Time-Series Analysis for Managers. 3 Credits.
Introduction to various forecasting techniques, including time-series regression models, cyclical trends, exponential smoothing methods, seasonal and nonseasonal ARIMA processes, and the Box–Jenkins approach. Application of forecasting methods in economics, finance, and marketing. Prerequisite: MBAD 6222 or permission of instructor.

DNSC 6279. Data Mining. 3 Credits.
How organizations make better use of the increasing amounts of data they collect and how they convert data into information that is useful for managerial decision making. Examination of several data mining and data analysis methods and tools for exploring and analyzing data sets. State-of-the-art software tools for developing novel applications.

DNSC 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

DNSC 6298. Directed Readings and Research. 0-3 Credits.

DNSC 6300. Thesis Seminar. 3 Credits.

DNSC 6401. Sustainable Supply Chains. 1.5 Credit.
Introduction to integrating environmental management and sustainability concepts into the operations and supply chain management fields.

DNSC 8328. Special Topics in Decision Making. 3 Credits.
Special topics and advanced applications, such as catastrophe theory, Markovian decision processes, and Bayesian statistics. May be repeated once for credit.

DNSC 8385. Special Topics in Research Methods. 3 Credits.
Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

DNSC 8397. Advanced Special Topics. 1-3 Credits.
Current research and scholarly issues in management science.

DNSC 8998. Advanced Rdgs & Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

DNSC 8999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

FINANCE

UNDERGRADUATE

Bachelor's programs

• Bachelor of Business Administration (p. 452)
FINA 3301. Money and Capital Markets. 3 Credits.
The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 3401. A Brief History of Finance. 3 Credits.
History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues.

FINA 3401W. A Brief History of Finance. 3 Credits.
History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4001. Advanced Financial Management. 3 Credits.
Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4001W. Advanced Financial Management. 3 Credits.
Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.
Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance w/Simulation. 3 Credits.

FINA 4201. Real Estate Investment. 3 Credits.
Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.
The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods.

FINA 4995. Independent Study. 1-15 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 6220. Business Financial Management. 3 Credits.
FINA 6221. Financial Decision Making. 3 Credits.
Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm’s market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.
Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6231. Sem:Investment & Portfolio Mgt. 3 Credits.
FINA 6230. Urban Development Economics. 3 Credits.
FINA 6230. Urban Development Economics. 3 Credits.

FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.
Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

FINA 6236. Options. 3 Credits.
Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.
FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.
Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.
Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.
Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: (MBAD 6234 or MBAD 6235) and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.
Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.
Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.
Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6245. Land Development Law. 3 Credits.

FINA 6247. Urban Development Economics. 3 Credits.

FINA 6248. Real Estate Development Cases. 3 Credits.
Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.
Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.
Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.
Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.
Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6274. Corporate Financial Management and Modeling. 4 Credits.
Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm's common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.
Financial markets and instruments viewed from the investor's perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.
Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.
FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.
Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.
Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.
Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.
Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.
Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 0-4 Credits.
Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.
Same as IBUS 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.

FINA 6299. Thesis Seminar. 3 Credits.

FINA 6998. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

FINA 6999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.
INFORMATION SYSTEMS AND TECHNOLOGY MANAGEMENT

UNDERGRADUATE

Bachelor’s programs

• Bachelor of Business Administration with a concentration in information systems and technology management (p. 452)
• Combined Bachelor of Business Administration and Master of Science in Information Systems Technology (p. 504)

GRADUATE

Master’s program

• Master of Science in Information Systems Technology (p. 471)

FACULTY

Professors E.G. Carayannis, M.J. Granger

Associate Professors J. Artz, S. Dasgupta, R.G. Donnelly (Chair), W. Duan, R.A. Lumley

Assistant Professors Y.C. Ho, Y. Park

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: M.S.I.S.T. candidacy or departmental approval is prerequisite to ISTM 6201 Information Systems Development and Applications-ISTM 6225 Enterprise Architecture.

ISTM 6401 -ISTM 6490 are available only to students enrolled in the Executive Master of Science in Information Systems Technology.

ISTM 4120. Business Systems Development. 3 Credits.
Analysis, design, and implementation of management information systems (MIS). Structured methodologies and techniques for various stages of the MIS development process. Computer-aided software engineering tools. May be taken for graduate credit with permission of program director and instructor. Prerequisites: CS 1111 or ISTM 3119 or permission of instructor.

ISTM 4121. Database Principles and Applications. 3 Credits.
Theory, architecture, and implementation of database management systems in corporate and organization information systems; fundamental concepts of database management and processing; hands-on experience with database management packages. Prerequisites: CS 1111 or ISTM 3119 or permission of instructor.

ISTM 4123. Business Data Communications. 3 Credits.
A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.

ISTM 4123W. Business Data Communications. 3 Credits.
A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.

ISTM 4130W. Writing On The Ethics of Technology. 3 Credits.
Complex ethical dilemmas inherent in the introduction of new technologies and the influence human behavior asserts on these problems. Students write stories to explore and evaluate specific ethical problems relative to technology from various perspectives.

ISTM 4215. Human-Computer Interaction. 3 Credits.
An introduction to and overview of the field of human-computer interaction (HCI), an interdisciplinary field that integrates theories and methodologies from computer science, cognitive psychology, design, and other areas. Readings cover current theory and practice in interface specification, design, and evaluation, and include current and classic research papers in the field.

ISTM 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 4995. Independent Study. 3 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

ISTM 3119. Introduction to Programming. 3 Credits.
For students already familiar with basic computer concepts, who will learn a programming language, such as Visual Basic, useful for business applications. Emphasis on computer applications in accounting and management information systems through hands-on programming. Prerequisite: BADM 2301.
ISTM 6201. Information Systems Development and Applications. 3 Credits.
The information systems life cycle evaluated in terms of technologies, impact, and management. Structured and object-oriented analysis, prototyping, software reuse, testing, life-cycle costs, software development environments, and organizational and behavioral aspects of development projects. Prerequisite: ISTM 4120 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6202. Relational Databases. 3 Credits.
Introduces the theory of relational databases and commences an in-depth discussion of Relational database theory and design at the conceptual, logical, and physical levels. Structured query language (SQL) is covered in depth. Prerequisite: ISTM 4121 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6203. Telecommunications and Enterprise Networks. 3 Credits.
The technologies and applications of telecommunication systems in the commercial and public sectors with emphasis on wireless, mobile, and Internet communication protocols. Systems technology and configurations to support business application requirements are evaluated. Functional characteristics of network technologies. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6204. Information Technology Project Management. 3 Credits.
Project and program management practices with an emphasis on information technology projects. The basic tools of project management: work breakdown structure, cost, schedule and performance goal setting, and risk analysis. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6205. Internet Computing. 3 Credits.
Concepts, architectures, frameworks, and technology of web application development. The Internet as hardware and software architecture for creating business applications. Web and web application servers, system development methods and techniques, client-side and server-side scripting. Prerequisite: ISTM 3119 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6206. Information Systems Security. 3 Credits.
Comprehensive examination of computer security issues from the design, management, and business information system ownership perspectives. System security concepts, methods, and policies from the design and planning stages to multi-level system implementation. Design of risk assessment strategies to achieve security goals. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6207. Information Resources Management. 3 Credits.
Information resources management strategically assesses and exploits information technology assets for competitive advantage. The CIO role in information resources management, planning, security, information integration, enterprise model development, and data administration. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6208. Enterprise Web and Database Applications. 3 Credits.
Introduction to the theory of web application development, massively distributed applications, and client/server side scripting. Prerequisite: ISTM 6202, ISTM 6205 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6209. Web and Social Analytics. 3 Credits.
Concepts, techniques, and tools of collecting, analyzing, and reporting digital data concerning how users interact with organizations through the Internet and social media; business intelligence; key performance indicators; new business models.

ISTM 6210. Integrated Information Systems Capstone. 3 Credits.
Capstone project course in which students apply conceptual and technical knowledge in analyzing, planning, and designing an on-line information system. Culminates with system proposal/design presentations. Restricted to eligible students in their final semester. Prerequisite: ISTM 6201– ISTM 6207 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6211. Data Warehousing and Online Analytical Processing. 3 Credits.
Introduction to the theory of data warehousing, dimensional data modeling, and online analytical processing (OLAP) through case studies, technology, and a design project. Prerequisite: ISTM 6202 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6212. Data Management for Analytics. 3 Credits.
Relational databases, data warehousing, and dimensional modeling. Practical experience with these and other traditional and contemporary methods for managing and analyzing data at scale, including Unix command line and Apache Spark.

ISTM 6213. Enterprise Web and Database Applications. 3 Credits.
Enterprise applications concepts, architecture, and technologies for emerging technologies and IT frameworks. The Internet as a major resource for globally distributed applications using grid and utility computing. Web servers, development methods and techniques, data stores for massively distributed applications, and client/server side scripting. Prerequisite: ISTM 6202, ISTM 6205 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6214. Advanced Programming and Business Applications. 3 Credits.
Advanced programming design, development, and analysis topics with an emphasis on business applications. Problem modeling and development of algorithm solutions. Basic data structures and algorithms, such as linked list, stack and tree, graph theory, sorting and searching. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6215. Human-Computer Interaction. 3 Credits.
Human–computer interaction as an interdisciplinary endeavor integrating theories and methodologies from computer science, cognitive psychology, design, and many other areas. Theory and practice in interface specification design and evaluation, and research. Prerequisite: M.S.I.S.T. candidacy or departmental approval.
ISTM 6221. Management Perspectives in Electronic Commerce. 3 Credits.
The tools, skills, and business concepts surrounding the emergence of E-commerce and its information technologies from operational and strategic perspectives. E-commerce security, privacy, content selection and rating, authentication, encryption, acceptable use policies, intellectual property rights, and legal liabilities. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6222. IS/IT Strategy and Implementation. 3 Credits.
The development and implementation of information systems and technology strategies designed to align with and maximize business strategy applications and approaches in a challenging and increasingly global business environment. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6223. Technology Entrepreneurship. 3 Credits.
Case studies on the innovation-entrepreneurship processes used to launch and build new ventures based on information technology and on technology more broadly. Organizing for innovation, raising venture capital, managing the small technology-based venture, marketing technology products and services, intellectual property considerations, and new venture proposal development. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6224. Management of Technology and Innovation. 3 Credits.
Business, technological, economic, and political factors that influence the development and deployment of new technology products, processes, and services. Concepts and practices useful in managing technology and enhancing corporate innovation, corporate organizational alternatives, new approaches, and sources of competitive advantages. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6225. Enterprise Architecture. 3 Credits.
Concepts of enterprise architecture as a management tool for organizations to align their information technology assets, people, operations, and projects with operational characteristics. Service-oriented architectures, performance reference models, configuration management, system development life cycles, and tiered application architectures. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6226. Principles of Information Systems. 3 Credits.
Overview of all information systems, including integration of management, information, and systems concepts into a unified framework. Management information systems development, design, implementation, evaluation strategies.

ISTM 6232. ISTM6242201303. 3 Credits.
Technology transfer among advanced countries and LDCs. Comparative science and technology policies and capabilities of countries. Technology basis for international trade, licensing, patenting, and joint ventures. Global transfer of military technologies and export controls. Technology in economic development.

ISTM 6233. Emerging Technologies. 3 Credits.
Exploration of new developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space. Emphasis on forecasting these technological advances and assessing their economic and social effects. The role of advancing technology in driving social change.

ISTM 6234. New Venture Financing. 3 Credits.
Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Same as FINA 6234.

ISTM 6239. Sem:Competitiveness/Technology. 3 Credits.
Capstone course integrating the field of management of science, technology, and innovation. Commercialization of technology in the private sector and the impact on competitiveness. Implementation of technology in the public sector. Technology development, from new product concept to utilization. Prerequisite: ISTM 6224 or MBAD 6253; ISTM 6232 or ISTM 6233 or permission of instructor.

ISTM 6243. Human Factors in Information Systems. 3 Credits.
The user–computer interaction, human factors of on-line dialogues, interfacing, and various approaches to user-system interaction. Emphasis on the development and evaluation of user-computer interfaces using software such as Visual BASIC and Windows.

ISTM 6251. Info Systems Applications. 1.5 Credit.

ISTM 6290. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 6298. Directed Readings and Research. 1-3 Credits.

ISTM 6299. Thesis Seminar. 3 Credits.

ISTM 6333. Seminar: Management of Science, Technology, and Innovation. 3 Credits.

ISTM 8300. Thesis Seminar. 3 Credits.

ISTM 8315. Fundamentals of Research Methodology. 3 Credits.
Seminar for doctoral students interested in information systems. Various philosophical traditions and insights from those traditions applied to problems in information systems.

ISTM 8341. Advanced Topics in MIS Rsrch. 3 Credits.
For information systems doctoral students. Seminal papers and leading methods and instruments as applied to MIS research.

ISTM 8385. Special Topics in Research Methods. 3 Credits.
Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

ISTM 8390. Philosophical Foundations of Administrative Research. 3 Credits.
Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.
DUAL BACHELOR OF BUSINESS ADMINISTRATION AND MASTER OF SCIENCE IN INFORMATION SYSTEMS TECHNOLOGY

REQUIREMENTS

Students in the dual program leading to the master of science in information systems technology first pursue the B.B.A. with a concentration in information systems. Students pursue the regular B.B.A. curriculum in their first three years of study and are enrolled in courses at both the undergraduate and graduate levels during the final two years. Students can apply for admission to the program when they apply for admission to the University (they must meet specified GPA and other requirements to remain in the program), or they may apply after earning 75 credits. Students typically earn the B.B.A. after four years and the M.S.I.S.T. at the end of the fifth year. Students who choose to discontinue the program at the end of four years may be required to take additional courses to complete requirements for the B.B.A.

INTERNATIONAL BUSINESS

UNDERGRADUATE

Bachelor's program

- Bachelor of Business Administration with a concentration in international business (p. 452)

FACULTY

Professors H.G. Askari, J. Brinkerhoff, D. Leipziger (Teaching), Y.S. Park, A. Phene (Chair), P.A. Rau, S.S. Rehman, F. Robles, J.W. Spencer, R. Weiner, J. Yang

Associate Professors M. Ayyagari, H. Berry, R.W. Click, N. Jensen, N. Maurer, L.A. Riddle

Assistant Professors W. Chen, A. Helm (Teaching)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

IBUS 3001. Introduction to International Business. 3 Credits.
The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Prerequisites: ECON 1011 or HONR 2043 and ECON 1012 or HONR 2044.

IBUS 3001W. Introduction to International Business. 3 Credits.
The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ECON 1011 or HONR 2043 and ECON 1012 or HONR 2044.

IBUS 3101. Global Financial Environment. 3 Credits.
The international economic, trade, and financial environment in which global business operates and how developments in these areas affect business activity. Prerequisites: ECON 1011 or HONR 2043 and ECON 1012 or HONR 2044.

IBUS 3201. International Marketing Management. 3 Credits.
Introduction to international marketing analysis and strategy, and the dynamic nature of international markets. Analysis of different types of international markets and formulation of strategies at the entry and global stages. Prerequisites: IBUS 3001.

IBUS 3301. International Business Finance. 3 Credits.
Analysis of the international economic environment and its influence on corporate financial management of international operations. Prerequisites: IBUS 3001, IBUS 3101 and BADM 3501.
IBUS 4202. Regional Strategy for Multinationals. 3 Credits.
The business, economic, investment, and market environments in different regions of the world; regional strategy framework for responding to business opportunities in regional markets. Prerequisites: IBUS 3001.

IBUS 4203. Foreign Market Analysis. 3 Credits.
Project course involving market research for target market selection, market entry strategy, in-country marketing plan, and recommendations for strategy implementation in the target country. Focus on consulting process as ancillary component. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3201.

IBUS 4302. International Banking. 3 Credits.
Theory and practice of international banking; analysis of international commercial and investment banking from a management perspective; subjects include current international monetary and financial environment, money and capital markets, and topical problems of international banking from a management perspective. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3301.

IBUS 4303. International Monetary and Financial Issues. 3 Credits.
How authorities deal with financial problems; macro-economic framework that underpins the financial sector and the role of financial oversight institutions; Role of central banks and the risks facing the international monetary and financial system. Prerequisites: IBUS 3001 or IBUS 3101 and IBUS 3301.

IBUS 4401. Managing the Multinational Enterprise. 3 Credits.
The changing nature of the international environment and the resulting effects on strategy of U.S. and foreign multinational corporations. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4402. Managing in Developing Countries. 3 Credits.
Challenges of operating in developing countries; cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisites: IBUS 3001 or IBUS 3101.

IBUS 4402W. Managing Developing Countries. 3 Credits.
Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisites: IBUS 3001 or IBUS 3002, or permission of instructor.

IBUS 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4995. Independent Study. 1-12 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 6201. International Marketing. 3 Credits.
International marketing strategy formulation, including market entry, local market development, and global market integration; strategic challenge of global marketing formulation and local market adaptation, with attention to market conditions in mature, new growth, and emerging market environments; emerging trends.

IBUS 6202. Regional Strategy for Multinationals. 0-3 Credits.
Development of a framework to understand dynamic business, cultural, and economic environments in Asia and Latin America. Regional business strategies of multinational companies from outside and within Asia and Latin America that respond to business opportunities and challenges in these regions.

IBUS 6290. Special Topics. 0-3 Credits.
Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

IBUS 6297. International Management Experience. 1-6 Credits.
May be repeated for credit.

IBUS 6301. International Business Finance. 3 Credits.
Analysis of major issues and developments in the international financial environment and their impact on multinational corporations and financial institutions.

IBUS 6302. Seminar: International Banking. 3 Credits.
Evolution in international banking and other international financial institutions. Functioning of international banking operations, public policy issues and regulatory issues in international banking, and the effect of international banks on national monetary policies.

IBUS 6303. External Development Financing. 3 Credits.
Institutions, instruments, and theory of external development financing; financial flows to developing countries; development finance and the role of international and regional development banks; policies, methods, and practices of the World Bank, the IMF, and others; technical assistance, training, capacity building, and role of institutions in sustained development. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6304. Financial Crises and the Global Economy. 3 Credits.
The causes of a financial crisis and how various countries have responded to their specific crises; the relationship between financial crises and other economic developments, particularly in emerging market and developing economies; how global financial arrangements have evolved to help manage the risks of contagion. Recommended background: graduate-level study in macroeconomics.
IBUS 6305. Global Investment Banking. 3 Credits.
Examination of investment banking as practiced in a global context from a strategic perspective using case studies and readings. Topics covered include securities underwriting and derivatives instruments, risk management, and business development strategies. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6306. Seminar: International Financial Markets. 3 Credits.
Survey of international financial markets, focusing on structure, operations, and pricing. Primary emphasis on markets for foreign exchange, Eurocurrency, international bonds, and commodities. Derivatives markets, especially swaps and options embedded in international securities issues. Prerequisite: IBUS 6301 and MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6307. International Portfolio Management. 3 Credits.
Theory and practice of international investment. Portfolio construction and optimization. Effects of exchange rate changes on portfolio risk and return. International asset pricing models and trading institutions. Prerequisite: MBAD 6234; either MBAD 6243 or ECON 6284.

IBUS 6308. Intl Reporting and Contrl. 1.5 Credit.

IBUS 6309. International Accounting. 1.5 Credit.

IBUS 6310. Intl Fin. Reporting Standards. 1.5 Credit.

IBUS 6400. Oil: Industry, Economy, and Society. 3 Credits.
Multidisciplinary approach to the study of oil and its effects on business, nation-states, and the world economy, based primarily on political economy and management perspectives. Topics include the oil industry, the global oil environment, and the potential effects of oil on a society. (Same as IAFF 6378).

IBUS 6401. International Business Strategy. 3 Credits.
Discussion of the changing nature of the international environment and the resulting impact on strategy of both U.S. and foreign multinational corporations. Various aspects of strategy are considered, including marketing, production, and financial strategy. The focus of discussion is at the company level.

IBUS 6402. Managing in Developing Countries. 3 Credits.
Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards.

IBUS 6403. International Business Negotiations. 3 Credits.
Theories and application in International Business Negotiations (IBN). Formulation of concepts and frameworks; development of systematic approaches to planning for and conducting IBN. Integration of functional, environmental, and institutional contexts facing negotiators internationally. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6404. New Global Competitive Framework. 3 Credits.
How industries develop sustained competitive advantages within the global framework. The European Union's "single market" and the Economic-Monetary Union; the transformation of formerly centrally planned economies; the changing Japanese economy and emerging Pacific Basin, with implications for the U.S. economy, industries, and firms. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6405. Legal Aspects of International and Multinational Business. 3 Credits.
Legal environment of international and multinational business including legal systems, antitrust laws, regulation of direct investment, international arbitration and expropriation; topics of current interest. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6500. Global Currency and Stock Trading. 1.5 Credit.
Linkages of global events and risks and their impact on financial markets; foreign exchange market trading philosophies, techniques, strategies, and rules. Real-time practical training in trading major currencies, stocks, and managing an emerging markets portfolio in the GWSB Capital Markets Trading Room. Restricted to students in the World Executive MBA program.

IBUS 6501. International Finance. 1.5 Credit.
The international financial environment; balance of payments and exchange rate regimes; exchange rate determination; interest rate parity and the foreign exchange market; purchasing power parity and other international parity conditions; fundamental hedging techniques to manage foreign exchange exposure in international transactions. Restricted to students in the World Executive MBA program.

IBUS 6995. Directed Readings and Research. 3 Credits.
Supervised readings or research in selected fields within business administration. Admission by prior permission of instructor. May be repeated once for credit.

IBUS 6999. Thesis Seminar. 3 Credits.
No fixed content.

IBUS 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.
An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

IBUS 8361. Colloquium on International Business. 3 Credits.
Examination of selected topics in international business, with emphasis on major new theoretical and empirical developments. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.
IBUS 8397. Doctoral Seminar. 1-3 Credits.
No fixed content.

IBUS 8900. Thesis Research. 3 Credits.
No fixed content.

IBUS 8998. Advanced Readings and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

IBUS 8999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

MANAGEMENT
UNDERGRADUATE
Bachelor's program
• Bachelor of Business Administration (p. 460)

Combined program
• Dual Bachelor of Business Administration and Master of Tourism Administration (p. 467)

FACULTY
Professors J. Bailey, D. Hawkins, D.C. Kayes (Chair), L.A. Livingstone, G.T. Solomon, P.M. Swiercz, L. Yu

Associate Professors L. Delpy Neirotti, N.S. Hill, S. Levy (Teaching), P. McHugh, A. El Tarabishy (Teaching)

Assistant Professors N.A. Cohen, M. Hyman (Teaching), S. Singh

COURSES
Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MGT 3202. Managerial Negotiations. 3 Credits.
Negotiation concepts, strategies, and tactics as applied to managerial situations. The nature of interdependencies; competitive and collaborative negotiations; negotiations involving third-party dynamics, such as mediation and arbitration. Employee relations, including employee rights; the impact of unions and collective bargaining on management practices.

MGT 3203. Advanced Human Resource Management. 3 Credits.
The labor force and labor markets. The legal environment of human resource management. Human resource planning; employee recruiting, selection, training, development, compensation, motivation, discipline, health and safety. Prerequisite: BADM 3101.

MGT 3204. Contemporary Topics in Management. 3 Credits.
Contemporary practice in human resource planning, recruitment and selection, training and development, performance management, compensation and benefits, employee relations, and international human resource management. Interaction with practitioners through actual situations, case analyses, and presentations. Prerequisite: BADM 3101.

MGT 3300. Entrepreneurship. 3 Credits.
Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

MGT 3300W. Entrepreneurship. 3 Credits.
Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

MGT 3301. Small Business Management. 3 Credits.
Theory and practice of entrepreneurship. How to start or acquire a new business; effective management, including the essentials of planning, organizing, financing, marketing, and controlling the smaller enterprise. Students consult with a small D.C.-area company as part of a team research project. Prerequisite: MGT 3300W or permission of instructor.

MGT 3302. e-Entrepreneurship. 3 Credits.
The process of turning a web, mobile, or wearable business idea into a validated, repeatable, and scalable business model using lean startup methodologies; testing and user feedback, technology basics, promotions, and tracking core metrics. Prerequisites: MGT 3300W.

MGT 3303. Women's Entrepreneurial Leadership. 3 Credits.
Students create and execute a business plan while developing essential skills, mentoring relationships, and self-confidence and self-insight.
MGT 3305. Human Capital Sustainability. 3 Credits.
Managerial challenges associated with employment, economic efficiency, employee equity, and employee voice. How market forces, public policy, negotiations, and globalization affect sustainable employment relationships.

MGT 4003. Management of the Growing Entrepreneurial Venture. 3 Credits.
Examination of the data, dilemmas, and decisions that can confront leaders of post-startup entrepreneurial ventures.

MGT 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 4900W. Special Topics. 3 Credits.

MGT 4995. Independent Research. 1-6 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

MGT 6210. Leading Teams. 3 Credits.
Knowledge and skills for effectively leading teams, including setting teams up for success, promoting effective team dynamics, and other leadership issues for contemporary teams that operate in a global, digital environment.

MGT 6213. Organizational Factors/Pro of Change. 3 Credits.
Behavioral and organizational components of individual, team, and firm-wide change. The dynamics that often accompany the change process.

MGT 6214. Consultative Processes. 3 Credits.
Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process. Same as SMPP 6214/ TSTD 6214.

MGT 6215. Conflict Management and Negotiations. 3 Credits.
The nature and sources of conflict and interdependence in social and organizational dynamics. Various means of resolving conflict, including the use of competitive and collaborative negotiations and mediation. Case discussion, exercises, role-playing, and simulation. Managers as mediators and negotiators.

MGT 6216. Cross-Cultural Management. 3 Credits.
The cultural foundations of organizations and institutions, with an emphasis on managerial behavior. Cross-cultural differences as they affect work-related behaviors, such as communication, attitude, teamwork, negotiation, and decision making.

MGT 6252. Global Human Resource Management. 3 Credits.

MGT 6253. Leadership and Executive Development. 3 Credits.
The required skills, knowledge, and abilities for effective executive leadership in organizations. Contemporary and classical leadership theories and research approaches.

MGT 6254. Negotiations and Labor Relations. 3 Credits.
Negotiation theory and practice in the context of labor-management relations in both union and nonunion settings. Emphasis on negotiation and conflict resolution skills, arbitration and grievance procedures, public-sector labor relations, labor laws and public policy, and global labor relations issues.

MGT 6257. Performance Management and Development. 3 Credits.
Comprehensive review of performance appraisal and training and development. Students learn to develop customized training programs that relate to the performance appraisal process.

MGT 6258. Applied Organization Leadership. 3 Credits.
In-depth studies of theories of leadership. Legal and ethical obligations of leadership. The leader in the process of assuming responsibility. Experiential exercises designed to develop the students’ interpersonal abilities and leadership capacities.

MGT 6259. Employment Law and Ethics. 3 Credits.
An examination of the interaction of legal requirements and personal ethics and their influence on managerial decisions affecting the employment exchange. Special emphasis on equal employment opportunity and civil rights, workers’ compensation, occupational health and safety, collective bargaining, and wrongful discharge.

MGT 6270. Consulting Processes. 3 Credits.

MGT 6271. Consulting Practicum. 3 Credits.
Instruction in and application of integrative problem solving, team work, client relationship, and communications skills required to be a successful management consultant. Students gain practical experience through a team-based assignment consulting for a client. Prerequisite: MGT 6270.

MGT 6277. Critical Thinking Skills for Executive Leadership. 3 Credits.
Theory and practice of critical thinking; how it differs from other types of thinking and other executive leadership competencies; approaches known to improve thinking skills.

MGT 6280. Entrepreneurship. 3 Credits.
In exploring the “entrepreneur as a phenomenon,” students will be exposed to the theory and experiences associated with entrepreneurs, entrepreneurial acts, and entrepreneurship in all organizational settings—large, small, public, and private.

MGT 6281. Small Business Management. 3 Credits.
The start-up process and management of small firms. Field projects involve student teams as consultants to local businesses. Case studies. Emphasis on total customer service, international opportunities, and minority and women’s issues.
MGT 6282. New Venture Initiation. 3 Credits.
Essentials of planning a new business venture. Sources of financing, evaluation of alternative new business ventures, and analysis of business functions. Creating and analyzing the business plan.

MGT 6283. Strategic Entrepreneurship. 3 Credits.
Capstone course for the small business/entrepreneurship concentration. Student teams assist companies in upgrading strategies. Prerequisites: MBAD 6265, MGT 6281, MGT 6282 and/or permission of instructor.

MGT 6284. Family Business Management. 3 Credits.
Challenges of managing a family business: risk strategies; successor development and succession planning; stages of family business growth; family motivations and goals. Field projects provide hands-on experience.

MGT 6285. Social Entrepreneurship. 3 Credits.
Theory and practice of social entrepreneurship. The power and limits of social entrepreneurship as a tool for creating sustainable and scalable social impact.

MGT 6286. Creativity and Innovation. 3 Credits.
How organizational culture encourages or discourages creativity in individuals and teams and how organizational policies support or undercut innovation. Methods for developing and strengthening creative ideas and innovative action. Factors such as breakthrough design that encourage creativity and support innovation. Students examine and assess, on both personal and organizational levels, the bases of and propensity for creativity and innovation.

MGT 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 6297. International Mgt Experience. 3 Credits.
Same as FINA 6297/ IBUS 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

MGT 6298. Directed Readings & Research. 1-6 Credits.

MGT 6299. Thesis Seminar. 3 Credits.

MGT 6301. Negotiations. 1.5 Credit.

MGT 6999. Thesis Research. 3 Credits.

MGT 8382. Fndtns/OrgnztnlBehavr&Devlpmnt. 3 Credits.
The individuals and institutions central to the field of organizational behavior and development. Students read about, meet with, and discuss the work of persons central to the development of the field. Prerequisite: Doctoral candidate status with organizational behavior and development as a major or supporting field, or consent of instructor.

MGT 8383. Field Research in Organizational Settings. 3 Credits.
Applications of field research techniques in formal organizational settings. Examination of the logic of inquiry and techniques of qualitative data collection. Intensive interviewing and participant observation in field settings are emphasized.

MGT 8385. Special Topics in Research Methods. 3 Credits.
Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

MGT 8386. Management Ideas in Progress. 3 Credits.
Doctoral students work with a variety of faculty members as they develop new ideas, research projects, and engage in seminal inquiry. The content and structure of the course will depend upon the instructor. Prerequisites: Doctoral candidate status with organizational behavior and development as a major or supporting field, or consent of instructor.

MGT 8390. Philosphcl Foundtns-Adm Resrch. 3 Credits.
Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

MGT 8391. Adv Prob-Research Methodology. 3 Credits.
Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. For doctoral candidates who have completed the general examination and all courses and are preparing for their dissertation.

MGT 8397. Advanced Special Topics. 1-3 Credits.
Current research and scholarly issues in management science.

MGT 8998. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

MGT 8999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

MARKETING

UNDERGRADUATE

Bachelor's program
- Bachelor of Business Administration (http://bulletin.gwu.edu/business/undergraduate-programs/business-administration/marketing)

FACULTY

Professors R.S. Achrol, S.S. Hassan, D. Hoffman, L.M. Maddox, T. Novak, P.A. Rau (Chair)

Associate Professors S. Elliott (Teaching), M.L. Liebrenz-Himes, V. Perry

Assistant Professor S. Ham

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: BADM 3401 Basic Marketing Management is prerequisite to all courses in the Marketing Department; additional prerequisites are listed with the courses.

**MKTG 3142. Consumer Behavior. 3 Credits.**
Social, cultural, and psychological factors influencing the behavior of consumers. Models of buyer behavior, consumption patterns, market segmentation, attitude formation and change, brand loyalty, adoption of innovations, and store choice decisions. Marketing management and public policy implications of consumer research. Prerequisite: BADM 3401.

**MKTG 3143. Marketing Research. 3 Credits.**
Basic methods and techniques of market research. Designing a marketing research project: research questions, secondary and syndicated data, primary data collection approaches, data analysis and report presentation. Focus group interviews, questionnaire construction, statistical software packages. Prerequisite: BADM 3401 and STAT 2112 or STAT 2118.

**MKTG 4148. Advertising and Marketing Communications. 3 Credits.**
Executing and measuring the effectiveness of advertising and integrated marketing communications campaigns. Methods for gathering research for a customer-based campaign, defining key target personas, developing a singular message strategy, and reaching consumers through media typically used in marketing communications. Prerequisites: BADM 3401 and MKTG 3142 and MKTG 3143.

**MKTG 4149. Advanced Advertising Campaigns. 3 Credits.**
Participation in the National Student Advertising Competition. Research, media planning, copywriting, layout/design. Travel to competition site. Prerequisite: BADM 3401 and MKTG 4148 and permission of instructor; corequisite: MKTG 4151.

**MKTG 4149W. Advanced Advertising Campaigns. 3 Credits.**
Experiential learning prepares students to execute an advertising campaign for entry in the American Advertising Federation’s National Student Advertising Competition. Research, media planning, copywriting, and layout and design. Students travel to the competition site. Prerequisites: BADM 3401 and MKTG 4148 and permission of the instructor.

**MKTG 4150. Salesmanship and Sales Management. 3 Credits.**
Development of personal selling and presentation skills; examination of types of selling situations. Organization of sales department, sales planning and forecasting, quotas, territories, performance standards, and analysis and control of distribution costs. Prerequisite: BADM 3401; MKTG 3142.

**MKTG 4151. Marketing Communications Planning. 3 Credits.**
Components of a marketing communications plan. Writing a professional proposal, plans book, executive summary, and speech. Prerequisite: BADM 3401 and MKTG 4148; corequisite: MKTG 4149.

**MKTG 4151W. Mktg Communications Planning. 3 Credits.**
Components of a marketing communications plan. Writing a professional proposal, plans book, executive summary, and speech. Restricted to Permission of instructor required. Prerequisites: BADM 3401; MKTG 4148.

**MKTG 4152. Retailing Management. 3 Credits.**
A study of retailing management and strategy covering the current environment of retailing, retail market and financial analysis, store location and design, inventory management, and non-store and service retailing. Industry executive and student presentations; case analyses. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.

**MKTG 4154. Digital Marketing. 3 Credits.**
Using the social Web to leverage a firm’s marketing strategy; developing and improving a company’s electronic marketing strategy for the next evolution in Web commerce. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

**MKTG 4156. Integrated Marketing Communications. 3 Credits.**
The ubiquity of advertising and promotion; fundamental shifts in how consumers get information and from whom, and how much trust they place in different sources; strategies to address a rapidly changing media environment; concepts, analyses, and activities that comprise advertising; assessing and solving advertising challenges. Prerequisites: BADM 3401 and MKTG 3142 and MKTG 3143.

**MKTG 4159. Marketing Strategy. 3 Credits.**
The capstone course for marketing majors. Analytical integration of material covered in previous marketing courses. Marketing strategy literature, financial dimensions of marketing decisions, and comprehensive cases. Prerequisites: BADM 3401 or BADM 3401W; MKTG 3142; MKTG 3143.

**MKTG 4900. Special Topics. 0-3 Credits.**
Experimental offering: new course topics and teaching methods. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.

**MKTG 4900W. Special Topics. 3 Credits.**
Experimental offering; new course topics and teaching methods. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.
MKTG 4995. Independent Study. 1-12 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3401.

MKTG 6241. Advanced Marketing Management. 3 Credits.
The buyer decision process model and how and why products and services are purchased; synthesis of behavioral sciences applied to understanding individual, family, and organizational decision processes; the impact of consumer decisions on the marketing strategies of business and public organizations; consumer marketing applications in high-tech and services industries and on a global scale.

MKTG 6243. Marketing Research. 3 Credits.
The marketing research process: designing, conducting, and using market research studies. Managing the market research project; qualitative research; survey and experimental designs; data analysis with statistical software packages. Prerequisite: MBAD 6221.

MKTG 6246. Marketing of Services. 3 Credits.

MKTG 6248. Advertising and Marketing Communications Strategy. 3 Credits.
Practical instruction in executing an advertising and integrated marketing communications campaign. Strategic planning, communication theory, planning from a consumer attitudes and behavioral perspective, and campaign execution are covered. Prerequisites: MBAD 6273 and MBAD 6272 or permission of the instructor. Recommended background: MKTG 6242.

MKTG 6250. Selling/Sales Management. 3 Credits.

MKTG 6251. Product Management. 3 Credits.

MKTG 6252. Digital Marketing. 3 Credits.
The impact of technology on sales and marketing strategy. Areas explored include e-branding, customer relationship management, permission e-mail, sales force technology enhancement, mobile commerce, online marketing research, and electronic channels of distributions.

MKTG 6255. Strategic Brand Management. 3 Credits.
Theoretical foundation for branding and brand management and practical application of these concepts in marketing management.

MKTG 6256. Integrated Marketing Communication. 3 Credits.
The ubiquitous nature of advertising and promotion. How and from whom consumers get information and their level of trust in different information sources; concepts, analyses, and activities related to advertising; assessing and solving challenges.

MKTG 6259. Marketing Strategy. 3 Credits.
Required capstone course for marketing students. Analysis of complex marketing problems involving policy and operational decisions; emphasis on creative marketing strategy.

MKTG 6290. Special Topics. 0-3 Credits.

MKTG 6297. International Management Experience. 3 Credits.
Same as FINA 6297/ IBUS 6297/ MGT 6297/ SMPP 6297. May be repeated for credit.

MKTG 6298. Directed Readings and Research. 1-3 Credits.

MKTG 6299. Thesis Seminar. 3 Credits.

MKTG 6999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

STRATEGIC MANAGEMENT AND PUBLIC POLICY

UNDERGRADUATE

Bachelor's program
- Bachelor of Business Administration (p. 457)

FACULTY

Professors J.H. Beales III (Chair), H.J. Davis, J.J. Griffin, D.J. Lenn, J. Rivera, J.B. Wade

Associate Professors J.W. Cook, E.J. Englander, J. Forrer (Research), J.B. Thurman, J. Walter

Assistant Professors E.H. Kim, K. Martin, S. Patnaik, T. Radin (Teaching), G. de los Reyes

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SMPP 4900. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods.
SMPP 4990W. Special Topics. 3 Credits.
Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

SMPP 4995. Independent Study. 1-12 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

SMPP 6201. Business and Public Policy. 3 Credits.

SMPP 6202. Business-Government Relations. 3 Credits.
Historical and philosophical foundations of the business-government relationship. Regulation, international trade, and corporate political activities. Public policy issues facing business and the business community’s political response. Prerequisite: MBAD 6284.

SMPP 6203. Fed Gov’t Regulation-Society. 3 Credits.

SMPP 6205. Business Representation and Lobbying. 3 Credits.
Strategies, tactics, and techniques used by business in representing itself to the legislative and executive branches and regulatory agencies of the federal government. Legal and practical constraints. Ethical considerations.

SMPP 6206. Applied Microeconomics. 3 Credits.
Applications of economic theory to public and private decisions with emphasis on public policy analysis. Focus on market structure and its implications. Imperfect information, common property, public goods and externalities. Economic analysis of government behavior and legal institutions. Prerequisite: ECON 6217 or ECON 6219 and MBAD 6222.

SMPP 6207. Environment, Energy, Technology, and Society. 3 Credits.
The identification, examination, and evaluation of how environment, energy, and technology are interrelated and how these interactions influence policy formulation and implementation at the international, national, regional, industrial, and organizational levels. Same as PPPA 6067.

SMPP 6208. Macroeconomic Policy and Business. 3 Credits.
Determination of national income, employment, inflation, and interest rates. The role of expectations in the economy. Impact of government purchases, tax policy, and deficits. Monetary policy institutions. The global economy and exchange rates. Prerequisite: ECON 6218 or 6219 and MBAD 6222.

SMPP 6209. Seminar: Business Economics and Public Policy. 3 Credits.
Analysis and discussion of selected issues by students and representatives of government and business. Prerequisite: SMPP 6202 or MBAD 6284.

SMPP 6210. Strategic Environmental Management. 3 Credits.
Examination and analysis of the orientation and actions of private, public, and nonprofit sectors in relation to their natural environments. Emphasis on organizational interaction and effectiveness, particularly regarding business firms and industry, on issues of environmental quality and sustainability.

SMPP 6211. Corp. Env. Mg. in Dev. Nations. 3 Credits.

SMPP 6212. Business Law: Enterprise Org. 3 Credits.

SMPP 6213. Management of Strategic Issues. 3 Credits.
The body of management theory and practice that has evolved to identify, analyze, and resolve strategic organizational issues. Methodology of the field; applications to critical issues in labor relations, energy and pollution, marketing and consumerism, business-government relations, and the global economy.

SMPP 6214. Consultative Processes. 3 Credits.
Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process. Same as MGT 6214/ TSTD 6214.

SMPP 6215. Corporate Governance and Ethics. 3 Credits.

SMPP 6216. Public Policy, Governance, and the Global Market. 3 Credits.
The socioeconomic foundations of government regulation and public policy cooperation for the governance of firms, markets and globalization. The evolution of national, transatlantic and multilateral frameworks for market and civil society governance, international competition policy cooperation, regulatory harmonization and industry standards. (Same as PPPA 6018).

SMPP 6217. Strategy and International Political Economy. 3 Credits.
Case-based study of the interactions of firms within their broader business environment; how firms pursue an integrated approach to strategic management by combining elements of non-market strategy and concepts from traditional market strategy.

SMPP 6241. GlobalCorporateResponsibility. 3 Credits.

SMPP 6271. Corporate Envir Mgmt & Policy. 1.5 Credit.

SMPP 6290. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

SMPP 6291. Ethics and Business. 3 Credits.
An in-depth, comprehensive exploration, analysis, and evaluation of specific for profit and non-profit organization values, approaches, and outcomes related to multiple ethical ideals, systems, and practices.
SMPP 6292. Co-Curricular Activities in Responsible Management. 0 Credits.
This 0-credit course is required for students taking the Graduate Certificate in Responsible Management. The three components include completing a project or case study with an organization or faculty member related to the CRM mission; attending a series of seminars, panel discussions, or other pre-approved events relating to responsible management and submitting written reports; and completing designated community service hours. Restricted to GWSB Graduate Students Admitted to the Graduate Certificate in Responsible Management.

SMPP 6293. American Business History. 3 Credits.
The history of American business institutions in manufacturing, distribution, transportation, and finance. Particular attention will be given to the period since industrialization, with consideration of business institutions in their economic, legal, governmental, and social contexts. Same as HIST 6322.

SMPP 6295. Interim Quantitative and Qualitative Analysis. 3 Credits.

SMPP 6297. International Management Experience. 3-6 Credits.
Same as FINA 6297/IBUS 6297/ MGT 6297/ MKTG 6297. May be repeated for credit.

SMPP 6298. Directed Readings and Research. 1-6 Credits.
Supervised readings or research. Admission by prior permission of instructor. May be repeated once for credit.

SMPP 6299. Thesis Seminar. 3 Credits.

SMPP 6999. Thesis Research. 3 Credits.

SMPP 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.
An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as PPPA 8111. Prerequisite: doctoral degree candidate status.

SMPP 8321. Seminar in Strategic Management. 3 Credits.
Develops understanding of the major research streams in strategic management; exposure to theoretical research frameworks and methodological issues and approaches.

SMPP 8331. Seminar in Business and Public Policy. 3 Credits.
Develops understanding of the major research streams in business and public policy; exposure to theoretical research frameworks and methodological issues and approaches.

SMPP 8391. Seminar: Business Management. 3 Credits.
Examination of major current issues, both theoretical and empirical, affecting the development of the business enterprise. Topics to be announced. Emphasis on policy and strategic issues affecting the total enterprise. (Offered as the demand warrants).

SMPP 8998. Advanced Readings and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

SMPP 8999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.
The Graduate School of Education and Human Development (http://gsehd.gwu.edu) is the administrative unit for the departments of Counseling and Human Development, Curriculum and Pedagogy, Educational Leadership, Human and Organizational Learning, and Special Education and Disability Studies. The School offers the master of arts in education and human development, master of arts in teaching, master of education, education specialist, doctor of philosophy, and doctor of education degree programs. Academic programs are offered in numerous fields of study.

In addition to its degree programs, the School offers graduate and post-graduate certificate programs; credit and noncredit workshops designed to meet the unique needs of metropolitan area school systems and other clientele in industry and government; and a wide range of courses for teachers who wish to pursue advanced studies and/or additional endorsements and for provisional teachers who wish to prepare for teaching certificates.

All programs are designed to meet the broad needs of individuals who seek the knowledge and skills necessary to provide effective learning and teaching, research, services, and leadership in a variety of settings that cover the entire life span. Special curricula are individually tailored for liberal arts graduates and graduates of other professional schools who are interested in teaching or in other human services areas.

Clinical facilities are provided by the Community Counseling Service Center (http://gsehd.gwu.edu/ccsc), which supports counseling internships as well as outreach services to the community. The Office of Professional Preparation and Accreditation supports liaison with schools for clinical experiences required for educator licensure. Field and internship experiences required in master’s and doctoral programs are provided in cooperation with public and private schools, social and health agencies, museums, institutions in the business community, institutions of higher education, nonprofit and professional associations, and the federal government. Some programs and courses are also offered at off-campus locations or via distance education.

The educator preparation programs in the Graduate School of Education and Human Development are accredited by the Council for the Accreditation of Educator Preparation/National Council for Accreditation of Teacher Education (CAEP/NCATE) and the District of Columbia Office of the State Superintendent of Education (DC-OSSE). Programs that prepare students to become eligible for licensure/certification as teachers and other school personnel are state-approved by the DC-OSSE.

Mission
The Graduate School of Education and Human Development, strategically based in the nation’s capital and serving the global community, develops informed and skilled leaders through innovative teaching and learning. Students engage in scholarly inquiry that links policy, research, and practice across the lifespan and fosters continuous self-examination and critical analysis towards excellence.

Bridging Concepts
The following bridging concepts are central to the unified conceptual framework of the School and weave through the mission, goals, and initiatives of its strategic plan.

- Research and scholarship are prerequisite to the improvement of educational practice.
- Leadership is critical in the transformation of education and human development at all levels.
- Building reflective practitioners through integration of theory and practice must be a focus of all programs.
- A community of diverse learners is prerequisite to success in the education and human service professions.

REGULATIONS
- Admissions Requirements for the Master of Education, the Master of Arts in Education and Human Development, and the Master of Arts in Teaching (p. 515)
- Advanced Standing (p. 515)
- Plan of Study (p. 515)
- Thesis Option (p. 515)
- Grades (p. 515)
- Scholarship (p. 515)
- Master’s Comprehensive Examination (p. 515)
- Continuous Enrollment and Residency (p. 516)
- Leave of Absence (p. 516)
- Class Attendance Policy (p. 516)
- PRAXIS® Teacher Assessments (p. 516)
- Second Master’s Degree (p. 516)
Admissions Requirements for the Master of Education, the Master of Arts in Education and Human Development, and the Master of Arts in Teaching

The Graduate School of Education and Human Development seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor’s degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate course work, and acceptable test scores on either the Graduate Record Examination or the Miller Analogies Test in some programs. These tests are waived in several master’s programs.

Two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. The interview may be waived with permission of the lead faculty of the desired program for those living outside the Washington metropolitan area. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

Advanced Standing

Advanced standing is granted for approved courses taken at other regionally accredited institutions, but a minimum of 24 credit hours must be completed in the Graduate School of Education and Human Development as a master’s candidate. A maximum of 12 credit hours taken in nondegree status may be credited toward the master’s degree. Advanced standing is not granted for work completed five or more years before application for admission or readmission to master’s candidacy. All work accepted for advanced standing must have been earned with a grade of B or better and must be approved for acceptance by both the advisor and the dean. Credit, Satisfactory, Audit, or other nonletter grades are not acceptable.

Plan of Study

The plan of study leading to the degree of Master of Arts in Education and Human Development varies by degree, but requires a minimum of 30 hours of graduate credit. Programs include EDUC 6114 Introduction to Quantitative Research, or EDUC 6116 Introduction to Educational Statistics, or EDUC 6112 Foundations of Assessment, Testing, and Measurement in Education to satisfy the research requirements. Several programs have additional credit hour and/or capstone requirements.

All degree requirements must be completed within 6 years, whether study is full time or part time. An additional (or 7th) year is allowed in the case of a student who breaks enrollment and is subsequently readmitted.

Thesis Option

Students in select programs may elect a theses option. The choice of the thesis subject must be approved in writing by the student’s advisor and filed in the office of the dean. All theses must be submitted electronically and meet the formatting and other requirements set forth online (http://library.gwu.edu/etd). Payment of tuition for the thesis course entitles the candidate, during the period of registration, to the advice and direction of the member of the faculty under whom the thesis is to be written. In case a thesis is unfinished, additional time may be granted. The student must, however, be enrolled continuously in the program.

Grades

Information on grades and computing the grade-point average is found under University Regulations (p. 21).

The symbol I (Incomplete) indicates that a satisfactory explanation of extenuating circumstances has been given to the instructor for the student’s inability to complete the required work of the course during the semester of enrollment. The work must be completed within the designated time period agreed upon by the instructor, student, and School, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will complete a grade change form and turn it in to the Office of the Registrar. The final grade will replace the symbol of I. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of F, Failure, 0 quality points, and the grade-point average and academic standing recalculted. See University Regulations for full details.

Scholarship

A grade-point average of 3.0 is required for graduation. Students who receive a grade of C in more than 6 credit hours are subject to suspension. Students who receive a grade of F must confer with the academic advisor before enrollment for further course work is allowed. More detailed information for doctoral students can be found in the Doctoral Student Handbook.

Master’s Comprehensive Examination

A comprehensive examination is required for some programs. Candidates who plan to take the examination must file a written application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.
Continuous Enrollment and Residency
Students must be continuously enrolled in GSEHD unless the Dean’s Office grants a leave of absence. Failure to register each semester of the academic year will result in lapse of candidacy. Subsequent readmission is subject to whatever new conditions and regulations have been established by the School. See Continuous Enrollment Status under University Regulations.

When master’s degree candidates are sitting for a comprehensive examination and are not otherwise enrolled in course work, they may prepare for and sit for the exam in continuous enrollment status. All doctoral and education specialist students and those master’s students who elect to take an additional semester to prepare for the examination or who must retake the examination are required to enroll in the examination preparation course, which carries a fee equivalent to 1 credit hour of tuition. See Master’s Comprehensive Examination above.

Leave of Absence
Students who, for personal reasons, are temporarily unable to continue their program of studies may request a leave of absence for a specific period of time not to exceed one calendar year during the total period of degree candidacy. If the request is approved, the student must register for leave of absence each semester. If a student fails to register, degree candidacy is terminated. Students who need additional semesters of leave of absence must seek approval from the appropriate appeals committee.

Class Attendance Policy
Attending class and scheduled make-up classes, discussions, and other course meetings is a fundamental student responsibility. Faculty may use class attendance and participation as factors in determining course grades.

PRAXIS® Teacher Assessments
All degree programs preparing students for initial teacher licensure require completion of the Educational Testing Service PRAXIS® teacher assessments as specified by the Office of the State Superintendent of Education of the District of Columbia.

Second Master’s Degree
Persons seeking a second master’s degree in the Graduate School of Education and Human Development must complete all core and specialization requirements and a minimum residency requirement of 24 credit hours.

MASTER’S
Teacher Certification Preparation Programs
Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the Master of Arts in the field of education and human development, Master of Education, and Education Specialist degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. Visit the School’s website (http://gsehd.gwu.edu) for additional information.

Master of Arts in Teaching
- Master of Arts in Teaching in the field of museum education (p. 530)

Master of Education
- Master of Education in the field of elementary education (p. 527)

- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 526)
• Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 528)
• Master of Arts in Education and Human Development in the field of higher education administration (p. 528)
• Master of Arts in Education and Human Development in the field of international education (p. 530)
• Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 531)
• Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 532)
• Master of Arts in Education and Human Development in the field of school counseling (p. 533)
• Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 535)
• Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 537)
• Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners

Joint Program
• Master of Arts in Education and Human Development in the field of Educational Policy and Juris Doctor (p. 550)

EDUCATION SPECIALIST

The Degree of Education Specialist
The program of advanced study leading to the degree of education specialist (Ed.S.) is for students with a master's degree in education who seek further professional preparation. The program is available in the fields of educational leadership and administration, counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education.

Admission Requirements
The following are required for entrance to an education specialist program: an undergraduate degree and a master of arts in education and human development (M.A.Ed.&H.D.) or its equivalent from a regionally accredited institution, two years of pertinent experience in an education or human development field, and a graduate scholastic average of at least 3.3 and, in some programs, an acceptable score on either the Graduate Record Examination or Miller Analogies Test. Two letters of recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor in the major field.

Programs of Study and Degree Requirements
Individual programs are developed, through a plan of study worked out with a faculty advisor, to fit the candidate's skills, interests, and career goals. A minimum of 30 credits beyond the requirements for an M.A.Ed.&H.D. degree is required. At least 21 credits of this work must be taken in residence at GW. A maximum of five calendar years is allowed for completion of the program.

At least 12 of the required 30 credits must be in appropriate graduate courses in education selected from the following areas: (1) foundations and cognate study, (2) background and general principles of the field of study, and (3) an area of specialization. A graduate-level research methods course must be included in the program if it was not completed in previous graduate work.

The Comprehensive Examination
Successful completion of a six-hour written or oral examination or its equivalent, at the option of the major field advisor, is required. Candidates taking the examination must be registered for at least 1 credit in the semester it is to be taken and submit an online comprehensive examination application by the published deadline.

Education Specialist Programs
• Education Specialist in the field of educational leadership and administration (p. 539)
• Education Specialist in the field of special education (p. 539)

DOCTORAL

The Degree of Doctor of Philosophy
A Ph.D. in the field of counseling is accredited by the Council for Accreditation of Counseling andRelated Educational Programs.

The Ph.D. in the field of educational science is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address such critical national and global problems, scholars require both a strong foundation in educational science as well as theoretical and disciplinary grounding in multiple disciplines. The Ph.D. program is distinguished by four characteristics: (a) candidates apply to a cross-disciplinary research team (CRT) that is focused on a critical problem related to education, (b) approaches to the research problems require a cross-disciplinary lens, (c) students engage in research throughout their program, and (d) candidates aspire to careers in which the production of research is paramount.
Admission Requirements
A master’s degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant’s past achievements, perceived potential, and fit to the goals and mission of the program.

The Degree of Doctor of Education
The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (Ed.D.). These programs provide major fields of study in curriculum and instruction, special education, educational administration and policy studies, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student’s program planning committee, course work may be taken in or from other departments of the University and through the Consortium. All programs require a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations.

Admission Requirements
The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the content area that supports his or her objective. This graduate work must be comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master’s degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy
The Doctor of Education program is divided into two stages: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master’s degree or the equivalent in part-time study. Course work and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the Ed.D. is 36 credits of course work in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, course work beyond the minimum is required.

In the precandidacy stage, all course work in the program must be completed and the comprehensive examination passed. Course work toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed between the doctoral student and a doctoral study advising team, generally consisting of two members of the program faculty.

The comprehensive examination is generally a two-day examination held each semester and taken upon completion of all precandidacy course work. Students taking the examination must be registered for at least 1 credit in the semester it is to be taken and must file an online application in the dean’s office by the published deadline.

The candidacy stage of doctoral study begins after successful completion of the content course work and the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of course work listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to Proquest/UMI.

Detailed information on the Ed.D. program and its administration is available in the GSEHD Doctoral Student Handbook (http://gsehd.gwu.edu/sites/default/files/2014%20-
Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

**Doctoral programs**
- Doctor of Education in the field of curriculum and instruction (p. 541)
- Doctor of Education in the field of educational administration and policy studies (p. 542)
- Doctor of Education in the field of higher education administration (p. 544)
- Doctor of Education in the field of human and organizational learning (p. 545)
- Doctor of Education in the field of special education (p. 547)
- Doctor of Philosophy in the field of counseling (p. 548)
- Doctor of Philosophy in the field of educational science (p. 549)

**CERTIFICATES**

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

**Graduate Certificates**
- Assessment, Testing, and Measurement in Education (p. 551)
- Autism Spectrum Disorders (p. 551)
- Brain Injury: Educational and Transition Services (p. 552)
- Counseling and Life Transitions (p. 552)
- Design and Assessment of Adult Learning (p. 553)
- E-Learning (p. 554)
- Global Leadership in Teams and Organizations (p. 554)
- Incorporating International Perspectives in Education (p. 554)
- Instructional Design (p. 555)
- Integrating Technology into Education (p. 555)
- Job Development and Placement (p. 556)
- Leadership Development (p. 556)
- Leadership in Educational Technology (p. 556)
- Multimedia Development (p. 557)
- Organizational Learning and Change (p. 557)
- Secondary Special Education and Transition Services (p. 557)
- Special Education for Culturally and Linguistically Diverse Learners (p. 558)
- STEM Master Teacher (p. 558)
- Teaching English to Speakers of Other Languages (p. 559)
- Training and Educational Technology (p. 559)

**Post-Master's Certificates**
- Counseling (p. 552)
- Educational Leadership and Administration (p. 553)

**COURSES**

**Explanation of Course Numbers**
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Counseling (CNSL) (p. 1161)
- Curriculum and Pedagogy (CPED) (p. 1164)
- Education (EDUC) (p. 1179)
- Human Development (HDEV) (p. 1268)
- Human and Organizational Learning (HOL) (p. 1269)
- Special Education (SPED) (p. 1462)

**MASTER'S PROGRAMS**

**Teacher Certification Preparation Programs**

Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the Master of Arts in the field of education and human development, Master of Education, and Education Specialist degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. Visit the School's website (http://gsehd.gwu.edu) for additional information.

**Master of Arts in Teaching**
- Master of Arts in Teaching in the field of museum education (p. 530)
Master of Education
• Master of Education in the field of elementary education (p. 527)
• Master of Education in the field of secondary education (p. 534)

Master of Arts in Education and Human Development
• Master of Arts in Education and Human Development individualized program (p. 529)
• Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 520)
• Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 521)
• Master of Arts in Education and Human Development in the field of clinical rehabilitation counseling (p. 521)
• Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 522)
• Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 522)
• Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 524)
• Master of Arts in Education and Human Development in the field of early childhood special education (p. 524)
• Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 526)
• Master of Arts in Education and Human Development in the field of education policy studies (p. 525)
• Master of Arts in Education and Human Development in the field of educational technology leadership (p. 526)
• Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 528)
• Master of Arts in Education and Human Development in the field of higher education administration (p. 528)
• Master of Arts in Education and Human Development in the field of international education (p. 530)
• Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 531)
• Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 532)
• Master of Arts in Education and Human Development in the field of school counseling (p. 533)

Joint Program
• Master of Arts in Education and Human Development in the field of Educational Policy and Juris Doctor (p. 550)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ASSESSMENT, TESTING, AND MEASUREMENT IN EDUCATION

The master of arts in education and human development in the field of assessment, testing, and measurement (ATM) in education degree program is designed for individuals who are entering or advancing in positions associated with assessment, testing, and measurement in diverse settings. This specialized field combines the study of human behavior with statistical analysis, testing theory, educational measurement, and evaluation. ATM is the science of measuring educational factors such as learning, preference, aptitude, and personality. ATM specialists (commonly called psychometricians) design tests that collect empirical data and quantify the personal characteristics of individuals, comparing those results within or across populations. In addition to creating assessment instruments, some psychometricians govern the tests and analyze the results.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/assessment-testing-and-measurement-education) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in electives, and completion of a written qualifying examination.

EDUC 8179  Capstone Project in Assessment, Testing, and Measurement in Education (taken for 6 credits)

**Electives**

6 credits in approved electives

Elective courses should be selected in consultation with the program advisor.

A written qualifying exam (administered during the early spring semester by an ATM committee).

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CLINICAL MENTAL HEALTH COUNSELING**

The master of arts in education and human development in the field of mental health counseling degree program prepares graduates to enter the counseling profession in a variety of human service settings, including welfare and other social service agencies, mental health centers, penal institutions, court systems, employment centers, allied health agencies, government service agencies, community college counseling centers, employee assistance programs, and private practice. A subspecialty in employee assistance counseling is available to prepare counselors for business, industry, and government settings. The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/clinical-mental-health-counseling) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 60 credits, including 54 credits in required courses and 6 credits in elective courses, and completion of 600 hours in internships and 100 hours in a practicum.

6 credits in elective courses

Elective courses should be selected in consultation with the program advisor

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CLINICAL REHABILITATION COUNSELING**

The master of arts in education and human development in the field of clinical rehabilitation counseling degree program prepares graduates to design, develop, and evaluate clinical rehabilitation counseling services in order to best meet the needs of persons with disabilities in their professional counseling settings. Students learn to apply foundational
Clinical rehabilitation counseling principles and develop a clinical counseling plan of services. Program graduates are eligible for both certification (certified rehabilitation counselor) and state licensure.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-rehabilitation-counseling) for additional information.

HDEV 6108 Life Span Human Development

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION

This program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The minimum 30-credit program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. Students must select from one of the following program specialty concentrations:

- Concentration in elementary education (p. 522)
- Concentration in interdisciplinary studies of literacy and reading education (p. 523)
- Concentration in secondary education (p. 524)

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION

The master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education degree program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. A program specialty concentration may include reading and literacy, elementary education, or secondary education.

Students enrolled in the master’s in curriculum and instruction program may enroll concurrently in the graduate certificate in incorporating international perspectives in education program. Courses may be double counted toward earning the master's degree and certificate.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
Visit the program website (http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 15 credits in courses in the concentration, 9 credits in elective courses, and successful completion of the master of arts in education and human development comprehensive examination.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN INTERDISCIPLINARY STUDIES OF LITERACY AND READING EDUCATION**

The master of arts in education and human development in the field of curriculum and instruction with a concentration in interdisciplinary studies of literacy and reading education degree program prepares teachers, education professionals, and others with diverse experiences for leadership roles in school and out-of-school settings. The program incorporates traditional and novel contemporary aspects of literacy curriculum and instruction and provides pathways to becoming reading specialists and literacy coaches. Study in theories and practices in the arts, humanities, museums and informal learning environments, and digital technologies prepares educators for new teaching and learning opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.

**REQUIREMENTS**

The master of arts in education and human development in the field of early childhood special education degree program offers students the opportunity to train in age-related subspecialties of preprimary, birth to age five, primary school age, or K - grade 3. The program is approved by the National Association for the Education of Young Children (NAEYC) and the Division of Early Childhood (DEC) of the Council for Exceptional Children. Students gain knowledge and skills in the specific content areas recommended by NAEYC and DEC: child development and learning; curriculum development and implementation; routine-based intervention in natural environments; family-centered services delivery models; child assessment, evaluation, and progress monitoring; cultural, linguistic, and economic diversity; and field-based practicum and internships.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-early-childhood-special-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: for the regular degree—39 credits, including the required core courses and general courses; for the degree with an optional concentration in infant special education—42 credits, including the required core courses and infant special education concentration courses. In both cases, successful completion of the master of arts in education and human development comprehensive examination and completion of the relevant teacher licensure assessments (see below) are required.

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES**

The master of arts in education and human development in the field of education policy studies degree program develops skills to analyze education problems and policies at national, state, and local levels and in the K-12 and higher education sectors. The program is designed for students who wish to develop skills in policy research, program evaluation, and the technical, political, and managerial aspects of education policy. Emphasis is placed on developing both an understanding of the political, economic, and social environments affecting education policy and the competencies needed to apply research to analyze and effectively implement them or to evaluate their impact. Topics covered in this field include school reform, urban education problems, student achievement, school finance and its equity, teacher quality and effectiveness, equal opportunity, access to higher education, and accountability. The 36-credit program includes 12 elective credits that are used to develop expertise and skills in a substantial area of education policy; these courses, with prior arrangement, may involve independent research and internships in federal, state, or professional organizations.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)  
Visit the program website (http://gsehd.gwu.edu/programs/masters-education-policy-studies) for additional information.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION**

The master of arts in education and human development (M.A.Ed.&H.D.) in the field of educational leadership and administration’s 30-credit degree program is for students who seek preparation to lead in a culture of teaching and learning. Pursued either in the classroom or in an online learning format, students with at least one year of instructional experience are prepared for various school-based and central office positions of increased responsibility in teaching, leadership, and/or supervision. The curriculum addresses management, change, communication, organizational learning, administrative and legal issues, human relations, human resource development, general supervisory principles and responsibilities, and supervision of instruction. Graduates develop and expand their skills in technical, conceptual, political, and leadership arenas while positioning themselves to lead in diverse educational communities.

The program includes courses and PK-12 field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements. The M.A.Ed.&H.D is nationally recognized by the Council for Accreditation of Educator Preparation (CAEP), the National Council for Accreditation of Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. [Visit the program website](http://gsehd.gwu.edu/programs/educational-leadership-administration-0) for additional information.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL TECHNOLOGY LEADERSHIP**

The master of arts in education and human development in the field of educational technology leadership degree program is designed for individuals who are entering or advancing in positions associated with schools, higher education, alternative educational settings, or other human service occupations in which computers and related information delivery technologies are used. The program of study is delivered online and provides students with opportunities to develop the knowledge, understanding, and skills necessary to provide leadership in the rapidly changing environment of technology in education.

This pioneering program is delivered in an interactive distance learning format to students around the world. The required curriculum covers the theory and practice of educational technology, including the use of computers and other
instructional technology systems, technological management systems, policy making, research methods, and leadership.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/educational-technology-leadership) for additional information.

**MASTER OF EDUCATION IN THE FIELD OF ELEMENTARY EDUCATION**

The master of education in the field of elementary education degree program is designed for those with an undergraduate degree in the arts and sciences. The program includes course work for students who wish to become eligible for licensure/certification for teaching at the elementary school level (grades 1–6). Additional course work in content areas may be needed to meet specific jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/elementary-education) for additional program information.

REQUIREMENTS

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL EDUCATION AND JEWISH CULTURAL ARTS

The Graduate School of Education and Human Development, in concert with the Columbian College of Arts and Sciences, offers an intensive, interdisciplinary, 13-month degree program combining Jewish cultural arts, experiential education, and museum education. Graduates will be prepared for leadership in Jewish museums and arts institutions, community centers, college campus organizations, summer camps, and other innovative educational and cultural settings.

Partnering theory with practice, and the classroom with fieldwork, the EE/JCA curriculum enables students to become competent, creative, and reflective professionals. The program:

- Inspires students to develop exciting and relevant programming for a range of audiences,
- Offers a year-long series of internships at cultural arts and educational institutions, and
- Develops professional skills including budgeting, grant writing, workplace collaboration, and effective communication.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/experiential-education-jewish-cultural-arts) for additional information.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The master of arts in education and human development in the field of higher education administration (M.A.Ed.&H.D) degree program is designed to provide students with the skills and knowledge for successful work in entry- and mid-career professional positions in institutions of higher education, associations, national and international government agencies, and related organizations. Students may select a concentration in general administration, student affairs administration, higher education policy and finance, and international education. The program of study includes an introduction to higher education administration, research design and analysis, the concentration (in-depth focus on a particular aspect of higher education and its administration), application electives (including internships and practicums), and leadership integration.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/higher-education-administration-0) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required core courses, 12 credits in one concentration (15 credits in student affairs administration), 6 credits in elective courses (3 in student affairs administration), and a capstone project.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT - INDIVIDUALIZED PROGRAM**

The master of arts in education and human development individualized degree program provides students with an opportunity to develop a program of study that cuts across existing fields, both within the Graduate School of Education and Human Development and between the School and other schools and departments of the University and the Consortium. It is designed to meet specific career and professional objectives of applicants who have unique needs. The flexible program structure can be tailored to prepare for new and emerging fields in education and human development. This program is available within or across the five departments of the Graduate School of Education and Human Development.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits distributed as outlined below:
The master of arts in education and human development in the field of international education degree program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international understanding. Students acquire knowledge of other countries and cultures, using the education system as a means of interpreting and translating knowledge across cultures, and analysis of the formal and non-formal school systems as they reflect history, culture, development, values, contemporary concerns, and future trends. In addition, students acquire tools, methods, and habits of analysis that enable them to play a variety of roles as leaders and change agents.

Students in this program can also enroll in and receive a graduate certificate in Incorporating International Perspectives in Education.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/international-education) for additional information.

**REQUIREMENTS**

Required: 36 credits, including 18 credits in required courses, 9 credits in courses in a specialization, and 9 credits in elective courses.

**Required**

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ORGANIZATIONAL LEADERSHIP AND LEARNING**

The master of arts in education and human development in the field of organizational leadership and learning degree program is designed for individuals entering or advancing in positions associated with learning in organizational settings in all sectors of society. Typical careers are in organizational development, internal and external consulting, and training and development. The program is interdisciplinary, and students are encouraged to tailor their programs to individual career needs and objectives.

The required courses in the 30-credit program cover human behavior in organizations, adult learning, group dynamics, research methods, organizational change, strategic change, global leadership, leadership development, and assessing the impact of change efforts. Project work in Washington-area business, industry, government, and community organizations may be a part of the learning experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/organizational-leadership-learning) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits, including 21 credits in required courses and 9 credits in elective courses.

Note: Internship and research/independent study courses might be used as electives in a track, provided the subject matter of the work is relevant. For example, a research project in leadership could qualify for 3 elective credits in the Leadership Track.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF REHABILITATION COUNSELING**

The master of arts in education and human development (M.A. Ed.&H.D.) in the field of rehabilitation counseling degree program prepares highly knowledgeable students to become professional practitioners assisting persons who are physically, mentally, emotionally, or socially disabled to become empowered and to assume or to resume their place in society. This program leads to licensure and public and private employment opportunities.

Areas of concentration include autism spectrum disorder, traumatic brain injury, and psychiatric disabilities and substance abuse.

Specific admission requirements are shown on the Graduate Program (http://www.gwu.edu/all-graduate-programs)Finder.

Visit the program website (http://gsehd.gwu.edu/programs/rehabilitation-counseling) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: A minimum of 48 credits or 50 credits for the specialization in the rehabilitation of individuals who are mentally ill.

**Regular program**

**Required**

- CNSL 6130  Vocational Assessment of Individuals with Disabilities
- or CNSL 6157  Individual Assessment in Counseling
- CNSL 6151  Professional and Ethical Orientation to Counseling
- CNSL 6153  Counseling Interview Skills
- CNSL 6154  Theories and Techniques of Counseling
- CNSL 6155  Career Counseling
- CNSL 6161  Group Counseling
- CNSL 6163  Social/Cultural Dimensions-Cns
- CNSL 6185  Practicum/Internship in Counseling
- CNSL 6186  Advanced Internship in Counseling
- CNSL 6376  Foundations/Practicum: Rehabilitation and Case Management
- CNSL 6378  Disability Management and Psychosocial Rehabilitation
- CNSL 6380  Job Placement and Supported Employment
- CNSL 6381  Medical and Psychosocial Aspects of Disabilities
- EDUC 6114  Introduction to Quantitative Research
- or EDUC 6116  Introduction to Educational Statistics

**Electives**

Six credits of electives selected in consultation with advisor.
Optional concentrations are available in autism and spectrum disorders, substance abuse and psychiatric disabilities, and traumatic brain injury.

**Specialization in the rehabilitation of individuals who are mentally ill**

Students who are admitted to the program with a specialization in the rehabilitation of individuals who are mentally ill must complete 50 credits of the following:

- **EDUC 6114** Introduction to Quantitative Research
- **CNSL 6100** Special Workshop
- **CNSL 6101** Research and Independent Study
- **CNSL 6130** Vocational Assessment of Individuals with Disabilities
- **CNSL 6151** Professional and Ethical Orientation to Counseling
- **CNSL 6153** Counseling Interview Skills
- **CNSL 6154** Theories and Techniques of Counseling
- **CNSL 6155** Career Counseling
- **CNSL 6161** Group Counseling
- **CNSL 6163** Social/Cultural Dimensions-Cns
- **CNSL 6173** Diagnosis and Treatment Planning
- **CNSL 6185** Practicum/Internship in Counseling
- **CNSL 6186** Advanced Internship in Counseling
- **CNSL 6376** Foundations/Practicum: Rehabilitation and Case Management
- **CNSL 6378** Disability Management and Psychosocial Rehabilitation
- **CNSL 6380** Job Placement and Supported Employment
- **CNSL 6381** Medical and Psychosocial Aspects of Disabilities

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SCHOOL COUNSELING**

The master of arts in education and human development (M.A.Ed.&H.D.) in the field of school counseling degree program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and provides professional preparation for individuals who wish to become certified as counselors in public and private schools. The program is designed to equip students with the requisite knowledge and skills to provide professional counseling, assessment, consultation, and guidance services in a school setting.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/school-counseling) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits, including 42 credits in required courses and 6 credits in elective courses:

</tr>
</tbody>
</table>

**Elective**

6 credits of approved electives

The remaining credits should be selected in consultation with the program advisor.
Counseling students are required to complete 600 hours as part of their internships (300 hours per course) and 100 hours as part of their practicum.

**MASTER OF EDUCATION IN THE FIELD OF SECONDARY EDUCATION**

The master of education (M.Ed.) in the field of secondary education degree program is designed for those individuals with an undergraduate degree in the arts and sciences, or equivalent. Degree candidates may specialize in English, English as a second language, foreign languages (Arabic, Chinese, French, German, Italian, Latin, Russian, and Spanish), mathematics, science (biology, chemistry, general science, and physics), or social studies. Required program course work includes credits leading to eligibility for teacher licensure/certification; specific course work in the subject area to be taught may be needed to meet jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/secondary-education) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits (36 credits for the ESL concentration), all required core courses, and all courses and elective credits indicated in one of the concentrations.

In addition, all students are required to complete a comprehensive examination and the relevant teacher licensure assessments, the latter of which are required by the District of Columbia Educator Licensure Services Office.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SECONDARY SPECIAL EDUCATION AND TRANSITION SERVICES**

This interdisciplinary master of arts in education and human development (M.A.Ed.&H.D.) degree program prepares educators and support personnel to address the needs of youth and young adults with special needs for careers and transition from school to postsecondary education, employment, and independent living and community participation. Several programs offer teacher licensure certification preparation in categorical learning, emotional, and behavioral disabilities, or noncategorical special education. Other programs are non-teacher licensure and focus on development of interdisciplinary transition knowledge, competencies, and skills.

The curriculum integrates the roles of relevant disciplines and service agencies, including postsecondary planning, evidence-based practices, instructional and curriculum strategies, service delivery models, and accommodations and supports from the classroom to postsecondary education. The program includes traditional course work, practicum, and internship, as well as field-based professional practice and research. Students can plan their programs to emphasize interdisciplinary secondary and career programming, learning disabilities, traumatic brain injury, and culturally and linguistically diverse learners.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/secondary-special-education-and-transition-services) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: a minimum of 39 credits, including 15 credits in core courses, 24 to 27 credits within a concentration, and successful completion of the master’s comprehensive examination.

Students in concentrations other than brain injury specialist (without licensure) and interdisciplinary transition services (without licensure) also must complete the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office.

Requirements for completion of the comprehensive examination and for teacher licensure assessments vary by concentration.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CHILDREN WITH EMOTIONAL AND BEHAVIORAL DISABILITIES**

The master of arts in education and human development (M.A.Ed.&H.D.) in the field of special education for children with emotional and behavioral disabilities (EBD) is an intensive degree program that prepares its graduates to work with learning and emotional problems of students in grades K-8. The program is designed to develop competencies in the nature and needs of troubled children; assessment, programming, and teaching; and working effectively as an interdisciplinary and interagency team member. Graduate students have the opportunity to work intensively with students with disabilities in a therapeutic school setting, applying their course work directly to practice while being mentored by school-based cooperating teachers and University faculty and staff.

The program is nationally recognized by the Council for Exceptional Children, is accredited by the Council for the Accreditation of Educator Preparation (CAEP), and has been training exemplary special educators for twenty years.

Specific admission requirements are shown on the Graduate Program Finder. [http://www.gwu.edu/all-graduate-programs](http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 39 credits in required courses, successful completion of the master of arts in education and human development comprehensive examination, and completion of the relevant teacher licensure assessments (see below).

Master of Arts in Education and Human Development comprehensive exam

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

This master of arts in education and human development (M.A.Ed. & H.D.) degree program equips current educators with the knowledge and skills needed to understand and address the cultural, linguistic, social, and learning needs of students— including those with special needs— whose diversity impacts their school success. The program is designed for licensed teachers and educators who wish to expand their knowledge to address the changing demographics of the modern classroom. Program course work and field experiences are built around competencies in the areas of assessment, lesson planning, and teaching, with a focus on culturally and linguistically diverse students. Master’s degree students develop a professional portfolio and sit for the ESOL PRAXIS, and SPED PRAXIS exams at the end of the program. Graduates are prepared to work with students who have disabilities and those in the process of second language acquisition. Course work is offered in both distance learning and on-campus formats.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/special-education-culturally-linguistically-diverse-learners) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses; and successful completion of the master of arts in education and human development comprehensive examination; and completion of the relevant teacher licensure assessments (see below).

EDUCATION SPECIALIST PROGRAMS

The Degree of Education Specialist

The program of advanced study leading to the degree of education specialist (Ed.S.) is for students with a master’s degree in education who seek further professional preparation. The program is available in the fields of educational leadership and administration, counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education.

Admission Requirements

The following are required for entrance to an education specialist program: an undergraduate degree and a master of arts in education and human development (M.A.Ed.&H.D.) or its equivalent from a regionally accredited institution, two years of pertinent experience in an education or human development field, and a graduate scholastic average of at least 3.3 and, in some programs, an acceptable score on either the Graduate Record Examination or Miller Analogies Test. Two letters of
recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor in the major field.

**Programs of Study and Degree Requirements**

Individual programs are developed, through a plan of study worked out with a faculty advisor, to fit the candidate’s skills, interests, and career goals. A minimum of 30 credits beyond the requirements for an M.A.Ed.&H.D. degree is required. At least 21 credits of this work must be taken in residence at GW. A maximum of five calendar years is allowed for completion of the program.

At least 12 of the required 30 credits must be in appropriate graduate courses in education selected from the following areas: (1) foundations and cognate study, (2) background and general principles of the field of study, and (3) an area of specialization. A graduate-level research methods course must be included in the program if it was not completed in previous graduate work.

**The Comprehensive Examination**

Successful completion of a six-hour written or oral examination or its equivalent, at the option of the major field advisor, is required. Candidates taking the examination must be registered for at least 1 credit in the semester it is to be taken and submit an online comprehensive examination application by the published deadline.

**Education Specialist Programs**

- Education Specialist in the field of educational leadership and administration (p. 539)
- Education Specialist in the field of special education (p. 539)

**EDUCATION SPECIALIST IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION**

The education specialist in the field of educational leadership and administration degree program is designed for students who have at least one year of instructional experience and seek further professional preparation for specific objectives, including leadership and promotion of high-quality student achievement at the district, sub-district, or school-wide level. This post-master’s program can be pursued either in the classroom or in a distance learning format. Graduates are prepared with the skills to become PK-12 leaders who understand curriculum design, instructional excellence, motivation and support of classroom professionals, and the needs of diverse learning communities. Evidence-based course work emphasizes leadership and management, change, communication, administrative and legal issues, human relations, supervision of instruction, and curriculum analysis.

The Ed.S. program is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP) the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/education-specialist-educational-leadership-and-administration) for additional information.

**EDUCATION SPECIALIST IN THE FIELD OF SPECIAL EDUCATION**

The educational specialist (Ed.S.) in the field of special education degree program offers advanced study for students with master’s degrees in education who seek further professional preparation in the various subfields of special education and disability studies. Specific programs are developed in concert with faculty advisors and consist of a minimum of 30 graduate credits.
REQUIREMENTS

The following requirements must be fulfilled: 30 credits in a program developed in consultation with the advisor. This program must include at least 12 credits in graduate courses in the following general areas:

- background and general principles of the field of study
- an area of specialization
- research methods
- professional internship

DOCTORAL PROGRAMS

The Degree of Doctor of Philosophy

A Ph.D. in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

The Ph.D. in the field of educational science is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address such critical national and global problems, scholars require both a strong foundation in educational science as well as theoretical and disciplinary grounding in multiple disciplines. The Ph.D. program is distinguished by four characteristics: (a) candidates apply to a cross-disciplinary research team (CRT) that is focused on a critical problem related to education, (b) approaches to the research problems require a cross-disciplinary lens, (c) students engage in research throughout their program, and (d) candidates aspire to careers in which the production of research is paramount.

Admission Requirements

A master’s degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant’s past achievements, perceived potential, and fit to the goals and mission of the program.

The Degree of Doctor of Education

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (Ed.D.). These programs provide major fields of study in curriculum and instruction, special education, educational administration and policy studies, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student’s program planning committee, course work may be taken in or from other departments of the University and through the Consortium. All programs require a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations.

Admission Requirements

The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the content area that supports his or her objective. This graduate work must be comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master’s degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy

The Doctor of Education program is divided into two stages: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master’s degree or the equivalent in part-time study. Course work and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the Ed.D. is 36 credits of course work in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, course work beyond the minimum is required.

In the precandidacy stage, all course work in the program must be completed and the comprehensive examination passed. Course work toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed.
between the doctoral student and a doctoral study advising
team, generally consisting of two members of the program
faculty.

The comprehensive examination is generally a two-day
examination held each semester and taken upon completion of
all precandidacy course work. Students taking the examination
must be registered for at least 1 credit in the semester it is to be
taken and must file an online application in the dean’s office by
the published deadline.

The candidacy stage of doctoral study begins after successful
completion of the content course work and the comprehensive
examination. A doctoral research dissertation committee is
established and the candidate develops a dissertation proposal
(this may be while registered in Pre-Dissertation Seminar).
Upon successful completion of course work listed on the
approved program plan of study, students must register for
dissertation research at the rate of 3 or 6 credits each fall and
spring semester. A minimum of 12 dissertation research credits
are required for graduation. Students who have not defended
dissertation after 12 credits continue to register at the
rate of 3 or 6 credits until they have reached 24 credits of
dissertation research. Once they have reached their 24 credit
maximum, they must register each subsequent fall and spring
semester for 1 credit of Continuing Research until completion
of their degree program with the successful defense of the
dissertation to the Dissertation Oral Examination Committee.
The accepted dissertation is submitted electronically, with a
processing fee paid directly to Proquest/UMI.

Detailed information on the Ed.D. program and its
administration is available in the GSEHD Doctoral Student
completing their degree program should refer to the
section on Graduation Requirements, Participating in the
Commencement Ceremony, under University Regulations.

**DOCTOR OF EDUCATION IN THE
FIELD OF CURRICULUM AND
INSTRUCTION**

The doctor of education in curriculum and instruction degree
program prepares education leaders whose objective is to
improve pre-K through 16+ education in local, national, and
international settings. The program encourages critical thought
and creative work through course work focusing on curriculum,
instruction, research, and other learning opportunities that
intentionally link teaching and learning, policy, and evaluation
to students’ prior experiences.

The program focuses on understanding how curriculum and
instruction can be constructed and applied to educational
reform and diverse student populations. Doctoral students
become part of a community that links scholars with practicing
professionals, policy makers, and educational organizations
in Washington, D.C., and beyond. Students can also use the
program to expand their content knowledge or delve into
other fields through linkages with Columbian College of Arts
and Sciences or other schools at GW.

Graduates of the program can be found working in
government agencies, teaching in university settings,
or running informal education organizations. They may be
curriculum supervisors in school systems or master teacher
leaders in schools.

Specific admission requirements are shown on the Graduate
Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/
curriculum-instruction) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled:

Requirements for the doctor of education program (p. 540).

A minimum of 66 credits.

Comprehensive Examination

Successful completion of a comprehensive examination is required.

*Prerequisite statistics courses must be taken during the master’s degree or must be completed prior to taking required advanced courses. For students who have not had an introductory statistics course or do not feel confident in their understanding and application of basic statistical techniques (i.e. through one way analysis of variance), EDUC 6116 Introduction to Educational Statistics, should be completed prior to enrolling in EDUC 8120 Group Comparison Designs and Analyses.

DOCTOR OF EDUCATION IN THE FIELD OF EDUCATIONAL ADMINISTRATION AND POLICY STUDIES

The doctor of education (Ed.D.) in educational administration and policy studies degree program provides students with the skill and knowledge they need either to excel within policy research and analysis or achieve high-level success in a K-12 school setting. Though the education administration and policy studies specialties are offered under the same degree title, they are offered at different campus locations with entirely different curricula.

Education Administration Specialty
The education administration specialty is offered at three GW campus locations—the Virginia Science and Technology Campus, in Herndon, Virginia; Alexandria Graduate Center in Alexandria, Virginia; and Hampton Roads Center in Hampton Roads, Virginia. This academically rigorous program prepares students for leadership responsibilities within all facets of the educational arena. Researchers and practitioners who aspire to high levels of responsibility in educational organizations will develop leadership skills through course work, seminars, research associations with faculty, and self-directed activities.

Please visit the Doctorate in Education Administration website (http://gsehd.gwu.edu/programs/doctorate-education-administration) for more information.

Education Policy Specialty
The Education Policy specialty is offered at GW’s Foggy Bottom campus in downtown Washington, D.C. The interdisciplinary program relies on approaches and methods from various fields to help students develop the skills needed to examine and assess education problems in the context of their social environments. The program is designed for students who wish to develop skills in policy research, program evaluation, and the technical, political aspects of education policy. Emphasis is placed on developing both an understanding of the political, economic, and social environments affecting education policy and the competencies needed to apply research to analyze and effectively implement them or to evaluate their impact. Topics
covered in this field include school reform, urban education problems, student achievement, school finance and its equity, teacher quality and effectiveness, equal opportunity, access to higher education, and accountability.

