DOCTOR OF PHILOSOPHY IN THE FIELD OF CANCER BIOLOGY

The PhD in the field of cancer biology program focuses on the disease of cancer, ranging from molecular signaling underlying carcinogenesis to cancer genomics for improving detection, diagnosis, and treatment. While the training of cancer researchers has historically been accomplished by individual investigators in the traditional departments, the rapidly expanding knowledge base and complexity of modern genetic and molecular approaches necessitate an approach that is both broader-based, with respect to scientific discipline, and more focused, with respect to this disease entity.

The program begins with interdisciplinary coursework in genes, cells and systems in biomedical sciences, professional development in scientific communication and science careers, and laboratory rotations offered through GW’s Institute for Biomedical Sciences. After the first year of study, students work with their research advisor to complete remaining degree requirements, including the dissertation.

Program faculty are drawn largely from the GW School of Medicine and Health Sciences, including scientists from Children’s Research Institute of Children’s National Health System.

Students have access to extensive research facilities and libraries on campus and in the greater Washington, DC. This include the School of Medical and Health Sciences, GW’s Gelman Library and Himmelfarb Health Sciences Library, Children’s Research Institute, the National Institutes of Health, and numerous other research institutions.

The PhD in cancer biology is a STEM-designated program.

Visit the program website (https://smhs.gwu.edu/ibs/phd-programs-ibs/cancer-biology-phd-program/) for additional information.

ADMISSIONS

Admission deadlines:
- Fall – December 1

Standardized test scores: The GRE general exam is not required. The Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the PTE Academic is required of all applicants except those who hold a bachelor’s, master’s, or doctoral degree from a college or university in the United States or from an institution located in a country in which English is the official language, provided English was the language of instruction.

Minimum scores for the program are:
- Academic IELTS: an overall band score of 7.0 with no individual score below 6.0; or
- TOEFL: 600 on paper-based or 100 on Internet-based; or
- PTE Academic: 68;

Recommended:
- Three (3) recommendations required:

Prior academic records: Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended must be uploaded to your online application. Official transcripts are required only of applicants who are offered admission. If transcripts are in a language other than English, English language translations must be provided. The English translation alone should be uploaded into your application.

Prerequisite: A bachelor’s degree in biological sciences, chemistry, or a related field.

Statement of purpose: In an essay of 250 - 500 words, state your purpose in undertaking graduate study in your chosen field. Include your academic objectives, research interests, and career plans. Also discuss your related qualifications, including collegiate, professional, and community activities, and any other substantial accomplishments not already mentioned on the application.

Interview: An interview is required.

Additional requirements: A Curriculum Vitae is required.

International applicants only: Please follow this link - https://columbian.gwu.edu/international-graduate-applicants - to review the International Applicant Information carefully for details on required documents and English language requirements.

For additional information on the admissions process visit the Columbian College of Arts and Sciences Frequently Asked Questions (https://columbian.gwu.edu/graduate-admissions-faq/) page.

Supporting documents not submitted online should be mailed to:
- Columbian College of Arts and Sciences - Graduate Admissions Office
  - The George Washington University
  - 801 22nd Street NW, Phillips Hall 215
  - Washington DC 20052

Contact:
- askccas@gwu.edu
REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (http://bulletin.gwu.edu/arts-sciences/#degreeregulationtext).

The requirements for the Doctor of Philosophy Program (http://bulletin.gwu.edu/arts-sciences/#doctoraltext).

72 credits, including required core, dissertation, and elective coursework. Successful completion of a grant-style qualifier examination is required for advancement to candidacy. In addition, students perform full-time research in faculty laboratories for the duration of their program.

Students are advised to complete 45 credits in the first two years of PhD study comprising required interdisciplinary core courses, required cancer biology core courses, electives, and advanced readings and research. Upon successful completion of the grant-style qualifier, students register for up to 27 credits of dissertation research through completion and successful oral defense of a written dissertation.
