MASTER OF SCIENCE IN THE FIELD OF CHEMISTRY

GW's graduate chemistry program fosters active learning through a research-based curriculum. Beginning with advanced coursework and training in the discipline as a whole and one or more selected subdisciplines, our award-winning graduate students engage in cutting-edge research alongside expert faculty. Research areas include proteomics, and bioanalytical methods development, synthetic medicinal chemistry and drug design, combustion, battery chemistry and renewable energy sources, laser and molecular spectroscopies, nano- and biomaterials, modeling, coordination chemistry and novel inorganic framework structures.

The MS program offers thesis and non-thesis tracks to prepare individuals for distinctive career or professional paths. All students take core courses and comprehensive examinations in the fields of analytical, inorganic, organic and physical chemistry.

The MS is a STEM designated program.

Visit the program website (https://chemistry.columbian.gwu.edu/ms-chemistry/) for additional information.

ADMISSIONS

Admission deadlines:
- Fall - April 1 (February 1 for fellowship consideration);
- Spring - October 1

Standardized test scores:
- GRE General test is not required; GRE subject test recommended (institutional code 5246).

Prior academic records:
Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended must be uploaded to your online application. Official transcripts are required only of applicants who are offered admission. If transcripts are in a language other than English, English language translations must be provided. The English translation alone should be uploaded into your application.

Statement of purpose:
In an essay of 250 - 500 words, state your purpose in undertaking graduate study in your chosen field. Include your academic objectives, research interests, and career plans. Also discuss your related qualifications, including collegiate, professional, and community activities, and any other substantial accomplishments not already mentioned on the application. If you are applying for an assistantship or fellowship, you should also describe any teaching experience you have had.

For more information on the admission process, please visit the Columbian College of Arts and Sciences Frequently Asked Questions (http://columbian.gwu.edu/graduate/admissions/faqs/) page.

Supporting documents not submitted online should be mailed to:
Columbian College of Arts and Sciences - Graduate Admissions Office
The George Washington University
801 22nd Street NW, Phillips Hall 215
Washington DC 20052

Contact for questions:
askccas@gwu.edu ~ 202-994-6210 (phone) ~ 202-994-6213 (fax)
8:30 am - 5:30 pm, Monday through Friday

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (http://bulletin.gwu.edu/arts-sciences/#degreeregulationstext).
Thesis option—30 credits, including 15 credits in required courses, 9 credits in elective courses, and 6 credits in thesis research; non-thesis option—30 credits, including 15 credits in required courses and 15 credits of electives, including up to 6 credits of research. All students must successfully complete a comprehensive examination in the fields of analytical, inorganic, organic, and physical chemistry.

**Note:** All entering students in graduate chemistry programs are required to take the American Chemical Society graduate level placement examinations, given by the Department of Chemistry, prior to matriculation. The four placement examinations (in the disciplines of analytical, organic, inorganic, and physical chemistry) are designed to cover the subject matter in the disciplines generally taught in undergraduate programs preparatory for graduate work in chemistry, and the results are used by the department to advise the individual student in planning a program of courses appropriate to the student’s background. All graduate students are required to participate in the seminar and colloquium programs. Upon consultation with course instructors, specific course prerequisites may be waived.

### Code | Title | Credits
--- | --- | ---
**Required**

15 credits, which must include at least one course from each of the following categories and 6 additional credits in non-research CHEM courses taken at the 6000 level.:

Category A

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

### Electives

Thesis option: 9 credits through a combination of coursework and Research (CHEM 6395)

Non-Thesis Option: 15 credits through a combination of coursework and up to 6 credits of Research (CHEM 6395). Up to 9 credits may be taken in other departments related to the student’s area of interest (e.g., Forensic Sciences), subject to the approval of the Department of Chemistry. Students who are or will be employed in organizations dealing with science and technology policy programs may select from specified courses offered by Information Systems and Technology Management, Political Science, Public Policy and Public Administration, and the Elliott School of International Affairs.

### Thesis research

CHEM 6999 Thesis Research (taken for a total of 6 credits by students pursuing the thesis option.)

### Comprehensive examination

Candidates are required to pass a master’s comprehensive examination as described in the department’s Guide for Graduate Students.