Please visit the Doctorate in Education Policy website (http://gsehd.gwu.edu/programs/doctorate-education-policy) for more information.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The degree is offered in two specialized areas. All requirements in one specialized area must be fulfilled:

**Educational administration specialty**—a minimum of 48 credits, including 27 credits in required courses, 18 credits in dissertation courses, and successful completion of the comprehensive examination.

**Education policy specialty**—a minimum of 54 credits, including 12 credits in required courses, 12 credits in research courses, 15 credits in dissertation courses, 15 credits in elective courses, and successful completion of the comprehensive examination. Six additional credits in prerequisite courses may be required.

Fulfillment of the requirements for the Doctor of Education programs (p. 540) is required for both specialties.

DOCTOR OF EDUCATION IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The mission of the doctor of education in higher education administration degree program is to prepare exceptional leaders for administrative, academic, and research positions in two- and four-year higher education institutions, national and international associations, government agencies, and other post-secondary educational settings. The degree provides students with opportunities to integrate theory and research seamlessly with practice.

Program graduates rise rapidly within administrative and scholarly ranks based on their knowledge of critical issues in the field of higher education, ability to conduct independent primary research, and possession of the skills necessary for academic and administrative career development.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/higher-education-administration) for additional information.

DOCTOR OF EDUCATION IN THE FIELD OF HUMAN AND ORGANIZATIONAL LEARNING

The Doctor of Education (Ed.D.) in Human and Organizational Learning is designed to provide professionals with a foundation in relevant theories, concepts, and practices towards facilitating change initiatives and in becoming more effective leaders and decision makers.

The program is offered with two distinct focuses at different GW campuses.

Foggy Bottom Campus-Based Program
The Foggy Bottom campus offers working professionals evening courses on weeknights. The curriculum focuses on organizational issues such as strategic change, transformational leadership, individual and group learning processes, organizational development, global and international issues, the humane organization, virtual organizations, meaning of work, and self-directed learning. In addition to completing the required course work, students work with an advisor to create an individually designed program around the student’s area of interest. All classes at the Foggy Bottom campus are offered on weeknights.

Virginia Science and Technology Campus-Based Program: Executive Leadership
The Virginia Science and Technology campus cohort focuses on the interrelationships among people, organizations, and learning, while using systemic change processes. The program encourages students to challenge assumptions through critical reflection and fosters group and self-directed learning. Program students come from a variety of professions including business, health care, the military, education, federal agencies, information technology, and manufacturing, and have a variety of academic backgrounds with degrees in fields such as engineering, psychology, health and medical sciences, the humanities, and business. This diverse population enriches the learning experience for fellow students and provides both local and global networking opportunities. All classes at the Virginia Science and Technology campus are offered over a two-day period—Friday and Saturday—once per month, enabling students to continue working full time while pursuing the degree. In addition to the general requirements for admission to the Ed.D., applicants must have at least five years of full-time experience in a field related to human and organizational learning.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/human-organizational-learning) for additional information.

DOCTOR OF EDUCATION IN THE FIELD OF SPECIAL EDUCATION

The doctor of education in the field of special education degree program advances students’ understanding of the relationship between structural and functional changes in the brain across time and experiences, examines cognitive processing, and considers the implications of these findings for teaching, learning, and educational policy. The program also addresses the challenging demands of disability in society and institutional improvements essential to supporting individuals with disabilities. The curriculum includes leadership, policy, and research courses, as well as foundational courses in brain development from early childhood through adulthood. The program works closely with Graduate School of Education and Human Development’s Center for Applied Developmental Science and Neuroeducation (http://gsehd.gwu.edu/center-applied-developmental-science-and-neuroeducation) to provide research and internship opportunities for students to translate and apply research related to learning for diverse populations. Graduates leave prepared to have an impact through leadership in academic settings, research communities, policy institutions, and advocacy organizations.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (p. 540).

66 credits, including 27 credits in required courses, a minimum 12 credits in research courses including 3 credits in advanced research, 6 credits in internship courses, a minimum 15 credits in dissertation courses, 6 credits in elective courses, and successful completion of a comprehensive examination.

Required

HOL 8999  Dissertation Research (minimum 12 credits needed to complete requirement)

Successful dissertation proposal is required.

Successful completion of a comprehensive examination is required.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COUNSELING

The doctor of philosophy in counseling degree program balances rigorous research with clinical work to graduate scholar practitioners. Graduates are prepared for a number of roles, such as teaching in universities, practicing in a variety of settings from directing high school counseling departments to leading county mental health treatment programs. The program offers challenging course work, practical experience at mental health sites, and the opportunity to train as supervisors at the Graduate School of Education and Human Development’s Community Counseling Service Center. Designed to be completed in four to five years, the program is unique in building students’ knowledge and capacity to conduct research, publish, provide clinical services, and educate at the graduate level. Instruction is provided in areas including trauma, human sexuality, child and adolescent development, grief and loss, substance abuse, multicultural counseling, as well as a deep knowledge of diagnosis, assessments, interventions, and treatment approaches. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

A minimum of 69 credits, including 24 credits in core courses, 15 credits in research courses, 6 credits in human development courses, 9 credits in an area of specialization, 15 credits in dissertation courses, and successful completion of the comprehensive examination.

DOCTOR OF PHILOSOPHY IN THE FIELD OF EDUCATIONAL SCIENCE

The doctor of philosophy (Ph.D.) in educational science degree program is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address such critical national and global problems, scholars require both a strong foundation in educational science as well as theoretical and disciplinary grounding in multiple disciplines. The Ph.D. program is distinguished by four characteristics: (1) candidates apply to a cross-disciplinary research team (CRT) that is focused on a critical problem related to education, (2) approaches to the research problems require a cross-disciplinary lens, (3) students engage in research throughout their program, and (4) candidates aspire to careers in which the production of research is paramount.

REQUIREMENTS

The following requirements must be fulfilled:
JURIS DOCTOR AND MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES

Students must be admitted to the master of arts in education and human development in the field of education policy studies (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-education-policy-studies) (M.A.Ed.&H.D.) degree program and, separately, to the juris doctor (http://www.law.gwu.edu/Admissions/JD/Pages/Default.aspx) degree program. Each school separately must approve a student’s application to pursue the joint degree.

Once a student has been admitted to both schools as a joint degree candidate, the first year of study must be devoted exclusively to the prescribed law curriculum. Subsequently, any combination of law and master’s degree courses may be taken in any semester.

Under Law School regulations, the grade of Credit (CR) or No Credit (NC) is recorded for courses taken at any other GW school, and a student must receive a grade of at least B- to receive a grade of CR. Grades of CR and NC resulting from courses taken outside of the Law School count toward the total of 17 credits allowed under the School’s Credit/No Credit (CR/NC) option. Law students receive 1 credit for each 700 minutes of scheduled class time in a semester; therefore, a law student may in some cases earn only 2 credits for a course offered by another school of the University for 3 credits.

The joint degrees must be conferred simultaneously and only after all requirements for both degrees have been met. The Law School Records Office and Dean of Students Office work in consultation to transfer 12 credits earned as part of the M.A.Ed.&H.D. degree to the J.D. degree transcript in the final month before graduation. It is the responsibility of each joint degree student to ensure that grades from their final semester or summer session of study are transferred to the Law School for credit to qualify for graduation. Capstone projects, language requirements, and/or any other requirements for the M.A.Ed.&H.D. must be fully met before the law degree will be conferred.

A number of other regulations govern the joint degree programs. Students interested in entering one of these programs should consult with both admissions offices, and, in the Law School, the Dean of Students Office.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Electives

12 credits in approved electives taken through the Law School or GSEHD. Joint degree students must seek prior approval from their GSEHD faculty advisor to ensure that any course taken will be considered toward M.A.Ed. and H.D. electives. The Law School Dean of Students should approve credit for additional GSEHD courses that are law-related and develop policy analysis skills.

GRADUATE CERTIFICATE PROGRAMS

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

Graduate Certificates

- Assessment, Testing, and Measurement in Education (p. 551)
- Autism Spectrum Disorders (p. 551)
- Brain Injury: Educational and Transition Services (p. 552)
- Counseling and Life Transitions (p. 552)
- Design and Assessment of Adult Learning (p. 553)
- E-Learning (p. 554)
- Global Leadership in Teams and Organizations (p. 554)
• Incorporating International Perspectives in Education (p. 554)
• Instructional Design (p. 555)
• Integrating Technology into Education (p. 555)
• Job Development and Placement (p. 556)
• Leadership Development (p. 556)
• Leadership in Educational Technology (p. 556)
• Multimedia Development (p. 557)
• Organizational Learning and Change (p. 557)
• Secondary Special Education and Transition Services (p. 557)
• Special Education for Culturally and Linguistically Diverse Learners (p. 558)
• STEM Master Teacher (p. 558)
• Teaching English to Speakers of Other Languages (p. 559)

**GRADUATE CERTIFICATE IN AUTISM SPECTRUM DISORDERS**

The graduate certificate in autism spectrum disorders prepares students to more effectively address the following issues in working with children with autism spectrum disorders: (1) academic achievement and study skills commensurate with their cognitive strength; this will provide the widest range of options for college and career choices, (2) social skills for navigating all of the environments in which they live, work, and play, and (3) problem-solving strategies that enable them to respond flexibly and successfully in challenging situations.

The certificate program is designed for individuals with a bachelor's or master's degree who are interested in focusing on a multi-intervention approach to instructing students with autism spectrum disorders.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

POST MASTER'S CERTIFICATE IN EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The graduate certificate in educational leadership and administration is designed for students who hold a master’s degree and have at least one year of PreK-12 instructional experience. Students are prepared to promote high-quality student achievement and become a leader in various public school-based and central office positions. The academic program includes courses and PK-12 field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

This accelerated program can be pursued either in the classroom or in an online, distance learning format and is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP), the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

GRADUATE CERTIFICATE IN E-LEARNING

The graduate certificate in e-learning—offered exclusively online—is ideal for individuals involved in instructional aspects of distance learning, including instructors currently teaching at a distance and those who wish to develop the skills to do so. The program helps students to acquire the skills needed to be successful e-teachers and e-learners. The program prepares students to apply the theories, principles, models, tools, and techniques associated with e-learning in diverse organizational settings.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**GRADUATE CERTIFICATE IN INTEGRATING TECHNOLOGY INTO EDUCATION**

The graduate certificate in integrating technology into education—offered exclusively online—provides students from varied professional educational backgrounds (including public and private sectors, K-12, and higher education) with the foundational knowledge and skills required to integrate technology effectively into their instruction. The curriculum, which is taught in a distance learning format, prepares students to apply, manage, and evaluate theories, standards, technologies, and techniques for integrating technology within their professional educational settings. Students integrate their professional experiences into their learning, apply their course assignments to their current professional activities, and actively engage with other professionals.

**GRADUATE CERTIFICATE IN JOB DEVELOPMENT AND PLACEMENT**

The graduate certificate in job development and placement is ideal for a variety of professionals in state, federal, nonprofit, and community-based rehabilitation. Students delve into the social and cultural dimensions of rehabilitation counseling, as well as job development and job placement methods and techniques. The curriculum provides specialized experiential learning opportunities by integrating classroom course work with hands-on experience through a required 50-hour practicum.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits in required courses.

**Required:**

- CNSL 6130 Vocational Assessment of Individuals with Disabilities
- or SPED 6230 Vocational Assessment of Individuals with Disabilities
- CNSL 6163 Social/Cultural Dimensions-Cns
- CNSL 6376 Foundations/Practicum: Rehabilitation and Case Management
- CNSL 6380 Job Placement and Supported Employment

In addition to the required coursework, students are required to complete a 50-hour supervised practicum in a vocational rehabilitation agency (public or community partner program) to gain job development and job placement experience. The practicum must be completed within one year from date of entry to the program in order for the student to complete all requirements in the allowed period and receive the certificate. Students should consult with the program coordinator and/or academic advisor prior to beginning the practicum.

**GRADUATE CERTIFICATE IN LEADERSHIP DEVELOPMENT**

The graduate certificate in leadership development provides in-depth understanding of organizations as human systems and the practical knowledge required to improve organizational effectiveness through leadership and training. Students acquire knowledge and skills in the areas of adult learning, group processes, organizational diagnosis, and consulting strategies.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses, and 12 credits in elective courses chosen on consultation with Master’s coordinator.

GRADUATE CERTIFICATE IN STEM MASTER TEACHER

The graduate certificate in STEM master teacher provides licensed K-12 educators with an opportunity to expand their skills and methods for engaging students in rich, powerful STEM (science, technology, engineering, and mathematics) learning experiences. The establishment of this 12-credit certificate coincides with adoption of the Next Generation Science Standards and Common Core State Standards for Mathematics and addresses the anticipated professional development needs of school districts adopting these new standards.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-stem-teaching) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and a 3-credit elective course.

Required
CPED 6701  Arts in the STEM Curriculum
CPED 6702  Integrating Engineering in the Math and Science Classroom
CPED 6703  Advanced STEM Teaching Methods

Elective

One of the following:

CPED 6367  Perspectives and Research in Teaching Science
CPED 6370  Perspectives and Research in Teaching Mathematics
CPED 8309  Supervising Preservice Clinical Experience

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

GRADUATE CERTIFICATE IN TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES

The graduate certificate in teaching English to speakers of other languages is ideal for prospective teachers in both ESL and content areas who wish to teach in the United States and abroad. Students learn to identify and interpret the characteristics and needs of English learners and apply knowledge in the practice of instructional methodology and assessment that develops academic and social English proficiency. The four courses in the TESOL graduate certificate count towards most state licensure or add-on endorsement requirements and provide students with knowledge and skills needed to achieve on the English for Speakers of Other Languages Praxis Test.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/teaching-english-language-learners-graduate-certificate) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

All courses must be completed with a minimum grade of B.

The proposed TESOL Graduate Certificate Program will require completion of the following courses with grades B or above:

1. CPED 6557: Second Language Acquisition
2. CPED 6551: Second Language Instruction (Methods)
3. CPED 6627: Teaching Second Language Reading and Writing
4. CPED 6556: Linguistic Applications in English as a Second Language (ESL)

The recommended sequence of courses is:

- Fall Semester (6 credits): CPED 6551: Second Language Instruction and CPED 6557: Second Language Acquisition
- Spring Semester (3 credits): CPED 6627: Teaching Second Language Reading and Writing
- Summer Semester: CPED 6556 (3 credits): Linguistic Applications in ESL (online)

Students can complete the proposed TESOL Graduate Certificate Program in two semesters and a summer, or approximately 11 months. Offering the final course in the sequence online will accommodate students who move outside the GW area as they complete the program.

Students also have the option of completing the certificate in four semesters by enrolling in 3 credits each semester. It is recommended that students in the four-semester option would take CPED 6551: Second Language Instruction during the first semester (Fall I) and CPED 6557: Second Language Acquisition during the fourth semester (Fall II).

GRADUATE CERTIFICATE IN TRAINING AND EDUCATIONAL TECHNOLOGY

The graduate certificate in training and educational technology—offered exclusively online—prepares students to apply the theories, principles, models, and tools of instructional technology and distance education in diverse organizational learning activities and settings. Skills and experiences acquired range from conducting a needs analysis to applying the systematic design of instruction to evaluating the role of technology in leadership development and the assessment of distance education (or e-learning) opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

COUNSELING AND HUMAN DEVELOPMENT

GRADUATE

Master's programs
- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 521)
- Master of Arts in Education and Human Development in the field of clinical rehabilitation counseling (p. 521)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 532)
- Master of Arts in Education and Human Development in the field of school counseling (p. 533)
- Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program
- Doctor of Philosophy in the field of counseling (p. 548)

FACULTY

Associate Professors R. Lanthier (Chair), M.C. McGuire-Kuletz, M.M. Megivern, S. Steen

Assistant Professors S. Beveridge, S.C. Kim, R.M. Dedmond, D.M. Pittman

Professorial Lecturers O. Madison, R.J. Pasi, B.J. Thompson, R.C. Windham

Lecturers E. Rhymers, P. Tschudi

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Programs in counseling are offered at the graduate level by the Graduate School of Education and Human Development (http://gsehd.gwu.edu) through its Department of Counseling and Human Development (http://gsehd.gwu.edu/content/department-counseling-and-human-development).

CNSL 0920. Continuing Research - Masters. 1 Credit.
CNSL 0940. Cont Research - Doctoral. 1 Credit.
CNSL 2102. Foundations of Counseling. 3 Credits.
CNSL 2162. Professional and Ethical Orientation to Counseling. 3 Credits.
The roles and functions of a professional counselor and the ethical standards that govern the profession.
CNSL 2163. Psychosocial Adjustment. 3 Credits.
Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.
CNSL 2376. Introduction to Rehabilitation Counseling. 3 Credits.
Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.
CNSL 2378. Disability Management and Psychosocial Rehabilitation. 3 Credits.
Case management services for persons with physical, mental, and emotional disabilities.
CNSL 2381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.
Chronic and traumatic disorders; rehabilitation and psychosocial implications.
CNSL 6100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.
CNSL 6101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with an instructor.
CNSL 6103. Thesis Research. 3 Credits.
CNSL 6104. Thesis Research. 3 Credits.
CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.
CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.
The roles and functions of a professional counselor and the ethical standards that govern the profession.
CNSL 6153. Counseling Interview Skills. 3 Credits.
Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6154. Theories and Techniques of Counseling. 3 Credits.
An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6155. Career Counseling. 3 Credits.
A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6157. Individual Assessment in Counseling. 3 Credits.
Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6159. Psychosocial Adaptation. 3 Credits.
Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.

CNSL 6161. Group Counseling. 3 Credits.
Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6163. Social/Cultural Dimensions-Cns. 3 Credits.
Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.
The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6169. Counseling Substance Abusers. 3 Credits.
Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6170. Grief and Loss. 3 Credits.
Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.

CNSL 6171. Family Counseling. 3 Credits.
The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6172. Human Sexuality for Counselors. 3 Credits.
Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.
For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.

CNSL 6174. Trauma and Crisis Intervention. 3 Credits.
This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course will cover the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course will provide a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.

CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.
Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver’s grief, spirituality, and cross-cultural issues.

CNSL 6177. Spirituality and Loss. 3 Credits.
Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.
The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Practicum/Internship in Counseling. 3 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting. Material fee.
CNSL 6186. Advanced Internship in Counseling. 3-6 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Material fee. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.
The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.
Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.
Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations/Practicum: Clinical Mental Health Counseling. 3 Credits.
Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6376. Foundations/Practicum: Rehabilitation and Case Management. 3 Credits.
Survey of history, philosophy, basic principles, legislation, roles, and services.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.
Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.
Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.
Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.
Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.
Workers’ compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.
Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.
CNSL 6466. Foundations of School Counseling K-12. 3 Credits.
Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.

CNSL 8100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.
Guided individual research. Program and conferences arranged with an instructor.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.
A post-master’s course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisite: CNSL 6161; permission of instructor is required.

CNSL 8252. Advanced Leadership and Advocacy in Counseling. 3 Credits.
Theory and practice of consultation and administration, with focus on school, community, and rehabilitation settings. Research issues. Admission by permission of instructor.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.
Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Restricted to Admission by permission of instructor. Prerequisites: CNSL6163 Social and Cultural Dimensions of Counseling. Recommended background: PhD degree student in the field of counseling; completed a master’s degree in counseling.
CNSL 8255. Advanced Supervision in Counseling. 3 Credits.
Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Restricted to Admission by permission of instructor. Recommended background: For PhD degree students.

CNSL 8257. Doctoral Practicum in Counseling. 3 Credits.
Experiential learning of advanced counseling and counseling-related competencies through direct, supervised participation in group work, research, teaching, and/or consultation. Admission by permission of instructor.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.
Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For Ed.S. and Ph.D. degree candidates in the field of counseling. Admission by permission of instructor.

CNSL 8259. Doctoral Internship in Counseling and Counselor Supervision I. 3 Credits.

CNSL 8260. Doctoral Internship in Counseling and Counselor Supervision II. 3 Credits.

CNSL 8961. Seminar: Counseling. 1-12 Credits.

CNSL 8998. Predissertation Seminar. 3 Credits.
Prerequisite: CNSL 8998/EDUC 8998.

HDEV 6108. Life Span Human Development. 3 Credits.
Continuity and change in developmental attributes. The developing person in relation to social norms, roles, and stage-graded expectations from birth to death. Interaction between biogenetics and environment.

HDEV 6109. Child Development. 3 Credits.
Typical development and the familial and social antecedents of developmental risk. Environments that foster competent children and developmental sequelae of childhood vulnerability and trauma. For graduate students in counseling, psychology, and related disciplines.

HDEV 6110. Adolescent Development. 3 Credits.
Key attributes and problems in adolescent development. Typical adolescent development and contemporary social problems in relation to stress, risk, and resilience. For graduate students in counseling, psychology, and related areas.

HDEV 6129. Cultural Effects on Human Development. 3 Credits.
Effects of culture on the experience and expression of self, others, space, time, faith systems, norms, and other attributes. Egocentric and sociocentric effects, primitive and technological effects. Group immersion as the basis for prejudice. Developmental consequences as a consequence of cultural context.

HDEV 6161. Practicum in Human Development. 3 Credits.
Admission by permission of instructor.

HDEV 6162. Internship in Human Development. 3 Credits.
Admission by permission of instructor.

HDEV 6701. Adult Learning. 3 Credits.
Same as HOL 6701.

HDEV 8100. Issues and Special Topics in Human Development. 3-6 Credits.
Issues and special contemporary topics related to child, adolescent, and adult development. Applications for professional roles.

HDEV 8241. Emotional and Cognitive Dev. 3 Credits.
Emotional and cognitive development as related to self-esteem, social cognition, and interpersonal skills. Relationships among cognitive development, intellectual reasoning, insight, and social development.

HDEV 8244. Adult and Aging Development. 3 Credits.
Theories and research on personality and intelligence in adulthood. Research designs and methods. Implications of developmental data for counseling and selected professional roles.

HDEV 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HOL 8742.

CURRICULUM AND PEDAGOGY

GRADUATE

Master’s programs

- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 522)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 522)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 523)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 524)
- Master of Arts in Education and Human Development individualized program (p. 529)
- Master of Education in the field of elementary education (p. 527)
- Master of Education in the field of secondary education (p. 534)
Doctoral program

• Doctor of Education in the field of curriculum and instruction (p. 541)

FACULTY

Professors S.J. Lynch

Associate Professors S.S. Beck, B. Casemore (Chair), J. Eakle, C. Green, C.L. Pyke, P.S. Tate

Assistant Professors J. Grooms, M.G. Sheppard, T. Sikorski

Research Instructors A.M. Bitler, M.M. Hollibaugh Baker

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.
CPED 0940. Continuing Research - Doctoral. 1 Credit.
CPED 6100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.
CPED 6100W. Special Topics. 1-12 Credits.
CPED 6101. Research and Independent Study. 1-3 Credits.
Individual research under the guidance of a staff member; program and conferences arranged with an instructor.
CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.
CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.
CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.
CPED 6199. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.
CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.
The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading-literacy program.
CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.
Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.
CPED 6224. Diagnostic Teaching of Reading: K-6. 3 Credits.
Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.
CPED 6225. Introduction to International Curricula. 3 Credits.
CPED 6229. Current Issues in Elementary Education. 3 Credits.
Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.
CPED 6236. Analysis of Teaching. 3 Credits.
Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.
CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.
Supervised field experience in curriculum and instruction. Admission by permission of instructor.
CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.
Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and departmental approval.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.
Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.

CPED 6305. Foundations of Curriculum Theory. 3 Credits.
Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6340. Teacher Leadership in Education. 3 Credits.
From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master’s Internship in Curriculum and Instruction. 3-6 Credits.
Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.
Prerequisite: the appropriate subject content course from CPED 6545 through CPED 6550.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.
Significant trends, findings, and perspectives in science education in the United States from the early 19th century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.
Deepens students’ understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.
Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children’s Literature across the Curriculum. 2,3 Credits.
Participants read and analyze multicultural children’s literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6411. Elementary School Curriculum and Methods. 3 Credits.
A comprehensive block course with subsections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. May be repeated for up to 15 credits; with permission, up to four blocks (to a total of 12 credits) may be taken in one semester. Admission by permission of advisor. Material fee.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.
A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Restricted to Admission by permission of advisor.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.
The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.
Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.
CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.
Supervised internship in middle schools; required seminar. Admission by permission of instructor. Material fee.

CPED 6534. Professional Internship in Secondary Education. 3-6 Credits.
Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.
Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.

CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisites: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisites: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6606, CPED 6507.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.
Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instructional Methods. 3 Credits.
Knowledge and skills related to the instruction and assessment of language students in ESL/FL and FL settings. Past second language teaching methods, contemporary instructional approaches and materials, and other considerations in developing academic and social language proficiency. Materials fee. Prerequisites: CPED 6507 and CPED 6606 and the approved certification coursework in the content area.

CPED 6554. Issues, Study & Practices-ESL. 3 Credits.
A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.
A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.
The science of language and how its different branches may be used for English as a Second Language (ESL) teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.
The nature of first and second language acquisition and development; emphasis on sociolinguistics and psycholinguistics most pertinent to educational settings.

CPED 6604. Perspectives in American Education. 3 Credits.
Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.
A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.
Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6623. Foundations of Reading Development. 2 Credits.
Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.
CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.
Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.

CPED 6626. Practicum 1: Reading Diagnosis, Assessment and Solutions. 3 Credits.
Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.
Literacy development for language learners; theories of literacy development in a second or foreign language, strengths and needs of language learners, reading and writing instructional strategies for language and content classrooms. Appropriate for students interested in teaching ESL, foreign languages, or content areas in elementary or secondary schools. Materials fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.
How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.
Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.
Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.
In-depth coverage of approaches to integrating arts and design into STEM curricula (“STEAM”) for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.
Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small “design challenges” to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.
Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a faculty member. Program and conferences arranged with an instructor.

CPED 8199. Federal Educ Policy Institute. 3 Credits.

CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.

CPED 8325. Advanced Ideas in Curriculum Theory. 3 Credits.
Examination of reviews and research studies on curriculum theory. Focus on trends, values, interpretations, design systems, and evaluation. Prerequisite: CPED 6305.

CPED 8330. Paradigms of Instruction and Assessment. 3 Credits.
A foundation of theory, models, and variables that have contributed to the fields of instruction and assessment. The major paradigms of instruction and assessment. Material fee.

CPED 8331. Seminar in Instruction. 3 Credits.
Analysis of alternative models of instruction and the factors that influence the instructional process in schools. Connections among learning, instructional theory, research, and practice. Material fee.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.
Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.
Fundamental perspectives of school reform through professional development of educators (K-12); evolution of contemporary professional development models and trends: examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Research in Curriculum and Instruction I. 1-3 Credits.
Models of curriculum and instruction research that span various research methods.
**CPED 8335. Seminar in Research in Curriculum and Instruction II.** 1-3 Credits.
Development of initial research proposal ideas for the dissertation.

**CPED 8340. Education Policy, Reform & Teacher Leadership.** 3 Credits.
This online course will engage students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course will examine teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to Doctoral level course; masters students by permission of instructor. Prerequisites: None.

**CPED 8341. Evaluation in Curriculum & Instruction.** 3 Credits.
This course will teach doctoral and masters' students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; masters students with approval of instructor.

**CPED 8354. Doctoral Internship: Teacher Education.** 3-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Admission by permission of advisor.

**CPED 8998. Doctoral Seminar in Curriculum and Instruction.** 3-6 Credits.
Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

**CPED 8999. Dissertation Research.** 3-6 Credits.
Prerequisite: CPED 8998.

**EDUCATIONAL LEADERSHIP**

**GRADUATE**

**Master's programs**
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 520)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 525)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 526)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 526)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 528)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 528)
- Master of Arts in Education and Human Development in the field of international education (p. 530)
- Master of Arts in Education and Human Development individualized program (p. 529)
- Master of Arts in Teaching in the field of museum education (p. 530)

**Post-master's program**
- Education Specialist (p. 517)

**Doctoral programs**
- Doctor of Education in the field of educational administration and policy studies (p. 542)
- Doctor of Education in the field of higher education administration (p. 544)

**FACULTY**

**Professors**
- M.J. Feuer
- M. H. Futrell
- N.B. Paley
- I.C. Rotberg (Research)
- R. Whitaker

**Associate Professors**
- R.A. Chernak
- J. Choi
- M.D. Corry
- S.A. Dannels
- J.L. Glazer
- J. Gomez (Chair)
- M. Kim
- L. Lemasters
- N.B. Milman
- Y. Nakib
- C.B. Stapp
- S. Swayze
- A.A. Tekleselassie
- R.R. Watkins
- J.H. Williams

**Assistant Professors**
- A.A. Ali
- J.K. Clayton
- A.J. Collins
- W.R. Dardick
- L.C. Engel
- S.A. Harris (Research)
- L.C. Glazer
- R.C. Jakeman
- D. Klasik
- L. Malcom-Piqueux
- M.A. Robinson
- K.A. Sherrill
- B.T. Streitweiser
- R.A. Thessin
- B.A. Weiss

**Lecturers**
- B. Bowers
- L. Lent
- J.A. Washburn

**COURSES**

**Explanation of Course Numbers**
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
EDUC 0920. Continuing Research - Masters. 1 Credit.
EDUC 0940. Cont Research: Doctoral. 1 Credit.
EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.
A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.
EDUC 3002. Special Workshops. 3 Credits.
EDUC 6100. Experimental Courses. 1-12 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.
EDUC 6101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.
EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.
Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.
EDUC 6114. Introduction to Quantitative Research. 3 Credits.
Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.
EDUC 6116. Introduction to Educational Statistics. 3 Credits.
Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Educ 8120.
EDUC 6232. Supervision and Evaluation of Instruction. 3 Credits.
The roles and functions of educational leaders in the areas of curriculum, staff development, instructional supervision, and evaluation of personnel. Theory and practice to increase teacher effectiveness and improve student learning through supervisory strategies.
EDUC 6234. Site-Based Leadership: K-12. 3 Credits.
A general introduction to the principalship. Stresses leadership theory, roles, and management tasks in instruction, curriculum, budget, staff development, supervision, interagency services, student learning, and policy considerations. Site-based management and communication within a changing and diverse school environment.
EDUC 6236. School Law and Policy. 3 Credits.
The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.
EDUC 6240. Fundamentals of Educational Leadership and the Change Process. 3 Credits.
Current leadership theory and systems behavior in the context of administrative practice in educational settings. Key elements of leadership and management. The impact of context, culture, power, politics, change, communications, and organizational learning on administration.
EDUC 6242. Administrative Issues in Education. 3 Credits.
The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.
EDUC 6244. School-Community Relations. 3 Credits.
The purpose, scope, essential elements, and impact of a successful school-community relations program. Community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, evaluation of public relations and marketing for educational institutions.
EDUC 6246. Seminar: Applied Educational Administration. 3-6 Credits.
Application of the theories and principles of administration to public and private schools. Field experience in a phase of administration and supervision. Admission by permission of instructor.
EDUC 6252. Human Relations Diversity. 3 Credits.
Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.
EDUC 6256. School Business Management. 3 Credits.
Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.
EDUC 6258. School Finance. 3 Credits.
The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.
EDUC 6260. Practicum in Supervision. 3-6 Credits.
Practical experience in supervision of instruction. Admission by permission of instructor.
EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.
Service in a school situation directed by the University's faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.
Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6287. Internship: Administration. 3-6 Credits.
Service in an educational institution or education-related program directed by the University's faculty.

EDUC 6314. History of American Education Reform. 3 Credits.
An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.
A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.
An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.
Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.
Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.
Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Applying Educational Media and Technology. 3 Credits.
Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Computers in Education and Human Development. 3 Credits.
The research and practice surrounding the use of computers in educational and training settings. Students will acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.
Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.
For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.
The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.

EDUC 6406. Instructional Design. 3 Credits.
Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.
Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.
Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Analysis. 3 Credits.
An introduction to the role of instructional needs analysis and assessment. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.
Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.
The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.
Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.
EDUC 6426. Computer Interface Design for Learning. 3 Credits.
Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.
Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.
Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.
Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master’s Project. 1-6 Credits.
Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Intro Stu Aff & Higher Ed. 3 Credits.
Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.
Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.
College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.
An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Ldrshp. 3 Credits.
This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course will explore how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students will also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.
Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.

EDUC 6550. Assessment in Higher Ed. 3 Credits.
Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.
Assessment of policies that impact higher education, including the relationship of K-12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.
Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.
Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.
An examination of the planning movement in education; its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.
An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.
Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.
EDUC 6579. Managing Multicultural Environments. 3 Credits.
Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master’s Internship in Higher Education Administration. 3-6 Credits.
Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6601. International and Comparative Education. 3 Credits.
Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.
In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.
Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.
EDUC 6620. Strategies and Analysis in International Education. 3 Credits.
Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.
Study and research in a foreign country as part of a group program. Admission may require permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.
Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission may require permission of instructor. May be repeated for credit.

EDUC 6640. Selected Topics in International Education. 3 Credits.
Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.

EDUC 6650. Education and National Development. 3 Credits.
In terms of the basic assumption that education contributes to national development, the course examines the role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.
Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master’s program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.
An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum’s mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.
Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.
A survey of the museum’s diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.
Sixteen-hours per week placement in local educational institutions supervised by GW faculty. On-campus seminar focuses on human development and learning theory.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.
Thirty-two hours-per-week supervised placement in education departments in area museums; students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners.

EDUC 6706. Evaluating Museum Learning. 3 Credits.
Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.
Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.
Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.
EDUC 6710. Museums and Technology. 3 Credits.
Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.
Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience’s engagement with the museum’s resources.

EDUC 6998. Thesis Research. 3 Credits.
Thesis research.

EDUC 6999. Thesis Research. 3 Credits.

EDUC 8100. Experimental Courses. 1-12 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.
Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.
For precandidates for the Ed.D. Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.
Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factorial design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.
A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.
Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.
Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.
Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.
Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.
Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.
Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.
Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.

EDUC 8172. Multivariate Analysis. 3 Credits.
Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.
Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.
Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.
EDUC 8175. Item Response Theory. 3 Credits.
Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.
In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment, Testing, and Measurement in Education. 3,6 Credits.
Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Restricted to Permission of instructor. Prerequisites: EDUC 8170.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.

EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.
Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.
The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.
Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.
Application of economic theory and analysis to education problems and policies. Contemporary education reforms that are adopted to improve educational outcomes are analyzed with emphasis on their complexities. Prerequisites: EDUC 6371, EDUC 8120.

EDUC 8322. Education Policy Implementation. 3 Credits.
The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.
Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisite: EDUC 6371.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.
Issues of policy design that underlie the push for greater accountability in education. Students review research articles and conceptual argument, discuss evidence on actual practice, and identify strengths and weaknesses of a range of policy tools. Prerequisite: EDUC 6371.

EDUC 8329. Seminar in Program Evaluation. 3 Credits.
Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.
Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.
The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.

EDUC 8525. College and University Curriculum. 3 Credits.
Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.
Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.
EDUC 8540. History of Higher Ed. 3 Credits.
History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.
An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.
Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8580. The Community/Junior College. 3 Credits.
The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.
A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.
Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.
Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.
Required of all departmental Ed.D. degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.
Prerequisite: EDUC 8998.

HUMAN AND ORGANIZATIONAL LEARNING

GRADUATE

Master's programs
• Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 531)
• Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program
• Doctor of Education in the field of human and organizational learning (p. 545)

FACULTY

Professors D. Burley, S. Khilji, M. Marquardt, D.R. Schwandt

Associate Professors A.J. Casey, N.E. Chalofsky (Chair), M. Cseh, E. Goldman, R.B. Morgan, E.M. Scully-Russ, J. Storberg-Walker

Assistant Professors S.L. Campbell (Teaching)

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HOL 0920. Continuing Research - Master’s. 1 Credit.
HOL 0940. Cont. Res. - Doctoral. 1 Credit.
HOL 6100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 6101. Research and Independent Study. 1-3 Credits.
Preparation of an in-depth project under the guidance of a faculty member. The course is arranged individually with the program advisor.

HOL 6700. Human Behavior and Learning in Organizations. 3 Credits.
How individuals and groups learn and interact within organizations and how organizations function and learn. Motivation, group dynamics, leadership, systems theory, organizational culture, and change.

HOL 6701. Adult Learning. 3 Credits.
Premises and theories used to meet learning needs of adults. Overview of various learning theories and the impact of various stages of adult development on learners. Topics including self-directed learning, accommodating individual learning needs, and creation of effective learning techniques. Same as HDEV 6701.

HOL 6702. Organizational Change I. 3 Credits.
The assessment of organizational conditions, including collection and interpretation of information, operations, and problems (human, structural, and systemic). Course participants collect and analyze data to provide solutions to enhance organizational effectiveness.
HOL 6703. Organizational Change II. 3 Credits.
Introduction to the concepts, methods, and skills required for effective consultation in organizations, as either an internal or an external consultant. Meeting the human needs in organizations, while improving performance and productivity. Students undertake a consulting project in an organization.

HOL 6704. Leadership in Organizations. 3 Credits.
Developments in theory and research centered on organizational leadership. Emphasis on various types of leadership including transformational, responsible, authentic, and ethical.

HOL 6705. Strategic Change. 3 Credits.
Overview of best practices for organizing and managing people and organizations to compete successfully. Leading an organization through a process of self-examination, redesign, and change that results in sustained effectiveness, learning, and high performance.

HOL 6706. Current Issues in Organizational Leadership. 3 Credits.
Current issues and future trends in organizational leadership. Students gather data and analyze key topics associated with areas such as talent management, leading through demographic shifts, leadership in a globalized world, leading global change, and developing new forms of leadership, ethics, and sustainability.

HOL 6707. Organizational Learning. 3 Credits.
Learning in an organizational context. Processes through which the organization as a system learns, unlearns, changes, and disseminates information. Organizational learning theories address the processes and barriers of gathering, using, developing, and retaining knowledge in organizations.

HOL 6708. Global Leadership. 3 Credits.
The changes taking place in organizations due to the process of globalization and the requirements for leadership. The changing global environment, how those changes influence operational and strategic issues within global organizations, and how a leader can better understand the global environment to help organizations meet these new challenges.

HOL 6709. Leadership Development. 3 Credits.
The processes employed to develop leaders/leadership and how individuals change as a result of the process. Examination of the context within which leadership is developed. Prerequisites: HOL 6704.

HOL 6710. Globalization, Change, and Learning. 3 Credits.
With learning as the coping strategy, focus on how policymakers and global leaders can be helped to take advantage of the opportunities and address the challenges that globalization presents.

HOL 6720. Advanced Strategies for Adult Learning. 3 Credits.
Theoretical and practical strategies of adult learning in various settings, including corporate environments. Learning strategies, such as creative thinking and self-directed learning. Critical adult learning issues.

HOL 6721. Assessing the Impact of Organizational Change. 3 Credits.
Knowledge and skills needed to evaluate the impact and return on investment of change efforts. Focus on how to plan and conduct systematic evaluations of change efforts, including the choice, development, and use of various tools for measuring individual, group, and organizational change. Assessing the success of the planned change.

HOL 6724. Increasing the Capacity to Learn. 3 Credits.
Identification of actions that can help increase the capacity to learn. Emphasis on experimental learning and critical reflection.

HOL 6725. Internship in Human Resource Development. 3-6 Credits.
Supervised experience in selected areas of human resource development and adult education. Admission by permission of the program advisor.

HOL 6742. Design of Adult Learning Interventions. 3 Credits.
Designing and implementing adult learning programs. Topics include instructional design techniques, designing effective programs, program planning and marketing techniques, and conducting needs assessments and evaluations of adult learning programs.

HOL 6743. Action Learning. 3 Credits.
Processes, principles, and skills necessary to participate in and lead both single- and multiple-problem action learning sets. The six dimensions of action learning; educational psychological, political, sociological, and management theories underlying action learning.

HOL 6744. Meaningful Workplaces. 3 Credits.
Characteristics of the humane organization and of meaningful work. Intrinsic motivation, work-life balance, and the workplace community.

HOL 6745. Technology and Human Resource Development. 3 Credits.
How technology can best be utilized in the HRD environment. Discussion of CBT, use of the Internet for instruction, and distance learning techniques.

HOL 6746. Work Groups and Teams in Organizations. 3 Credits.
Exploration of the nature of work groups and teams as they are utilized in organizational settings. Group and team dynamics, facilitating and leading skills, and group roles and culture.
HOL 6747. International and Multicultural Issues in Organizations. 3 Credits.
The impact of culture and globalization on U.S. and international human and organizational learning programs and practices. Adult learning and organizational change approaches that develop and utilize the synergy of a global workforce.

HOL 6998. Thesis Research. 3 Credits.
Thesis research.

HOL 6999. Thesis Research. 3 Credits.
Thesis research.

HOL 8100. Special Topics in Human and Organizational Learning - Doctoral Studies. 3 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 8101. Research and Independent Study. 1-3 Credits.

HOL 8700. Foundations of Human and Organizational Learning. 3 Credits.
The study of individuals and their interactions within an organizational context. Overview of key theories in leadership, systems theory, group dynamics, learning, organizational culture, and motivational theory. The use of research in human and organizational learning.

HOL 8701. Theory, Research, and Practice in Adult Learning and Development. 3 Credits.
Learning theories as applied to adults in individual and group learning transactions; effect of age on learning; psychological, physical, and social environments in adult education situations.

HOL 8702. Theory and Design of Organizational Diagnosis and Development. 3 Credits.
Focus on various paradigms through which organizations and their functions may be viewed; a variety of analytical models of organizations; techniques for assessing systems; application of analysis techniques.

HOL 8703. Human Systems Change. 3 Credits.
The classical and contemporary ideas related to social systems change; the relation of these ideas to current issues in organizations.

HOL 8704. Leadership Theory, Research, and Practice. 3 Credits.
Leadership in organizations with a focus on transformational leadership. Historical review of leadership theory and research; current developments in understanding leadership. Students examine their own leadership style and plan for continued development as a leader.

HOL 8705. Organizational Culture. 3 Credits.
Theory and research on organizational culture, from the multidisciplinary seminal works in anthropology, psychology, sociology, and management to current day theorizing and empirical research on culture. The rituals, values, and behaviors that differentiate cultural groups and the way cultural identities manifest themselves in organizational practices; and how organizational culture evolves and its relationship to other organizational phenomena such as innovation, strategy, sensemaking, and performance. Current trends in organizational culture theorizing.

HOL 8706. Interdisciplinary Readings in Human and Organizational Learning. 3 Credits.
Seminal works from various disciplines related to current research and practice.

HOL 8707. Advanced Organizational Learning. 3 Credits.
The psychological and sociological paradigms associated with the learning of a collective whole.

HOL 8708. Introduction to Doctoral Research. 3 Credits.
An introduction to scholarly inquiry for doctoral students. The role of the scholar-practitioner; types of scholarly inquiry and their components; diverse paradigms used to frame scholarly inquiry; and critical thinking skills for evaluating research in human and organizational learning.

HOL 8720. Seminar: Applied Research in Human and Organizational Learning. 3 Credits.
Identification of initial constructs and theories that support the identified research interest, with a problem statement and critical analysis of research reports and review of research literature.

HOL 8721. Practicum in Human and Organizational Learning. 3-6 Credits.

HOL 8722. Seminar: Advanced Issues in Human and Organizational Learning. 1-12 Credits.
Forum in which candidates critically examine relevant classic and contemporary literature, with analysis and synthesis to defend their research questions and conceptual frameworks.

HOL 8723. Organizations and Strategy in Human Resource Systems. 3 Credits.
Overview of paradigms, theories, models, and constructs of organizations and strategy to understand organizations and their environments.
HOL 8724. Creating and Planning Doctoral Research. 3 Credits.
This course helps to ensure that your research is translational, i.e., that it leads to practical applications that enhance the well-being and productivity of humans and organizations. It helps you ensure that all of the components of your research study are aligned, e.g., your chosen paradigm and related theories and constructs, research question(s), and design elements such as data collection and analysis techniques. Finally, it will help you ensure that you complete your dissertation. You will develop a project plan that specifies your goals, deliverables, schedule and budget. In sum, this course makes certain that your research is applicable, properly designed, and well planned. Prerequisite: none. Recommended background: Students learn to develop an evidence-based problem statement, design a conceptual framework, craft a research question, and conduct a literature review. Fundamental principles of both qualitative and quantitative research and various research strategies and designs.

HOL 8741. Managerial and Organizational Cognition. 3 Credits.
The emerging field of collective cognition in organizations, including theoretical foundations and seminal and current literature on knowledge structures and their role in strategy formation, organizational change, and sensemaking.

HOL 8742. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HDEV 8253.

HOL 8746. Work Groups and Teams in Organizations. 3 Credits.
Theoretical understanding and practical considerations of working with groups and teams. Group dynamics, facilitating and leading groups, and member roles. Group facilitation techniques across different group settings and environments.

HOL 8997. Preparation and Delivery of Doctoral Research. 3 Credits.
Students develop and present a mock dissertation proposal, receiving feedback from faculty and colleagues in order to refine their proposal. Prerequisites: none. Recommended background: Students are expected to have developed a literature review, conceptual framework, and research question for their dissertation research prior to enrolling in this class.

HOL 8998. Predissertation Seminar. 3-6 Credits.
Platform for further development of the dissertation proposal.

HOL 8999. Dissertation Research. 3,6 Credits.
Prerequisite: HOL 8998.

SPECIAL EDUCATION AND DISABILITY STUDIES

GRADUATE

Master's programs
- Master of Arts in Education and Human Development in the field of early childhood special education (p. 524)
- Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 535)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 537)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 538)
- Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program
- Doctor of Education in the field of special education (p. 547)

FACULTY

Professors M.S. Castleberry, M.B. Freund, C.A. Kochhar-Bryant, J.M. Taymans
Associate Professor E.K. Rice (Chair)
Assistant Professors J.R. Frey, K. Ihrig, P. Peng, E. Tuckwiller

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPED 0920. Continuing Research - Masters. 1 Credit.
SPED 0940. Cont Research - Doctoral. 1 Credit.
SPED 6100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.
SPED 6101. Research and Independent Study. 1-3 Credits.
Individual study or research under guidance of staff member. Admission by permission of advisor. May be repeated for credit.
SPED 6201. Introduction to Special Education. 3 Credits.
Survey course to acquaint prospective teachers with special education and to help them become aware of the various educational modifications necessary to accommodate children with special needs in a school program.

SPED 6210. Universal Design for Learning and Assessment. 3 Credits.
Overview and introduction to universal design for learning, including contemporary issues, applications of digital and assistive technologies, and tools for developing a comprehensive plan for implementation. Same as CPED 6110.

SPED 6221. Accessing Community Systems for Individuals with Disabilities. 3 Credits.
Overview of access to community systems and service delivery for individuals with special needs and their families. Material fee.

SPED 6222. Legal Issues and Public Policy for Individuals With Disabilities. 3 Credits.
Examination, interpretation, and analysis of legislation and policies affecting the education and career development of individuals with disabilities. Emphasis on federal legislation in the context of national policy reform in disability services. Material fee.

SPED 6223. Introduction to Brain Injury: Programs, Policies, and Resources. 3 Credits.
An overview of acquired brain injury and its effects; current trends in the field, related policy, research, and development of new resources.

SPED 6224. Brain Function and Impact of Brain Injury on Learning and Education. 3 Credits.
Provides an in-depth understanding of neuroanatomy related to the impact of brain injury on child and adolescent development and learning to prepare educators to participate in educational assessment and planning.

SPED 6227. Technology in Vocational Evaluation. 3 Credits.
Introduction to an array of assistive technology services and products facilitating professional interventions and vocational evaluation procedures; application to the assessment of persons with disabilities. Material fee.

SPED 6228. Community-Based Assessment and Work Sample Development. 3 Credits.
Introduction to community-based vocational appraisal methods; development of job training analysis skills, labor market surveys, work samples; requirements of The Americans with Disabilities Act; incorporation of assistive technology; classroom theory and field work. Material fee.

SPED 6229. Interpretation and Application of Academic and Vocational Assessment Information. 3 Credits.
Specific strategies and techniques to analyze, interpret, and synthesize assessment information for the development of comprehensive academic/vocational profiles for adolescents and adults with disabilities. Observation and recording procedures, report development, and postassessment conferencing are emphasized. Material fee.

SPED 6230. Vocational Assessment of Individuals with Disabilities. 3-6 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as CNSL 6130.

SPED 6231. Instructional Methods in Secondary Special Education and Transition. 3 Credits.
Techniques and processes used in programming for the needs of individuals with disabilities as they prepare for transition to postsecondary programs and employment. Emphasis on skills related to professional liaison and support roles in the design of instructional arrangements and cooperative training. Material fee.

SPED 6232. Foundations in Special Education, Career Development, and Transition. 3 Credits.
Overview of historical, theoretical, and philosophical foundations of career development and transition. Explores directions for career development/transition practices in the context of educational reform and social and political change. Material fee.

SPED 6233. Curriculum in Special Education. 3 Credits.

SPED 6234. Seminar in Advanced Writing and Professional Presentation. 3-6 Credits.
Analysis and development of advanced professional writing skills, including literature synthesis, persuasive writing, and proposal writing. Material fee.

SPED 6235. Employment Models for Individuals with Disabilities. 3 Credits.
Rationale, occupational resources, and programming strategies for job placement and the development and coordination of employment programs for individuals with disabilities. Material fee.

SPED 6236. Introduction to Career and Career–Technical Education and Transition Services. 3-6 Credits.
Introduction to programs and services that provide career development and transition planning for individuals with disabilities. Material fee.

SPED 6237. Learning Strategies, Assessment, and Instruction for Individuals with Learning Disabilities. 3-6 Credits.
Theory and practice in evidence-based reading interventions. Learning strategies; content enhancement focused on literacy and self-determination. Material fee.
SPED 6238. Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
Introduction to the academic, cognitive, social, and emotional characteristics of individuals with learning disabilities; etiological theories; educational service delivery models, with particular emphasis on the adolescent with learning disabilities. Policy issues, continuum of services, and the transition from school to post-school environments. Material fee.

SPED 6239. Collaboration for Professionals Working with Students with Disabilities. 3 Credits.
Exploration of attitudes and beliefs about team teaching, collaboration and inclusionary environments. Development of knowledge and skills related to collaborative consultation and team teaching; interpersonal communication; the dynamics of collaborative teams; examination of the variety of environments in which special educators work. Material fee.

SPED 6240. Family Support and Guidance in Special Education. 3 Credits.
The developmental process of parenting and how that process is affected by having a child with developmental delay or disability. Family systems theory, stress and coping mechanisms, and communication and support strategies. Material fee.

SPED 6242. Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities. 3 Credits.
Application of the neurodevelopmental model to techniques for developing and implementing educational programs for infants and toddlers with disabilities. Prerequisite or concurrent registration: SPED 6263 or SPED 6268 or permission of instructor. Material fee.

SPED 6243. Developmental Assessment of Infants. 3 Credits.
Theory and current practice in the assessment of infants with or at risk for developmental disabilities. Material fee.

SPED 6244. Ethical Considerations in Neonatal and Infant Intervention. 3 Credits.
Overview of the major ethical issues involved in neonatal and infant intervention. The impact of recent and emerging technological innovations considered from medical, legal, ethical, and psychosocial perspectives. Material fee.

SPED 6245. Developmental Implications of Prematurity and Risk. 3 Credits.
Causes of prematurity. Conditions that place children at developmental and educational risk.

SPED 6253. Introduction to Autism Spectrum Disorders. 3 Credits.
Overview of autism spectrum disorders with a focus on etiology, characteristics, and evidence-based practices. Topics include defining, assessing, accommodating, and instructing students with autism spectrum disorders.

SPED 6254. Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life. 3 Credits.
The policies, principles, models, and processes involved in job development, job accommodations and modifications, and employment and post-secondary placement services for individuals with autism and related disabilities. Legislation is reviewed in terms of its impact on placement of persons with autism who will transition into the workplace and/or post-secondary education.

SPED 6255. Collaboration with Systems and Families. 3 Credits.
Overview of models and strategies for coordinating services across disciplines and among school and community agencies for special populations. Emphasis on interdisciplinary team coordination, communication, decision making, planning, and follow-up for individuals with disabilities. Material fee.

SPED 6260. Developmental Assessment in Special Education. 3 Credits.
Examination of formal psychoeducational tests used with preschool and elementary-school-aged children. Development of formal and informal assessment techniques. Introduction to the skills necessary to write psychoeducational reports. Material fee.

SPED 6261. Practicum: Methods and Materials for Young Children with Disabilities. 3,6 Credits.
Implementation of educational strategies and materials, including designing and developing teaching materials, classroom teaching, feedback and evaluation with professor. A seminar accompanies this clinical experience.

SPED 6262. Formal Assessment of Young Children with Disabilities. 3 Credits.
Weekly seminar designed to prepare early childhood special educators to translate formal assessment data into instructional programming. Requires fieldwork with children. Material fee. Prerequisite: SPED 6260.

SPED 6263. Development of the Infant with Special Needs. 3 Credits.
The processes of normal infant development and interrelationships among areas of development; relationship of these processes to the growth and development of infants with or at risk for developmental disabilities. Material fee.

SPED 6264. Medical and Genetic Conditions of Infants and Children with Developmental Disabilities. 3 Credits.
Introduction to medical and genetic conditions that affect the cognitive, language, and social development of infants and children with developmental disabilities.

SPED 6266. The Development of Language and Literacy. 3 Credits.
Within the context of typical and atypical development, the impact of various disabilities on language and literacy development. Material fee.
SPED 6267. Instructional and Assistive Technology in Early Childhood Special Education. 2,3 Credits.
Instructional strategies and assistive technology and their implications and uses for young children (0-5 yrs) in a wide variety of environments. Lectures, laboratory, and demonstrations. Material fee.

SPED 6268. Development of Children and Youth with Disabilities. 3 Credits.
Theories of human growth and development are considered as a framework for examination of typical and atypical development of children and youth. Material fee.

SPED 6269. Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities. 3 Credits.
An in-depth examination of the causes and characteristics of various disabilities. Current principles and approaches to intervention are examined. Material fee.

SPED 6272. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as CPED 6172. Material fee.

SPED 6273. Impact of Culture on Education. 3 Credits.
The impact of culture and ethnicity on educational experiences. The relationship between school culture in the United States, one's own culture(s), and the cultures of diverse populations existing within our schools. Values, norms, rules, ethics, beliefs, attitudes, expectations, and assumptions of various cultures. Material fee.

SPED 6274. In-Service Planning/Programming. 3 Credits.

SPED 6275. The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Same as CPED 6175. Material fee.

SPED 6276. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Same as CPED 6176. Material fee.

SPED 6277. Teaching Culturally and Linguistically Diverse Students with Disabilities. 3 Credits.
Methods and materials for teaching students with disabilities who are English language learners. Classroom management, instructional and assessment strategies, materials and curricula, and collaborating with families and communities to meet the cultural, linguistic, academic, social, and emotional needs of students in various settings. Material fee.

SPED 6278. Developmental Assessment of Adolescents. 3 Credits.
Formal and informal psychoeducational assessment; assessment instruments commonly used with upper-elementary, junior, and senior high school students; the writing of psychoeducational reports. Material fee.

SPED 6283. The Urban Impact on Children and Youth with Disabilities. 3 Credits.
Effects of the total environment in which inner-city children live on their ability to learn and their cognitive, social-behavioral, and physical/health development. Material fee.

SPED 6288. Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
An in-depth examination of typical and atypical growth and development, psychiatric diagnosis and psychosocial development issues, and general and specific characteristics of the student with serious emotional disabilities. May be repeated for credit. Material fee.

SPED 6290. Affective Development and Behavior Management in Special Education. 3 Credits.
Theory, programming, and behavior management strategies from theoretical and practical points of view. Material fee.

SPED 6299. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6990. Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher. 3-6 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6991. Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher. 3-6 Credits.
Continuation of SPED 6990. Graduate students become the primary teaching team in the classroom with ongoing supervision. Graduate students plan and apply psychoeducational teaching strategies with children with emotional and behavioral disabilities. Refinement of instructional and behavior management strategies. Weekly seminar continues. Material fee.

SPED 6992. Behavior Management Practicum: Adolescents with Disabilities. 3 Credits.
Field-based examination of theory of behavior development and techniques for classroom management. Material fee.

SPED 6993. Internship: Teaching Young Children with Disabilities. 3,6 Credits.

SPED 6994. Internship: Early Intervention. 3-6 Credits.
Supervised internship in early intervention. Weekly seminar. Material fee.
SPED 6995. School- and Community-Based Internship in Special Education and Transition. 1-9 Credits.
A 50- to 450-hour supervised internship in school- and community-based settings involved in career, vocational, and transition services.

SPED 6996. Teaching Internship in Transition Special Education. 3-6 Credits.
Supervised teaching internship; seminar required. Permission by instructor. Material fee.

SPED 6997. Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities. 3-6 Credits.
Supervised internship and weekly seminar. A full-time, field-based teaching experience working with students with disabilities who are English language learners. Writing an appropriate IEP, interacting with families and communities, and planning and implementing instructional approaches and strategies. Material fee.

SPED 8100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

SPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with program advisor.

SPED 8301. Research Seminar in Special Education. 1-12 Credits.
Participation in a small group with a selected faculty member; research on and discussion of an area of common interest. Admission by permission of instructor.

SPED 8303. Administration and Supervision of Special Education. 3 Credits.
Philosophy and nature of special education; program organization, administration, and development. Surveying local needs; program evaluation and supervision. Admission by permission of instructor. Material fee.

SPED 8304. Research and Trends in Special Education. 3 Credits.
Emphasis on topical research issues, problems of conducting research, and research syntheses. Material fee.

SPED 8305. Foundations of Neuroscience in Special Education. 3 Credits.
Develops understanding of the neurological bases of sensation and perception, object recognition, control of motor action, learning and memory, emotion and language, attention, consciousness and cognitive control, and social cognition.

SPED 8306. Advanced Study in Development Science and Variance I: The Early Years. 3 Credits.
Consideration of cognitive neuroscience research on developmental issues of infancy and early years; assessment, identification, and related prevention and intervention. Prerequisite: SPED 8305.

SPED 8308. Preparation for the Professoriate in Special Education. 3 Credits.
Philosophical, ethical, and methodological aspects of personnel preparation in university and field-based programs; opportunities for practice in pedagogical design and delivery. Material fee.

SPED 8310. Advanced Study in Development Science and Variance II: The Later Years. 3 Credits.
Consideration of cognitive neuroscience research on adolescent development, including executive functioning, self-regulation, atypicality in learning, social and emotional behavior, motivation, and attention. Prerequisite: SPED 8306.

SPED 8311. Proseminar in Special Education: The Interdisciplinary Foundations. 3 Credits.
A theoretical and research-based course that introduces students to strategies by which data from cognitive neuroscience research can be applied to conceptualizing research in special education. A doctoral student forum addresses interdisciplinary research knowledge. Prerequisite: SPED 8310.

SPED 8343. Psychoeducational Diagnosis in Special Education. 3 Credits.
The range of diagnostic and intervention strategies applicable to the student who presents psychosocial and related learning difficulties. Admission by permission of instructor. Material fee.

SPED 8345. Consultation and the Change Process. 3 Credits.
Consultation models from organizational development, organizational psychology, and mental health applied to professional practice in education and special education. Material fee.

SPED 8352. Disability and Public Policy. 3 Credits.
Overview of current legislation and public policy affecting education, employment, and civil rights of individuals with disabilities. The evolution of disability policies and their relationship to principles of social justice. Material fee.

SPED 8353. Post-Master's Internship in Special Education. 1-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, or policymaking. Internships are individually arranged. Admission by permission of instructor.

SPED 8354. Doctoral Internship: Special Education. 1-6 Credits.
Supervised professional internship in research college teaching, administration, policymaking, or private agency function. Admission by permission of advisor.

SPED 8360. Interdisciplinary Techniques in the Diagnostic Process in Special Education. 3 Credits.
Application of theoretical concepts of assessment; development of assessment programs; interpretation and application of interdisciplinary diagnostic evaluations. Prerequisite: SPED 6260, and permission of instructor. Material fee.
SPED 8998. Doctoral Seminar in Special Education. 3-6 Credits.
Review of literature in a topical area; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

SPED 8999. Dissertation Research. 3-6 Credits.
Prerequisite: SPED 8998.
The School of Engineering and Applied Science (SEAS) was organized in 1884 as the Corcoran Scientific School of Columbian University, named in honor of William W. Corcoran, president of the University’s Board of Trustees from 1869 to 1888. The School was among the first to accept women for degree candidacy in engineering. While the organization and offerings of the School have evolved over the years, throughout most of its history its programs have been characterized by an emphasis on principles guiding the advancement of technology.

The School offers the bachelor of arts, bachelor of science, master of engineering, master of science, doctor of engineering, doctor of philosophy, and the professional degrees of engineer and applied scientist through its six departments—Biomedical Engineering, Civil and Environmental Engineering, Computer Science, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering. In addition, the School offers several graduate certificate programs, as well as combined bachelor’s/master’s degree programs.

Research centers and institutes provide opportunities for students and faculty to strengthen ties with counterparts in government and industry and contribute to the development and harnessing of emerging technology. Extensive and varied laboratories and computing facilities support the academic programs. The School strongly supports co-curricular activities to broaden and deepen its students’ overall educational programs, including an extensive array of internship opportunities at government laboratories and private companies in the Washington, D.C. area and elsewhere. Other co-curricular opportunities include engineering-type team competitions, research projects, and the SEAS student government organization, the Engineers’ Council.

REGULATIONS

- Undergraduate Programs (p. 585)
  - University Regulations (p. 585)
  - Advising (p. 585)
  - Mathematics Placement (p. 585)
  - Makeup of Credit for Waived Courses (p. 585)

Undergraduate Programs

University Regulations
All SEAS students are required to review the University Regulations (http://bulletin.gwu.edu/university-regulations) as outlined in the Bulletin, as they are responsible for understanding and adhering to this document.

Advising
SEAS practices a hybrid advising system. Every entering undergraduate student is assigned a professional advisor to assist with the transition to the University. Faculty advisors are assigned at the end of the first year to counsel students on their programs of study, achievement and maintenance of satisfactory scholastic performance, professional development, and extracurricular activity as part of the educational process. Until all work required for the degree is completed, students must consult with their faculty advisors in all academic matters, including obtaining the advisor’s approval of their program of study prior to registration for each academic semester and summer session. In addition, a student must consult their faculty advisor before they register for a course at another institution. The faculty advisor represents the student in all cases requiring faculty action. However, the faculty advisor may not deny entry into any course or activity to which the student is entitled under the regulations of the School. Students may consult other members of the faculty on an informal basis.

Mathematics Placement
All incoming first-year students are required to take a math proficiency examination, administered through the mathematics department, which places students in either MATH 1220 or MATH 1231. Visit the math placement exam webpage (https://math.columbian.gwu.edu/gw-mathematics-placement-test) for more information.

Makeup of Credit for Waived Courses
Waiver of a required course requires approval of the student’s faculty advisor and department chair. If a course required by the SEAS curriculum is waived, the corresponding credits must be earned by satisfactory completion of a university-level academic course, either technical or nontechnical, approved by the student’s faculty advisor. The grade earned will be used in determining the SEAS GPA only if the substituted course would normally be considered part of the student’s curriculum.

Scholarship Requirements
To be eligible for graduation a student in SEAS must have:

- A minimum overall GPA of 2.0.
- A minimum overall GPA of 2.0 in their SEAS program.
- A minimum GPA of 2.2 for technical courses*
- Completed all degree and University General Education requirements.

*See section on Technical GPA for more information about technical courses.

Technical GPA
For applied science and technology, biomedical engineering, civil engineering, computer engineering, electrical engineering, mechanical engineering, and systems engineering majors, all technical courses taken during the fifth through eighth semesters as outlined by the 4-year curriculum sheet respective to each major and approved by the student’s faculty advisor are counted towards the student’s technical GPA.

As of Fall 2014, for Computer Science majors (BA and BS), all CSCI courses are counted towards the student’s technical GPA. See archived SEAS bulletin for prior curriculum year technical GPA requirements for Computer Science majors.

Please note, if a student changes their major or curriculum year this may change the courses applied towards their technical GPA. Students should consult their faculty advisor before making any changes to their academic plans or curriculum.

Incompletes
For more information see Incompletes under University Regulations (http://bulletin.gwu.edu/university-regulations). In addition, SEAS students must get an incomplete agreement in writing by completing a Request for an Incomplete form (http://www.seas.gwu.edu/forms) with the instructor.

Pass/No Pass Grading System
SEAS students may not take required courses on the Pass/No Pass grading system. They may, however, take courses outside their required SEAS academic program on a P/NP basis.

Academic Workload
SEAS adheres to all academic workload regulations outlined under University Regulations (p. 21). In exceptional cases these limits may be exceeded with the faculty advisor’s approval.

Humanities and Social Science Requirement
With the assistance of the advisor, each student in a SEAS B.S. program chooses a set of elective courses in the humanities and social sciences. For most B.S. curricula, these normally consist of a minimum of 18 credits, divided equally between the humanities and social sciences. At least one of the humanities and two of the social science electives must be selected from a list of approved general education courses.

Since the SEAS curricula are, by necessity, oriented toward technical subjects, the humanities and social sciences electives should be courses that broaden the student’s outlook. This includes courses in areas such as anthropology, economics, foreign languages, geography, history, literature, philosophy, political science, psychology, and sociology. A full menu of courses is available on the SEAS website (http://www.seas.gwu.edu/forms).
In addition, when a foreign language is taken as part of the humanities requirement, the following rules apply:

- The foreign language studied may not be a native language of the student, unless the courses taken are literature courses.
- If the student has studied the language previously, he or she must first take a placement test given by the language department concerned and enroll in a course recommended by that department.
- The advisor must approve the program.

**Bachelor of Science Degree Programs**

Students should consult the department concerned for total credit requirements for the degree programs. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

**Bachelor of Arts Degree Programs**

SEAS offers a Bachelor of Arts degree with majors in applied science and technology and in computer science. Each program provides a strong and level base for students who intend to make their careers in fields allied to science and technology or computer science. The curriculum requirements for these programs can be viewed under the Undergraduate tab in this section of the Bulletin. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

**Special Programs**

A number of combined 5-year degree programs are available to select SEAS students. These include a B.S./M.S. in civil engineering, mechanical engineering, and systems engineering; B.A. or B.S. and M.S. in computer science or in cybersecurity in computer science; B.S./M.S. in biomedical engineering, computer engineering, or electrical engineering; and B.S. in computer engineering, computer science, electrical engineering, or systems engineering and M.S. in engineering management. In addition, students may complete a 5-year degree in the following cross disciplines: B.S. in biomedical engineering and M.S. in computer engineering, B.S. in electrical engineering and M.S. in computer engineering, and B.S. in computer engineering and M.S. in electrical engineering.

**Double Major**

Information on declaring and graduating with a double major is outlined under University Regulations. Students who complete the requirements for two SEAS majors may graduate with a double major, provided the majors are in different departments. SEAS students may also pursue a second major in another school in the University but must adhere to any requirements outlined by that school or department. SEAS students must consult both their SEAS faculty advisor and an advisor in the department offering the second major. To officially declare a second major, students must complete a Declaration of Second Major (http://www.seas.gwu.edu/forms) form and have it signed by both their SEAS faculty advisor and the second major department advisor.

Students from other schools of the University may pursue a second major in one of the six SEAS departments. However, they must consult the department for both eligibility and curriculum requirements before planning to declare the second major. There is a limitation on how many courses may be double counted, which is outlined under University Regulations.

The degree is earned from the home school, and students must complete the major in their own school in order to graduate. In no case will a double major result in two degrees.

For more information see Double Degrees under University Regulations (http://bulletin.gwu.edu/university-regulations).

**Minors**

SEAS offers to all students a variety of minors, including biomedical engineering, computer engineering, computer science, electrical engineering, operations research, and systems engineering. The School may require students to meet certain eligibility requirement to declare the minor. SEAS students may only declare a minor outside their department and must consult their faculty advisor before enrolling in a minor in another school of the University.

SEAS students who wish to declare a minor officially should complete a Declaration of Minor form (http://www.seas.gwu.edu/forms), which must be signed by both their SEAS faculty advisor and the minor department advisor. Depending on the student’s major, additional credits beyond the minimum required for the minor may be required. Student from schools other than SEAS should email seasadvising@gwu.edu for more information about requirements and eligibility criteria before requesting to declare a minor through the department.

**Graduate Programs**

**Degree Programs**

Fields of graduate study offered by SEAS include biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, and (at the M.S. level only) cybersecurity in computer science, telecommunications engineering, and regulatory biomedical engineering (M.Eng.). Degree requirements and representative areas of focus within each field are listed in this section of the Bulletin. In some fields, students may choose to focus their course work in other specialties as well. For information on certificate, professional, and doctoral degree studies in a given field students should contact the relevant department.
Entrance requirements are outlined under individual degree programs. The following information pertains to all SEAS graduate and certificate programs.

Transfer of Credit
With the approval of the student’s advisor and department chair, graduate credit earned at a level of study equivalent to that being pursued at GW may be transferred, when applicable, to meet degree requirements of the School. For a master’s or professional degree candidate, or a doctoral candidate whose highest earned degree is a master’s, up to 6 credits may be transferred. For a doctoral candidate whose highest earned degree is a bachelor’s, up to 24 credits may be transferred. In all cases, credits must have been completed with a minimum GPA of 3.0 at another accredited and recognized institution. The professional and doctoral degree programs require that the credit be earned no more than five years prior to admission to the GW program, and some departments require that it be earned more recently. Credit applied toward a previously earned degree may not be transferred. Transfer of credit regulations apply to courses taken as a non-degree student through GW’s Office of Non-Degree Students; that is, up to 6 credits may be taken in non-degree status before applying for admission to degree status. For purposes of transfer of credit, SEAS graduate certificate programs are not considered prior degrees. At the discretion of the department concerned, the credits earned in a SEAS certificate program may be applied to a subsequent master’s degree program.

English Language Requirements for International Students
Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English–Academic (PTE). Visit the SEAS Graduate Admissions website (http://graduate.seas.gwu.edu/admissions-requirements) for possible exemptions from this policy. The required minimum score for admission is 550 paper-based or 80 Internet-based on the TOEFL, an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. The Department of Engineering Management and Systems Engineering requires a TOEFL score of 600 paper-based or 100 internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Undergraduate and graduate international students whose TOEFL, IELTS, or PTE scores fall below established cut-off points are required to take one or more courses in the English for Academic Purposes (EAP) Program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement, consult the English for Academic Purposes Program website.

Grades
Information on grades and computing the grade-point average (GPA) is found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Incompletes
At the option of the instructor, the symbol of I (Incomplete) may be recorded if a student, for reasons beyond his or her control, is unable to complete the work of the course and if the instructor is informed of and approves such reasons before the date when grades must be reported. The symbol I may be recorded only if the student’s prior performance and class attendance in the course have been satisfactory. Any course in which a student fails to complete the work of the course and does not provide the instructor with a satisfactory explanation before the date when grades must be turned in will be graded F. If acceptable reasons are later presented, the instructor may initiate an appropriate grade change. Although the I may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work must be made up. The I cannot be removed by the student’s reregistering for the course at GW or taking its equivalent elsewhere. An Incomplete that is not removed within one calendar year or at the time of the student’s graduation, whichever occurs first, is automatically changed to an F. As of fall 2014, when the I is changed to a letter grade the I will be replaced by the letter grade on the transcript. As of fall 2014, when the I is changed to a letter grade the will be replaced by the letter grade on the transcript. Engineering Management and Systems Engineering students with two or more outstanding Incompletes are barred from further course enrollment; see Incompletes under University Regulations regarding continuous enrollment.

Credit/No Credit Grading System
SEAS students may take SEAS courses under the credit/no credit grading system, but credit for such courses cannot be applied toward any degree program in SEAS.

Educational Planner
In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.
Residence and Continuous Enrollment

All work for the degree must be done in residence unless an exception is granted by the department chair. Students in a degree program are expected to be continuously enrolled in the School until the degree is conferred. To maintain continuous enrollment, students may register in one of the following categories. See Residence and Continuous Enrollment under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Leave of Absence

This status is available to students who, with special permission, are attending classes at another institution; who have temporarily transferred out of the area, e.g., for military TDY; or who are having temporary medical problems. A leave of absence is usually limited to two semesters. See Leave of Absence under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Continuing Research

Students who have completed their research credits, but are not yet ready to defend a thesis or dissertation, must register for 1 credit of SEAS 0920 (Continuing Research–Master’s) or SEAS 0940 (Continuing Research–Doctoral) each semester as appropriate.

Examination Preparation

Students who are studying for a comprehensive or qualifying examination for the current or following semester, and are not taking any courses, must register for 1 credit of SEAS 0930 (Examination Preparation) as appropriate. A student who breaks his or her registration must apply for readmission to the degree program under whatever conditions and regulations are in force at that time.

Master of Science

The M.S. degree is offered in the fields of biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, cybersecurity in computer science, and telecommunications engineering. Each field in turn encompasses several areas of focus. The course of study responds to the unique interests of the student, who designs an individual program in close consultation with an assigned advisor. In most areas, students follow a prescribed core and approved elective courses from within SEAS and from other schools of the University. Because engineering expertise includes a broad foundation in technology, engineering students may profit from study in other academic areas to sharpen their focus in practice. Students must satisfy, through undergraduate studies or otherwise, either the prerequisites specified for the desired field or approved equivalents.

Entrance Requirements

Admission to the Master of Science degree program requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate course work is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student’s advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Special Programs

Admission to the 5 year B.S./M.S. combined degree program requires an appropriate bachelor’s degree from SEAS undergraduate programs recognized in the Regulations section. In general, a minimum GPA of 3.4 (on a 4.0 scale) is required. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student’s advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Completion of the program should occur within two semesters but can take up to four semesters after the conferral of their SEAS undergraduate degree.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student’s Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of \( F \) or three grades below \( B - \) are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a grade of \( C - \) or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

Time Limits

Full-time students in the master’s program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes.
courses only. Part-time students in the master’s program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Master’s Thesis

The master’s thesis must demonstrate a student’s ability to make independent use of the knowledge and discipline of thought acquired through graduate study, to undertake constructive work in a given field, and to communicate the results of the work in writing. Suitable work for which the student has professional responsibility may be considered, whether done on or off campus, provided no significant amount of work is completed without faculty supervision. An accepted thesis is the property of the University.

To register for the thesis course sequence, students must submit their advisor-approved thesis area to the appropriate department chair. At the beginning of the semester of expected graduation, students must submit their thesis title to the dean. Both submissions must be made on the appropriate form available in the Graduate Student Services Center. While registered in the thesis course sequence, students are entitled to the advice of the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

The thesis in final form must be submitted by the stated deadline. In the event a thesis is unfinished on the date specified, the student must register for SEAS 0920 (Continuing Research - Master’s). The overall time limit for earning the degree (see Time Limits, above) may not be exceeded. All theses must be submitted electronically and meet the formatting and other requirements set forth on GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Additional information regarding thesis requirements and dates may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Master of Engineering (M.Eng.)

The M.Eng. degree is currently offered in the field of regulatory biomedical engineering (rBME). The Master of Engineering in Regulatory Biomedical Engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://bme.seas.gwu.edu) in partnership with GW’s School of Medicine and Health Sciences (http://smhs.gwu.edu). The new program addresses a pressing need for a graduate program to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics and/or relevant industry/government experience study the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to coursework, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

Entrance Requirements

Admission to the Master of Engineering degree program requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate course work is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student's Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a grade of C− or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

Time Limits

Full-time students in the M.Eng. program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time students in the master’s program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period...
spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

**Graduate Certificates**

**Entrance Requirements**
Admission to SEAS certificate programs requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must provide an online application, statement of purpose, and resume and/or curriculum vitae. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours credits of undergraduate course work is recommended. Certificate applicants are not required to submit letters of recommendation. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

**Graduation and Scholarship Requirements**
In order to receive the graduate certificate students must have a minimum GPA in courses specified in their Educational Planner through DegreeMAP. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses, and will not be readmitted as a candidate. Students may not repeat for credit a course in which they have received a grade of C− or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. Additional information regarding graduation requirements may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

**Professional Degrees**

The SEAS professional degree programs are designed for those students who wish to pursue course work beyond the master’s degree with emphasis on applied subject material rather than on basic research. Successful completion of the professional degree program leads to the degree of Engineer or of Applied Scientist.

For admission to the degree of Engineer, an applicant must have earned both a bachelor’s and master’s degree in an area of engineering. For the degree of Applied Scientist, an applicant must possess a master’s degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

**Entrance Requirements**
For admission to the degree of Engineer, an applicant must have earned both a bachelor’s and master’s degree in an area of engineering. For the degree of Applied Scientist, an applicant must possess a master’s degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance requirements may vary by department within SEAS. A minimum GPA of 3.0 in graduate work is usually required, although individual departments often set higher admission standards. Some programs have specified prerequisites. An applicant who has significant deficiencies in preparation may be required to take prerequisite courses, which do not count toward any part of the requirements for the professional degree. The Departments of Computer Science and Electrical and Computer Engineering require applicants for the professional degree to have had two years of professional experience after receiving the master’s degree. For specific entrance and application requirements see Master’s Degree.

**Graduation and Scholarship Requirements**
The professional degree programs consist of a minimum of 30 credits in approved graduate-level courses beyond a master’s degree. Programs of study are determined by established prerequisites and the requirements of the department in which the student wishes to enroll. The student's program must be approved by the faculty advisor and the department chair. Departments may require degree candidates to undertake and defend the results of a technical design project or development problem, or to prepare a comprehensive technical report to demonstrate the candidate's ability to make independent use of the knowledge and discipline of thought acquired through graduate study. When applicable, the student will be informed of this requirement by the faculty advisor at the time when the student's program is being formulated. The project may not account for more than 6 credits.

If a student studying for the professional degree receives two grades of F or three grades below B−, study is terminated and further enrollment prohibited. A student must have a minimum of GPA of 3.0 in order to receive the degree. The Department of Engineering Management and Systems Engineering requires a final GPA of at least 3.4.

**Time Limits**
A full-time student in the master’s program is allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate...
status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. Such students may be readmitted to degree candidate status under conditions specified by the department chair.

---

**Doctoral Programs**  
**Doctor of Philosophy**

The doctoral program is designed to prepare students for careers of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. The program is divided into two stages: the first comprises a study of related fields of learning that support the general area of research concentration and culminates in a qualifying examination; the second, composed of original research and the presentation of findings in a written dissertation, culminates in a final examination.

**Entrance Requirements**

Admission to the Ph.D. program requires an appropriate bachelor’s or master’s degree from a recognized institution, evidence of a strong academic or relevant professional background, course work designated by the department as pertinent to the field to be studied, and capacity for research. With the exception of applicants from SEAS B.S. and M.S programs, applicants must submit scores from the Graduate Record Examination (GRE) general test. All applicants must submit a minimum of three letters of recommendation, at least one of which should be from the advisor and/or faculty members at the institution(s) from which a degree was earned. Students for whom the bachelor’s is the highest earned degree must have a minimum GPA of 3.3 (on a 4.0 scale) in undergraduate work. Students for whom the master’s is the highest earned degree, departmental requirements for the GPA in course work leading to that degree are as follows (on a 4.0 scale): Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Aerospace Engineering—3.4; Computer Science, and Engineering Management and Systems Engineering—3.5. Consult the department concerned for field-specific admission requirements.

**Graduation and Scholarship Requirements**

Upon admission to the first stage of the program—study of related fields culminating in the qualifying examination—students are assigned a faculty advisor who directs his or her studies. In some departments, a faculty committee may be appointed instead of a single advisor. Programs of study are structured to include a major field and two minor or supporting fields. Consult the department concerned for requirements.

For students who enter the program with a master’s degree, the formal program of study consists of a minimum of 30 graduate-level credits. For students who enter with a bachelor’s degree only, the program of study consists of a minimum of 54 graduate-level credits. These credits include both course and dissertation research credit. Individual requirements may vary by department. In many cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits stated above. Departments may establish a tool requirement, such as an examination in a computer language. Consult the department concerned for specific curriculum requirements.

If a doctoral student receives two grades of F or three grades below B−, graduate study is terminated and further enrollment prohibited. Courses in which the student earned grades below B− are not included in the total credit requirement for the degree. Students who receive any grade below B− are required to review their programs of study with their advisors.

**Time Limits**

In general, one year of full-time study is the minimum amount of time needed to prepare for the qualifying examination. Students should consult the individual department for specific timelines and regulations. In general, the qualifying examination must be completed within five years of the date of admission, unless specified otherwise by the department. The entire degree program must be completed within seven years, unless the department grants an extension. Approval of an extension is conditional on satisfactory progress. The time period for completion of the degree may be adjusted by the department for an approved leave of absence. A minimum of two years of full-time study and research should be expected. All time periods indicated here are increased by two years for students entering the doctoral program without a master’s degree.

Full-time doctoral students must register for a minimum of 9 credits per semester until the minimum number of credits are completed, and 1 credit of SEAS 0940 (Continuing Research – Doctoral) each semester thereafter until satisfactory completion of the final examination. Part-time doctoral students usually register for a minimum of 6 credits per semester until the minimum number of credits is completed, and 1 credit of Continuing Research each semester thereafter until satisfactory completion of the final examination. No minimum course load is required during the summer.

**Preliminary and Qualifying Examinations**

The Department of Computer Science requires a preliminary examination that must be passed within four semesters of starting the program. It comprises material from the areas of algorithms and theory, and software and systems.

The Department of Electrical and Computer Engineering requires a preliminary examination that must be taken before completing 18 credits after initial registration. The examination is guided by, but not limited to, the core material of the GW
master’s program. Specific details regarding the structure of the exam are available in the department.

To be admitted to the qualifying examination that is required of all doctoral students, students must have a minimum cumulative GPA of 3.2 in the Departments of Civil and Environmental Engineering and Computer Science, and of 3.4 in the Departments of Mechanical and Aerospace Engineering, Engineering Management and Systems Engineering, and Electrical and Computer Engineering.

The qualifying examination is the principal means of determining whether a student will qualify as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain whether the student’s background and intellectual development are adequate to support doctoral research in the central field.

Preliminary and qualifying examinations may be written or oral or both. Students should consult the departments for specific guidelines. The examinations are conducted on dates established by the departments and are administered by a faculty committee. Upon favorable report of the examiners following the qualifying examination, students are admitted to candidacy for the degree. Students then begin specialized study and research under the supervision of a designated member of the full-time faculty. At the discretion of the committee that prepared the examination, students who fail any part of the qualifying examination may be given a second opportunity to qualify for candidacy. Usually, the entire examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School will be considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

The Dissertation and Final Examination
Students admitted to candidacy for the degree of Doctor of Philosophy choose the faculty member under whom they wish to conduct research. The faculty member may accept or reject the request to serve as the student’s director of research. The research area must be approved by the director, under whom the candidate conducts dissertation research throughout the remainder of the doctoral program. Students may consult other members of the faculty on an informal basis. In the Departments of Engineering Management and Systems Engineering and Civil and Environmental Engineering, students are required to present a written dissertation proposal to a committee of three full-time faculty members and to successfully defend the proposal in an oral defense prior to performing the bulk of their dissertation research. Work on the dissertation encompasses a minimum of 12 to 24 credits, depending on the department.

The dissertation should embody the results of extended original study and include material deemed worthy of publication in recognized scientific and engineering journals. Students are expected to attempt to have the results of the research published as soon as possible after they receive the degree and to submit copies of the published material to the dean. The Department of Computer Science requires that at least one article be accepted for publication by a refereed conference or journal prior to completion of degree requirements. The Department of Engineering Management and Systems Engineering requires that an article be accepted for review by a refereed journal prior to completion of degree requirements. The Department of Electrical and Computer Engineering requires the submission of a paper to a refereed journal and its acceptance for publication prior to the completion of degree requirements. Credit must be given in the publication to the fact that the material is abstracted, summarized, or developed from a dissertation submitted to The George Washington University in partial fulfillment of the requirements for the Ph.D.

All dissertations must be submitted electronically and meet the formatting and other requirements set forth at GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Regulations regarding the form of the dissertation and preparation of the abstract are available in department offices. The dissertation, with accompanying files, becomes the property of the University.

Upon acceptance of the dissertation by the research committee, the candidate is presented for the final examination. The final examination is oral and is open to the public. The candidate must demonstrate a mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee and scheduling of the examination. When the examining committee is convinced of the quality and originality of the candidate’s contribution to knowledge as well as his or her mastery of the scholarship and research techniques of the field, the committee recommends the candidate for the degree of Doctor of Philosophy. Students completing their degree program should refer to the sections on Eligibility for Graduation and Participation in the Commencement Ceremony under University Regulations.

Doctor of Engineering
The School of Engineering and Applied Science offers an off-campus Doctor of Engineering (D.Eng.) degree program. The Doctor of Engineering program addresses the widespread need for practitioners who can apply the knowledge they gain in the program of study within a business or technical environment, wherein the constant challenge is to create useful applications of the latest engineering principles and lead organizations that are occupied in this work.

The Doctor of Engineering degree currently is offered only in Engineering Management (EM).
Doctor of Engineering in Engineering Management

The D.Eng. (EM) program demands that research be applied to the solution of a real-world problem using the latest engineering concepts and tools—in other words, research toward the D.Eng. program is applied, rather than basic. Its purpose is to empower students, who are likely to be practicing engineers, to create advanced, practice-based solutions.

Admission to the D.Eng.(EM) program requires: (1) bachelor’s and master’s degrees from accredited institutions in engineering, applied science, mathematics, computer science, business administration, or information technology; (2) a minimum of two college-level calculus courses passed with grades of C or better; and (3) a minimum graduate-level GPA of 3.5 (on a 4.0 scale).

