The interdisciplinary doctoral programs in the biomedical sciences are organized within GW's Institute for Biomedical Sciences (https://smhs.gwu.edu/ibs). The first full year of study toward the PhD programs in biochemistry and systems biology, microbiology and immunology, and molecular medicine is offered through the Institute. All programs are taken on a full-time basis. Faculty are drawn from the Columbian College of Arts and Sciences and the School of Medicine and Health Sciences, including scientists from the Children's Research Institute of Children's National Health System.

Students are admitted directly into the Institute for Biomedical Sciences through the Columbian College of Arts and Sciences. At the end of the first year of study, a student selects one of the three PhD fields (i.e., biochemistry and systems biology, microbiology and immunology, or molecular medicine) and completes remaining degree requirements in the selected program.

Visit the Institute for Biomedical Sciences website (https://smhs.gwu.edu/ibs) for additional information.

GRADUATE

Master’s Program
• Master of Science in the field of bioinformatics and molecular biochemistry (http://bulletin.gwu.edu/arts-sciences/biochemistry-molecular-medicine/ms-bioinformatics-molecular-biochemistry)

Doctoral Programs
• Doctor of Philosophy in the field of biochemistry and systems biology (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-biochemistry-systems-biology)
• Doctor of Philosophy in the field of cancer biology (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-cancer-biology)
• Doctor of Philosophy in the field of genomics and bioinformatics (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-genomics-bioinformatics)
• Doctor of Philosophy in the field of microbiology and immunology (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-neuroscience)
• Doctor of Philosophy in the field of neuroscience (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-neuroscience)
• Doctor of Philosophy in the field of pharmacology and physiology (http://bulletin.gwu.edu/arts-sciences/biomedical-sciences/phd-pharmacology-physiology)

FACULTY

Committee on Biomedical Sciences L. Werling (Director), L. Caldovic, A. Chiaramello, A. Colberg-Poley, R.P. Donaldson, V. Gallo, A. Jeremic, D. Mendelowitz, N. Lee, D. Leitenberg, E. Villain.

EXPLANATION OF COURSE NUMBERS
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
• Biomedical Sciences (BMSC) (http://bulletin.gwu.edu/courses/bmsc)
• Microbiology (MICR) (http://bulletin.gwu.edu/courses/micr)
• Molecular Medicine (MMED) (http://bulletin.gwu.edu/courses/mmed)
• Pharmacology (PHAR) (http://bulletin.gwu.edu/courses/phar)
