The graduate certificate in integrating technology into education—offered exclusively online—provides students from varied professional educational backgrounds (including public and private sectors, K-12, and higher education) with the foundational knowledge and skills required to integrate technology effectively into their instruction. The curriculum, which is taught in a distance learning format, prepares students to apply, manage, and evaluate theories, standards, technologies, and techniques for integrating technology within their professional educational settings. Students integrate their professional experiences into their learning, apply their course assignments to their current professional activities, and actively engage with other professionals.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-integrating-technology-education) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits in required courses.