The D.Eng. (EM) program consists of 45 credits divided into a classroom phase of 10 graduate-level, three-credit courses, and a research phase during which a practice-based case study is undertaken on a topic related to engineering management, chosen by the student and approved by the adviser. Research for the case study comprises 15 credits. Prospective students are advised to contact the Engineering Management and Systems Engineering Department for additional information.

Transfer Between Degree Programs

Candidates for the professional or Doctor of Philosophy degree who are in good academic standing may, with the approval of the faculty advisor and department chair, transfer from one degree program to the other within their department if they meet the qualifications and requirements specified by the department. In the Department of Engineering Management and Systems Engineering, only one such transfer is permitted.

UNDERGRADUATE

Bachelor’s programs

- Bachelor of Arts with a major in applied science and technology (p. 667)
- Bachelor of Arts with a major in computer science (p. 638)
- Bachelor of Science with a major in biomedical engineering (p. 598)
- Bachelor of Science with a major in civil engineering (p. 609)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 611)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 613)
- Bachelor of Science with a major in civil engineering, sustainability engineering option (p. 615)
- Bachelor of Science with a major in civil engineering, transportation engineering option (p. 617)
- Bachelor of Science with a major in computer engineering (p. 655)
- Bachelor of Science with a major in computer science (p. 640)
- Bachelor of Science with a major in electrical engineering (p. 656)
- Bachelor of Science with a major in electrical engineering, energy option (p. 657)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 659)
- Bachelor of Science with a major in mechanical engineering (p. 688)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 689)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 691)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 692)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 693)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 695)
- Bachelor of Science with a major in systems engineering (p. 669)

Minors

- Minor in biomedical engineering (p. 599)
- Minor in computer engineering (p. 660)
- Minor in computer science (p. 642)
- Minor in electrical engineering (p. 660)
- Minor in mechanical engineering (p. 696)
- Minor in operations research (p. 671)
- Minor in systems engineering (p. 671)

Combined programs

- Combined Bachelor of Science with a major in biomedical engineering and Master of Engineering in the field of regulatory biomedical engineering (p. )
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field of environmental engineering (p. 619)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field of structural engineering (p. 620)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field of transportation engineering (p. 622)
- Combined Bachelor of Science with a major in mechanical engineering and Master of Science in the field of mechanical engineering (p. 696)
GRADUATE

Master’s programs
- Master of Engineering in the field of regulatory biomedical engineering (p. 600)
- Master of Engineering in the field of cybersecurity policy and compliance (online) (p.)
- Master of Science in the field of biomedical engineering (p. 601)
- Master of Science in the field of civil and environmental engineering (p. 624)
- Master of Science in the field of computer science (p. 643)
- Master of Science in the field of computer engineering (p. 661)
- Master of Science in the field of cybersecurity in computer science (p. 643)
- Master of Science in the field of electrical engineering (p. 662)
- Master of Science in the field of engineering management (p. 673)
- Master of Science in the field of mechanical and aerospace engineering (p. 697)
- Master of Science in the field of systems engineering (p. 674)
- Master of Science in the field of telecommunications engineering (p. 664)

Doctoral programs
- Doctor of Engineering in the field of engineering management (p. 675)
- Doctor of Philosophy in the field of biomedical engineering (p. 601)
- Doctor of Philosophy in the field of civil and environmental engineering (p. 625)
- Doctor of Philosophy in the field of computer engineering (p. 665)
- Doctor of Philosophy in the field of computer science (p. 644)
- Doctor of Philosophy in the field of electrical engineering (p. 665)
- Doctor of Philosophy in the field of engineering management (p. 676)
- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 698)
- Doctor of Philosophy in the field of systems engineering (p. 676)

CERTIFICATES
At the discretion of the respective departments, credit earned in a certificate program may be applied to a subsequent master’s degree program. Scholarship requirements are the same as those for the master’s degree program. Details are available in the Office of the Dean.
- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 699)
- Graduate certificate in computer security and information assurance (p. 644)
- Graduate certificate in emergency management and public health (p. 677)
- Graduate certificate in energy engineering and management (p. 699)
- Graduate certificate in engineering and technology management (p. 677)
- Graduate certificate in enterprise information assurance (p. 678)
- Graduate certificate in environmental engineering (p. 625)
- Graduate certificate in environmental and energy systems management
- Graduate certificate in geoenvironmental engineering (p. 626)
- Graduate certificate in greenhouse gas management (p. 678)
- Graduate certificate in high-performance computing (p. 665)
- Graduate certificate in homeland security emergency preparedness and response (p. 679)
- Graduate certificate in structural engineering (p. 627)
- Graduate certificate in systems engineering (p. 679)
- Graduate certificate in transportation engineering (p. 627)

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 1036)
- Biomedical Engineering (BME) (p. 1054)
- Civil Engineering (CE) (p. 1066)
- Computer Science (CSCI) (p. 1079)
- Electrical and Computer Engineering (ECE (p. 1186)) (p. 1186)
- Engineering Management and Systems Engineering (p. 1196)EMSE (p. 1196)
MISSION

The mission of the Department of Biomedical Engineering is to motivate and inspire students by providing high-caliber, fully integrated programs to prepare them to lead and participate in advancing the state of the art in health care technologies. In addition, graduates earn advanced degrees and further knowledge in the discipline by actively pursuing scholarly research for publication and dissemination.

BIOMEDICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The biomedical engineering program prepares graduates who achieve employment in biomedical and related industry, government, or organizational fields using skills and knowledge learned while an undergraduate student. This is evidenced by their:

- Employment history and/or career advancement.
- Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers and other publications, and involvement in professional associations).
- Entrepreneurial activities.

STUDENT OUTCOMES

The Department of Biomedical Engineering aims to produce graduates who have the ability to:

- Apply knowledge of mathematics, science, and engineering.
- Design and conduct experiments, as well as to analyze and interpret data.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- Function on multidisciplinary teams.
- Identify, formulate, and solve engineering problems.
- Understand professional and ethical responsibility.
- Communicate effectively.
- Understand the impact of engineering solutions in a global, economic environment.
- Engage in life-long learning necessary to thrive in the profession.
- Keep abreast of contemporary issues while maintaining breadth and depth of knowledge.

- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in biomedical engineering (p. 598)

Minor

- Minor in biomedical engineering (p. 599)

Combined programs

- Combined Bachelor of Science with a Major in Biomedical Engineering and Master of Engineering in the Field of Regulatory Biomedical Engineering (p. 600)

GRADUATE

Master's programs

- Master of Engineering in the field of regulatory biomedical engineering (p. 600)
- Master of Science in the field of biomedical engineering (p. 601)

Doctoral program

- Doctor of Philosophy in the field of biomedical engineering (p. 601)

FACULTY

Professors  I. Efimov (Chair), E. Entcheva, M. Kay, D. Lee, Z. Li, M. Loew, C. Park, J. Zara, V. Zderic

Assistant Professor  C. Park

Associate Teaching Professor  D.T. Lee

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
BME 1010. Introduction to Biomedical Engineering. 1 Credit.
Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.
Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Same as ECE 1020) (Spring).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.
Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques will be covered; manipulation of vectors and matrices and the use of vectorized code. (Fall).

BME 2825. Biomedical Engineering Programming II. 3 Credits.
Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisite: BME 2820; equivalent course may be substituted at instructor’s discretion. (Fall).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.
Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomechanical Engineering. 3 Credits.
Topics vary by semester. May be repeated for credit if topic differs. See the Schedule of Classes for more details. (Fall, spring, and summer).

BME 3910. Capstone Design Preparation. 1 Credit.
Elements of project design; formulation of project ideas. Prerequisites: BME 2810, BME 2815. (Same as ECE 3910) (Fall).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring).

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.
Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.
Common imaging modalities, including ultrasound, X-ray, MRI, CT, SPECT, and PET. Overview of linear systems, basic properties of an imaging system, the physics and instrumentation behind each modality, and their respective advantages, disadvantages, and applications. May be taken for graduate credit. Prerequisites: ECE 3220, BME 3820. (Spring).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Prerequisite: BME 3915W. (Same as ECE 4920, ECE 4920W) (Fall, Every Year).
BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. (Same as ECE 4925) (Spring, Every Year).

BME 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisites: junior or senior status. (Fall and spring).

BME 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

BME 6065. Colloquium. 0 Credits.
Lectures by outstanding authorities in biomedical engineering. Topics to be announced each semester. (Fall and spring).

BME 6481. Regulatory Law for Medical Devices. 3 Credits.
An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.
Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.
The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.
Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.
Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.
Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. Prerequisites: BME 6482. (Spring, even years).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.
Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6840. Digital Image Processing. 3 Credits.
Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.
Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Same as ECE 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.
Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).
BME 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.
First part of the BME 6994-BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.
Second part of the BME 6994-BME 6995 practicum sequence. Prerequisites: BME 6994. (Fall, spring, and summer).

BME 6998. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.
Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 0-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit. (Fall, spring, and summer).

BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering offers an Accreditation Board for Engineering and Technology (ABET) accredited bachelor’s degree in biomedical engineering. The curriculum provides students the opportunity to select a subset of courses to suit their interests and needs through a variety of technical electives. These electives include courses in leading-edge biomedical engineering topics, as well as advanced courses in computer science, electrical engineering, mechanical engineering, cell biology, physiology, and the physical sciences and mathematics.

Visit the program website (http://www.bme.seas.gwu.edu/programs-degrees) for additional information.

Science Elective ⁶

³ Potential restricted engineering electives (take 2)

- MAE 2131 Thermodynamics
- APSC 2057 Analytical Mechanics I
- APSC 2058 Analytical Mechanics II
- CE 2220 Introduction to the Mechanics of Solids
- ECE 2115 Engineering Electronics
- ECE 2140 Design of Logic Systems I
- ECE 3310 Introduction to Electromagnetics

⁴ At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

⁵ All technical electives must be approved by the academic advisor and must include at least three engineering courses.

⁶ Science electives (take one)

- PHYS 2128 Biophysics: Microscopic Physics in the Life Sciences
- CHEM 3165 Biochemistry I

**COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING**

**REQUIREMENTS**

The School of Engineering and Applied Science (SEAS) offers a combined bachelor of science with a major in biomedical engineering (p. 598) and master of engineering in the field of regulatory biomedical engineering (p. 600) degree program. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master’s degree.

Students interested in the combined program should visit the SEAS Department of Biomedical Engineering website (https://www.bme.seas.gwu.edu) for additional information.

**MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING**

The master of engineering in the field of regulatory biomedical engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://www.bme.seas.gwu.edu) in partnership with the School of Medicine and Health Sciences (http://smhs.gwu.edu). The program is designed to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics, and/or relevant experience in government and industry, learn the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to course work, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in elective courses.

MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The degree of master of science in the field of biomedical engineering degree program is designed to prepare students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to synthesize biomedical systems and devices. Students choose between two areas of focus: medical imaging or medical instrumentation. Thesis and non-thesis options are available. The program is offered on GW’s main campus in Foggy Bottom, where the School of Engineering and Applied Science (http://www.seas.gwu.edu), the School of Medicine and Health Sciences (http://smhs.gwu.edu), and GW Hospital (http://www.gwhospital.com) are separated by one city block.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.bme.seas.gwu.edu/master-science-biomedical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits including a zero-credit colloquium.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOMEDICAL ENGINEERING

Program Overview

The doctoral program in biomedical engineering is designed to prepare students for a career of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. This interdisciplinary program provides course work and research that draw on resources from across the School of Engineering and Applied Science. Existing research partnerships with the University’s School of Medicine and Health Sciences and GW Hospital, as well as the National Institutes of Health and U.S Food and Drug Administration, offer unique research opportunities and laboratory facilities.

Areas of Focus

There are a number of areas in which program students focus their dissertation research. These include cardiac electrophysiology, therapeutic ultrasound and drug delivery, image analysis and image processing, medical imaging and computer-aided diagnosis, assistive robotics, optogenetics, and microfluidics and lab-on-a-chip technology.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://www.bme.seas.gwu.edu/phd-biomedical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:
The George Washington University 2016-17 Academic Bulletin

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional accomplishments:

No specific courses are required; the student and advisor design the curriculum to meet the student’s needs and goals. Student should contact the department for additional information and requirements

CIVIL AND ENVIRONMENTAL ENGINEERING

Mission Statement

The mission of the Department of Civil and Environmental Engineering is to provide an academic environment where professional education can be pursued, scholarly research in science and technology can be conducted, and the interest of the public can be served through the advancement of knowledge.

In pursuit of this mission the administration, faculty, and staff join to provide a broad-based, rigorous professional education in civil engineering at the undergraduate level; a graduate education at the master’s level in major areas of civil engineering; and doctoral programs in selective areas of excellence within civil engineering.

Educational Objectives of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional advancement:

- Technical knowledge: students are able to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications;
- Team skills: students develop leadership skills, demonstrate proficiency in all forms of communication, and perform well in a multidisciplinary team environment;
- Continuous education: students recognize the need for continuing their education through graduate studies, continuous education opportunities, and/or self-education;
- Professionalism: students are prepared to exercise the highest standards of personal and professional integrity, demonstrate an understanding of the ethical and professional issues related to the procurement of work, and provide coordination between the design and construction aspects of the civil engineering profession.

These objectives are accomplished through a rigorous curriculum that emphasizes fundamentals in basic sciences, mathematics, humanities, and engineering in five major areas of civil engineering: environmental engineering, geotechnical engineering, structural engineering, water resources engineering, and transportation engineering. The curriculum enables students to use modern engineering tools to work individually and in teams. The curriculum contains a well-structured set of courses that enable students to develop the required analytical, experimental, and design skills.

Educational Outcomes of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates to have the following capabilities for career and professional advancement:

- Apply knowledge of mathematics, science, and engineering; design and conduct experiments; and analyze and interpret data;
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Function on multidisciplinary teams; and
- Communicate effectively.

Students are provided with the broad education necessary to understand the impact of engineering solutions in a global economic, environmental, and social context; a knowledge of contemporary issues; an understanding of professional and ethical responsibility; and a recognition of the need for and ability to engage in lifelong learning.

The civil engineering undergraduate program curriculum includes coverage of proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; proficiency in a minimum of four recognized major civil engineering areas; the ability to conduct laboratory experiments and to critically analyze and interpret data in more than one of the recognized major civil engineering areas; the ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum; and an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project, the importance of professional licensure and continuing education, and/or other professional practice issues.
UNDERGRADUATE

Bachelor's programs
• Bachelor of Science with a major in civil engineering (p. 609)
• Bachelor of Science with a major in civil engineering, environmental engineering option (p. 611)
• Bachelor of Science with a major in civil engineering, medical preparation option (p. 613)
• Bachelor of Science with a major in civil engineering, sustainability option (p. 615)
• Bachelor of Science with a major in civil engineering, transportation engineering option (p. 617)

Combined programs
• Combined Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 619)
• Combined Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 620)
• Combined Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 622)

GRADUATE

Master's program
• Master of Science in the field of civil and environmental engineering (p. 624)

Doctoral program
• Doctor of Philosophy in the field of civil and environmental engineering (p. 625)

CERTIFICATE
• Graduate certificate in environmental engineering
• Graduate certificate in geoenvironmental engineering
• Graduate certificate in structural engineering (p. 627)
• Graduate certificate in transportation engineering (p. 627)

FACULTY

Professors S.S. Badie, K.H. Digges (Research), M.I. Haque, S. Lerman, M.T. Manzari (Chair), R. Riffat, K. Roddis, S.S. Badie

Associate Professors P.F. Silva

Assistant Professors L. Farhadi, S.H. Hamdar, T. Li, D. Shuai

Research Professor K.H. Digges

Professorial Lecturers M.O. Critchfield, G.C. Everstine, K. Garrahan, F. Sadek

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.
An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.
The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 2210. Engineering Computations. 3 Credits.

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.
Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisite: APSC 2057, APSC 2113.

CE 2510. Environmental Sustainability. 3 Credits.
An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.
CE 2710. Introduction to Transportation Engineering. 3 Credits.
Transportation system components; roadway traffic capacity and network performance measures; signalized and unsignalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisites: Math 2233. (Spring).

CE 3110W. Civil Engineering Materials. 2 Credits.
Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Prerequisite: CE 2220. (Fall).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.
Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Prerequisite or corequisite: CE 3110W. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.
Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. Prerequisite: CE 3110, CE 3111.

CE 3230. Structural Theory I. 3 Credits.
Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210, CE 2220. (Fall).

CE 3240. Structural Theory 2. 3 Credits.
Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230.

CE 3310. Reinforced Concrete Structures. 3 Credits.
Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. Prerequisite or corequisite: CE 3240.

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.
Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisite or corequisite: CE 3610.

CE 3521. Environmental Engineering Laboratory. 1 Credit.
Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.
Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisite: MAE 3126.

CE 3611. Hydraulics Laboratory. 1 Credit.
Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli’s theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.
Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. Prerequisite: MATH 2233; prerequisite or corequisite: APSC 3115 and CE 2220.

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits.
Human and physical processes shaping urban environments; human-environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits.
Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits.
Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Restricted to juniors and seniors. (Spring, Every Year).

CE 4340. Design and Cost Analysis of Civil Engineering Structures. 0-3 Credits.
Total structural systems concepts. Design of civil engineering structures such as piers, wharves, bulkheads, offshore platforms, dams, and other special structures. Principles of cost analysis for timber, steel, and reinforced concrete structures. Project and report are required. Prerequisites: CE 3310, CE 4320, CE 4410. (Spring).
**CE 4410. Introduction to Geotechnical Engineering. 3 Credits.**
Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisite: CE 2220, MAE 3126.

**CE 4411. Geotechnical Engineering Laboratory. 1 Credit.**
Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. Prerequisite or corequisite: CE 4410.

**CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.**
Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520, CE 4410. (Spring, Even Years).

**CE 4451. Subsurface Flow and Pollution Control. 3 Credits.**
Introduction to groundwater monitoring, groundwater pollution, plate flow, dispersion, pumping tests. The transport of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

**CE 4620. Hydrology and Hydraulic Design. 3 Credits.**
Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. Prerequisite or corequisite: APSC 3115, CE 3610.

**CE 4810. Research. 1-3 Credits.**
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

**CE 4820. Special Topics. 1-6 Credits.**
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

**CE 6101. Numerical Methods in Engineering. 3 Credits.**

**CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.**
Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

**CE 6201. Advanced Strength of Materials. 3 Credits.**
Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220, CE 3240. (Spring).

**CE 6202. Methods of Structural Analysis. 3 Credits.**
Modern methods of analysis of statically indeterminate structures, matrix analysis based on flexibility, stiffness, energy and variational methods, substructuring techniques; consideration of plastic collapse of structures; introduction to the finite element method. Prerequisites: CE 2220, CE 3240. (Fall).

**CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.**
Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

**CE 6204. Analysis of Plates & Shells. 3 Credits.**
Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220, CE 3240. (Spring, Odd Years).

**CE 6205. Theory of Structural Stability. 3 Credits.**
General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220, CE 3240. (Fall).

**CE 6206. Continuum Mechanics. 3 Credits.**
Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, Spring, and Summer, Even Years).
CE 6207. Theory of Elasticity I. 3 Credits.
Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.
Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.
Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.
Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6303. Design of Reinforced Concrete Structures. 3 Credits.
Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.
Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.
Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.
Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.
Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058, CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.
Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115, CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.
Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240, CE 4340, either CE 6340 or CE 6701. (Spring).

CE 6350. Intro to Biomechanics. 3 Credits.
Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220.

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

CE 6402. Theoretical Soil Mechanics. 3 Credits.
Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).
CE 6403. Geotechnical Engineering. 3 Credits.
Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410.

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.
Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.
Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.
Principles of chemistry of natural waters, water supplies, wastewaters, hazardous wastes. Stoichiometry, equilibrium, solubility, kinetics, organic chemistry, biochemistry, analytical techniques. Examples from water/wastewater practice to illustrate applications. Prerequisites: CHEM 1111, CHEM 1112. (Fall).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.
Elements of design including basic parameters and hydraulic requirements. Layout and design of water supply and wastewater systems, pumping stations, and treatment plants. Plant expansions and modifications. Prerequisite: CE 4530.

CE 6503. Principles of Environmental Engineering. 3 Credits.

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.
Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Prerequisite: CE 6503.

CE 6505. Environmental Impact Assessment. 3 Credits.

CE 6506. Microbiology for Environmental Engineers. 3 Credits.
Principles and applications of advanced treatment systems for water, wastewater, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisites: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.
Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504.

CE 6508. Industrial Waste Treatment. 3 Credits.

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

CE 6601. Open Channel Flow. 3 Credits.
types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

CE 6603. Design of Dams. 3 Credits.

CE 6604. Advanced Hydrology. 3 Credits.
Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.
Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).
CE 6606. Mechanics of Water Waves. 3 Credits.

CE 6607. Water Resources Planning and Control. 3 Credits.
The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: approval of department.

CE 6608. Hydraulic Modeling. 3 Credits.
Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.
Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210, MAE 3126. (Spring).

CE 6610. Pollution Transport Systems. 3 Credits.
Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisite: CE 3610, MAE 3121. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

CE 6607. Water Resources Planning and Control. 3 Credits.
The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: approval of department.

CE 6608. Hydraulic Modeling. 3 Credits.
Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.
Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210, MAE 3126. (Spring).

CE 6610. Pollution Transport Systems. 3 Credits.
Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisite: CE 3610, MAE 3121. (Spring).

CE 6620. Theory of Elasticity II. 3 Credits.
Dimensional elasto-statics. Prerequisite: APSC 6211; CE 6207.

CE 6605. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

CE 6606. Pavement & Runway Design. 3 Credits.
Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6607. Systems Dynamics Modeling and Control. 3 Credits.
Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6621. Traffic Engineering and Highway Safety. 3 Credits.
Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6622. Intelligent Transportation Systems. 3 Credits.
Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisite: CE 2710 or CE 3720. Recommended background: basic knowledge of transportation engineering. (Spring, Every Year).

CE 6600. Special Topics. 1-6 Credits.
Topic to be announced in the Schedule of Classes.

CE 6601. Civil and Environmental Engineering Graduate Internship. 1 Credit.
For graduate students in the department. May be repeated once for credit. Prerequisite: required courses in the area of focus and department approval. Additional prerequisites may be required for a specific internship as determined by the research supervisor.

CE 6608. Research. 1-12 Credits.
Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.

CE 6999. Thesis Research. 3 Credits.

CE 8320. Theory of Elasticity II. 3 Credits.
Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisite: APSC 6211; CE 6207.
CE 8321. Nonlinear Mechanics of Continua. 3 Credits.
Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Same as MAE 6288. Prerequisite: CE 6206, 6210; or MAE 6210, MAE 6286.

CE 8350. Sedimentation Engineering. 3 Credits.

CE 8351. Mechanics of Alluvial Channels. 3 Credits.
Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisite: CE 6601 or approval of department.

CE 8352. Advanced Hydraulics. 3 Credits.
Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisite: CE 6601 or approval of department.

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.
Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.
Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206 or 6350. (As arranged).

CE 8998. Advanced Reading and Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CE 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

**BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING**

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and of the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

### BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, ENVIRONMENTAL ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, environmental engineering option, can identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications. The program of study prepares students to understand the impact of engineering solutions in a global economic, environmental, and social context. The well-structured curriculum enables students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

**BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, MEDICAL PREPARATION OPTION**

The degree program for the bachelor of science in civil engineering, medical preparation option, focuses on proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; and the ability to conduct laboratory experiments and to critically analyze and interpret data. The curriculum prepares students to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications with special emphasis on the medical field.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

One humanities or social sciences elective *

*Course satisfies the university general education requirement in math, science, and writing.**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education
Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

A complete list of engineering electives can be found on the department’s website (http://www.cee.seas.gwu.edu/programs-degrees).

**BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, SUSTAINABILITY OPTION**

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. The Bachelor of Science in Civil Engineering prepares graduates to design systems, components, or processes to meet desired needs within realistic constraints such as sustainability. The University defines sustainability as the balance of environmental resources, social equity, and economic prosperity across the globe and across generations. The curriculum for the bachelor of science in civil engineering, sustainability option, enables students to develop the required analytical, experimental, and design skills to apply interdisciplinary methods and approaches to sustainability and analyze challenges, and develop and implement solutions.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL ENGINEERING

The School of Engineering and Applied Science offers the combined bachelor of science with a major in civil engineering and master of science in the field of environmental engineering (B.S./M.S.) for undergraduate students who are interested in careers in civil engineering with a focus in the field of environmental engineering. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. To meet the requirements of the dual program, students take 6 credits in graduate-level courses as part of their B.S. program of study.

Visit the program website (http://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering-0) for additional information.

### The George Washington University 2016-17 Academic Bulletin

**Fourth semester**
- APSC 2058 Engineering Analysis I
- CE 2210 Engineering Computations
- CE 2220 Introduction to the Mechanics of Solids
- CE 2710 Introduction to Transportation Engineering
- GEOL 1001 Physical Geology*

One humanities or social sciences elective **

**Fifth semester**
- APSC 3115 Engineering Analysis III
- CE 3110W Civil Engineering Materials
- CE 3111W Civil Engineering Materials Lab
- CE 3230 Structural Theory I
- MAE 3126 Fluid Mechanics I

Two humanities or social sciences electives **

**Sixth semester**
- CE 3240 Structural Theory 2
- CE 3310 Reinforced Concrete Structures
- CE 3520 Environmental Engineering I: Water Resources and Water Quality
- CE 3521 Environmental Engineering Laboratory
- CE 3610 Hydraulics
- CE 3611 Hydraulics Laboratory

One humanities or social sciences elective **

**Seventh semester**
- CE 4320 Metal Structures
- CE 4410 Introduction to Geotechnical Engineering
- CE 4411 Geotechnical Engineering Laboratory

### Eighth semester
- CE 4330W Contracts and Specifications
- CE 4340 Design and Cost Analysis of Civil Engineering Structures
- CE 6502 Advanced Sanitary Engineering Design

Two engineering electives

One CE master of science program course

**Ninth semester**

Four CE master of science program courses

**Tenth semester**

Four CE master of science program courses

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

A complete list of engineering electives can be found on the department's website (http://www.cee.seas.gwu.edu/programs-degrees).

**COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF STRUCTURAL ENGINEERING**

Offered by the School of Engineering and Applied Science, the bachelor of science with a major in civil engineering and master of science in the field of structural engineering (B.S./M.S.)
degree program allows civil engineering students to specialize in the field of structural engineering. Civil engineering encompasses those branches of engineering most closely related to the control and improvement of the environment and the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the Department of Civil and Environmental Engineering website (http://www.cee.seas.gwu.edu/about) for additional information.

The master of science in the field of civil and environmental engineering degree program is designed to provide students with the fundamentals and knowledge about the various specializations within environmental engineering. These include water, wastewater, hazardous wastes, industrial wastes, and pertinent regulatory requirements. Environmental engineering students use one of the world’s largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed. Structural engineering students study earthquake engineering, extreme event design of structures, and bridge design on a state-of-the-art, six-degrees-of-freedom earthquake simulator. Transportation engineering students learn from faculty and experts at GW’s National Crash Analysis Center (https://virginia.gwu.edu/centers-institutes-labs) and the Federal Outdoor Impact Laboratory.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). More information can be found on the departmental website (http://www.cee.seas.gwu.edu/master-science-program).

REQUIREMENTS

The following requirements must be fulfilled: Non-thesis option—33 credits; thesis option—30 credits, including 6 credits of thesis. In either option, the student must select one area of concentration from below and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

DOCTOR OF PHILOSOPHY  
IN THE FIELD OF CIVIL AND 
ENVIRONMENTAL ENGINEERING  

REQUIREMENTS  
The following requirements must be fulfilled: 

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy). 

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be from graduate courses, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 42 must be graduate course credits, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits. 

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals. 

Other requirements 
• Qualifying examination—Administered twice a year, the examination covers subject matters at both the master’s and doctoral levels. Students should prepare for comprehensive questioning on all subject matters regardless of any particular course included in the actual doctoral coursework load.  

Student should contact the department for additional information and requirements 

GRADUATE CERTIFICATE IN  
ENVIRONMENTAL ENGINEERING  
The graduate certificate in environmental engineering program is particularly appropriate for individuals interested in the areas of hazardous waste remediation and water/wastewater treatment. Students who complete the graduate certificate may opt to continue towards a master's degree in the civil and environmental engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master's degree program.  

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
REQUIREMENTS

The following requirements must be fulfilled: 12 credits in one selected track, including 9 credits in required courses and a 3-credit elective course.

GRADUATE CERTIFICATE IN GEOENVIRONMENTAL ENGINEERING

The graduate certificate in geoenvironmental engineering program is designed to provide the necessary background for civil engineers to practice in the field. The program offers an in-depth understanding of the issues that a geo-environmental engineer may encounter in practice. Students who successfully complete the certificate program may opt to continue towards a master’s degree in the Civil and Environmental Engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master’s degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

The George Washington University 2016-17 Academic Bulletin 626
GRADUATE CERTIFICATE IN STRUCTURAL ENGINEERING

The graduate certificate in structural engineering program is appropriate for those who wish to gain specialized knowledge in one of the following tracks: earthquake engineering design of bridges and buildings, extreme event design of structures to resist the effects of accidental explosions and vehicular collision, concrete bridge design using the LRFD approach, or building design using the LRFD approach.

Students who successfully complete the certificate program may opt to continue towards a master’s degree in the Civil and Environmental Engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master’s degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**COMPUTER SCIENCE**

**Mission Statement**

The mission of the Department of Computer Science is to serve the global community by providing high-quality computer science education, research, and professional services and to advance computer technology in selective areas while upholding standards of excellence.

**Educational Objectives**

The undergraduate program of study is designed to prepare graduates to earn an advanced degree in computer science or related disciplines; for a professional degree such as law, business, or medicine; or for employment in the computer or IT industry, where they will apply the skills and knowledge learned in the program. Graduates will conduct themselves professionally and ethically, work effectively in teams, and communicate effectively with both technical and non-technical audiences.

**Educational Outcomes**

A graduate in computer science will have the ability to do the following:

- Apply knowledge of computing and mathematics appropriate to the discipline;
• Analyze a problem and identify and define the computing requirements appropriate to its solution;
• Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
• Function effectively on teams to accomplish a common goal;
• Understand professional, ethical, legal, security, and social issues and responsibilities;
• Communicate effectively with a range of audiences;
• Analyze the local and global impact of computing on individuals, organizations, and society;
• Recognize the need to engage in continuing professional development;
• Use current techniques, skills, and tools necessary for computing practice;
• Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
• Apply design and development principles in the construction of software systems of varying complexity.

UNDERGRADUATE

Bachelor’s programs

• Bachelor of Arts with a major in computer science (p. 638)
• Bachelor of Science with a major in computer science (p. 640)

Minor

• Minor in computer science (p. 642)

GRADUATE

Master’s programs

• Master of Science in the field of computer science (p. 643)
• Master of Science in the field of cybersecurity in computer science (p. 643)

Doctoral program

• Doctor of Philosophy in the field of computer science (p. 644)

CERTIFICATES

• Graduate certificate in computer security and information assurance (p. 644)

FACULTY

Professors X. Cheng, H.A. Choi, J.K. Hahn, R.S. Heller, B. Narahari, R. Simha, P. Vora, and A. Youssef

Associate Professors M. Diab, G. Parmer, N. Zhang

Assistant Professors E. Drumwright, C. Monteleoni, T. Wood

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses; computer science courses in this numerical range may only be taken for graduate credit with permission of the course instructor, permission of the student’s academic advisor, and by completing additional work in the course
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: With the exception of CSCI 1010, CSCI courses numbered CSCI 1041 and below normally may not be counted toward degree requirements for computer science majors, unless approved by a departmental advisor.

CSCI 1010. Computer Science Orientation. 1 Credit.
Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.
An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1020. Applications Software. 3 Credits.
Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

CSCI 1022. Introduction to Internet Technology. 3 Credits.
An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.
CSCI 1023. Introduction to Web Software Development. 3 Credits.
Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.
Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. Prerequisite or corequisite: Math 1220 or MATH 1231.

CSCI 1111. Introduction to Software Development. 3 Credits.
Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.
Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a grade of C or higher; and MATH 1220 or MATH 1231. (Spring).

CSCI 1121. Introduction to C Programming. 3 Credits.

CSCI 1131. Introduction to Programming with C. 3 Credits.
Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and non-numerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232 .

CSCI 1132. Data Structures and Software Design. 3 Credits.
Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.
Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.
Programming techniques and software development in one or more programming languages. Application development with GUIs, database access, threads, Web programming. Prerequisites: CSCI 1112 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2312. Discrete Structures II. 3 Credits.
Basic discrete techniques in computer science. Proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Prerequisites: CSCI 1311 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2441. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, software copyrights. Corequisite: CSCI 2113.

CSCI 2441W. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Corequisite: CSCI 2113. (Spring).
CSCI 2461. Computer Architecture I. 3 Credits.
Number representation, computer arithmetic, digital logic and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware–software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112, CSCI 1311. (Fall, Every Year).

CSCI 3212. Algorithms. 4 Credits.
Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 3221. Programming Languages. 3 Credits.
Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.
For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisite: CSCI 3212, CSCI 3313, CSCI 3411, and permission of instructor.

CSCI 3313. Foundations of Computing. 4 Credits.
Theoretical foundations. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Compiler construction. Lexical and syntax analysis; parsing and parsing techniques; lexical and parsing tools. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3362. Probability for Computer Science. 3 Credits.
Introduction to probability and statistics for computer scientists. Random variables. Conditional probability, independence, correlation. Applications to computer science, including information theory, data compression, coding, inference, Markov chains, introduction to randomized algorithms. Prerequisite: Math 1232, CSCI 1311; or permission of instructor.

CSCI 3410. Systems Programming. 3 Credits.
Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer’s perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3411. Operating Systems. 4 Credits.
Process management, process state, concurrent processing, synchronization, events. Operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads. System management, memory management, process loading, communication with peripherals. File systems. Socket programming, packets, Internet protocols. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3462. Computer Architecture II. 3 Credits.
Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113, CSCI 2461. (Same as ECE 3515) (Spring, Every Year).

CSCI 3571. Introduction to Bioinformatics. 3 Credits.
An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CSCI 4222. Theory of Computer Translators. 3 Credits.
Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisite: CSCI 3462, CSCI 3313.

CSCI 4223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisites: CSCI 1311, CSCI 2113. (Same as CSCI 6223) (Spring, Odd Years).
CSCI 4235. Development of Open-Source Software. 3 Credits.
Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.
Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.
Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.
Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4244. Capstone Design Project II. 4 Credits.
Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4314. Discrete Analysis-Computer Sci. 3 Credits.
Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisite: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.
Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Prerequisite: CSCI 2312, CSCI 3313, CSCI 3212.

CSCI 4341. Continuous Algorithms. 3 Credits.
Overview of structures in continuous mathematics from a computational viewpoint. Main topics include continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.
Application of linear algebra to computer science and engineering, with a computational perspective. Topics include points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Prerequisite: CSCI 2113.

CSCI 4361. Simulation Methods. 3 Credits.
Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.
Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184; or permission of the instructor. (Same as CSCI 6364) (Fall, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.
Development of software for real-time control of physical systems. Reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113.

CSCI 4417. UNIX System Programming. 3 Credits.
Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.
CSCI 4418. UNIX System Administration. 3 Credits.
System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4431W. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4432. Computer Networks II. 3 Credits.

CSCI 4455. Computer Game Design and Programming. 3 Credits.
Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.
Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming. Search, game trees, backtracking. Planning. May be taken for graduate credit. Restricted to graduate students. Prerequisites: CSCI 3221 and CSCI 3212.

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.
Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisite: permission of instructor.

CSCI 4527. Introduction to Computer Vision. 3 Credits.
Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232, MATH 2184 and CSCI 3362 or CSCI 4341. (Same as CSCI 6527) (Spring, Every Year).

CSCI 4531. Computer Security. 3 Credits.
Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Prerequisite: CSCI 3411; corequisite: CSCI 4431.

CSCI 4532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 4541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 4531.

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.
Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.
Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. Prerequisite: CSCI 4551.
CSCI 4553. Design of Computer Animation II. 3 Credits.
Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics I. 3 Credits.
Hardware; concepts of graphics subroutine packages; programming concepts for interaction, display, and data structuring; basic clipping and scan-conversion algorithms; homogeneous coordinates; three-dimensional viewing transforms; basic rendering. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4561. Design of User-Interface Programs. 3 Credits.
Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.

CSCI 4577. Biomedical Computing. 3 Credits.
Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Prerequisite: CSCI 2113, CSCI 4576; corequisite: CSCI 2441.

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.
Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Prerequisite: one year of course work in programming in C, C++ or Java.

CSCI 6011. Introduction to Computer Systems. 3 Credits.
Introduction to basic concepts underlying all computer systems. Processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer’s perspective. Prerequisite: one year of course work in programming in C, C++ or Java.

CSCI 6012. Cybersecurity and Privacy. 3 Credits.
Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.
Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.
Design and analysis of algorithms. Turing machines; NP-Complete theory. Algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound. Applications include sorting and searching, graph algorithms, and optimization. Restricted to graduate students. Prerequisites: CSCI 1112 and CSCI 1311.

CSCI 6221. Advanced Software Paradigms. 3 Credits.
Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life-cycle concepts. Tradeoffs between compiled and interpreted languages. Examples from Java, C, C++ and Perl. Prerequisites: CSCI 1112 and CSCI 1311 or graduate status.

CSCI 6223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisite: CSCI 1311, CSCI 2113.
CSCI 6231. Software Engineering. 3 Credits.

CSCI 6232. Software Engineering Development. 3 Credits.
Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisite: CSCI 6461, CSCI 6212.

CSCI 6233. Software Testing & Quality. 3 Credits.
Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231.

CSCI 6234. Object-Oriented Design. 3 Credits.
Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.
Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.
Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory & Applications. 3 Credits.

CSCI 6318. Complex Systems. 3 Credits.
The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.
CSCI 6411. Advanced Operating Systems. 3 Credits.
Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design & Implementation. 3 Credits.
Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which will be studied and motivated from the viewpoint of practical design and implementation. Students will learn how operating system’s components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411.

CSCI 6421. Distributed and Cluster Computing. 3 Credits.
In-depth study of the algorithmic and implementation challenges in building large-scale distributed applications. Topics include distributed coordination, scheduling, consistency issues, and fault tolerance algorithms. The course will cover how fundamental distributed systems concepts are applied to both high performance computing and cloud computing environments. The course will mix algorithmic concepts and practical implementation concerns; substantial programming experience is recommended. Prerequisite: CSCI 6212, CSCI 3411.

CSCI 6431. Computer Networks. 3 Credits.
Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications. Layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Prerequisite: CSCI 6461.

CSCI 6433. Internet Protocols. 3 Credits.
Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisite: CSCI 6221, CSCI 6431.

CSCI 6434. Design of Internet Protocols. 3 Credits.

CSCI 6441. Database Management Systems. 3 Credits.
Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6442. Database Systems II. 3 Credits.

CSCI 6443. Data Mining. 3 Credits.
Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisite: CSCI 6441 or permission of instructor.

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.
Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.
Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6461. Computer System Architecture. 3 Credits.
Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks. Cache coherence and memory subsystem design for multiprocessor architectures. Parallel and distributed system architecture; internetworking. Prerequisite: CSCI 1311, CSCI 1112, CSCI 2461.

CSCI 6511. Artificial Intelligence. 3 Credits.

CSCI 6515. Natural Language Understanding. 3 Credits.
The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.
CSCI 6521. Introduction to Mobile Robotics. 3 Credits.
Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 4341.

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.
Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisite: CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6527. Introduction to Computer Vision. 3 Credits.
Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 6341.

CSCI 6531. Computer Security. 3 Credits.

CSCI 6532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 6534. Information Security in Government. 3 Credits.

CSCI 6541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 6531.

CSCI 6542. Computer Network Defense. 3 Credits.
Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.
Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisite: CSCI 6461 or CSCI 6411; CSCI 6531 or EMSE 6540 or permission of instructor.

CSCI 6547. Wireless and Mobile Security. 3 Credits.
Mobile Agents, Wireless Web, WAP, WEP, Peer-to-Peer Computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisite: CSCI 6431, CSCI 6531.

CSCI 6548. E-Commerce Security. 3 Credits.
Advanced technical topics in e-commerce security. X.500 registration systems, X.509/PKIX certification systems, secure payment methods, smart cards, authorization models in open distributed environments. Secure web systems, technologies, and applications. Prerequisite: CSCI 6541.

CSCI 6554. Computer Graphics II. 3 Credits.

CSCI 6555. Computer Animation. 3 Credits.
Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; rendering problems (temporal aliasing); sound synthesis and synchronization; recording and editing techniques. Prerequisite: CSCI 4554 or permission of instructor.

CSCI 6561. Design of Human-Computer Interface. 3 Credits.
Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.
History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.
CSCI 6572. Computational Biology Algorithms. 3 Credits.
Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisite: CSCI 6212; programming experience in C/C or Java.

CSCI 6900. Colloquium. 0 Credits.
Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

CSCI 6908. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.
CSCI 6999. Thesis Research. 3 Credits.

CSCI 8211. Advanced Topics in Algorithms. 3 Credits.
Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.
Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisite: CSCI 6232, CSCI 6233.

CSCI 8331. Advanced Cryptography. 3 Credits.

CSCI 8401. Advanced Topics in Systems. 3 Credits.
Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.
Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212, CSCI 6433.

CSCI 8440. Advanced Topics in Data Management. 3 Credits.
Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.
Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.
Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms: illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.
Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.
Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CSCI 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE

Bachelor of Arts Degree Program

The bachelor of arts with a major in computer science degree program provides a broad-based liberal arts curriculum for students who wish to augment technical knowledge with humanities, social sciences, business, communication, or management skills. Foundation courses focus on mathematics, science, software design and programming, computer systems and architecture, and algorithm design. Additional breadth or depth is afforded by selection of technical track courses that build on the foundations to provide in-depth exposure to a specific field in computer science. The program is designed for those with interests in two or more disciplines; students complete a second major or two minors in another academic department.

The minimum number of credits required for the major in computer science is 120; the credit total depends on the second major or minors chosen by the student. Students interested in pursuing a computer science major with preparation for application to medical school can also choose the medical preparation option. Students select a technical track in which at least three technical track elective courses are selected in consultation with advisor.
Additional information about the Bachelor of Arts with a major in computer science is available on the program website (http://www.cs.seas.gwu.edu/bachelor-arts-program).

Second Major in Computer Science
Students who are not enrolled in the School of Engineering and Applied Science (SEAS), who are enrolled in a bachelor of arts program and wish to declare a second major in computer science, must apply and be admitted to the computer science program.

Criteria for admission
To be considered for admission to the second major in computer science, a student must have:

- A minimum grade of B in CSCI 1111 Introduction to Software Development or CSCI 1011 Introduction to Programming with Java or CSCI 1121 Introduction to C Programming; and a minimum grade of B– in MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II or in MATH 1231 Single-Variable Calculus I.
- A minimum overall grade-point average of 3.0 at the time of application to the major.

Application Deadline
The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for specific application deadlines.

Credits in residence requirement
- For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria
- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department website (http://www.seas.gwu.edu/department-computer-science) for more information on curriculum requirements for the second major in computer science.

*Course satisfies the university general education requirement in math, science, and writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).

†At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

**BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE**

The program combines software development, computer systems and architecture, algorithms, project design, science, and mathematics to provide a strong foundation in the underpinnings of computer science. Students are prepared to design and implement software needed for Internet operations, computer graphics and animation, secure systems, and applications for small, large, and embedded systems. In consultation with the advisor, students choose a technical track and a non-technical track. The technical track provides depth in a particular area of computer science, while the non-technical track enables students to stay current with the rapidly evolving field and to establish the relevance of their studies in the ever-changing global environment. The B.S. in computer science program is accredited by ABET.

**Medical Preparation Option in Computer Science**

This option is for students interested in pursuing a computer science major as they prepare to apply to a medical school. The degree program combines additional natural science course work with computer science course requirements.

Visit the program website (http://www.cs.seas.gwu.edu/bachelor-science-program) for additional information.

**Bachelor of Science With a Second Major in Computer Science**

Students who are not enrolled in the School of Engineering and Applied Sciences (SEAS), who are enrolled in another bachelor of science program, but wish to declare a second major in computer science must apply and be admitted to the second major program in Computer Science. Students in this program must follow the same degree requirements as those receiving a bachelor of science in computer science as their primary major.

**Criteria for admission:**

To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- A minimum grade of B or above in CSCI 1111 or CSCI 1011 or CSCI 1121; and a B– or above in Math 1220 and Math 1221 or a B– in Math 1231;
- A minimum overall grade-point average of 3.0 at the time of application to the major;
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for current application deadlines for the second major in computer science.

**Credits in residence requirement:**

- For a second major at least 24 credits in computer science courses must be completed in SEAS.

**Graduation grade-point average criteria:**

- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department webpage (http://www.seas.gwu.edu/department-computer-science) for more information on curriculum requirements for the second major in computer science.

*Course satisfies the university general education requirement in math, science, or writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)
Mathematics requirements can be met by taking MATH 1220 Calculus with Precalculus I–MATH 1221 Calculus with Precalculus II and MATH 1232 Single-Variable Calculus II or by taking MATH 1231 Single-Variable Calculus I and MATH 1232 Single-Variable Calculus II. All students must take two math courses not counting MATH 1220 Calculus with Precalculus I; students who take MATH 1220 Calculus with Precalculus I must take it as one of their unrestricted electives. Science requirements can be met by choosing from BISC 1111 Introductory Biology: Cells and Molecules–BISC 1112 Introductory Biology: The Biology of Organisms, CHEM 1111 General Chemistry I–CHEM 1112 General Chemistry II, and PHYS 1021 University Physics I–PHYS 1022 University Physics II. The three science requirement courses must include a two-course sequence.

CSCI 4341 Continuous Algorithms and CSCI 3362/6362 Probability for Computer Science can count towards the statistics requirement or the math/science elective, but not both. Students who were admitted prior to fall 2014 may count STAT 1051 Introduction to Business and Economic Statistics and STAT 1053 Introduction to Statistics in Social Science towards the statistics requirement, if they took the course prior to the start of the Spring 2015 semester.

Some examples of technical tracks include computer security and information assurance, digital media, foundations and theory, biomedical computing, systems, software engineering and applications and research. Examples of non-technical tracks include business, project management, global engineering, pre-law, and environment and climate change. Students may define their own non-technical track in consultation with their advisor. More information on the tracks and track requirements may be found on the program website (http://www.cs.seas.gwu.edu/bachelor-science-program).

MINOR IN COMPUTER SCIENCE

This minor, offered by the Department of Computer Science, is for students in other GW schools as well as other majors within the School of Engineering and Applied Science. The curriculum consists of two segments: core courses and electives whose purpose is to provide the student with depth in an area of computer science. The total number of credits for the minor is 18.

To be considered for admission to the minor in computer science, a student must satisfy the following criteria:

- A minimum grade of B or above in CSCI 1111 Introduction to Software Development, CSCI 1011 Introduction to Programming with Java, or CSCI 1121 Introduction to C Programming; and a B- or above in MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II or a B- in MATH 1231 Single-Variable Calculus I;
- A minimum overall grade-point average of 3.0 at the time of application to the minor.
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the Department of Computer Science (https://www.cs.seas.gwu.edu) for current application deadlines for the minor in computer science.

Credits in residence requirement:

- For students pursuing a minor, at least 15 credits in computer science courses must be completed at GW.

Graduation grade-point average criteria:

- To satisfactorily complete a minor in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses.

other electives may be substituted with the approval of the minor advisor.

MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The Department of Computer Science offers a graduate degree program leading to the master of science in the field of computer science. After completing core requirements, students select electives in subject areas such as computer security and information assurance, database and information retrieval systems, software engineering and systems, biomedical computing, digital media and computer graphics, networking and mobile computing, computer architecture, pervasive computing and embedded systems, machine intelligence, robotics, and algorithms and theory. Students are not required to take elective courses in a particular subject area or across subject areas. Both thesis and non-thesis options are available.

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students also are expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

Graduate students are required to attend several department colloquia each semester. These are intended to broaden the student’s professional outlook and to encourage interaction with the faculty.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.cs.seas.gwu.edu/master-science-computer-science) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in required courses and 21 credits in elective courses.

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students also are expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

Code | Title | Credits
--- | --- | ---
CSCI 6212 | Design and Analysis of Algorithms | 3
CSCI 6221 | Advanced Software Paradigms | 3
CSCI 6461 | Computer System Architecture | 3

Electives

21 credits in elective course selected in consultation with the advisor. As a general rule, no more than two courses may be taken outside of the department.

At least 24 of the 30 credits required for this program must be at the 6000 level or above.

Graduate students are required to attend several department colloquia each semester. These are intended to broaden the student’s professional outlook and to encourage interaction with the faculty.

MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The master of science in the field of cybersecurity in computer science degree program was created in response to the significant and fast-growing need for technical cybersecurity experts, both nationally and internationally. Students in the program acquire up-to-date knowledge and skills in cybersecurity, a field with increasing importance to national
security, the economy, and private citizens. Students take courses in computer security, software security, network security, cryptography, and security management, among others. They also gain a firm grounding in computer science and take courses in related disciplines such as cybersecurity law and digital forensics.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the departmental website (http://www.cs.seas.gwu.edu/master-science-cybersecurity-computer-science) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required courses and 18 credits in elective courses. Thesis and non-thesis options are available; students should contact the department concerning these options.

Electives

In addition to the four required courses, four designated security courses are required. Two of these courses must be Computer Science (CSCI) courses and one must be a CSCI applied cryptography course. In addition, students must take two graduate-level, credit-bearing courses. See the Department of Computer Science website for specifics.

Normally, no more than three courses may be taken outside of those offered by the Department of Computer Science.

At least 24 of the 30 credits required for the degree must be at the 6000 level or above.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER SCIENCE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, consisting of 18 credit hours of courses available for graduate credit and 12 credit hours of dissertation research. For students without an MS degree, an additional 24 credit hours have to be completed, that may be divided between courses available for graduate credit and dissertation credit hours, subject to the approval of the student’s advisor. For students without a prior master’s degree, 15 credits may be taken outside of the department; for those with a prior master’s degree, 9 credits may be taken outside of the department. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required. Individual plans of study are developed in consultation with the advisor; however, the plan of study must include one course in of each of the areas of theory, systems, and applications and one advanced topics course.

Other requirements

- Preliminary examination—Students must pass the examination within four semesters of starting the program
- Dissertation proposal examination—Students must pass the preliminary examination prior to the dissertation proposal examination. The student must then submit a written proposal for evaluation and undergo an oral examination.
- Students are responsible for forming a dissertation committee comprising three members in addition to the advisor and co-advisor(s).
- Peer-reviewed papers—Students are required to have one peer-reviewed article accepted for publication; two to three published peer-reviewed articles are encouraged.
- Colloquium requirement—Each semester, students must attend a minimum of two seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements.

GRADUATE CERTIFICATE IN COMPUTER SECURITY AND INFORMATION ASSURANCE

The graduate certificate in computer security and information assurance provides a strong technical education in the security of computer systems and networks, as well as training in related policy issues. The program emphasizes concepts in computer security, augmented with current industry standard techniques and challenges. It provides an alternative to the full M.S. program for practicing computer scientists and other information technology personnel who wish to extend their education beyond the B.S. level, and to those who wish to
acquire up-to-date knowledge in the burgeoning field of computer and network security.

The George Washington University has been recognized as a Center of Academic Excellence in Education-Research and by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

ELECTRICAL AND COMPUTER ENGINEERING

OVERVIEW

Mission Statement

The mission of the department is to motivate and inspire students by providing high-caliber, fully integrated programs in electrical and computer engineering. These programs prepare graduates to provide leadership in a rapidly evolving global information society and to serve the greater good. The programs are also designed to allow students to advance the state of knowledge in our disciplines by actively pursuing scholarly research for publication and dissemination.

Educational Objectives

The objectives of the electrical and computer engineering undergraduate program of study are to educate students in the principles of engineering, as well as ensure awareness of their social responsibilities. The engineering education is based on the sciences and the principles of design. A balanced program in the humanities and social sciences as well as coverage of specific topics in professional ethics and social responsibilities, further instills a sense of social responsibilities. The programs provide students with a solid foundation in electrical and computer engineering through a balanced curriculum integrating the underlying scientific and mathematical knowledge with the latest technological developments. The curriculum is designed to produce engineers capable of functioning in the present technological environment and of adapting to future directions of the profession. Specifically, the programs aim to teach students how to analyze and implement complex interdisciplinary engineering projects; to give students a strong foundation for graduate study in their field; to prepare students for competitive and challenging industrial applications; to teach students how to use state-of-the-art computer tools for solving engineering problems; to expose students to hands-on engineering experience through laboratory courses; to cultivate students’ abilities to communicate and work effectively in teams; and to help students develop an understanding of the ethical issues and global perspectives arising in the practice of the engineering profession.

Educational Outcomes

The Department of Electrical and Computer Engineering aims to produce graduates who will have the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context, as well as professional and ethical responsibility; and a recognition of the need for, and an ability to engage in life-long learning.

Graduates will also have the ability to:

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, as well as analyze and interpret data
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- Function on multidisciplinary teams
- Identify, formulate, and solve engineering problems
- Communicate effectively
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.
UNDERGRADUATE

Bachelor’s programs

• Bachelor of Science with a major in computer engineering (p. 655)
• Bachelor of Science with a major in electrical engineering (p. 656)
• Bachelor of Science with a major in electrical engineering, energy option (p. 657)
• Bachelor of Science with a major in electrical engineering, medical preparation option (p. 659)

Minors

• Minor in computer engineering (p. 660)
• Minor in electrical engineering (p. 660)

GRADUATE

Master’s programs

• Master of Science in the field of computer engineering (p. 661)
• Master of Science in the field of electrical engineering (p. 662)
• Master of Science in the field of telecommunications engineering (p. 664)

Professional programs

See the School of Engineering and Applied Science for programs leading to the professional degree.

Doctoral programs

• Doctor of Philosophy in the field of computer engineering (p. 665)
• Doctor of Philosophy in the field of electrical engineering (p. 665)

CERTIFICATES

• Graduate certificate in high-performance computing (p. 665)

FACULTY

Professors S. Ahmadi, L. Bennett (Research), C.B. Cameron (Practice), R.L. Carroll, E. Della Torre, T. El-Ghazawi, K.B. Eom, R.J. Harrington, H.J. Helgert, C.E. Korman, N. Kyriakopoulos, R.H. Lang, D. Nagel (Research), A. Louri (Chair), S. Subramaniam, M.E. Zaghloul

Associate Professors M. Doroslovakci, H.H. Huang, T. Lan, G.P. Venkataramani

Assistant Professors A. Etemadi, E. Simsek, V. Sorger

Assistant Research Professors V. Narayana

Professorial Lecturers A. Mehrotra, S.A. Torrico

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1020. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.

Continuation of ECE 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1120. C Programming for ECE. 3 Credits.

Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization. Concurrency and multicore programming using threads, processes as well as parallel C programming paradigms. Controlling hardware devices and fine control via interfacing with assembly language.

ECE 1125. Data Structures & Algorithms ECE. 3 Credits.

Fundamentals of algorithms and data structures for electrical and computer engineering. Topics include techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. (Fall).

ECE 2110. Circuit Theory. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasors; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisite: APSC 2113. Prerequisites: PHYS 1022 or PHYS 1026. (Fall and spring).
ECE 2115. Engineering Electronics. 4 Credits.  
Lecture (3 hours), laboratory (3 hours). Solid-state devices used in electronic engineering. Physics of their operation. Application to electronic circuits. Primary emphasis on application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110.

ECE 2120. Engineering Seminar. 0-1 Credits.  
This seminar course provides electrical and computer engineering students with a detailed view of the electrical and computer engineering professions. Speakers from within and outside of the department discuss facets of ECE, engineering education, and other important department, college, or university topics of interest. (Fall).

ECE 2140. Design of Logic Systems I. 4 Credits.  
Lecture (3 hours), laboratory (3 hours). Boolean algebra; combinational and sequential circuits; minimization techniques; design-and-build logic subsystems, such as decoders, multiplexers, adders, and multipliers; use of CAD tools. Corequisite: ECE 2115.

ECE 2210. Circuits, Signals, and Systems. 3 Credits.  
Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters; CAD tools used in design of projects. Prerequisite: ECE 2110.

ECE 2215. Design of Logic Systems II. 4 Credits.  
Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers. Output stages and power amplifiers. Frequency response of amplifiers, high-frequency models of FETs and BJTs. Introduction to feedback circuit topologies. Use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115.

ECE 2220. Intro to Digital Signal Process. 3 Credits.  
Signal representation, sampling and quantization, discrete-time signals, z-transforms and spectra, difference equations. Fourier analysis. Discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210.

ECE 2225. Signal and Image Analysis. 3 Credits.  
Introduction and clinical applications; characteristics of biomedical problems, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Corequisite: ECE 2210, ApSc 3115.

ECE 3125. Analog Electronics Design. 4 Credits.  
Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers. Output stages and power amplifiers. Frequency response of amplifiers, high-frequency models of FETs and BJTs. Introduction to feedback circuit topologies. Use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115.

ECE 3130. Digital Electronics and Design. 4 Credits.  
Lecture (3 hours), laboratory (3 hours). Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Prerequisite: ECE 2140.

ECE 3135. Design of Logic Systems II. 4 Credits.  
Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140.

ECE 3300. Communications Engineering. 3 Credits.  

ECE 3310. Introduction to Electromagnetics. 3 Credits.  
Maxwell’s equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisites: APSC 2113, PHYS 1022.

ECE 3315. Fields and Waves I. 3 Credits.  
Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching. Review of vector analysis and numerical methods. Electrostatics, generalizations of Coulomb’s law, Gauss’s law, potential, conductors, dielectrics, capacitance, energy. Prerequisites: APSC 2113 and PHYS 1022. (Fall and spring).

ECE 3340. Communications Laboratory. 1 Credit.  

ECE 3350. Computer Organization. 3 Credits.  
Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. May be taken for graduate credit. Prerequisite: ECE 2140. (Same as CSCI 3462) (Fall, Every Year).

ECE 3352. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.  
Microprocessor architecture, assembly language, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience is an integral part of this course. Prerequisite: ECE 2140.
ECE 3525. Introduction to Embedded Systems. 3 Credits.
Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisite: CSCI 1121, ECE 3520.

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.

ECE 3915W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab I. 1 Credit.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4140. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for chip fabrication. Prerequisites: ECE 3130, ECE 3135. Same as ECE 6240. (Fall).

ECE 4145. Micro and Nano Fabrication Techniques. 3 Credits.
Introduction to modern fabrication process technologies associated with various types of nano-or micro fabrications process, with applications to the micro- and nano scale device fabrications; steps of standard processing will be illustrated; nano lithography and other available modern technologies. Prerequisite: ECE 2110. (Fall).

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. Prerequisite: ECE 4140. (Same as ECE 6250) (Spring, Every Year).

ECE 4155. Modern Measurements and Sensors. 3 Credits.
Measurement of dc, ac, and high-frequency signals. Interface electronic circuits. Sensors for measurement of mechanical, optical, magnetic, electromagnetic, thermal, chemical, and biochemical signals. Prerequisite: ECE 4320, ECE 3125, ECE 2140. May be taken for graduate credit.

ECE 4160. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps, and techniques to build devices such as carbon nanotubes, Graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). Prerequisite: ECE 2115. (Same as ECE 6260) (Fall, Every Year).

ECE 4320. Fields and Waves II. 3 Credits.
Experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4435. Fiber Optical Communications. 3 Credits.

ECE 4325. Microwave and Optics Laboratory. 1 Credit.
ECE 4325. Laboratory experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4535. Computer Architecture and Design. 3 Credits.
Design of bus-based digital computer systems, memory subsystems, caches, and multiple processors. Comparison of RISC and CISC processors and standard buses. Bus transfer and control signals. Performance, memory management, architectural support for protection, task switching, exception handling, instruction pipelines. Prerequisite: ECE 3515.

ECE 4610. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. Prerequisites: ECE 2210, ECE 3315. (Same as ECE 6610) (Spring, Every Year).
ECE 4615. Electrical Power Laboratory. 1 Credit.
Experiments in support of the analysis and design of electrical power systems. Measurements of the characteristics of devices to generate electric power. Rectification and inverter processes for power systems and drives. Prerequisite or corequisite: ECE 4610.

ECE 4620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall, Every Year).

ECE 4710. Control Systems Design. 3 Credits.
Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisite: APSC 2114, ECE 2210 or MAE 3134.

ECE 4715. Control Systems Laboratory. 1 Credit.
Experiments in support of control theory, involving the use of the digital computer for process control in real time. Design of feedback and compensation with computer implementation. Digital simulation of linear and nonlinear systems. Prerequisite or corequisite: ECE 4710.

ECE 4730. Robotic Systems. 3 Credits.

ECE 4735. Robotics Laboratory. 1 Credit.
Experiments illustrating basic principles and programming of robots and other automated machinery. Design and writing of computer programs to use a robot’s arm, vision, and data files to accomplish tasks. Prerequisite or corequisite: ECE 4730/MAE 3197.

ECE 4920W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab II. 3 Credits.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4925W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab III. 2 Credits.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4980. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Microcomputer Systems Architecture. 3 Credits.
Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. (Fall, Every Year).

ECE 6010. Linear Systems Theory. 3 Credits.
Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. (Fall, Spring, Every Year).

ECE 6015. Stochastic Processes in Engineering. 3 Credits.

ECE 6020. Applied Electromagnetics. 3 Credits.
Review of Maxwell’s equations; electromagnetics of circuits, plane wave propagation; transmission lines; waveguides; radiating systems; receiving antennas and pattern reciprocity, array antennas; electromagnetic properties of materials: conductors, crystals, devices; optical transmission. (Fall, Every Year).

ECE 6025. Signals and Transforms in Engineering. 3 Credits.

ECE 6030. Device Electronics. 3 Credits.
Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. (Spring, Every Year).

ECE 6035. Introduction to Computer Networks. 3 Credits.
ECE 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

ECE 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.
Overview of primary traditional and alternative energy sources and storage. Analysis of machinery employed in energy conversion processes. Effect of independent power producers on long-term and short-term stability of large grids. (Fall, Every Year).

ECE 6065. Colloquium. 0 Credits.
Lectures by outstanding authorities in electrical and computer engineering. Topics to be announced each semester. (Fall and spring).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.
Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6120. High-Performance Processors. 3 Credits.
Processor microarchitecture and instruction-level parallelism. Superpipelines and superscalar processors. Multiple-instruction fetching, aligning, merging, and issuing. Hardware and software solutions to structural and data and control hazards. Branch prediction and static and dynamic speculation. Register renaming, Tomasulo’s algorithm. VLIWs. Prerequisite: ECE 6005.

ECE 6125. Parallel Computer Architecture. 3 Credits.
Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisite: ECE 6005 or ECE 6105.

ECE 6130. Big Data and Cloud Computing. 3 Credits.
Research topics related to big data and cloud computing, including data centers, virtualization, hardware and software architecture; system-level issues on performance, energy efficiency, reliability, scalability, and security. Prerequisite: ECE 6105. (Spring).

ECE 6132. Secure Cloud Computing. 3 Credits.
Security and privacy issues in cloud computing systems; confidentiality, integrity, and availability of data and computations; cloud computing models, threat models, outsourcing, and security issues. Practical applications of secure cloud computing. (Fall, spring, and summer).

ECE 6140. Embedded Systems. 3 Credits.
Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005.

ECE 6213. Design of VLSI Circuits. 3 Credits.
Top-down ASIC/FPGA design methodology; modeling of VLSI circuits using HDL; behavioral, structural, and RTL modeling techniques; logic synthesis techniques; design verification plan and techniques. Students design and verify a final project using state of the art commercial VLSI CAD tools for ASIC and FPGA (Altera). Prerequisite: ECE 6240. (Fall, Every Year).

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.
High-level ASIC-FPGA design methodology. RTL modeling of VLSI circuits, using HDL for synthesis. Detailed discussion of logic synthesis. Architectural tradeoff for large VLSI circuits. Advanced optimization techniques. VLSI design flow, using the state-of-the-art, front-end design entry and simulation tools and back-end logic synthesis. Prerequisite: ECE 6213.

ECE 6215. Introduction to MEMS. 3 Credits.
Introduction to microelectromechanical and nanoelectromechanical systems (MEMS/NEMS). Basic principles of simulating, designing, and fabricating MEMS/NEMS. Prerequisite: ECE 6240. (Spring, Every Year).

ECE 6216. RF/VLSI Circuit Design. 3 Credits.
Introduction to radio frequency systems. RF design, specifications, S-parameters, gain, noise, stability, matching concepts, small signal amplifiers, low noise amplifiers, power amplifiers, system-level design. Students use CAD tools such as ADS and other industrial tools to design class project. Prerequisite: ECE 6240. (Spring, Odd Years).

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.
MOS technology: building blocks, devices, capacitors, limitations. Operational amplifiers and other analog systems. Layout examples and design principles. Mixed-signal A/D and D/A. Students use the CAD VLSI laboratory to design and simulate circuits. Prerequisite: ECE 6240. (Spring, Odd Years).

ECE 6221. Introduction to Physical Electronics. 3 Credits.

ECE 6240. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall, Every Year).
ECE 6245. Micro and Nano Fabrication Technology. 3 Credits.
Introduction to the basic fabrication principles at the micro and nano scale; students practice and fabricate simple devices. Restricted to graduate students. Prerequisites: ECE 2150. (Fall and spring).

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. (Same as ECE 4150) (Spring, Every Year).

ECE 6260. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall, Every Year).

ECE 6500. Information Theory. 3 Credits.
The concepts of source and channel. Measure of information, entropy, mutual information. The noiseless coding theorem. The noisy coding theorem. Channel capacity: symmetric and nonsymmetric channels, Gaussian and binary symmetric channels. Rate-distortion theory. Basics of multiple-user information theory. Prerequisite: ECE 6015.

ECE 6505. Error Control Coding. 3 Credits.
Algebraic coding theory: finite fields, linear block codes, cyclic and Reed- Solomon codes. Error detection using CRC codes. Convolutional codes and trellis-coded modulations: structure, properties, performance bounds. Capacity achieving codes; soft-input-soft-output decoding; computationally efficient decoding algorithms. Prerequisite: ECE 6015.

ECE 6510. Communication Theory I. 3 Credits.
Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015.

ECE 6520. Mobile and Wireless Communication Systems. 3 Credits.

ECE 6525. Satellite Communication Systems. 3 Credits.
Low earth orbit and geostationary satellite systems; transmission systems; RF link budgets; modulation and multiplexing; multiple access techniques, including FDMA, TDMA, and CDMA; satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510. (Fall, odd years).

ECE 6530. Electronic Warfare. 3 Credits.
Electronic attack and protection of information. Countermeasures and counter-countermeasures. Electronic attacks on ranging and tracking radar systems; jamming and jamming defense. Electronic attack on communications systems. Defensive techniques, signal design, spread spectrum. Attack and defense of optical and high-energy systems. Prerequisite: ECE 6510. (Fall and Spring, Every Year).

ECE 6550. Advanced Network Architectures. 3 Credits.

ECE 6555. Networks Protocols. 3 Credits.
Layering, OSI, and Internet architectures. Link-layer protocols: PPP, HDLC, SONET. Cell-switching, ATM, and adaptation protocols. MAC layer protocols: Ethernet, 802.11. IP addressing, routing protocols: RIP, OSPF. Multi-domain routing: CIDR, BGP. End-to-end protocols: UDP, TCP. TCP congestion control. Application layer protocols: DNS, HTTP, SMTP, FTP. Prerequisite: ECE 6035. (Fall and Spring, Every Year).

ECE 6560. Network Performance Analysis. 3 Credits.
Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisite: ECE 6015, ECE 6035. (Fall, Every Year).
ECE 6565. Telecommunications Security. 3 Credits.
Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6570. Telecommunications Security Protocols. 3 Credits.
The OSI security architecture: services and mechanisms, risk analysis. Internet protocol mechanisms. IPv4 and IPv6 security, security associations, authentication, MDS. Encapsulating security payload. E-mail security: PGP, S/MIME, PEM, MSP. Secure voice communications algorithms. Security in Internet commerce: SSL, SET. Prerequisite: ECE 6565.

ECE 6575. Optical Communication Networks. 3 Credits.

ECE 6580. Wireless Networks. 3 Credits.
Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisite: ECE 6015, ECE 6035. (Fall, Every Year).

ECE 6610. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. Prerequisites: ECE 2210, ECE 3315. (Same as ECE 4610) (Spring, Every Year).

ECE 6620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall, Every Year).

ECE 6662. Power Electronics. 3 Credits.
The application of electronics to energy conversion. Principles of operation, analysis, and control of circuits including solid-state electronic switches. Methods of solving power electronic circuits and finding the steady-state values of important quantities. Deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. (Spring, Every Year).

ECE 6666. Power System Transmission, Control, and Security. 3 Credits.
Analysis of AC networks, load flow, economic dispatch, voltage and frequency control. N-1 contingency and its role in assessing and maintaining system integrity. Analysis of loss of critical generating units and transmission capabilities under severe threats. Rapid restoration techniques based on historical data and heuristic approaches. Prerequisite: ECE 6620. (Spring, Odd Years).

ECE 6667. Nuclear Power Generation. 3 Credits.
Review of nuclear reactor engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, and control and regulatory aspects of nuclear power generation. Prerequisites: ECE 6620 or permission of the instructor. (Fall, Even Years).

ECE 6668. Power Distribution Grids. 3 Credits.
Equipment for power distribution for industrial, commercial, and residential applications. Switching and safety at the distribution voltage level. Bulk insulation level and insulation coordination principles. Smart grid innovations. Remote metering. Prerequisites: ECE 4620 or permission of course director. (Fall, Odd Years).

ECE 6669. Smart Power Grids. 3 Credits.
Review of power systems and elements of smart grids; wide-area monitoring (WAMS) and advanced metering infrastructure (AMI); communication and networking architecture (SCADA, Zigbee, PLC, GSM), standards and reliability aspects; state estimation; synchrophasors and their applications; demand response; distributed energy resources (DER) and microgrids; power electronic interface of DER units; switching techniques of inverters; control of DER units; control of microgrids; and electric vehicles. (Fall, Odd Years).

ECE 6670. Power System Protection. 3 Credits.
Main philosophy for protection of power systems. Protection systems and approaches; reliability and security of protection systems; protection of generators, transformers, motors and transmission lines; requirements for distributed source generation (DSG); and requirements for system protection to prevent grid blackouts and enhance power system security. Prerequisite: ECE 6620 or permission of instructor. (Spring, Even Years).

ECE 6679. Nuclear Power Generation. 3 Credits.
Review of nuclear reactor engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, and control and regulatory aspects of nuclear power generation. Prerequisites: ECE 6620 or permission of the instructor. (Fall, Even Years).

ECE 6690. Power Systems Economics. 3 Credits.
Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Prerequisites: ECE 6060 or permission of course director. (Fall).
ECE 6691. Power Systems Reliability. 3 Credits.
Overview of probability theory and basic power market reliability modeling and evaluation; generation supply reliability techniques; reliability of transmission system and delivery of supply; loss of load probability evaluation; forced and maintenance outages; load forecasting and probability of interconnected systems; risk evaluation and operating reserves. Prerequisite: ECE 6620 or permission of the instructor. (Spring, Even Years).

ECE 6699. Energy and Sustainability. 3 Credits.
Energy sources, consumption, and the societal and environmental impacts. Energy generation and harvesting technology. Thermodynamics and efficiency limits. Nanotechnology for sustainability. Emission and pollution. Growth models; learning curves. Life-cycle analysis. Energy in an international perspective: origins, crises, and solutions. Recommended background: Basic understanding of energy and thermodynamics, such as ECE 4620, MAE 2131, or with permission from the course director. (Fall, even years).

ECE 6705. Introduction to Microwave Engineering I. 3 Credits.
Transmission lines, scattering parameters, microwave networks, resonators. Modes in uniform waveguides, general characteristics of waveguide junctions. Transfer representations, filters, couplers, symmetrical waveguide junctions. Prerequisite: ECE 6200.

ECE 6710. Microwave Engineering. 3 Credits.
Transmission line theory, transmission lines and waveguides, waveguide discontinuities, microwave networks, impedance matching and tuning, microwave resonators, power dividers and directional couplers, and microwave filters and active microwave circuits. (Fall, Even Years).

ECE 6715. Antennas. 3 Credits.
Antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays. Polarization. Radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Prerequisites: ECE 6200.)

ECE 6720. Remote Sensing. 3 Credits.
Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. Prerequisite: ECE 6200.

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.
Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principles, dyadic Green’s functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Prerequisite: ECE 6020, ECE 6025.

ECE 6730. Waves in Random Media. 3 Credits.
Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. Prerequisite: ECE 6015, ECE 6725.

ECE 6735. Numerical Electromagnetics. 3 Credits.
Systematic discussion of useful numerical methods in computational electromagnetics, including integral equation techniques and differential equation techniques, both in the frequency and time domains. Hands-on experience with numerical techniques, including the method of moments, finite element and finite-difference time-domain methods, and spectral integral methods. Related numerical issues such as accuracy, stability, and dispersion are discussed. Examples are drawn from various electromagnetic applications such as nanowires, waveguides, and antenna radiation. Prerequisite: ECE 6020. (Fall, Odd Years).

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.

ECE 6750. Introduction to Radar Systems. 3 Credits.

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.
Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, satellite fixed links, macrocells, fading models, micro-cells, picocells, diversity, equalizers. Prerequisite: ECE 6020 or permission of instructor.

ECE 6765. Photonics and Fiber Optics. 3 Credits.

ECE 6770. Applied Magnetism. 3 Credits.
ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.

ECE 6815. Microarchitect/Multimedia Proc. 3 Credits.

ECE 6820. Real Time DSP. 3 Credits.
Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Prerequisite: ECE 6005. Recommended background: Basic knowledge of computer architecture and DSP algorithms; knowledge of C programming language, assembly language and Matlab is desirable. (Fall and Spring, Every Year).

ECE 6825. Computer Control Systems. 3 Credits.
Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multirate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite or concurrent registration: ECE 6010.

ECE 6830. System Optimization. 3 Credits.

ECE 6835. Nonlinear Systems. 3 Credits.

ECE 6840. Digital Image Processing. 3 Credits.

ECE 6842. Image Engineering. 3 Credits.
Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Fall, Even years).

ECE 6845. Image Synthesis. 3 Credits.
Image synthesis techniques, mathematical image models, image reconstruction techniques, color texture synthesis, synthesis of three-dimensional scenes. Prerequisite: ECE 6015.

ECE 6850. Pattern Recognition. 3 Credits.

ECE 6855. Digital Signal Processing. 3 Credits.
Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisites: ECE 3220 or ECE 6025, and ECE 6015.

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.

ECE 6865. Statistical Signal Estimation. 3 Credits.
Minimum variance unbiased estimation. Cramer-Rao bound, statistical modeling, sufficient statistics, maximum likelihood estimation, efficient estimators, and least squares. Bayesian estimators. Wiener and Kalman filters, complex data and parameters. Applications to radar, speech, image, biomedicine, and communications, control. Prerequisites: ECE 6010, ECE 6015, and ECE 6025. (Fall, Even Years).
ECE 6875. Wavelets and Their Applications. 3 Credits.

ECE 6880. Adaptive Signal Processing. 3 Credits.

ECE 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisite: CSCI 6511; ECE 6850.

ECE 6998. Thesis Research. 3 Credits.

ECE 6999. Thesis Research. 3 Credits.

ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.
Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.

ECE 8999. Dissertation Research. 0-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING

Computer engineering combines electronic design, computer architecture, programming of computing systems, computer networks, and applied mathematics. The bachelor of science with a major in computer engineering degree program prepares students in the theory and application of hardware and software design, computer networks, embedded systems, and very large scale integrated (VLSI) circuit design and applications. Students may take electives in advanced topics such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-computer-engineering) for additional information.

Two technical electives 3

1 Course satisfies the university general education requirement in math, science, and writing.

2 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).

3 Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. At least one of the technical electives must be an upper-level math or science course.

### BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING

Electrical engineers design the enabling technology for all applications of electricity; examples include energy, telecommunications, the Internet, biomedical instrumentation, and electromagnetic applications. The bachelor of science with a major in electrical engineering degree program focuses on signal processing; communication theory and practice; voice, data, video and multimedia communication networks; very large scale integrated (VLSI) circuit design and applications; and control and power systems. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

Two technical electives

Humanities or social sciences elective **

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

The Electrical and Computer Engineering electives must be selected from upper level ECE courses. Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

**BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, ENERGY OPTION**

The bachelor of science with a major in electrical engineering, energy option degree program energy option prepares students to work in technical energy fields such as electric utility companies and in research into improved methods of generation, transmission, and distribution of electrical energy.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

1 Course satisfies the university general education requirement in math, science, and writing.

2 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from
either the University General Education Requirement list or the SEAS General Education Requirement list.

3 Technical electives must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

**BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, MEDICAL PREPARATION OPTION**

The bachelor of science with a major in electrical engineering, medical preparation option degree program prepares students for application to medical school. Student also are prepared to work in various health sciences fields, to conduct research toward development of electronic equipment to assist in diagnosing and treating disease, or to continue as a graduate student in engineering with exceptional qualifications for biomedical engineering.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

<td></td>
</tr>
<tr>
<td>ECE 3130</td>
<td>Digital Electronics and Design</td>
<td>*</td>
</tr>
</tbody>
</table>

* These courses have additional prerequisites.

## Master of Science in the Field of Computer Engineering

The master of science in the field of computer engineering degree program provides students with the latest knowledge and skills training to address contemporary advances in computer systems architecture and networking. It also addresses the rapidly growing use of superscalar microprocessors, real-time embedded systems, VLSI and ASIC design modules, digital signal processors, and networked computing platforms. Students learn sophisticated computer architecture and integrated circuit design techniques using industry-standard computer-aided design tools and choose between two areas of focus: computer architecture and high-performance computing or microelectronics and VLSI systems.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/master-science-computer-engineering) for additional information.

## REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 15 credits in required courses and 15 credits in elective courses. Thesis and non-thesis options are available. Students should contact the department concerning these options.

Students select one of the areas of focus leading to the Master of Science degree including computer architecture and high-performance computing, and MEMS, electronics, and photonics.

</tr>
</tbody>
</table>

**Electives**

15 credits in elective courses; normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the graduate degree.
**MASTER OF SCIENCE IN THE FIELD OF ELECTRICAL ENGINEERING**

The master of science in the field of electrical engineering degree program is designed to help students understand and apply the principles of the field to diverse areas such as communications, power and energy, and micro- and nano-electronics. Students may choose from the following five areas of focus: communications and networks; electrical power and energy; applied electromagnetics; electronics, photonics, and MEMS; and signal and image processing, systems, and controls.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/master-science-electrical-engineering) for additional information.

Electives

15 credits in elective courses.*

*Normally, no more than two elective courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the degree.

Additional requirements found on the Department of Electrical and Computer Engineering Master’s Degree requirements (https://www.ece.seas.gwu.edu/masters-program-degree-requirements) webpage.
6 credits of electives

Additional requirements found on the Department of Electrical and Computer Engineering Master’s Degree requirements (https://www.ece.seas.gwu.edu/masters-program-degree-requirements) webpage.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 36 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student’s needs and goals.

Other requirements

- Scholarship requirements—Students must have a minimum GPA of 3.4 at the time of graduation and a minimum grade of B in all courses that count toward the degree.
- Seminar requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement—Students must attend five seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements

DOCTOR OF PHILOSOPHY IN THE FIELD OF ELECTRICAL ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 36 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student’s needs and goals.

Other requirements

- Seminar requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement—Students must attend a minimum of five seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements

GRADUATE CERTIFICATE IN HIGH-PERFORMANCE COMPUTING

The graduate certificate in the field of high-performance computing (HPC) program provides a mechanism for practicing interdisciplinary computational engineers and scientists to acquire up-to-date knowledge in the advances of computer systems, in particular, the rapidly growing use of multicore processors, parallel computers, hardware accelerators, and networked computing platforms in applications. The program is tailored to provide students with necessary knowledge in all aspects of high performance computing including programming, applications, performance, architectures, and systems.
The certificate program may serve as an alternative to a master of science degree program for professionals who may not have the time to commit to a full graduate degree program, but who wish to align their background with the rapid changes in computing technologies and to expand their education beyond the bachelor’s degree. All courses taken as part of this program may be transferred to the Department of Electrical and Computer Engineering’s M.S. and/or Ph.D. programs. While the HPC certificate can be coupled with a graduate degree program, interested students must be admitted to and complete the HPC certificate program separately.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/graduate-certificate-high-performance-computing) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

**Required**

ECE 6105 Introduction to High-Performance Computing

At least one of the following:

ECE 6125 Parallel Computer Architecture
ECE 6130 Grid and Cloud Computing

**Electives**

Six additional credits from the following:

CE 6210 Introduction to Finite Element Analysis
CE 6705 Nonlinear Finite Element Modeling and Simulation
CE 8330 Advanced Finite Element Analysis
CSCI 3571 Introduction to Bioinformatics
CSCI 4572 Computational Biology
CSCI 6421 Distributed and Cluster Computing
ECE 6005 Microcomputer Systems Architecture
ECE 6045 Special Topics
ECE 6050 Research
ECE 6120 High-Performance Processors
ECE 6140 Embedded Systems

Credits taken for the certificate may be used towards a graduate degree, with academic advisor approval.

**ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING**

**Mission Statement**

The mission of the Department of Engineering Management and Systems Engineering is to deliver an integrated program of research, teaching, and public service to the technology community. The department develops creative leadership to bridge dynamic, complex technologies, and societal needs. This includes delivering instruction in the management of technology and in systems engineering, operations research, and allied fields to undergraduate and graduate students who are preparing to assume leadership roles as technology professionals. The department's programs provide an understanding of the managerial role, analysis of the diverse functions of technology-based organizations, and instruction in modern management and mathematical analysis and modeling tools as they apply to formulating and executing decisions in engineering and scientific organizations. In addition, research programs feature the study of the management of technology; fundamental and applied research in systems engineering and operations, with a particularly strong interest in stochastic analysis and system optimization; sponsorship from government, industry, and the technology community; and a strong presence in refereed professional journals and leadership in professional societies.

**UNDERGRADUATE**
Bachelor's programs
- Bachelor of Arts with a major in applied science and technology (p. 667)
- Bachelor of Science with a major in systems engineering (p. 669)

Minor
- Minor in operations research (p. 671)
- Minor in systems engineering (p. 671)

GRADUATE

Master's programs
- Master of Engineering in the field of cybersecurity policy and compliance (online) (p. )
- Master of Science in the field of data analytics (p. 672)
- Master of Science in the field of engineering management (p. 673)
- Master of Science in the field of systems engineering (p. 674)

Doctoral program
- Doctor of Engineering in the field of engineering management (p. 675)
- Doctor of Philosophy in the field of engineering management (p. 676)
- Doctor of Philosophy in the field of systems engineering (p. 676)

CERTIFICATES
- Graduate certificate in emergency management and public health (p. 677)
- Graduate certificate in energy engineering and management (p. 699)
- Graduate certificate in engineering and technology management (p. 677)
- Graduate certificate in enterprise information assurance (p. 678)
- Graduate certificate in environmental and energy systems management (p. 678)
- Graduate certificate in greenhouse gas management (p. 678)
- Graduate certificate in homeland security emergency preparedness and response (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/20/engineering-applied-science/engineering-management-systems-engineering/homeland-security-emergency-preparedness-response-certificate)
- Graduate certificate in systems engineering (p. 679)

FACULTY

Professors J.P. Deason, J.R. van Dorp, T.A. Mazzuchi (Chair), B. Narahari, S. Sarkani

Associate Professors H. Abeledo, J.A. Barbera, M.R. Duffey, J.J. Ryan, J.R. Santos, G.L. Shaw

Assistant Professors D. Broniatowski, R.A. Francis, E. Gralla, E. Shittu, Z. Szajnfarber,

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Applied Sciences (APSC) (p. 1036)
- Engineering Management and Systems Engineering (p. 1196)EMSE (p. 1196))

BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY

The bachelor of arts with a major in applied science and technology is a broad-based, engineering-oriented degree program that includes significant exposure to the liberal arts. It is designed for students who intend to make their careers in fields allied to science and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media.

The program can be enhanced with a second major in either the Columbian College of Arts and Sciences (https://columbian.gwu.edu) or the Elliott School of International Affairs (http://elliott.gwu.edu). A second major in the School of Engineering and Applied Science also is possible.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology) for additional informational.

**Electives**

Students choose electives in specified categories from lists of courses available from the advisor. Allied minor electives are selected, with the approval of the advisor, to form a coherent and meaningful program of 15 credits. Popular selections include biology, communication, computer science, design, economics, engineering, environmental studies, finance, international business, management, mathematics, medical preparation, psychology, statistics, and operations research.
1 Course satisfies the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) in either mathematics or statistics, natural or physical laboratory sciences, or writing.

2 Literacy (7 credits). UW 1020 (a required freshman writing course) and COMM 1040, COMM 1041, or COMM 1042. In addition to UW 1020, the student’s academic program must include two writing-intensive courses to satisfy the GW Writing in the Disciplines (WID) requirement; one such course is CE 4330W.

3 Humanities (6) and Social Sciences (6). two two-course sequences selected from the SEAS menu of electives in the humanities and social sciences.

4 Creative and performing arts (3 credits). One of the following: ENGL 1210; FA 1014, FA 1017, FA 1021, or FA 1041; MUS 1103, MUS 1104, MUS 1107, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1017, TRDA 1025, TRDA 1150, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other choices are possible.

