The concentration in business economics and public policy degree program is concerned with the continuing business-government dialogue that leads to effective decision making and equitable relations between the public and private sectors. The program is designed to help students develop the knowledge and skills useful for a wide variety of positions in public, private, for-profit, and nonprofit organizations. Students deepen their understanding of the social and legal environments that influence business and its relationships with government at all levels. Students also receive in-depth training in micro- and macroeconomic analysis. This key element of the field prepares students to perform rigorous and sophisticated analyses of the economic impacts of policy decisions on various types of institutions and organizations.

Study in this concentration also serves to ensure that students understand the workings of political systems and institutions, particularly those of the U.S. federal government. This understanding includes recognizing not only what government can do and achieve, but also the limits of its power and the role of private interests in driving political decision making in Congress and government agencies.

**REQUIREMENTS**

(Note: In accordance with GWSB concentration regulations [http://bulletin.gwu.edu/business/#concentration] students who complete the business economics and public policy concentration may not declare a minor in economics.)

Students who choose business economics and public policy to fulfill the bachelor of science with a major in business [http://bulletin.gwu.edu/business/bs/] concentration requirement take five courses (15 credits), as follows:
