DUAL BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING

REQUIREMENTS

The School of Engineering and Applied Science (SEAS) offers a dual bachelor of science with a major in biomedical engineering (http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/bs) and master of engineering in the field of regulatory biomedical engineering (http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/regulatory-biomedical-engineering) degree program. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master’s degree.

Students interested in the combined program should visit the SEAS Department of Biomedical Engineering website (https://www.bme.seas.gwu.edu) for additional information.