5 Literature (6 credits). One two-course sequence selected from among CHIN 3111 and CHIN 3112; ENGL 1410 and ENGL 1411, ENGL 1510 and ENGL 1511, ENGL 1710 and ENGL 1711, or ENGL 1830 and ENGL 1840; FREN 1111 and FREN 1112; GER 1150 and GER 1151; JAPN 1111 and JAPN 1112; REL 1109 and REL 1110; SLAV 1391 and SLAV 1392; SPAN 3210 and SPAN 3220. Other choices are possible.

6 Unrestricted (or “free”) electives (18 credit). The academic advisor must approve the student’s selection of unrestricted electives. If necessary, unrestricted electives may be used to satisfy prerequisite requirements for the allied minor. Such electives also may be used to convert the allied minor into an official minor or second major. Exercise and sport activities courses may not be used as unrestricted electives.

7 Allied minor (15 credits). The student constructs a coherent program with the assistance of the academic advisor. Popular selections include biology, chemistry, business, communication, design, economics, engineering, environmental studies, finance, international business, management, mathematics, media, medical preparation, physics, psychology, public health, statistics, and operations research. The allied minor may be part of a second major in CCAS, ESIA, or SEAS, part of the concentration in general business, or part of an official minor.

8 See the advisor for details.

BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The bachelor of science with a major in systems engineering degree program provides students with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Systems engineering can be applied in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and transportation. The program emphasizes analytical thinking and fosters communication skills and awareness of the current professional world in order to prepare students for graduate education or productive professional employment.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-science-systems-engineering) for additional information.

**Computing track electives:**

- **Option One**
  - Taken sequentially:
    - CSCI 1111 Introduction to Software Development
    - CSCI 1112 Algorithms and Data Structures
    - CSCI 2113 Software Engineering
    - CSCI 2441W Database Systems and Team Projects

- **Option Two**
  - Taken sequentially:
    - CSCI 1111 Introduction to Software Development
      or CSCI 1121 Introduction to C Programming
      or CSCI 1131 Introduction to Programming with C
    - BADM 2301W Mgt Information Systems Tech
    - ISTM 4120 Business Systems Development
    - ISTM 4121 Database Principles and Applications

1 Course satisfies the university general education requirement in math, science, and writing.

2 Computing track elective requirements may be met with the courses in either option in the list directly above.

3 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); any remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%20%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

4 Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by
taking a six-course sequence leading to a minor from another department of the University. Technical electives are selected with the approval of the student’s academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

Internship requirement—All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15–20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.

Medical preparation option
The bachelor of science with a major in civil engineering, medical preparation option (p. 613) leads to a bachelor’s degree in systems engineering and quantitatively prepares students for medical careers through a program that emphasizes decision modeling. Decision modeling is increasingly applicable to the medical field because of the growing use of computers and information systems in medicine and the interplay of diagnosis, treatment, and economics.

MINOR IN OPERATIONS RESEARCH

REQUIREMENTS
The following requirements must be fulfilled:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>
| Required
Four of the following:
EMSE 2705 Mathematics in Operations Research
EMSE 3701 Operations Research Methods
EMSE 3740 Systems Thinking and Policy Modeling I
EMSE 3760 Discrete Systems Simulation
EMSE 4710 Applied Optimization Modeling
EMSE 4755 Quality Control and Acceptance Sampling

MINOR IN SYSTEMS ENGINEERING

REQUIREMENTS

<table>

</thead>
</table>
| Prerequisites
The following courses must be completed before beginning the minor program:
APSC 3115 Engineering Analysis III
COMM 1040 Public Communication
or COMM 1041 Interpersonal Communication
or COMM 1042 Business and Professional Speaking
MATH 1231 Single-Variable Calculus I
MATH 1232 Single-Variable Calculus II
MATH 2233 Multivariable Calculus
MATH 2184 Linear Algebra I
or EMSE 2705 Mathematics in Operations Research
UW 1020 University Writing

Required
EMSE 2801 Fundamentals of Systems Engineering
EMSE 3815 Requirements Analysis and Elicitation
EMSE 3820 Project Management for Engineering Systems
EMSE 3850 Quantitative Models in Systems Engineering
EMSE 4765 Data Analysis for Engineers and Scientists

Elective
One additional EMSE course selected in consultation with the advisor.

ONLINE MASTER OF ENGINEERING IN THE FIELD OF CYBERSECURITY POLICY AND COMPLIANCE

The online master of engineering in cybersecurity policy and compliance is an interdisciplinary program that draws courses from three areas of study across SEAS: computer
science, electrical and computer engineering, and engineering management and systems engineering. The purpose of the M.Eng.(CPC) degree is to capture the latest trends and issues from the field of cybersecurity to provide students the tools and skills necessary to stay in the forefront of this fast-changing discipline. The program is expected to attract prospective students with technical degrees, as well as those with nontechnical degrees who wish to study the complex issues of cybersecurity policy and compliance.

Please visit the program website (http://onlinecybersecurity.seas.gwu.edu) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

Administered jointly through the Department of Computer Science (http://cs.seas.gwu.edu) and the Department of Engineering Management & Systems Engineering (http://emse.seas.gwu.edu), the program seeks to address the growing demand for professionals skilled in big data and data analytics in government, industry and research organizations. Through courses led by top faculty members at SEAS and the GW School of Business, this program covers topics in computer science, business analytics, and systems engineering while focusing on the foundations of analytics from a technical, engineering perspective.

This program is ideal for those seeking to learn in a small, tight-knit cohort about the engineering foundations that propel the fields of data science and analytics; pursue or enhance careers as data analysts or data scientists; lead interdisciplinary teams; or apply data science and analytics techniques in the decision-making process of a wide range of organizations.

MASTER OF SCIENCE IN THE FIELD OF ENGINEERING MANAGEMENT

The master of science in engineering management is designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors. The program provides graduate education in the most current management techniques for technological and scientific organizations. Students can pursue their degree by selecting electives in one of five areas of focus: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.emse.seas.gwu.edu/master-science-engineering-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses, 12 to 15 credits in a focus area, and 3 to 9 credits in elective courses, depending on which focus area is selected.

**Electives**

Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor’s approval.

**MASTER OF SCIENCE IN THE FIELD OF SYSTEMS ENGINEERING**

The master of science in systems engineering program provides broad knowledge of the systems approach for designing and managing large-scale engineering systems throughout the lifecycle, with faculty and students exploring case studies and methodologies from NASA, the U.S.
Department of Defense, and domestic corporations. Students can pursue the degree by selecting electives in one of two areas of focus: operations research and management science or systems engineering.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs) Visit the department website (http://www.emse.seas.gwu.edu/master-science-systems-engineering) for more information.

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses and 21 credits in a focus area.

**DOCTOR OF ENGINEERING IN THE FIELD OF ENGINEERING MANAGEMENT**

The Doctor of Engineering (D.Eng.) in the field of Engineering Management (EM) is designed for students who seek a practice- or praxis-oriented doctoral degree. Such students typically have professional needs that the traditional Ph.D. degree does not meet. The D.Eng. (EM) focuses on solutions to real-world problems. Unlike the Ph.D., for which fundamental research leads to foundational work that is published and contributes to the basic understanding of a field, the D.Eng. (EM) is applied, not basic research.

In a broad-based program of study, the D.Eng. (EM) course work culminates in the student’s production of a praxis for use by practicing engineers. The D.Eng. (EM) is ideal for individuals doing advanced engineering in the workplace, who want to update their knowledge with cutting-edge techniques from the engineering disciplines, and cap it with a formal degree that recognizes their contributions to the field.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 30 credits in required courses and 15 credits in research culminating in a practice-based case study.

<table>

*Students must complete the praxis proposal examination by preparing and defending their proposal before a committee of at least two full-time SEAS faculty members and one outside advisor external to the faculty.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SYSTEMS ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationtext)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. Students with a BS degree must take a minimum of 78 credits, consisting of 54 credits of graduate coursework and at least 24 credits of dissertation research. The courses to be taken by the student must be approved by the student’s advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ENGINEERING MANAGEMENT

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationtext)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. **Other requirements**

- Qualifying examinations
- Proposal defense
- Final examination
- Post-graduate survey

Student should contact the department for additional information and requirements

**GRADUATE CERTIFICATE IN EMERGENCY MANAGEMENT AND PUBLIC HEALTH**

Offered through the Department of Engineering Management and Systems Engineering (EMSE) (http://www.emse.seas.gwu.edu/graduate-certificates), the graduate certificate in emergency management and public health program helps students define emergencies and disasters as well as develop incident management plans for responding to and managing environmental and public health emergencies. In addition to course work within the department, students take courses at GW’s Milken Institute School of Public Health (http://publichealth.gwu.edu).

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

**Electives**

Two of the following:

- EMSE 6240 Environmental Hazard Management
- EMSE 6300 Homeland Security: The National Challenge
- EMSE 6310 Information Technology in Crisis and Emergency Management
- EMSE 6315 Management of Risk and Vulnerability for Hazards and Terrorism
- EMSE 6320 International Disaster Management
- EMSE 6330 Management of Terrorism Preparedness and Response
- EMSE 6335 Geographic Information Systems for Emergency Management
- EMSE 6345 Disaster Recovery and Organizational Continuity
- EMSE 6350 Hazard Mitigation in Disaster Management
- EMSE 6820 Program and Project Management
- EMSE 6992 Special Topics (as approved by academic advisor)

Appropriate electives from other departments may be permitted with the advisor’s approval.

**GRADUATE CERTIFICATE IN ENGINEERING AND TECHNOLOGY MANAGEMENT**

The graduate certificate program in engineering and technology management helps students understand management theory and practice as it is applied to engineering projects and organizations. The program emphasizes the study of general management issues as well as specific methods in resolving such problems in practice.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://graduate.seas.gwu.edu/engineering-and-technology-management) for additional information.

GRADUATE CERTIFICATE IN ENTERPRISE INFORMATION ASSURANCE
The graduate certificate program in enterprise information assurance is designed to help information security managers understand, manage, and reduce the risk to information assets within technological organizations and enterprises. Course work covers everything from program and project management to techniques in auditing and monitoring system intrusions.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.seas.gwu.edu/enterprise-information-assurance) for additional information.

GRADUATE CERTIFICATE IN GREENHOUSE GAS MANAGEMENT
The graduate certificate in greenhouse gas (GHG) management, which was developed in cooperation with experts at the Greenhouse Gas Management Institute, provides an alternative for professionals who wish to expand their knowledge in the field without committing to the requirements of a master's degree program. The program addresses the engineering, economic, legal, and logistical considerations for implementing GHG management in compliance with existing and planned GHG mitigation. The focus is on managing GHG emissions from energy-related activities in a business setting,
through the measurement, reporting, analysis, reduction, trading, and verification of GHG emissions from these activities.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

**GRADUATE CERTIFICATE IN HOMELAND SECURITY, EMERGENCY PREPAREDNESS, AND RESPONSE**

Students pursuing the graduate certificate in homeland security, emergency preparedness, and response also may apply for the master of science degree in engineering management with a focus area in crisis, emergency, and risk management. Upon acceptance to the master’s program, such students may transfer the 18 credits required for the certificate into the master of science degree program of study.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits, including 3 credits in required courses and 15 credits in elective courses.

Graduate Certificate in Homeland Security, Emergency Preparedness, and Response

**GRADUATE CERTIFICATE IN SYSTEMS ENGINEERING**

The graduate certificate program in systems engineering provides a foundation in the "systems approach" for designing and managing large-scale engineering systems.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits in required courses.

Graduate Certificate in Systems Engineering

**MECHANICAL AND AEROSPACE ENGINEERING**

**Mission Statement**

The mission of the Department of Mechanical and Aerospace Engineering is to educate students to become professional mechanical and aerospace engineers who are confident in their understanding of science and technology and creative in the face of new challenges. Graduates of the program have the analytical skill and thirst for lifelong learning that will expand career horizons. The program prepares students to conduct relevant research at the forefront of mechanical and aerospace engineering knowledge. Students learn through faculty mentoring and go on to practice mechanical engineering as skilled, responsible, and ethical professionals.

**Educational Objectives**

The mechanical engineering program provides an integrated curriculum designed to produce graduates who develop successful careers in mechanical engineering or in science and technology. Graduates will be prepared to accomplish the following objectives within a few years after graduation:

1. Practice mechanical engineering in industry or government, applying knowledge and skills acquired in the program to the design of engineering systems and devices, and the analysis and solution of engineering problems of complex scope; and/or
2. Succeed in advanced education, research and development, or other creative efforts in engineering, science, and technology; and/or
3. Apply engineering skills while pursuing careers in other professions, such as law, medicine, business, or public policy (this objective reflects the program’s patent law and medical preparation options and will apply to a selected group of graduates);
4. Conduct themselves in a responsible and ethical manner, cognizant of the social, environmental, and economic impact of engineering and technology on society;
5. Embark upon a process of lifelong learning in their profession; and
6. Enter into leadership roles in technological development or local, national, or global economic development.

**Student Outcomes**

Students acquire knowledge of the following disciplines:

Chemistry and calculus-based physics with depth in at least:
• Advanced mathematics through multivariate calculus and differential equations; familiarity with statistics and linear algebra;
• Thermal, fluid, and mechanical systems areas.

In addition, students gain the ability to fulfill the following professional responsibilities:

• Understand professional and ethical responsibility;
• Apply knowledge of mathematics, science, and engineering, and familiarity with materials science, electrical circuits, and electromechanical control theory;
• Design and conduct experiments, as well as analyze and interpret data;
• Design a mechanical engineering system, component, or process to meet desired needs within realistic constraints;
• Identify, formulate, and solve engineering problems;
• Use the techniques, skills, and modern engineering tools necessary for engineering practice;
• Use computer systems and knowledge of computer programming;
• Apply computer software used in engineering practice, such as computer-aided engineering packages and mathematical software, to the solution of mechanical engineering problems;
• Apply manufacturing techniques to realize mechanical engineering designs;
• Communicate effectively both orally and graphically;
• Write technical reports in a professional manner; and
• Function on multidisciplinary teams.

The program prepares graduates who have the broad education necessary to practice mechanical engineering, including the following fundamentals:

• An understanding of the impact of engineering solutions in a global, economic, environmental, and societal context;
• Recognition of the need for, and an ability to engage in lifelong learning; and
• Knowledge of contemporary issues.

For more information contact the Department of Mechanical and Aerospace Engineering. (http://www.mae.seas.gwu.edu)

UNDERGRADUATE

Bachelor's programs

• Bachelor of Science with a major in mechanical engineering (p. 688)
• Bachelor of Science with a major in mechanical engineering, aerospace option (p. 689)
• Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 691)
• Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 692)
• Bachelor of Science with a major in mechanical engineering, patent law option (p. 693)
• Bachelor of Science with a major in mechanical engineering, robotics option (p. 695)

Combined program

• Combined Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (p. 696)

Minor

• Minor in mechanical engineering (p. 696)

GRADUATE

Master's program

• Master of Science in the field of mechanical and aerospace engineering (p. 697)

Doctoral program

• Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 698)

CERTIFICATE

• Graduate certificate in energy engineering and management (p. 699)
• Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 699)

FACULTY

Professors E. Balaras, A.D. Cutler, D.S. Dolling, C.A. Garris, S.M. Hsu, M. Keidar, J.D.-Y. Lee, M.W. Plesniak (Chair), K. Sarker, Y.-L. Shen, M. Snyder

Associate Professors L. Barba, T. Lee, Y. Leng, S. Solares, L. Zhang

Assistant Professors P.M. Bardet, S. LeBlanc, M. Leftwich, C. Liang, A.M. Wickenheiser

Assistant Research Professors K. Bulusu

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MAE 1001. Introduction to Mechanical and Aerospace Engineering. 1 Credit.
Careers in mechanical and aerospace engineering and the necessary academic program. Teamwork and problem-solving skills for solution of design problems. Analytical and design problems and correlations between academic skills and the mechanical and aerospace engineering professions. Basic aspects of engineering ethics. (Fall).

MAE 1004. Engineering Drawing and Computer Graphics. 0-3 Credits.
Introduction to technical drawing, including use of instruments, lettering, geometric construction, sketching, orthographic projection, section view, dimensioning, tolerancing, and pictorial drawing. Introduction to computer graphics, including topics covered in manual drawing and computer-aided drafting. (Fall and spring).

MAE 2117. Engineering Computations. 3 Credits.

MAE 2124. Linear Systems Analysis for Robotics. 3 Credits.

MAE 2131. Thermodynamics. 3 Credits.
Fundamentals of equilibrium thermodynamics; Zeroth, First, and Second Laws. Work, heat, internal energy, enthalpy, thermodynamic potential functions; heat transfer mechanisms, phase diagrams, equations of state and property tables, power systems, refrigeration, heat pump systems. Reversible and irreversible processes, Carnot cycle, entropy, exergy. Prerequisite: PHYS 1021.

MAE 2170. History and Impact of the U.S. Patent System. 3 Credits.
Economic systems and emergence of the free market; role of the patent system in the industrial development of the United States; constitutional foundations; evolution of the U.S. patent system; landmark litigation; impact on future innovation; international aspects; the likely future of the patent system.

MAE 3120. Methods of Engineering Experimentation. 0-3 Credits.

MAE 3126. Fluid Mechanics I. 0-3 Credits.
Fluid properties, fluid statics, integral and differential formulations of conservation of mass, momentum, and energy. Bernoulli’s equation. Dimensional analysis and similitude. Inviscid flow. Viscous flow. Experimental and computational methods in fluid mechanics. Prerequisite: APSC 2058. (Fall, Every Year).

MAE 3128. Biomechanics I. 3 Credits.
Mechanical analysis of biological systems. Characterization of living tissue. Applications of statics, solid mechanics, kinematics, and elementary dynamics to the human musculoskeletal system. May be taken for graduate credit with departmental approval. Prerequisites: APSC 2057, CE 2220. (Spring, Every Year).

MAE 3134. Linear System Dynamics. 3 Credits.

MAE 3145. Orbital Mechanics and Spacecraft Dynamics. 3 Credits.
Coordinate systems and transformations, rocket equation, two-body problem, orbit transfers, orbit perturbations, attitude dynamics and stability of symmetric spacecraft, environmental and control torques. Prerequisite: APSC 2058. (Fall).

MAE 3155. Aerodynamics. 3 Credits.
Subsonic and supersonic aerodynamics: potential flow, lift and drag, viscous effects, compressible flow. Prerequisite: MAE 3126.

MAE 3162. Aerospace Structures. 3 Credits.
Basic structural theory of lightweight aerospace structures; analysis of typical monocoque structures; load transfer in stiffened panel structures; virtual work and energy methods of structural analysis, bending of open and closed, thin walled beams, shear and torsion of beams, and structural idealization. Restricted to juniors and seniors; permission of the instructor may be substituted. Prerequisites: APSC 2057 and CE 2220. (Fall, Every Year).
MAE 3166W. Materials Science and Engineering. 3 Credits.
Mechanical properties, plastic deformation dislocation theory, yielding, strengthening mechanisms, microstructure and properties, heat treatment of steel, composites, amorphous materials, viscoelastic deformation, creep, fracture, fatigue, fatigue crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CHEM 1111 and PHYS 1022. (Fall, Every Year).

MAE 3167W. Mechanics of Materials Lab. 1 Credit.
Measurement of strains and study of failure resulting from applied forces in ductile, brittle, anisotropic, elastomeric, plastic, and composite materials. Tension, compression, bending, impact, and shear failures. Prerequisites: MAE 3166W. (Spring).

MAE 3171. Patent Law for Engineers. 3 Credits.
Types of patents; international patents; inventorship; prosecution process; basic references for patents; detailed structure of a patent; patentability requirements; reexamination and reissue; litigation; infringement and invalidity; copyrights, trademarks, and trade dress. May be taken for graduate credit with approval of department.

MAE 3184. Robotics Lab. 1 Credit.
Forward and inverse kinematics modeling of robots, control design, trajectory planning, and force rendering. Corequisite: MAE 3197.

MAE 3187. Heat Transfer. 3 Credits.

MAE 3190. Analysis and Synthesis of Mechanisms. 3 Credits.
Kinematics and dynamics of mechanisms. Displacements, velocities, and accelerations in linkage, cam, and gear systems by analytical, graphical, and computer methods. Synthesis of linkages to meet prescribed performance requirements. Prerequisite: APSC 2058. (Fall).

MAE 3191. Mechanical Design. 3 Credits.
Integration of knowledge of strength of materials in a design context. Stresses and deflections in engineering structures. Theories of failure. Introduction to the design of mechanical components, such as fasteners, shafts, springs. Introduction to the use of computers in mechanical engineering design. Prerequisite: CE 2220, MAE 2117.

MAE 3192. Manufacturing Processes and Systems. 3 Credits.

MAE 3193. Mechanical Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation; design of mechanisms and mechanical systems; safety, reliability, manufacturability, material selections, cost, and integration in design process; finite element analysis of mechanical systems, computer-aided design, and optimization. Prerequisites: MAE 3191. (Spring).

MAE 3195. Computer-Aided Engineering of Mechanical Systems. 3 Credits.
Presentation of the major elements of computer-aided engineering systems: interactive computer graphics, finite element analysis, and design optimization. Consideration of economics, safety, and reliability factors. Prerequisite: MAE 4193; concurrent registration: MAE 3196.

MAE 3196. Computer-Aided Engineering Laboratory. 1 Credit.
Instruction and hands-on applications of computer-aided engineering systems to the design, analysis, and optimization of mechanical engineering components and systems. Concurrent registration: MAE 3195.

MAE 3197. Robotic Systems Design and Applications. 3 Credits.

MAE 4129. Biomechanics II. 3 Credits.
Mechanical analysis of physiological fluid dynamics. Application of fluid flow analysis techniques to cardiovascular, pulmonary, respiratory, and phonatory flows. Introduction to biomedical devices that manipulate physiological flows. May be taken for graduate credit with approval of department. Prerequisite: MAE 3128.

MAE 4149. Thermal Systems Design. 3 Credits.
Completion of a thermal systems design project that requires integration of engineering science, economics, reliability, safety, ethics, professional responsibility, and social considerations. Development and use of design methodology, optimization, feasibility considerations, detailed system descriptions, and presentation of results. Prerequisite: MAE 3187.
MAE 4151. Mechanical Engineering Project. 1 Credit.
Capstone design project. Conceptualization, research, specification of constraints, and preliminary design analysis. Presentations and proposal. Project is continued in MAE 4152W. Prerequisites: MAE 3193. (Fall).

MAE 4152W. Mechanical Engineering Laboratory. 3 Credits.
Project-oriented course. Simulates working environment of professional engineers. Projects are assigned in student's areas of interest; student is expected to design and assemble own experiments. Extensive use of instrumentation and computing facilities. Project proposal, progress reports, final report, and periodic oral presentations required. (Spring).

MAE 4157. Aerodynamics Laboratory. 1 Credit.
Subsonic and supersonic wind tunnel experiments and simulations. Prerequisite: MAE 3155. (Fall).

MAE 4163. Airplane Performance. 3 Credits.
Lift and drag estimation methods. Airplane performance measures, such as range and endurance, turning flight, specific excess power and acceleration, takeoff and landing performance. Longitudinal and lateral-direction static and dynamic stability. Control surface effectiveness. Prerequisites: MAE 3134. (Fall).

MAE 4168. Intro. to Biomaterials. 3 Credits.
Fundamentals of materials science and engineering applied to artificial materials in the human body. Topics include biocompatibility, techniques to minimize corrosion or other degradation of implant materials, and the use of artificial materials in various tissues and organs. Prerequisite: Approval of department. Course not open to MAE students.

MAE 4172. Engineering Design and the Patent System. 3 Credits.
Design experience in group projects involving following precisely the teachings of a licensed patent; or avoiding infringement of a provided patent while offering a competitive alternative; or evaluating a provided patent in light of prior art or by attempting to design a competitive product. May be taken for graduate credit with approval of department. Prerequisite: MAE 3171 and senior status.

MAE 4182. Electromechanical Control System Design. 3 Credits.
Application of control theory to the design of electromechanical systems. Transducers, valves, and other control components. Mathematical models of open- and closed-loop electromechanical systems. Root locus and frequency response methods; application to the synthesis of feedback systems by both manual and computer-aided techniques. Prerequisite: MAE 2117, MAE 3134.

MAE 4183. Controls Lab. 1 Credit.
Modeling, control design, simulation, implementation, tuning, and operation of a control system. Corequisite: MAE 4182.

MAE 4193. Engineering Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation. Design of journal and roller element bearings, fasteners and permanent joints, and springs. Design project incorporating design selection, and optimization. Project presentation using graphical and computer resources. Prerequisite: MAE 3191. (Fall, Every Year).

MAE 4194. Mechatronics Design. 3 Credits.

MAE 4195. Mechatronics Lab. 1 Credit.
Corequisite: MAE 4194.

MAE 4198. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

MAE 4199. Student Design Project. 1-3 Credits.
Special student projects involving extensive design of various mechanical engineering systems. Examples include the solar car, mini-Baja, or other design competitions that typically are national in scope. May be taken for graduate credit by graduate students.

MAE 6194. Mechatronics Design. 3 Credits.
Review of data acquisition and digital signal processing. Mathematical models, design, and applications of sensors and actuators in mechatronic systems. Theory and applications of mechanism design. Microprocessor-based design integration, motor drives, and digital logic/circuits. Case studies and lab experiments. Restricted to graduate students. (Same as MAE 4194) (Spring).

MAE 6195. Mechatronics Lab. 1 Credit.
Designing and building a mechatronic system based around a programmable microcontroller; using sensors and actuators to create devices capable of sensing their surrounding environment and reacting to stimuli from that environment. Restricted to graduate students. (Same as MAE 4195) (Spring).

MAE 6201. Intro to Manufacturing. 3 Credits.

MAE 6203. Adv Experimentation Tech. 3 Credits.
MAE 6204. Tissue Engineering. 3 Credits.

MAE 6207. Theory of Elasticity I. 3 Credits.
Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisite: approval of department. Same as CE 6207.

MAE 6210. Continuum Mechanics. 3 Credits.
Tensor analysis; fundamental concepts of continuum mechanics; kinematics of continuum; derivation of balance laws of mass, linear momentum, angular momentum, energy and entropy; axioms of constitutive theory; formulation of constitutive theories; Onsager’s principle; objectivity; representation theorem for isotropic functions; plasticity, including concepts of internal variables, yield surface, return mapping algorithm. Departmental approval required. (Fall, Every Year).

MAE 6220. Applied Computational Fluid Dynamics. 3 Credits.
Basic principles of fluid dynamics and aerodynamics. Finite difference and finite volume methods. Fluid flow and heat transfer analysis of thermo-fluid mechanical systems. Computational aerodynamics codes. Individual hands-on experience with a commercial CFD code such as FLUENT. Prerequisite: approval of department.

MAE 6221. Fluid Mechanics. 3 Credits.
Continuum, kinematics of fluids; stress and strain rate tensors; fundamental equations of viscous compressible flows. Irrotational flows; sources, sinks, doublets, and vortices. Laminar flow of viscous incompressible fluids; boundary-layer concept. Prerequisite: approval of department.

MAE 6222. Applied Aerodynamics. 3 Credits.
Introduction to practical and computational methods for solving two-dimensional and three-dimensional aerodynamics problems. Linear methods, nonlinear potential methods, coordinate transforms, and boundary-layer methods. Prerequisite: MAE 6221, MAE 6286.

MAE 6223. Turbomachinery. 3 Credits.
Turbine, compressor, and pump types and uses; dimensional analysis of turbomachines; cycle analysis of gas and steam turbines; energy interchange in fluid machinery; design, characteristics, and performance of turbines, compressors, and pumps; comparison of types of turbines, compressors, and pumps. Prerequisite: MAE 6221.

MAE 6224. Viscous Flow. 3 Credits.
Exact solutions of Navier-Stokes equations; the laminar boundary-layer theory. Reynolds stresses and turbulence; internal, boundary-layer, and mixing flows. Applications to heat and mass transfer and to reacting flows. Prerequisite: APSC 6213, MAE 6221.

MAE 6225. Computational Fluid Dynamics. 3 Credits.

MAE 6226. Aero/Hydrodynamics. 3 Credits.
Inviscid flows in two and three dimensions and irrotational flow theory; conformal mapping and applications. Helmholtz theorems and vorticity dynamics. Applications such as airfoil theory, finite wing theory, panel methods, instabilities, free surface flow. Prerequisite: MAE 6221.

MAE 6227. Aeroelasticity. 3 Credits.
Static and dynamic structural deformations; static aeroelasticity (structural deformation, divergence, control effectiveness, and reversal); dynamic aeroelasticity (flutter, response to gusts and turbulence); unsteady aerodynamics for 2-D wings; strip theory for 3-D lifting surfaces; piston and Newtonian-flow theories. Prerequisite: MAE 6221, MAE 6257.

MAE 6228. Compressible Flow. 3 Credits.

MAE 6229. Propulsion. 3 Credits.

MAE 6230. Space Propulsion. 3 Credits.

MAE 6231. Structure and Transformations in Materials. 3 Credits.
Structure of crystals, crystal binding, crystal defects, dislocations, solid solutions, phases, diffusion, phase transformations, deformation twinning, and martensite. Prerequisite: APSC 2130.

MAE 6232. Fracture Mechanics. 3 Credits.
Concepts, history, and recent developments of fracture mechanics. Singularity at the crack tip; solutions around crack tip; stress intensity factors; energy release rate; J-integral; direction of crack extension; Plasticity and slow crack growth; dynamic crack propagation; molecular dynamics simulation of fracture. Prerequisite: approval of department.
MAE 6233. Mechanics of Composite Materials. 3 Credits.

MAE 6234. Composite Materials. 3 Credits.

MAE 6235. Deformation and Failure of Materials. 3 Credits.
Elastic and plastic deformation, yield, dislocation theory, strengthening mechanisms, creep, polymers, fracture, transition temperature, microstructure, fatigue. (Spring, odd years).

MAE 6237. Applied Electrochemistry. 3 Credits.
Charged interfaces, electrochemical cells, corrosion thermodynamics, electrode kinetics, general corrosion, crevice corrosion, pitting, stress-corrosion cracking, corrosion protection, batteries and fuel cells, energy storage. May include current and potential distribution in electrochemical cells and scaling effects in modeling. Prerequisite: approval of department.

MAE 6238. Biomaterials. 3 Credits.
Applications of materials science and engineering to artificial materials in the human body with the objective of detailed understanding of synthetic materials and biopolymers. Biocompatibility and its consequences on tissue-implant interfaces. Design and development of new implant materials, drug delivery systems, and biosensors. Prerequisite: MAE 3166 or MAE 4168.

MAE 6239. Computational Nanoscience. 3 Credits.
Introduction to surface force measurements in nanoscience; continuum contact mechanics in nanoscience research; intermolecular forces, empirical potentials for transition metals; surface forces in liquids; large-scale atomic/molecular massively parallel simulator; force field development from quantum mechanical density-functional theory for organic/metal molecular systems. Prerequisite: approval of department.

MAE 6240. Kinematic Synthesis. 3 Credits.
Techniques for the analysis and synthesis of function, path, and motion generating mechanisms. Methods for the dimensional design of mechanisms. Computer-aided techniques for the optimal design of planar linkages. Review of recent developments and current research. Term project. Prerequisite: MAE 3190.

MAE 6241. Computer Models of Physical and Engineering Systems. 3 Credits.

MAE 6242. Advanced Mechanisms. 3 Credits.
Emphasis on spatial kinematics. Analysis and synthesis of mechanisms. Analytical techniques using matrices, dual numbers, quaternion algebra, finite and instantaneous screws, theory of envelopes. Applications to design of linkages, cams, gears. Use of digital computers in mechanism analysis and design. (Spring, even years).

MAE 6243. Advanced Mechanical Engineering Design. 3 Credits.
Design of mechanical engineering components and systems emphasizing computer-aided engineering (CAE), including interactive computer graphics, finite element analysis, and design optimization. Creation of a complete design on an engineering workstation. Prerequisite: approval of department.

MAE 6244. Computer-Integrated Engineering Design. 3 Credits.
Design of engineering components and systems on engineering workstations using I-DEAS. Interactive computer graphics, finite element analysis, computer-based design optimization, and other relevant computer-based tools. Students apply design concepts in a computer-aided engineering environment to a selected project. Prerequisite: approval of department.

MAE 6245. Robotic Systems. 3 Credits.
Classification, features, and applications of industrial robots. Spatial descriptions and transformations, forward and inverse kinematics. Jacobian matrix, velocities and static forces, manipulator dynamics and controls. Robot actuators, transmissions, sensors, end effectors, and programming. Prerequisite: MAE 4182.

MAE 6246. Electromechanical Control Systems. 3 Credits.
State-space representations of dynamic systems; dynamics of linear systems; controllability and observability; linear observers; compensator design by separation principle; linear-quadratic optimal control; Ricatti equations; random processes; Kalman filter; applications of optimal stochastic control theory to robotics and earthquake engineering. Prerequisite: approval of department.

MAE 6247. Aircraft Design I. 3 Credits.
Conceptual design methods used in response to prescribed mission and performance requirements, alternate configuration concepts. Configuration general arrangement and empennage sizing. Estimation of aircraft size, weight, and balance; lift, thrust and drag; system level tradeoff and sensitivity studies. Prerequisite: Graduate Standing or MAE 4163. (Spring).
MAE 6249. Spacecraft Design. 3 Credits.
Computer-aided design of spacecraft and satellites to meet specific mission requirements. Environment, propulsion, structure, heat transfer, orbital mechanics, control considerations. Use of modern computer codes for design studies. Prerequisite: MAE 3145 or graduate student standing. (Spring, Every Year).

MAE 6251. Computer-Integrated Manufacturing. 3 Credits.

MAE 6252. Projects in Computer-Integrated Design and Manufacturing. 3 Credits.
Applications of the concepts of computer-integrated manufacturing to group projects, culminating in written and oral presentations. Robot programming, vision-guided assembly, force sensing, fixturing, and end-effector design for practical applications. Factory simulation, part scheduling, and NC program-verification algorithms. Prerequisite: MAE 6251.

MAE 6253. Aircraft Structures. 3 Credits.
Statics of thin-walled beams and panels, force interplay between stiffeners and skin in the analysis and design of stiffened thin-walled structures. Strength and stiffness of locally buckled stiffened structures. Design considerations. Critical evaluation of various design procedures. Prerequisite: approval of department.

MAE 6254. Applied Nonlinear Control. 3 Credits.
Dynamic characteristics of nonlinear systems. State stability and input-output stability. Lyapunov stability theory and invariance principle. Nonlinear control systems, including feedback linearization, back-stepping, sliding mode control, and passivity-based design. Applications to robotics, aircraft, and spacecraft control systems. Geometric controls and hybrid systems. Prerequisite: approval of department.

MAE 6255. Plasma Engineering in Aerospace and Nanotechnology. 3 Credits.
Plasma fundamentals, electromagnetic waves in plasma, plasma-wall interactions, modeling and experimental techniques in plasmas, electrical discharge, plasma propulsion, plasma-based nanotechnology. Prerequisite: MAE 3126.

MAE 6257. Theory of Vibration. 3 Credits.
Damped and undamped natural vibration, response of single- and multiple-degrees-of-freedom systems to steady-state and transient excitations, modal analysis, nonproportional damping and complex modes, variation formulation of equations of motion, discretization of structural systems for vibrational analysis. Prerequisite: approval of department.

MAE 6258. Advanced Vibration Analysis and Control. 3 Credits.
Passive and active vibration control of discrete and continuous systems, dynamic vibration absorbers, random vibrations, failure analysis, modal analysis, nonlinear vibrations. Prerequisites: MAE 3134 and MAE 4182 or graduate standing. (Spring).

MAE 6260. Nanomechanics. 3 Credits.
Introduction to crystallography; interatomic potentials; phonon dispersion relations; molecular dynamics simulation; Nose-Hoover thermostat; coarse grained non-equilibrium molecular dynamics; multiple length/time scale theory of multi-physics; microcontinuum field theories; applications to nano materials/structures. Prerequisite: approval of department.

MAE 6261. Air Pollution. 3 Credits.
Introductory course on the generation, monitoring, and control of air pollution. Atmospheric pollutants; current levels and health problems. Combustion chemistry and mixing. Photochemical processes; smog and measurements. Atmospheric dispersion; inversion and acid rain. Prerequisite: approval of department.

MAE 6262. Energy Systems Analysis I. 3 Credits.
Analysis of energy resources and conversion devices. Statistical data analysis, forecasting, I/O, and net energy analyses, mathematical modeling. Prerequisite: approval of department.

MAE 6263. Advances in Energy Engineering. 3 Credits.
Review of thermodynamics, heat transfer, fluid dynamics, and materials technology used in the energy industries. New energy-efficient technologies in transportation and buildings; renewable energy (wind, solar, and biomass). Climate change and sustainability issues, such as carbon capture, cap and trade, carbon sequestration.

MAE 6270. Theoretical Acoustics. 3 Credits.
Basic acoustic theory in stationary and uniformly moving media; waves in infinite space; sound transmission through interfaces; sound radiation from simple solid boundaries, source and dipole fields; propagation in ducts and enclosures; elements of classical absorption of sound. Prerequisite: APSC 6213, MAE 6221.

MAE 6271. Time Series Analysis. 3 Credits.
Harmonic analysis of random signals; auto- and cross-correlations and spectra; coherence; modern techniques for spectral estimation, including fast Fourier transform, maximum entropy, and maximum likelihood; bias and variability; randomly sampled data; digital filtering; applications. Prerequisite: approval of department.

MAE 6274. Dynamics/Cntrl of Spacecraft. 3 Credits.
MAE 6275. Dynamics and Control of Aircraft. 3 Credits.
Derivation of equations of motion, Euler transformations and direction cosines, stability derivatives and linearization of equations of motion, stability of linear systems with application to longitudinal and lateral dynamics, Laplace transform techniques, and frequency-response analysis. Departmental approval required prior to registration. (Fall, even years).

MAE 6276. Mechanics of Space Flight. 3 Credits.
Coordinate and time systems. Newton’s laws; 2-, 3-, and n-body problems, Lagrange points, gravity-assisted trajectories, variation of parameters and orbit perturbations, non-central gravity effects, drag, sun-synchronous, and formation orbits. Numerical applications using MatLab. Prerequisite: approval of department.

MAE 6277. Spacecraft Attitude Control. 3 Credits.

MAE 6280. Thermodynamics. 3 Credits.
Review of First and Second Laws of Thermodynamics and combining the two through exergy; entropy generation minimization and applications. Single phase systems, exergy analyses, multiphase systems, phase diagrams and the corresponding states principle. Prerequisite: approval of department.

MAE 6281. Advanced Thermodynamics. 3 Credits.
Development of classical and quantum statistical mechanics, including Maxwell-Boltzmann distributions and microscopic origins of entropy and other thermodynamic variables. Partition functions and micro- and grand-canonical ensembles; Fermi-Dirac, Bose-Einstein, and intermediate statistics. Einstein and Debye models of solids. Prerequisite: MAE 6280.

MAE 6282. Convective Heat/Mass Transfer. 3 Credits.

MAE 6283. Radiative Heat Transfer. 3 Credits.
Basic concepts of heat transfer by thermal radiation starting from Planck’s equation for blackbody radiation. Realistic engineering problems are addressed, some involving radiative heat transfer with a variety of surfaces, geometries, and enclosures. Radiative heat flow combined with conduction and convection boundaries. Prerequisite: approval of department.

MAE 6284. Combustion. 3 Credits.

MAE 6286. Numerical Solution Techniques in Mechanica land Aerospace Engineering. 3 Credits.
Development of finite difference and finite element techniques for solving elliptic, parabolic, and hyperbolic partial differential equations. Prerequisite: APSC 6213.

MAE 6287. Applied Finite Element Methods. 3 Credits.

MAE 6288. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity. Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Same as CE 8330. Prerequisite: approval of department.

MAE 6290. Special Topics in Materials Science. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include experimental methods in materials science and nondestructive inspection of materials. Prerequisite: approval of department.

MAE 6291. Special Topics in Mechanical Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include tribology, power systems design, solar heating systems, HVAC, and plasticity theory. Prerequisite: approval of department.

MAE 6292. Special Topics in Aerospace Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include environmental noise control, aeroacoustics, hypersonic flow, and flight vehicle aerodynamics. May be repeated for credit. Prerequisite: approval of department.

MAE 6298. Research. 1-6 Credits.
Basic research projects as arranged. May be repeated for credit.
MAE 6998. MS Thesis Research. 3 Credits.
MAE 6999. MS Thesis Research. 3 Credits.
MAE 8350. Advanced Topics in Materials Science. 3 Credits.
Topics such as surface science that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.
MAE 8351. Advanced Topics in Mechanical Engineering. 3 Credits.
Topics such as advanced analytical mechanics, advanced mechanics of continua, and advanced theory of elasticity that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.
MAE 8352. Advanced Topics in Aerospace Engineering. 3 Credits.
Topics such as nonsteady flow, physical gas dynamics, turbulence, and nonlinear wave propagation that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.
MAE 8998. Advanced Reading & Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.
MAE 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The Department of Mechanical and Aerospace Engineering offers the bachelor of science with a major in mechanical engineering degree program to prepare students for work in these fields. The program is accredited by ABET (Accreditation Board for Engineering and Technology).

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

**BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, AEROSPACE OPTION**

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, aerospace option degree program prepares students to work in the aerospace industry or to pursue graduate study in aerospace engineering. It provides a strong foundation in aerodynamics, airplane performance, propulsion, aerospace structures, orbital mechanics, spacecraft dynamics, and aircraft and spacecraft design.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

1 Course satisfies the university general education requirement in math, science, and writing.

2 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

3 Space: In the 5th semester take MAE 3145 and in the 8th semester take MAE 6249 Spacecraft Design. Aero: In the 7th
semester take MAE 4163 Airplane Performance and in the 8th semester take MAE 6247 Aircraft Design I.

4 All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, BIOMECHANICAL OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, biomechanical option degree program prepares students to work in the biomedical industry or to pursue graduate study in biomedical engineering. It provides a strong foundation in human anatomy and physiology, biomechanics, biomaterials, and design of biomedical devices.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, MEDICAL PREPARATION OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, medical preparation option degree program prepares students for application to medical school. Students are prepared to work in research and development or to pursue graduate study in the fields of biomechanics and biotechnology.

1 Course satisfies the university general education requirement in math, science, and writing.

2 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

3 Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information concerning electives.

**BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, PATENT LAW OPTION**

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, patent law option degree program provides a strong foundation in fundamental principles of patent law and the influences of the U.S. patent system on modern engineering design. Students in this option obtain skills and knowledge that can lead to work as a technical specialist in a patent law firm or in the patent department of an industrial employer. The option provides excellent preparation for pursuit of a law degree that may focus on intellectual property law.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, ROBOTICS OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, robotics option degree program prepares students to work in the robotics industry or to pursue graduate study in robotics engineering. It provides a strong foundation in robotic mechanisms design, analysis, and integration; kinematics, dynamics, and control of robots; mechatronics design; sensing, actuation, and measurement; microprocessors for robotic systems; robotic haptics; and topics on artificial intelligence.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

Humanities or social sciences elective ²

Technical elective ³

---

¹ Course satisfies the university general education requirement in math, science, and writing.

² At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

³ All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

**COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF MECHANICAL ENGINEERING**

The combined bachelor of science with a major in mechanical engineering and master of science in the field of mechanical engineering degree program (B.S./M.S.) is offered by the School of Engineering and Applied Science's Department of Mechanical and Aerospace Engineering (http://www.mae.seas.gwu.edu).

**REQUIREMENTS**

**Five-Year BS/MS Degree Program**

The MAE Department offers a five-year dual degree program for the B.S. and M.S. in mechanical engineering. The five-year program differs from the standard B.S. in mechanical engineering in that:
1. In the seventh and eight semesters, three 3-credit courses are taken at the graduate level. Two of these courses must complete the requirements of the four-year Bachelor of Science curriculum as the required courses or technical electives. One of these 3-credit courses is in excess of the requirements of the four-year Bachelor of Science curriculum.

2. In the ninth and tenth semesters, students take eight 3-credit courses at the graduate level. Alternatively, in the ninth and subsequent semesters (probably extending beyond a total of five years) students take a total of five 3-credit courses and a Master's thesis (6 credits).

3. Courses taken as part of items 1 and 2 above must satisfy the requirements of the Master of Science degree and be chosen with approval from their advisor.

Students must have a 3.4 GPA at the end of the sixth semester to be admitted to the program and must satisfy all requirements for graduation with a Bachelor's degree at the end of the eighth semester to continue in it. All requirements for master's degree students are in effect for the graduate portion of the program. Students apply through the normal GW MAE MS application process during the seventh semester.

**MASTER OF SCIENCE IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING**

The master of science in the field of mechanical and aerospace engineering degree program offers a rigorous course of study that helps prepare students for leadership roles in government and industry. Students have the opportunity to work across disciplines in emerging areas of technology. The program is designed to build a solid background on the fundamentals of the related discipline, and at the same time it can be tailored to meet individual needs under the guidance of an academic advisor. Students can tailor their program to meet their interests and goals by choosing from the following focus areas: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences, and energy; industrial engineering; solid mechanics and materials science; and structures and dynamics; and robotics, mechatronics, and controls. Thesis and non-thesis options are available.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.graduate.seas.gwu.edu/programs/mechanical-and-aerospace-engineering/admissions-requirements) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: non-thesis option—33 credits, including the required focus area curriculum; thesis option—30 credits, including the required focus area curriculum and 6 credits in thesis research.

### Aerospace Engineering

**DOCTOR OF PHILOSOPHY IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING**

Offered through the department of mechanical and aerospace engineering, the Ph.D. program in mechanical and aerospace engineering prepares students for leadership careers in academia, industry and government. Students and faculty work together to explore solutions in areas such as robotics, traditional and additive manufacturing, tissue engineering, energy materials and harvesting, plasma-based systems, fluid dynamics and nanotechnology.

Students choose from the following areas of focus:

- Aerospace engineering
- Design of mechanical engineering systems
- Fluid mechanics, thermal sciences, and energy
- Industrial engineering
- Solid mechanics and materials science
- Structures and dynamics
- Robotics, mechatronics, and controls

**REQUIREMENTS**

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext)

Students with an MS degree must take a minimum of 30 credits, of which at least 12 credits are graduate course credits. Students with a BS degree must take a minimum of 54 credits,
of which at least 36 credits are graduate course credits. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Qualifying examinations: All Ph.D. students are required to take the Doctoral Qualifying Examination (DQE) held in the first two weeks of each semester. The goal of the exam is to determine the student's aptitude and ability to do original and independent research at the doctoral level, to assess the student's ability to review previous work from the literature, and to determine the student's ability to understand and apply fundamental concepts in his/her technical area. A written proposal and an oral presentation of the chosen problem are required. All students should take the exam as early as possible after they complete at least 6 credits of core courses and 6 credits of electives, and maintain an average GPA of at least 3.4. The exam should typically be taken no later than the beginning of their 3rd semester.

- Seminar attendance: prior to graduation, doctoral students must complete the Department of Mechanical and Aerospace Engineering (MAE) seminar attendance requirement, whereby the student must attend at least 80 percent of the MAE seminars offered during any two semesters of the student's enrollment. In order for a seminar to count toward the requirement, the student must be present for the duration of the seminar. To track attendance, the student must obtain a certification signature on the MAE Seminar Attendance Form from an MAE faculty member present at the seminar and submit the completed form to the MAE departmental office at the end of the semester. The student may attempt to fulfill this requirement in as many semesters as needed. This requirement is applicable to doctoral students who matriculate during the 2016-2017 academic year or later.

- Dissertation: During the research phase, each doctoral candidate will be required to give a dissertation research proposal presentation to the Dissertation Committee. The student's research progress will be assessed by the committee and appropriate suggestions for continuing research directions will be solicited from the Committee. After consultation with the research advisor, the final Ph.D. defense can be scheduled, typically at least one year after the research proposal.

Student should contact the department for additional information and requirements

GRADUATE CERTIFICATE IN COMPUTER-INTEGRATED DESIGN IN MECHANICAL AND AEROSPACE ENGINEERING

The graduate certificate in computer-integrated design in mechanical and aerospace engineering program offers an alternative to a master of science degree (M.S.) degree program for professionals who wish to expand their education beyond the bachelor's degree but might not have the time to commit to a full graduate degree program. The graduate certificate also may serve as a path towards the M.S. degree as all certificate courses are transferable to an M.S. program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

GRADUATE CERTIFICATE IN ENERGY ENGINEERING AND MANAGEMENT

Offered jointly through the Department of Mechanical and Aerospace Engineering (http://mae.seas.gwu.edu) and the Department of Engineering Management and Systems Engineering (http://emse.seas.gwu.edu), the graduate certificate in energy engineering and management provides a well-rounded education in energy engineering in the technical areas of fluid mechanics, heat transfer, and mathematics, as well as policy oriented education in state-of-the-art renewable energy technologies, energy management, and design for energy efficient tools and buildings. The certificate program is designed to enable graduates to analyze energy consumption patterns and perform energy audits, manage energy generation projects, manage energy utilization and its economic impacts, and analyze energy options to achieve optimal energy efficiency.
Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit program website (https://www.emse.seas.gwu.edu/graduate-certificates) for additional information.

ELLIOTT SCHOOL OF INTERNATIONAL AFFAIRS

Dean  R. E. Brigety II
Associate Deans  J. Brinkerhoff, E. McCord, H. Harrison, L. Stephenson

The Elliott School of International Affairs offers undergraduate and graduate programs to prepare individuals to understand and work in an increasingly globalized world. The historical roots of the Elliott School extend back to the establishment of the School of Comparative Jurisprudence and Diplomacy in 1898. In 1966, the School separated from the School of Government, Business, and International Affairs to become an independent unit, the School of Public and International Affairs. In 1987, the name was changed to the School of International Affairs, and in 1988 the School was renamed in honor of Evelyn E. and Lloyd H. Elliott. Lloyd Elliott was the president of George Washington University from 1965 to 1988.

The Elliott School offers the bachelor of arts degree in international affairs, Asian studies, Latin American and hemispheric studies, and Middle East studies; the master of arts degree in the fields of international affairs, Asian studies, European and Eurasian studies, global communication, international development studies, international science and technology policy, international trade and investment policy, Latin American and hemispheric studies, Middle East studies, and security policy studies; the master of international policy and practice degree for mid-career professionals; and the master of international studies degree for students enrolled in master’s degree programs at international universities with which the Elliott School has a special partnership.

These programs provide advanced academic and professional training in international affairs as preparation for employment in public, private, and nonprofit sectors. Focusing on major historical and contemporary issues in international affairs, the programs are both interdisciplinary and multidisciplinary, combining courses offered through the School with courses offered by other schools and departments of the University.

**REGULATIONS**

- **Undergraduate Degree Requirements** (p. 701)
- **Graduate Degree Requirements** (p. 702)
  - Scholarship Requirements (p. 702)
  - Readmission (p. 703)

**Undergraduate Degree Requirements**

**Academic Standing**

To earn a bachelor’s degree, students must complete 120 credits, meet the University General Education Requirement (p. 38), and have a cumulative grade point average of at least 2.0. Courses in lifestyle, sport, and physical activity do not count toward the degree; some ROTC classes are also excluded. Rules governing Academic Standing are applicable to students enrolled for a full-time program (12 credits or more) during the fall or spring semester.

**Scholarship Performance in the Major**

All courses indicated as requirements for the major, including courses taken to fulfill the third-year language proficiency requirement, must be completed with a minimum grade of C–. If a student receives a grade of D+, D, or D– in any of these courses, the credit will count toward the degree, but the student must either repeat the course or, with approval of the academic advisor, substitute another course; in either case, the student must earn a minimum grade of C–. If the student must repeat the course, credit for the repetition does not count toward the degree, and grades for both the initial course and the repeated course are used to compute the GPA. If the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Office of Academic Advising and Student Services in all matters affecting the program of study, such as changes, substitutions, withdrawals, or transfer of credit from other institutions.

**Incompletes**

Conditions under which the symbol I (Incomplete) may be assigned are described under University Regulations (p. 21). Incomplete course work must be completed within the designated time period agreed upon by the instructor, student, and school, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for continuous enrollment status. When work for the course is completed, the instructor will complete a grade change form and submit it to the Office of the Registrar (https://registrar.gwu.edu). Beginning with the fall 2014 semester, the final grade will replace the symbol of I. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of F, Failure, 0 quality points, and the grade-point average and academic standing recalculated. The I cannot be changed by reregistering for the course at GW or by taking its equivalent elsewhere. In cases of well-documented extenuating circumstances, the instructor and student may jointly petition the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) for additional time in which to complete the work of the course. Such petitions should be submitted within a year of the assignment of the I. Students are not permitted to register for any additional course work if they have more than two Incompletes on their record.
Pass/No Pass Option
A student who has a cumulative grade-point average of 2.5 or better may, with the approval of the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising), take one course per semester and receive a grade of Pass, P, or No Pass, NP, which will be recorded on the student’s transcript but will not be reflected in the cumulative grade average. A student must sign up for such an option at the Office of Academic Advising and Student Services within the first eight weeks of classes. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of the semester. Foreign language courses and required courses in the student’s degree program (except those in which the grade of P or NP is normally assigned) may not be taken on a P/NP basis. Freshmen may not elect to take a course on a P/NP basis. A transfer student may not elect to take a course on a P/NP basis until the second semester of enrollment in the University. No more than six courses in which the grade of P or NP is assigned will apply toward the degree, including courses in which the grade of P or NP is normally given.

Study Abroad
Students are encouraged to study abroad. Those wishing to study abroad must consult their academic advisor and the University’s Office for Study Abroad (http://studyabroad.gwu.edu). A maximum of 34 credits may be transferred in from other institutions’ study abroad programs. Credits for courses taken abroad through GW Study Centers and GW Summer Abroad do not apply to this maximum. Students must secure prior approval from the Office of Academic Advising and Student Services for any plan of study abroad in order for the credit to apply toward the student’s degree requirements. Students must apply to a program from the University’s list of approved study abroad programs. A catalogue or other description of the study abroad program must be presented for consideration together with detailed descriptions of the courses to be taken.

Internships
Internships offer students the opportunity to make practical use of the knowledge they acquire in the classroom. Elliott School undergraduates students who have completed at least 24 credits in-residence, have a cumulative grade-point average of at least 2.5, and have no more than one incomplete on their transcript, are eligible to arrange internships for credit or zero-credit, to a total maximum of 6 credits toward the degree. Academic work in the field of the internship is required. A zero-credit internship, which requires no additional academic work outside of the internship itself, is also available. Internships are available in the private, nonprofit, and public sectors. Students must register for internships (even if for zero-credit) through the Office of Academic Advising and Student Services but are responsible for locating their own internships.

Double Majors
Students who complete the requirements of two majors in the Elliott School (such as international affairs and Asian studies) may graduate with a double major. Consult the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) to officially declare both majors on the appropriate form.

Students in the Elliott School may declare a second major offered by Columbian College of Arts and Sciences (majors in communication, creative writing & English, journalism & mass communication and political communication are excluded), the School of Engineering and Applied Science, the Milken Institute School of Public Health or the School of Business (finance major only). Permission for the second major must be obtained from the appropriate administrative office of the other school.

Students in Columbian College of Arts and Sciences, the School of Engineering and Applied Science, the Milken Institute School of Public Health and the School of Business may declare a second major in the Elliott School. Students wishing to pursue these options must request approval through the Elliott School’s Academic Advising and Student Services. Students must complete all degree requirements for their major in their home school in order to graduate with a second major from the other school.

In all cases, double majors do not result in two degrees. See Double Majors and Double Degrees in the University Regulations (p. 21).

Special Honors
Students who complete a senior thesis or research seminar with a grade of A- or higher, earn a cumulative GPA of 3.7, and complete 60 credit hours in residence at GW will be awarded Special Honors.

Graduate Degree Requirements

Scholarship Requirements
Information on grades and computing the grade-point average is under University Regulations (p. 21). Courses taken to satisfy degree requirements cannot be taken on a CR/NC basis, with the exception of some capstone courses.

Graduate students are required to maintain a minimum cumulative grade-point average of 3.0. A student whose grade-point average falls below 3.0 or who receives a grade of F in a course at any point after completing 9 credits is placed on academic probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. The student’s academic advisor will meet with the program director and/or academic dean to review the student’s record. The student’s account will be put on hold until the student has met with the program director and/or academic dean to discuss the terms
of probation. A student’s program may be restricted by the program director if deemed necessary.

During the probation period, the student’s performance will be monitored to determine suitability for continued study. The Office of Academic Advising and Student Services will inform the program director and/or academic dean if the student is no longer on probation or is eligible for dismissal. Incomplete grades are not allowed during the probation period and are grounds for dismissal. A student who fails to raise the cumulative grade-point average to 3.0 or above by the end of the period of probation or who is subject to probation for a second time at any point during the academic program is eligible for dismissal. If a student is eligible for dismissal, the academic dean in consultation with the program director will decide whether the student is to be dismissed from the Elliott School.

Readmission
A graduate student who has not been continuously enrolled or on approved leave of absence must file an application for readmission the semester before planning to return to school.

General Requirements for Master of Arts Degree Programs
Programs leading to the master of arts degree require a minimum of 40 credits of graduate course work, which includes a capstone project. By the end of the first semester in residence, candidates for the degree are required to submit to the Office of Academic Advising and Student Services for final approval a plan of study that includes fields, supporting course work, and any other required information as endorsed by the program director. Degrees are awarded after the student has completed the required course work, an acceptable capstone project, and satisfied the foreign language requirement (if relevant).

Students with sufficient academic backgrounds may waive a core course with approval of a designated faculty member from the department concerned. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses may be counted toward the master’s degree; registration for graduate credit must be approved at the beginning of the course by the program director, the instructor, and the Office of Academic Advising and Student Services. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate course work may be taken for credit toward a graduate degree. Academic credit counted toward a previous degree may not be counted toward the master’s degree.

All master’s degree candidates must complete degree requirements within five years of their admission to the program. Students who are unable temporarily to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student will be required to register for Leave of Absence each semester.

Students are encouraged, and in some cases required, to take professional skills-based courses (IAFF 6502 Professional Skills I-IAFF 6503 Professional Skills II) and should consult their program guidelines for limits on the number of credits in these courses that can count toward their degree program. The maximum allowed by the Elliott School is 4 credits.

No more than a combined total of 6 graduate credits may be transferred from other accredited institutions or from non-degree status; these may be accepted only under limited conditions of time, grades earned, and relevance to the student’s program. Foreign language course credit is not eligible for transfer.

Foreign Language Requirements
In most degree programs, a candidate for the master of arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, academic credit, and options for fulfilling the language requirement.

Capstone/Thesis Option
Every student must successfully complete a capstone or, with approval of the program director, a thesis near the conclusion of the master’s program. For the capstone, the student must have a 3.0 grade-point average and must have completed or registered for 30 credits. If there is a lapse of time between completion of other course work and the capstone, the student must be continuously enrolled during this period. A student who fails to complete successfully the capstone may repeat it with the permission of the dean. If the student fails a second time, no further opportunity to complete the capstone will be permitted and the degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis, in addition to the capstone, if they qualify by having a minimum 3.5 grade-point average for at least 20 credits of course work in their program and developing a formal thesis proposal approved by their prospective thesis advisor and the program director.

The thesis subject should be selected as early as possible so as to permit effective integration with the student’s course work. A student will not be permitted to register for (IAFF 6998 Thesis-IAFF 6999 Thesis) until the thesis subject has been formally submitted to the Office of Academic Advising. The subject must be approved by the member of the full-time faculty under whom the thesis is to be written, a second
member of the faculty who will serve as a reader, and the student’s program director. The thesis in its final form must have the approval of the thesis director and one other reader. All theses must be submitted electronically by May 1 prior to the student’s final academic year and meet the formatting and other requirements set forth at GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds).

Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

**UNDERGRADUATE**

**Bachelor's programs**
- Bachelor of Arts with a major in Asian studies (p. 709)
- Bachelor of Arts with a major in international affairs (p. 711)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 712)
- Bachelor of Arts with a major in Middle East studies (p. 713)

**Minors**
- Minors (p. 714)

**GRADUATE**

**Master's programs**
- Master of Arts in the field of Asian studies (p. 717)
- Master of Arts in the field of European and Eurasian studies (p. 724)
- Master of Arts in the field of global communication (p. 729)
- Master of Arts in the field of international affairs (p. 734)
- Master of Arts in the field of international development studies (p. 747)
- Master of Arts in the field of international science and technology policy (p. 750)
- Master of Arts in the field of international trade and investment policy (p. 751)
- Master of Arts in the field of Latin American and hemispheric studies (p. 752)
- Master of Arts in the field of Middle East studies (p. 753)
- Master of Arts in the field of security policy studies (p. 754)
- Master of International Policy and Practice (p. 756)
- Master of International Studies (p. 756)

**Combined programs**
- Dual Master of Arts and Master of Public Health (p. 757)
- Joint Master of Arts and Juris Doctor (p. 757)
- Joint Master of Arts and Master of Business Administration (p. 757)

**CERTIFICATES**

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor’s degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

**Graduate certificate programs**
- Graduate certificate in global gender policy (p. 758)
- Graduate certificate in international science and technology policy (p. 758)
- Graduate certificate in nuclear policy (p. 759)

**FACULTY**

**University Professors** M. Barnett, L.A. Etzioni, M. Finnemore, B. Wood

**COURSES**

**Explanation of Course Numbers**

- Courses in the 1000s are primarily introductory undergraduate courses.
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students.
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

**IAFF 1005. Introduction to International Affairs: A Washington Perspective. 4 Credits.**

Open only to first-year students in the Elliott School. An introduction to the study of international affairs, integrating material designed to orient students to the Elliott School, the University, and the city of Washington. Students who have transferred into the Elliott School should take PSC 1003 instead of this course. Credit may not be earned for both IAFF 1005 and PSC 1003.

**IAFF 2040. Basic Topics in International Affairs. 0-3 Credits.**

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Primarily for Elliott School freshmen and sophomores.

**IAFF 2090. Latin America: Problems and Promise. 3 Credits.**

An interdisciplinary course in Latin American studies designed to introduce undergraduates to the diverse, rich, and complex history, politics, economy, culture, and society of Latin America.

**IAFF 2091. East Asia-Past and Present. 3 Credits.**

An interdisciplinary course offering a comprehensive and integrated introduction to the civilizations and present problems of East Asia.

**IAFF 2092. Russia and Eastern Europe: An Introduction. 3 Credits.**

A multidisciplinary introduction to the lands and cultures of the former Soviet Union and Central and Eastern Europe. The main emphasis is on history and politics, with attention also given to economics, trade, geography, military matters, literature, and the media.

**IAFF 2093. Africa: Problems and Prospects. 3 Credits.**

Aspects of the environment, culture, and politics as they affect the present and anticipated future of Africa.

**IAFF 2094. Europe: International and Domestic Interactions. 3 Credits.**

A multidisciplinary view of contemporary Europe, including the E.U. states, other states of Eastern Europe, and Turkey. The widening processes of political, judicial, economic, cultural, and security integration. Prerequisite: IAFF 1005, PSC 1001.

**IAFF 2190. Special Topics. 3 Credits.**

**IAFF 2190W. Special Topics. 3 Credits.**

**IAFF 3155. Spain in the Modern World. 3 Credits.**

**IAFF 3171. U.S. Foreign Policy Summer Program. 3-4 Credits.**

The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues. The program has special admission criteria.

**IAFF 3179. Special Topics in Science and Technology Policy. 0-3 Credits.**

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

**IAFF 3180. Special Topics in Security Policy. 0-3 Credits.**

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

**IAFF 3180W. Spec Topics in Security Policy. 0-3 Credits.**

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.
IAFF 3181. Special Topics in Conflict Resolution. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3182. Special Topics in Foreign Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3183. Special Topics in Development Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3184. Special Topics in Trade and International Economic Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3185. Special Topics in European and Eurasian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186. Special Topics in Asian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186W. Special Topics in Asian Studies. 0-3 Credits.

IAFF 3187. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3188. Special Topics in Middle East Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3189. Special Topics in African Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190. Special Topics in International Affairs. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190W. Special Topics. 0-3 Credits.

IAFF 3192. ESIA Undergraduate Scholars Workshop. 1 Credit.
For Elliott School juniors and seniors who have applied to and been accepted into the ESIA Undergraduate Scholars Program. Students fine-tune their research questions, conduct the bulk of their research, draft abstracts, and outline their papers. See http://elliott.gwu.edu/academics/ugrad/scholars/index.cfm for more information.

IAFF 3193W. ESIA UG Scholars Course. 3 Credits.

IAFF 3195. Internship. 0-3 Credits.
Internships in public, private, and nonprofit organizations concerned with international affairs. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for up to 6 credits with permission.

IAFF 3198. Independent Study and Research. 1-3 Credits.
For juniors and seniors with a minimum grade-point average of 3.0. Students must find a sponsoring faculty member and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for credit with permission of the dean.

IAFF 4191. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only. Restricted to For Elliott School juniors and seniors only.

IAFF 4191W. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only.

IAFF 4199. Senior Thesis. 3 Credits.
For Elliott School seniors only. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services.

IAFF 5700. Special Topics. 3 Credits.
IAFF 6101. IA Cornerstone. 3 Credits.
Political, economic, and social theories of international relations and their applications to practice.

IAFF 6102. Global Gender Policy. 3 Credits.
An interdisciplinary and comparative approach to examination of policies targeted at achieving gender equality and of the costs of policies that are not gender-specific. Topics include poverty reduction, environmental sustainability, social justice, global and personal security, and prevention of and responses to extreme calamities and crises. How global gender policies are rationalized, adopted, implemented, and assessed. Focus on “what works” and why it works; gaps that remain in achieving global gender equality.
IAFF 6106. Nuclear Weapons. 3 Credits.
The technology and politics associated with nuclear weapons. Strategy and deterrence, force planning and operations, and the prospect of nuclear terrorism.

IAFF 6118. Special Topics in International Affairs. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6121. International Development Studies Cornerstone. 3 Credits.
Introduction to the concepts and methods of international development. Open only to M.A. candidates in international development studies.

IAFF 6122. Development Policy and Practice. 3 Credits.
An overview of economic development in developing countries; key challenges of economic growth, poverty alleviation, and development.

IAFF 6136. Gender and Development. 3 Credits.
Theoretical approaches to gender and development and debates over how to promote gender equity and rights across the gender spectrum. Key issues in gender and development and the range of actors who are involved in promoting gender equality. General patterns, lessons with broader applications, and challenges and differences within and between societies.

IAFF 6137. Development Studies Pre-Capstone Workshop. 1 Credit.
Students work in teams to find a suitable client and negotiate a project, with detailed terms of reference and a work plan to be carried out in the spring semester. Open only to M.A. candidates in international development studies.

IAFF 6138. Special Topics in International Development Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6139. International Development Studies Capstone. 3 Credits.
A project-oriented development course abroad, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international development studies.

IAFF 6141. International Science and Technology Policy Cornerstone. 3 Credits.
Introduction to the study of international science and technology policy; focus on policy issues that arise from interactions between scientific and technological developments and government activity.

IAFF 6142. Technology Creation/Diffusion. 3 Credits.
Examination of the relationship between invention (inception), innovation (first application), and dissemination (diffusion) of technological knowledge; focus on the technological environment prevailing in the major developed market economies.

IAFF 6145. U.S. Space Policy. 3 Credits.

IAFF 6146. Space Law. 3 Credits.
The underlying principles of international space law, with emphasis on issues of particular concern as the uses of space increase for exploration, commerce, and security.

IAFF 6148. Special Topics in Space Policy. 3 Credits.
Topic announced in the Schedule of Classes.

IAFF 6151. Environmental Policy. 3 Credits.
Examination of public policies designed to protect the human and physical environment; focus on the ways science and technology can simultaneously create new environmental problems and contribute to their mitigation and prevention.

IAFF 6153. Science, Technology, and National Security. 3 Credits.
The contributions of science and technology to U.S. security in military, intelligence, and homeland security activities.

IAFF 6158. Special Topics in International Science and Technology Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6159. ISTP Capstone Project. 3 Credits.
A seminar designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in science and technology policy.

IAFF 6160. Defense Policy and Program Analysis. 3 Credits.
Examination of how national security policy is formulated and translated into a defense budget, program priorities, and force structure. Focus on nuclear forces.

IAFF 6163. Transnational Security. 3 Credits.
Overview of security concerns that transcend state borders, including terrorism, drug trafficking, organized crime, weapons proliferation, migration, and environmental degradation.

IAFF 6165. Fundamentals of Intelligence. 3 Credits.
The institutional structure of the intelligence community; the intelligence production cycle, including tasking, collection, analysis, covert action, and counterintelligence; and relations between the intelligence and policy communities.

IAFF 6167. DefensePolicy&ProgAnalysis II. 3 Credits.
Analysis of the development of national security policy and analytic techniques to derive a defense program and force structure from it. Special attention to general-purpose forces.

IAFF 6169. Homeland Security. 3 Credits.
The central missions of a homeland security agency: domestic security, emergency preparedness, technology policy, timely intelligence, counterintelligence, and preemptive actions. How the U.S. has dealt historically with internal security matters; contemporary approaches to security problems.
IAFF 6171. Introduction to Conflict Resolution. 3 Credits.
Interstate disputes, contemporary civil wars, complex political emergencies, and other forms of organized violence.

IAFF 6173. Security and Development. 3 Credits.
Consideration of the relationship between security and development reflecting the growing interest from the security field in issues that have traditionally been the purview of development, and vice versa.

IAFF 6186. Special Topics in Security Policy Studies. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6189. Security Policy Studies Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in security policy studies.

IAFF 6198. Special Topics in International Trade and Investment Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6199. International Trade and Investment Policy Capstone. 1 Credit.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international trade and investment policy.

IAFF 6208. Special Topics in Global Communication. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6209. Global Communication Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in global communication.

IAFF 6211. MIPP Practicum. 3 Credits.
For Master of International Policy and Practice degree candidates only.

IAFF 6302. Taiwan: Internal Development and Foreign Policy. 3 Credits.
The social, political, and economic development in Taiwan since World War II; Taiwan's foreign affairs.

IAFF 6305. U.S.-South Asia Relations. 3 Credits.
The nature of challenges and opportunities facing the South Asia region and the U.S. policy response. The rise of India as a global actor; relations between India and Pakistan; political transformation in the countries of the region, including Nepal and Sri Lanka.

IAFF 6308. Intl Relations of South Asia. 3 Credits.

IAFF 6318. Special Topics in Asian Studies. 0-3 Credits.
Topics announced in Schedule of Classes.

IAFF 6321. European and Eurasian Studies Cornerstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6338. Special Topics in European and Eurasian Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6339. European and Eurasian Studies Capstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6341. Latin American and Hemispheric Studies Cornerstone. 3 Credits.
Multidisciplinary foundation course for the Latin American and hemispheric studies program.

IAFF 6342. Drug Trafficking in the Americas. 3 Credits.
A historical, comparative, and contemporary picture of drug trafficking in the Americas and the anti-narcotics policies to combat this trade.

IAFF 6343. Indigenous Social Movements. 3 Credits.

IAFF 6357. Pre-Capstone Workshop. 1 Credit.

IAFF 6358. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6359. Latin American and Hemispheric Studies Capstone. 3 Credits.
A project-oriented course, designed to apply the skills and synthesize the knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Latin American and hemispheric studies.

IAFF 6361. Middle East Studies Cornerstone. 1 Credit.
Multidisciplinary foundation course for the Middle East studies program. Introduction to key issues.

IAFF 6362. Regional Security in Middle East. 3 Credits.
The nature, elements, and future of security in the Middle East region. Various analytical frameworks are examined to consider the interplay of national interests, ideology, and regionalism. Issues in regional security.

IAFF 6363. Political Economy/Middle East. 3 Credits.
Current political economy of the Middle East, including an overview of Islamic economic concepts and political organizations.

IAFF 6364. Religion and Society in the Modern Middle East. 3 Credits.
Comparative overview, both historical and current, of religious and social trends in the Middle East.
IAFF 6378. Special Topics in Middle East Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6379. Middle East Studies Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Middle East studies.

IAFF 6501. Quant Analysis Int’l Aff Prac. 3 Credits.
Overview of quantitative measurement, data summary, statistical inference, and elementary modeling such as linear regression.

IAFF 6502. Professional Skills I. 1 Credit.
Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6503. Professional Skills II. 1 Credit.
Continuation of IAFF 6502. Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6504. Intermediate Conversation. 1 Credit.
Short courses designed to develop professional language skills for international affairs students. Specific languages announced in the Schedule of Classes.

IAFF 6505. Elliott School Seminars. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6515. Graduate Internship in International Affairs. 0 Credits.
Limited to Elliott School M.A. degree candidates. Internship and research paper involving experience at an international organization or with international issues.

IAFF 6516. Independent Study and Research. 1-3 Credits.
Limited to Elliott School M.A. degree candidates. Written permission of instructor required.

IAFF 6517. Independent Study and Research. 1-3 Credits.

IAFF 6521. U.S. Foreign Policy Summer Program. 3-4 Credits.
The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues.

IAFF 6898. Capstone Workshop. 1 Credit.
The first part of a two-semester project that addresses a concrete policy problem or issue in international affairs. In small teams, students refine the policy question of the capstone project, develop a research strategy, select appropriate research methods, and begin research.

IAFF 6899. Capstone Course. 3 Credits.
Completion of the capstone sequence by conduct of the group’s research, completion of the capstone report, and oral presentation of research findings and recommendations. Prerequisites: IAFF 6898.

IAFF 6998. Thesis. 3 Credits.
Open to Elliott School M.A. candidates who have selected the thesis option.

IAFF 6999. Thesis. 3 Credits.
Open to Elliott School M.A. candidates who have selected the thesis option.

UNDERGRADUATE PROGRAMS

Bachelor's programs
• Bachelor of Arts with a major in Asian studies (p. 709)
• Bachelor of Arts with a major in international affairs (p. 711)
• Bachelor of Arts with a major in Latin American and hemispheric studies (p. 712)
• Bachelor of Arts with a major in Middle East studies (p. 713)

Minors
• Minors (p. 714)

BACHELOR OF ARTS WITH A MAJOR IN ASIAN STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years
Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

</table>
UW 1020 University Writing *

One course in mathematics ***

One course in science (lab required) ***

Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***

Third year proficiency in a modern foreign language ***

*These courses satisfy many of the University General Education Requirement (p. 38).

** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School’s school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (p. 38) can be found online.

***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the quantitative reasoning, scientific reasoning, humanities and/or creative arts requirements can be found on the Elliott School Undergraduate Programs website (http://elliott.gwu.edu/undergraduate-programs/supporting-courses).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 701).

A list of designated courses that fulfill major requirements can be found on the Asian Studies major webpage (http://elliott.gwu.edu/asian-studies-major). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Required courses for the major:

IAFF 2091 East Asia-Past and Present

ECON 2151 Economic Development

ECON 2169 Introduction to the Economy of China

ECON 2170 Intro to the Economy of Japan

Three courses from a list of approved history and culture courses

Two approved courses from the following:

PSC 2369 Comparative Politics of South Asia

PSC 2370 Comparative Politics of China and Northeast Asia

PSC 2371 Politics and Foreign Policy of China

PSC 2373 Comparative Politics of Southeast Asia

PSC 2374 Politics and Foreign Policy of Japan

PSC 2377 Comparative Politics of the Middle East

PSC 2377W Comparative Politics of the Middle East

PSC 2379 Politics and Foreign Policy of Israel

PSC 2381 Comparative Politics of Middle and Southern Africa

PSC 2383 Comparative Politics of Latin America

PSC 2439 International Political Economy

PSC 2440 Theories of International Politics

PSC 2442 International Organizations

PSC 2442W International Organizations

PSC 2444 Public International Law

PSC 2446 U.S. Foreign Policy

PSC 2449 International Security Politics

PSC 2449W International Security Politics

PSC 2461 European-Atlantic Relations

PSC 2468 Post-Soviet Foreign Policy

PSC 2475 International Relations of East Asia

GEOG 3165 Geography of South Asia

One course in Asian literature

Three upper-division Asia-related courses selected in consultation with the program director

The program must include a research methods course and a regional foundation course on a region other than the student’s major

Completion of third-year-level language proficiency in an approved Asian language is required
BACHELOR OF ARTS WITH A MAJOR IN INTERNATIONAL AFFAIRS

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IAFF 1005</td>
<td>Introduction to International Affairs: A Washington Perspective</td>
<td></td>
</tr>
<tr>
<td>ECON 1011</td>
<td>Principles of Economics I *</td>
<td></td>
</tr>
<tr>
<td>ECON 1012</td>
<td>Principles of Economics II *</td>
<td></td>
</tr>
<tr>
<td>PSC 1001</td>
<td>Introduction to Comparative Politics *</td>
<td></td>
</tr>
<tr>
<td>HIST 1011</td>
<td>World History, 1500-Present **</td>
<td></td>
</tr>
<tr>
<td>ANTH 1002</td>
<td>Sociocultural Anthropology *</td>
<td></td>
</tr>
<tr>
<td>or GEOG 1001</td>
<td>Introduction to Human Geography</td>
<td></td>
</tr>
<tr>
<td>UW 1020</td>
<td>University Writing *</td>
<td></td>
</tr>
<tr>
<td>One course in mathematics ***</td>
<td></td>
<td></td>
</tr>
<tr>
<td>One course in science (lab required) ***</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Third year proficiency in a modern foreign language ***</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*These courses satisfy many of the University General Education Requirement (p. 38).

** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School’s school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (p. 38) can be found online.

***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the quantitative reasoning, scientific reasoning, humanities and/or creative arts requirements can be found on the Elliott School Undergraduate Programs website (http://elliott.gwu.edu/undergraduate-programs/supporting-courses).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Programs (p. 701).

A list of designated courses that fulfill major requirements is at the International Affairs major webpage (http://elliott.gwu.edu/international-affairs-major/fundamentals). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Requirements for the major:

| ECON 2180 | Survey of International Economics |
| or ECON 2181 | International Trade Theory and Policy |
| ECON 2182 | International Macroeconomic Theory and Policy |

One upper-division course from designated lists for each of the following:

Research methods (from ANTH, ECON, GEOG, IAFF, PSC, PSYC, PUBH, SOC, STAT)

International and comparative politics (from PSC or IAFF)

Historical analysis: U.S. foreign policy (from HIST)

An ANTH or GEOG course

Demonstrate third-year proficiency in an appropriate modern foreign language by course work or examination

Two regional foundational courses covering different regions

15 credits of additional course work in either a functional or regional concentration:

Functional concentrations are international politics; international economics; comparative political, economic, and social systems; international development; contemporary cultures and societies; conflict resolution; security policy; global public health; international environmental studies

Regional concentrations are Africa, Asia, Europe and Eurasia, Latin America, Middle East
BACHELOR OF ARTS WITH A MAJOR IN LATIN AMERICAN AND HEMISPHERIC STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

**MINORS**

Elliott School students may take a minor, such as business, economics, or languages, in other schools of the University.

Students from other schools of the University may take a minor in international affairs in the Elliott School. Contact the Office of Academic Advising (http://elliott.gwu.edu/undergraduate-advising) in the Elliott School.

The minor is 18-21 credits, plus 0-8 credits of foreign language, and consists of the requirements listed below.

**Foreign Language Requirement**

Students must prove first-year proficiency in a modern foreign language by course work or examination (0-8 credits).

A student who thinks they are beyond the first year of a modern foreign language, but cannot demonstrate this by course work at GW, should contact their Elliott School academic advisor (http://elliott.gwu.edu/academics/ugrad/advising/advisors.cfm).

</tr>
<tr>
<td>PSC 2442</td>
<td>International Organizations</td>
</tr>
</tbody>
</table>
International Economics (3 or 6 credits)
Students must complete one or two courses pertaining to the theory of international economics.

ECON 1011 Principles of Economics I
ECON 1012 Principles of Economics II
ECON 2180 Survey of International Economics

- OR -

ECON 2181 International Trade Theory and Policy
AND

ECON 2182 International Macroeconomic Theory and Policy

Regional Foundations (6 credits)
Students must take two courses from the lists below to gain an understanding of two regions of the world outside of the United States. The courses must represent two different regions.

Select two regions:
Africa
ANTH 3708 Anthropology of Africa
GEOG 3164 The Geography of Africa
HIST 3501 Topics: Africa
HIST 3540 West Africa to Independence
IAFF 2093 Africa: Problems and Prospects
IAFF 2190W Special Topics (North Africa and the World)
IAFF 3189 Special Topics in African Studies (Transnational Justice in Africa)
PSC 2381 Comparative Politics of Sub-Saharan Africa
PSC 2482 African International Politics

Latin America
ANTH 3702 Anthropology of Latin America
ECON 2185 Economic History and Problems of Latin America
GEOG 3161 Geography of Latin America
HIST 3701 Topics in Latin American History (Latin America and the World since 1820)
HIST 3711 History of Latin America II
IAFF 2090 Latin America: Problems and Promise
IAFF 2190W Special Topics (Latin American Populism)
IAFF 3187 Special Topics in Latin American and Hemispheric Studies (Political Economy of Latin America)
PSC 2383 Comparative Politics of Latin America
PSC 2484 International Relations of Latin America

Asian
ANTH 3704 Cultures of Southeast Asia
ANTH 3705 Anthropology of East Asia
GEOG 3165 Geography of South Asia
HIST 3601 Topics: Asian History (Modern Asia: 1750 to present)
HIST 3640 History of Southeast Asia
HIST 3840 History of Central Asia
IAFF 2091 East Asia-Past and Present
IAFF 3186 Special Topics in Asian Studies (Development issues in Southeast Asia; History and Politics of South Asia; Politics and Conflict of South Asia)
IAFF 3190 Special Topics in International Affairs (Human Rights and Democracy in Southeast Asia)
PSC 2369 Comparative Politics of South Asia
PSC 2373 Comparative Politics of Southeast Asia
PSC 2475 International Relations of East Asia

Academic advisor approval is required for courses not listed above.

Master's programs

- Master of Arts in the field of Asian studies (p. 717)
- Master of Arts in the field of European and Eurasian studies (p. 724)
- Master of Arts in the field of global communication (p. 729)
- Master of Arts in the field of international affairs (p. 734)
- Master of Arts in the field of international development studies (p. 747)
- Master of Arts in the field of international science and technology policy (p. 750)
- Master of Arts in the field of international trade and investment policy (p. 751)
- Master of Arts in the field of Latin American and hemispheric studies (p. 752)
- Master of Arts in the field of Middle East studies (p. 753)
- Master of Arts in the field of security policy studies (p. 754)
- Master of International Policy and Practice (p. 756)
- Master of International Studies (p. 756)

Combined programs

- Dual Master of Arts and Master of Public Health (p. 757)
- Joint Master of Arts and Juris Doctor (p. 757)
- Joint Master of Arts and Master of Business Administration (p. 757)

MASTER OF ARTS IN THE FIELD OF ASIAN STUDIES

The Elliott School’s Asian Studies degree program trains students to navigate the dynamic environment that is Asia, a continent whose diverse populations drive its changing needs and roles in the global arena. The curriculum prepares students to keep pace with a region on the path to sustained economic development as urban migration and international trade are exploding. Graduates of the program are equipped to address complex diplomatic, economic, security, and cultural issues coupled with an unprecedented rate of growth.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor’s degree in a related field and at least two years of study of an appropriate Asian language

The multidisciplinary program requires 40 credits including:

9 credits in core courses
9 credits in regional specialization

Europe and Eurasia

IAFF 2092 Russia and Eastern Europe: An Introduction
IAFF 2094 Europe: International and Domestic Interactions
HIST 1121 The War of Ideas in European and International History, 1750-Present
HIST 3126 European Integration: A History
HIST 3168 Divided and United Germany Since 1945
HIST 3178 The Making of the Modern Balkans
HIST 3601 Topics: Asian History
PSC 2330 Comparative Politics of Western Europe
PSC 2331 Comparative Politics of Central and Eastern Europe

Middle East

ANTH 3703 Cultures of the Pacific
GEOG 3154 Geography of the Middle East and North Africa
HIST 3801 Topics in Middle Eastern History
HIST 3811 The Middle East in the 20th Century
IAFF 2040 Basic Topics in International Affairs (Middle East: An International Affairs Survey)
IAFF 2190W Special Topics (Arab Politics; Challenges and Change in the Middle East; Politics and Culture in the Middle East)
IAFF 3188 Special Topics in Middle East Studies (Political Islam)
PSC 2377 Comparative Politics of the Middle East
PSC 2478 International Relations of the Middle East

Academic advisor approval is required for courses not listed above.
9 credits in thematic or professional specialization
9 credits in electives
4 credits in capstone course sequence
Foreign language proficiency (http://elliott.gwu.edu/asian-studies/foreign-language)

All Elliott School master’s degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to have serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

As part of the degree requirements, students must select a regional specialization from the following:

- East Asia;
- South Asia; or
- Southeast Asia

Students must select a thematic or professional specialization from the following:

- Thematic specialization includes:
  - History of Modern Asia;
  - Politics and Policy in Asia;
  - International Relations of Asia;
  - Asian Business and Development; or
  - Culture, Art, and Religions of Asia

- Professional specialization includes:
  - Conflict and Conflict Resolution;
  - International Development;
  - International Economics;
  - Political Economy and Business;
  - International Health Policy;
  - International Organization, Diplomacy, and Globalization;
  - International Security Policy
  - Research Methods; or
  - Science, Technology, and International Affairs

Note: Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.

