BACHELOR OF ARTS WITH A MAJOR IN MATHEMATICS

GW’s Department of Mathematics is committed to high-quality teaching and research, providing a curriculum that is designed to give students a solid background in the theory and practice of modern mathematics through three academic tracks: pure, applied, and computational. As a mathematics major, students are presented with a wealth of intellectual challenges and opportunities in Washington, DC, the city with the highest concentration of mathematicians in non-academic positions. Mathematics students at GW not only have a number of internship options, they also have an abundance of potential career options as analysts, consultants, actuaries, stockbrokers, physicians, attorneys, and educators.

Visit the program website (https://math.columbian.gwu.edu/) for additional information.

Bachelor of Arts with a Major in Mathematics
### Coursework for the University General Education Requirement is distributed as follows:

- **Writing**—4 credits in UW 1020 University Writing and 6 credits distributed over at least two writing in the discipline (WID) courses taken in separate semesters. WID courses are designated by a “W” appended to the course number.
- **Humanities**—one approved humanities course that involves critical thinking skills.
- **Mathematics or statistics**—one approved course in either mathematics or statistics.
- **Natural or physical science**—one approved laboratory course that employs the process of scientific inquiry.
- **Social Sciences**—two approved courses in the social sciences that employ critical thinking, quantitative reasoning, or scientific reasoning.

### Coursework for the CCAS G-PAC requirement is distributed as follows:

- **Arts**—one approved arts course that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.
- **Global or cross-cultural perspective**—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- **Local or civic engagement**—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- **Oral communication**—one approved course in oral communication.
- **Natural or physical science**—one additional approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- **Humanities**—one additional approved humanities course that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- **CCAS 1001 First-Year Experience**

### Certain courses are approved to fulfill GPAC requirements in more than one category.

Courses taken in fulfillment of G-PAC requirements may also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

Lists of approved courses in the above categories are included on each undergraduate major’s [page](http://bulletin.gwu.edu/arts-sciences/#majorstext) in this Bulletin.
SPECIAL HONORS

In addition to the general requirements stated under University Regulations, in order to be considered for graduation with Special Honors, students must maintain a grade-point average of at least 3.5 in courses in the major; complete 3 credits of MATH 4995 Reading and Research in addition to the other required courses in the major; and present an oral defense of a senior thesis prepared for MATH 4995 Reading and Research.
