MINOR IN STATISTICS

Statistics plays an important role throughout society, providing methodologies for making advances in medicine, genetics, and other research arenas and for making decisions in business and public policy. Our curriculum teaches the reasoning and methods for analyzing and understanding data and will explore how these skills can be applied to develop new initiatives. With GW’s connections to statisticians across D.C., you’ll also have the unique advantage of learning from professionals who bring valuable practical experience into the classroom. Careers for statisticians are found in all sectors of society with statisticians in demand in government agencies, universities, and businesses. Statisticians are called upon to apply statistical methods in policy-making roles in government, development of pharmaceuticals, market research, finance, accounting, and quality control in manufacturing.

For more information visit the program website. (https://statistics.columbian.gwu.edu/)