Program Requirements

</thead>
<tbody>
<tr>
<td></td>
<td><strong>9 credits in core courses</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Two of the following:</td>
<td></td>
</tr>
</tbody>
</table>

- HIST 6601 Topics: Asian History
- PSC 6388 Topics in Comparative Politics
- IAFF 6318 Special Topics in Asian Studies (Asian Business and Development)
- One of the following:
  - PSC 6475 International Politics of East Asia
  - IAFF 6318 Special Topics in Asian Studies (International Relations of South Asia)

**9 credits in a regional specialization chosen from one of the regional specializations below**

Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.

**9 credits in a thematic or professional specialization as detailed below**

Courses taken for the thematic specialization cannot overlap with those taken for the required regional specialization.

**9 credits in electives**

Students may use additional credits for foreign language or background coursework or one-credit skills courses. The Elliott School’s skills courses are designed to supplement substantive graduate coursework with practical skills and knowledge that students need to perform effectively in the workplace. A maximum of three one-credit skills courses may be taken in this M.A. program.

**4 credits in capstone course sequence**

- IAFF 6898 Capstone Workshop
- IAFF 6899 Capstone Course

**Foreign Language Proficiency**
Students in the M.A. regional studies programs are required to fulfill their foreign-language requirement by passing a reading and speaking proficiency examination administered by the Elliott School at the currently required level of proficiency. All M.A. regional studies students are required to pass both the reading and speaking parts of the language examination; advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will continue to be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment. Effective immediately, students in all programs (including regional studies) no longer have to wait until the completion of 20 credits to take the proficiency examination. Students will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

### Independent Study

If a core course is not offered during a student’s time at GW, or if a student wishes to study a topic on which no course are offered at GW, that student may confer with the director of Asian Studies regarding the possibility of pursuing an independent study with a member of GW’s faculty.

social diversity to terrorism and separatism. Russia and other members of the Commonwealth of Independent States stand at different points along the path of transition from communism to new political institutions. At the same time, a web of political, economic, security, and societal connections increasingly links the various parts of Europe and Eurasia with one another, as well as with the United States, the Islamic world, China, and other parts of the global community. In view of these dynamic interactions, it is essential to study Europe and Eurasia together.

The European and Eurasian Studies (EES) master of arts degree program at the Elliott School of International Affairs provides an interdisciplinary approach to understanding these important regions. The EES curriculum combines several required courses with a wide variety of additional courses and optional fields that can be selected to suit an individual student's professional goals and intellectual interests. This multifaceted program encompasses academic approaches to European and Eurasian affairs and develops practical analytical skills that are essential in the professional world of international affairs.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://elliott.gwu.edu/european-and-eurasian-studies) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including:

- 3 credits of cornerstone courses
- 3 credits of international economics courses
- 15 credits of core courses
- 9 credits of professional specialization
- 1 credit skills workshop
- 6 credits of electives
- 3 credits of capstone course sequence

Foreign language proficiency (http://elliott.gwu.edu/european-and-eurasian-studies/foreign-language)

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum of a 3.5 GPA and approval from the faculty member whom they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval.

As part of the degree requirements, students must select a professional specialization from the following:

- International Education
- International Health Policy and Programs
- International Organization, Diplomacy and Globalization
- International Security Policy
- Science, Technology and International Affairs

**9 credits of professional specialization**

Three courses selected from one professional specialization field as listed below

Students may design their own field with the approval of the Program Director, or select one of the following fields:

**1 credit skills workshop**

IAFF 6502/6503  Professional Skills I

**6 credits of electives**

**3 credits of capstone course sequence**

IAFF 6339  European and Eurasian Studies Capstone

**Foreign Language Proficiency**

Students in the regional studies M.A. programs are required to be proficient in a modern foreign language that is used in their region of study to receive the degree. They must fulfill this foreign-language requirement by passing both the reading and the speaking proficiency examinations administered by the Elliott School at a level required by the academic program. Advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment and will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

**NOTE:** When a student’s native language is not English, and is not a language used in their region of study (for example a student who is a native speaker of Chinese in the Middle East Studies program), that student must still demonstrate proficiency in a modern language used in their region of study by passing the Elliott School language proficiency examination. Students in the European and Eurasian Studies M.A. program may take any major European language other than English.

Required skills courses cover topics such as developing communication strategies, cross-cultural communication, public speaking, and editing. Students also choose one of twelve specializations to build expertise on a major world region or global issue. In the final year, a capstone course tests students’ ability to address a real-world problem using the skills and knowledge acquired during their course of study. The rigorous academic program prepares students both intellectually and professionally for exciting careers in the public, private, and nonprofit sectors.

**REQUIREMENTS**

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor’s degree in a related field, with introductory macro- and microeconomics and at least two years of a modern foreign language.

The program requires 40 credits including:

- **15 credits in core courses**
- **9 credits in specialization**
- **3 credits in skills courses**
- **9 credits in electives**
- **4 credits in capstone course sequence**
- **Foreign language proficiency**

All Elliott School master’s degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

**Core Courses**

**15 credits in core courses**

- SMPA 6210 Media & Foreign Policy
- SMPA 6241 Research Design
- IAFF 6101 IA Cornerstone
- ECON 6280 Survey of International Economics
- or ECON 6250 Survey of Economic Development

One of the following:

- SMPA 6202 Media Effects, Public Opinion, and Persuasion
- SMPA 6204 Strategic Political Communication

**MASTER OF ARTS IN THE FIELD OF GLOBAL COMMUNICATION**

Offered jointly by GW’s Elliott School of International Affairs and the Columbian College of Arts and Sciences’ School of Media and Public Affairs (http://www.gwu.edu/~smpa) (SMPA), the master of arts in the field of global communication degree program combines the Elliott School’s academic excellence in international affairs with SMPA’s strengths as a school of communication and journalism. The graduate program trains students to understand the complex global information environment; its implications for governance, security, and business; and how to communicate effectively to global audiences.

A core curriculum focuses on communication, international politics, international economics, and research methods.
### Global Issues Specializations

**9 credits in specialization**

Specialization determined in consultation with director within either the global issues specialization or the regional focus specialization, all nine credits must taken in one subtopic; the exception is the international development (see below). The following course lists are meant as suggestions only and are not exhaustive.

### Communication and Information Technology in International Affairs Specialization

**International Economic Affairs Specialization**

**Required**

Nine credits from the following:

- ECON 6250  | Survey of Economic Development                                               |
- ECON 6255  | Economics of Technological Change                                            |
- ECON 6269  | Economy of China I                                                           |
- ECON 6271  | Economy of Japan                                                             |
- ECON 6285  | Economic Development of Latin America                                         |
- ECON 6295  | Special Topics (Economic Analysis of International Trade Law)               |
- ECON 6295  | Special Topics (International Economic Integration)                         |
- ECON 6295  | Special Topics (Industrial and Technology Policy in Developing Countries)   |
- ECON 6295  | Special Topics (Economics of the European Union)                             |
- ECON 6295  | Special Topics (Economics of U.S. Trade Policy)                              |
- ECON 6295  | Special Topics (Economics of U.S. Trade Law)                                |
- ECON 6295  | Special Topics (Emerging Market Financial Crises)                           |
- IAFF 6613  | Special Topics in International Development Studies (U.S. Aid and Trade in the Developing World) |
- IAFF 6631  | Special Topics in Asian Studies (Political Economy of South Asia)           |
- IAFF 6635  | Special Topics in Latin American and Hemispheric Studies (Political Economy of Latin America) |
- IBUS 6601  | International Business Finance                                               |
- IBUS 6602  | Seminar: International Banking                                              |
- IBUS 6603  | External Development Financing                                               |
- IBUS 6606  | Seminar: International Financial Markets                                     |
- IBUS 6604  | New Global Competitive Framework                                             |
- IBUS 6605  | Legal Aspects of International and Multinational Business                   |
- PSC 6639   | International Political Economy                                              |

**3 credits in skills courses**

- IAFF 6652  | Professional Skills I                                                       |
- or IAFF 6653 | Professional Skills II                                                      |

In one of the following topics:

- Cross Cultural Communication
- Developing Communication Strategies
- Formal Briefing
- Introduction to Editing
- Negotiating Skills
- Op-Ed Writing Skills
- Public Speaking
- Writing for International Affairs Professionals

**9 credits in electives**

Courses relating to international affairs or communication, with approval of the program director.

**4 credits in capstone course sequence**

- IAFF 6698  | Capstone Workshop                                                           |
- IAFF 6699  | Capstone Course                                                             |

**Alternative capstone option**

The traditional capstone model specifically designed for Global Communication student is completed over one semester.
through the development of a strategic communication plan for an external client. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option.

**Foreign Language Proficiency**

Completion of the M.A. in Global Communication requires a demonstrated oral and reading proficiency in a modern foreign language (http://elliott.gwu.edu/global-communication/foreign-language).

For more information on areas of specialization in global issues (http://elliott.gwu.edu/global-communication/global-issues) or regional fields (http://elliott.gwu.edu/global-communication/regional-fields), skills courses (http://elliott.gwu.edu/graduate-course-descriptions/professional-skills), or capstone options (http://elliott.gwu.edu/global-communication/capstone) visit the program website (http://elliott.gwu.edu/global-communication).

**MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS**

The Elliott School’s master of arts in the field of international affairs degree program is designed to provide students with a broad understanding of the contemporary issues in international affairs as they develop in-depth knowledge of at least one or more areas of specialization. For their concentration, students may choose from among several fields of global issues or one of the regions of the world. Graduates of the program have pursued exciting careers in diplomacy and public service, business, security, conflict resolution, development, and public health.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-affairs-masters) for additional information.

**REQUIREMENTS**

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor’s degree in a related field, including introductory micro- and macroeconomics and at least two years of undergraduate study of a modern foreign language.

The multidisciplinary program requires 40 credits including:

**9-12 credits in core field**
**12 credits in major field**
**9-12 credits in electives**
**3 credits in skills courses**
**4 credits in capstone course sequence**

**Foreign language proficiency** (http://elliott.gwu.edu/international-affairs-masters/foreign-language)

All Elliott School master’s degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

</table>

**Thesis option**
Three credits of electives may be used to pursue a thesis. To propose a thesis, a student must have a GPA of at least a 3.5 after completing 20 credit hours in the M.A. program. The thesis subject must be approved in advance by a faculty member who has agreed to direct the thesis, a second faculty member who will serve as an additional reader, and the Program Director. Thesis requirements are outlined in full in the Graduate Bulletin. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option.

### International Security Studies Concentration

#### Required

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSC 6349</td>
<td>International Security Politics</td>
<td></td>
</tr>
</tbody>
</table>

#### Electives

9 credits from the following:

Courses are grouped into issues areas to help guide students in choosing appropriate coursework; students do not necessarily need to select one concentration, however, what is important is that there is a logic and believable narrative to their course choices. Students should consult their major field faculty advisor to help with this determination.

Transnational Security Issues

<table>

IAFF 6378  Special Topics in Middle East Studies (U.S. Policy in the Gulf)

*Students should consult the Elliott School Academic Advising & Student Services office before enrolling in Law School courses

**Law School course – Students may, with permission of their advisor, include courses in the GW Law School (http://www.law.gwu.edu) in their major field. Enrolling in a Law School course also requires permission of the Law School dean of students. Students should consult the Elliott School Academic Advising & Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in Law School courses.

**Language Proficiency**

Students must demonstrate proficiency in a modern foreign language (http://elliott.gwu.edu/international-affairs-masters/foreign-language). The ability to communicate across cultures in more than one language is both a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Affairs requires a demonstrated oral and reading proficiency in a modern foreign language.

Additional information available on the program website (http://elliott.gwu.edu/international-affairs-masters).

**MASTER OF ARTS IN THE FIELD OF INTERNATIONAL DEVELOPMENT STUDIES**

The master of arts in the field of international development studies (IDS) degree program prepare students for professional careers in the field of international development through interdisciplinary course work that includes the study of economics, research methods, policy analysis, and management. Students focus their studies by creating their own area of specialization in coordination with their faculty mentor.

The IDS program culminates in a capstone project where students work on a real-world consulting experience with a development organization. In past years, capstone projects have addressed a broad range of topics, including private sector development, rural education, microfinance, HIV/AIDS, environmental conservation, gender-based violence, municipal planning, and many others. Teams have pursued these projects and conducted fieldwork in Africa, Asia, Latin America, and Eastern Europe. Previous capstone reports can be found on the program’s capstone website (http://elliott.gwu.edu/international-development-studies/capstone-reports).

In addition to their regular course work, most graduate students in the IDS program are employed full- or part-time in a job or internship directly related to their studies.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://elliott.gwu.edu/international-development-studies) for additional information.

**REQUIREMENTS**

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor’s degree including introductory microeconomics, a course in statistics, and at least two years of study of a modern foreign language.

The multidisciplinary program requires 40 credits including:

**10 credits in core courses**

**12 credits in analytical courses**

**18 credits in an area of specialization**

Foreign language proficiency (http://elliott.gwu.edu/international-development-studies/foreign-language)

The following requirements must be fulfilled:

**International Development Studies**

**Area of Specialization (18 credits):**

18 credits from a self-designed area of specialization, developed in coordination with a faculty advisor

**Language Proficiency**

Students must demonstrate proficiency in a modern foreign language (http://elliott.gwu.edu/international-development-studies/foreign-language). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international development professional. For that reason, completion of the M.A. in International Development Studies requires demonstrated oral and reading proficiency in a modern foreign language.
Professional Skills Courses
The Elliott School offers a series of one-credit workshops (http://elliott.gwu.edu/graduate-course-descriptions/professional-skills) on a variety of topics and students are encouraged to explore the possibility of taking up to three of these. Offered throughout the academic year, the skills covered provide students with practical skills and knowledge they will need to perform effectively in a variety of work settings.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of international competitiveness and account for the bulk of national growth and the improvement of the quality of life around the world. The ability to create, adapt, and adopt new technologies defines modern societies. In today’s global environment, the need for innovation is essential for solving societal problems and staying ahead of competition. Institutions that set science and technology policy govern and shape developments in information technology, space exploration, and genetic modification, as well as advances in material science.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://elliott.gwu.edu/international-science-and-technology-policy) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor’s degree in a social, life, or physical science, or in engineering

Elective field (9 credits):

9 credit hours selected to complement the background and interests of the individual student

Courses composing the elective field may be offered through a different Elliott School program, a department in another college within the University, or a combination of the two.

Up to 3 credits may be taken as skills courses (IAFF 6502 and IAFF 6503)

For more information visit the program website (http://elliott.gwu.edu/international-science-and-technology-policy).

**MASTER OF ARTS IN THE FIELD OF INTERNATIONAL TRADE AND INVESTMENT POLICY**

The master of arts (M.A.) in international trade and investment policy (ITIP) degree program trains students in critical areas of the economics, politics, and history of international trade as well as econometrics. The program provides additional specialized training in international economics or international business. Course work in these fields focuses on U.S. trade policy, the effects of international trade on developing countries, emerging market financial crises, and managing firms in developing countries. The program culminates in a one-semester capstone project (http://elliott.gwu.edu/international-trade-and-investment-policy/capstone) in which students work in small teams on a contemporary policy problem.

The faculty conducts research on international trade, finance, and macroeconomic issues, as well as the politics and history of international economics. These scholars and practitioners bring to the classroom intimate knowledge of international economic affairs garnered from their work as consultants and advisors at renowned financial, trade, policymaking, and government institutions.

**REQUIREMENTS**

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor’s degree including one semester each of introductory micro- and macroeconomic principles and at least two years of a modern foreign language. Applicants are strongly advised to take an introductory statistics course and an intermediate micro- and macroeconomics sequence before beginning the program.

The following requirements must be fulfilled:

**Core field (12 credits):**

**Major field (12 credits):**

At least four (4) courses from one of the following areas of study:

- Development Economics
- Finance
- International Business
- International Economic Policy Analysis

**Elective course work (15 credits):**

In accounting and finance, economic analysis, history and political science courses focused on a region, foreign language study (up to 6 credits) or special one-credit skills courses (up to 3 credits)

**Capstone course (1 credit):**
IAFF 6199  International Trade and Investment Policy Capstone

A language proficiency requirement (http://elliott.gwu.edu/international-trade-and-investment-policy/foreign-language) in a modern foreign language. The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Trade and Investment Policy requires a demonstrated oral and reading proficiency in a modern foreign language.

Students must have completed intermediate micro- and macroeconomics (http://elliott.gwu.edu/international-trade-and-investment-policy/economic-theory) theory courses prior to receiving the International Trade and Investment Policy degree.

For more information including major fields (http://elliott.gwu.edu/international-trade-investment-policy/major-field), visit the program website (http://elliott.gwu.edu/international-trade-investment-policy).

MASTER OF ARTS IN THE FIELD OF LATIN AMERICAN AND HEMISPHERIC STUDIES

The master of arts in Latin American and hemispheric studies (LAHS) degree program offers an interdisciplinary program designed to provide a broad and deep knowledge of context and place based on sound theory and practice. The program prepares students to develop innovative approaches to the enduring problems and emerging challenges of the hemisphere. This training will allow graduates to grapple with an often contradictory blend of political and economic successes and failures throughout the region.

The internationally recognized faculty, drawn primarily from the Washington, D.C. policy community, provides an insider’s perspective on key institutions and policies. The program coordinates a series of events that brings leading policymakers from Washington and the world over to engage with students and faculty on issues facing the hemisphere.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor’s degree with background course work related to Latin America and at least two years of study of Spanish or another relevant hemispheric language.

The following requirements must be fulfilled:

Interdisciplinary cornerstone (3 credits):

IAFF 6341  Latin American and Hemispheric Studies Cornerstone

Core Field (9 credits):

Three of the following:

ANTH 6702  Issues in Latin American Anthropology
Or another 6000-level anthropology course approved by the advisor
ECON 6285  Economic Development of Latin America
GEOG 6261  Geographical Perspectives on Latin America
GEOG 6293  Special Topics (Migration and Development)
IAFF 6342  Drug Trafficking in the Americas
IAFF 6358  Special Topics in Latin American and Hemispheric Studies (Indigenous Social Movements)
HIST 6701  Topics in Latin American History
PSC 6383  Comparative Politics of Latin America
PSC 6484  International Relations of Latin America
Any Spanish course numbered in the 3400s, 3500s, 4400s, or 4500s that focuses on the literature of Latin America

Specialized fields (12 credits):

At least two courses in two of the following fields:

Anthropology
Art History, Literature, and Culture
Economic Development
Geography
Global Public Health
History
International Business
Migration
Political Science
Security
Sociology
Courses taken in the Core Field may not be double-counted in a specialized field. Students must receive permission from the Program Director to apply other courses towards a field.

Electives (12 credits):

Approved in advance by the Program Director. May include up to six credits of language course work in Spanish (other foreign languages spoken in Latin America will be considered on a case-by-case basis). They may also include up to 4 credits of one-credit skills courses. Additional courses may also be taken from any of the specialized fields, or in other areas or disciplines where such course would contribute to the student's professional knowledge and development.

Interdisciplinary capstone (4 credits):

IAFF 6359 Latin American and Hemispheric Studies Capstone (1 credit fall, 3 credits spring)

A language proficiency requirement (http://elliott.gwu.edu/latin-american-studies/foreign-language). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in Latin American Studies requires a demonstrated oral and reading proficiency in Spanish or Portuguese.

A graduate-level research methods course applicable to the student’s area of specialization. We strongly encourage this course be taken within the first three semesters to help prepare students for their capstone in their fourth and final semester.

All Elliott School master’s degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

For more information including the specialized field course (http://elliott.gwu.edu/latin-american-studies/specialized-fields) list visit the program website (http://elliott.gwu.edu/latin-american-studies).

MASTER OF ARTS IN THE FIELD OF MIDDLE EAST STUDIES

The master of arts in Middle East studies degree program combines a rigorous academic foundation with a strong professional orientation. Bridging the theory and practice of international affairs, the program prepares students for careers in government, the private sector, and international and nongovernmental organizations.

The curriculum includes a range of courses covering the history, politics, economics, international relations, and cultures of the societies and nations of the Middle East. In consultation with the program director, each student will develop a program of study that, through a set of core courses, combines a broad overview of the region along with a more specialized field based on the student’s specific academic and career interests. In addition, completion of the program requires demonstrated oral and reading proficiency in a language of the Middle East region.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor’s degree in a related field with at least two years of study of an appropriate language of the region

The following requirements must be fulfilled:

Cornerstone (1 credit):

IAFF 6361 Middle East Studies Cornerstone

Core Courses (12 credits):

Choose four of the following:

PSC 6377 Comparative Politics of the Middle East
PSC 6478 International Relations of the Middle East
IAFF 6363 Political Economy/Middle East
IAFF 6364 Religion and Society in the Modern Middle East
HIST 6001 Special Topics (History of Modern Middle East)
or HIST 6801 Topics in Middle Eastern History
ANTH 6707 Issues in Middle East Anthropology
GEOG 6262 Geographical Perspectives on the Middle East

Professional specialization field (12 credits):

Available fields include:

Conflict and Conflict Resolution
Global Health
International Affairs and Development
International Business
International Economic Affairs
International Law and Organizations
International Security Studies
Management
Technology Policy and International Affairs
U.S. Foreign Policy

**Middle East electives (9 credits):**

Three courses related to the Middle East, selected in consultation with the program director. At least three (3) credits must have a language or humanities aspect. May include only three (3) credits of language study, which must be an advanced, content-based course.

**Capstone (3 credits):**

IAFF 6379 Middle East Studies Capstone

**Skills courses (3 credits):**

IAFF 6502 Professional Skills I
or IAFF 6503 Professional Skills II

**Foreign Language Proficiency**

Students must pass a proficiency examination in a major modern Middle Eastern language. No substitutions are permitted.

- Arabic [Modern Standard Arabic] (taught at GW)
- Persian
- Hebrew (taught at GW)
- Kurdish, or
- Turkish

For more information on professional specializations (https://elliott.gwu.edu/middle-east-studies/professional-specialization), Middle East electives (http://elliott.gwu.edu/middle-east-studies/electives), or foreign language proficiency (http://elliott.gwu.edu/academics/grad/mes/language.cfm) visit the program website (http://elliott.gwu.edu/middle-east-studies).

**MASTER OF ARTS IN THE FIELD OF SECURITY POLICY STUDIES**

The master of arts in the field of security policy studies (SPS) degree program is policy-oriented, focusing on international security issues, with a particular emphasis on the security challenges for the 21st century and how to respond to them. These challenges include, but are not limited to, weapons of mass destruction proliferation, transnational threats, terrorism, changing regional power dynamics, weak and failing states, international crime, effectively linking security and development, and ensuring U.S. national security.

The curriculum provides a strong grounding in the national security and defense policy making process. Students choose two specific concentrations, which can range from transnational security issues to conflict resolution to defense analysis. Students also have the option of emphasizing a particular region, such as East Asia, the Middle East, or Latin America, by selecting a regional field as one of their two concentrations.

**REQUIREMENTS**

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor’s degree with coursework in international affairs or other relevant social sciences, including introductory micro- and macroeconomic principles; study of a modern foreign language is preferred.

The following requirements must be fulfilled: 12 credits in required courses, 9 credits in each of two specialized fields, a 3-credit tool requirement, and 4 credits in a capstone sequence.

**Required**

<table>

MASTER OF INTERNATIONAL POLICY AND PRACTICE

The Elliott School’s master of international policy and practice (MIPP) degree program helps international mid-career professionals develop highly marketable analytical and management skills to formulate and advocate policies on key international issues and to negotiate and work effectively in cross-cultural settings. The program also enhances knowledge of international economic, political, and social trends.

The interdisciplinary curriculum combines three core courses with a wide variety of course options that cover relevant national and international policies and provides insight into a wide range of international issues. Courses are selected to suit the student’s professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://elliott.gwu.edu/international-policy-and-practice) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

The following requirements must be fulfilled: 27 credits, including 9 credits in required courses and 18 credits in elective courses.

Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses do not count toward the master’s degree. Students who do not have prior coursework should consult with the Program Director on available options.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

</thead>
<tbody>
<tr>
<td>IAFF 6211</td>
<td>MIPP Leadership Practicum</td>
<td></td>
</tr>
</tbody>
</table>

One of the following foundational courses in international policy, which should support the student’s interdisciplinary concentration:

- IAFF 6101 IA Cornerstone *
- IAFF 6102 Global Gender Policy
- IAFF 6122 Development Policy and Practice
- IAFF 6141 International Science and Technology Policy Cornerstone
- IAFF 6171 Introduction to Conflict Resolution
- PSC 6349 International Security Politics
- PSC 6439 International Political Economy *
- PPPA 6057 International Development Administration

**Electives**

18 credits in elective courses selected based on the individual student’s needs in consultation with an advisor and the Program Director. These may include up to 3 credits in 1-credit skills-based workshops.

*Added after publication of the 2016-17 Bulletin.

Students must complete degree requirements within three years of their admission to the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the three-year period may be granted in exceptional circumstances, but the student will be required to register and pay for Continuous Enrollment.

No transfer credit is accepted into the MIPP program. No more than 6 credits of graduate coursework taken at GW before matriculation in the program, while in degree or nondegree status, including courses taken in the Elliott School, may be included in the MIPP program.

Visit the MIPP program page (http://elliott.gwu.edu/international-policy-and-practice) for additional information, including a complete list of elective courses (http://elliott.gwu.edu/international-policy-and-practice/electives).

MASTER OF INTERNATIONAL STUDIES

The Master of International Studies is a special program open only to students who have completed or are currently enrolled in an approved master’s degree program at one of the Elliott School’s international partner schools. Master of International Studies students take core courses in economics, history, and political science, plus three courses in an elective field designed with the approval of the program director and a
capstone course. All students must meet the Elliott School language requirement.

Visit the program website (https://elliott.gwu.edu/international-studies-masters) for additional information.

DUAL MASTER OF ARTS AND MASTER OF PUBLIC HEALTH

The Elliott School of International Affairs cooperates with the Milken Institute School of Public Health in offering a dual degree program leading toward the Master of Arts and the Master of Public Health in global health. The dual degree program is offered in all Elliott School fields. The student must be accepted for admission by both the Elliott School and the Milken Institute School of Public Health. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the dual degree program after they have begun either program.

As part of this program, the Elliott School accepts up to 12 credit hours of course work from the Milken Institute School of Public Health in fulfillment of its degree requirements. The program takes approximately three years of full-time study for completion. Dual degree students may complete the requirements for each degree and receive a diploma for each degree after applying for graduation from each school separately. However, all work on each degree must be completed within five years from the student's entry into that program, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND JURIS DOCTOR

The Elliott School of International Affairs cooperates with the Law School in offering a program of study leading to the degrees of Master of Arts and Juris Doctor. A student must be accepted for admission by both the Elliott School and the Law School. Applications should be made separately to each school, with a notice of interest in the combined program. The Law School stipulates that the first year of course work for the Juris Doctor degree must be taken as a unit; students should consult with the Law School’s Associate Dean for Student Affairs.

As part of this program, each school accepts up to 12 credit hours of course work from the other school in fulfillment of its degree requirements. The Elliott School M.A. portion of the program may not include a thesis. The joint program takes approximately four years of full-time study for completion. Joint degree students must meet all requirements for both programs and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in five years, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND MASTER OF BUSINESS ADMINISTRATION

The Elliott School of International Affairs cooperates with the School of Business in offering a program of study leading to the degrees of master of arts (M.A.) and master of business administration (M.B.A.) with a field of study in international business. The joint degree program is offered in all Elliott School M.A. fields (https://elliott.gwu.edu/graduate-programs), and the M.B.A. is taken with a focus on international business (http://business.gwu.edu/programs/masters-of-business-administration). The student must be accepted for admission by both the Elliott School and the School of Business. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the joint degree program after they have begun either program.

As part of this program, each school accepts up to 12 credits of course work from the other school in fulfillment of its degree requirements. The joint program takes approximately three years of full-time study for completion. Joint degree students must meet all requirements for each program and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in six years, unless an extension of time is granted by the respective deans.

CERTIFICATE PROGRAMS

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor’s degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

Graduate certificate programs

- Graduate certificate in global gender policy (p. 758)
• Graduate certificate in international science and technology policy (p. 758)
• Graduate certificate in nuclear policy (p. 759)

**GRADUATE CERTIFICATE IN GLOBAL GENDER POLICY**

**REQUIREMENTS**

The following requirements must be fulfilled: 15 credits, including 6 credits in required courses and 9 credits in elective courses.

Students may substitute other GW and consortium courses with the approval of the advisor.

No more than four skills courses can be applied to a graduate certificate.

*Visit the program website (http://elliott.gwu.edu/graduate-certificates/global-gender-policy) for list of eligible professional skills courses and for additional program information.

**Can only be used as an elective course if not selected as part of core requirement.

**GRADUATE CERTIFICATE IN INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY**

The graduate certificate in international science and technology policy allows students to understand the role of science and technology in policy-making and how governmental policies, laws, and regulations influence science and technology production from an international perspective. The program is designed for graduate students in related fields or professionals in government, industry, and nonprofits who wish to develop a background in science and technology policy. Students develop basic analytical skills as well as focus on a particular theme, including technology innovation, internet policy, space policy, energy policy, and environmental policy.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/graduate-certificates/international-science-technology-policy) for additional information.
REQUIREMENTS
The following requirements must be fulfilled: a minimum of 15 credits, including one 3-credit required course and 12 credits in elective courses.

*Other relevant courses under the listing IAFF 6158 may be offered in particular years. Consult the Center for International Science and Technology Policy for current listings. Students may take other courses not on the list of suggested courses with the approval of the Office of Student Services. Some of the analytical competency courses have prerequisites that do not count toward the certificate requirements.

Consult the Center for International Science and Technology Policy (http://www.gwu.edu/~cistp) (CISTP) for current listings and for additional information.

GRADUATE CERTIFICATE IN NUCLEAR POLICY
The graduate certificate in nuclear policy provides a foundation of knowledge and analytical skills relevant to contemporary challenges related to nuclear security, deterrence, arms control, nonproliferation, and nuclear energy to students preparing to contribute to these pursuits as practitioners and analysts.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/graduate-certificates/nuclear-policy) for additional information.

Students are encouraged to consider relevant courses, such as courses on regional security topics, which may be counted toward required supporting courses with the approval of the certificate advisor.
SCHOOL OF MEDICINE AND HEALTH SCIENCES

Dean J. Akman
Senior Associate Dean for Health Sciences J. Bocchino
Associate Deans M. Corcoran, C. Golden

The George Washington University School of Medicine and Health Sciences (SMHS) is dedicated to improving the health of local, national, and global communities by:

• Educating a diverse workforce of tomorrow’s leaders in medicine, science, and health sciences.
• Healing through innovative and compassionate care.
• Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
• Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Health Sciences

GW Health Sciences (http://smhs.gwu.edu/academics/health-sciences) comprises three academic departments: Clinical Research and Leadership (http://smhs.gwu.edu/crl), Physician Assistant Studies (http://smhs.gwu.edu/pas), and Physical Therapy and Health Care Sciences (http://smhs.gwu.edu/pths). SMHS health sciences programs prepare professionals for roles in selected specialties within health care. These programs emphasize the interdependent roles and responsibilities of professionals in health care practice, research, and leadership.

The mission of GW Health Sciences is built upon five tenets:

• Interdisciplinary education provides a foundation for the future of health care delivery and generates collaborative structures and models for benchmarking and improvement.
• Clinical training is a foundation for professional development in clinical practice.
• Community service learning applies to communities broadly and is an important component of education for the transformation of communities of practice, research, and access in health care.
• GW Health Sciences is uniquely positioned to cultivate leadership capacity development within the health sciences, medical, and scientific communities that we serve.
• Scholarship among faculty, staff, and students alike contribute to the process of new knowledge creation and are a foundation for advancing translational science in health care.

Medical Programs

For information about GW medical programs, please refer to the medicine and health sciences website (http://smhs.gwu.edu).

REGULATIONS

• Admission (p. 760)
  • International Applicants (p. 761)
  • Unclassified Students (p. 761)
  • Readmission (p. 761)
  • Transfer Credit for Graduate Students (p. 761)
  • Transfer Credit/Advanced Standing for Undergraduates (p. 762)
• Evaluation of Academic Performance (p. 762)
• Academic Standing (p. 763)
• Programs of Study (p. 764)
• Policies and Definitions (p. 764)
• Graduation Requirements (p. 765)
• Financial Aid (p. 766)

Admission

To be considered for admission, applicants must submit a completed application form online, together with all required supporting documentation and a non-refundable application fee.

Bachelor of Science in Health Sciences (B.S.H.S.) programs are designed for upper-division transfer students; applicants are expected to have completed a minimum of 60 credit hours of coursework from a regionally accredited post-secondary institution prior to entry. Applicants to the post-baccalaureate and graduate programs must hold a bachelor’s degree from a regionally accredited college or university, with the exception of the Ph.D. and O.T.D. programs which require a master’s degree or entry-level professional doctorate. Official transcripts must be submitted from each academic institution attended, regardless of whether credit was earned or is desired. The transcript(s) must indicate a minimum cumulative grade-point average of 2.5 on a scale of 4.0 for undergraduate and post-baccalaureate applicants, and a 3.0 on a scale of 4.0 for graduate students. The applicant must be in good standing and eligible to return to the academic institution most recently attended. Dual degree applicants must have a minimum cumulative grade-point average of 3.3 on a scale of 4.0. With evidence of special promise, an applicant whose academic record falls short of the minimum GPA may be accepted on a conditional basis; see Conditional Admission, below. Students who have been suspended or dismissed academically or will not be considered for admission for at least one year from the date of their last suspension or dismissal.
Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and cannot be returned.

**Conditional Admission**—Admission with conditions to one of the health sciences programs may be offered at the discretion of the Health Sciences Dean’s Office and the program director. The terms of admission are outlined in the letter of acceptance from the University. When conditions have been not been met, notification is sent from the Health Sciences Dean’s Office. Students dismissed for not meeting the conditions of their admission from non-clinical programs must sit out one calendar year before re-applying. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

**Advance Tuition Deposit**—Upon notification of acceptance, an advance tuition deposit will be required of students in selected programs, including those re-admitted. The deposit is credited toward tuition and is non-refundable. Payment of the orientation fee, if applicable, must be submitted along with the tuition deposit and is also non-refundable.

**International Applicants**
The following additional requirements pertain to international applicants:

**Required Records**—Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of state examinations, and degrees received) must be submitted in the language in which the institution keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether or not the official record is in English.

**Language Tests**—Applicants whose native language is not English or who are not citizens of countries where English is the official language must submit official test scores for either academic IELTS or TOEFL or PTE. The following are the minimum scores for admission consideration:

1. Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0.
2. TOEFL: 600 paper-based or 100 Internet-based.
3. PTE: overall score of 68

The IELTS/TOEFL/PTE requirement may be waived for applicants who hold a bachelor’s degree or higher from a regionally accredited U.S. college or university; applicants who hold a bachelor’s degree or higher from an international higher education institution must demonstrate through an evaluation that the institution is equivalent to a U.S. regionally accredited college or university, and the language of instruction at the institution where the degree was completed is English. Waivers may exist for citizens of countries where the official language is English, as determined by the GW International Services Office.

**Financial Certificate**—A Financial Certificate must be completed and submitted with the application for admission by all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66.

**Unclassified Students**
A student who wishes to take individual courses in health sciences programs must obtain permission to register as an unclassified student in the School of Medicine and Health Sciences. Application is made to the Office of Admissions, Health Sciences Programs. The Health Sciences Dean’s Office, in conjunction with the appropriate department chair and program director, will determine if permission to register will be granted to an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credit hours.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. This should not exceed 6 credit hours. Successful completion of course work taken as an unclassified student does not guarantee admission to a degree program.

**Readmission**
Students who were previously registered in a health sciences program at the University, but who did not register during the immediate preceding semester (summer sessions excluded) and who did not receive an approved leave of absence, must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the Office of Admissions, Health Sciences Programs, from each institution attended. Applications for readmission are considered on the basis of regulations and curricula currently in effect.

**Transfer Credit for Graduate Students**
The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. A maximum of one quarter of the credit hours of graduate coursework required for a degree may be approved for transfer to a graduate program in the Health Sciences. These credits may come from
enrollment in non-degree coursework at GW, or from another degree granting school of GW, or another accredited college or university. Eligible coursework must: (a) graduate-level credit, (b) not applied toward completion of requirements for another degree, and (c) earned with a minimum acceptable grade of a B (grades of B- and below do not transfer). Requests for transfer credit must be submitted in writing and approved by the program director and the Health Sciences Dean’s Office after admission to the program. Students in clinical programs or the Ph.D. program should refer to their program handbook for program-specific transfer credit policies and procedures.

Transfer Credit/Advanced Standing for Undergraduates
Advanced standing may be awarded for appropriate course work completed at other regionally accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is C for course work to be applied toward an undergraduate degree (grades of C- and below do not transfer). Advanced standing may also be awarded for non-traditional classroom or clinical experience as determined by the individual programs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Health sciences degree programs vary in the amount of advanced standing they will award. For bachelor’s programs, no more than 66 credits will be accepted as advanced standing from a two-year institution.

Degree candidates who are currently enrolled at this institution and plan to take courses at other regionally accredited institutions for transfer credit must first obtain the approval of the program director, department chair, and appropriate dean.

Evaluation of Academic Performance
Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assigning grades rests with academic departments or with faculty in the respective programs. Official grades for course work can be obtained from the Office of the Registrar each semester and are not given out by instructors.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Satisfactory; D, Low Pass; F, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree or undergraduate-level certificate (including post-baccalaureate certificate) at this University may not repeat a course in which a grade of D or above was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. If a course is repeated, the first grade remains on the student’s record and is included in the cumulative GPA. Symbols that may appear on the transcript include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Unauthorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Minimum Pass; F, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate at this University may not repeat a course in which a grade of C or above was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. For graduate courses where a grade of C- or below was received, the course must be repeated for credit. If a course is repeated, the first grade remains on the student’s record and is included in the cumulative GPA. Symbols that may appear on the transcript include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress—The symbol of I indicates that the instructor has received a satisfactory explanation for the student’s inability to complete the required work of the course. The grade may be used only if the student’s prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned will result in the grade of F for the course. Incomplete work must be made up by a date agreed upon by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the notation of I is assigned. An extension of one additional semester can be requested by the student and may be approved by the program director. When work for the course is completed, the grade earned replaces the symbol I on the transcript. An Incomplete that is not changed within the allotted time reverts to an F.

The symbol of IPG is reserved for courses (such as special projects) in which the final class date extends beyond the official University deadline for submitting grades. Once the course has been completed, the IPG will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal—The symbol of Z is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students’ records are reviewed; if there is more than one Z per semester, a student’s record may be encumbered until released by the student’s advisor or academic dean. The symbol Z is not a grade, but an administrative notation.
The Grade-Point Average—Scholarship is computed in terms of the grade-point average, based only on the student’s record in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit hour for which the student has registered in a degree program. In undergraduate courses, grades of F will be computed in the grade-point average but will not be considered as fulfilling degree requirements. In graduate programs, final course grades below C- are recorded as F.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation—Students who believe that a grade or evaluation is unjust or inaccurate may use the following appeal procedures:

1. The student must submit a written appeal to the relevant faculty member within 10 calendar days of the time the grade is posted, with a copy to the program director.

2. Resolution should be sought first at the program and departmental levels. A review shall be conducted by the program director and chair, consulting as appropriate the student and faculty involved.

3. If a mutually satisfactory resolution is not achieved, the student may, within five days of the decision being rendered, submit a written letter of appeal to the Senior Associate Dean for Health Sciences. In considering the student’s appeal, the Senior Associate Dean will determine whether or not the grading procedures employed were fair, equitable, objective, and consistent.

4. The Senior Associate Dean for Health Sciences may refer the appeal to the Health Sciences Evaluation Committee chair, who will form a three-person committee to serve as a peer review body. The committee will consist of the director of the program and two other members of the Health Sciences Evaluation Committee who are not involved in the case. Should the chair of the Health Sciences Evaluation Committee be the member of the faculty alleged to have made the improper academic evaluation, the appropriate dean will choose the three members of the peer review body from the members of the Health Sciences Evaluation Committee. If a sufficient number of faculty are not available from within the committee, other faculty from the health sciences programs will be appointed.

5. The peer review body will review the student and course materials in order to render a recommendation to the Senior Associate Dean for Health Sciences. In the event that the peer review body chooses to conduct a hearing, the student may not have legal representation present. Students will be allowed to move forward in didactic coursework until the grade appeal is resolved and a final decision rendered. However, students will not be allowed to move forward in clinical coursework until the grade appeal is resolved and a final decision rendered.

6. The peer review body will advise the Senior Associate Dean for Health Sciences on the outcome of their review and recommendations. Final action rests with the Dean for the School of Medicine and Health Sciences.

Academic Standing

An enrolled student is considered to be in good academic standing by the School of Medicine and Health Sciences provided that he or she is not on academic probation or suspension. The policies outlined below apply to all candidates for health sciences programs. In addition, medical laboratory sciences, physician assistant, physical therapy, and translational health sciences students must comply with policies and procedures outlined in their respective student handbooks.

Warning—An undergraduate whose GPA falls between 2.5 and 2.69, and a graduate student whose GPA falls between 3.0 and 3.2 will receive a warning notification from the program. The warning may be delivered to the student the form of an email. A record of warning notifications will be kept with program records and Health Sciences Student Services.

Academic Probation—A full- or part-time undergraduate degree candidate whose cumulative GPA falls below 2.5 will be placed on academic probation and that status noted on the student’s transcript. This probation extends over the period during which the student attempts an additional 12 credits of coursework. While on probation, students will be allowed to register for no more than 12 credits per semester, unless approved by the program director and the appropriate dean.

A full- or part-time graduate degree candidate whose cumulative GPA falls below 3.0 will be placed on academic probation. For full-time students, probation extends for one semester of full-time course work as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credit hours of course work. While on probation, full-time students may register for no more than a total of 9 credits unless an exception is approved by the program director and the appropriate dean; part-time students may register for a combination of 9 credits, but may not register for additional credits, e.g. a part-time student who attempts 6 credits in one semester would be restricted to 3 credits in the following semester of enrollment.

If the program director and department chair determine that extenuating and valid circumstances exist, a student may be granted an extension of the probationary period. If granted, the student will be notified by the program director outlining conditions to be met by the student. The student must return a statement to the program director by email or postal system mail confirming that he/she has read, understands, and agrees to the conditions.

If the student fails to attain the conditions in the time specified, the student will be suspended (see Suspension, below). If the student succeeds in raising his/her cumulative GPA to the minimum scholarship requirements, academic probation will
be lifted. A student who has been placed on probation more than one time will be recommended for dismissal.

**Suspension**—Students on probation who have not raised their cumulative GPA within the allowed number of credits (12 for undergraduate and 9 for graduate students) may be suspended. A student suspended for poor scholarship may not register for any course work at the University, even as an auditor. The program director mails or emails a Letter of Suspension notifying the student of suspension.

A student who is suspended for failure to raise the cumulative GPA may apply for readmission after one calendar year. Evidence must be presented to the student’s program director, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted. If the student fails to achieve the minimum GPA at the end of the semester following readmission, the program director may recommend that the student be dismissed and further enrollment prohibited; such a recommendation will be reviewed by the appropriate dean, whose recommendation will be forwarded to the Dean of the School of Medicine and Health Sciences.

**Dismissal**—Any student who has received one or more failing grades in a single semester, or who has been placed on probation more than one time, may be recommended for dismissal by the program director. If the program recommends dismissal, notice will be sent to the student via email or conventional mail informing him/her that the recommendation for dismissal is being reviewed by the Senior Associate Dean for Health Sciences in consultation with the program director and chair. At the discretion of the Senior Associate Dean, the recommendation may also be forwarded to the Health Sciences Evaluation Committee before sending to the Dean for the School of Medicine and Health Sciences. The final decision about dismissal rests with the Dean for the School of Medicine and Health Sciences. A student who is dismissed from non-clinical programs may apply for readmission after the lapse of one calendar year. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

**Programs of Study**

Students enrolled in undergraduate degree or undergraduate-level certificate programs (including post-baccalaureate certificates) must meet with their academic advisor (in person or electronically) to review a program of study, listing all course work required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program. Changes may require approval of Senior Associate Dean for Health Sciences.

**Transfer Within Health Sciences Programs**—To apply for a transfer from one health sciences program to another, a written request must be submitted to the Office of Student Services, Health Sciences Programs, along with the necessary supporting documentation required by the program. To change from certificate to degree program may require an admissions application.

**Transfer Outside Health Sciences Programs**—No internal transfers are permitted from a health sciences program to another GW school or college. To transfer outside of the health sciences, a student must follow the full admission processes for the other GW program.

**Changes Within Health Sciences Programs**—A student may not substitute one course for another without approval of the program director, the department chair, and the appropriate dean. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the appropriate dean to withdraw from a course or to change status from credit to audit or audit to credit.

**Adding and Dropping Courses**—During the registration period (before the end of the second week of classes) students may add or drop courses using GWeb. After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (http://smhs.gwu.edu/academics/health-sciences/students/forms-policies) and submit the form to the Student Services Office. Adding a course after the second week requires a signature of the instructor or other authorized member of the department.

A course dropped during the first four weeks of classes will not appear on the student’s transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of W (Authorized Withdrawal). Deadlines for a summer or short course may vary.

The deadline for dropping a course without academic penalty is the end of the eighth week of classes. After the end of the eighth week of classes, dropping a course without academic penalty is only possible after the student presents a petition to the Senior Associate Dean for Health Sciences and receives written permission. Deadlines for a summer or short course may vary.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

**Policies and Definitions**

**Credit**—Credit is awarded only after registration for a course and satisfactory completion of the required work, or upon assignment of advanced standing.

**Auditing**—A student who has been admitted to a health sciences program may register as an auditor in a class only with the permission of the instructor, the faculty advisor, and the appropriate dean. An auditor receives no academic credit.
and is not required to take active part in the class or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. The regular program tuition rate is charged for audited courses.

**Attendance**—Students may attend only those classes for which they are officially registered. Regular attendance is expected. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all absences must be excused by the instructor before provision is made to make up the work missed.

**Transcripts of Record**—Official transcript of student records are issued by the Office of the Registrar and may be requested through GWeb by any student or former student who has paid all charges, including any outstanding student loan installments, due the University at the time of the request. A fee is charged for each transcript. Partial transcripts are not issued.

**Continuous Enrollment**—Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. Students who break continuous enrollment at the University and do not request and receive a leave of absence (see below) must apply for readmission and, if granted, are subject to the requirements and regulations then in force. Students who plan to attend other institutions and apply credit earned toward graduation must first obtain written approval from the program director and the appropriate dean.

**Leave of Absence**—A student who must interrupt active pursuit of the degree or certificate may petition the appropriate dean, through the program director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for leave of absence in each fall and spring semester, following regular registration procedures. The request should be made using the Petition Request Form (http://smhs.gwu.edu/academics/health-sciences/students/forms-policies). Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force. The right to use University facilities is suspended while the leave is in effect.

**Policy Regarding Students Called to Active Military Duty**—Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session automatically will be entitled to a full refund of all tuition and fees that he or she has paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student will have the option of either taking a full refund of tuition and fees or taking an Incomplete in his or her courses with the privilege of returning to complete all required coursework at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of his or her activation to the Health Sciences Student Services and the Office of Student Accounts and to request the appropriate refund.

Should a degree student called up for active duty find it necessary to interrupt active pursuit of the degree he or she may petition the Senior Associate Dean for Health Sciences for a leave of absence for a specified period of time, generally limited to one calendar year. Deans are encouraged to grant any request to extend the leave of absence for longer than the customary period should military service require an absence of more than one year.

All students on active duty will be automatically exempted from the request for a $50 voluntary library contribution without requiring any communication from them or their initials on the bill.

**Right to Change Rules and Programs**—The University reserves the right to modify or change requirements, rules, and fees. Such regulations shall go into force whenever the proper authorities may determine. The right is reserved by the University to make changes in programs without notice whenever circumstances warrant such changes. For the most up to date requirements, rules, and fees contact the Health Sciences Dean’s Office (http://smhs.gwu.edu/academics/health-sciences).

**Complete Withdrawal From the University**—A student who wishes to withdraw from all courses, and the university must complete a Complete Withdrawal Form (http://registrar.gwu.edu) and submit it to the Office of the Registrar. The deadline for complete withdrawal from all courses without academic penalty is the end of the eighth week of classes, with the exception of summer and short courses, which may have different deadlines. Complete withdrawal after the eighth week requires a petition to the appropriate dean. A student who wishes to withdraw from one or all courses, but not the university, should submit a Registration Transaction Form. A student who wishes to withdraw from the University upon completion of currently registered courses should notify their program director and Health Sciences Student Services.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to complete a Complete Withdrawal Form can result in an extended financial obligation and the recording of grades of F (Failure) or notations of Z (Unauthorized Withdrawal).

**Graduation Requirements**

Degrees are conferred in January, May, and August. Degree-seeking students graduating from health sciences may
graduate students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for course work or for continuous enrollment, is required for the semester or summer session at the close of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

**Undergraduate Residence Requirements**—Bachelor of Science in Health Sciences programs follow the Residence Requirement under University Regulations (http://bulletin.gwu.edu/university-regulations).

**Graduate and Doctoral Residence Requirements**—Graduate and doctoral programs may set higher residency requirements; students should consult the program office or program handbook, if applicable.

**Honors**—Bachelor’s degrees with honors are awarded to students whose academic records give evidence of particular merit. The student’s grade-point average determines the level of honors as follows: *cum laude*, 3.4-3.59; *magna cum laude*, 3.6-3.79; *summa cum laude*, 3.8-4.0. The grade-point average includes all course work completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 hours of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credit hours required for the degree. Honors indicated on the diploma are calculated on the basis of all course work completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

**Certificate Completion**—Students planning to complete a certificate by the end of a semester must submit a certificate completion form (http://registrar.gwu.edu/certificate-completion) by April 1 for spring semester, July 1 for summer semester, and December 1 for fall semester. Students completing a certificate are not recognized at the university commencement and are not issued tickets to the ceremony.

---

**Financial Aid**

The George Washington University financial assistance for undergraduate students is described in *Financial Aid Sourcebook* from The George Washington University Office of Student Financial Assistance (http://financialaid.gwu.edu). Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need. All undergraduate gift aid (institutional scholarships and grants, and federal grants) requires that the recipient be working on the first undergraduate degree and be registered for a full-time course load at GW. Students are limited to eight semesters of institutional aid. Institutional aid is not available for online programs nor graduate programs. Loans and resident assistantships not based on financial need are available.

Several offices on campus provide information on financial assistance for graduate and certificate students. Information about funding opportunities is provided by the Office of Graduate Student Assistantships and Fellowships (http://www.gwu.edu/~fellows). Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. (http://financialaid.gwu.edu) Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center (http://careerservices.gwu.edu). Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.
UNDERGRADUATE

Associate's programs
- Associate in Science in the field of health sciences (p. 769)
- Associate in Science in the field of health sciences laboratory technology (p. 770)

Bachelor's programs
- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 771)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 772)
- Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 773)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences in the field of cytotechnology (military contract) (p. 775)
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in health intervention and disaster response
- Bachelor of Science in Health Sciences with a major in medical informatics (p. 778)
- Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
- Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership

Minors
- Minor in anatomy (p. 785)
- Minor in blood banking for medical laboratory science (p. 785)
- Minor in chemistry for medical laboratory science (p. 785)
- Minor in clinical research administration (p. 785)
- Minor in emergency health services
- Minor in health sciences (p. 786)
- Minor in hematology for medical laboratory science (p. 786)
- Minor in microbiology for medical laboratory science (p. 786)

GRADUATE

Master's programs
- Master of Science in Health Sciences in the field of clinical management and leadership (p. 787)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 788)
- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of emergency medical services leadership
- Master of Science in Health Sciences in the field of health care quality (p. 790)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 792)
- Master of Science in Health Sciences in the field of integrative medicine (p. 792)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 793)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 793)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 795)
- Master of Science in Health Sciences in the field of physician assistant (p. 794)
- Master of Science in Health Sciences in the field of translational microbiology (p. 795)

Dual degree program
- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 796)

Military contract programs
- Master of Science in Health Sciences in the field of immunohematology (p. 791)

Doctoral programs
- Doctor of Philosophy in the field of translational health sciences (p. 799)
- Doctor of Physical Therapy (p. 800)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 801)
CERTIFICATES

Post-baccalaureate certificates

• Post-baccalaureate certificate in medical laboratory science (p. 804)
• Post-baccalaureate certificate in blood banking for medical laboratory science (p. 802)
• Post-baccalaureate certificate in chemistry for medical laboratory science (p. 803)
• Post-baccalaureate certificate in hematology for medical laboratory science (p. 804)
• Post-baccalaureate certificate in microbiology for medical laboratory science (p. 805)
• Post-baccalaureate certificate in pre-medicine (p. 805)

Graduate certificates

• Graduate certificate in clinical research administration (p. 805)
• Graduate certificate in clinical and translational research (p. 806)
• Graduate certificate in clinical research practice (p. 806)
• Graduate certificate in health care quality (p. 806)
• Graduate certificate in integrative medicine (p. 807)
• Graduate certificate in regulatory affairs (p. 807)

Undergraduate certificate (military contract)

• Undergraduate certificate in the field of health sciences laboratory science (p. 803)

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

• Anatomy & Regenerative Biology (ANAT) (p. 1027)
• Clinical Management Leadership (CML) (p. 1073)
• Clinical Research and Administration (CRA) (p. 1074)
• Emergency Health Services (EHS) (p. 1194)
• Health Care Quality (HCQ) (p. 1245)
• Health Sciences (HSCI) (p. 1247)
• Medical Laboratory Science (MLS) (p. 1349)
• Occupational Therapy (OT) (p. 1367)
• Pharmacogenomics (PHRG) (p. 1369)
• Physician Assistant (PA) (p. 1379)
• Physical Therapy (PT) (p. 1376)
• Regulatory Affairs (RAFF) (p. 1442)
• Translational Health Sciences (THS) (p. 1483)

UNDERGRADUATE PROGRAMS

Associate's programs

• Associate in Science in the field of health sciences (p. 769)
• Associate in Science in the field of health sciences laboratory technology (p. 770)

Bachelor's programs

• Bachelor of Science in Health Sciences with a major in bioinformatics (p. 771)
• Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 772)
• Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 773)
• Bachelor of Science in Health Sciences with a major in clinical research administration
• Bachelor of Science in Health Sciences in the field of cytotechnology (p. 775) (military contract)
• Bachelor of Science in Health Sciences with a major in emergency medical services management
• Bachelor of Science in Health Sciences with a major in health intervention and disaster response
• Bachelor of Science in Health Sciences with a major in medical informatics (p. 778)
• Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs

• Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
• Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
• Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
• Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Science in the field of regulatory affairs
• Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership

Minors

• Minor in anatomy (p. 785)
• Minor in blood banking for medical laboratory science (p. 785)
• Minor in chemistry for medical laboratory science (p. 785)
• Minor in clinical research administration (p. 785)
• Minor in emergency health services
• Minor in health sciences (p. 786)
• Minor in hematology for medical laboratory science (p. 786)
• Minor in microbiology for medical laboratory science (p. 786)

ASSOCIATE IN SCIENCE IN THE FIELD OF HISTOTECHNOLOGY

This program provides formal training for histopathology technicians who are assigned to a medical treatment facility (MTF). The course combines didactic classroom instruction, hands-on experience and clinical rotations in an MTF. The instruction also assists graduates in preparing for the histotechnician (HT) certification examination. Instruction is presented in the following major areas: introduction to histotechnology, basic scientific information, specimen processing for histological study, routine technical procedures, special stains for histologic study, anatomy and tissue identification, autopsy procedures, cytopreparatory techniques, immunohistochemistry, practical histotechnician training, and clinical practicum.

REQUIREMENTS

The following requirements must be fulfilled: 63 credits, including 18 credits in general education courses, and 45 credits from courses in the major. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

General Education (18 Credits)

6 credits English composition
3 credits college mathematics
3 credits social sciences
3 credits humanities
3 credits chemistry

Courses in the Major (45 credits)

MLS 1040 - Introduction to Histotechnology
MLS 1041 - Basic Scientific Information
MLS 1042 - Specimen Processing for Histological Study
MLS 1043 - Routine Technical Procedures
MLS 1044 - Special Stains for Histological Study

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES

The associate in science (A.S.) in health sciences (http://smhs.gwu.edu/military-affiliated-programs/health-sciences) is a degree completion program restricted to current and former Army 18D, Navy IDCs, Air Force IDMTs, and Army or Navy MLTs. Additional military occupations may be reviewed for consideration.

Visit the program website (http://smhs.gwu.edu/military-affiliated-programs/health-sciences/admissions) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 69 credits, including 44 credits in advanced standing, 19 credits in general education, and 6 credits in health sciences courses.

### ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY

Admission to the associate in science (A.S.) in health science laboratory technology (HSLT) program is restricted to students who have completed the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-programs/cert-mlt) at GW, within the past five years. The program offers Army and Navy medical laboratory technicians (MLTs) the opportunity to enhance their skills, obtain the credentials to pursue advanced study, and be eligible for promotion within the military.

Visit the military affiliated programs website (http://smhs.gwu.edu/military-affiliated-programs) for more information.

### REQUIREMENTS

The following requirements must be fulfilled: 75 credits, 60 of which are awarded for completion of the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-programs/cert-mlt), and 15 credits in general education courses. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

MLS 2001  Chemistry for Health Sciences

Transferring credits
For an assessment on the transferability of your previous coursework, please contact the program office (http://smhs.gwu.edu/crl/programs/military/as-mlt). Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN BIOINFORMATICS

Bioinformaticists use computers to analyze, organize, and visualize biological data in ways that increase the understanding of this data and lead to new discoveries. Graduates of this program will be well-qualified for many rewarding careers, including those in bioinformatics software development, biomedical research, biotechnology, comparative genomics, genomics, molecular imaging, pharmaceutical research and development, proteomics, and vaccine development.

REQUIREMENTS

Required
HSCI 2105  Current Issues in Bioethics
HSCI 2112W Writing in the Health Sciences
HSCI 4106  Intro to Epidemiology for HS
HSCI 4112W Rsrch/Wrtng in Health Sciences
INFR 3101  Introduction to Bioinformatics
INFR 3102  Scripting
INFR 3103  Genomics
INFR 4120  Bioinformatics Algorithms
INFR 4121  High Performance Computing
INFR 4122  Advanced Scripting
INFR 4123  Statistical Genetics
INFR 4203  Seminar in Computational Biology
6 credits from the following (may be repeated for credit):
INFR 4204  Bioinformatics Internship
INFR 4205  Bioinformatics Research Project

Electives
9 credits from the following:
INFR 3104  Human Genetics
HSCI 3105  Biochemistry
HSCI 3106  Microbiology for Health Sciences
HSCI 3117  Principles of Biostatistics for Health Sciences
The bachelor of science in health sciences (B.S.H.S.) with a major in clinical health sciences degree program is available only to active-duty Navy IDCs, Army 18Ds, and Air Force IDMTs. Coast Guardsmen who completed a Navy IDC School may be eligible, depending on their current duty assignment.

This distance learning program offers active-duty Navy IDCs, Army Special Forces Medical Sergeants (18Ds), and Air Force Independent Medical Technicians (IDMTs) a way to formalize their specialized military training with a GW degree. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment. The clinical rotations are arranged by students in their current duty station or location.

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/curriculum) for additional information.

REQUIREMENTS

The BSHS with a major in Clinical Health Sciences (http://smhs.gwu.edu/crl/military) is a degree completion program that requires successful completion of 120 credit hours, divided into three degree components.

The following requirements must be fulfilled:

### Advanced standing and electives (60 credits):

During the first semester the student is enrolled in the program, advanced standing for eligible military courses will be noted on the student’s record and applied towards the bachelor’s degree.

### General education (24 credits):

- 3 credits of English composition
- 4 credits of natural or physical science with lab
- 8 credits of mathematics, science, or statistics
- 6 credits of social sciences
- 3 credits of humanities

If a student still needs general education coursework, GW offers online coursework for some of these requirements.

### Recommended coursework at GW (for those missing general education requirements)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL MANAGEMENT AND LEADERSHIP

The bachelor of science in health sciences with a major in clinical management and leadership degree program is designed for working health science professionals who may be seeking career advancement, future graduate study, enhanced performance in a current position, or simply to broaden knowledge and skills. Courses focus on communication skills, leadership and group effectiveness, administrative functions, operations and information management, consumer needs, and the changing face of health care.

REQUIREMENTS

The Bachelor of Health Sciences with a major in the field of clinical management and leadership (http://smhs.gwu.edu/crl/programs/cml) is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

The following requirements must be fulfilled:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>60 credits of general education and advanced standing:</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>3 credits of English composition</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4 credits of natural or physical science with lab</td>
<td></td>
</tr>
<tr>
<td></td>
<td>6 credits of social sciences</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3 credits of humanities</td>
<td></td>
</tr>
<tr>
<td>44 credits of advanced standing*</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Must be completed while on active-duty. Students arrange rotations at their current duty stations. All rotations require a MD or PA preceptor.

HSCI 2103 Health Policy and the Health Care System cannot be double-counted for a general education requirement and an elective; it may only be used to complete one requirement.

Transferable Coursework (84 credit hour maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)
BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION

Offered in a distance learning format, the bachelor of science in health sciences with a major in clinical research administration prepares health sciences professionals to work in a vast and expanding field that involves the processes by which products (drugs, devices, biologics) and treatment protocols are developed for improving patient care.

REQUIREMENTS

The bachelor of science in the health sciences with a major in clinical research administration (http://smhs.gwu.edu/crl/programs/cra) is a degree completion program that requires successful completion of 120 credits, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

The following requirements must be fulfilled:

<table>
<thead>
<tr>
<th>Code</th>

Transferring credits

Up to 60 credits may be transferrable from courses taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)
This contract program provides GW educational services to eligible active duty U.S. Army service members, including:

- Academic advising for students who have outstanding prerequisites for eligibility.
- Application and registration services.
- Academic record maintenance.
- Conferral of a bachelor of science in health sciences degree to students upon successful completion of 126 credits in the required program.

**REQUIREMENTS**

The following requirements must be fulfilled: 126 credits including 49 credits in general education, 27 credits in advanced standing and electives and 50 credits in distance education clinical laboratory sciences and health sciences courses. The B.S.H.S. in cytotechnology is a one-year program.

The BSHS in Cytotechnology is a 126 credit hour degree program divided into three components: general education (49 credit hours), advanced standing and electives (27 credit hours), and distance education clinical laboratory sciences and health sciences courses (50 credit hours). The BSHS in Cytotechnology is a one-year program.

**General education (49 credits)**

- Biology* (20 credits)
- Chemistry* (8 credits)
- College Algebra, Statistics, or higher (3 credits)
- Humanities or Social Sciences (12 credits)
- English Composition (6 credits)

*Students with the MLT Certificate will have these transfer credits applied to fulfill all of the biology, chemistry, and elective requirements for the degree program.

**Electives (27 credits)**

Previously earned college-level coursework will be evaluated for transfer as elective credit. Acceptable transfer coursework must be:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CYTOTECHNOLOGY**

Established between GW and the Medical Education Training Campus (METC), the bachelor of science in health sciences with a major in cytotechnology degree program (http://smhs.gwu.edu/military-affiliated-programs/cytotechnology) is restricted to pre-selected military service members.
BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN EMERGENCY MEDICAL SERVICES MANAGEMENT

Emergency Medical Services (EMS) is a challenging and rapidly emerging discipline at the intersection of traditional EMS, public health, public safety, and health care. The bachelor of science in health sciences in emergency medical services management (EMSM) is designed to prepare students for leadership positions in the field that will improve the quality of out-of-hospital care domestically and internationally.

REQUIREMENTS

The following requirements must be fulfilled:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>60 credits of general education and advanced standing including:</td>
<td></td>
</tr>
<tr>

Transferring credits
Up to 60 credits of coursework may be transferable from coursework taken elsewhere provided it is:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN HEALTH INTERVENTION AND DISASTER RESPONSE**

Offered in a distance learning format, the bachelor of science in health sciences (B.S.H.S.) in health intervention and disaster response is available to active-duty and veteran service members from the civil affairs medic community or related healthcare fields and to civilians in the health care fields with international experience and interest. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment.

Drawing heavily from both civilian and military challenges and successes experienced during natural as well as man-made disaster and crisis events, both domestically and internationally, the program allows civil affairs medics to build on their existing academic, military, and training experiences. Students are called upon to work individually as well as collaboratively in the development of broadened view of and holistic approach to delivery of aid and relief to the individuals, families, and communities affected by catastrophic events.

**REQUIREMENTS**

The bachelor of science in health sciences with a major in health intervention and disaster response (http://smhs.gwu.edu/crl/programs/hidr) is a distance learning degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of coursework may be transferred from coursework taken elsewhere.

- Earned with a grade of C or better (C- grades do not transfer)

---

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL INFORMATICS**

The bachelor of science in health sciences (B.S.H.S.) in the field of medical informatics helps prepare students for rewarding careers such as health data analysts, system evaluators, and annotators. The emerging field of medical informatics serves as the bridge between human–computer interactions in the health care space and focuses on how data collected in these settings can be leveraged to improve patient safety, outcomes, and quality. Full- and part-time programs of study are available.

**REQUIREMENTS**

The bachelor of health sciences (B.S.H.S.) with a major in the field of medical informatics (https://smhs.gwu.edu/medical-informatics) is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

Transferable Coursework (60 credit maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (http:// bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-medical-laboratory-science/%20http://www.naacls.org).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits, including a minimum of 60 credits in required courses completed at GW and up to 60 transfer credits in courses taken elsewhere. Eligible students admitted through approved SMHS Guaranteed Admission Agreements (http://smhs.gwu.edu/academics/health-sciences-programs/guaranteed-admission-agreements) partnerships must complete a minimum of 52 required credits at GW; eligibility is reviewed on a case-by-case basis.

*Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.** Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs). Students should have previous coursework in ethics and cultural or global perspectives.

**DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES AND MASTER OF SCIENCE IN HEALTH SCIENCES IN CLINICAL RESEARCH ADMINISTRATION**

Clinical Research Administration continues to evolve into a more global and complex set of integrated research and business processes. The online dual degree programs provide students with the knowledge, abilities, and vision to move health sciences organizations effectively into the future. For professionals who need to complete a bachelor’s program but are also thinking about graduate study, the online dual degree program is a perfect fit! This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the online bachelor of science in health sciences and the online master of science in health sciences programs.

**REQUIREMENTS**

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Clinical Research Administration and the Master of Science in Health Sciences (MSHS) in Clinical Research Administration (CRA) (http://smhs.gwu.edu/crl/programs/cra). Undergraduate and graduate degrees will be conferred sequentially, with the BSHS awarded upon completion of 120 credits (nine of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate course work.

**BSHS in Clinical Research Administration**

The BSHS with a major in Clinical Research Administration is a degree completion program that requires successful completion of 120 credits, divided into three degree
components, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

Credit for HSCI 6223, HSCI 6240, and CRA 6201 is applied to both the BSHS and MSHS degrees.

**Transferring credits**

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the
program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

**DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN CLINICAL MANAGEMENT AND LEADERSHIP AND MASTER OF SCIENCE IN HEALTH SCIENCES IN HEALTH CARE QUALITY**

This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (B.S.H.S.) in clinical management and leadership and the Master of Science in Health Sciences (M.S.H.S.) in health care quality. Undergraduate and graduate degrees are conferred sequentially, with the B.S.H.S. awarded upon completion of 120 credits (9 of which are taken for graduate credit). The M.S.H.S. is awarded following completion of an additional 27 credits of graduate coursework.

**REQUIREMENTS**

This multi-level dual degree program (http://smhs.gwu.edu/crl/programs/cml/curriculum/cml-hcq-dual-degree) offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Clinical Management and Leadership (http://smhs.gwu.edu/crl/programs/cml) and the Master of Science in Health Sciences (MSHS) in Health Care Quality (http://smhs.gwu.edu/crl/programs/health-care-quality). Undergraduate and graduate degrees will be conferred sequentially, with the BSHS awarded upon completion of 120 credits (nine of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate coursework.

**BSHS in Clinical Management & Leadership**

The BSHS with a major in Clinical Management and Leadership is a degree completion program that requires successful completion of **120 credit hours**, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

<table>

</tbody>
</table>

The following requirements must be fulfilled:

- **60 credits of general education and advanced standing including:**
  - 3 credits of English composition
  - 4 credits of natural or physical science with lab
  - 6 credits of social sciences
  - 3 credits of humanities
  - 44 credits of advanced standing*

*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN CLINICAL RESEARCH ADMINISTRATION AND MASTER OF SCIENCE IN HEALTH SCIENCES IN REGULATORY AFFAIRS

Offered in a distance learning format, the dual bachelor of science in health sciences in clinical research administration and master of science in health sciences in regulatory affairs degree programs provides students with the knowledge, abilities, and vision to move health sciences organizations effectively into the future.

REQUIREMENTS

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (B.S.H.S.) in Clinical Research Administration (C.R.A.) (http://smhs.gwu.edu/crl/programs/cra) and the Master of Science in Health Sciences (M.S.H.S.) in Regulatory Affairs (R.A.F.F.) (http://smhs.gwu.edu/crl/programs/regulatory-affairs/curriculum). Undergraduate and graduate degrees are conferred sequentially, with the B.S.H.S. awarded upon completion of 120 credits (9 of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate coursework.

B.S.H.S. in Clinical Research Administration

The B.S.H.S. with a major in clinical research administration is a degree completion program that requires successful completion of 120 credits, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of coursework earned elsewhere may be transferable.

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN EMERGENCY HEALTH SERVICES MANAGEMENT AND MASTER OF SCIENCE IN HEALTH SCIENCES IN CLINICAL MANAGEMENT AND LEADERSHIP

The dual bachelor of science in health sciences in emergency health services management (p. 776) and master of science in health sciences in clinical management and leadership (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-management-leadership) is a combined degree program that allows students to count a specified number of credits toward both programs. The dual degrees are typically granted in a shorter period of time and at lower cost than if both programs were pursued separately. Visit the program website (http://smhs.gwu.edu/crl/programs/ems) for additional information.

MINOR IN ANATOMY

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MANAGEMENT AND LEADERSHIP

The master of science in health sciences in the field of clinical management and leadership program prepares clinicians for leadership positions in all sectors of the health care delivery system. The program was developed to enhance the depth of knowledge in management and leadership skills of professionals from various clinical disciplines.

The distance learning format provides a convenient option for self-disciplined and self-directed students to pursue a degree and prepare for professional advancement while continuing with their work and other commitments. All courses are offered in a flexible, asynchronous format to meet the needs of busy professionals.

Students take courses focused on leadership and change, human resource development, financial management, and marketing of clinical services. Graduates of the program will have the capacity and competence to be successful in mid- and upper-level management positions.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 6 credits in graduate research courses, 9 credits in strategic leadership courses, 18 credits in clinical management and leadership courses, and a 3-credit elective course.

Transfer credits
Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines. Official transfer credit evaluations are conducted for admitted students only.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MICROBIOLOGY

The master of science in health sciences in the field of clinical microbiology degree program, which is offered in a distance learning format, provides students with clinical microbiology and laboratory science course work, a hands-on microbiology practicum that will prepare students for a diagnostic microbiology laboratory position, and eligibility for national certification examinations in clinical microbiology. The program includes additional graduate course work to prepare students for careers in research institutions, public health laboratories, biotechnology firms, pharmaceutical companies, or governmental agencies.

REQUIREMENTS

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

The master of science in health sciences in the field of clinical research administration is designed to prepare health sciences professionals to participate in the science and business of the development process. Our rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

Upon completion of the graduate CRA program, the Program Student Learning Outcomes are:

- Apply effective leadership and management practices to effectively lead and/or manage inter-disciplinary teams/projects by applying critical thinking and problem solving skill sets
- Demonstrate a solid grasp of the clinical, regulatory and business requirements in the planning and conduct of a clinical trial.
- Demonstrate research design principles through integrating scientific, medical, regulatory and commercial requirements and creating clinical development plan sections that provide for benefit to risk assessments in the development of a new investigational product.
- Discuss the importance of assuring data integrity in a clinical trial and in the preparation of various clinical/regulatory documents.
- Formulate strategies to address ethical and cultural considerations for effective and compliant domestic or international clinical trial conduct, in relation to key areas
such as human subjects’ protection, subject recruitment/retention, data integrity and risk assessment.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The MSHS in the field of clinical research administration (CRA (http://smhs.gwu.edu/crl/programs/cra)) requires successful completion of 36 credits, including: 18 credits in clinical research administration, 9 credits of strategic leadership courses, 6 credits of graduate research coursework, and a 3-credit elective course.

**Transfer credits**

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Please contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL AND TRANSLATIONAL RESEARCH**

The master of science in health sciences in the field of clinical and translational research program provides graduates with the knowledge to lead broad interdisciplinary research initiatives. Students develop an effective approach to research that integrates basic, biomedical, clinical, community health services, and health policy research.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/clinical-translational-research/programs) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits in required courses, including 27 credits in required courses and 9 credits in elective courses.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

789  School of Medicine and Health Sciences
The master of science in health sciences in the field of emergency medical services leadership program is intended to develop leadership competencies necessary for a successful career in emergency medical services (EMS). The combination of courses is designed to build expertise in leadership, creative problem-solving, team-building, clinical decision-making, and management. Through the EMS programs at GW, students:

- Develop interdisciplinary management and leadership skills necessary to manage administrative-level responsibilities within a local, regional, state, or federal EMS agency;
- Acquire the necessary tools and skills to assume the roles and responsibilities within a multidisciplinary team;
- Leverage regulatory guidelines, organizational strategies, and resources when providing emergency medical services within a community or special population;
- Analyze processes and evaluation practices to support an EMS culture of safety;
- Build a broad foundation from which to assess and respond to trends in emergency medical services and health sciences;
- Demonstrate proficiency in written communication skills necessary to perform as a professional within the field of emergency medical services and to progress to graduate-level work.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits, including 6 credits in research coursework, 9 credits in strategic leadership courses, and 21 credits in the field of emergency medical services.

Up to 6 credits of previously earned graduate-level course work may be accepted as transfer credit. Official transfer credit evaluations are conducted for admitted students only.

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF HEALTH CARE QUALITY**

The master of science in health sciences in the field of health care quality program is designed to meet an emerging demand for quality and patient safety specialists who have the capacity and competence to grow and sustain a culture of continuous improvement at all levels and within every sector of the health care delivery system. The program helps prepare graduates for quality and patient safety leadership, management, and research positions within health care organizations or policy agencies. Upon completion of this program, students will be able to:

- Develop, implement, and evaluate quality and patient safety improvement initiatives;
- Cultivate strategies to lead organizational change toward a quality-focused culture;
- Translate national quality expectations into daily operations;
- Apply processes and tools to measure, analyze, and interpret quality improvement data;
- Design and implement information technology systems to support quality assurance;
- Conduct research to drive clinical and operational decision-making.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).
REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY**

The master of science (M.S.) in health sciences in the field of immunohematology (http://smhs.gwu.edu/crl/programs/military/immunohematology) degree program is a military contract program and open only to service members enrolled in the Military Specialist in Blood Banking Technology program at Walter Reed Army Medical Center, which is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The goal of the program is to prepare individuals to be competitive for careers in management, research and education in the area of immunohematology.

The M.S. program includes all aspects of blood transfusion medicine at the graduate level, including research methods, current topics in transfusion medicine, immunology, biochemistry, and genetics of all blood cell markers, as well as the indications, contraindications, and function of all blood components and therapeutic procedures. In addition to this didactic material, practical training in the areas of compatibility testing, donor collection, viral marker testing, component production and distribution, apheresis, education and research methods, histocompatibility testing, progenitor cell preservation, and quality assurance is also provided. Research in an area of immunohematology, culminating in a research project, is an integral part of the program.

REQUIREMENTS

The following requirements must be fulfilled: 55 credits in required courses.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY AND BIOTECHNOLOGY

The master of science in health sciences in the field of immunohematology and biotechnology degree program is designed to provide certified blood bankers with a strong foundation in Immunohematology as well as molecular biology and biotechnology. Students develop the theoretical knowledge and practical skills for transfusion medicine research positions within hospital labs or blood centers or to become supervisors or managers in a blood banking laboratory.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/immunohematology-biotechnology) for additional information.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF INTEGRATIVE MEDICINE

The online master of science in health sciences (M.S.H.S.) in the field of integrative medicine (INTM) degree program provides a curriculum that represents the most progressive, scientifically rigorous, and forward thinking platform for medical wellness. Students develop a foundation and explore various intersections of INTM that contribute to patient wellness. Biostatistics and epidemiology courses provide an opportunity for students to collaborate with professionals from various disciplines, exploring philosophies and practices of translational research in human health. Through a series of practical application courses, students develop patient care plans, conduct case analyses, and evaluate practice standards to demonstrate competence of integrative medicine practice. Additional research course work provides graduates requisite skills needed to participate in evidence-based research of clinical practice and outcomes research as part of a larger INTM network.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MEDICAL LABORATORY SCIENCE

The master of science in health sciences in the field of medical laboratory science (MLS) program, offered in a distance learning format, is a non-clinical program open only to students who are currently MLT or MLS/MT/CLS certified, specialist certified (e.g., SBB), or with subject technologist certification.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/medical-laboratory-sciences) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 15 credits in courses in the field and a mentored research project, 6 credits in strategic leadership courses, 12 credits in graduate research courses, and one 3-credit elective course.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCE

The master of science in health sciences in the field of molecular diagnostic science program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for positions in diagnostic clinical laboratories, public health laboratories, biotechnology companies, government agencies, law enforcement agencies, and research institutes. In addition, students who complete this program are eligible to take the Molecular Biology Board of Certification examination offered by the American Society for Clinical Pathology (ASCP).

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

School of Medicine and Health Sciences
Masters of Science in Health Sciences in the Field of Physician Assistant

The master of science in health sciences in the field of physician assistant program helps health professionals to extend and complement the capabilities of physicians in the delivery of health care. The program curriculum emphasizes a scholarly approach to medicine, development of organizational and critical-thinking skills, and evidence-based medicine.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 104 credits in required courses.

Elective

One MLS or HSCI course selected in consultation with the academic advisor.

* May be substituted with an elective course for students with current clinical molecular laboratory experience.
MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF REGULATORY AFFAIRS

The master of science in health sciences in the field of regulatory affairs degree program is designed to prepare graduates to facilitate and lead change and innovation in regulatory practice. Throughout the program, students will develop strategies for integrating business needs into regulatory strategic planning and will learn to evaluate the scientific and economic value of bringing new health care products to the global market.

The program helps prepare its graduates to:

• Lead and collaborate with all involved functions and stakeholders for effective development of medical products;
• Develop a broad understanding of the philosophies and roles of the domestic and international regulatory agencies that oversee drug, biologic, device and diagnostic development;
• Provide strategic direction, integrating business needs in matters of regulatory science and affairs.

REQUIREMENTS

The Master of Science in Health Sciences in the field of Regulatory Affairs (RAFF) requires successful completion of 36 credits, including: 9 credits of the research coursework, 6 credits of strategic leadership courses, 18 credits in the field of regulatory affairs, and a 3-credit elective course.

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF TRANSLATIONAL MICROBIOLOGY

The master of science in health sciences in the field of translational microbiology program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for research positions in public health microbiology laboratories, biotechnology companies, government agencies, and research institutes. This program is ideal for students who already have microbiology or MLS certification or for individuals who do not have an interest in becoming certified microbiologists.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

**DUAL MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH**

Applicants with a strong interest in public health may wish to consider the dual master of science in health sciences (M.S.H.S.) in the field of physician assistant and master of public health (M.P.H.) dual degree program. The three-year program provides both clinical and academic preparation for careers in medicine and public health. Students receive advanced training in the design of health studies, epidemiological methods, application of computers to public health, community medicine, and techniques of health promotion. Students also design a special research project in collaboration with faculty of the Milken Institute School of Public Health and local, national, or international public health organizations.

For the M.P.H. degree, students choose from among the fields of community-oriented primary care, health policy, and epidemiology.

Visit the master of science in health sciences in the field of physician assistant (http://smhs.gwu.edu/physician-assistant/pa-program) and the master of science in health sciences

**DOCTOR OF PHILOSOPHY IN THE FIELD OF TRANSLATIONAL HEALTH SCIENCES**

The doctor of philosophy in the field of translational health sciences degree program helps prepare graduates to address complex healthcare challenges by conceptualizing health systems broadly in terms of transitions between basic scientific discovery, clinical insights, implications for practice, implications for population health, and improved global health.

The Ph.D. requires 54 credits beyond a master’s degree, successful completion of two comprehensive examinations, a proposal defense, and a defended dissertation. The curriculum is blended, integrating didactic and facilitated learning activities from content. It is delivered via distance learning and on campus (two weekends per semester for a total of 32 hours per semester) at the Virginia Science and Technology (VSTC) campus in Ashburn, VA.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/translational-health-sciences) for additional information.

**REQUIREMENTS**

DOCTOR OF PHYSICAL THERAPY

The doctor of physical therapy program provides quality graduate education committed to developing generalist practitioners who are reflective practitioners, who think critically, and use best evidence to effectively solve problems; compassionate practitioners, who demonstrate excellence in communication and interpersonal skills, a respect for individual and cultural differences, and the core values of the profession; and dedicated practitioners who value the tenets of lifelong learning.

The curriculum consists of 109 credits of professional course work requiring thirty-three months of full-time study beginning in the fall semester. It combines content from the foundational sciences, behavioral sciences, clinical sciences, professional practice expectations, practice management expectations, and critical inquiry. Students develop the skills needed to examine, evaluate, diagnose, prognose, develop a plan of care, and implement and re-evaluate that plan of care for patients with dysfunction in the cardiopulmonary, musculoskeletal, neuromotor, and integumentary systems across the lifespan.

The curriculum is built on the overarching principles of integration and application. Information is integrated and applied through a series of integrative units using “standardized patients” and simulation experiences. Clinical experiences are introduced early in the curriculum in the second and fourth semesters. Three full-time clinical internships occur in semesters six, seven, and eight for a total of 34 weeks of full time clinical experience. Internships are located regionally, nationally, and internationally providing depth and breadth to each student's unique educational experience.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 109 credits to be taken in the following sequence:

The School of Medicine and Health Sciences’ (S.M.H.S.) advanced-practice doctoral degree program in occupational therapy (O.T.D.) is designed for registered occupational therapists who are seeking to advance their clinical reasoning and practice skills. The program enables graduates to transition from the level of generalist to that of a translational occupational therapy clinical scholar. After obtaining this degree, graduates will be able to develop, evaluate, and promote new occupational therapy approaches to assessment and treatment in post-acute and chronic care that are grounded in neuroscience and reflect a transdisciplinary perspective.

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).
Visit the Health Sciences program website (http://smhs.gwu.edu/academics/health-sciences) for additional information.

**POST-BACCALAUREATE CERTIFICATE IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE**

**REQUIREMENTS**

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to
broaden the student’s foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practica are usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.*

Completion of the certificate qualifies the graduate to take the Technologist in Blood Banking examination offered by national certifying agencies.

The following requirements must be fulfilled: 16 credits in required courses, including the clinical practica.

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

**UNDERGRADUATE CERTIFICATE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY**

The certificate in health science laboratory technology program is offered through an inter-service contract with the Medical Education and Training Campus (METC) at Ft. Sam Houston in San Antonio, Texas. This certificate is available exclusively to pre-approved service members in the medical laboratory technology program.

Upon successful completion of the program, students will be awarded a certificate of completion and will have earned 60 college-level credits at GW.

**REQUIREMENTS**

The following requirements must be fulfilled: 60 credits in required courses.

Students must maintain a minimum grade point-average of 2.0.

**POST-BACCALAUREATE CERTIFICATE IN MEDICAL LABORATORY SCIENCE**

**REQUIREMENTS**

Students complete required courses either on a full- or part-time basis. Courses in the major are designed to broaden the student’s foundation in the sciences in preparation for the clinical phase of the program. All courses are taken through distance learning, with the exception of the four months of clinical practica.

The clinical practica are usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight (daytime) hours per day, five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.

The following requirements must be fulfilled: 45 credits in required courses, including the practica.

POST-BACCALAUREATE CERTIFICATE IN MICROBIOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student’s foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.*

The following requirements must be fulfilled: 19 credits in required courses, including the practicum.

POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE

The post-baccalaureate certificate in pre-medicine (http://smhs.gwu.edu/programs/postbac-premed) is designed to provide students with the foundational course work, standardized test preparation, and access to real-world experience necessary for a successful medical school application. This full-time program is offered at GW’s Virginia Science and Technology Campus. The program can be completed in 12 months.

The following requirements must be fulfilled: 35 credits in required courses.

GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 15 hours in required courses and one 3-credit elective course. Courses successfully completed in this program are transferable to the master of science in health sciences (M.S.H.S.) in clinical research administration degree program.

SCHOOL OF NURSING

Dean  P. Jeffries
Senior Associate Dean for Academic Affairs  M.J. Schumann
Associate Deans  C. Pintz, B. Tebbenhoff

Established in 2010, the School of Nursing (SON) has a proven record of innovation, entrepreneurship, and leadership. SON educates and inspires nurses to provide high quality, compassionate, person-centered health care. It develops leaders who actively engage in health promotion, patient advocacy, and health care innovation, and prepares nurse educators to pursue quality and advance the profession.

School of Nursing programs include the bachelor of science in nursing (B.S.N.), master of science in nursing (M.S.N.), doctor of nursing practice (D.N.P.), and multiple certificate programs. These programs emphasize the integration of nursing practice, research, and policy with a strong focus on solving practical problems. This approach promotes strong nursing practice and leadership skills in SON graduates.

Mission

The mission of the George Washington University School of Nursing is to:

- Inspire nurses to provide high quality, compassionate health care.
- Transform health care through innovative education, research, policy, and practice.
- Develop entrepreneurial leaders and educators who pursue quality and advance the profession.
- Improve the health and well-being of people and communities locally, nationally, and globally.
- Encourage lifelong learning, and its students' advance nursing practice, policy, and education as they make a difference in the world.

Program formats and locations

On-campus programs

The second-degree accelerated B.S.N. and the Veterans B.S.N. are held on GW's Virginia Science and Technology campus (VSTC) in Ashburn, Virginia. Students at the VSTC use SON’s skills and simulation laboratory, a sophisticated learning environment. In the lab, students develop competencies using high-technology manikins in multiple simulated health care settings that cross the human life span. Students experience life in a hospital long before their first clinical experience.

Distance learning programs

The M.S.N., D.N.P., and certificate programs are offered via distance learning. Programs for RNs returning to advance their education by obtaining either a BSN or an MSN are also offered as distance education programs.

Foggy Bottom campus

Some components of the distance learning programs are held on GW’s Foggy Bottom campus in downtown Washington, D.C. The campus is also home to SON’s administrative and academic program offices.

  - Scholarship Requirements (p. 814)
  - Evaluation of Academic Performance (p. 814)
  - Academic Standing (p. 815)
  - Programs of Study (p. 816)
  - Graduation Requirements (p. 817)
  - Honor Society (p. 817)
  - University Policy on Equal Opportunity (p. 817)

Admission

To be considered for admission to any GW School of Nursing (SON) program, an applicant must complete the Nursing’s Centralized Application Service (NursingCAS) (http://www.nursingcas.org) application. Applicants are required to pay an application fee for NursingCAS; the NursingCAS fee will vary based on the number of programs for which the applicant applies. Official transcripts must be submitted to NursingCAS from each academic institution attended, regardless of whether credit was earned or is desired.

Detailed application information is available on the SON website (http://nursing.gwu.edu/how-apply). Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and will not be returned. In addition, admitted applicants may need to submit information from a criminal background check, drug screen,
physical examination, and evidence of required immunizations and health insurance coverage depending on the program.

Conditional Admission
Admission with conditions may be offered at the discretion of the admissions committee and the Associate Dean for the Division. The terms of admission are outlined in the letter of acceptance from the University.

Advance Tuition Deposit
Upon notification of acceptance, an advance tuition deposit will be required of students. The deposit is credited toward tuition and is not refundable. Failure to pay this deposit may result in the revocation of a student's admission offer.

International Applicants
The following additional requirements pertain to international applicants:

Required Records
Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of CHS: keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether the official record is in English.

Language Tests
Applicants whose native language is not English or who are not citizens of countries where English is an official language must submit official test scores from either TOEFL or academic IELTS. The following are the minimum scores for admission consideration:

- TOEFL: 600 on paper-based; 100 on Internet-based
- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0

The language test requirement may be waived for applicants who hold a degree from an accredited college or university located in a country in which English is the official language and also the language of instruction at the institution.

Financial Certificate
A Financial Certificate must be completed and submitted with the application for admission for all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66. Students pursuing distance learning programs are not eligible to apply for or obtain a student visa.

Unclassified Students
A student who wishes to take individual courses in the School of Nursing must obtain permission to register as an unclassified student. Application is made to the Office of Admissions, School of Nursing. The dean's office, in conjunction with the appropriate Associate Dean for the Division, will determine whether the applicant will be granted permission to register as an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credits.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. Successful completion of coursework taken as an unclassified student does not guarantee admission to a degree program.

Readmission
Students who were previously registered in a School of Nursing program at the University but did not register during the immediately preceding semester (summer sessions excluded) must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the School of Nursing Office of Admissions from each institution attended. Applications for readmission are considered on the basis of regulations currently in effect.

Transfer Credit
Undergraduate Students
Advanced standing may be awarded for appropriate coursework completed at other accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is 'C' for coursework to be applied toward an undergraduate degree. Advanced standing may also be awarded for non-traditional classroom or clinical experience as outlined below. GW reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. The School of Nursing program will award no more than 66 credits accepted as advanced standing from a two-year institution. The School of Nursing will review relevant experiences, licensure, and certification as part of the course NURS 4121 Nursing Advancement Portfolio, to award credit to associate degree prepared nurses applying to the bachelor of science in nursing/master of science in nursing(B.S.N./M.S.N.) nursing advancement program.

Graduate Students
Up to 6 credits of coursework may be accepted as transfer credit for graduate students provided the coursework was completed within the past five years at an accredited college or university with a minimum grade of B. A limited amount of additional transfer credit may be approved upon petition to the Senior Associate Dean of Academic Affairs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Students’ completing the GW School of Nursing’s accelerated B.S.N. program will have up to 12 credits applied to the M.S.N. program at GW. The completed credits are eligible to be used for the School of

School of Nursing
Nursing’s graduate program, for a period not to exceed five years.

Degree candidates who are currently enrolled at this institution and plan to take courses at other accredited institutions for transfer credit must secure preapproval by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

Credit for College Board College-Level Examination Program (CLEP)
GW grants credit for specific examinations; those examinations that are not accepted include English composition, English composition with essay, and college mathematics. To earn credit, the student must score at the fiftieth percentile on each examination. Arrangements for taking the examinations are the responsibility of the applicant and should be made through the CLEP Board (http://www.collegeboard.com/clep).

Credit is not assigned for any examination that duplicates material studied in previously completed college coursework. Assignment of credit is determined by the School of Nursing Office of Admissions.

Criminal Background Check and Urine Drug Screen
Following acceptance into a clinical program, new students must complete a criminal background check and urine drug screen prior to the first day of their first term. These services are supplied by Castle Branch (https://www.castlebranch.com). Instructions for completing this requirement are provided upon admission. Clinical sites may require that students complete the site’s own screening for criminal background and drugs.

Financial Regulations
The following financial regulations were adopted for the academic year 2016-2017. Costs are expected to increase in subsequent years.

University Fees and Financial and Regulations
The following regulations apply to all GW students. Visit the University Financial Fees and Regulations website (p. 47) for additional information. Note that other fees and regulations included therein may not apply to students in the School of Nursing.

- Special fees and deposits (nonrefundable)
- Voluntary Library Gift
- Payment of fees
- Monthly payment plans
- Third-party payments
- Past due accounts
- Dishonored/Returned checks
- Withdrawals and refunds

Drop-Refund Schedule for on-campus students (B.S.N. only):
- On or before the end of the first week of classes: 90%
- On or before the end of the second week of classes: 60%
- On or before the end of the third week of classes: 40%
- On or before the end of the fourth week of classes: 25%
- After the fourth week of classes: None

Drop-Refund schedule for off-campus students (distance learning):
- On or before the end of the second week of classes: 90%
- On or before the end of the fourth week of classes: 50%
- After the fourth week of classes: None

School of Nursing: State Requirements
Tuition Refund for Oregon Residents Taking Online Courses Only
Oregon residents enrolled in an on-line education course are allowed a modified tuition refund policy in order to meet Oregon State Mandate OAR 583-030-0035(18)(c). An Oregon student who withdraws from an on-line course is eligible for a partial refund through the middle week of the term. Refunds are based on unused instructional time and are prorated on a weekly basis. Students must be current residents of Oregon at the time of course registration and withdrawal to be eligible for this modified refund policy.

Fall and Spring term (15 week), Oregon Residents:
- During the first week of classes: 100%
- On or before the end of the second week of classes: 87%
- On or before the end of the third week of classes: 80%
- On or before the end of the fourth week of classes: 74%
- On or before the end of the fifth week of classes: 67%
- On or before the end of the sixth week of classes: 60%
- On or before the end of the seventh week of classes: 50%
- On or before the end of the eighth week of classes: 50%
- After the eighth week of classes: None

Summer term (10 week), Oregon Residents:
- During the first week of classes: 100%
- On or before the end of the second week of classes: 80%
- On or before the end of the third week of classes: 70%
- On or before the end of the fourth week of classes: 60%
- On or before the end of the fifth week of classes: 50%
- After the fifth week of classes: None

Refund policies of the University are in conformity with guidelines for refunds adopted by the American Council...
on Education. Federal regulations require that financial aid recipients use such refunds to repay financial aid received for that semester’s attendance. This policy applies to institutional aid as well.

In no case will tuition be reduced or refunded because of absence from classes. Authorization to withdraw and certification for work done will not be given to a student who does not have a clear financial record.

Financial Aid
GW offers financial assistance to all eligible students from a variety of resources. Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need.

GW also participates in federal student aid programs from the U.S. Department of Education and student financial assistance programs from other U.S. government agencies such as the Departments of Veterans Affairs and Defense. Some states offer student financial assistance for undergraduate enrollment at GW.

In general, consideration for student financial assistance is restricted to students who are in good academic standing, meet minimum GPA and satisfactory academic progress requirements for specific awards, and are not financially encumbered by the University. Failure to meet and maintain satisfactory academic progress requirements may result in rescinding of awards.

Students in the accelerated B.S.N. program are only eligible to apply for federal direct and private alternative student loans through the Office of Student Financial Assistance (http://financialaid.gwu.edu). There are no GW grants available for this program. However, students may be eligible to apply for School of Nursing scholarships.

Several offices on campus provide information on financial assistance for graduate and certificate students. A general overview of financing options is provided in the brochure Graduate Funding Opportunities, published by the Office of Graduate Student Assistantships and Fellowships (https://graduate.admissions.gwu.edu/financial-assistance). Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. Information on the Federal Work–Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center.

Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who are at least half-time and meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of GW and cannot be returned. Federal regulations require that GW report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is assumed to be accurate at the time the current academic year Bulletin is published. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Health and Safety

Health and Accident Insurance
All GW students are required to have health and accident insurance. Students who fail to maintain such insurance may be placed on Leave of Absence without tuition refund. Undergraduate students are automatically enrolled in GW’s student health insurance program through Aetna. Students who have acquired their own insurance must provide the required information to be waived from the program and have this item removed from their bill. Graduate students must submit verification of health insurance coverage to the Clinical Coordinator. (https://nursing.gwu.edu/directory)

Immunization Requirements
It is the law in the District of Columbia that all students under the age of 26 have a record on file with GW Medical Services (https://studenthealth.gwu.edu) documenting immunity to measles, mumps, and rubella (two immunizations with the initial dose given after the first birthday or positive titers), varicella (chickenpox—by immunization, documented history of disease, or positive titers), hepatitis B series, meningococcal vaccine (or meningitis waiver), and a current tetanus/diphtheria booster (within 10 years prior to the beginning of the semester).

In addition, the School of Nursing requires all clinical students to submit verification of health and immunization status prior to commencing any clinical coursework. All undergraduate and graduate students in clinical programs must submit the required documentation to Castle Branch (https://www.castlebranch.com). All students must have a hepatitis screening test (see immunization policy (https://registrar.gwu.edu/vaccination-requirements)). Students are responsible for providing proof of immunity to measles, mumps, rubella, and varicella by titer. Students must show documentation of TdAP (Tetanus, diphtheria, acellular pertussis) within the past seven years. Skin testing for tuberculosis exposure (PPD) is required on an annual basis.
Annual influenza Immunization is required. GW Medical Services is available to provide any needed inoculations on a fee-for-service basis.

Undergraduate students who have not provided proof of necessary immunization by the end of the second week of classes may be removed from classes and will not be permitted to register for the subsequent semester until such proof is provided. Graduate students are not permitted to enroll in clinical courses without completion of immunization requirements.

**Verification of Health Status**
The School of Nursing requires for all students completion of a full physical examination within the 12 months prior to the beginning of clinical courses.

**Compliance with HIPAA and OSHA Guidelines**
The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of blood borne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Undergraduate gain required training as part of their classroom experience. Graduate students must complete the required university module on HIPAA and either provide evidence of having taken OSHA training or complete the School of Nursing's training.

**Procedures on the Evaluation of Professional Comportment**

1. **Preamble**
   Students enrolled in undergraduate and graduate degree and certificate nursing programs (“Nursing School students”) are required to conform to all rules, regulations, and policies with University-wide applicability, including those contained in the Guide to Student Rights and Responsibilities (https://studentconduct.gwu.edu/guide-student-rights-responsibilities) (hereinafter “Guide”). In this regard, the Guide’s Code of Academic Integrity, Policy on Equal Opportunity; Policy on Sexual Harassment; Student Grievance Procedures; Privacy of Student Records, and Articles I-IV, VI, and VII of the Guide’s Statement of Student Rights and Responsibilities apply to Nursing School students; however, owing to the unique curriculum and degree requirements of the School of Nursing, the following procedures govern Nursing School students (hereinafter “Procedures”).

   These Procedures supplement certain of the applicable policies established by the Guide. For instance, the process set forth in Section Q(2) of Article VI of this Bulletin is designed to provide protection against improper academic evaluation as guaranteed by Article II, Section B of the Guide (Protection Against Improper Academic Evaluation). However, these Procedures, including the rights and procedures contained in them, supersede the Guide in all instances involving alleged misconduct by Nursing School students, with the exception of matters involving alleged academic dishonesty which are processed under the Guide’s Code of Academic Integrity.

   All cases involving alleged misconduct (with the exception of those involving alleged academic dishonesty) will be processed solely under these Procedures. Further, Nursing School students accused of misconduct will be bound by only those procedures and rights specifically set out in the Procedures below, unless the School of Nursing Dean or his/her designee (hereinafter “Dean”) decides in a particular case to have the case processed under the Guide’s Code of Student Conduct. To the extent these Procedures are silent as to a particular right or procedure, such right or procedure is not intended to be afforded under these Procedures. In the case of any inconsistency or ambiguity between these Procedures and University-wide rules, regulations, and policies, including the Guide, these Procedures shall govern.

2. **Evaluation of Professional Comportment**
As members of the health care community, Nursing School students are expected to behave in a manner consistent with the principles and obligations inherent to professional practice. Professional maturity, integrity, and competence are expected of students in every aspect of the clinical setting with faculty, preceptors, coworkers, and patients. Students are obliged to practice diligence, loyalty, and discretion in the patient-provider relationship. Some behaviors or patterns, either during the didactic or clinical phase, may raise concerns as to the student's suitability to continue in the program of study. Inappropriate behaviors for a nursing student may include, but are not limited to, breaching patient confidentiality, using illegal drugs or abusing controlled substances, becoming sexually involved with a patient, undertaking a procedure or scope of practice beyond that of a student, disobeying or showing disrespect for others, threatening verbal or physical behavior toward others—including students, faculty or patients—showing a judgmental attitude toward patients, or revealing a lack of concern or compassion in practice.

The process described below is intended to address behaviors that are unacceptable to the School of Nursing and raise questions about the student’s fitness for the practice of nursing.

a. **When a problem with professional comportment (other than academic dishonesty) regarding a student is perceived,** the observer will communicate this concern to the Senior Associate Dean of Academic Affairs. If the communication is verbal, it must be confirmed immediately by a signed written statement or else it will not be pursued further.

b. **Upon receiving such a communication,** the Senior Associate Dean of Academic Affairs will create a confidential file in which all documents pertaining to the matter will be placed. The contents of the file will be preserved for a period of time not less than five (5)
years from the date of separation or graduation from the School of Nursing. Access to this file will be restricted to the student under consideration, the Senior Associate Dean of Academic Affairs, the Dean of the School of Nursing and his/her staff, the School of Nursing Ad Hoc Committee, if one is constituted, and attorneys for GW and student.

c. The Dean will notify the student in writing that s/he has received a communication from an individual who perceives that the student has a problem with professional comportment. The notice will include a copy of these Procedures.

d. The Senior Associate Dean of Academic Affairs will meet informally with the student as soon as possible. At that meeting, or as soon thereafter as possible, the Senior Associate Dean of Academic Affairs may do one or more of the following:
   i. Advise the student.
   ii. Recommend that the student seek professional assistance, at the student’s expense.
   iii. Develop additional information through contacts with the student; his/her peers, faculty, professional consultants, and/or any other source deemed to have relevant information. With the student’s concurrence, s/he may be referred for a medical, psychiatric, and/or psychological evaluation. The cost of such an evaluation will be paid by the University, and the student will be asked to authorize the professional consultant to make a written report to the Senior Associate Dean of Academic Affairs for inclusion in the student’s confidential file. This authorization of the release of information regarding a psychiatric or psychological evaluation shall be made only after the student has had an opportunity to review the written report.
   iv. Refer the case to a School of Nursing Ad Hoc Committee (“Ad Hoc Committee”).
   v. Suspend the student pending investigation and recommendation of the Ad Hoc Committee.

e. The involvement of, and actions taken by, the Senior Associate Dean of Academic Affairs may be continuing in nature; Paragraphs 6 through 19 apply if the student is referred to an Ad Hoc Committee.

f. An Ad Hoc Committee and its Chair will be named by the Senior Associate Dean of Academic Affairs. The Ad Hoc Committee, including the Chair, will consist of three faculty members from the School of Nursing.

g. The Senior Associate Dean of Academic Affairs will notify the student, in writing, of the composition of the Ad Hoc Committee. The student will be allowed ten (10) calendar days from the mailing of this notice to object to any person’s appointment to the Ad Hoc Committee. Such objection must be sent to the Senior Associate Dean of Academic Affairs in writing. The Senior Associate Dean of Academic Affairs will, at his/her sole discretion, determine whether an objection warrants the appointment of one or more different persons to the Ad Hoc Committee, who shall be selected as set forth in subsection (vi) above.

h. The Ad Hoc Committee will investigate the allegation. The Ad Hoc Committee will review the student’s confidential file and interview him or her. The Ad Hoc Committee also may gather and review other material and interview any other person who the Ad Hoc Committee, at its sole discretion, has reason to believe may have relevant information to contribute.

i. The student under review and/or the student’s advisor may attend the information gathering sessions. The information sessions will be recorded or transcribed; the method used is at the discretion of the Ad Hoc Committee. The student and/or his or her advisor may submit written questions to be answered by persons interviewed by the Ad Hoc Committee, but the procedure regarding their questioning is left to the sole discretion of the Ad Hoc Committee, including whether the questions submitted by the student and/or his or her advisor will be modified and/or posed to the persons interviewed. The student also may suggest persons to be interviewed by the Ad Hoc Committee, but the decision to interview such persons is left to the sole discretion of the Ad Hoc Committee. The student may speak on his/her behalf and may submit other material. The student’s advisor may not speak. The materials and/or testimony to be considered and the weight to be given to them are left to the sole discretion of the Ad Hoc Committee. The information sessions should not become excessively legalistic and are not conducted as criminal or civil trials. The legal rules of evidence, including, but not limited to, those rules regarding relevancy, hearsay, and admissibility are not applicable and the criminal and/or civil standards of due process are not controlling. The student and the student’s advisor cannot be present when the Ad Hoc Committee meets in executive session.

j. Meetings of the Ad Hoc Committee are confidential. Minutes of the Ad Hoc Committee will be placed in the student’s confidential file upon the completion of the Ad Hoc Committee’s review.

k. The Chair and all members will be required to be present for all meetings of the Ad Hoc Committee. Meetings may be conducted by conference call when it is not possible for all members to be present physically.

l. The Ad Hoc Committee will make its final recommendation(s) to the Senior Associate Dean of Academic Affairs. Such recommendation(s) will be in writing and shall include findings of fact and the reasons for the recommendation(s). There is no required format for the recommendation(s). The content of the recommendation(s), including the nature and specificity of the findings and reasons, is left to the sole discretion of the Ad Hoc Committee. The Chair may review and
sign the final recommendation(s) on behalf of the Ad Hoc Committee. The recommendation(s) could include, but is (are) not limited to, one or more of the following:

i. Advising the student.
ii. Recommending that the student seek professional assistance, at the student’s expense.
iii. Recommending conditions with which the student must comply in order to continue in the School of Nursing.
iv. Recommending temporary suspension from the School of Nursing.
v. Recommending dismissal from the School of Nursing.

The Ad Hoc Committee must agree that its recommendation(s) is (are) supported by a preponderance of the evidence (more likely than not). The Ad Hoc Committee shall make an additional recommendation regarding whether the confidential file will be made part of the student’s permanent academic file.

m. The Ad Hoc Committee will forward its recommendation(s) to the Dean and shall send a copy to the student.

n. The Dean will review the student’s confidential file and the recommendation(s) of the Ad Hoc Committee. The Dean, at his/her sole discretion, may meet with the student prior to making his/her determination.

o. The Dean will take whatever action s/he deems appropriate, including dismissal of the student from the School of Nursing. The Dean will inform the student in writing of his/her decision.

p. The student shall have fifteen (15) calendar days in which to appeal the decision of the Dean. Such appeal shall be in writing sent to the Provost and Executive Vice President for Academic Affairs of the University. The scope of this appeal is limited to the Provost and Executive Vice President for Academic Affairs or his/her designee’s determination as to whether the procedures set forth in these Procedures have been complied with. Failure to appeal the decision shall be deemed a waiver of any and all rights to challenge the Dean’s decision and shall be deemed an acceptance of the decision.

q. The Provost and Executive Vice President for Academic Affairs or his/her designee will make his/her decision in the written record of the proceedings. His/her decision shall be final.

r. At any time during the process, if the student in question selects an attorney as his or her advisor, GW will have its attorney present. The student, therefore, is required to inform the Office of the Dean two (2) days in advance of the hearing if counsel is to be present.

Academic Regulations

Many School of Nursing programs are taught in whole or in part via distance learning. Students enrolled in such programs must have specified hardware and software and meet specific technical requirements. Check your computer’s readiness for distance learning (https://it.gwu.edu/tech-commons).

The School of Nursing publishes student handbooks each academic year that contains updated information on policies, regulations, and other matters of concern to matriculated students. It is the responsibility of the student to be aware of the information contained in this Bulletin and the applicable program-specific student handbook.

Scholarship Requirements

In order to graduate, undergraduate students must maintain a minimum GPA of 3.0 in courses required in the major during their degree program. A minimum grade of B is required in clinical courses and a minimum grade of C is required in didactic courses.

In order to graduate, graduate students must maintain a minimum GPA of 3.0 during their degree program. A minimum grade of B is required in clinical courses and in advanced pathophysiology, advanced pharmacology, and advanced health assessment courses and a minimum grade of C is required in other didactic courses.

In some cases, programs may establish higher GPA requirements.

Although transfer credit may be assigned, courses taken at other institutions are not considered in computing the GPA. CR (Credit); AU (Audit) P (Pass); NP (No Pass); I (Incomplete); IPG (In Progress); W (Authorized Withdrawal); and Z (Unauthorized Withdrawal).

Evaluation of Academic Performance

Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assignment of grades rests with faculty members in the respective programs. Official grades for coursework can be obtained through Degree Map (https://registrar.gwu.edu/degremap).

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs

In the School of Nursing, grades that may be assigned are A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree in the School of Nursing may not repeat a course in which a grade of C or higher was received, or a clinical course in which a grade of B or higher was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on
the student’s record and is included in the cumulative GPA. Please see Progression statement for further policy on course repetition. Grades and designations that may appear on the transcript include CR (Credit); AU (Audit) P (Pass); NP (No Pass); I (Incomplete); IPG (In Progress); W (Authorized Withdrawal); and Z (Unauthorized Withdrawal). These grades and designations are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs
In the School of Nursing, grades that may be assigned are A, A-, B+, B, B-, C+, C, C-, and F. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate in the School may not repeat a course in which a grade of C or higher was received, or a clinical course in which a grade of B or higher was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on the student’s record and is included in the cumulative GPA. Please see Progression statement for further policy on course repetition. Grades and designations that may appear include CR (Credit); AU (Audit) P (Pass); NP (No Pass); I (Incomplete); IPG (In Progress); W (Authorized Withdrawal); and Z (Unauthorized Withdrawal). These designations are not considered in determining the GPA.

Incomplete/In Progress
The designation I (Incomplete) may be used at the discretion of the instructor. An Incomplete indicates that the instructor has received a satisfactory explanation for the student’s inability to complete the required work of the course. The grade may be used only if the student’s prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned in will be graded F. Incomplete work must be made up by a date agreed upon by the instructor and the student, but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the grade of I is assigned. An extension of one additional semester can be requested by the student and may be approved by the Associate Dean for the Division. When work for the course is completed, the grade earned will replace the grade of I on the student’s transcript. An Incomplete that is not changed within the allotted time automatically becomes an F.

The symbol of IPG is reserved for courses (such as special projects or clinical courses) in which the course requirements may extend beyond the official GW deadline for submitting grades. IPG must be completed during semester following the course in which designation was assigned. Once the course has been completed, the IPG will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal
The symbol of Z is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students’ records are reviewed; if there is more than one Z per semester, a student’s record will be encumbered until released by the Associate Dean for the Division or the Senior Associate Dean of Academic Affairs. The symbol of Z is not a grade but an administrative notation.

The Grade-Point Average
Scholarship is computed in terms of the grade-point average, based only on the student’s record in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit hour for which the student has registered in a degree program. Grades below C will be computed in the grade-point average but will not be considered as fulfilling degree requirements. Courses in which an I or IPG has been assigned will be included when a final grade has been recorded.

Dean’s List
The name of any full-time undergraduate student who achieves a GPA of 3.5 or higher in any one semester with no grades below B- will be placed on the Dean’s List for that semester.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation
Students who believe that a grade or evaluation is unjust or inaccurate may submit a petition through the program that offers the course. If a mutually satisfactory resolution is not achieved, the student may use the following appeal procedures:

1. The student must submit a written appeal to the Senior Associate Dean of Academic Affairs within five (5) days of posting the grade.
2. The Senior Associate Dean of Academic Affairs will meet with the student to attempt to resolve the issue.
3. If the issue cannot be resolved, the Senior Associate Dean of Academic Affairs will form a three-person special committee (“Grade Appeal Committee”). The Grade Appeal Committee will consist of three (3) members of the School of Nursing faculty.
4. The Grade Appeal Committee will conduct a hearing at which the student and the faculty member have an opportunity to state, in each other’s presence, their views on the academic evaluation at issue.
5. The Grade Appeal Committee will make a recommendation to the Dean regarding how the issue should be resolved. The Dean shall make the final decision regarding the grade appeal and will advise the student and the faculty member in writing of his or her decision.

Academic Standing
An enrolled student is considered to be in good academic standing by the School of Nursing provided that he or she is not on probation nor been suspended.
Warning
An undergraduate student or graduate student whose GPA falls between 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

A graduate student whose GPA falls between 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

Academic Probation
A full-time undergraduate student who has attempted a minimum of 12 credits of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 12 credits of coursework. While on probation, the student will be allowed to register for no more than 13 credits per semester, unless approved by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

A part-time undergraduate student who has attempted a minimum of 6 credits of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 6 credits of coursework.

A full- or part-time graduate student who's cumulative GPA falls below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. For full-time students, probation extends for one semester of full-time coursework as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credits of coursework.

Progression
In undergraduate programs, any grade below a C in supporting courses, or below a B in clinical courses, is not satisfactory and the student will not be permitted to progress as planned under the original program of study, but will have a new program of study as recommended by the student’s advisor and the Associate Dean for the Division of Undergraduate Studies. An unsatisfactory grade or a grade of F on a second attempt is grounds for dismissal. B.S.N. students who are absent from their program for one semester or more, regardless of the reason, may be required to be reexamined on clinical competencies before resuming their studies. Accelerated B.S.N. program students must complete their program of study in no more than six (6) semesters of enrollment, excluding leaves of absence.

In graduate programs, any grade below a C in supporting courses or less than B in clinical courses, pathophysiology, pharmacology, and advanced health assessment is not satisfactory. A student receiving an unsatisfactory grade may attempt a course a second time; an unsatisfactory grade or a grade of F on a second attempt is grounds for dismissal. Any graduate student who earns a grade below a B in a clinical course will not progress in the clinical portion of the program until that course is successfully completed. Both grades remain on the student's transcript and are calculated in the final GPA. Graduate students must complete their degree program within five (5) years.

Suspension
An undergraduate student whose cumulative GPA remains below 3.0 after a period of probation may be suspended. A student suspended for poor scholarship may not register for any coursework at the University, even as an auditor. A suspended student may apply for readmission after the lapse of the semester following suspension. Evidence must be presented to the Senior Associate Dean of Academic Affairs, through the Associate Dean for the Division, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted.

A graduate student who is suspended for failure to raise the cumulative GPA to 3.0 may apply for readmission after the lapse of one calendar year by submitting evidence that he or she is better prepared to pursue graduate coursework. If the student fails to achieve the minimum GPA of 3.0 at the end of the semester following readmission, the Associate Dean for the Division may recommend that graduate study be terminated and further enrollment prohibited.

Dismissal
Any student who has received one or more unsatisfactory grades during a semester may be recommended for dismissal by the Associate Dean for the Division. This will be reviewed by the Senior Associate Dean of Academic Affairs. The final decision regarding dismissal will be made by the Dean.

Programs of Study
Students enrolled in undergraduate, graduate, or certificate programs must meet with their faculty advisor, in person or electronically, in order to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program.

Transfer within the School of Nursing
To apply for a transfer from one program to another within the School, a written request must be submitted to the School of Nursing Office of Student Services, along with the necessary supporting documentation required by the program. Transfers will be considered individually by the Associate Dean of the Division and the Senior Associate Dean in consultation with the director of the program within the SON program to which the students wishes to transfer. Consideration will include the

The George Washington University 2016-17 Academic Bulletin
student's prior and current academic performance and the current enrollment within the proposed program.

Changes in course enrollment within the School of Nursing
A student may not substitute one course for another without approval of the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the Associate Dean for the Division, and the Senior Associate Dean of Academic Affairs to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses
During the registration period and before the end of the second week of classes students may add or drop courses using GWeb (https://banweb.gwu.edu/PRODCartridge/twbkwbis.P_WWWLogin). After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (http://registrar.gwu.edu/registration-forms) and submit the form to the Office of the Dean; forms are available online, at SON offices, and in the Office of the Registrar (http://registrar.gwu.edu). Adding a course after the second week requires a signature of the instructor or other authorized member of the School.

A course dropped during the first four weeks of classes will not appear on the student's transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of W (Authorized Withdrawal). The deadline for dropping a course without academic penalty is the end of the eighth week of classes in the fall and spring semesters. After the end of the eighth week of classes, dropping a course without academic penalty is only possible after the student presents a petition (https://nursing.gwu.edu/forms-policies) to the Senior Associate Dean of Academic Affairs and receives written permission.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations (p. 47) in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of F or a notation of Z.

Graduation Requirements
Degrees are conferred in January, May, and August. Graduating students are strongly encouraged to participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for coursework or for continual enrollment, is required for the semester or summer session at the close of which the degree is to be conferred.

Applications (https://registrar.gwu.edu/online-graduation-application-instructions) for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Residence Requirements
A minimum number of credits must be completed satisfactorily in residence in the School of Nursing. See information on the School of Nursing website (https://nursing.gwu.edu) for specific information regarding the accelerated or veteran B.S.N. and the B.S.N./M.S.N. program for associate degree prepared RNs. Students in all other master of science in nursing and doctor of nursing practice programs must take all but 6 of the total required credits in residence. Courses applicable to the degree taken while registered in any division of GW in the semester immediately prior to admission to degree candidacy in the School of Nursing are counted as courses in residence.

Honors
Bachelor’s degrees with honors are awarded to students whose academic records give evidence of particular merit. The student’s grade-point average determines the level of honors as follows: *cum laude*, 3.4 to 3.59; *magna cum laude*, 3.6 to 3.79; *summa cum laude*, 3.8 to 4.0. The grade-point average includes all coursework completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 credits of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credits required for the degree. Honors indicated on the diploma are calculated on the basis of all coursework completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Honor Society
The School of Nursing Phi Epsilon chapter is a chartered member of Sigma Theta Tau International (http://phiepsilon.nursingsociety.org/phiepsilonchapter/home), the national honor society of nursing. School of Nursing students who meet the qualifications specified by the constitution of Sigma Theta Tau are eligible for membership and may be nominated by an Associate Dean for the Division, faculty member, or a Sigma Theta Tau member.

University Policy on Equal Opportunity
GW does not unlawfully discriminate against any person on any basis prohibited by federal law, the District of Columbia Human Rights Act, or other applicable law, including without limitation, race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity or expression. This policy covers all programs, services, policies, and procedures
of the University, including admission to education programs and employment.

UNDERGRADUATE

Undergraduate programs

- Bachelor of Science in Nursing (p. 829)
- Associate’s Degree in Nursing Pathway to Bachelor of Science in Nursing (p. 824)
- Associate’s Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner (p. 825)
- Associate’s Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Family Nurse Practitioner (p. 826)
- Associate’s Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse-Midwifery (p. 827)
- Associate’s Degree in Nursing Pathway to Bachelor of Arts or Bachelor of Science to Master of Science in Nursing (p. 828)

Please note: While it will not affect degree requirements for students entering in 2016-17, the titles and number of credits assigned to Nursing (NURS) courses are subject to change. Please consult the School of Nursing website (https://nursing.gwu.edu) for up-to-date course information.

GRADUATE

Master's programs

- Master of Science in Nursing in the field of Adult-Gerontology acute care nurse practitioner (p. 830)
- Master of Science in Nursing in the field of Adult-Gerontology primary care nurse practitioner (p. 831)
- Master of Science in Nursing in the field of Family nurse practitioner (p. 832)
- Master of Science in Nursing in the field of Nurse-Midwifery (p. 834) (collaborative program between GW School of Nursing and Shenandoah University (http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs))
- Master of Science in Nursing in the field of Nursing Leadership and Management (p. 835)

Combined programs

- Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 836)
- Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (p. 836)

Please note: While it will not affect degree requirements for students entering in 2016-17, the titles and number of credits assigned to Nursing (NURS) courses are subject to change. Please consult the School of Nursing website (https://nursing.gwu.edu) for up-to-date course information.

Doctor of Nursing Practice program

- Doctor of Nursing Practice (p. 837)
  - Education concentration
  - Executive leadership
  - Family specialty for nurse practitioners
  - Health care quality
  - Palliative care specialty for nurse practitioners

CERTIFICATE

In addition to degree programs in which a certificate is awarded along with the degree, the School of Nursing offers post-master’s certificate-only programs* in the following specialties:

- Adult-Gerontology Acute Care Nurse Practitioner (p. 840)
- Adult-Gerontology Primary Care Nurse Practitioner (p. 840)
- Family Nurse Practitioner (p. 840)
- Family Specialty for Nurse Practitioners (p. 840)
- Nursing Education (p. 841)
- Palliative Care Nurse Practitioner (p. 841)
- Psychiatric Mental Health Nurse Practitioner (p. 841)

Visit the School of Nursing Office of Admission website (https://nursing.gwu.edu/admissions-financial-aid) for additional information.

*As used in this section, “certificate program” refers to an established program in which just the certificate is awarded upon completion, rather than a degree program in which both a degree and a certificate are awarded at completion.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

NURS 3101. Ethical Foundations of Nursing. 3 Credits.
Theories and principles related to common ethical and moral dilemmas faced by nursing professionals in their clinical practice. Methods of analyzing and resolving moral dilemmas using clinical decision making frameworks; methods for increasing awareness by examining and understanding the impact of the nurse’s own value system.

NURS 3102. Nutrition for Health Professionals. 3 Credits.
Fundamentals of human nutrition and their scientific foundations. Nutritional requirements related to changing individual and family needs; food choices, health behaviors, food safety, prevention of chronic disease, and nutrition-related public health in the United States and globally.

NURS 3103. Human Anatomy and Physiology I. 4 Credits.
Designed for students entering the allied health professions. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology, integumentary; and skeletal, muscular, nervous and endocrine systems. Requires a basic background in introductory cell/molecular biology; an equivalent course with a minimum grade of C may be substituted for the prerequisite. Prerequisite: BISC 1111.

NURS 3104. Human Anatomy and Physiology II. 4 Credits.
Continuation of NURS 3103. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology; and cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Requires a basic background in introductory cell/molecular biology. Prerequisite: NURS 3103.

NURS 3110. Transition into the Nursing Profession. 2 Credits.
Historical and evolutionary perspectives in nursing in the context of current issues and trends in health care delivery and professional nursing. Values and characteristics of professional nursing practice by examining legal, regulatory, ethical issues, critical reasoning, evidence-based practice, and nursing self-care. Same as NURS 3110W.

NURS 3110W. Transition: Nursing Profession. 2 Credits.
Historical and evolutionary perspectives in nursing considered in the context of current issues and trends in health care delivery and professional nursing. The values and characteristics of professional nursing practice are examined in terms of legal, regulatory, and ethical issues as well as critical reasoning, evidence-based practice, and nursing self-care.

NURS 3111. Foundations of Health Assessment. 3 Credits.
Development of the knowledge and skills necessary for conducting comprehensive and need-specific health assessments for individuals in the context of their family and community; determining areas in which health promotion activities should be implemented or reinforced. Students use structured interviews to elicit health histories and health practices and perform physical examinations in a systematic manner. Identification of a broad range of normal variations through practice with peers in the laboratory setting. Nursing practice in the laboratory setting, including physical mobility, safety, infection control, drug calculation, medication administration, and other health technologies.

NURS 3112. Nursing Practice and Clinical Reasoning 1: Adult and Aging Acute and Chronic Illness. 3 Credits.
The values, knowledge and competencies at the foundation of safe, evidence-based, professional holistic nursing care of adults with common medical and surgical needs; essentials of the nursing process and disease process; expected outcomes and effects of nursing interventions with adults experiencing selected health conditions at multiple levels of care.

NURS 3113. Clinical Skills Lab: Adult Medical-Surgical 1. 6 Credits.
Foundational values, knowledge, skills, and competencies for safe, evidence-based, professional, and holistic nursing care of adults with common medical and surgical needs, and using critical thinking and effective communication skills to deliver such care in clinical and laboratory environments.

NURS 3114. Nursing Practice and Clinical Reasoning 2: Advanced Adult Medical-Surgical. 3 Credits.
Builds upon the basic concepts introduced in NURS 3112 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3115. Clinical Skills Lab: Adult Medical-Surgical 2. 4 Credits.
Builds upon the basic concepts introduced in NURS 3113 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.
NURS 3116. Nursing Practice and Clinical Reasoning 3: Psychiatric Mental Health. 3 Credits.
Theoretical principles, concepts, and skills applicable to the provision of safe and effective nursing interventions to clients across the lifespan who are experiencing psychiatric and mental health conditions. Application of scientific principles; assessing, planning, and evaluating nursing interventions; developing therapeutic communication, critical reasoning, and analytical skills. Practical learning for promoting wellness of clients in acute and/or community-based psychiatric health care settings. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113, and NURS 3118.

NURS 3117. NPCR 5: Children & Families. 3 Credits.
Graduate level nurses integrate and synthesize concepts related to quality, health promotion, disease prevention, and chronic health problems with communities, the general population, and specific population groups. Issues related to culturally diverse and vulnerable populations.

NURS 3118. Pharmacology 1. 2 Credits.
The underlying principles of pharmacology and medication administration; historical perspective on pharmacotherapy, legal/ethical responsibilities of the nurse in drug administration, regulatory (FDA) drug approval process, major drug classifications, and nursing management required for drug therapy; basic principles of pharmacokinetics, pharmacodynamics, pharmacotherapeutics, medication calculations, drug-drug interactions, contraindications/precautions, and adverse effects; the nursing process and patient teaching principles as they relate to pharmacologic concepts.

NURS 3119. Pathophysiology. 3 Credits.
Pathophysiology of common disease conditions affecting human beings across the lifespan; regulatory and compensatory mechanisms related to commonly occurring diseases; pathophysiologic bases of common human health alterations, associated clinical manifestations, and diagnostic assessments for each disease process.

NURS 4099. Variable Topics. 1-6 Credits.
Assigned topics determined by the School of Nursing. Restricted to students with prior permission of the undergraduate division of the School of Nursing.

NURS 4116. NPCR 5: Children & Families. 3 Credits.

NURS 4117. NPCR 6: Epidemiology & Comm Health. 3 Credits.

NURS 4118. Pharmacology 2. 1 Credit.
Principles of pharmacology and mechanisms of action of drug prototypes used in clinical practice; drug interactions, side effects, and contraindications as the foundation for clinical judgment and management of patients across the lifespan; dosage calculations for oral and parenteral medications and their safe administration; common pathophysiological disorders and the specific drug classes used in their management; educating patients and families concerning safe medication administration and other topics.

NURS 4119. Patient Safety & Health Care Quality. 3 Credits.

NURS 4120. Capstone: Transition to Practice. 6 Credits.

NURS 4121. Nursing Advancement Portfolio. 0-15 Credits.
Upon admission to one of the Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing programs, a student's professional portfolio is evaluated and between 0-15 credits are awarded as part of the total credits required for the bachelor's degree. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118. In lieu of tuition, a $500 portfolio evaluation fee is charged for this course.

NURS 4418. Pharmacology 2. 1 Credit.

NURS 6180. Dimensions of Prof. Nursing. 3 Credits.

NURS 6202. Concepts in Population Health. 3 Credits.
Graduate-level nurses integrate and synthesize concepts related to quality, health promotion, disease prevention, and chronic health problems with communities, the general population, and specific population groups. Issues related to culturally diverse and vulnerable populations.

NURS 6203. Nursing Leadership. 3 Credits.
Evidence-based leadership skills as a core competency in nursing to improve quality in patient care and strengthen nursing as a profession. Emphasis on theories of leadership, personal leadership, skill building, team-building techniques, change, conflict resolution, motivation, and communication skills.

NURS 6204. Health Information and Technology. 3 Credits.
Key issues and concepts related to the use of technology and information management to support the provision of high quality health care and outcomes.

NURS 6205. Health Policy, Quality, Political. 3 Credits.
The health policy process and analysis relevant to the three main thrusts of policy: cost, quality and access. Political, social, economic, and population factors that influence this process. Comparisons to health systems in other countries as appropriate. Quality science and informatics in the context of interdisciplinary, coordinated, and ethical health care delivery.

NURS 6207. Evidence-Based Practice for Health Care Researchers. 3 Credits.
The methodological issues of health care research. Appraisal and synthesis of research results and evidence-based methods. Identification and use of appropriate inquiry methodologies; ethical implications of research and translational scholarship.

NURS 6208. Biostatistics for Health Care Research. 3 Credits.
Introduction to the basic ideas and modeling approaches used in biostatistics through the use of health care research data. Descriptive and inferential statistics; identification of appropriate statistical procedures and estimation of appropriate sample size. Application of univariate, bivariate, and multivariate statistical procedures.
NURS 6209. Transitional Care. 3 Credits.
Transitional care planning and implementation, including pertinent health care policy, transitional care models, interdisciplinary collaboration, quality outcomes, multifaceted interventions, and the patient engagement dynamics that influence patient-centered care transitions in the current health care environment. Recommended background: BSN.

NURS 6210. Building a Quality Culture. 3 Credits.

NURS 6211. Health Care Quality Landscape. 3 Credits.

NURS 6212. Quality Improvement Science. 3 Credits.

NURS 6213. Health Care Quality Analysis. 3 Credits.

NURS 6214. Patient Safety Systems. 3 Credits.

NURS 6220. Advanced Physiology and Pathophysiology. 3 Credits.
System-focused advanced physiology and pathophysiology for analysis of health deviations across the life span. Interpretation of changes in normal function that result in symptoms indicative of illness. This systematic assessment is foundational to clinical decision making and management of health deviations.

NURS 6222. Advanced Health Assessment and Diagnostic Reasoning. 4 Credits.
Nurse Practitioner and nurse-midwifery students will acquire the knowledge, skills and clinical foundation for advanced health assessment and diagnostic reasoning in the ambulatory health care setting. This course is a prerequisite to all other clinical courses and includes a fifteen-week online didactic course, a 75-hour clinical practicum and a three day, on-campus skills training session.

NURS 6224. Adult/Gerontology Primary Care Nurse Practitioner 1, Practice Introduction. 4 Credits.
Theoretical and practical foundations of common primary care conditions in the adult patient. Assessment, diagnosis, and management of culturally diverse adults. Advanced decision making and clinical judgment, evidence-based practice, health promotion and disease prevention. Concurrent clinical practicum in a primary care setting under the supervision of preceptors and faculty. Prerequisites: NURS 6220, NURS 6222, NURS 6234.

NURS 6225. Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult. 8 Credits.
Theoretical and practical foundations of primary care of culturally diverse adolescents, adults, and older adults with chronic health problems. Synthesis and integration of advanced decision-making skills, including diagnostic reasoning and clinical judgment, health assessment, health promotion, technology, and evidence-based practice. Concurrent clinical practicum in which students manage patients in a primary care setting under the supervision of preceptors and faculty. A two- to three-day on-campus session is required. Prerequisites: NURS 6224.

NURS 6226. Primary Care of the Family. 5 Credits.
The theoretical and practical foundations of family primary care.

NURS 6227. Family Nurse Practitioner Clinical Practicum. 1-7 Credits.
Clinical experiences focused on the primary care needs of women, adults, older adults, children, and childbearing families. Students complete a total of 7 credits in this course as their clinical experience.

NURS 6228. Advanced Family Primary Care. 5 Credits.
Seminar and clinical practicum focusing on the integration of the family nurse practitioner role through the application of family theory and evidenced-based practice in primary care settings.

NURS 6229. Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail. 8 Credits.
Theoretical and evidence-based practice foundations for assessment and management of patients across the aging continuum. The physiologic, psychological, socioeconomic, emotional, cultural, and spiritual dimensions of the older adult in relationship to self, family, care-givers, and the health-care system are emphasized. Concurrent clinical practicum in which the student manages patients across the older-age spectrum under the supervision of preceptors and faculty. An on-campus visit is required in which students participate in a Standardized Patient final examination test-out. Prerequisites: NURS 6225.

NURS 6230. Family Nurse Practitioner 1, Lifespan Primary Care/Diagnosis/Management. 4 Credits.
First clinically based course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: NURS 6220 Advanced Pathophysiology, NURS 6222 Advanced Health Assessment, NURS 6234 Advanced Pharmacology.

NURS 6231. Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management. 8 Credits.
Second clinically based course for family nurse practitioner students. Didactic and clinical experiences in family nurse practitioner care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: N6220 Advanced Pathophysiology, N6222 Advanced Health Assessment, N6234 Advanced Pharmacology, N6230 FNP 1.

NURS 6232. Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management. 8 Credits.
Third course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Consideration of professional issues for FNP’s: Role development, certification, ethical issues in practice, interprofessional collaboration, and health care reimbursement issues are discussed and related to current clinical experiences. Prerequisites: Nurs 6220 Advanced Pathophysiology, Nurs 6222 Advanced Health Assessment, Nurs 6234 Pharmacology, Nurs 6230 FNP 1, Nurs 6231 FNP 2.

NURS 6233. Genetics for Healthcare Providers. 3 Credits.
Basic scientific principles of genetics and their clinical applications.
NURS 6234. Advanced Pharm for Nursing. 3 Credits.
This course will cover an introduction to pharmacotherapeutics as it primarily applied to Advanced practice Nurses in Primary Care settings. The course will briefly review key pathophysiologic points, and then will discuss the pharmacotherapeutic interventions that may be considered in the treatment of disease. The course will begin with a general introduction to the foundations for professional practice and the concepts of pharmacoeconomics, pharmacokinetics, pharmacodynamics, and pharmacogenetics will be introduced. Issues surrounding community practices in pharmacotherapeutics will be explored. The course will then focus on pharmacological interventions in the spectrum of disease states seen in primary care practices involving the Nervous system, Immune System, Cardiovascular system, Hematologic system, Genitourinary system, Gastrointestinal system, Respiratory system, Endocrine system, Sensory systems, and the Skin.

NURS 6235. Adult-Gerontology Acute Care Nurse Practitioner 1: Introduction to Practice. 4 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; advanced decision making and clinical judgment in the application of evidence-based practice, health promotion, and disease prevention; acute and chronic conditions most commonly encountered across the spectrum of care delivery settings; theoretical, academic, and political elements involved in the evolution of the AGACNP role. In the required clinical practicum students manage patients’ acute, chronic, and critical conditions under the supervision of preceptors and faculty. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6236. Adult-Gerontology Acute Care Nurse Practitioner 2: Complex and Acute Illness. 8 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. Management of complex, acute stable and unstable conditions experienced by a variety of age groups from adolescents to middle-aged adults, to the elderly; application of advanced assessment techniques and technology for the diagnosis and management of patients. Both clinical and simulation experiences provide students with opportunities to provide advanced evidence-based interventions. Prerequisites: NURS 6235. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6237. Adult-Gerontology Acute Care Nurse Practitioner 3: Complex and Chronic Disease Mgt Adolesc/Elderly. 8 Credits.
The third clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and the practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; the scope of practice of the AGACNP is not setting specific; rather, it is based on the needs of patients. Special issues for adolescents and the frail elderly and evaluation of care for adolescents, adults, and the elderly. Prerequisites: NURS 6235 and NURS 6236. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6239. Bridge to Nurse Midwifery. 1 Credit.

NURS 6241. The Health Care Enterprise. 3 Credits.
Overview of general management business principles related to health care systems. Management of patient-centered care delivery; strategic health care leadership; organizational, marketing, and fiscal management principles. Same as HSCI 6241.

NURS 6242. Psychopharmacology. 3 Credits.
Essential theoretical foundations of neurobiology and psychopharmacology for nurse practitioners to provide safe behavioral health care across the lifespan. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6243. Addiction and Change. 3 Credits.
Principles of addiction and change with a focus on correlating how changes in behavior lead to recovery in addictions. Models of addiction and change, the neurobiology of addiction, behavior change theories and models, and treating addictions through behavioral mechanisms.

NURS 6244. Foundations for Psychiatric-Mental Health Nurse Practitioners. 3 Credits.
The nurse practitioner’s role in providing behavioral health care in various health care systems across the lifespan; theoretical foundations for managing all phases of therapeutic relationships; psychosocial and risk assessment that meets clinical standards of care. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6245. Mental Health Diagnostic Assessment Across the Lifespan. 3 Credits.
Assessment framework for formulating accurate diagnoses of mental health disorders across the lifespan using criteria outlined in the Diagnostic and Statistical Manual of Mental Health Disorders-5 (DSM-5). Prerequisites: NURS 6220, NURS 6222 and NURS 6234.
NURS 6246. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 1. 2 Credits.
Designed to build beginning level psychiatric mental health nurse practitioner skills with patients across the lifespan and in a variety of clinical settings. Students integrate knowledge from didactic and clinical course work to provide safe and competent behavioral healthcare. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6247. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 2. 2 Credits.
Designed to build psychiatric mental health nurse practitioner skills in a variety of clinical settings. Students integrate foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: Nurs 6220, Nurs 6222, Nurs 6234 and NURS 6246.

NURS 6248. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 3. 3 Credits.
Developing competency in the PMHNP role. Students integrate foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6244, NURS 6245, NURS 6246 and NURS 6247.

NURS 6249. Psychotherapeutic Treatment Modalities. 3 Credits.
Evidence-based psychotherapeutic treatment modalities used by the nurse practitioner in providing behavioral health care across the lifespan. Theoretical foundations for selecting and using psychotherapeutic interventions as part of the treatment plan. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6242, NURS 6243, NURS 6244, NURS 6245, NURS 6246 and NURS 6247.

NURS 6256. Intro to Palliative Care. 3 Credits.

NURS 6258. Leadership Capstone Pract I. 3 Credits.
Nursing 6258 is the first of a two-semester capstone course designed to provide a mentored practicum that offers the opportunity to apply leadership content and refine leadership abilities in a setting and practice area mutually agreed upon by the student and course faculty.

NURS 6259. Leadership Capstone Pract II. 3 Credits.
Nursing 6259 is a continuation of NURS 6258 and is designed to provide a mentored internship practicum, the opportunity to apply leadership content, and refine leadership abilities.

NURS 6260. Foundations of Coaching. 3 Credits.
Nurse coaching methodology and competencies. Leadership and therapeutic relationship skills and the theory and meta-science fundamental to each skill. Assessing readiness for change, building trust and warmth, obtaining and holding the clients agenda, visioning, awareness raising techniques, brainstorming, and goal setting.

NURS 6261. Advanced Coaching Skills. 3 Credits.
Builds on concepts introduced in NURS 6260. Multidisciplinary and nursing theories foundational to nurse coaching. Advanced coaching techniques and common coaching topics and contexts such as weight loss, stress and time management, and executive coaching. Prerequisites: NURS 6260.

NURS 6262. Leadership Coaching in Nursing. 3 Credits.
Theoretical foundations and evidence for leadership coaching in nursing; the different applications of coaching in nursing management. Executive coaching, team coaching, peer coaching, and personal career coaching. Application and evaluation of multiple models, competencies, and methodologies for nursing leadership coaching through learning activities and live demonstration. Creation of a complete evidence-based coaching strategy for a case study.

NURS 6272. HumanResrcDev/HlthProfPractice. 3 Credits.

NURS 6273. Health Info Quality & Outcomes. 3 Credits.

NURS 6274. Health Economics & Finance. 3 Credits.

NURS 6275. Leadership &Change/Health Care. 3 Credits.

NURS 6276. Foundations of Palliative Care. 3 Credits.

NURS 6277. Pain and Suffering. 3 Credits.

NURS 6278. PalliativeCare:Chronic Illness. 3 Credits.

NURS 6279. Palliative Care Practicum I. 1-4 Credits.

NURS 6280. Palliative Care Practicum II. 1-4 Credits.

NURS 6281. PC Leadership and Management. 2 Credits.

NURS 6291. AdvTopics. 1-9 Credits.

NURS 6292. Teachw/Tech.inHealthProfession. 3 Credits.

NURS 6293. Health Ed.for Indiv&Community. 3 Credits.

NURS 6294. SpiritBelief&Pract/HlthCare. 3 Credits.

NURS 6295. Health Care Quality Process. 3 Credits.

NURS 6296. Ped Health Assess & Pharm. 1 Credit.

NURS 6297. Independent Study. 1-9 Credits.

NURS 6298. NP Clinical Completion. 1-5 Credits.

NURS 6299. Healthcare Quality Practicum. 3 Credits.

NURS 8401. Org Concepts in Nursing. 3 Credits.

NURS 8402. Knowledge Managemnt in Nursing. 3 Credits.

NURS 8403. Translating Research into Prac. 3 Credits.

NURS 8404. Research & Policy for Nursing. 3 Credits.

NURS 8405. Healthcare Quality Improvement. 3 Credits.

NURS 8406. Field Exp Adv Nursing Practice. 3 Credits.

NURS 8407. Grant Writing. 3 Credits.

NURS 8408. Topics Pharmacology. 3 Credits.

NURS 8409. Healthcare Quality Practicum. 3 Credits.
Application of quality improvement processes and patient safety theories, models, methods, and tools in health care settings to conceive and execute a quality improvement (QI) project in an organizational setting. The final deliverable is a comprehensive QI project report.
NURS 8410. Executive Presence I. 2 Credits.
NURS 8411. Executive Presence II. 2 Credits.
This is a continuation of Executive Presence I. In this course, the student will examine power shifts in leadership, revisit change as a stimulus for innovation, participate in an interactive session for individuals who can practice communicating their practicum proposals and receiving friendly feedback and constructive input from their peers, and re-evaluate the leadership development plan designed in Executive Presence I.

NURS 8412. HC Finance for Nurse Leaders. 3 Credits.
NURS 8413. Adult-Gerontology Acute Care Nurse Practitioner: Advanced Role Immersion. 3 Credits.
Students develop and integrate bedside with systems and population level competencies; role development, leadership, interdisciplinary collaboration, systems management, and evidenced-based practice are discussed and applied to concurrent clinical experiences; independent practice skills in the context of interdisciplinary teams. Prerequisites: NURS 6235, NURS 6236 and NURS 6237. Recommended background: prior enrollment in NURS 6220, NURS 6234 and NURS 6222.

NURS 8414. DNP Residency. 3 Credits.
NURS 8498. Research Project Proposal. 3 Credits.
NURS 8499. Clinical Research Project. 3 Credits.

UNDERGRADUATE PROGRAMS

Associate's programs
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing (p. 824)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner (p. 825)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Family Nurse Practitioner (p. 826)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse-Midwifery (p. 827)
- Associate's Degree in Nursing Pathway to Bachelor of Arts or Bachelor of Science to Master of Science in Nursing (p. 828)

Bachelor programs
- Bachelor of Science in Nursing (p. 829)

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING
A combination of associates degree in nursing (A.D.N.), course work, and courses taken as part of

GW's University General Education Requirement (http://nursing.gwu.edu/sites/nursing.gwu.edu/files/downloads/BSNPrequisiteDescriptions.pdf) allows currently licensed Registered Nurse (RN) students to complete a bachelor of science in nursing (B.S.N.) over three semesters and one summer session. Students attend part time, which allows them to continue working as professional nurses. The B.S.N. curriculum is completed through distance learning, and students complete clinical practicum rotations in the local community with faculty mentoring. Select on-campus experiences provide opportunities for students to interact with faculty members and fellow students. Upon completion of the program some credits earned may be applied toward a GW master of science in nursing degree.

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the (https://nursing.gwu.edu/rn-bsnmsn-take-classes-online)RN to BSN/MSN webpage. (https://nursing.gwu.edu/online-rn-bsn)

REQUIREMENTS
The following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the A.D.N. program; and up to 15 credits based on review of the student’s professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

For newly licensed registered nurse (RN) graduates as well as experienced RNs without a bachelor’s degree, the RN to BSN/MSN: adult-gerontology primary care nurse practitioner program prepares RNs for growth in advanced nursing practice. The program is designed to move RNs without a bachelor’s degree seamlessly through the BSN program and into MSN coursework, allowing students to complete both degree programs in three years (six semesters and two summer sessions) on a part-time basis.

Students complete coursework via distance learning and faculty-mentored clinical practicum rotations in their local community. This format allows professional nurses to advance their education with access to GW’s resources and expert faculty while continuing to work. In addition, students are required to attend four on-campus programs:

- **New Student Orientation**—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- **NURS 6222: Advanced Health Assessment and Diagnostic Reasoning**—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a several day period toward the end of April.
- **NURS 6225-AGPCNP II: Adolescent and Adult**—All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a several day period in November or December.
- **NURS 6229–AGPCNP III: Adult, Older/Frail**—All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over several days in April prior to graduation in May.
- Upon completion of the program students will be eligible to sit for the nationally recognized AANP or ANCC certification examination for the adult-gerontology primary care nurse practitioner role and population focus.

Please note that students are responsible for all travel costs. See the University’s Visiting Campus website (http://www.gwu.edu/gw-overview).

**Information for VA Community College Graduates**
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate’s degrees from accredited nursing programs at community colleges across Virginia and who meet GW’s academic requirements.

**Information for Montgomery (MD) Community College Graduates**
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate’s degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW’s academic requirements.

For more information visit the RN to BSN/MSN program. (https://nursing.gwu.edu/online-rn-bsn)

**REQUIREMENTS**
For the **Bachelor of Science in Nursing** portion of the program the following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer...
of credits from the ADN program; and up to 15 credits based on review of the student’s professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

For the Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner portion of the program the following requirements must be fulfilled: 33 credits in required courses and completion of 625 clinical hours.

**Program Requirements**

**Required for BSN**

**ASSOCIATE’S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING FAMILY NURSE PRACTITIONER**

For newly licensed registered nurse (RN) graduates as well as experienced RNs without a bachelor’s degree, the RN to BSN/MSN: family nurse practitioner program prepares RNs for growth in advanced nursing practice. The program is designed to move RNs without a bachelor’s degree seamlessly through the B.S.N. program and into M.S.N. coursework, allowing students to complete both degree programs in three years (six semesters and two summer sessions) on a part-time basis.

Students complete coursework via distance learning and faculty-mentored clinical practicum rotations in their local community. This format allows professional nurses to advance their education with access to GW’s resources and expert faculty while continuing to work. In addition, students are required to attend four on campus events:

- **New Student Orientation**—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.

- **NURS 6222: Advanced Health Assessment and Diagnostic Reasoning**—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a several day period in November or December.

- **NURS 6222: Advanced Health Assessment and Diagnostic Reasoning**—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a several day period toward the end of April.

- **NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management**—All nurse practitioner students are expected to come to campus towards the end of the FNP 2 course to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a several day period in November or December.
• NURS 6232: FNP 3: Professional Issues/Diagnosis/Management - All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over several days in April prior to graduation in May.
• Upon completion of the program students will be eligible to sit for the nationally recognized AANP or ANCC certification examination for the Family Nurse practitioner role and population focus.

Please note that students are responsible for all travel costs. See the University’s Visiting Campus website (http://www.gwu.edu/gw-overview).

Visit the program website (https://nursing.gwu.edu/family-nurse-practitioner) for more information.

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate’s degrees from accredited nursing programs at community colleges across Virginia and who meet GW’s academic requirements.

Information for Montgomery (MD) Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate’s degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW’s academic requirements.

For more information visit the RN/BSN/MSN:FNP webpage. (https://nursing.gwu.edu/online-rn-bsn)

REQUIREMENTS

For the Bachelor of Science in Nursing portion of the program the following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the associate’s degree program; and up to 15 credits based on review of the student’s professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

For the Master of Science in Nursing in the field of family nurse practitioner portion of the program the following requirements must be fulfilled: 33 credits in required courses and completion of 700 to 800 clinical hours.

ASSOCIATE’S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING NURSE MIDWIFERY

The Associate’s Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing (ADN to BSN/MSN) in the field of nurse-midwifery program is a collaboration between GW and Shenandoah University (SU). The program applies previously completed ADN credits toward curriculum requirements for the BSN degree, allowing students to earn both the BSN and MSN with a seamless, three-year program of study.

Coursework for the ADN to BSN/MSN program is completed via distance learning, a format that allows professional nurses to advance their education while continuing to work. Students have access to GW and SU resources and expert faculty and attend select on-campus programs. Core-level courses required for the BSN and MSN are completed through GW, which awards the two degrees. The nurse-midwifery
didactic and clinical components of the curriculum are fulfilled through SU, which awards a Certificate of Endorsement in Nurse-Midwifery. Program graduates are eligible to sit for the national certification exam given by the American Midwifery Certification Board.

The Nurse-Midwifery Program at Shenandoah University is fully accredited by the Accreditation Commission for Midwifery Education.

Visit the ADN Pathway to BSN/MSN Nurse-Midwifery website (https://nursing.gwu.edu/nurse-midwifery) for detailed program information.

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate’s degrees from accredited nursing programs at community colleges across Virginia and who meet GW’s academic requirements.

ASSOCIATE’S DEGREE IN NURSING PATHWAY TO MASTER OF SCIENCE IN NURSING

ADN to MSN Bridge
The Associate Degree in Nursing to Master of Science in Nursing bridge option is designed for nurses with an A.D.N. and a B.A. or B.S. in a non-nursing field who wish to pursue graduate study. Students go straight into a master’s program by taking a “bridge course,” NURS 3110 Transition into the Nursing Profession, the summer before matriculation in the M.S.N. program.

The A.D.N. to M.S.N. bridge option is available in the fields listed below. For more information visit the program website (http://nursing.gwu.edu/adn-msn-bridge):

Adult-Gerontology Primary Care Nurse Practitioner (https://nursing.gwu.edu/node/123)
Family Nurse Practitioner (https://nursing.gwu.edu/node/125)
BACHELOR OF SCIENCE IN NURSING

Through the school’s accelerated bachelor of science in nursing (A.B.S.N.) program, students who already have a bachelor’s degree in a non-nursing field can pursue professional nursing. The Veterans B.S.N. (V.B.S.N.) program is an option for military veterans seeking to capitalize on their military training and experience, for which they are eligible to receive academic credit. These 15-month, full-time programs draw upon students’ previous knowledge from the natural and behavioral sciences, the humanities, and nursing theory to critically analyze and synthesize responses to health problems and provide appropriate nursing interventions. Taught to practice in a multicultural world, students learn to use the nursing process to support and promote health in diverse individuals, families, groups, and communities.

Graduates of the A.B.S.N. and V.B.S.N. degree programs are equipped with the knowledge, skills, and practical experience needed to enter the nursing profession with high ethical, legal, and professional values. What’s more, upon completion, students will have earned 12 graduate credits, with at least 9 graduate credits eligible to be applied to any of GW’s master of science in nursing (M.S.N.) degree programs within five years.

Housed at GW’s Virginia Science and Technology Campus, the programs offer the unique opportunity to put theory into practice through the school’s Skills and Simulation Laboratory (http://nursing.gwu.edu/skills-and-simulation-laboratories), a sophisticated and innovative learning environment in which students gain hands-on experience even before entering a clinical facility.

As the curriculum advances, students are placed in clinical rotations in top-rated facilities in the greater Washington, D.C., area, including Northern Virginia. This gives students highly valued exposure to medical and surgical nursing, obstetrics, pediatrics, psychiatric nursing, and community health. The combination of learning in a traditional classroom setting, in a premier simulation lab, through online courses, and in myriad clinical environments makes GW’s A.B.S.N. and V.B.S.N. programs exceptional choices for aspiring nurses.

REQUIREMENTS

The followed requirements must be fulfilled: 60 credit hours including the required curriculum and at least 700 clinical hours; clinical hours are a component of some required courses.

*May be applied to the Master of Science in Nursing programs at The George Washington University.

GRADUATE PROGRAMS

Master’s programs

- Master of Science in Nursing in the field of Adult-gerontology acute care nurse practitioner (p. 830)
- Master of Science in Nursing in the field of Adult-gerontology primary care nurse practitioner (p. 831)
- Master of Science in Nursing in the field of Family nurse practitioner (p. 832)
• Master of Science in Nursing in the field of Nurse-midwifery (p. 834) (collaborative program between GW School of Nursing (https://nursing.gwu.edu) and Shenandoah University (http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs))
• Master of Science in Nursing in the field of Nursing Leadership and Management (p. 835)

Combined programs
• Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 836)
• Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (visit the School of Nursing website (https://nursing.gwu.edu) for more information)
• Dual Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (visit the School of Nursing website (https://nursing.gwu.edu) for more information)

Doctor of Nursing Practice program
• Doctor of Nursing Practice (p. 837)
  • Education concentration
  • Executive leadership
  • Family specialty for nurse practitioners
  • Health care quality
  • Palliative care specialty for nurse practitioners

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The master of science in nursing (M.S.N.) in the field of adult-gerontology acute care nurse practitioner (AGACNP) degree program is separate and distinct from the adult-gerontology primary care nurse practitioner (AGPCNP) program. The AGACNP program prepares nurse practitioners to provide care for acutely, critically, or complex chronically ill patients across the continuum of care. The principle focus of the program is on delivering care in hospital-based or urgent care centers. In contrast, the AGPCNP program prepares nurse practitioners (NPs) for practice in primary care settings.

Master’s and doctoral students take program-specific courses following completion of the master’s core curriculum. All courses are designed to satisfy the American Association of Colleges of Nursing (AACN) Essentials in Master’s Education in Nursing (AACN, 2011) and Doctorate of Nursing Practice Essentials (AACN, 2006) curriculum guidelines. In addition, program-specific courses are designed to meet specifications described in the Adult-Gerontology Acute Care Nurse Practitioner Competencies document (AACN, 2012) and prepare students to be eligible to sit for the national certification examination for adult-gerontology primary care nurse practitioners. The program-specific courses include some on-campus components, including evaluations using standardized patients, simulation, and a clinical immersion experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the School of Nursing website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 33 credits in field-specific courses, and completion of 625 clinical hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor’s degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor’s degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor’s degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor’s degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy, Quality, Political) and 6 credits of research courses (NURS 6270, NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing degree in the field of adult-gerontology primary care nurse practitioner (AGPCNP) program provides the theoretical and practical foundations for nurses to expand their scope of practice and to become leaders in their roles as advanced practice nurses providing care for patients across the adult age continuum: the adolescent patient (12 and up), adult patient, older adult patient, and frail elderly patient.

Students complete the coursework online via distance learning and the clinical practicum rotations in their local community with faculty mentoring. The curriculum integrates research, policy, technology, simulation, and evidence-based nursing practice with diagnostic reasoning and clinical judgment to solve real-world health care problems. The distance-based format allows professional nurses to advance their education with access to GW’s resources and expert faculty while continuing to work. Students may choose to enroll in the program on a full- or part-time basis.

Upon completion of the program students are eligible to sit for the nationally recognized AANP or ANCC certification examination for the Adult-Gerontology Primary Care Nurse Practitioner role and population focus.

Students in the AGPCNP option are required to complete four on-campus components.

- New Student Orientation—To assist in the transition to GW, the School of Nursing will host a mandatory orientation for all new students. The New Student Orientation is a vital first step towards academic success. It is designed to empower students with the knowledge and tools needed to be successful in the School of Nursing. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. Students will have the opportunity to meet other students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.

- NURS 6222—Advanced Health Assessment and Diagnostic Reasoning—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.

- NURS 6225—AGPCNP II: Adolescent and Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management—All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.

- NURS 6229—AGPCNP III: Adult, Older/Frail (or) NURS 6232 - FNP 3: Professional Issues/Diagnosis/Management—All
nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a 2-3 day period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (http://www.gwu.edu/visiting-campus) website for more information about visiting GW.

Visit the program website (http://nursing.gwu.edu/adult-nurse-practitioner) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 30 credits in field-specific courses, a 3-credit elective course, and completion of 625 clinical hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor’s degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor’s degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor’s degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor’s degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 Health Policy, Quality, Political) and 6 credits of research courses (NURS 6270, NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of family nurse practitioner (FNP) degree program prepares registered nurses
for leadership in primary care to families and individuals of all ages.

This specialty stresses the integration of research and nursing practice with a strong emphasis on solving real-world problems. The curriculum provides the theoretical and practical foundations for nurses to expand their scope of practice. Simultaneous clinical experiences ensure that students meet all criteria to sit for the nationally recognized AANP or ANCC certification examination for the Family Nurse Practitioner role and population focus. Students may choose to enroll in the program on a full- or part-time basis.

Students in the FNP option are required to complete four on-campus components:

- New Student Orientation: To assist in the transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They also have the opportunity to meet fellow students and faculty members, consult with advisors, become familiar with the campus, and tour local attractions. Orientation typically takes place the second or third week in August.

- NURS 6222 Advanced Health Assessment and Diagnostic Reasoning: All students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is provided using GW teaching assistants, and seminars that strengthen diagnostic reasoning skills are presented. This on-campus experience typically takes place over a four- to five-day period towards the end of April.

- NURS 6225 Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult and NURS 6231 Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management: All students are expected to come to campus towards the end of the AGPCNP II/FNP two courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological Interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a four- to five-day period in early November.

- NURS 6229 Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail or NURS 6232 Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management: All students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a two- to three-day-period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (http://www.gwu.edu/visiting-campus) website for more information about visiting GW.

Visit the Program website (http://nursing.gwu.edu/adult-nurse-practitioner) for additional information.

The School of Nursing also offers a Family Nurse Practitioner program for professionals holding a master’s degree in nursing. Visit the certificate program website (http://nursing.gwu.edu/adult-nurse-practitioner-certificate) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits including, 6 credits in professional core courses, 9 credits in research courses, 33 credits in field-specific courses, and completion of 700 clinical hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSE-MIDWIFERY

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor’s degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor’s degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor’s degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor’s degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6207 , NURS 6208 ). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of nurse-midwifery program is a collaboration between GW and Shenandoah University (SU). The program prepares graduates to be eligible for the American Midwifery Certification Board’s national certification exam. The nurse-midwifery degree program at SU is fully accredited by the Accreditation Commission for Midwifery Education.

Core courses required for the MSN are completed through GW, which awards the MSN degree, while the nurse-midwifery didactic and clinical component of the curriculum is fulfilled through SU, which awards the Postgraduate Certificate in Midwifery. A versatile distance learning format allows professional nurses to advance their education while continuing to work, and provides students with access to the resources and experts at GW and SU. In addition, there are selected on-campus sessions for skills training and education as well as clinical practicums in sites across the country. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (http://nursing.gwu.edu/msn-concentration-nurse-midwifery) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 47 credits, including 9 credits in professional core, 6 credits in research, and 13 credits in field-specific courses at GW and 19 credits in nurse-midwifery courses at Shenandoah University.

MASTER OF SCIENCE IN NURSING
IN THE FIELD OF NURSING LEADERSHIP AND MANAGEMENT

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor’s degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor’s degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor’s degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor’s degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 Health Policy, Quality, Political) and 6 credits of research courses (NURS 6270, NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of nursing leadership and management degree program is designed to prepare graduates for upper-level positions in the field by enhancing the depth and breadth of the practicing clinical professional’s knowledge and skills. The program focuses on leadership development by training nurses to think and act strategically, participate in policy decisions, and lead organizations through change and improvement.

Students complete the coursework online via distance learning. This distance-based format allows professional nurses to advance their education with access to GW’s resources and expert faculty while continuing to work full-time. In addition, students attend select on-campus experiences to interact with faculty and fellow students. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (http://nursing.gwu.edu/nursing-leadership-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits including 9 credits in professional core courses, 6 credits in research courses, and 21 credits in field-specific courses.

835 School of Nursing
DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The master of science in nursing (M.S.N.) in the field of adult-gerontology acute care nurse practitioner (AGACNP) degree program is separate and distinct from the adult-gerontology primary care nurse practitioner program (p. 831) (AGPCNP) program. The AGACNP program prepares nurse practitioners to provide care for acutely, critically, or complex chronically ill patients across the continuum of care. The principle focus of the program is on delivering care in hospital-based or urgent care centers. In contrast, the AGPCNP program prepares nurse practitioners (NPs) for practice in primary care settings.

The AGACNP program can be pursued as part of a dual degree program that awards the master of science in nursing (M.S.N.) mid-program and a doctor of nursing practice (http://bulletin.gwu.edu/nursing/doctor-nursing-practice) (D.N.P.) degree upon completion. Students take the D.N.P. core courses in the final semesters of the program. All students must have an earned bachelor’s degree to enter the program and complete the M.S.N. core courses at the beginning of their graduate-level program of study.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the School of Nursing website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 81 credits, including 78 credits in required courses and a 3-credit elective course.

DOCTOR OF NURSING PRACTICE

An alternative to research-focused doctoral programs, the doctor of nursing practice (D.N.P.) advances professional nursing roles in clinical practice and nursing leadership and management. It is designed to develop leaders in health care at the local and national levels. Graduates can incorporate health policy, knowledge of information technology, evidence based practice, business principles, collaboration, health systems, and health policy into practice. A clinical research project immerses students in a practice environment that lays the foundation for future scholarship and success in the nursing field. Students may enter either at the post-bachelor’s or post-master’s level.

Visit the program website (https://nursing.gwu.edu/doctor-nursing-practice-dnp-program) for more information.

REQUIREMENTS

Program Options

**POST-BACHELOR’S OPTIONS**

- Doctor of Nursing Practice—Family Nurse Practitioner
- Doctor of Nursing Practice—Adult-Gerontology Primary Care Nurse Practitioner

**POST-MASTER’S OPTIONS**

- Doctor of Nursing Practice
- Doctor of Nursing Practice—Education Concentration
- Doctor of Nursing Practice—Executive Leadership
- Doctor of Nursing Practice—Family Specialty for Nurse Practitioners
- Doctor of Nursing Practice—Health Care Quality
- Doctor of Nursing Practice—Palliative Care Specialty for Nurse Practitioner

Program Requirements

Students who enter the D.N.P. program at the post-master’s level must complete 36 credits of doctoral work. Students who enter the program at the post-bachelor’s level must complete the credit requirements for their concentration (adult gerontology primary care nurse practitioner or family nurse practitioner) before beginning doctoral coursework. Students pursuing a Post-Graduate APRN Certificate: FSNP must complete 500 clinical hours.

</table>
The College of Professional Studies (CPS) offers an expanding range of degree programs leading to associate’s, bachelor’s, and master’s degrees in professional studies, along with a variety of certificate programs.

CPS’s innovative programs are typically co-developed through collaboration among University content specialists and outside partners—government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face on campus, through distance learning, or a blend of both.

By combining University faculty experts with accomplished practitioners, CPS is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University’s rigorous standards of academic excellence and respond to the needs of a wide variety of professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (http://www.cps.gwu.edu).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

Enrollment Status
Once a student begins a degree or certificate program, he or she is expected to be enrolled continuously and actively engaged in fulfilling the requirements for the degree each semester of the academic year until the degree is conferred or certificate completed. For the fall and spring semesters, students must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the Dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for Leave of Absence in each fall and spring semester, following regular registration procedures. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits
A full-time student is allowed a maximum of three calendar years from the date of the first registration as a degree student (excluding time spent enrolled exclusively in English for Academic Purposes courses) to complete all degree requirements; a part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as a non-degree student before admission to degree candidacy or any period spent on approved leave of absence. Students who do not complete degree requirements within the time allowed will have their degree candidate status terminated; such students may be readmitted to degree candidate status under conditions specified by the Program Director and approved by the Dean.

Scholarship Requirements
Undergraduate students must maintain a minimum cumulative grade-point average of 2.0. and graduate students must maintain a minimum grade-point average of 3.0. If a student’s GPA falls below the required minimum, he or she will receive
an academic warning and will be allowed one semester in which to raise the GPA to the required minimum; any such student who does not raise his or her GPA to the required minimum in one semester will be dismissed from the program. If it is mathematically impossible for the student's GPA to reach the required minimum in one semester, he or she will be dismissed from the program without warning.

See Grades under University Regulations (p. 21) for undergraduate and graduate grading systems.

Grade of F
A student who receives a grade of F is subject to dismissal from the program. If the student wishes to remain enrolled, he or she must present cause for consideration by the Program Director and to the Dean as to why continued study should be permitted. A student who receives a grade of F, if permitted to remain in the program, must repeat the course and achieve a passing grade as well as maintain the minimum required GPA; however, once a grade of F has been received it remains a part of the student's permanent record and is calculated into the grade-point average. Failure to receive permission to remain in the program and retake the failed course or achieve a passing grade after having been permitted to repeat a failed course will result in dismissal from the program.

Incompletes
The symbol I (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required coursework during the semester in which the course was taken. At the discretion of the instructor, the symbol I may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be reported will be graded F, Failure. If acceptable reasons are later presented to the instructor, that instructor may initiate an appropriate grade change. The instructor and student must sign an Incomplete Agreement, available through the Office of the Dean, which sets forth the requirements and due dates for successful completion of the course. The coursework must be completed within the designated time period agreed upon by the instructor and student in the Incomplete Agreement, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the coursework is being completed. If not registered in other courses during this period, the student must register for Continuous Enrollment.

When work for the course is completed, the instructor will complete a grade change form and submit it to the Office of the Registrar. Beginning with the fall 2014 semester, the final grade will replace the symbol of I. If work for the course is not completed within the designated time period, the grade will be converted automatically to a grade of F, Failure, 0 quality points, and the grade-point average and academic standing recalculated. For courses taken prior to the fall 2014 semester, the grade earned will be indicated in the form of I, followed by the grade. The symbol I cannot be removed and remains on the student's permanent academic record, even after the course has been completed successfully.

Transfer of Credit
A maximum of one-quarter of the credits required for the degree may be approved for transfer to a graduate program in the College of Professional Studies from credit earned while enrolled as a non-degree student at GW or from another degree-granting school of this University or another accredited college or university. For transfer credit to be approved, all of the following conditions must be met: the coursework must be from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student’s program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level coursework; and the student must have received a minimum grade of B in each course for which transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the Program Director and the Dean during the student’s first year in the program. An official transcript of the coursework must be on file before the request can be considered.

Transfer of credit for undergraduate students is subject to specific program requirements. Students must have received a minimum grade of C in any course for which transfer of credit is requested.

Once enrolled in the College of Professional Studies, students are not permitted to transfer coursework taken outside the University, except under extraordinary circumstances, and permission must be obtained in advance from the Dean.

Provisional Admission
Applicants with credentials that do not meet the minimum standards for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the Program Director/admissions committee. During the period of provisional status, students must meet the requirements set forth in their admission letter. Students who do not meet these requirements are dismissed from the program.

Readmission
The College of Professional Studies will not review any application for readmission to a program by a student who was dismissed from the same or any other program at the College or course of study at the University until at least one year after the student was dismissed.
Withdrawing From a Course

Students requesting to withdraw from a course after the eighth week of classes (or after the fourth week for modules) must be passing the course and must obtain the written permission of the Program Director and the Dean. If approved, the symbol W, Authorized Withdrawal, will appear on the transcript. Tuition will not be refunded. See Adding, Dropping, and Withdrawing from Courses under University Regulations (p. 21).

Academic Integrity

The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community will be presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other University sanctions. The University Code of Academic Integrity (https://studentconduct.gwu.edu/code-academic-integrity) can be found at the Office of Academic Integrity (http://studentconduct.gwu.edu).

UNDERGRADUATE

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 847)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 847)
- Bachelor of Professional Studies with a major in police and security studies (p. 848)

Dual degree programs

- Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of advocacy in the global environment (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 850)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 850)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance (Offered in Spanish only) (p. 869)
- Master of Professional Studies in the field of strategic public relations (p. 870)
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

CERTIFICATES

Undergraduate certificates

- Cyber Attacks and Cyber Threats Analysis

GRADUATE

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B grade-point average or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).

- Master of Professional Studies in the field of bioinformatics and biotechnology
- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 852)
- Master of Professional Studies in the field of homeland security (p. 852)
- Master of Professional Studies in the field of landscape design (p. 854)
- Master of Professional Studies in the field of law firm management (p. 854)
- Master of Professional Studies in the field of paralegal studies (p. 855)
- Master of Professional Studies in the field of paralegal studies with a concentration in health care corporate compliance (p. 857)
- Master of Professional Studies in the field of publishing (p. 858)
- Master of Professional Studies in the field of sustainable urban planning (p. 859)
• Investigation of Cyber Security Incidents (p. 871)
• Protection and Defense of Computer Networks (p. 872)

Graduate certificates
The College of Professional Studies offers the following graduate certificates. Requirements are listed on the College of Professional Studies website (http://www.cps.gwu.edu). In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

• Climate Change Management and Policy (p. 872)
• Digital Politics (p. 872)
• Global Public Relations (p. 873)
• Health Care Corporate Compliance (p. 873)
• Justice and Public Safety Information Management (p. 874)
• Landscape Design (p. 874)
• PACs and Political Management (p. 874)
• Paralegal Studies (p. 875)
• Strategic Management and Executive Leadership for Law Enforcement
• Sustainable Landscapes (p. 876)
• Sustainable Urban Planning (p. 876)

FACULTY

Professors A. Eskandarian, M.R. Kennedy, F. Lemieux

Associate Research Professors L.R. Matos

Assistant Research Professors R. Izurieta

Instructors N.K. Houghtby-Haddor, J.L. Robinson

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

UNDERGRADUATE PROGRAMS

Bachelor's completion programs
• Bachelor of Professional Studies with a major in cybersecurity (p. 847)
• Bachelor of Professional Studies with a major in integrated information science and technology (p. 847)
• Bachelor of Professional Studies with a major in police and security studies (p. 848)

Dual degree programs
• Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 849)
• Bachelor of Arts with a major in political science and Master of Professional Studies in the field of advocacy in the global environment (p. 849)
• Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 850)
• Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 850)
BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

The Bachelor of Professional Studies with a major in cybersecurity program is intended for students with associate’s or non-technical bachelor’s degrees who are looking for entry-level positions and advancement in the field of cybersecurity. The program consists of a core curriculum and two concentrations that focus on protection and defense of computer networks and cyber attacks and cyber threats analysis. Upon completion of the program, students will be able to understand and implement cybersecurity requirements, protect and effectively defend computer networks against malicious activities, and correct computer network vulnerabilities through penetration testing and hacking techniques.

The core curriculum of this bachelor’s degree program includes courses related primarily to specialty areas identified by NICE. The course work in program subject areas culminates in a practicum that focuses on preparing students to obtain professional certification combined with practical exercises in the computer lab.

REQUIREMENTS

Students completing this program will have satisfied GW’s university-wide general education requirement, which includes 22 credits in the following areas:

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, students take a minimum of 60 credits at GW, including 24 credits in foundational courses and 36 credits in subject area courses.

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY

The Bachelor of Professional Studies in the field of integrated Information, science, and technology (IIST) is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor’s degree in a technology-related field. The 60-credit program can be completed within two academic years (five consecutive semesters, including one summer session).

See the program website (http://cps.gwu.edu/bachelors-completion) for admission requirements.

REQUIREMENTS

This bachelor’s degree completion program is designed for individuals who currently hold an associate’s degree or have earned at least 60 credit hours towards their undergraduate degree.

The remaining 60 credit hours of study required for bachelor’s degree completion include 44 credits in required courses and 16 credits in elective courses.

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN POLICE AND SECURITY STUDIES

The bachelor of professional studies with a major in police and security studies degree program helps students acquire the knowledge and skills needed to work more effectively as police professionals. Developed by faculty in consultation with metropolitan area law enforcement and police specialists, the core course work is designed to develop three central areas of competency: intelligence and criminal analysis; forensic science; and leadership and management. Elective courses are offered in a variety of disciplines, including sociology, leadership, public health, and international affairs.

Visit the program website (http://cps.gwu.edu/police-security-studies) for admissions and additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 30 credits in general education courses, 60 credits in required courses, and 30 credits in elective courses.

Admission requirements:

To be considered for admission to the College of Professional Studies Police and Security Studies program, the applicant must possess an academic record of achievement and be employed as a security and safety professional. The admission requirements are listed below.

- Completion of a college-level English Composition course at a regionally accredited U.S. college or university with a grade of C or higher. Note: Applicants may submit an acceptable writing sample taken in a CPS test setting if a college-level English Composition course has not been completed. Test centers are located in DC, Alexandria, Arlington, and Newport News, VA.
- Attended at least one college-level course (minimum 3 credits) at a regionally accredited institution of higher education.
- Two or more years of work experience in the safety and security field.
- Completion of the first 12 credit hours taken at GW with a grade of C or higher. All degree candidates receive provisional admission until completion of their first 12 credit hours at GW.

Requirements for the degree: 120 credits

Requirements for the program:

30 credits of general education coursework including:*
6 credits of English composition or UW 1020 University Writing plus 2 credits of independent research with a focus on the application of the principles learned in UW 1020

6 credits of quantitative and logical reasoning

6 credits of social and behavioral sciences

6 credits of natural sciences, including one laboratory course

6 credits of arts and humanities

60 credits of core courses:

Intelligence and Criminal Analysis

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL COMMUNICATION AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

OVERVIEW

The School of Media and Public Affairs (https://smpa.gwu.edu) (SMPA) and the Graduate School of Political Management (https://gspm.gwu.edu) (GSPM) offer the dual B.A./M.P.S. degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must meet all requirements of their respective SMPA program. To meet the requirements of the dual program, students take 6 credits in graduate-level courses as part of their B.A. program of study.

Consult the School of Media and Public Affairs (https://smpa.gwu.edu) for admissions requirements and more details.

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF ADVOCACY IN THE GLOBAL ENVIRONMENT

Columbian College’s Department of Political Science and the College of Professional Studies offer the dual B.A./M.P.S. degree program for undergraduate students who...
are interested in careers in global politics and advocacy, from lobbying to strategic public relations, campaigns, and influence building. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must complete all political science degree requirements (http://bulletin.gwu.edu/professional-studies/undergraduate-programs/dual-ba-political-science-mps-advocacy-global-environment/). To meet the requirements of the dual program, students take 9 credits in graduate-level courses as part of their B.A. program of study.

Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

**REQUIREMENTS**

The following requirements must be fulfilled:

Students must complete all Political Science degree requirements, as outlined here: http://politicalscience.columbian.gwu.edu/psc-major-requirements.

Admission to the dual degree program allows the student to substitute three courses of the undergraduate Political Science major for Global Advocacy required courses (see "Required Core Courses" below). These courses will count toward three of the four upper level elective courses in Political Science required for the major and may be taken during the second semester of junior year and during senior year.

**Degree Requirements, M.P.S. in Advocacy in the Global Environment**

**REQUIRED CORE COURSES (21 credit hours)**

- PSAD 6225 Fundamentals of Global Political Management
- PMGT 6403 Political Data & Analysis
- PMGT 6402 Applied Political Communications
- PMGT 6404 Principled Political Leadership
- PSAD 6240 Global Advocacy: Strategies, Tools, and Tactics OR PSAD 6270 International Public Relations and Global Advocacy
- PSAD 6250 Cultural Aspects of Global Engagement
- PSAD 6260 Comparative Political Management Environments

**GLOBAL PERSPECTIVE RESIDENCIES (12 credit hours)**

- PSAD 6200 Advocating in North America (Washington, DC)
- PSAD 6200 Advocating in Europe (Brussels)
- PSAD 6200 Advocating in Turkey and its Region (Istanbul, Ankara)
- PSAD 6200 Advocating in Asia (Hong Kong)
- PSAD 6200 Advocating in Latin America (Sao Paulo, Brasilia)
- PSAD 6200 Advocating in the United Kingdom (London, Oxford)

- PSAD 6200 Advocating in the East Asian Capitals (Seoul, Beijing, Tokyo)

**ELECTIVE COURSES (6 credit hours)**

Flexible Electives: With advisor approval, students may take electives from the Legislative Affairs, Strategic Public Relations or Political Management programs. Some students also take courses at the Elliott School of Global Affairs, Trachtenberg School of Public Policy and Public Administration, and the School of Business.

**BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN LEGISLATIVE AFFAIRS**

The George Washington University’s Department of Political Science (http://www.gwu.edu/~psc) and the Graduate School of Political Management (GSPM) offer a dual degree B.A./M.P.S. program designed for highly-qualified undergraduate students majoring in political science who are interested in careers in the field of legislative affairs (http://gspm.gwu.edu/node/139). The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost.

Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

**BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT**

The George Washington University’s Department of Political Science (http://www.gwu.edu/~psc) and the Graduate School of Political Management (https://gspm.gwu.edu) (GSPM) offer a dual degree B.A./M.P.S. program designed for highly-qualified undergraduate students majoring in political science who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must complete all political science degree requirements (http://politicalscience.columbian.gwu.edu/psc-major-requirements). To meet the requirements of the dual program, students take 9 credits in graduate-level courses as part of their B.A. program of study.
Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

GRADUATE PROGRAMS

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B grade-point average or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).

- Master of Professional Studies in the field of bioinformatics and biotechnology (p. 851)
- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 852)
- Master of Professional Studies in the field of homeland security (p. 852)
- Master of Professional Studies in the field of landscape design (p. 854)
- Master of Professional Studies in the field of law firm management (p. 854)
- Master of Professional Studies in the field of paralegal studies (p. 855)
- Master of Professional Studies in the field of paralegal studies with a concentration in health care corporate compliance (p. 857)
- Master of Professional Studies in the field of publishing (p. 858)
- Master of Professional Studies in the field of sustainable urban planning (p. 859)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance (p. 869) *Offered in Spanish only*
- Master of Professional Studies in the field of strategic public relations (p. 870)
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF BIOINFORMATICS AND BIOTECHNOLOGY

The master of professional studies in bioinformatics and biotechnology degree program prepares students to excel through a cross-disciplinary approach, delivering both academic knowledge and practical experience (within wet labs and computational labs) about bioinformatics and biotechnology. The curriculum integrates components of molecular biology, genetics, bioinformatics, computer programming, molecular modeling, and ultimately the business and entrepreneurship skills necessary to bring new discoveries to the marketplace.

Graduates are prepared with in-demand skills, including data analysis, programming, new product commercialization, and data generation as well as career skills in the bioinformatics and biotechnology fields.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs) or on the program website (https://cps.gwu.edu/bioinformatics-and-biotechnology) for additional information.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

The Master of Professional Studies in the field of cybersecurity strategy and information management degree program is for working professionals from the military, homeland security, and private sectors who wish to gain the expertise to address current and emerging challenges in information technology security. Students learn strategies and practices that empower them to manage critical information in the fight against hackers, terrorists, and cyber criminals. The program also enhances the skills of current homeland security and criminal justice professionals, preparing leaders to secure the country’s digital infrastructure.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://cps.gwu.edu/cybersecurity) for additional information.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSHS 6240. Political Violence and Terrorism. 3 Credits.
The evolution of terrorism and politically motivated violence; causes and origins in regional, national, and international terrorist and insurgent groups and so-called terrorist states; trends in terrorist modus operandi, including asymmetric attacks; formulating effective counterterrorist strategies. Restricted to students in the MPS in homeland security program.

PSHS 6241. Globalization of Threats and International Security. 3 Credits.
The intersection of globalization and national and international security; how globalization may create new threats while amplifying existing threats; the relationship of specific forms of globalized threat to globalization; responses of states and non-state actors to such threats; the role of international organizations. Restricted to students in the MPS in homeland security program.

PSHS 6242. Security and Civil Liberties. 3 Credits.
Examination of U.S. government activities designed to protect the security of American citizens while balancing those interests against citizens’ civil liberties; limitations placed on government activities by the First and Fourth Amendments of the Constitution; complexities associated with the characterization of criminals and terrorists. Restricted to students in the MPS in homeland security program.

PSHS 6243. Intelligence and Strategic Analysis. 3 Credits.
The structure and components of the national intelligence community and law enforcement communities; international intelligence comparison; analysis of intelligence policies and strategies at the international, national, and regional levels. Restricted to students in the MPS in homeland security program.

PSHS 6244. Information Systems Protection. 3 Credits.
Exploration of the major areas of information security including risk management, cybercrime, cyberconflict, and the technologies involved in both cyberattacks and information systems protection; creating, implementing, and maintaining an information security program; root causes of insecurity in information systems.

PSHS 6250. Strategic Planning and Budgeting. 3 Credits.
The adaptation of strategic planning and performance measures beyond budgeting by government agencies dealing with long-term security issues; integrative approach to strategic planning and management, focusing on the implementation, evaluation, and oversight of strategy and policy; development of budgets, accountability plans, and risk management to ensure compliance with stated goals; analytical tools and techniques that inform organizational strategies and actions. Restricted to students in the MPS in homeland security program.

PSHS 6251. Inter-Agency Cooperation. 3 Credits.
In-depth study of interagency cooperation issues relevant to the U.S. Department of Homeland Security’s organizational structure; cooperative initiatives through mutual assistance agreements and regional, national, and international structures; technology interoperability, legal, and interorganizational challenges. Restricted to students in the MPS in homeland security program.

PSHS 6252. Emergency Management and Crisis Communication. 3 Credits.
The role of crisis communications in the overall management of emergency operations; critical communications tasks, functions, and operations of the emergency operations center, incident command, and associated emergency personnel; strategies and tactics to enhance and promote effective crisis communications among government emergency managers. Restricted to students in the MPS in homeland security program.

PSHS 6253. Managing the Politics of Leadership. 3 Credits.
The role of power and influence in organizations; complexity and challenges of developing political strategies and mobilizing the political support and resources needed to implement objectives. Restricted to students in the MPS in homeland security program.

PSHS 6254. Strategic Change Management. 3 Credits.
The challenges, techniques, burdens, and successes associated with initiating and implementing major change within organizations; the process of organizational change from multiple theoretical perspectives. Restricted to students in the MPS in homeland security program.

PSHS 6260. Methods of Analysis in Security. 3 Credits.
Methods and problems of data collection in security fields; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in homeland security program. Prerequisite: None.
PSHS 6270. Capstone Project. 3 Credits.
Students refine their conception of leadership and knowledge of the homeland security field. Participants experience leadership in action and enhance independent learning while working in both small and large group dynamics. Restricted to students enrolled in the PSHS cohort. Prerequisites: All the curriculum in the PSHS must be completed before registering for this course.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LANDSCAPE DESIGN

The Master of Professional Studies in the field of landscape design program is ideally suited for landscape professionals seeking to upgrade skills, individuals who wish to become professional landscape designers, amateurs with an interest in the art of garden design, institutional horticultural staff, nursery employees and garden-design writers. Courses are geared to small-scale landscape design applications with emphasis on sound design principles, good site engineering methods, and creative use of plant materials.

The 46-credit program combines the 28-credit landscape design graduate certificate program with the 18-credit graduate certificate in sustainable landscapes. Students acquire an understanding of best practices in landscape conservation and sustainability, adapted to the small-scale landscape.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://cps.gwu.edu/landscape-design) for additional information.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LAW FIRM MANAGEMENT

The master of professional studies in law firm management degree program responds to the need for highly skilled and adaptable leadership in law firms and companies providing services to law firms. This unique, flexible program provides law firm professionals with the business and leadership knowledge they need to succeed in the law firm industry. The program consists of 30 credits and can be completed in 18 months. The program, which begins in June each year, is specially designed for those working full-time, with a combination of distance learning and short-term residencies at GW’s Alexandria Graduate Education Center.
Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/law-firm-management) for additional information.

**EXPLANATION OF COURSE NUMBERS**

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

**PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.**

**PSLM 6202. Applying Strategic & Business Planning. 3 Credits.**

Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

**PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.**

Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

**PSLM 6204. Principles of Leadership. 6 Credits.**

An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

**PSLM 6205. Application of Leadership Frameworks. 3 Credits.**

Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

**PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.**

Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

**PSLM 6207. Process Improvement in Law Firms. 3 Credits.**

Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

**PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.**

Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

**MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES**

The Master of Professional Studies in the field of paralegal studies is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare. The program curriculum balances a focus on analysis and critical thinking with the applied skills that employers seek: written and oral communication, research, and managing complex tasks and teams.

The master’s is a 32-credit program that students complete in four semesters. GW’s College of Professional Studies also offers an 18-credit graduate certificate, which is completed in two semesters. Credits earned in the graduate certificate...
The program may be applied toward master's degree requirements.

Students may attend classes in the evenings on GW’s Foggy Bottom campus (http://nearyou.gwu.edu/kstreet) or in a distance learning format.

Visit the program website (http://cps.gwu.edu/paralegal) for additional information.

COURSES

Explanations of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLX 6210. American Jurisprudence. 3 Credits.
An introduction to the foundations, theories, history, and applications of the American legal system; local, state, and federal courts and sources of law; and ethics and professionalism issues of especial importance to paralegals.

PSLX 6211. Legal Research and Writing. 3 Credits.
Fundamentals of legal research using print and online tools.

PSLX 6212. Litigation. 3 Credits.
Legal technology and the rules of court, procedure, and evidence; technical and substantive skills necessary for effective litigation support.

PSLX 6213. Corporations and Contracts Law. 3 Credits.
An introduction to administrative and regulatory law; history and development of administrative law; agency, due process, agency actions, administrative investigation and hearings, and judicial review.

PSLX 6215. Government Contracts Law. 3 Credits.
The law of procuring, forming, and executing government contracts, including drafting and litigation; competition requirements, contract changes, and contract terminations; researching and drafting documents common to a government contracts practice.
PSLX 6216. Elements of Intellectual Property Law. 3 Credits.

PSLX 6217. Prosecution and Litigation in Intellectual Law Practice. 3 Credits.

PSLX 6218. International Trade and Finance. 3 Credits.

PSLX 6219. International Litigation. 3 Credits.

PSLX 6221. Tanzanian Legal System. 3 Credits.

PSLX 6222. Tanzanian Community Law. 3 Credits.

PSLX 6223. Contracts. 3 Credits.
Contract elements, their attendant legal ramifications, and the processes necessary to make such determinations. Development of legal reasoning skills in evaluating issues arising from contract law.

PSLX 6224. Advanced Legal Writing. 3 Credits.
Advanced legal writing techniques and drafting for legal practice. Legal writing in plain English; strategies for effective writing; emphasis on legal memoranda, legal correspondence, and preparing and drafting legal pleadings and documents for court. Refines and advances skills in written legal analysis and legal citation.

PSLX 6225. Business Entities. 3 Credits.
Overview of business organizations, including partnerships, limited liability companies, and corporations. Key concepts applicable to business organizations, including regulation, business formation, document preparation. Application of legal analysis within the context of business entities and other topics applicable to paralegals in all disciplines.

PSLX 6226. International Law. 3 Credits.
Introduction and survey of international law, including international trade law and litigation. Rules and principles governing relations among sovereign states, international organizations, and sources of international law. Analysis of the rules and customs for handling international trade. International courts and tribunals; overview of the treaties, customary principles, and institutional structures governing international human rights law.

PSLX 6227. Intellectual Property Law. 3 Credits.
Introduction to the legal structure of an intellectual property practice. Trademarks, copyrights, and patents and the supporting practice concomitant to each element. Analysis of the processes, supporting documentation, laws, and rules regarding patent prosecution and litigation. This course complements and builds upon the legal issues and analysis introduced in the courses on contracts, business entities, and litigation.

PSLX 6298. Paralegal Practicum. 0-3 Credits.
Students work in legal environments while completing their studies, taking active roles to obtain, manage, and maximize the value of their positions. Restricted to master’s degree candidates in the paralegal studies programs.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES WITH A CONCENTRATION IN HEALTHCARE CORPORATE COMPLIANCE

The master of professional studies (M.P.S.) in the field of paralegal studies with a concentration in healthcare corporate compliance degree program allows paralegal students to enroll in the master of paralegal studies (p. 855) program and the healthcare corporate compliance graduate certificate (http://cps.gwu.edu/healthcare-compliance) program concurrently and receive both credentials. The M.P.S. is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare; the graduate certificate is the nationally-recognized industry standard.

At the completion of the program, graduates will have acquired the skills, knowledge, and abilities required to enter the field of healthcare law. The rigorous curriculum balances analysis and critical thinking with applied skills, and focuses on written and oral communication, research, and managing complex tasks and teams—all skills that employers demand. The program is offered in both campus (http://cps.gwu.edu/paralegal) and distance learning (http://paralegalstudiesmasters.online.gwu.edu) formats.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://cps.gwu.edu/healthcare-compliance) for additional information.

REQUIREMENTS

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Additional admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

**MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLISHING**

The Master of Professional Studies in the field of publishing is designed for current and aspiring professionals. The 30-credit program is offered on a part-time basis; students finish the course of study in two years. Classroom instruction and distance learning options are available.

Core coursework provides a foundation in current industry practices, while advanced courses provide preparation for the future of publishing through in-depth study in the areas of editorial management, technology and design, or business and marketing.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (http://cps.gwu.edu/publishing) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits, including 16 credits in required courses and all courses in one track; the remaining credits are taken in elective courses, with at least one elective taken in each of the two remaining tracks.

- Editing for Books, Journals, and Electronic Products
- Managing Editorial Staff

**Business and Marketing Track**

Four of the following:

- Publishing Management, Organization, and Strategy
- Accounting and Finance for Publishers
- Budgeting, Fulfillment, and Distribution
- User-Centric Design for Print and Electronic Publications

**Technology and Design Track**

Four of the following:

- Book Design
- Electronic Publishing Theory & Practice
- Electronic Publishing: Infrastructure and Architecture
- Designing/E-publishing Success

- User-Centric Design for Print and Electronic Publications

**Electives**
Credits beyond those for all required courses are taken as electives; at least one elective must be taken in each of the two remaining tracks.

FACULTY

Director A. Grossblatt

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPB 6201. Book and Journal Publishing. 3 Credits. Overview of the book and journal publishing industry and the opportunities and challenges it presents. Major functions of a publishing house and stages of publishing, including editorial, design, production, sales, marketing, and distribution. Publishing house finances.

PSPB 6203. Business of Publishing. 2 Credits.

PSPB 6205. Copyright Law/Print & Cyberspace. 3 Credits.
PSPB 6207. Marketing Strategies. 2 Credits.
PSPB 6213. Book Design. 2 Credits.
PSPB 6221. Publishing Management, Organization, and Strategy. 2 Credits.
PSPB 6222. Accounting and Finance for Publishers. 2 Credits.
PSPB 6224. Budgeting, Fulfillment, and Distribution. 2 Credits.
PSPB 6232. Production Management. 3 Credits. Managing the production process from initial design and editing to a final printed and distributed publication. Aspects of traditional production, including printing basics, manufacturing savings, prepress and composition, paper, postage, and best practices. Emerging trends in digital products and delivery.

PSPB 6235. Essentials of Web Publishing. 2 Credits.
PSPB 6237. Business Models Online. 2 Credits.
PSPB 6251. Fundamentals of Electronic Publishing. 2 Credits.
PSPB 6253. Electronic Publishing Practice. 2 Credits. Pragmatic, economic, and ethical aspects of electronic publishing for responsible decision making. Prerequisite: PSPB 6251.
PSPB 6255. Electronic Publishing: Infrastructure and Architecture. 3 Credits. Emerging content technologies, including software and hardware components of a typical publishing system, the enabling standards, and an introduction to publishing systems architecture. Prerequisite: PSPB 6251.
PSPB 6257. Designing/E-publishing Success. 2 Credits. Principles of digital design: usability testing, search engine optimization, iterative design, and multiple presentational models. Prerequisite: PSPB 6251.
PSPB 6258. User-Centric Design for Print and Electronic Publications. 2 Credits.
PSPB 6261. Editorial Content, Rights, and Permissions. 2 Credits.
PSPB 6262. Editing for Books, Journals, and Electronic Products. 2 Credits. An overview of the editorial roles, functions, and workflows used in creating publications for print and electronic formats; peer review and online tools for manuscript submission and tracking.
PSPB 6265. Managing Editorial Staff. 2 Credits.
PSPB 6271. Sales Management, Strategy, and Positioning. 2 Credits.
PSPB 6272. Book Publicity & Promotion. 2 Credits.
PSPB 6273. Managing the Marketing Portfolio. 2 Credits.
PSPB 6281. Ethics in Publishing. 1 Credit.
PSPB 6298. Digital Publishing Practicum. 2 Credits. Application of theory and practice acquired in prior courses to a real-world problem. Each semester the topic reflects a selected area of current importance in digital publishing. Restricted to students in the MPS in Publishing program during their final semester of study.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF SUSTAINABLE URBAN PLANNING

The master of professional studies in sustainable urban planning degree program is dedicated to helping students acquire the skills they need to face the challenges of modern urbanization, both in the United States and around the globe. The program offers an array of high-level theoretical, philosophical, and historical courses in planning, urban issues,
and new technological approaches that aim to prepare new planning professionals for success in the burgeoning field. Above all, the program gives students the ability to use their ideas to help forge better cities.

The complete sequence of classes required for the master’s degree is offered each calendar year, including the summer session, and students may enroll on a full- or part-time basis.

The program also offers graduate certificates in sustainable urban planning (p. 876) and climate change management and policy (p. 872), which are designed for students who are not in need of a complete master’s degree.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://cps.gwu.edu/master-professional-studies-sustainable-urban-planning-0) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits, including 30 credits in required courses and 18 credits in courses in one track.

The following requirements must be fulfilled: 48 credits, including 30 credits in required courses and 18 credits taken in one track.

**COURSES**

**Explanation of Course Numbers**

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
PSUS 6201. Principles of Sustainable Urban and Regional Planning. 3 Credits.
The environmental, social, and economic elements of sustainability. Present and future challenges, including environmental management, energy policy, financial crises, global warming, inequality, public education, third and first world slums, the success and failure of nations, urban agriculture, urban economics, and more. The implications of sustainable development and conducting research based on evidenced-based policy. Students focus on the work of researchers outside of the planning field as they write a series of research essays containing reviews of relevant scientific literature.

PSUS 6202. Urban and Environmental Economics. 3 Credits.
The application of neoclassical economics to problems faced by practitioners of the field of sustainable urban and regional planning. Key economic concepts including supply and demand, consumption and production, markets and market failure, and measurement of environmental and other non-market commodities. An economist’s perspective on the principals and methods for understanding urban and environmental challenges and solutions, urban growth, environmental quality, public policy, and other issues fundamental to contemporary development.

PSUS 6203. Research Methods I: Geospatial and Econometric Analysis. 3 Credits.
Focus on developing proficiency in geographic information systems (GIS) and econometric analysis, a method of statistical analysis for measuring the relationships at work in socioeconomic phenomena. Building and analyzing spatial datasets, specifically using ArcGIS and Stata statistical software.

PSUS 6204. Land Use Law. 3 Credits.

PSUS 6210. Transportation Planning in City Systems. 3 Credits.
Transportation planning with long-run goals in mind, including reducing greenhouse gas emissions. The role of planning at local and regional scales within the broader framework of transportation engineering.

PSUS 6211. Regional Development and Agricultural Economics. 3 Credits.
The economics of land use patterns and development processes in the United States and elsewhere in the world. Introduction to the field of agricultural economics and examination of food deserts and other food-related problems relevant to the field of sustainable urban planning.

PSUS 6212. Sustainable Communities I: Housing and Design. 3 Credits.
Community development with a focus on policy and the various sectors of interest that affect contemporary urbanization. How policies, planning techniques, and implementation strategies form the core work of planning practitioners. Topics include water supply, food deserts, public health, and urban resilience. Pathways to more sustainable communities are explored through the policy arenas in which key decisions are made; key sectors that make up the fabric of communities; and special topics that have emerged as critical challenges for sustainable community development.

PSUS 6213. Research Methods II: Advanced Geospatial and Econometric Analysis. 3 Credits.
Builds upon the skills learned in PSUS 6203. Application of econometric and geospatial analysis in the field of sustainable urban and regional planning. Emphasis on objectivity and use of the scientific method to form defensible, evidence-based policy. Prerequisite: PSUS 6203.

PSUS 6220. Planning Resilient and Low-Carbon Cities. 3 Credits.
International perspectives on urban planning, taking into consideration increased global temperatures resulting from greenhouse gas emissions-induced climate change. The course is taught with reference to the findings of the Intergovernmental Panel on Climate Change (IPCC) and considers how urbanization around the world must adapt to the reality of global warming and its consequences.

PSUS 6221. The Scientific Basis of Climate Change. 3 Credits.
The science underlying climate change policy and decision making. Earth systems, climate change projections, the need for mitigation, and impact assessment. Designed for non-scientists.

PSUS 6222. Climate Change Economics. 3 Credits.
Energy use in built environments with an emphasis on fundamental drivers of energy demand, strategies to promote energy efficiency, and essential features of energy supply; the relationship between energy demand and supply in development.; how advances in construction technology can help counter greenhouse gas emissions.

PSUS 6223. Sustainable Communities II: Tools for Assessment and Transformation. 3 Credits.
Builds on PSUS 6212 by further detailing the theory and tools relevant to the assessment and transformation of neighborhood and communities. Geospatial analysis explore the fundamental drivers of urban form, advanced transportation systems, theories of change, and various impact assessment tools used to inform policy implementation.
PSUS 6224. Sustainable Energy for Cities and the Environment. 3 Credits.
Resource management and renewable energy technologies. Vulnerabilities of existing urban structures, particularly the energy grid. Implications of and solutions to energy-related problems likely to arise in present and future cities.

PSUS 6230. Sustainable Comm Design Studio. 3 Credits.
PSUS 6231. Practicum: Climate Change Mgt & Pol. 3 Credits.
PSUS 6233. Capstone Studio. 3 Credits.
PSUS 6235. Adv Topics in Urban Sust. 3 Credits.
PSUS 6260. Intro to Sustainable Design. 2 Credits.
PSUS 6261. Ecology of the Built Env.. 2 Credits.
PSUS 6262. Tools for Sustainable Design. 3 Credits.
PSUS 6264. Native Plants I. 2 Credits.
PSUS 6265. Native Plants II. 1 Credit.
PSUS 6266. Ecological Restoration. 1 Credit.
PSUS 6268. Sustainable Design Methods. 2 Credits.
PSUS 6269. Sustenance and the Landscape. 2 Credits.
PSUS 6270. Sustainable Design Charrette. 3 Credits.
Preparation of a final project that demonstrates students’ understanding of how to select and use sustainable site principles in a landscape design. Building and expanding upon techniques learned in previous coursework, students show comprehension of how their project site has boundaries within its surrounding ecosystem, but is still part of a larger life cycle. Students work in a concentrated charrette format to develop a site design that is fully sustainable and buildable.

GRADUATE SCHOOL OF POLITICAL MANAGEMENT

The College of Professional Studies, offers the master of professional studies in the fields of political management, legislative affairs, strategic public relations, and advocacy in a global environment. Each program has a prerequisite of a bachelor’s degree with a minimum B grade-point average from an accredited college or university and is subject to the CPS regulations (http://www.cps.gwu.edu) that appear under the respective programs. In addition, graduate certificate programs are offered in campaign strategy, digital politics, community advocacy, public relations, PACs and political management, and global public relations. The master of professional studies in political communication and governance; and graduate certificates in both political management and strategic governance, and strategic communications and campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

GRADUATE

Master’s programs
- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance (offered only in Spanish) (p. 869)
- Master of Professional Studies in the field of strategic public relations (p. 870)

Combined program
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Political Management (PMGT) (p. 1387)
- Legislative Affairs (LGAF) (p. 1327)
- Professional Studies Public Relations (PSPR) (p. 1407)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF ADVOCACY IN THE GLOBAL ENVIRONMENT

The Master of Professional Studies in the field of advocacy in the global environment offers innovative experiential learning opportunities for professionals involved in all aspects of global politics and advocacy, from lobbying to strategic public relations, campaigns, and influence building. The program can be completed in as little as one year; however, the usual pace is two courses per semester over two years. Twelve credits of coursework are dedicated to the global immersion residencies in regions around the globe: North America (Washington, D.C.), Europe (Brussels), Middle East and Africa (Istanbul), Asia (Hong Kong), and Latin America (São Paulo).
Specific admission requirements are shown on the Graduate Program (http://www.gwu.edu/all-graduate-programs)Finder.

Visit the program website (http://gspm.gwu.edu/advocacy-global-environment) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 39 credits, including 21 credits in required courses, 12 credits in global residencies, and 6 credits in elective courses.

Requirements for the major:

</tbody>
</table>

Four global residencies

| Six credits of electives selected in consultation with advisor* |

*Electives may be chosen from course offerings of the Legislative Affairs, Strategic Public Relations, or Political Management programs. Some students may take courses in the Elliott School of International Affairs, Trachtenberg School of Public Policy and Public Administration, the School of Business, or create an independent study course with the permission of the program director and approval of the director.

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master’s degree. Students who receive a grade of C in more than 6 credits are subject to suspension. Students who receive a grade of F must confer with the dean before enrollment for further coursework is allowed. See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

Professors M. Kennedy

Associate Professors M. Cornfield, S. Billet, L. Parnell, S. Wiley

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LEGISLATIVE AFFAIRS

The Master of Professional Studies in the Field of Legislative Affairs centers on the study of applied politics in the legislative arena, offering students the perspective of both political scholars and working professionals. The curriculum focuses on how Congress operates, how legislative procedures shape outcomes, and how entities like the executive branch, lobbyists, and constituents influence the work of the legislature.

The program is designed for both working professionals and full-time students, with classes meeting Monday through Thursday evenings in the Washington, D.C. metro area. The required 33 credits can be completed in as little as one year; however, the usual pace is two courses per semester completed in two years.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://gspm.gwu.edu/legislative-affairs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 12 credits in required courses; at least 6 credits in courses in each of two elective areas; either 6 credits in thesis or 6 additional credits in one or both of the two elective areas; and successful completion of a master’s comprehensive examination.

**Explanation of Course Numbers**

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

**PMGT 1000. Dean’s Seminar. 3 Credits.**

**PMGT 4101. Electoral&LegislativeProcesses. 3,4 Credits.**

**PMGT 4107. Practicum in Political Mgt. 3,4 Credits.**

**PMGT 4187. Professional Internship. 3-4 Credits.**

**PMGT 4192. Tutorial-Amer Elect& PolMvmnts. 3-4 Credits.**

**PMGT 6401. Fundamentals of Political Management. 3 Credits.**

Main concepts, arenas, developments, roles, and practices in the field of political management. Assess rhetorical situations, write strategy memos, create and critique campaign messages, and engage citizens, professional colleagues and decision-makers. Taken in first semester of program. (Professors M. Cornfield and TBD.).
PMGT 6402. Applied Political Communications. 3 Credits.
Models and methods by which professionals plan, produce, and adjust strategic communication messages in democratic politics. Use a variety of communication forms and media, such as, fact sheets, blog posts, video releases, and public addresses, under typical constraints of time, money, information, reputation, talent, audience attentiveness, and institutional procedure. Students to enroll by their sixth course in the program. Core requirement; Must be completed before a student reaches 18 credit hours.

PMGT 6403. Political Data and Analytics. 3 Credits.
Introduction to the uses of quantitative data and statistics in politics. Learn to evaluate research designs, statistical associations, causal reasoning, methods for hypothesis testing, multivariate regression analyses, and data analytics. Consume and critique data and statistics for strategic purposes. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credit hours.

PMGT 6404. Principled Political Leadership. 3 Credits.
Theory and practice of ethically grounded political leadership. Consideration of the recurrent dilemmas, philosophical principles, management techniques, codes of conduct, and professional norms in the political management field. Application through self-assessment exercises, case study analysis, and individual and group simulations. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credit hours.

PMGT 6410. Grassroots Engagement. 3 Credits.
Strategies and techniques to build advocacy support among and across general civic populations. Identification of potential supporters through database targeting and individual outreach. Motivation and training of interested supporters for grassroots action in campaigns, at public forums, and before decision-makers. Coalition and protest options; analytics of ongoing efforts. (Professors E. Grefe, S. Gagen).

PMGT 6412. Issues Management. 3 Credits.
Track, influence, and alter politically significant issue-related discourses and policy developments. Legislative, executive, and judicial venues and processes for policymaking; state referendum, initiative, and recall ballot opportunities; organizational structures, including digital procedures, for issue management. (Professors M. Edwards, E. Grefe).

PMGT 6414. Lobbying. 3 Credits.
Survey of and training for lobbying in the U.S. federal system. Students design a detailed lobbying plan for implementation and practice a variety of influence techniques, including those associated with digital media and communications technologies. Legal compliance, organizational and public accountability, professional standards and practices. (Professor J. Hobson).

PMGT 6416. International Lobbying. 3 Credits.
Survey of international lobbying practices, analysis of strategic models and best practices in a variety of different countries and political systems (e.g., EU, China, Brazil, and Turkey). Trends and innovations in lobbying techniques and communications technologies. Investigation and application of appropriate research to improve practice. (Professor TBD by AGE program) (Same as PSAD 6240).

PMGT 6418. Budget Politics. 3 Credits.
Politics of the budget process, including formal and informal mechanisms of appropriating U.S. federal funds. Lobbying strategies and tactics employed by private and public organizations seeking to influence budgetary agenda-setting in the White House; decision-making in Congress; and funding negotiations within and between executive agencies. (Professor M. Edwards).

PMGT 6420. Corporate Public Affairs. 3 Credits.
Exploration of major functional areas in corporate public affairs with a focus on the political and policy dynamics operating in the United States and other democracies. Development and deployment of appropriate strategies, research, and tactics for corporations managing the complexities related to a global economy and shifting political alliances.

PMGT 6422. State and Intergovernmental Politics. 3 Credits.
Examination of the electoral pressures on state and local legislators. Methods and techniques for advocacy in various state capitals. The governing responsibilities of constitutionally-delegated to states and the ever-changing historical relationship between states and the federal government. (Professors C. Shank).

PMGT 6430. Campaign Strategy. 3 Credits.
Orientation to the basic systems and technologies that must be created and managed to produce electoral victory. The campaign plan and campaign budget as the foundation for management of campaigns. Focus on development of a campaign plan. (Professor M. Meissner).

PMGT 6432. Managing Campaigns. 3 Credits.
Understanding the role of a campaign manager in staffing and running a campaign, while executing the campaign plan. Candidate handling, fundraising, website and technology, geographic and demographic targeting, field organization, canvassing, get-out-the-vote, press operations, budget control, and liaison with the party and interest groups. (Professors TBD)

PMGT 6434. Running for Office. 3 Credits.
Electoral politics from the perspective of the candidate, strategic and personal factors involved in the decision to run and the consequences of victory or defeat. (Professor R. Faucheux).
PMGT 6436. National Campaign Dynamics. 3 Credits.
Examination of the historical and systematic patterns in national elections. Differences between presidential and midterm elections; House and Senate contests; party nomination races and general elections; primaries and caucuses; Democratic and Republican party delegate selection rules; causes for "wave" elections; effect of the economy on election outcomes; and standard vice presidential selection models. The political and partisan structural conditions that exist before any of the candidates or the campaigns get involved.

PMGT 6438. State and Local Campaigns. 3 Credits.
Application of campaign strategy and management principles to electoral races at the state and local levels. Staffing, budgeting, and strategic challenges for what are typically lower-visibility contests that involve state and local candidates. Coordinated campaigns and the impact of the national party’s reputation on these down-ballot races. (Professor TBD).

PMGT 6440. Targeting and Voter Contact. 3 Credits.
How to find voters for electoral and advocacy campaigns and tailor communications to them. Database analytics, list management, questionnaire design, target weighting, predictive modeling. Review of randomized and natural experiments in light of theoretic principles and findings from public opinion research. Skill development in use of spreadsheets and basic statistical packages. Lab fee. (Professors B. Russell, A. Strauss) Prerequisites: PMGT 6403.

PMGT 6442. Campaigns Around the World. 3 Credits.
Comparative examination of national-level campaigns in democratic countries outside of the United States. Strategies, techniques, and practices used in multi-party and/or parliamentary systems. Professional conduct, consulting rules and norms.

PMGT 6450. Rules, Laws, and Strategy. 3 Credits.
U.S. federal and state laws and regulations governing recognition of political parties and political organizations, campaign finance, political broadcasting and cablecasting, lobbying registration. Ballot access and voter registration. Ethical and strategic considerations (opportunities and constraints; benefits and drawbacks) related to rule construction. (Professor M. Braden).

PMGT 6452. Digital Strategy. 3 Credits.
Development of an integrated digital strategy for use in advocacy and electoral campaigns. Introduction to the theoretical concepts, distinctive technologies, applied skills, and managerial challenges associated with digital campaigning. Search engine optimization, GPS, online payment systems, customizing back- and front-end systems to meet strategic goals and budget parameters, working with IT vendors and distance volunteers, legal and cultural considerations in US and other regimes, site rollout and scaling, security and privacy. (Professor TBD).

PMGT 6454. Fundraising and Budgeting. 3 Credits.
Raising and spending money in political campaigns, referenda contests, issue advocacy, and lobbying efforts. Budgeting process, standard controls to check expenditures, accounting procedures, and general strategies for use in effective fundraising. (Professor N. Bocskor).

PMGT 6456. Speechcraft. 3 Credits.
Analysis and techniques used in speechwriting and presentations for public officials and candidates. Managing the political optics and understanding a speech’s visual context and non-verbal communication capabilities (Rose Garden, Oval Office, campaign stump speech, ceremonial occasion, congressional testimony). Modulating speaker style, tone, and pacing, and staging the speech for effect. (Professors D. McGroarty, R. Lehrman).

PMGT 6458. Crisis Management. 3 Credits.
Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions. (Professor M. Edwards).

PMGT 6460. Audience Research. 3 Credits.
Processes by which citizens acquire political information and make decisions in politics. Survey research uses in electoral campaigns and issue advocacy. Designing and drawing samples, constructing and pretesting questionnaires, modes of interviewing, financial implications, practical problems in selecting and monitoring polling organizations, and interpretation of data. Focus groups and small-sample interviews; relationship between qualitative and quantitative research; reliability and validity. (Professors R. Johnson, D. Cantor, B. Tringali, M. Ward) Prerequisites: PMGT 6403.

PMGT 6462. Opposition Research. 3 Credits.
Practices and techniques associated with investigative opposition research. Public document and website searches, candidate tracking, and methods for information dissemination. Changes in practice as a result of technological innovations and a changing media environment. Professional responsibilities and ethics expected from opposition researchers.

PMGT 6464. Influencing the Media. 3 Credits.
Organization, practices, and norms of the major media; media coverage of public officials, political campaigns, legislative battles, interest groups, and issues of public policy. Formulation of strategies for getting favorable news coverage for the issue or candidate and for ending a media crisis. (Professor L. Ellenbogen).
PMGT 6466. Political Advertising. 3 Credits.
Strategies and techniques for using the various media (print, radio, television, cable, Internet) in political and advocacy campaigns, with emphasis on the use of television. Impact and uses of paid advertising; development of campaign messages; production, timing, and placement of television advertising; explanation of media markets. Students design print ads and brochures and produce a 30-second television spot. (Professor P. Fenn).

PMGT 6468. Digital Advertising and Action. 3 Credits.
Strategies and techniques for developing and leveraging digital advertising for mobilization. Manage an effective online ad campaign from initial concept to creation and from targeting to measuring the results. Prepare, design, and launch a variety of online ad types, including search, social, display, and video. Analyze success or failure based on analytics and benchmarking. Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6470. Digital Content Creation. 3 Credits.
Developing and creating effective digital content that promotes campaign narratives and furthers strategic messages. Construct portfolios of original and aggregated digital media content. Skill development in infographics, video, GPS, photo collage, page and site architecture, and texts from 140 characters to blog posts and file attachments. Versioning for different communities, functionalities, and channels including mobile applications. Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6472. Maximizing Social Media. 3 Credits.
Creating and integrating owned digital platforms and social media assets for political persuasion and action. Cultivation of online political communities, moderating and curating outside-generated content, integration and alignment with campaign message; event, reputation and crisis management. Review of constraints and potentials intrinsic to specific social media sites (e.g. Facebook, Google, LinkedIn, Twitter). Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6474. Stereotypes and Political Strategy. 3 Credits.
Accounting for psychological constructs, social stereotypes, media framing, and the impression formation process in developing a political strategy. Review of empirical research; investigation of effective techniques or postures for overcoming biases; self-assessment of perceptual assumptions.

PMGT 6476. Political Consulting. 3 Credits.
Management principles, technical procedures, and legal requirements for starting and running a political consulting business. Effective practices for gaining a positive reputation, sustaining profitability across the variable political environment, and engaging on the international front. Start-up funding, mergers and acquisitions, exit strategies. (Professors G. Nordlinger, L. Purpuro, M. Meissner).

PMGT 6480. Washington Residency. 3 Credits.
Capstone experience equivalent to PMgt 6495 for students in the online Political Management program. Exposure to and interaction with political consultants, advocacy specialists, elected officials, and applied researchers in Washington, D.C. Integration of program curriculum toward an understanding of the federal political ecosystem and development of a robust political network. Restricted to Taken by PMGT online students in last or penultimate term, or with approval by instructor.

PMGT 6482. Applied Research Project. 3 Credits.
A research option for students in the online Political Management program. Development of a campaign-relevant research report and related communications on behalf of a mock political client. The report will describe the status quo of a political situation, analyze the factors and actors sustaining that status quo, identify what and who is potentially moveable in the direction the client seeks to go, and outline practical first steps a campaign can take in that direction. Restricted to For students in the PMGT online program; taken either in the penultimate or last term in the program.

PMGT 6490. Special Topics. 3 Credits.
Topic to be announced in the Schedule of Classes.

PMGT 6495. Political Power & Practice. 3 Credits.
Capstone seminar that develops and integrates knowledge of political strategies, tactics, and situational considerations, and applies that knowledge to advanced political problems. Topics include: gaining and wielding power, the complexity associated with making democracy work, conflict resolution, negotiation and bargaining skills, grappling with the consequences of winning and losing. Students to enroll during their last or penultimate term. (Professor L. Brown).

PMGT 6496. Independent Study. 0-3 Credits.
Independent research with a Political Management faculty member. Registration must be approved in advance by the supervising faculty member and the director of the political management program.

PMGT 6497. Graduate Internship. 0 Credits.
Limited to Political Management M.P.S. degree candidates. Experience at an organization focused on applied politics.

PMGT 6498. Thesis I. 3 Credits.
Master’s degree candidates must apply to the program committee for thesis approval and have completed 24 credit hours with a 3.3 GPA.

PMGT 6499. Thesis II. 3 Credits.
Master’s degree candidates must apply to the program committee for thesis approval and have completed 24 credit hours with a 3.3 GPA. Prerequisites: PMGT 6498.

PMGT 6501. Politics and Public Policy. 3 Credits.
Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.
PMGT 6502. ConfrontManag&AllianceBldg. 3 Credits.

Formulation of political communications strategies. Elements necessary to create, introduce, and maintain an effective political profile in issue advocacy campaigns, candidate elections, and legislative advocacy campaigns. Application of principles of research, advertising, and marketing to the political landscape.

PMGT 6503. Communication Strategy. 3 Credits.

PMGT 6504. PolMgt & StrategicGovernance. 3 Credits.

PMGT 6505. Politica de bases. 3 Credits.

Use of microtargeting and database-layering technology to identify potential advocates. Motivational techniques to mobilize volunteers for political campaigns, lobbying efforts, and community advocacy. Techniques used by grassroots organizers to help corporations, unions, civic and nonprofit organizations, and special interest groups achieve strategic goals.

PMGT 6506. Practicum. 3 Credits.

PMGT 6507. Democracia y elecciones en LA. 3 Credits.

This course will focus on the recent history of Latin America, underscoring the struggle to establish and consolidate democracy and the preeminence of elections as the legitimate process to select and replace authorities at the national, regional and local levels. The course will provide the student with concepts to understand the different types of democratic settings that exist in the region, that is the coexistence of fairly established and solid democracies, with low intensity democracies, and semi-authoritarian regimes, all of which utilize electoral processes to select public authorities. The main message of this course is that campaign designers need to understand and take a strategic advantage of the political context and the rules governing the political competition in order to obtain the most effective results.

PMGT 6508. Estrategia de campana LA. 3 Credits.

Organization of political campaigns. Strategic decisionmaking. Formulation of political communications strategies. Aspects necessary to introduce and maintain an effective political profile in the electoral campaigns in Latin America, including the specialized forms of communication which political professionals use to win support for their candidates. This course will be taught entirely in Spanish.

PMGT 6509. Las encuestas-America Latina. 3 Credits.

The use of survey research in campaigns. Quantitative and qualitative survey research for political management in Latin America. The proper use of polls; methodology and survey design; reviewing poll results; drawing conclusions and recommendations from polls; and the practical problems of administering and interpreting survey data of public opinion in Latin America. PMGT 6509 will be taught entirely in Spanish.

PMGT 6510. Organizacion y ejecucion-LA. 3 Credits.

Organizational choices facing campaign management teams in Latin America as they attempt to combine the resources and activities of a modern campaign into a winning effort.

PMGT 6511. Propaganda politica, La campan. 3 Credits.

The strategies, techniques, design and impact of paid political communications directed toward target audiences in Latin America, focusing upon the role of political advertising in a campaign, including radio, direct mail, print and internet, but with specific emphasis on television commercials.

PMGT 6512. Los medios, la politica-LA. 3 Credits.

The role of the media in the politics of Latin America. Who the media are, how they make their decisions, and how they influence outcomes in campaigns and other political situations. Strategic planning in dealing with the media as well as the particular dynamics that surround electronic, print, and the new media. Effective practices of media engagement. This course will be taught entirely in Spanish.

PMGT 6513. Comunicacion Politica,Gobernon. 3 Credits.

The course builds upon the Practicum course of the Certificate in Governance and integrates the two processes of politics: campaigning and governing. PMGT 6513 will be taught entirely in Spanish.

PMGT 6514. Manejo de Crisis. 3 Credits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL COMMUNICATION AND GOVERNANCE (OFFERED IN SPANISH ONLY)

GW’s Graduate School of Political Management offers the Master of Professional Studies in the field of political communication and governance to closed cohorts of students in Latin America and Spain. The program combines several subjects divided into two modules: political communication and election campaign and political management and governance. The opportunity to pursue an individualized master’s research project is also available. The programs are offered in Spanish only.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program’s website (http://www.gspminternational.org) for additional information.

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.
MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF STRATEGIC PUBLIC RELATIONS

The master of professional studies in the field of strategic public relations prepares its graduates to work at major public relations firms or in communication roles with nonprofits, corporations, on Capitol Hill, or in the executive branch. The 30-credit program is offered at GW's Alexandria Education Center as well as via distance learning.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gspm.gwu.edu/strategic-public-relations) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 18-21 credits in required courses and 9-12 credits in elective courses.

Note: Students may place out of PSPR 6202 based upon review of their transcript and required writing samples. Such students take an additional elective course.

FACULTY

Director L. Parnell

DUAL MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT AND GRADUATE CERTIFICATE IN SURVEY DESIGN AND ANALYSIS

The dual graduate master of professional studies degree/graduate certificate program teaches students to design and conduct public opinion surveys, analyze the data that those surveys impart, and use that data to craft winning political campaigns and advocacy initiatives. The program helps students understand not only when it is appropriate to procure and design public opinion surveys, but also how to generate useful questions, analyze responses, and craft communications about the data in a manner that is consistent and aligned with a political strategy. Students also learn to analyze both publicly available and privately commissioned survey opinion data to develop and contextualize a campaign's or an advocacy group's strategic plan.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit program website (https://gspm.gwu.edu/dual-degree-programs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 42 credits, including 33 credits in required courses and 9 credits in elective courses.

CERTIFICATE PROGRAMS

Undergraduate certificates
- Cyber Attacks and Cyber Security Threats Analysis
- Investigation of Cyber Security Incidents (p. 871)
- Protection and Defense of Computer Networks (p. 872)

Graduate certificates
The College of Professional Studies offers the following graduate certificates. Requirements are listed on the College of Professional Studies website (http://www.cps.gwu.edu). In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.
- Climate Change Management and Policy (p. 872)
- Digital Politics (p. 872)
- Global Public Relations (p. 873)
- Health Care Corporate Compliance (p. 873)
- Justice and Public Safety Information Management (p. 874)
- Landscape Design (p. 874)
- PACs and Political Management (p. 874)
- Paralegal Studies (p. 875)
- Strategic Management and Executive Leadership for Law Enforcement
- Sustainable Landscapes (p. 876)
- Sustainable Urban Planning (p. 876) (p. 876)

UNDERGRADUATE CERTIFICATE IN CYBER ATTACKS AND CYBER THREATS ANALYSIS

The undergraduate certificate in cyber attacks and cyber threats analysis is intended for students with associate's or non-technical bachelor's degrees who wish to learn about highly specialized review and evaluation of incoming cyber security attacks and breaches. Upon the completion of this program, students will be able to investigate cyber security incidents, and identify and correct computer network vulnerabilities through penetration testing and hacking techniques.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS
The following requirements must be fulfilled: 18 credits in required courses.

GRADUATE CERTIFICATE IN DIGITAL POLITICS

Digital platforms and high-tech tools that assist with political fundraising, grassroots organizing, and policy issue advocacy have become central to success in politics, and especially in electoral campaigns. The graduate certificate in digital politics teaches students how to master the world of online communications, advertising, social media networking, and fundraising. In the rapidly changing world of politics, this certificate targets students seeking to gain expertise in the most current tools and tactics.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gspm.gwu.edu/digital-politics) for additional information

GRADUATE CERTIFICATE IN GLOBAL PUBLIC RELATIONS

Designed for working professionals, the global public relations graduate certificate program teaches students the strategic and tactical skills needed to excel in the challenging world of global public relations. The 6-course, 18 credit program includes a global perspective residency. The course work completed in the certificate program can be applied to the master's degree in Strategic Public Relations (https://gspm.gwu.edu/node/140) or Advocacy in the Global Environment. (https://gspm.gwu.edu/node/1068)

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gspm.gwu.edu/global-public-relations) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; or, with the advisor's approval, 12 credits in required courses and one 3-credit elective.

**Electives**

In lieu of one required course, students may take, with the program director's approval, a 3-credit elective selected from the curricula of the graduate certificate in strategic public relations, legislative affairs, or political management programs or from another GW school or college.

GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Designed for professionals working in the field of healthcare compliance or who aspire to work in the field, the 12-credit graduate certificate program provides students with a uniquely comprehensive view of health care corporate compliance. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading health care law firm in Washington, D.C., the program offers education in health care laws and regulations as well as tools and strategies for creating effective corporate compliance programs. As the center of federal health care policy and enforcement, Washington provides the ideal backdrop for study, allowing unparalleled access to experts in the field, including current and former regulators and policymakers, and other compliance professionals. No other course or program can offer this level of expertise.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/healthcare-compliance) for additional information.

GRADUATE CERTIFICATE IN JUSTICE AND PUBLIC SAFETY INFORMATION MANAGEMENT

The graduate certificate in justice and public safety information management curriculum has been tailored to address the rising demand for professionals with a comprehensive and strategic knowledge of policy, best practices, and strategies related to IT and data management for use by public and private sector homeland security and justice organizations.

The program combines classroom-based and online instruction delivered via Blackboard, GW’s web-based educational platform. The online component allows students to fit a full course load into their busy schedules, making it possible to complete the degree in three semesters.

Specific admission requirements can be found on the Graduate Program Finder. Visit the program website for additional information.

GRADUATE CERTIFICATE IN LANDSCAPE DESIGN

The graduate certificate program in landscape design is ideally suited for landscape professionals seeking to upgrade skills, individuals who wish to become professional landscape designers, amateurs with an interest in the art of garden design, institutional horticultural staff, nursery employees, and garden-design writers. Courses are geared to small-scale landscape design applications with emphasis on sound design principles, good site engineering methods, and creative use of plant materials.

Specific admission requirements can be found on the Graduate Program Finder. Visit the program website for additional information.

REQUIREMENTS

GRADUATE CERTIFICATE IN PACS AND POLITICAL MANAGEMENT

This unique graduate certificate teaches the fundamentals required to effectively run an organization’s Political Action Committee (PAC). The challenges of coordinated political action and campaign finance uncertainty make it more important than ever that professionally trained and savvy leaders manage PACs. The program is designed to give
PAC managers the skills necessary to successfully tackle the daunting realities of political finance and action.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs) Program Finder.

Visit the program website (https://gspm.gwu.edu/pacs-and-political-management) for additional information.

**GRADUATE CERTIFICATE IN PARALEGAL STUDIES**

The graduate certificate in paralegal studies is for students who wish to enter the paralegal profession, where the certificate is universally recognized as the standard entry-level credential. GW’s approach is academic and practical, emphasizing leadership and teamwork, written and oral communication skills, ethics, and time management in addition to substantive law and legal technology skills.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs) Program Finder.

Visit the program website (https://cps.gwu.edu/paralegal) for additional information.

GRADUATE CERTIFICATE IN STRATEGIC MANAGEMENT AND EXECUTIVE LEADERSHIP FOR LAW ENFORCEMENT

The graduate certificate in strategic management and executive leadership for law enforcement is offered jointly by GW and American University. The curriculum is tailored to address the rising demand for law enforcement professionals with a comprehensive set of leadership and strategic thinking skills. Three courses are taken at GW and three at American University.

Specific admission requirements can be found on the Graduate Program Finder.

GRADUATE CERTIFICATE IN SUSTAINABLE URBAN PLANNING

The graduate certificate in sustainable urban planning is tailored to students seeking a credential in the field, but who are not in need of a complete master’s degree. This certificate can be combined with the graduate certificate in climate change management and policy (p. 872) and four core planning courses to earn the master of professional studies in sustainable urban planning (p. 859) degree.

Specific admission requirements can be found on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

GRADUATE CERTIFICATE IN SUSTAINABLE LANDSCAPES

The graduate certificate in sustainable landscapes addresses the growing need for landscape and allied professionals with the knowledge and skills to design and/or manage ecologically sensitive, regenerative landscapes that are hospitable to humans and wildlife alike. Students acquire an understanding of best practices in landscape conservation and sustainability, adapted to the small-scale landscape.

Specific admission requirements can be found on the Graduate Program Finder.

MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Dean L.R. Goldman

Associate Deans J. DeLoia, K. Horn, G.H. Taylor, P. Vigilance

Assistant Dean H. Klepac, M. Turner

Established in July 1997 as the School of Public Health and Health Services, the school brought together three longstanding university programs in the schools of medicine, business, and education. In 2014, the school was renamed Milken Institute School of Public Health (Milken Institute SPH) after receiving three gifts totaling $80 million from the Milken Institute, the Sumner M. Redstone Charitable Foundation, and the Milken Family Foundation, the largest ever received by The George Washington University. The only school of public health in the nation's capital, Milken Institute SPH enrolls more than 1,800 students, who come from nearly every U.S. state and many other nations to pursue undergraduate, graduate, and doctoral-level degrees in public health. The student body is one of the most ethnically diverse among the nation's private schools of public health. Six departments form the school: Environmental and Occupational Health, Epidemiology and Biostatistics, Exercise and Nutrition Sciences, Global Health, Health Policy and Management, and Prevention and Community Health.

Degree Programs

The Milken Institute SPH offers the following degree programs:

- Bachelor of Science with majors in exercise science and public health
- Master of Public Health in the fields of biostatistics; community oriented primary care; environmental health science and policy; epidemiology; global environmental health; global health communication; global health epidemiology and disease control; global health program design, monitoring, and evaluation; global health policy; health policy; health promotion; maternal and child health; physical activity in public health; public health communication and marketing; and public health nutrition
- Master of Public Health: MPH@GW (online)
- Master of Science in the fields of biostatistics; epidemiology; exercise science with a concentration in strength and conditioning; health policy; management of health informatics and analytics and public health microbiology and emerging infectious diseases (Columbian College of Arts and Sciences confers the Masters of Science in biostatistics)
- Master of Health Administration; Master of Health Administration; MHA@GW (hybrid/executive program)
- Health Services Administration Specialist
- Special (Joint) Programs: Doctor of Medicine and Master of Public Health; Juris Doctor/Master of Laws in the field of law and Master of Public Health; Master of Arts in the field of international affairs and Master of Public Health; Master of Health Administration with a certificate in healthcare corporate compliance; Master of Public Health in the field of health policy with certificate in healthcare corporate compliance; Master of Science in Health Policy with a certificate in healthcare corporate compliance; Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health; Peace Corp Master’s International Program and Master of Public Health
- Doctor of Public Health in the fields of environmental and occupational health; global health; health behavior; and health policy
- Doctor of Philosophy in the fields of biostatistics; epidemiology; and social and behavioral sciences in public health (Columbian College of Arts and Sciences confers the Doctor of Philosophy in biostatistics and public policy and public policy and administration (health policy track))

Mission

Our mission is to provide the best public health educational experience incorporating our core values of scholarship and leadership, scientific rigor and policy analysis, and training to foster the next generation of thought leaders, practitioners, policy makers, and scientists who will transform public health worldwide, especially for underserved and poor populations.

Vision

As complex global health challenges continue to threaten our health and future, the Milken Institute SPH will be preeminent in training tomorrow’s leaders for improving the public’s health. We aspire to become one of the top five private schools of public health in the world.

Accreditation

The public health programs of the Milken Institute SPH are fully accredited by the Council on Education for Public Health (CEPH). In 2016, the Milken Institute SPH was awarded a seven-year accreditation through July 1, 2023. The program in health administration is fully accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). Milken Institute SPH is a member of the Association of Schools and Programs of Public Health.

REGULATIONS

- Undergraduate Regulations (p. 879)
- Graduation Requirements (p. 879)
- Enrollment Status (p. 879)
- Advising (p. 879)
- Timely Progress Toward the Degree (p. 879)
- Incompletes (p. 880)
- Pass/No Pass Option (p. 880)
- Academic Workload (p. 880)
- Applying for Readmission to a Program (p. 880)
Undergraduate Regulations

Graduation Requirements

Depending on the Milken Institute SPH degree program, students must complete 120 to 124 credits. Students in the B.S. in exercise science degree programs must have a minimum cumulative GPA of 2.5 in courses in the Exercise Science core; those in the B.S. in public health program must have a minimum overall cumulative GPA of 2.5. The University General Education Requirement and major and other curriculum requirements are listed under each program's regulations tab in this Bulletin.

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designations (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

Enrollment Status

Once entered in an undergraduate degree program, students are expected to be registered continuously for at least 1 credit during all fall and spring semesters and to be engaged actively in fulfilling the requirements for their degree.

• In the fall and spring semesters, students must register for 1 or more credits to maintain enrollment status.
• During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
• Some additional activities, such as study abroad programs, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a leave of absence for a period of no more than one calendar year during their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who are granted a leave but do not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center and The Writing Center offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs, Mental Health Services, Disability Support Services, Multicultural Student Services Center, and International Services Office.

Timely Progress Toward the Degree

Students who fail to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be dismissed from the University (see Right to Dismiss Students under University Regulations). Students dismissed on these grounds may apply for readmission after supplying sufficient evidence of academic promise. Additionally, students must attain grades no lower than C– in required major field courses. If a student receives a grade of D+, D, or D– in a course specifically required for the major, the student will be required to repeat the course until a satisfactory grade (C– or better) is earned. Once the student has completed the course with a satisfactory grade, credits earned the first time the course was taken will count toward the minimum number of credits required for the major. Credits earned toward the repetition do not count toward the degree.
Incompletes
Conditions under which the symbol I, Incomplete, may be assigned are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, the conditions for granting a notation of I are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

The Incomplete work must be completed as specified in the contract but no later than one calendar year from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within one year of the assignment of the symbol I.

Pass/No Pass Option
Junior or senior students in good standing may, with the approval of the instructor and program director, take one course each semester for a grade of P, Pass, or NP, No Pass. No student will be allowed to take more than a total of four courses on a P/NP basis under this regulation. Students may, however, also receive grades of P/NP in courses that are graded only on that basis. Courses required for the University General Education Requirement or in the student’s major or minor field (including those courses required for the major that are offered by other departments) may not be taken on the P/NP basis. A transfer student may not choose this option until the second semester of enrollment in the University. Under no circumstances may a student change from graded status, or vice versa, after the end of the eighth week of class. The Milken Institute SPH does not allow LSPA courses to be counted toward the degree.

Academic Workload
To encourage academic performance of high quality, the Milken Institute SPH places limits on the number of credits a student may take. After freshman year, a full-time student who is not on probation may take a course load of up to 19 credits. The 18th and all subsequent credits require additional tuition charges. A full-time student who, during the immediately preceding semester, has received no grades below B− and has earned grades of A or A− in three courses totaling at least 9 credits may take up to 21 credits. Students may not register for more than 21 credits without the approval of the dean.

Applying for Readmission to a Program
Undergraduate students who previously were registered in a SPH program but who did not register during the immediately preceding semester (summer sessions excluded) are out of status and must apply for readmission by completing an admissions petition. Filing the petition does not guarantee that the student will be readmitted. Milken Institute SPH departments are responsible for readmitting students and can do so only if the student is not in violation of other Milken Institute SPH or University policies. Students who have attended one or more academic institutions while absent from this University must have complete, official transcripts from each institution sent directly to the Milken Institute SPH Office of Admissions. Applicants for readmission are considered on the basis of policies and program requirements currently in effect and if readmitted, will be subject to the policies and program requirements then in effect.

International Students--Less than Full-Time Status
International students on an F-1 or J-1 Visa are responsible for enrolling as a full-time student (minimum 12 credits for undergraduate students) for spring and fall semesters according to U.S. Immigration and Naturalization rules governing registration requirements. In certain circumstances, a reduced course load may be allowed; students should contact the International Services Office (http://internationalservices.gwu.edu) to request approval for this exception.

Special Honors
In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in exercise science must have a minimum GPA of 3.5 in required courses in the major and a minimum overall GPA of 3.25. The candidate must submit an honors paper; the student will be recommended for graduation with special honors only if a committee of at least two faculty members approves the paper.

Independent Study Course Requirements
Independent study is designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Forms and instructions for registration are available online (http://publichealth.gwu.edu/academics/forms). Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Preparation for Medical School
A student who plans to apply to medical school fulfills the general requirements of their program. The health professions advisors in the Columbian College Office of Undergraduate Studies provide advice about academic preparation for medical school. For admission to most medical schools, the student must earn a bachelor’s degree that includes the following course work: Biology—8 credits of introductory biology, including laboratory. Students who receive credit for AP biology must complete 8 credits of upper-level biology course work, including laboratory; chemistry—8 credits of general inorganic chemistry, including laboratory; organic Chemistry—8 credits, including laboratory; biochemistry—3
credits; physics—8 credits, including laboratory; and English—6 credits in introductory English composition courses (fulfilled by the University Writing Program). Many medical schools have additional entrance requirements, which may include courses in biochemistry, genetics, and mathematics; even when such courses are not required, they are strongly recommended. With the exception of the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

**Preparation for Law School**

A broad liberal arts education is the best undergraduate preparation for law school. Students are encouraged to use elective credit to increase the breadth of their program of study. Advice about academic preparation for law school is provided by the pre-law advisor in the Columbian College Office of Undergraduate Studies (http://columbian.gwu.edu/undergraduate/advising).

**Other Regulations**

Other regulations applicable to undergraduate students of the University can be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

### Graduate Regulations

The Milken Institute SPH provides an online Graduate Student Handbook (http://publichealth.gwu.edu/pdf/Handbook.pdf), which contains additional updated information on policies, regulations, and other matters of concern to enrolled or admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental handbooks and guidelines.

**Enrollment Status**

Once entered in a graduate degree program, students are expected to be registered continuously for at least one credit during all fall and spring semesters and engaged actively in fulfilling the requirements for the degree.

- In the fall and spring semester, students must register for 1 or more credits to maintain enrollment status.
- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as Master's International, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a Leave of Absence for a period of no more than one calendar year during the their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who granted a leave but does not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

**Advising**

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center (http://publichealth.gwu.edu/services/career-center) and Writing Center (http://www.gwu.edu/%7Egwriter) offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs (http://students.gwu.edu), Mental Health Services (http://counselingcenter.gwu.edu), Disability Support Services (http://gworid.gwu.edu/dss), the Multicultural Student Services Center (http://gwired.gwu.edu/mssc/?url=mssc), and the International Services Office (http://internationalservices.gwu.edu).

**Academic Standing**

Graduate students who are not suspended, on academic probation, or under extended provisional admission status are considered to be in good standing. Maintenance of a minimum GPA of 3.0 is required for the degree. All courses taken for graduate credit after matriculation as a degree candidate—including those the Milken Institute SPH transferred in from non-degree status, but excluding those audited or taken for the grade of CR/NC—will be used to calculate the GPA.

**Provisional Admission**

Graduate program applicants with credentials that are weaker than expected for graduate study, but who nonetheless show promise of successful graduate work, occasionally are granted provisional admission by the Milken Institute SPH Admissions Committee. While on provisional admission status, students are required to see their advisors each semester prior to registration. Provisionally admitted graduate students must demonstrate their ability to maintain a minimum GPA of 3.0 in the first 9 credits of coursework attempted, and during this time are not allowed to receive an Incomplete or a grade lower than a 3.0; provisionally admitted students who meet these requirements are granted good standing. Provisionally admitted students who do not meet these requirements are subject to suspension.

**Semester Warning**

Graduate students whose cumulative GPA is below 3.0 after attempting a minimum of 1 credit and a maximum of 8 credits will be issued a warning at the end of the semester and will be required to take corrective measures, such as meeting with their academic advisor to outline steps to raise the GPA.
Probation
Graduate students whose GPA falls below 3.0 at any point after completing 9 credits will be placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student’s program may be restricted by the program director if deemed necessary. During this period, the student’s performance will be monitored to determine suitability for continued study. A student who fails to raise the cumulative GPA to 3.0 or above during the period of probation is subject to suspension. Incompletes and grades of B- or below are not permitted during the probationary period and are grounds for automatic suspension. A student who is subject to probation for a second time at any point during their degree program may be suspended automatically.

Grade of F
Graduate student who receive a grade of F are subject to suspension. If such students wish to remain enrolled, they must present cause, for consideration by the dean and the director of his/her degree program, as to why continued study should be permitted. Once a grade of F is earned in a core, required, or elective course, it remains a part of the student’s permanent record and is calculated into the GPA. A graduate student who receives the grade of F in a core or other required course and is permitted to continue in graduate studies must repeat the course and achieve a minimum grade of 3.0. The repetition does now, however, expunge the grade of F, which remains part of the student’s record. If the student receives a grade below 3.0 in the repeated course, he or she will be suspended from the degree program.

Suspension
Graduate student who receive an F or do not meet the conditions of probation are subject to suspension. Suspended students may not register for or complete any courses at The George Washington Dean’s Office, in consultation with the student’s academic advisor, may continue a student on probation (in lieu of suspension) if satisfactory progress is demonstrated during the probationary period, and sufficient evidence of academic promise, by way of a statement of appeal, is offered by the student. A student who is suspended or withdraws under these conditions may apply for readmission after one semester. To be readmitted, the student must submit evidence that suggests the probability of academic success. A student who is readmitted will continue on academic probation and must achieve a minimum GPA of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this GPA, he or she will be suspended and will not be readmitted.

Timely Progress Toward the Degree
A graduate student who fails to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be suspended. Students suspended on these grounds may apply for readmission after supplying sufficient evidence of academic promise.

Summary of Academic Standing Policies for Graduate Students

• Provisional Admission—A student who receives a grade of I or of B- or lower while on provisional admission status is subject to suspension.
• Semester Warning—A student with a cumulative GPA below 3.0 (with fewer than 9 credits completed) must take corrective action.
• Academic Probation—A student with a cumulative GPA below 3.0 (with 9 or more credits completed) is placed on academic probation. A student on academic probation who receives an unacceptable grade (B-, C, F, I, Z) or fails to raise the cumulative GPA to 3.0 within the next 12 credits taken is subject to suspension.
• Grade of F—A student who receives a grade of F is subject to suspension. If a student wishes to remain enrolled he or she must present cause as to why continued study should be permitted. If permitted to continue in graduate studies, the student must repeat the course (if core or required) and achieve at least the grade of B.
• Suspension—A student who is suspended may not register for or complete any courses at GW. A student who is suspended or withdraws under these conditions may apply for readmission after one semester.

Incompletes
Conditions under which the symbol I, Incomplete, may be assigned are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, the conditions for granting a notation of I are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

Changing an Incomplete (I)
Conditions under which the symbol I, Incomplete, may be changed to a letter grade are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within six months of the assignment of the symbol I.

In Progress (IP)
The notation In Progress (IPG) is assigned for all thesis, residency, advanced reading, independent study, culminating experience, practicum, and dissertation research courses until the coursework is completed. Upon the satisfactory completion, the grade replaces the notation IPG on the
transcript. An IPG may not be assigned to regular, semester-length courses.

Applying for Readmission to a Program

Students Who Have Taken Classes Within the Past Year:
Milken Institute SPH graduate degree or certificate students who were previously registered in the university but did not register during the immediate preceding semester/module (excluding summer sessions) are out of status and must apply for readmission by completing an admissions petition. (http://publichealth.gwu.edu/academics/forms)

Students Who Have Not Taken Classes in More Than a Year:
Students who have not taken any courses at GW in more than one year must apply for readmission using SOPHAS Express (https://sophasexpress.liaisoncas.com).

Students Who Have Been Suspended:
Students who were suspended from the Milken Institute SPH must apply for readmission through SOPHAS Express (https://sophasexpress.liaisoncas.com). Students may only apply for readmission after at least one academic year has passed. Students should consult with the advisor concerning readmission requirements.

International Students---Less than Full-Time Status
International students on an F-1 or J-1 Visa are responsible for enrolling as full-time student (minimum 9 credits for graduate students) for the spring and fall semesters according to the U.S. Immigration and Naturalization rules governing registration requirements. Under certain circumstances, a reduced course load may be allowed. To request approval for a course reduction, students should submit the F-1/J-1 Request for Reduced Course Load Form (http://bulletin.gwu.edu/public-health/%20http://gwired.gwu.edu/iso/CurrentStudents/forms/copy). More information is available by calling the ISO at (202) 994-4477.

Independent Study Course Requirements
Independent study is designed to provide students with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Instructions and forms required for registration (http://publichealth.gwu.edu/academics/forms) are available. Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Graduation
While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designation (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

UNDERGRADUATE

Bachelor's programs
- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)
- Bachelor of Science with a major in public health (p. 895)

Combined program
- Dual Bachelor of Science in public health and Master of Public Health

Minors
- Minor in exercise science (p. 897)
- Minor in nutrition
- Minor in public health

GRADUATE

Master of Public Health
- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of community oriented primary care (p. 1003)
- Master of Public Health in the field of environmental health science and policy (p. 912)
- Master of Public Health in the field of epidemiology
- Master of Public Health in the field of global environmental health (p. 916)
- Master of Public Health in the field of global health communication (p. 955)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)
- Master of Public Health in the field of global health policy (p. 960)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Public Health in the field of health policy (p. 972)
- Master of Public Health in the field of health promotion (p. 1007)
- Master of Public Health in the field of maternal and child health (p. 1009)
- Master of Public Health in the field of physical activity in public health (p. 941)
• Master of Public Health in the field of public health communication and marketing (p. 1011)
• Master of Public Health in the field of public health nutrition (p. 944)
• Master of Public Health: MPH@GW (p. 900)

Master of Science
• Master of Science in the field of biostatistics (p. 930)
• Master of Science in the field of epidemiology (p. 931)
• Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)
• Master of Science in the field of health policy (p. 978)
• Master of Science in the field of public health microbiology and emerging infectious diseases (p. 933)
• Master of Science in the field of management of health informatics and analytics (p. 979)

Master of Health Administration
• Master of Health Administration (p. 968)
• Master of Health Administration - online/executive program (p. 971)

Specialist program
• Health Services Administration Specialist (p. 979)

Joint/Dual programs
• Doctor of Medicine and Master of Public Health (p. 909)
• Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 909)
• Master of Arts in the field of international affairs and Master of Public Health (p. 899)
• Master of Health Administration with a certificate in health care corporate compliance (p. 902)
• Master of Public Health in the field of health policy with a certificate in health care corporate compliance (p. 907)
• Master of Science in Health Policy with a certificate in health care corporate compliance (p. 903)
• Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 903)
• Peace Corp Masters International Program and Master of Public Health

Doctoral programs
• Doctor of Public Health in the field of environmental and occupational health (p. 920)
• Doctor of Public Health in the field of global health (p. 965)
• Doctor of Public Health in the field of health behavior (p. 1013)
• Doctor of Public Health in the field of health policy (p. 981)
• Doctor of Philosophy in the field of biostatistics (p. 935)
• Doctor of Philosophy in the field of epidemiology (p. 937)
• Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 980)
• Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1014)

CERTIFICATES
• Graduate certificate in health administration generalist (p. 982)
• Graduate certificate in long-term care
• Graduate certificate in health policy
• Graduate certificate in public health (p. 910)

COURSES
Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

The letters and range of numbers below indicate the department in which the course is offered.

PUBH 6000 - 6099: MPH Core & MPH@GW Program-Specific Courses
PUBH 6100 - 6199: Environmental and Occupational Health Courses
PUBH 6200 - 6299: Epidemiology and Biostatistics Courses
PUBH 6300 - 6399: Health Policy Courses
PUBH 6400 - 6499: Global Health Courses
PUBH 6500 - 6599: Prevention and Community Health Courses
PUBH 6600 - 6699: Public Health Nutrition and Miscellaneous Courses
PUBH 8000 - 9000: Doctoral Level Courses
EXSC 6000 - 7000: Exercise Science Courses
HSML 6200 - 6300: Health Services Management and Leadership Courses

• Epidemiology (EPID) (p. 1214)
• Exercise and Nutrition Sciences (EXNS) (p. 1214)
• Health and Wellness (HLWL) (p. 1253)
• Health Services Management and Leadership (HSML) (p. 1250)
• Lifestyle, Sports, and Physical Activity (LSPA) (p. 1328)
• Public Health (PUBH) (p. 1420)
UNDERGRADUATE PROGRAMS

Bachelor’s programs

- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)
- Bachelor of Science with a major in public health (p. 895)

Combined program

- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in exercise science (p. 897)
- Minor in nutrition
- Minor in public health

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Advisor and Director  B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health-related professions including athletic training/sports medicine, physical therapy, physician’s assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration.

**BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-MEDICAL PROFESSIONAL CONCENTRATION**

*Program Advisor and Director* B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician’s assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

**REQUIREMENTS**

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

**University General Education Requirements*

Two writing-in the disciplines (WID) courses (may also be counted in another category)

One critical analysis in the humanities course

One quantitative reasoning course (must be satisfied with STAT 1051, STAT 1053, or STAT 1127 for Exercise Science majors)

One scientific reasoning course with laboratory experience (must be satisfied with BISC 1111 for Exercise Science majors)

Two critical analysis in the social sciences courses (must be satisfied with ANTH 1002, ANTH 1003, or ANTH 1004; and COMM 1040, or COMM 1041 for Exercise Science majors)

*A list of approved courses can be found on the General Education Requirement page (p. 38).

Upon completion of the bachelor of science with a major in public health, students will be able to:

Assess the impact of historical, cultural, political, environmental, behavioral, and socioeconomic factors on population/community health and health status

Relevant courses:

- PUBH 1101 Introduction to Public Health & Health Svcs
- PUBH 1102 History of Public Health
- PUBH 2110 Public Health Biology
- PUBH 2112 Principles of Health Education and Health Promotion
- PUBH 3132 Health and Environment
- PUBH 3133 Global Health and Development
- PUBH 3135W Health Policy
- PUBH 4140W Senior Seminar

Describe the organization, financing, and delivery of health services and public health systems

Relevant courses:

- PUBH 1101 Introduction to Public Health & Health Svcs
- PUBH 3130 Health Services Management and Economics
- PUBH 3133 Global Health and Development
- PUBH 3135W Health Policy

Describe the underlying biological factors relating to prominent public health and health care issues and discuss how these factors inform interventions to improve individual and population health

Relevant courses:

- PUBH 1101 Introduction to Public Health & Health Svcs
- PUBH 2112 Principles of Health Education and Health Promotion
- PUBH 2110 Public Health Biology
- PUBH 3131 Epidemiology: Measuring Health and Disease
- PUBH 3132 Health and Environment
- PUBH 3133 Global Health and Development

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-physical therapy concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH

Program Director  S. Wilensky

The bachelor of science with a major in public health degree program is intended to convey to students technical detail and analytic skills with a liberal arts philosophical base. It also has the educational objectives of nurturing critical thinking, analysis, and synthesis of information, and recognizing the historical and societal associations of current trends in public health and health care delivery. While nurturing students’ capacity to think analytically and creatively, the program strives to deepen students’ commitment to improving the public’s health.

Students may apply to enter the 120-credit public health major during the semester prior to completing 60 credits. Applicants should have a minimum grade point average of 3.0.

Visit the program website (http://publichealth.gwu.edu/programs/public-health-bs) for additional information.

COMPETENCIES

The following competencies are designed to be achieved by all public health majors through the indicated courses:
PUBH 4140W Senior Seminar

Critically review multiple types of research, develop an understanding of data and research, and develop and evaluate public health interventions based on available evidence

Students must take all required courses at GW unless an exception is granted by the SPH Director of Undergraduate Programs. Permission will be granted only if there are strong extenuating circumstances that call for such an exception. Students must comply with policies and procedures as outlined in University and SPH regulations. Students should pay particular attention to SPH requirements for completing human research training, completing 8 hours of professional enhancement activities, and passing the academic integrity quiz.

**COMBINED BACHELOR OF SCIENCE IN PUBLIC HEALTH AND MASTER OF PUBLIC HEALTH**

**Program Director** S. Wilensky  
**Program Advisor** M. Wilson

The Milken Institute School of Public Health (SPH) accepts a small number of outstanding students who demonstrate academic excellence and a strong commitment to public health into its dual bachelor of science in public health/master of public health (B.S./M.P.H.) degree program each year. The program is designed to help students become public health leaders who are committed to lifelong learning and improving the health and well-being of local, national, and international communities.

The B.S./M.P.H. program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master’s degree. The program is appropriate for pre-professional students who are interested in public health issues. Interested students may apply to any of the M.P.H. programs, with the exception of public health management.

Specific master’s program admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/public-health-bsmph) for additional information.

GRADUATE PROGRAMS

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of community oriented primary care (p. 1003)
- Master of Public Health in the field of environmental health science and policy (p. 912)
- Master of Public Health in the field of epidemiology
- Master of Public Health in the field of global environmental health (p. 916)
- Master of Public Health in the field of global health communication (p. 955)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)
- Master of Public Health in the field of global health policy (p. 960)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Public Health in the field of health policy (p. 972)
- Master of Public Health in the field of health promotion (p. 1007)
- Master of Public Health in the field of maternal and child health (p. 1009)
- Master of Public Health in the field of physical activity in public health (p. 941)
- Master of Public Health in the field of public health communication and marketing (p. 1011)
- Master of Public Health in the field of public health nutrition (p. 944)
- Master of Public Health: MPH@GW (p. 900)

Master of Science

- Master of Science in the field of biostatistics (p. 930)
- Master of Science in the field of epidemiology (p. 931)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)
- Master of Science in the field of health policy (p. 978)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 933)
- Master of Science in the field of management of health informatics and analytics (p. 979)

Master of Health Administration

- Master of Health Administration (p. 968)
- Master of Health Administration - online/executive program (p. 971)

Specialist program

- Health Services Administration Specialist (p. 979)

Joint/Dual programs

- Doctor of Medicine and Master of Public Health (p. 909)
- Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 909)
- Master of Arts in the field of international affairs and Master of Public Health (p. 899)
- Master of Health Administration with a certificate in health care corporate compliance (p. 902)
- Master of Public Health in the field of health policy with a certificate in health care corporate compliance (p. 907)
- Master of Science in Health Policy with a certificate in health care corporate compliance (p. 903)
- Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 903)
- Peace Corp Masters International Program and Master of Public Health

Doctoral programs

- Doctor of Public Health in the field of environmental and occupational health (p. 920)
- Doctor of Public Health in the field of global health (p. 965)
- Doctor of Public Health in the field of health behavior (p. 1013)
- Doctor of Public Health in the field of health policy (p. 981)
- Doctor of Philosophy in the field of biostatistics (p. 935)
- Doctor of Philosophy in the field of epidemiology (p. 937)
- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 980)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1014)

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS AND MASTER OF PUBLIC HEALTH

SPH Program Coordinator E. Uretsky

The Elliott School of International Affairs and Milken Institute School of Public Health collaborate in offering a dual degree program leading to a Master of Public Health (M.P.H.) and the Master of Arts (M.A.) for the following academic programs:

M.A./M.P.H. Area of Combined Study
The George Washington University 2016-17 Academic Bulletin

• Milken Institute School of Public Health
  Master of Public Health
  • Global Health Communication
  • Global Health Program Design, Monitoring and Evaluation
  • Global Health Policy
• Elliott School of International Affairs
  Master of Arts
  • Asian Studies
  • European and Eurasian Studies
  • International Affairs
  • International Development Studies
  • Latin American & Hemispheric Studies

The dual degree requires a total of 67 credits. Students electing Global Health as their Elliott School M.A. major field can use the 12 major field credits (taken in the Department of Global Health) to fulfill both the M.A. and M.P.H. requirements. Six additional credits of course work in the Elliott School may also be applied toward the M.P.H. as electives.

Students applying to the M.A./M.P.H. program must submit application materials to both the Elliott School of International Affairs and the Milken Institute School of Public Health and be accepted by both schools. A full-time student (taking an average of 10 credits per semester) may be able to complete both degrees within three years by attending summer sessions. Students accepted into the dual degree program may complete each degree separately.

Visit the program website (http://publichealth.gwu.edu/programs/joint-mamph) for additional information.

REQUIREMENTS

Curriculum
The requirements for each program are found in the program information on the Milken Institute SPH (http://publichealth.gwu.edu/academics) website and Elliott School of International Affairs (http://elliott.gwu.edu/graduate-programs) website.

Dual Degree Rules and Regulations
Students in the dual degree program must fulfill the requirements of both degrees. Students are expected to work with program directors or advisors in each School to insure that all requirements are completed. Approval by program directors or advisors in both Schools is required for any overlap courses designated as meeting the requirements of both degree programs.

Graduation
Students completing the requirements of one degree program may apply to graduate with that degree prior to completing the second degree. Students may also formally request withdrawal from either program at any time to pursue a single degree in the other program. All work on each degree must be completed within five years from the student’s entry into that degree program.

MASTER OF PUBLIC HEALTH: MPH@GW

Program Director M. Turner

Program Description
This distance education track for the master of public health (M.P.H.) degree emphasizes local, national, and global health practice. The program emphasizes interdisciplinary teaching, and focuses on core competencies/skills and uses cases/other materials from both the U.S. and abroad. The pedagogy allows students to tailor their education to community level, national, or global interests in the U.S. and countries around the world, emphasizing interdisciplinary public health competencies, including biostatistics and epidemiology; cultural competency; health communication; leadership; professionalism; planning, implementation and evaluation methods; public health biology; and systems thinking.

The MPH@GW track is taught in 10-week quarters across the calendar year (4 quarters per year).

Mission
Provide a practice-oriented M.P.H. curriculum that enables graduates to be leaders in the design of population and community health programs in the US and globally.

Visit the program website (http://publichealthonline.gwu.edu) for additional information.

COMPETENCIES

Program-Specific Competencies
Upon completion of the program, students should possess the following functional competencies.

• Describe biological mechanisms of major diseases causing death and disability in the US and globally from a public health perspective.

  Relevant course:
  PUBH 6001 Biological Concepts in Public Health

• Define communities and identify and assess relevant population health needs.

  Relevant courses:
  PUBH 6007 Social and Behavioral Approaches to Public Health
• Assess the functions, capacities, management and governance of governmental, international and non-state organizations that comprise health systems. Translate scientific and program evidence to inform the development of public health programs and policies within the context of health systems.

**Relevant courses:**
- PUBH 6006 Management and Policy Approaches to Public Health
- PUBH 6442 Comparative Global Health Systems

• Apply public health theory and experiential evidence to develop and manage project, program and institutional strategies to reduce community and individual health risks to mitigate the impact of disease.

**Relevant courses:**
- PUBH 6007 Social and Behavioral Approaches to Public Health
- PUBH 6503 Introduction to Public Health Communication and Marketing

• Conduct core program evaluations and complete an assessment of program outcomes, achievements, impacts and shortcomings. Communicate findings to stakeholders.

**Relevant courses:**
- PUBH 6501 Program Evaluation
- PUBH 6437 Global Health Program Evaluation

• Apply relevant qualitative and quantitative tools and concepts to inform policy analyses for different audiences and topics.

**Relevant courses:**
- PUBH 6002 Biostatistical Applications for Public Health
- PUBH 6003 Principles and Practices of Epidemiology
- PUBH 6502 Practical Data Analysis: PCH

• Develop concise written and oral policy analyses for different audiences; identify the key strategies required to protect and advance health.

**Relevant course:**
- PUBH 6006 Management and Policy Approaches to Public Health

• Describe how health systems performance is affected by various approaches to health care organization, health law, health workforce development and health care financing.

**Relevant courses:**
- HSML 6202 Intro/Health Services Delivery
- PUBH 6442 Comparative Global Health Systems

• Develop knowledge and skills in fundamentals of environmental health including the connection between population health and exposures to chemical, physical, and biological agents in the environment.

**Relevant course:**
- PUBH 6004 Environmental and Occupational Health in a Sustainable World

• Develop communication campaigns and strategies to disseminate health promotion information through media channels.

**Relevant course:**
- PUBH 6503 Introduction to Public Health Communication and Marketing

## REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 16 credits in program-specific courses, 10 credits in elective courses, 2 credits in a practicum, and 2 credits in a culminating experience.

**Graduation Requirements**

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

**MASTER OF HEALTH ADMINISTRATION WITH A CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE**

*Program Director* J. Thorpe

GW’s College of Professional Studies offers a 12-credit graduate certificate program in corporate compliance (https://cps.gwu.edu/healthcare-compliance) that draws from the Milken Institute School of Public Health’s Department of Health Policy and a leading health care law firm in Washington, D.C. The program focuses on health care laws and regulations as well as the tools and strategies for creating effective corporate compliance programs.

Students who successfully complete the requirements for the certificate program may apply those credits as electives in the master of heath administration (M.H.A.) degree program. All other degree requirements for the M.H.A. (p. 968) must be fulfilled. Visit the program website (p. 968) for additional information.

**REQUIREMENTS**

**Program Requirements**

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW’s Graduate Education Center in Alexandria, VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Healthcare Corporate Compliance can be awarded in conjunction with a Master of Heath Administration (MHA). The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied as electives in this program.

All other degree requirements for the MHA Master’s program must be fulfilled as noted on the MHA program page (p. 968).

**College of Professional Studies**

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies. Visit the CPS website (http://cps.gwu.edu/healthcare-compliance) for more information.
MASTER OF SCIENCE IN HEALTH POLICY WITH A CERTIFICATE IN HEALTHCARE CORPORATE COMPLIANCE

Program Director  J. Thorpe

GW’s College of Professional Studies offers a 12-credit graduate certificate program in corporate compliance (https://cps.gwu.edu/healthcare-compliance) that draws from the Milken Institute School of Public Health’s Department of Health Policy and a leading health care law firm in Washington, D.C. The program focuses on health care laws and regulations as well as the tools and strategies for creating effective corporate compliance programs.

Students who successfully complete the requirements for the certificate program may apply those credits as electives in the master of science (M.S.) in health policy degree program. All other degree requirements for the M.S. program (p. 972) must be fulfilled. Visit the program website (http://publichealth.gwu.edu/programs/health-policy-ms) for additional information.

DUAL MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Program Director  J. Cawley

Mission Statement

As the U.S. health care system continues to evolve, market forces and changing personnel requirements create new and expanding roles for health care professionals. The joint Physician Assistant-Master of Science in Health Sciences/ Master of Public Health P.A.-M.S.H.S./M.P.H. program strives to fill the need for a new type of health care professional: one who has both the depth of medical knowledge and the range of leadership and policy skills to meet the challenges of future practice. Based in both the Milken Institute School of Public Health (SPH) Department of Prevention and Community Health, and the School of Medicine and Health Sciences (SMHS), the P.A.-M.S.H.S./M.P.H. program presents a graduate curriculum that blends two important traditional paradigms of health care—the biomedical and the preventive. Health care professionals in the future U.S. health system must be prepared as competent and caring clinicians, as well as bring a broad view of population health and prevention to their work. Graduates of the GW P.A./M.P.H. program will be leaders in clinical practice in primary care and preventive medicine and will have the preparation to assume high level positions in education, research, and policy.

Goals

The P.A.-M.S.H.S. /M.P.H. provides the opportunity for students to obtain the competencies necessary to succeed in the rapidly evolving American and global health systems.

The major goals of GW’s P.A.-M.S.H.S./M.P.H. program are to:

• Recruit diverse and intellectually curious students and develop in them a strong clinical medical and prevention knowledge base necessary to deliver the highest quality patient-centered healthcare in a variety of clinical settings worldwide;
• Educate future health care professionals who are competent clinicians who can bring a population health orientation to their practice setting;
• Develop practitioners for the future who integrate concepts of prevention, community-oriented primary care, and population health;
• Graduate collaborative clinicians who will serve the healthcare needs of a worldwide community with intelligence, compassion, and integrity;
• Foster analytic thinking skills such that graduates will be able to perform a wide range of clinical tasks working with physicians, as well as assessing community health problems and addressing population health needs;
• Nurture a sensitivity and respect for the cultural and personal beliefs of all patients and an understanding of how social, economic, and other system forces can impact health and healthcare and how these impact patient morbidity and mortality;
• Encourage graduates to be responsive to the needs of patients and society and advocate for quality patient care regardless of patient population;
• Graduate practitioners who will have the information technology and research skills necessary to access and interpret the medical literature and support their ongoing professional development; and
• Expect graduates to practice collaboratively, professionally, legally, ethically, and with integrity.

The P.A.–M.S.H.S./M.P.H. program draws from a faculty in both the School of Medicine and Health Sciences and the Milken Institute SPH to provide instruction in a wide range of subjects in medicine, public health, and professional leadership.

The purpose of the P.A.–M.S.H.S./M.P.H. program is to provide future clinicians with a wide range of skills in leadership, policy development, and community and preventive medicine. Students in the program prepare as clinicians fulfilling all of the requirements for national certification as a physician assistant (PA) in the GW Physician Assistant program. In addition, public health course work provides an orientation to population and community health. For example, in the Community Oriented Primary Care (COPC) track, students acquire skills in community health assessment, community based interventions, and the application of COPC principles in community based practice settings. GW’s SPH course work in health care administration, management, and health care economics prepares students to be leaders in a wide variety of clinical settings, office practices, outpatient clinics, community-based health centers, and health care institutions. Students are also exposed to the formulation of health policy.

Set in the center of the health policy in the nation, the P.A.–M.S.H.S./M.P.H. program affords students the chance to interact with individuals in both the public and private sector who are involved in policy research, practice, and legislation.

Visit the M.P.H. program website (http://publichealth.gwu.edu/academics/graduate/masters-programs) for additional information.

Visit the P.A. program website (https://www.gwu.edu/graduate-programs/physician-assistant) for additional information.

**Admissions Requirements**

If you are interested in the joint P.A./M.P.H. program you will be receiving correspondence from both the School of Medicine and Health Sciences (for the P.A.–M.S.H.S.) and the Milken Institute SPH and School of Medicine and Health Services (for the M.P.H.) regarding the completion of your application and admissions decisions. Should you be accepted to one degree program and not the other, you may accept the admissions offer from the program to which you were accepted, because decisions are made separately.

1. Submit the P.A. Application (CASPA and PA Secondary Application) according to the instructions on the website (http://smhs.gwu.edu/pas/program/prospective-students/admissions).

2. You should submit the P.A. Secondary Application within two weeks of submitting the CASPA.

3. October 1 is the deadline for complete applications to include GRE score receipt.

The School of Medicine and Health Services, to save you time and money, will copy your application materials and send them to the Admissions Office of the Milken Institute SPH. Do not complete the SOPHAS application or the SPH secondary application, as this will delay the processing of your application and result in your accruing increased application fees.

**COMMUNITY-ORIENTED PRIMARY CARE**

The following requirements must be fulfilled: 136 credits, including 100 credits in physician assistant courses, 13 credits in public health core courses, 10 credits in prevention and community health courses, and 13 credits in community oriented primary care track courses.

The George Washington University 2016-17 Academic Bulletin 906
Given the dramatic changes in healthcare policy and regulation over the past decade, the position of corporate compliance officer has become increasingly important in the healthcare industry. No other position can have so profound an impact on your healthcare organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws has created the need for university-based credentials for this increasingly specialized—and increasingly complicated—field.

GW’s College of Professional Studies (CPS) offers a one-of-a-kind program providing a comprehensive corporate compliance education. Drawing from both GW’s Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate
compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW’s Graduate Education Center in Alexandria, VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Healthcare Corporate Compliance can be awarded in conjunction with a Master of Public Health in the field of health policy. The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied toward this MPH. 3 credits earned in the Graduate Certificate can be applied to the Program-Specific courses and 9 credits to the electives.

All other degree requirements for the MPH program must be fulfilled as noted on the MPH in the field of health policy program page (p. 972).

College of Professional Studies
The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies. Visit the CPS website (http://cps.gwu.edu/healthcare-compliance) for more information.

PEACE CORP MASTERS INTERNATIONAL PROGRAM AND MASTER OF PUBLIC HEALTH

Program Contacts  Milken Institute School of Public Health, Office of Recruitment and Admissions (asksphhs@gwu.edu)

The Milken Institute School of Public Health (Milken Institute SPH) collaborates with the Peace Corps as one of 90 institutions in the United States participating in this prestigious academic partnership. The program is designed to help address the shortage of prepared public health professionals that the organization has identified. Students in the program earn a degree in any one of the Milken Institute SPH’s M.P.H. programs, which provides the academic base and professional skills. They then have priority placement for the two-year public health service assignment with the Peace Corps in a developing country, which provides on-the-ground training.

Students in the program complete M.P.H. course work on the GW campus and then enter the Peace Corps and begin their service in the assigned country. As Peace Corps volunteers, M.P.H. students complete three months of intensive language, technical, and cross-cultural training followed by two years of service as public health workers. The Peace Corps experience serves as the practicum required for the M.P.H. degree, and generally provides the basis for the program’s required culminating experience. Upon satisfactory completion of the two-year Peace Corps service and completion of the practicum, students return to GW and enroll in the culminating experience.

The degree is awarded once all requirements for the M.P.H. have been fulfilled.

REQUIREMENTS
Admissions Requirements
To be eligible for this program, applicants must be accepted by both the Milken Institute School of Public Health and the Peace Corps through separate application processes. Prospective applicants should apply to both programs simultaneously to allow sufficient time for the Peace Corps’ medical and suitability clearances to be processed. While it is best to apply simultaneously to both programs, it may be possible to apply and be accepted to the Peace Corps after having begun the M.P.H. degree program. The review of applications is independent and admission to one program does not guarantee admission to the other.

Peace Corps
To join the Peace Corps, applicants must be U.S. citizens, at least 18 years old, and in good physical health. Call or write for additional information regarding eligibility criteria and benefits package (including field practicum tuition waiver, language and cultural training, living/ housing expenses in the field, medical/dental coverage, deferment of student- loan repayment, transportation expenses to and from one’s assigned country, vacation time and allowances, financial readjustment allowance, and employment assistance post-service). Master’s International students should be willing to serve at any location assigned by the Peace Corps. Visit the Peace Corps website (http://bulletin.gwu.edu/public-health/peace-corps/www.peacecorps.gov) for more information.

Milken Institute School of Public Health
To join the SPH M.P.H. program follow the application process described on the SPH Admissions website (http://publichealth.gwu.edu/admissions/graduate-admissions).

Program Format
1. Apply to the Milken Institute SPH M.P.H. program and the Peace Corps simultaneously, and gain acceptance to both programs.
2. Successfully complete all on-campus course work for the M.P.H. (expect one and one-half to two years of study), with the exception of the practicum and culminating experience.
4. Deploy to service site.
5. Early in the deployment, submit a practicum proposal to the SPH practicum director for approval. (This step may be undertaken earlier in the process);
6. Complete the practicum and maintain communication with the SPH practicum director on at minimum a quarterly basis,
or as directed by the director) while completing the Peace Corps assignment.

7. Complete the Peace Corps assignment and return to GW to complete the culminating experience and graduate.

Visit the Milken Institute School of Public Health website (http://publichealth.gwu.edu/programs/master%E2%80%99s-international-program-peace-corps-mph) for more information.

DOCTOR OF MEDICINE AND MASTER OF PUBLIC HEALTH

Program Director S. Schroth

George Washington University School of Medicine and Health Sciences (SMHS) applicants and students can apply to the Milken Institute School of Public Health to obtain a Master of Public Health (M.P.H.) degree in one of the following programs:

- Biostatistics
- Community Oriented Primary Care
- Environmental Health Science and Policy
- Epidemiology
- Global Environmental Health
- Global Health Communication
- Global Health Policy
- Global Health Program Design, Monitoring and Evaluation
- Global Epidemiology and Disease Control
- Health Policy
- Health Promotion
- Maternal and Child Health
- Physical Activity in Public Health
- Public Health Communication and Marketing
- Public Health Nutrition

REQUIREMENTS

While the MPH degree is 45 credits in length, joint students will enroll in 43 total MPH credits.

- Joint students do not take PUBH 6001 BiologicalConcepts/PublicHlth (2 credits).
- SMHS accepts PUBH 6014 Practicum (2 credits) and PUBH 6015 Culminating Experience (2 credits), upon approval, which may fulfill the special project requirement for certain courses.

Students in the five year joint MD/MPH degree program may begin the MPH portion of the program at any time prior to the beginning of their fourth year in the MD program. All joint students are granted a one year leave of absence from medical school during which between 18 and 27 credits of MPH work are completed. The remaining course work is completed during the summer semesters, coincident with parts of the medical school curriculum, and during the spring semester of the senior year of the MD curriculum when elective credit requirements for the MD degree are waived.

Visit the Milken Institute School of Public Health joint MD/MPH website (http://publichealth.gwu.edu/programs/joint-mdmph) for more information.

JOINT JURIS DOCTOR AND MASTER OF PUBLIC HEALTH

Program Contact J. Teitelbaum

Hirsh Health Law and Policy Program

The Hirsh Health Law and Policy Program of The Milken Institute School of Public Health (SPH) offers unique educational opportunities to law students, practicing lawyers, and health professions students. Endowed by Harold and Jane Hirsh and home to GW’s joint degree programs in law and public health, the program is designed to foster an interdisciplinary approach to the study of health policy, health law, public health, and health care. The Hirsh Program’s overall goal is to advance a greater understanding regarding how the law influences and shapes all facets of health care and public health, as well as how the changing system affects traditional areas of the law. At the same time, the program seeks to achieve the pragmatic objectives of preparing law degree candidates and practicing lawyers for the broad range of health law-related careers that are available today.

Established in 1997, the Hirsh Program is structured to allow students to take maximum advantage of its location in Washington, DC, the center of the national health policy and law debate. The program is designed to provide a solid grounding in individual and population health, from the health care and public health systems themselves to extensive course work in advanced health policy and law. The program serves juris doctor (J.D.) and master of laws (LL.M.) candidates as well as lawyers pursuing health law careers and all manner of health profession students.

Joint Degree Admissions Information

J.D. students are required to focus their studies exclusively to the first-year curriculum. Applicants to the joint law-public health degree/certificate program may apply for admission to SPH at the same time they apply to GW Law School or after admission to the Law School. J.D. candidates who do not apply concurrently to the Law School and SPH are encouraged to file the M.P.H. or certificate application by the spring semester of their first year of law studies. LL.M. candidates are encouraged to apply to SPH at the time they apply to the Law School or during their first semester on campus.

Applicants to the joint law-public health program must complete the application processes for both the Law School (J.D. or LL.M.) and for the Milken Institute School of Public Health (M.P.H. or certificate). Admission to the joint degree program requires admissions acceptances from both Schools.
However, because admission to each School is separate and distinct, applicants who are accepted by one School but not the other are free to enroll in the School to which they have been accepted.

Applications for both programs are available on the Law School website (http://www.law.gwu.edu/Admissions/Pages/Default.aspx) and SPH website (http://publichealth.gwu.edu/admissions). Whether applying simultaneously to both Schools or as a current GW Law student, applicants must complete the SOPHAS application as indicated at the SPH website (http://publichealth.gwu.edu/admissions/graduate-admissions).

Internship/Research Opportunities
The Hirsh Program offers extensive assistance in arranging internships in congressional offices, federal agencies, and the hundreds of national health organizations located in and throughout the Washington, D.C. metropolitan area. Through its affiliation with the Department of Health Policy, the program also engages in extensive law-related health policy research, offering Hirsh Program students paid and unpaid training opportunities during their period of study. Visit the Department's website (http://www.gwhealthpolicy.org) for a description of the types of research in which it engages.

REQUIREMENTS

M.P.H. Requirements
The course of study for the M.P.H. degree consists of 45 credits in one of several focus areas (http://publichealth.gwu.edu/node/766), including a supervised practicum. Because the Milken Institute SPH accepts 8 Law School credits toward completion of the M.P.H. degree, juris doctor (J.D.) and master of laws (LL.M.) students need only complete 37 credits of coursework through SPH to obtain an M.P.H. degree.

Depending upon the focus area in which a J.D. student chooses to study, the joint degree can be earned, as a general rule, in three-and-a-half or four years of full-time study, including summer enrollment. J.D. candidates selecting joint degree studies in one of the more science-oriented areas, such as epidemiology or biostatistics, should anticipate a four-year course of study. Candidates selecting a less scientific area, such as health policy or health management, can expect to complete their joint degrees in three-and-a-half years. Full-time LL.M./M.P.H. candidates should anticipate completing the joint degree in approximately two years. Part-time J.D. and LL.M. candidates pursuing joint degrees will, of course, have longer courses of study.

Certificate Requirements
The course of study for the graduate certificate consists of 18 credits in one of several focus areas (http://publichealth.gwu.edu/node/768). However, because the Milken Institute SPH accepts 6 Law School credits toward completion of the certificate program, J.D. and LL.M. students need only complete 12 credits of coursework through the SPH to obtain a graduate certificate in public health. Upon an individual's subsequent acceptance to the M.P.H. degree program, credits from the graduate certificate may be transferred to the M.P.H. degree program. Full-time J.D. candidates can complete a graduate certificate during their regular course of study in the Law School. Full-time LL.M./certicate candidates typically complete the program in one-and-a-half years.

GRADUATE CERTIFICATE IN PUBLIC HEALTH

REQUIREMENTS

Advisor J. DeLoia

The following requirements must be fulfilled: 15 credits in required courses.

</table>

Course work may be completed through residential or distance modalities. Additional certificate information is available on the SPH website (http://sphhs.gwu.edu/programs/public-health-generalist-certificate).

Requirements for the graduate certificate
1. Graduate credit requirement: 15 graduate credits
2. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a program of study prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/Advisor.
3. Grade point requirement: A 3.0 (B) overall grade point average or better.
4. Time limit requirement: The certificate must be completed within 2 years.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH

The Department of Environmental and Occupational Health (EOH) works to further the student's understanding of how natural and human-made environments impact human health. The department offers public health programs that challenge students to explore both the underlying science and policy remedies for topics including sustainable cities and food systems, climate change mitigation, workplace safety, and risk management.

GRADUATE

Master's programs

- Master of Public Health in environmental health science and policy (p. 912)
- Master of Public Health in global environmental health (p. 916)

Doctoral program

- Doctor of Public Health in environmental and occupational health (p. 920)

FACULTY

Professors  G. Gray, L. Goldman, D. Michaels (Research), M. J. Perry (Chair), L. B. Price

Associate Professors  P.T. LaPuma, S. McCormick

Assistant Professors  K.M. Applebaum, J. Graham, A.L. Northcross, A.R. Zota

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2114. Environment, Health, and Development. 3 Credits.
Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 3150. Sustainable Energy & Env Hlth. 3 Credits.
Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.
Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.
Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems. Epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies. Survey design and sources and evaluation of biases and confounding. Emphasis on written and oral communication skills. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6004.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.
The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or permission of the instructor.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.
Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisite: PUBH 6004.
PUBH 6124. Problem Solving in EOH. 3 Credits.
This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PUBH 6121, 6123, 6126.

PUBH 6125. Intro-Children’s Health & Env. 2 Credits.
Describes the impact of environmental toxicants on children’s health and reviews some of the major policy issues in the field of children’s environmental health. Prerequisites: PUBH 6004.

PUBH 6126. Assessment&Control/Env Hazards. 3 Credits.
Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Germs: An Introduction to Environmental Health Microbiology. 2 Credits.
Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Specific topics will include: industrial animal production and increasing prevalence of antibiotic resistance; effectiveness of various point of use technologies for water purification; recent advances in quantitative microbial risk assessment; one medicine (where public and veterinary health meet); detection strategies for microorganisms (including bioterrorism agents); and current approaches in food defense and agroterrorism. Prerequisites: PUBH 6004.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.
Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries. Principles from behavioral sciences, development economics, risk assessment, and epidemiology are included. Potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.
The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.
Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6004.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.
Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisite: PUBH 6004.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.
The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6134. Communicating Science for Public Health. 2 Credits.
Evaluating the primary scientific literature and communicating research findings in outlets ranging from peer-reviewed journals to 140 character Tweets. Identifying target audiences and shaping messages to maximize impact, while maintaining the integrity of the supporting evidence. Written and oral communication and critical evaluation are emphasized. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6199. Topics in EOH. 0-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL HEALTH SCIENCE AND POLICY

Program Director K. Applebaum
Practicum Director P. LaPuma
Mission
The mission of the master of public health (M.P.H.) in the field of environmental health science and policy degree program is to educate individuals who are committed to public health protection to apply critical analytic skills to the development, implementation, and evaluation of practices and policies aimed at preventing or minimizing the adverse impact of environmental and occupational hazards on human health.

Goals
Our graduates will possess a multidisciplinary knowledge base and skill set that will provide them a framework for addressing environmental and occupational health (EOH) issues. They will understand three distinct scientific foundations of environmental health in order to:

• Assess and control environmental and occupational exposures;
• Understand the effects of these exposures on human health; and
• Interpret epidemiologic and other research findings related to environmental risks.

Furthermore, graduates will be prepared to build on this science base in order to:

• Analyze policy implications and participate in policy development, implementation, and evaluation; and
• Assess and manage environmental and occupational risks.

COMPETENCIES
Upon Completion of the Master of Public Health program in the field of environmental health science and policy, students should possess the following functional competencies.

Epidemiology & Biostatistics
Critically assess existing epidemiologic research.
• Summarize goals, design, methods, and results of published research.
  PUBH 6121 Environmental and Occupational Epidemiology
• Identify biases and evaluate the extent to which they threaten study validity.
  PUBH 6121 Environmental and Occupational Epidemiology
  PUBH 6131 Applied Data Analysis in Environmental and Occupational Health
• Apply statistical principles to interpret epidemiologic data.
  PUBH 6121 Environmental and Occupational Epidemiology

Design appropriate studies for investigating EOH problems.
• Identify appropriate resources and databases to plan and conduct studies.
  PUBH 6015 Culminating Experience
  PUBH 6121 Environmental and Occupational Epidemiology
  PUBH 6124 Problem Solving in EOH
• Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.
  PUBH 6121 Environmental and Occupational Epidemiology
  PUBH 6126 Assessment&Control/Env Hazards

Conceptualize and carry out data analysis to address study goals.
• Conceptualize research questions.
  PUBH 6015 Culminating Experience
  PUBH 6121 Environmental and Occupational Epidemiology
  PUBH 6131 Applied Data Analysis in Environmental and Occupational Health
• Utilize appropriate approaches to manage and analyze data.
  PUBH 6015 Culminating Experience
  PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

Exposure Assessment and Control
Assess environmental and occupational exposures.
• Describe the principle of operation, capability, and limitations of assessment instrumentation.
  PUBH 6126 Assessment&Control/Env Hazards
• Assess severity of potential hazards and select the appropriate instrument and measurement method.
  PUBH 6126 Assessment&Control/Env Hazards
• Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.
  PUBH 6124 Problem Solving in EOH
### Toxicology

**Identify the adverse effects of chemical, biological, and physical exposures on human health.**
- Apply key concepts in toxicology including: dose-response relationships; absorption, distribution, metabolism and excretion of xenobiotics; acute and chronic effects.

PUBH 6123  
Toxicology: Applications for Public Health Policy

- Describe the biological basis for the adverse effects of toxicants on specific organs and tissues and identify specific compounds that interact with specific organs.

PUBH 6123  
Toxicology: Applications for Public Health Policy

- Describe biological basis for the systemic effects of toxicants (e.g., carcinogenicity, genotoxicity, developmental toxicity) and identify specific compounds that elicit these effects.

PUBH 6123  
Toxicology: Applications for Public Health Policy

**Interpret toxicological research findings in the context of human health risk assessment.**
- Explain key aspects of toxicological tests as well as their strengths and weaknesses.

PUBH 6123  
Toxicology: Applications for Public Health Policy

- Explain how risk assessment is used to translate toxicologic information for regulatory decisions including: evaluating a body of data and applying weight of evidence approaches; calculating and using the reference dose (RfD); calculating and using of cancer slope factors.

PUBH 6122  
Protecting Public Health and the Environment: Policies, Politics, and Programs

### Policy

**Synthesize scientific evidence in order to inform EOH policy and reduce and prevent environmental and occupational disease and injury.**
- Describe the authority and approaches of U.S. public and environmental health agencies.

PUBH 6122  
Protecting Public Health and the Environment: Policies, Politics, and Programs

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

PUBH 6124  
Problem Solving in EOH

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of human health and environmental health policy.

PUBH 6122  
Protecting Public Health and the Environment: Policies, Politics, and Programs

**Conduct policy analysis relevant to EOH problems.**
- Discuss the control of public health hazards on a global basis.

PUBH 6126  
Assessment&Control/Env Hazards

- Analyze approaches to environmental or occupational health policy development.

PUBH 6122  
Protecting Public Health and the Environment: Policies, Politics, and Programs

- Analyze the role of environmental and occupational health policies and politics in promoting sustainability.

PUBH 6122  
Protecting Public Health and the Environment: Policies, Politics, and Programs
Risk Management
Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Given a specific context, design a plan to collect relevant information to fully characterize EOH hazards and related human health effects.

PUBH 6124 Problem Solving in EOH

- Evaluate data and other information to characterize potential EOH hazards, sources of those hazards, potential for human exposure, and potential or actual health effects.

PUBH 6123 Toxicology: Applications for Public Health Policy

- Recommend possible approaches to reduce the risk and/or impact of exposure to EOH hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

PUBH 6124 Problem Solving in EOH

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

Identify ethical issues in environmental health policy and practice.
- Discuss how scientific principles and societal values such as equity and environmental justice influence decision-making about environmental and occupational health problems in research, public health practice, policy, and management contexts.

REQUIREMENTS
The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 18 credits in program specific courses, 8 credits in elective courses, and 4 credits in practicum/culminating experience.

Graduation Requirements
1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director G. Gray
Practicum Director S. McCormick

Mission
The mission of the master of public health (M.P.H.) in the field of global environmental health degree program—a joint program between the Departments of Global Health and Environmental and Occupational Health—is to educate individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals
The program seeks to help train graduates who will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to assess environmental exposures and understand the effects of these exposures on human health; interpret epidemiologic and other research findings related to global environmental health risks; and assume leadership roles in designing, implementing, and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national, and/or global levels.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://publichealth.gwu.edu/programs/global-environmental-health-mph) for additional information.

COMPETENCIES
Upon completion of the master of public health (M.P.H.) in the field of global environmental health degree program, students should possess the following functional competencies:

Epidemiology and Biostatistics
Critically assess existing epidemiologic research.
- Summarize goals, design, methods, and results of published research.

The George Washington University 2016-17 Academic Bulletin 916
Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

- Conceptualize research questions
- Utilize appropriate approaches to manage and analyze data
- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.
- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

**Assess Global Environmental and Occupational Risks**

**Assess environmental and occupational exposures.**
- Describe the principle of operation, capability, and limitations of assessment instrumentation.
- Assess severity of potential hazards and select the appropriate instrument and measurement method.
- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.
- Compare exposure data against established occupational and environmental health standards and guidelines.

**Recommend strategies to prevent and control environmental and occupational exposures.**
- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.
Global Environmental Health Policy Analysis

Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.

PUBH 6437  Case Study Methods for Global Health Evaluation

PUBH 6480  Public Health in Complex Emergencies

**Practicum and Culminating Experience**

PUBH 6014  Practicum

PUBH 6015  Culminating Experience (offered in two parts, 1 credit each)

**Graduation Requirements**

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

**DOCTOR OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL AND OCCUPATIONAL HEALTH**

**Program Director** G. Gray

**Mission**

The mission of the Department of Environmental and Occupational Health (EOH) is to increase the body of knowledge that addresses the adverse health effects of environmental and occupational exposures; to disseminate knowledge through the education of students and health practitioners; and to apply that knowledge in the clinical, environmental, and workplace settings.

**Goal**

The goal of the doctor of public health in the field of environmental and occupational health (Dr.P.H.) degree program is to prepare students for advanced level professional work in research, policy, and program design and administration.

**Admissions Requirements**

The doctor of public health program is designed for mid-career professionals seeking to become public health leaders. Preference for admission to the Dr.P.H. program is given to applicants who have completed an M.P.H. degree from a Council of Education for Public Health (CEPH) accredited program. Alternatively, applicants with a master’s degree in another field may indicate their relevant training, research experience, or educational background comparable to the M.P.H. Doctoral applicants admitted without an M.P.H. will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the Dr.P.H. Qualified applicants with degrees from institutions outside the United States are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

**Program Policies and Procedures**

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources on the DrPh in the field of Environmental and Occupational Health website. (http://publichealth.gwu.edu/programs/environmental-occupational-health-drph)

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits, including 20 credits in required courses, 6 credits in field-specific courses, 7-10 credits in elective courses, 4 credits in professional leadership courses, 8-10 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

**Program requirements**

**20 credits of required foundational and research methods courses**

Dissertation Research - DrPH Degree Dissertation Research

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.

EPIDEMIOLOGY AND BIOSTATISTICS

The Department of Epidemiology and Biostatistics integrates diverse educational programs with a rapidly growing research portfolio. Graduate students have the opportunity to study and participate in faculty research projects in a variety of academic disciplines, including infectious disease, cancer, nutritional and disaster epidemiology, applied biostatistical methods, and public health laboratory science. In their practicum, students work closely with scientists at local health departments, the NIH and other federal agencies, academic institutions, and international health organizations. By exploring the core quantitative sciences of public health and taking advantage of opportunities to learn by doing, students are prepared to become the next generation of public health leaders and practitioners.

GRADUATE

Master’s programs

- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of epidemiology (p. 927)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Science in biostatistics (p. 930) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Master of Science in epidemiology (p. 931)
- Master of Science in public health microbiology and emerging infectious diseases (p. 933)

Doctoral programs

- Doctor of Philosophy in biostatistics (p. 935) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Doctor of Philosophy in epidemiology (p. 937)
FACULTY

Professors  A. E. Greenberg (Chair), L. Guay (Research), M. Foulkes (Research), K. Hirst (Research), D. A. Hoffman (Emeritus), J. Jordan, J. M. Lachin, Z. Li, R. K. Riegelman, S. J. Simmens (Research), E. A. Thom (Research), D. A. Verme,

Associate Professors  J. M. Bethony, A. D. Castel, S. D. Cleary, K. L. Drews (Research), H. J. Hoffman, K. Jablonski (Research), I. Kuo (Research), Y. Ma, M. Magnus, M. M. Rice (Research), K. Z. Robien, N. Younes, H. A. Young

Assistant Professors  I. Bebu (Research), B. Braffett (Research), R. G. Clifton (Research), A. Elmi, M. Ghosh, J. Peterson (Research), M. Power, M. Temprosa (Research)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.
Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisite: PUBH 1101, STAT 1127.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.
Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.
General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6242. ClinicalEpid&Decision Analysis. 2,3 Credits.
Quantitative and qualitative approaches to decision making, including risk- benefit analysis, decision analysis, and cost-effective analysis. Applications to technology assessment; development of clinical guidelines. Note: MPH Health Policy, MS Health Policy and Doctoral Students concurrently take PubH 6299 topics course by the same name for 1 credit, thereby enrolling for three total credits (PubH 6242=2 credits plus PubH 6299.xx, same name =1 credit). Prerequisites: PUBH 6002, PUBH 6003.

PUBH 6243. Topics: ClinicalEpi&DecAnalysis. 1 Credit.
This class takes an evidence-based problem solving approach for Masters level students interested in the health policy focus of clinical epidemiology utilizing methods taught in PUBH 6242. Prereq: PubH 6003. Coreq: PubH 6242.

PUBH 6244. Cancer Epidemiology. 2 Credits.
Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PubH 203.

PUBH 6245. InfectiousDisease Epidemiology. 2 Credits.
The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PubH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.
Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Co-requisite: PubH 6002. Prerequisite: PubH 6003.

PUBH 6249. StatPackages/DataMgt&DataAnlys. 3 Credits.
This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies will be presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PubH 6002.
**PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.**

**PUBH 6252. Advanced Epidemiology Methods. 3 Credits.**
Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. Prerequisites: PubH 6002, 6003, 6247. Co- or prerequisite PubH 6249.

**PUBH 6253. Issues in HIV Care & Treatment. 1 Credit.**
This course will provide an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students will be able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

**PUBH 6255. Org Responses to HIV/Epidemic. 2 Credits.**
This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students will learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisite: PubH 6003, HIV/AIDS experience, or permission of Instructor.

**PUBH 6258. Adv Topics/Biostat Consulting. 1 Credit.**
Principles and practice of biostatistical consulting in public health and medical research environments.

**PUBH 6259. Epid Surveillance/PublicHealth. 2 Credits.**
Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods will be included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel will be discussed. Prerequisites: PubH 6003.

**PUBH 6260. Adv DataAnalysis-Public Health. 3 Credits.**
Advanced data analysis using the SAS System to expand on the analytic techniques gained in PubH 6002 and PubH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PubH 6002, 6249.

**PUBH 6261. Epi-Bio Skills Bldg Seminar. 1 Credit.**
Assists students in developing the skills needed to complete degree requirements and to provide them with practical applied public health training. By the end of the course, students will be able to describe essential skills needed for preparation, implementation, presentation and communication of public health data.

**PUBH 6262. Intro-Geog Information Systems. 1 Credit.**
Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

**PUBH 6263. Advanced GIS. 1 Credit.**
Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PubH 6262.

**PUBH 6264. Quantitative Methods. 3 Credits.**
Introduces basic concepts in mathematical statistics. Topics will include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed will be Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariate distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: Math 1231, 1232 and PubH 6002, 6249.
PUBH 6265. Design of Medical Studies. 3 Credits.
Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

PUBH 6267. Time Series: Applications in PH. 2 Credits.
Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation will be used. Prerequisite: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.
Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002, 6249 or Instructor’s permission.

PUBH 6269. Reproductive Epidemiology. 1 Credit.
Current research, controversial issues and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.
Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance will be presented and discussed. Strengths and weaknesses of these various systems will be discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.
Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus will be on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002, 6003.

PUBH 6272. Infectious Agents: Cancer. 1 Credit.
Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, will also be discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.
Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PUBH 6003.

PUBH 6274. Emerging ID for PH Pro’s. 2 Credits.
Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Course emphasizes the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or Micr 6292 or Instructor permission.

PUBH 6275. Essential PH Lab Skills. 2 Credits.
This course will provide public health students with practical laboratory experience Prerequ: Micr 6239 or Micr 6212 or permission of instructor.
PUBH 6276. Health Microbiology. 3 Credits.
Gain in-depth understanding of important non-viral pathogens pertinent to PH Microbiology. Learn how to isolate & identify pathogens using critical thinking & problem solving skills.

PUBH 6277. Public Health Genomics. 2 Credits.
Learn about molecular technology and how it is impacting public health practice & discourse in the post genomic era. Explore ways in which genomics is being used to solve or help alleviate PH problems through case-focused discussions. Prerequisite: genetics or molecular biology within 6 years or permission of course instructor.

PUBH 6278. Public Health Virology. 3 Credits.
In-depth understanding of viral pathogenesis by focusing on current research, controversial issues and PH relevance. Survey of family of viruses most relevant to today’s public health efforts, concentrating on virus-host interactions & therapeutic strategies.

PUBH 6280. MEID Final Project. 2 Credits.
Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Prerequisites: PUBH 6002, 6003, 6292, 6245; Biosafety training, CITI training, HIPAA training, permission of instructor.

PUBH 6289. Topics in Epi/Bio. 1-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF BIOSTATISTICS

Program Director H. Hoffman

Mission
The mission of the master of public health in the field of biostatistics degree program is to educate students in the methodological and quantitative skills needed to apply statistical methods to the biological, biomedical, and health services sciences. In addition to enhancing students’ capacity to think critically and creatively, the program deepens their commitment to improving the public’s health and to engaging in and promoting public service—qualities essential to biostatisticians and public health practitioners.

Goals
The goals of the biostatistics program are to ensure that graduates:

- Understand and adhere to high scientific standards for research.
- Understand how to apply statistical methods to biological/ biomedical sciences and health services.
- Understand and follow guidelines for ethical treatment of research participants.
- Communicate research findings to a lay audience.
- Respect cultural diversity throughout all of the above.

COMPETENCIES
The specialization in biostatistics focuses on developing students’ skills in the statistical analysis and interpretation of health research data. The following competencies were developed in concert with professors of biostatistics courses (at GW as well as from other CEPH-accredited MPH programs), biostatistics textbooks, conversations with prospective employers likely to hire MPH-biostatistics graduates, and with experience teaching biostatistics courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the Master of Public Health in the field of biostatistics, students will demonstrate functional competence to:

- Manipulate various databases from large scale epidemiological studies and clinical trials studies using statistical software, e.g. SAS®.

REQUIREMENTS

Program Prerequisites
All applicants must have completed two semesters of college-level calculus through calculus II with a minimum grade of B in order to be considered for admission.

M.P.H. Requirements
The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 20 credits in program-specific courses, 6 credits in electives, 2 credits in a practicum,* and 2 credits in a culminating experience.

with prospective employers likely to hire MPH-epidemiology graduates, and experience teaching epidemiology courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the MPH in Epidemiology, students will demonstrate functional competence to:

- Apply epidemiological and biomedical concepts in identifying and describing the determinants and the distribution of disease in human populations.

  Relevant Courses
  - PUBH 6014 Practicum
  - PUBH 6015 Culminating Experience
  - PUBH 6247 Design of Health Studies
  - PUBH 6252 Advanced Epidemiology Methods

- Identify and assess patterns of emerging diseases to postulate hypotheses and to identify appropriate strategies in order to evaluate the impact of health problems.

  Relevant Courses
  - PUBH 6014 Practicum
  - PUBH 6015 Culminating Experience
  - PUBH 6247 Design of Health Studies
  - PUBH 6252 Advanced Epidemiology Methods

- Enumerate and apply underlying principles and methods to design, plan, and conduct epidemiologic studies including observational and experimental designs, screening programs, public health surveillance, and other epidemiologic designs.

  Relevant Courses
  - PUBH 6014 Practicum
  - PUBH 6015 Culminating Experience
  - PUBH 6247 Design of Health Studies
  - PUBH 6252 Advanced Epidemiology Methods

- Identify the appropriate data analysis methods, conduct data analysis using a computerized software program, and interpret the results from epidemiological studies.

  Relevant Courses
  - PUBH 6014 Practicum
  - PUBH 6015 Culminating Experience
  - PUBH 6249 StatPackages/DataMgt&DataAnlys

- Demonstrate proficiency in constructing and managing databases from epidemiological studies using statistical software, e.g. The SAS® System.

  Relevant Courses

• Define and critically assess issues in at least two of the following specialty areas in epidemiology:
  • Clinical epidemiology such as decision analysis, cost-effectiveness to clinical and public health problems.
  • Major topics in infectious disease epidemiology, including emerging infectious diseases, drug resistant pathogens, and perinatal and neonatal infections.
  • Methods and issues of cancer epidemiology including descriptive and analytical studies with emphasis on genetic and molecular epidemiology.
  • Methods and issues of chronic diseases
  • Methods and issues of surveillance systems in public health

Graduation Requirements
1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor  A. F. Elmi

The master of science (MS) degree program in biostatistics is jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH) and its associated research facility, The Biostatistics Center. This degree program is accredited by the Middle States Commission on Higher Education through the CCAS and by the Council on Education for Public Health through the SPH Regulations, and requirements for this graduate degree have been designed to be compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by Columbian College.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/biostatistics-ms) for additional information.

COMPETENCIES

At the completion of the MS program in Biostatistics students will be able to:

• Understand and the theory and principles behind statistical methods most commonly used in biomedical research (contingency tables, survival analysis, mixed models, and missing data).
• Understand and apply the underlying principles and methods to design, plan, and conduct biomedical studies.
• Provide biostatistical advice as a member of a team engaged in a biomedical research project. Includes manipulation and analysis of data.

REQUIREMENTS

Admission Considerations

The courses listed below (or course equivalents) are prerequisites for admission consideration and must appear on the student’s transcript. Students may apply to the program only after they have fulfilled this requirement:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1231</td>
<td>Single-Variable Calculus I</td>
<td></td>
</tr>
<tr>
<td>MATH 1232</td>
<td>Single-Variable Calculus II</td>
<td></td>
</tr>
<tr>
<td>STAT 2118</td>
<td>Regression Analysis</td>
<td></td>
</tr>
</tbody>
</table>

Applicants lacking the courses listed below (or course equivalents) will be considered for admission; however, if admitted, the student is required to complete these courses within two semesters of matriculation in the program. Credit earned in these courses does not count toward the 33 credits required for the degree and grades earned are not reflected in the overall grade point average.

The Master’s Comprehensive Examination
The master’s comprehensive examination is a written exam in the field of biostatistics and is based on the content covered in PUBH 6266 Biostatistical Methods. It is administered by the faculty of the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health.

MASTER OF SCIENCE IN THE FIELD OF EPIDEMIOLOGY

Program Director S.D. Cleary

The Department of Epidemiology and Biostatistics offers the master of science (M.S.) in the field of epidemiology degree program. The goals of the program are to prepare students for careers in industry or academia and for continued study in a doctoral program. The program includes course work that focuses on theoretical and applied epidemiological and statistical methods. Comprehensive examinations are required.

If desired, a student may apply for admission to the doctorate of philosophy (Ph.D.) in the field of epidemiology degree program (http://bulletin.gwu.edu/public-health/epidemiology-biostatistics/phd-epidemiology) prior to completing the M.S. degree, in which case a maximum of 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance, the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics depends on the nature of the master’s degree and whether the transferred
Credits will be used to defray epidemiology and statistics course work.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/epidemiology-ms) for additional program information.

**COMPETENCIES**

At the completion of the MS program in Epidemiology students will be able to:

- Demonstrate proficiency in basic epidemiology concepts, e.g., formulate hypotheses and research aims, select appropriate study design, identify risk and/or protective factors that contribute to disease outcomes, develop analytic plans, and identify bias.
- Demonstrate competence using standard statistical software packages to manage and analyze primary data or conduct secondary data analyses to address research questions.
- Demonstrate proficiency in data analysis and interpretation of results, including discussion of threats to internal validity, and compose a formal presentation or report.
- Describe and apply methods to conduct sound ethical research.

**REQUIREMENTS**

**Preparatory Requirements**

The courses listed below (or equivalents) are prerequisites for admission consideration, and must appear on the student’s transcript.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

**MASTER OF SCIENCE IN THE FIELD OF PUBLIC HEALTH MICROBIOLOGY AND EMERGING INFECTIOUS DISEASES**

*Program Co-Directors* A. Castel, J. Jordan

**Mission**

The mission of the master of science (M.S.) in the field of public health microbiology and emerging infectious diseases degree program is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies, and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the M.S. program will have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind’s microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis will include: the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. M.S. graduates will be employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective will be extremely useful. Students earning this degree will help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

**Goals**

The goals of the M.S. program in the field of public health microbiology and emerging infectious diseases are to ensure that graduates:

- Understand the biological complexities of microbial pathogens and the diseases they cause;
- Recognize the major epidemiologic and clinical features of microbial disease;
- Understand how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens;
- Develop an in-depth understanding of epidemiologic principles and practices;
• Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases.

**REQUIREMENTS**

**Prerequisite requirements**
- Bachelor’s degree in the life sciences or at least 12 credits in the biological sciences other than botany
- Chemistry ≥ 3 credits
- 1 semester of calculus

**Course requirements**
Most students will be able to complete the 45 credit degree in approximately two to three years, depending on the course load taken each semester.

**Foundation courses (10 credits)**

**Graduation requirements**

1. Graduate Credit Requirement: 45 graduate credits required.
2. Course Requirements: Successful completion of the required courses.
3. Grade Point Requirements: An overall GPA of 3.0 (B average).
4. Time Limit Requirement: The degree must be completed within four years.
5. Transfer Credit Policy: Up to 12 credits that have not been applied to a previous graduate degree may qualify to be transferred to the MS program. Credits must have been earned from an accredited institution in the last 3 years with a grade point average of 3.0 or better.

Students will also be expected to participate in a poster presentation at GW Research Day.
DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor E. Bura (CCAS)

The Ph.D. degree program in biostatistics provides doctoral training in the theory of probability, statistics focusing on biostatistical methodology. The 72-credit degree program is jointly administered by the Department of Statistics (https://statistics.columbian.gwu.edu) in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (http://publichealth.gwu.edu) (SPH) and its associated research facility, The Biostatistics Center. The program is accredited by the Middle States Commission on Higher Education through CCAS and by the Council on Education for Public Health through the Milken Institute SPH. Regulations and requirements for the graduate degree are compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by CCAS.

COMPETENCIES

At the completion of the PhD degree program in Biostatistics students will be able to:

• Conduct biostatistical methodology research.
• Have extensive knowledge of the theory and principles of probability, statistical inference, and biostatistical methods
• Apply and develop appropriate biostatistical methods for the design and analysis of biomedical studies.
• Provide biostatistical advice as a member of a team engaged in a biomedical research project
• Serve as biostatistics experts on collaborative teams of investigators

REQUIREMENTS

Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:

<table>
<thead>
<tr>
<th>Course</th>

</table>
9 credits from the following approved elective courses:

**Approved statistics elective courses (at least 3 credits must be taken from among the first 3 courses noted below):**

- STAT 6214 Applied Linear Models
- STAT 6231 Contingency Table Analysis
- STAT 8262 Nonparametric Inference
- STAT 6207 Methods of Statistical Computing I
- STAT 6208 Methods of Statistical Computing II
- STAT 6215 Applied Multivariate Analysis I
- STAT 6216 Applied Multivariate Analysis II
- STAT 6217 Design of Experiments
- STAT 6218 Linear Models
- STAT 6223 Bayesian Statistics: Theory and Applications
- STAT 6242 Regression Graphics/Nonparametric Regression
- STAT 6287 Modern Theory of Sample Surveys
- STAT 6289 Topics in Statistics
- STAT 8257 Probability
- STAT 8258 Distribution Theory
- STAT 8263 Advanced Statistical Theory I
- STAT 8264 Advanced Statistical Theory II
- STAT 8265 Multivariate Analysis
- STAT 8273 Stochastic Processes I
- STAT 8274 Stochastic Processes II
- STAT 8281 Advanced Time Series Analysis
- STAT 8288 Modern Theory/Sample Surveys
- BIOS 8998 Advanced Reading and Research (see advisor)

**Consulting:**

Note: May be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of electives by the number of consulting credits waived.

- PUBH 6258 Adv Topics/Biostat Consulting
- PUBH 6283 Biostatistics Consulting Practicum

**Dissertation research:**

12-24 credits of the following:

- BIOS 8999 Dissertation Research

**General and final examinations**

The General Examination is given in two parts:

- Part I is a written comprehensive examination based on the course content of STAT 6202 Mathematical Statistics II, STAT 6213 Intermediate Probability and Stochastic Processes (administered by faculty of the Department of Statistics), and PUBH 6266 Biostatistical Methods (administered by the faculty of the Department of Epidemiology and Biostatistics). Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master’s-level courses as needed. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt will result in termination from the Ph.D. program.

- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student’s Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student’s readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the General Examination, the candidate will generally be recommended to the Associate Dean for Graduate Affairs of The Columbian College of Arts and Sciences (CCAS) for promotion to Ph.D. Candidacy: the dissertation research. A candidate must file an approved dissertation research plan with the CCAS before being admitted to Ph.D. Candidacy. Prior to completion of the
General Examination, a student may register for at most 6 credits of BIOS 8999 Dissertation Research.

Consult with the biostatistics program director or academic advisor for the dissertation guidelines.

**Professional enhancement requirement: 8 hours**

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer’s Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

**DOCTOR OF PHILOSOPHY IN THE FIELD OF EPIDEMIOLOGY**

**Program Director** S. Cleary

The purpose of the doctor of philosophy program is to prepare students for a career in epidemiologic research in an academic or industry setting. The Ph.D. graduate is expected to have knowledge across a wide range of epidemiologic theories and methods and specific knowledge of the epidemiology of one of the following areas: chronic disease, infectious disease, environmental and occupational health.

Doctoral students are required to pass a written comprehensive examination and to complete a dissertation. For the comprehensive examination the student must demonstrate advanced knowledge of epidemiologic and biostatistical methods. For the dissertation, the student must design and execute an original research study that contributes new knowledge to the field and demonstrates proficiency using advanced analytic methods.

In addition to MS and MPH competencies, doctoral students in epidemiology must demonstrate competencies in the following areas: demonstrate understanding of general and specialized advanced epidemiologic concepts, develop a research protocol, conduct and analyze a research study, and disseminate research findings.

At the completion of the doctoral program in epidemiology students will be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts: Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research;
- Develop a research protocol: Synthesize and identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, discuss the advantages and disadvantages of different epidemiologic study designs and sources of potential bias;
- Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning, primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias; and
- Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

**Admissions Requirements**

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have academic backgrounds of excellence, usually with majors, or equivalent, in the fields in which they intend to study for advanced degrees. Normally, a B average (or equivalent) from an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a B average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments may, and often do, set higher admission standards. Moreover, the number of spaces available for new graduate students limits the number who can be accepted. Students who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration in SPH is permitted. Applicants should be aware that graduate courses taken prior to admission while in non-degree status are not used in assessing admissibility to degree programs and may
not be transferable into those programs. The SPH-at-a-Glance (http://sph.washington.edu/about/quickfacts.asp) presents the Ph.D. curriculum for students admitted to the program with no intermediate master’s degree.

If desired, a student may complete the M.S. or M.P.H. program prior to admission to the Ph.D. degree program, in which case no more than 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics will depend on the nature of the M.S. degree and whether the transferred credits will be used to defray epidemiology or statistics course work. All applications are submitted through SOPHAS.org (http://SOPHAS.org).

For reporting GRE general test scores use the following institutional code: 5268.

COMPETENCIES

At the completion of the doctoral program in epidemiology students will be able to:

• Demonstrate understanding of general and specialized epidemiologic concepts.
• Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research.
• Develop a research protocol: Synthesize, identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, the advantages and disadvantages of different epidemiologic study designs and sources of potential bias.
• Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning, primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias.
• Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Philosophy Program (p. 82).
### Social and Behavioral Approaches to Public Health

- **Option A**
  - STAT 6201: Mathematical Statistics I
  - STAT 6202: Mathematical Statistics II

- **Option B**
  - PUBH 8364: Quantitative Methods

### Statistics Electives (Only students pursuing Option A)

- STAT 6213: Intermediate Probability and Stochastic Processes
- STAT 6215: Applied Multivariate Analysis I
- STAT 6216: Applied Multivariate Analysis II
- STAT 6217: Design of Experiments
- STAT 6223: Bayesian Statistics: Theory and Applications
- STAT 6227: Survival Analysis
- STAT 6231: Contingency Table Analysis
- STAT 8226: Advanced Biostatistical Methods

### Consulting

- Three credits from the following:
  - PUBH 6258: Adv Topics/Biostat Consulting
  - PUBH 6283: Biostatistics Consulting Practicum

The consulting requirement may be waived by the Epidemiology Program Director based on written documentation of prior equivalent course work or relevant work experience. Waiver of the consulting course increases the total number of electives proportionally.

### Dissertation Research

- 12-21 credits of the following:
  - PUBH 8999: Dissertation Research (taken in units of 3 credits)

### Graduation Requirements

1. **Program options:** Students may choose either curriculum Plan A or curriculum Plan B for the Doctor of Philosophy degree in the field of epidemiology.
2. **Graduate credit requirement:** 72 graduate credits are required.
3. **Prerequisites:** Review official program guide for minimum prerequisite requirements for admission.
4. **Comprehensive (General) exam**
   a. A written comprehensive exam will be administered within 24 months from date of matriculation based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods.
and PUBH 8419 Measmnt/PublHlth&HlthSrvcsRes. The exam is administered once per year in August.

b. An oral presentation of the proposal for dissertation is made to the students’ Dissertation Research Committee. The Committee will determine the student’s readiness to pursue and complete the proposed research.

5. Dissertation: 12-21 credits of dissertation research are required. Students may register for up to 6 credits of PUBH 8999 Dissertation Research prior to completion of the proposal defense.

6. Grade point requirements: An overall GPA of 3.0 (B average) is required.

7. Time limit requirement: The degree must be completed 8 years.

8. Transfer credit policy: Up to 24 credits from an applicable masters program may be approved to be transferred to the doctoral program. Credits must have been earned from an accredited institution with a grade point average of B or better.

The General Examinations

Part I is a written comprehensive examination consisting of one examination in the field of biostatistics and one in the field of epidemiology. The epidemiology examination is based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods, and PUBH 8419 Measmnt/PublHlth&HlthSrvcsRes as well as the biostatistics examination is based on the course content of PUBH 8366 Biostatistical Methods and is administered by the faculty of the Department of Epidemiology & Biostatistics. Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master’s-level courses as needed. The doctoral comprehensive examination is administered once per year in late August. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat all or portions of the examination. Failure on the second attempt will result in termination from the Ph.D. program.

Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student’s Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student’s readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation level research.

Upon successful completion of the required course work and both parts of the General Examination, the candidate will generally be recommended for promotion to PhD Candidacy: the dissertation research. Prior to completion of the General examination, a student may register for at most 6 credit hours of PUBH 8999 Dissertation Research.

Professional Enhancement Requirement (Two Days)

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues - either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through your department or advisor.

It is hoped that PhD students will fulfill one day of this two day requirement by participating in a poster presentation at GWUMC Research Day.

Students must submit documentation of Professional Enhancement activities to the Epidemiology Program Director, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

EXERCISE AND NUTRITION SCIENCES

The Department of Exercise and Nutrition Sciences holds a unique position as an academic unit within a school of public health. The exercise and nutrition sciences program gives students the opportunity to learn not only how exercise, physical activity, and nutrition affect the individual, but also how these factors affect the health and function of communities at large. The Department provides its students with research and practice opportunities in settings as diverse as the National Institutes of Health, professional sports team, the U.S. Department of Agriculture, the Pentagon, and the D.C. public school system.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)
• Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
• Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)

Minors
• Minor in exercise science (p. 897)
• Minor in nutrition (p. 898)

GRADUATE

Master's programs
• Master of Public Health in the field of physical activity in public health (p. 941)
• Master of Public Health in the field of public health nutrition (p. 944)
• Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)

FACULTY

Professors J.V. Danoff, J.A. DeLoia, L. DiPietro (Chair), L.F. Hamm

Associate Professors T. A. Miller, S.A. Talegawker, A. Visek, B.J. Westerman

Assistant Professors M. Barron, G.M. Hudson

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

• Exercise and Nutrition Sciences (EXNS) (p. 1214)
• Health and Wellness (HLWL) (p. 1253)
• Lifestyle, Sport, and Physical Activity (LSPA) (p. 1328)

MASTER OF PUBLIC HEALTH IN THE FIELD OF PHYSICAL ACTIVITY IN PUBLIC HEALTH

Program Director L. DiPietro

Mission Statement
The sedentary lifestyle and its consequent metabolic and cardiovascular complications now assume a considerable public health burden in the United States. Indeed, the promotion of physical activity for people of all ages has become a top priority on public health agendas around the world. The mission of the Master of Public Health (M.P.H.) degree program in the Department of Exercise and Nutrition Sciences is to develop and train graduate students to integrate physical activity into the core of public health practice. The program encompasses an ecological perspective to the role of physical activity in the etiology, prevention, and treatment of chronic diseases at the community, national, and global levels. The program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development and evaluation with regard to physical activity, health promotion, and disease prevention.

Goals
The goals of this M.P.H. program in the Department of Exercise and Nutrition Sciences are to ensure that graduates:

• Understand the pathophysiology of selected chronic disease processes.
• Understand exercise physiology and the role of physical activity and exercise in health promotion and disease prevention.
• Develop skills in physical activity assessment using state-of-the-art technology.
• Utilize epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level.
• Develop skills in designing, implementing, and evaluating interventions for improving physical activity at the community level.
• Appreciate the role of public health policy in altering physical activity patterns at the community level.

COMPETENCIES

Program Specific Competencies
Upon completion of the MPH in Physical Activity in Public Health, students will possess the following functional competencies:

Integrate evidence-based knowledge of the relation of physical activity to health and function across the life-span.
• Students will demonstrate knowledge and understanding of the pathophysiology of selected chronic disease processes.
[Cognitive: levels 1 and 2].

EXNS 6202 Advanced Exercise Physiology I
EXNS 6203 Advanced Exercise Physiology II
EXNS 6208 Physical Activity: Physiology and Epidemiology
EXNS 6212 Exercise in Selected Chronic Diseases
• Students will demonstrate knowledge and understanding of the role of physical activity in the health and function of the general population. [Cognitive: levels 1 and 2].

The George Washington University 2016-17 Academic Bulletin
• Students will appreciate the role of public health policy in altering physical activity patterns at the community level. [Affective: levels 3 and 4].

EXNS 6208 Physical Activity: Physiology and Epidemiology

PUBH 6014 Practicum

Additional relevant course for students in the Program Design and Evaluation Option

PUBH 6500 Planning and Implementing Health Promotion Programs

Work with other public health professionals in promoting physical activity research, practice, and policy at the community, state, and federal level.

• Students will integrate the science and practice of exercise science and public health in promoting an active lifestyle in the workplace, the school system, and within the community. [Cognitive: level 5; Affective: levels 3-6].

EXNS 6208 Physical Activity: Physiology and Epidemiology

PUBH 6014 Practicum

Additional relevant courses for student in the Program Design and Evaluation option

PUBH 6500 Planning and Implementing Health Promotion Programs

PUBH 6501 Program Evaluation

PUBH 6503 Introduction to Public Health Communication and Marketing

• Students will appreciate the role of both traditional and non-traditional public health partners in physical activity promotion. [Cognitive: level 2; Affective: levels 3 and 4].

EXNS 6208 Physical Activity: Physiology and Epidemiology

PUBH 6014 Practicum

• Students will design public health policy that can alter physical activity patterns across multiple settings. [Cognitive: levels 3-5; Affective: levels 3 and 4].

EXNS 6208 Physical Activity: Physiology and Epidemiology

PUBH 6014 Practicum

REQUIREMENTS

Course Requirements

All GW SPH, MPH students who select the Physical Activity in Public Health program enroll in core courses (15 credits), program-specific courses (20 credits), and electives (6 credits). Program-specific courses include options to focus in epidemiology or program design and evaluation. The 45 credit degree program includes a practicum (2 credits) and a culminating experience (2 credits).

Program Requirements

Prerequisites:

EXNS 2111 Exercise Physiology I

Required core courses:

PUBH 6001 Biological Concepts/Public Health
PUBH 6002 Biostatistical Applic for PubH
PUBH 6003 Prin & Practice/Epidemiology
PUBH 6004 Environmental and Occupational Health in a Sustainable World
PUBH 6006 Mgt & Policy Approaches to PH
PUBH 6007 Social & Behavior Appr - Pub.Hlth

Required department courses:

EXNS 6202 Advanced Exercise Physiology I
EXNS 6203 Advanced Exercise Physiology II
EXNS 6208 Physical Activity: Physiology and Epidemiology
EXNS 6212 Exercise in Selected Chronic Diseases

Required program-specific courses:

Select Option A or B

Option A: Epidemiology option

PUBH 6247 Design of Health Studies
PUBH 6249 Stat Packages/Data Mgt & Data Anlys
PUBH 6252 Advanced Epidemiology Methods

Option B: Program design and evaluation option

PUBH 6500 Planning and Implementing Health Promotion Programs
PUBH 6501 Program Evaluation
Practical Data Analysis: PCH
Introduction to Public Health Communication & Marketing

Sample electives:
6 elective credits (5 credits in EXNS or PUBH):

PUBH 6015 Culminating Experience

Graduation Requirements
1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH NUTRITION

Program Director K. Robien
Practicum Director K. Robien

Mission
The mission of the master of public health (M.P.H.) degree program in the field of public health nutrition is to develop and train graduate students to integrate nutrition into the core of public health practice. The program encompasses a social ecological perspective on the role of nutrition in the etiology, prevention, and treatment of both acute and chronic disease at the individual, community, national, and global levels. This program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development, implementation, and evaluation with regard to nutrition in health promotion and disease prevention.

Goals
The goals of this M.P.H. program in the field of public health nutrition are to ensure that graduates:

- Understand the pathophysiology of common acute and chronic disease processes and the role that nutrition may play in the development of these diseases.
- Understand the factors impacting the accessibility, availability, adequacy, and safety of the food and water systems serving a community, and the relationship between community food and water systems and health outcomes.
- Develop skills in nutrition assessment of both individuals and communities.
- Utilize appropriate epidemiologic methods for developing and testing hypotheses relating to nutrition and health outcomes at the population level.
- Develop skills in designing, implementing, and evaluating nutrition interventions to improve the health of communities.
- Appreciate the role of public health policy in altering the food environment at the community level.

COMPETENCIES

Program-Specific Competencies
Upon completion of the MPH in Public Health Nutrition, students will possess the following functional competencies:

- Integrate nutrition within the core functions of public health. Students will be able to translate nutrition research into public health practice through application of skills in nutrition assessment/surveillance, program planning and evaluation, management, education and health promotion, public policy, and health communication.

Relevant courses:

<table>

</tr>
</tbody>
</table>

- Describe the international and US public health nutrition system. Students will identify the governmental structures and processes involved in the development of public policy, legislation, regulations and delivery of services that influence food intake, nutritional status, and health of populations. Students will identify with international,
federal, state and local level nutrition surveillance and assistance programs. Students will identify the political, economic and social processes that influence food and nutrition policies and legislation.

<td>US Food Policy and Politics</td>
</tr>
</tbody>
</table>

- Assess the nutritional status of individuals and communities. Students will use appropriate and current methods to assess nutrition status and prioritize nutritional problems of target populations across the life span. Students will understand the process, rationale, and issues related to establishing nutrient requirements and dietary recommendations.

- Evaluate the accessibility, adequacy and safety of the food and water systems for a given community, and understand how these factors could affect the desired outcomes of health promotion and disease prevention activities. Students will identify potential environmental, economic, behavioral, political, cultural and historical factors that impact the food system (including the production, processing, distribution, and consumption of food) and water supply. Students will implement or advocate for improvements in the food and water supply chain as needed to improve the health of the communities they serve.

</table>

- Design, implement, and evaluate population-based nutrition interventions, policies, and programs. Students will apply the principles of community assessment, planning, marketing, implementation and evaluation in order to assure the success of food and nutrition interventions. Students will understand and apply theories of social and behavioral change when developing nutrition interventions.

- Demonstrate effective communication, management and leadership skills to ensure the success of public health nutrition programs and services. Students will communicate food and nutrition information appropriate for broad and diverse audiences, including individuals, families, communities, health professionals, media, policy and decision makers, food industries, and businesses. Students will interact sensitively, effectively and professionally with persons from diverse cultural,
socioeconomic, educational, and professional backgrounds, and with persons of all ages and lifestyle preferences.

**REQUIREMENTS**

**Preparatory Requirements**

Prerequisites: Students who do not have an undergraduate degree in nutrition must complete successfully one introductory nutrition and one advanced nutrition or nutritional biochemistry course at the undergraduate level (or higher) with a minimum grade of C prior to matriculation into the program. GW's School of Public Health offers EXNS 2114 Nutrition Sciences I and EXNS 2115 Nutrition Sciences II. Together these courses satisfy the public health nutrition M.P.H. program prerequisite course work requirement. Alternatively, GW also offers graduate-level Introductory nutrition and nutritional biochemistry courses that satisfy the prerequisite requirement. Consult the Program Director for additional information.

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 14 credits in program-specific courses, 4 credits in research courses, 8 credits in elective courses, and 4 credits in practicum and culminating experience courses.

Practicum and culminating experience courses include Practicum and Culminating Experience.

Graduation Requirements
1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

**MASTER OF SCIENCE IN THE FIELD OF EXERCISE SCIENCE WITH A CONCENTRATION IN STRENGTH AND CONDITIONING**

**Program Director** T.A. Miller

**Mission Statement**
The mission of the program is to provide formal graduate level academic instruction in the science and theory of resistance training, as well as to promote student production of research that directly relates to the neuromuscular adaptations involved with resistance training.

**Goals**
The goals of this program in the Department of Exercise and Nutrition Sciences are to:

- Establish scientific basis for the value of anaerobic exercise, and to provide internal and external programs that promote health behaviors across the lifespan;
- Meet an increasing demand for well-educated professionals capable of delivering a broad range of exercise-based preventive, technical, educational, and rehabilitative services;
- Gain insight into strategies for the prevention and treatment of sarcopenia, osteoporosis, and childhood obesity;
- Provide advanced training in exercise physiology as it relates specifically to resistance training for the purpose...
of increasing athletic performance and the prevention or treatment of inactivity-related health disorders; and
• Prepare students with knowledge and skills to take the Certified Strength and Conditioning Specialist (CSCS) exam offered through the NSCA, and the Level One Weightlifting Coaching Course offered through United States Weightlifting (USAW).

This program is primarily delivered on-line. Contact Program Director for more information.

REQUIREMENTS

Course Requirements
The following requirements must be fulfilled: 36 credits, including 17 credits in core course, 19 credits in program-specific courses, a graduate internship, and successful completion of the comprehensive examination.

Graduation requirements
1. Graduate credit requirement: 36 graduate credits
2. Course requirements: successful completion of core and program specific courses
3. Examination requirement: pass the American College of Sports Medicine Clinical Exercise Specialist® certification examination (clinical exercise physiology only)
4. Grade point requirement: 3.0 (B average) overall grade point average
5. Time limit requirement: the degree must be completed within four years
6. Transfer credit policy: up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the M.S.E.S. Courses need to have been taken within the past three years from an accredited institution with a grade of B or better.

GLOBAL HEALTH

The Department of Global Health offers diverse programs of study that prepare students to make a difference in the health of individuals and communities around the world. With three fields of study, a joint program with the department of Environmental and Occupational Health, a newly revised joint program managed in conjunction with the Department of Epidemiology and Biostatistics, several joint degree programs with other GW schools, and more than 20 international practicum opportunities, students have a wealth of opportunities to examine global health concepts and conduct interdisciplinary research.

GRADUATE

Master's programs
• Master of Public Health in the field of global environmental health (p. 951)
• Master of Public Health in the field of global health communication (p. 955)
• Master of Public Health in the field of global health epidemiology and disease control (p. 958)
• Master of Public Health in the field of global health policy (p. 960)
• Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)

Doctoral program
• Doctor of Public Health in the field of global health (p. 965)
COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses.
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students.
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.
Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.
Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 3133. Global Health and Development. 3 Credits.
Basic concepts of political, social, and economic determinants of health and how health status is measured; burden of diseases that impact development and their basic epidemiological characteristics including who they affect, when they occur, and where risk is greatest; relationships between socioeconomic development and global health can be observed, measured, and used for the management of health programs. Material are global in coverage, but with a strong emphasis on low-income countries. Students must have junior or senior standing. Prerequisites: BISC 1005, BISC 1111 and PUBH 2110.

PUBH 6400. Global Health Frameworks. 2 Credits.
Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6401. Comp Regional Determinants. 2 Credits.
Examines the set of social, cultural and economic issues most central to shaping health in each of the world’s main regions. Overseas Learning Collaboration program in Bangladesh. Prerequisite: PUBH 6400. Fee varies by year.

PUBH 6402. Washington Seminar. 2 Credits.
This seminar course will provide an overview of global health policy and practice institutional resources in Washington DC. Students gain an understanding of how global health issues are framed, presented and biased in a multi-institutional setting. This is a collaborative learning exercise where simple web based tools will be used to develop a virtual classroom of the current global health policy and practice dialogue among Washington DC based governmental, multilateral, NGO, private sector and policy institutes.

PUBH 6403. Scientific Basis GH Intervntn. 2 Credits.
Introduces the scientific basis of global health interventions and how they address proximal and underlying determinants of health. Successful students will obtain a strong technical grounding in the determinants, biology and pathogenesis of specific diseases, for which affordable tools for prevention, control, and case management exist and are in use in public health practice.

PUBH 6410. Global Health Study Design. 2 Credits.
A foundation in the tools necessary for planning and designing research related to identifying and solving problems in global health: choosing an appropriate research topic and research question, understanding the relationships between hypotheses and study objectives, conducting a literature review, choosing a research design to achieve the project purpose, writing a research proposal including planning for the challenges of global health research, and achieving productive dissemination of findings.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.
An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.
Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.
PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.
Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisite: PUBH 6007, PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.
Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430-Theories and Applications in Global Health Promotion (unless waived by professor) PUBH 6007- Social and Behavioral Approaches to Public Health.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.
Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisites: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.
Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to MPH in the field of global health program design, monitoring, and evaluation degree candidates. Prerequisites: PUBH 6400, PUBH 6400, and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.
Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PubH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.
Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.
The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.
Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.
Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course will examine a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 64480. Public Health in Complex Emergencies. 2 Credits.
Analyze security institutions, vulnerable groups, humanitarian operations and natural disasters and global security, the impact of global health threats such as HIV/AIDS, SARS, avian flu, tuberculosis and malaria on security institutions, vulnerable populations, civil/military cooperation, and humanitarian operations. Also explore the potential value of various populations and approaches to humanitarian emergencies. Examine a range of scientific, policy, and program interventions designed to address these issues. Prerequisite: PUBH 6400.

PUBH 6481. Global Mental Health. 2 Credits.
Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PubH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.
Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.
PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.
Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6485. Prevention and Control of Water and Sanitation Diseases. 1 Credit.
Problems associated with providing adequate water and sanitation in developing countries; infectious diseases such as cholera, dysentery and typhoid. Innovative tools and solutions for improving water supply and sanitation.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.
Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6499. Topics in Global Health. 1-3 Credits.
Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director G. Gray
Practicum Director S. McCormick

Mission
The mission of the master of public health (M.P.H.) in the field of global environmental health degree program—a joint program between the Departments of Global Health and Environmental and Occupational Health—is to educate individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals
The program seeks to help train graduates who will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to assess environmental exposures and understand the effects of these exposures on human health; interpret epidemiologic and other research findings related to global environmental health risks; and assume leadership roles in designing, implementing, and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national, and/or global levels.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://publichealth.gwu.edu/programs/global-environmental-health-mph) for additional information.

COMPETENCIES

Upon completion of the master of public health (M.P.H.) in the field of global environmental health degree program, students should possess the following functional competencies:

Epidemiology and Biostatistics
Critically assess existing epidemiologic research.
• Summarize goals, design, methods, and results of published research.

• Apply statistical principles to interpret epidemiologic data.
### Design appropriate studies for investigating EOH problems.
- Identify appropriate resources and databases to plan and conduct studies.

### Conceptualize and carry out data analysis to address study goals.
- Conceptualize research questions
- Utilize appropriate approaches to manage and analyze data

### Assess Global Environmental and Occupational Risks

**Assess environmental and occupational exposures.**
- Describe the principle of operation, capability, and limitations of assessment instrumentation.
- Assess severity of potential hazards and select the appropriate instrument and measurement method.
- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.
- Compare exposure data against established occupational and environmental health standards and guidelines.
- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.
Recommend strategies to prevent and control environmental and occupational exposures.
• Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

Global Environmental Health Policy Analysis
Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.
• Describe the authority and approaches of global environmental health agencies.

Design, Implement, Monitor and Evaluate Global Environmental Health Programs
Synthesize relevant information in order to assess and manage environmental and occupational risks.
• Characterize political, social, cultural, religious and economic context to determine feasible interventions.

Conduct policy analysis relevant to global environmental health problems.
• Discuss interventions used in global environmental health.
• Evaluate data to characterize potential global environmental health hazards, potential for human exposure and health effects.

**Graduation Requirements**

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

**MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH COMMUNICATION**

**Program Director** K. Ndiaye

**Mission**

The mission of the master of public health (M.P.H.) in global health communication degree program is to train the next generation of public health professionals engaged in addressing global health issues that are directly related to human behavior. Human behavior is at the core of many of the world’s most pressing public health challenges, including HIV/AIDS and obesity. The program is designed to train professionals to approach the development and evaluation of behavior-change communication programs that address individual- and community-level factors relevant to particular populations and settings.

**Goals**

Understanding human behavior and developing ways to affect change requires a diverse set of skill. The goals of the M.P.H. in global health communication are to teach students the following:

- How to recognize the complexity of behavior change, especially the multiple levels of influence on human behavior.
- How to apply behavior change and communication theories in the development and evaluation of health communication programs and activities.
- Appreciation for the challenges that may arise in addressing behavior change in global settings.
- Critical thinking skills necessary to interpret and apply public health literature related to health communication and behavior change in global health settings.
- Skills for developing and evaluating health communication interventions in resource-limited settings or for vulnerable populations.
- Qualitative and quantitative research methods relevant to health communication.
- Knowledge of the various types of stakeholders, including governments, international donors, and local players, that may shape health communication interventions in global settings.
- Cultural competency skills necessary to develop programs and work in diverse cultural settings.
- Awareness of the benefits and challenges to collaborating with organizations that serve disenfranchised/vulnerable communities.

**COMPETENCIES**

By the end of their MPH program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

**Relevant courses:**

- PUBH 6400 Global Health Frameworks
- PUBH 6410 Global Health Study Design
- PUBH 6411 Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

**Relevant courses:**
<table>
<thead>
<tr>

</tr>
</tbody>
</table>

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

**Relevant courses:**
- PUBH 6400 Global Health Frameworks
- PUBH 6410 Global Health Study Design
- PUBH 6412 Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

**Relevant courses:**
- PUBH 6412 Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

**Relevant courses:**
- PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

**Relevant courses:**
- PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

**Relevant courses:**
- PUBH 6400 Global Health Frameworks

- Describe the governance and institutional landscape of global health.

**Relevant courses:**
- PUBH 6400 Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities.

**Relevant courses:**
- PUBH 6410 Global Health Study Design
- PUBH 6411 Global Health Qualitative Research Methods
- PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Explain the ways in which behavior change and communication theories can inform the development and evaluation of health communication interventions.

**Relevant courses:**
- PUBH 6430 Theories for Global Health Communication Interventions
- PUBH 6431 Global Health Communication Strategies and Skills
- PUBH 6571 Social Marketing: Theory and Practice

- Develop logic and conceptual models to design, monitor, and evaluate context-specific health communication interventions.

**Relevant courses:**
- PUBH 6430 Theories for Global Health Communication Interventions
- PUBH 6431 Global Health Communication Strategies and Skills
- PUBH 6571 Social Marketing: Theory and Practice

- Identify and describe essential components of health communication interventions and strategies, linking theory with practice.

**Relevant courses:**
- PUBH 6430 Theories for Global Health Communication Interventions
- PUBH 6431 Global Health Communication Strategies and Skills
- PUBH 6571 Social Marketing: Theory and Practice

- Evaluate health communication activities and interventions.

**Relevant courses:**
- PUBH 6430 Theories for Global Health Communication Interventions
**REQUIREMENTS**

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 10 credits in global health departmental courses, 8 credits in communication program courses, 8 credits in electives, a 2-credit practicum, and a 2-credit culminating experience.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY AND DISEASE CONTROL

Program Director J. Tielsch

Mission

The mission of the Global Health Epidemiology and Disease Control Program is to prepare global health professionals to develop and rigorously appraise programs for the control of infectious and chronic diseases as well as injuries. Students acquire the skills needed to improve program performance, thereby helping to ensure optimum investment of scarce resources in low and middle income countries and in underserved communities around the world.

Goals

The goals of the Global Health Epidemiology and Disease Control Program are to prepare students to be applied epidemiologists in public health program implementation and evaluation to:

- Use common epidemiological tools to generate evidence on interventions targeted to infectious and chronic disease control.
- Work within real-world settings to strengthen methodological rigor of program priority setting and evaluation.
- Generate and use data for assessing burden of disease, determining efficacy and effectiveness of interventions for infectious and chronic diseases.
- Translate evidence to support program and health systems improvements and policy recommendations.
- Communicate the results of research to a broad set of constituents.

COMPETENCIES

By the end of their MPH, Global Health Epidemiology and Disease Control program, students should be able to:

- Apply epidemiological and multi-disciplinary concepts to identify, analyze, and address global health challenges including burden of illness and the determinants and distribution disease in populations.
• Work in a multidisciplinary team to identify and address the ethical issues of global health programs, policies and research.

**Relevant courses:**

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH POLICY

Program Director C. Santos-Burgoa

Mission
The mission of the master of public health in the field of global health policy degree program is to prepare global health professionals in the disciplines and perspectives necessary to contribute to the development, implementation, and evaluation of policies at the local, national, regional, and international levels that will improve the health and well-being of underserved populations in low and middle income settings abroad and within the United States.

Goals
The goals of the Global Health Policy program are to prepare students to:

• Assess the burden and determinants of health problems in an underserved low or middle income population.
• Assess and evaluate the relevant policy issues appropriate to addressing these health problems using a multidisciplinary approach.
• Assume leadership roles in the policy development process with the goal of maximizing the performance and financial integrity of the health system.

COMPETENCIES
By the end of their MPH, Global Health Policy program, students should be able to:

• Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:
PUBH 6400  Global Health Frameworks
PUBH 6410  Global Health Study Design
PUBH 6411  Global Health Qualitative Research Methods

• Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:
PUBH 6411  Global Health Qualitative Research Methods
PUBH 6412  Global Health Quantitative Research Methods

• Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:
PUBH 6400  Global Health Frameworks
PUBH 6410  Global Health Study Design
PUBH 6412  Global Health Quantitative Research Methods

• Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:
PUBH 6412  Global Health Quantitative Research Methods

• Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:
PUBH 6416  Ethical and Cultural Issues in Global Health Research and Programs

• Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant courses:
- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH PROGRAM DESIGN, MONITORING, AND EVALUATION

Program Director S. Baird

Mission
The mission of the Global Health Program Design, Monitoring, and Evaluation (DME) degree program is to prepare the next generation of global health professionals to implement and evaluate global health programs and initiatives. This program aims to train professionals who use evidence to improve
performance of and investments in global health programs that will improve the health and well-being of populations in low and middle income settings abroad and within the United States.

**Goals**
The goals of the Global Health Design, Monitoring, and Evaluation program are to prepare students to be skilled evaluators and practitioners who know how to:

- Utilize the full range of evaluation design options to generate the best evidence on how well a program is working, how it is working, and why;
- Work within real-world confines to strengthen methodological rigor of evaluation and program implementation;
- Use theory to ground program design, implementation, and evaluation;
- Generate and use data for management decision-making; and
- Translate evidence into implementation improvements and policy recommendations.

**COMPETENCIES**
By the end of the MPH, Global Health Program Design, Monitoring, and Evaluation program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

**Relevant courses:**

**Requirements**

The following requirements must be fulfilled: 32 credits in required courses, 9 credits in elective courses, and 4 credits in practicum and culminating experience.

**Code** | **Title** | **Credits**
---|---|---
**Required core (15 credits)**
| PUBH 6001 | Biological Concepts in Public Health | |
| PUBH 6002 | Biostatistical Applications for Public Health | |
| PUBH 6003 | Principles and Practices of Epidemiology | |
| PUBH 6004 | Environmental and Occupational Health in a Sustainable World | |
| PUBH 6006 | Management and Policy Approaches to Public Health | |
| PUBH 6007 | Social and Behavioral Approaches to Public Health | |
| **Required departmental (10 credits)**
| PUBH 6400 | Global Health Frameworks | |
| PUBH 6410 | Global Health Study Design | |
| PUBH 6411 | Global Health Qualitative Research Methods | |
| PUBH 6412 | Global Health Quantitative Research Methods | |
| PUBH 6416 | Ethical and Cultural Issues in Global Health Research and Programs | |
| **Required program-specific (7 credits)**
| PUBH 6435 | Global Health Program Development and Implementation | |
| PUBH 6501 | Program Evaluation | |
| PUBH 6436 | Global Health Program Management and Leadership | |
| **Electives**
4 credits from the following:
| PUBH 6437 | Case Study Methods for Global Health Evaluation | |
| PUBH 6440 | Global Health Economics and Finance | |
| PUBH 6441 | Global Health Organizations and Regulations | |
| PUBH 6442 | Comparative Global Health Systems | |
| PUBH 6262 | Intro-Geog Information Systems | |
| PUBH 6263 | Advanced GIS | |
| ANTH 6505 | Medical Anthropology | |
| PUBH 6340 | Health Economics and Finance | |
| PUBH 6352 | Basics of Econ for Health Pol | |
5 credits from the following:
| PUBH 6480 | Public Health in Complex Emergencies | |
| PUBH 6481 | Global Mental Health | |
| PUBH 6482 | International Food and Nutrition Policy | |
Graduation Requirements
1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH

Program Director A. Roess

Mission
The doctor of public health in the field of global health (Dr.P.H.) degree program is the terminal degree in the professional discipline of public health. Consistent with this advanced professional orientation, the Dr.P.H. program prepares future public health leaders to apply critical thinking skills and rigorous research methods to the complex practical problems facing practitioners and policy-makers in public health practice. The program is designed to both follow and promote the principles of academic public health practice. As noted in a recent ASPH publication, public health practice is the strategic, organized, and interdisciplinary application of knowledge, skills, and competencies necessary to perform essential public health services and other activities to improve the populations’ health. Academic public health practice is the applied, interdisciplinary pursuit of scholarship in the field of public health. Recent events sharply illustrate the need for public health professionals who can provide the leadership to expand and strengthen the US and global public health systems. The Dr.P.H program is designed to prepare professionals with skills to provide this leadership.

From the combination of course work and the implementation of the knowledge in the context of a thesis project in outstanding international placements, the Dr.P.H. degree program in Global Health will enable professionals to develop innovative approaches and ability to negotiate the complex interrelationship between health and political, economic, and human development.

Goals
The Dr.P.H. graduate will be prepared to assume an advanced level of leadership in global health, in the context of health research as well as implementation programs in an international setting.

Admissions Requirements
The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an M.P.H. degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the Dr.P.H. program. Alternatively, applicants with a master’s degree in another field may indicate their relevant training, research experience, or educational background comparable to the M.P.H. Doctoral applicants admitted without an M.P.H. will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the Dr.P.H. Qualified applicants with degrees from institutions in foreign countries are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures
For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on Dr.P.h. in the field of Global Health website (http://publichealth.gwu.edu/programs/global-health-drph).

REQUIREMENTS

Program requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>20 credits of required foundational courses and research methods</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
PUBH 8401  Foundations in Public Health Leadership & Practice
PUBH 8402  Leadership in Public Health Practice & Policy
PUBH 8416  Study Design & Evaluation Methods
PUBH 8418  Applied Statistical Analysis
PUBH 8417  Qualitative Research Methods and Analysis
PUBH 8419  Measurement in Public Health & Health Services
PUBH 8420  Advanced Analysis & Dissemination

6 credits required global health specialty field courses

PUBH 8406  Advanced Topics: Health Research in the Global Arena
PUBH 8407  Advanced Topics: Health Leadership in International Settings

Elective specialty field courses (sample list)

7-10 credits from the following:

PUBH 6123  Toxicology: Applications for Public Health Policy
PUBH 6128  Global Environmental and Occupational Health
PUBH 6242  Clinical Epid & Decision Analysis
PUBH 6244  Cancer Epidemiology
PUBH 6245  Infectious Disease Epidemiology
PUBH 6250  Epidemiology of HIV/AIDS
PUBH 6259  Epid Surveillance/Public Health
PUBH 6262  Intro-Geog Information Systems
PUBH 6263  Advanced GIS
PUBH 6270  HIV/AIDS Surveillance
PUBH 6430  Theories for Global Health Communication Interventions
PUBH 6431  Global Health Communication Strategies and Skills
PUBH 6435  Global Health Program Development and Implementation
PUBH 6440  Global Health Economics and Finance

PUBH 6441  Global Health Organizations and Regulations
PUBH 6442  Comparative Global Health Systems
PUBH 6443  Global Health Agreements and Conventions
PUBH 6481  Global Mental Health
PUBH 6482  International Food and Nutrition Policy

4 credits of professional leadership courses

PUBH 8413  Research Leadership
PUBH 8415  Instructional Leadership

Dissertation

8-11 credits of dissertation preparation and dissertation

PUBH 8422  Advanced Health Care and Public Health Research Design

Before enrolling in PUBH 8422, students must have completed the comprehensive examination successfully, obtained the approval of the Program Director, and presented a one-page abstract

PUBH 8423  Dissertation Research

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.
HEALTH POLICY AND MANAGEMENT

In early 2015, the Department of Health Policy and the Department of Health Services Management and Leadership consolidated to create a larger, integrated department that is even better prepared to lead education, research, and practice efforts related to public health policy, health care policy, and health services management. This positive evolution creates new and dynamic synergies for faculty, staff, students, and alumni, and maximizes our education and research potential.

The mission of the Department of Health Policy and Management—a practice-oriented academic community in Washington, D.C.—is to improve health and health systems locally, nationally, and globally through: excellence in education; innovative scholarship; applied research that is translated into practice and policy; and the promotion of transformational leadership that advances health policy and health services management.

We are committed to:

- Preparing graduates who will become innovative and effective leaders in public health and health policy, health services delivery, and health system transformation.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and affect health policy, health care management, and public health practice.
- Being a trusted resource for shaping and advancing health policy and management practices because of our research integrity and rigor, the real-world leadership experiences of our faculty and staff, and our exceptional students.
