MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

This MS program in cybersecurity in computer science is offered by GW's Department of Computer Science. The program was created in response to the large and fast-growing need for technical cybersecurity experts, nationally and internationally. Students acquire up-to-date knowledge and skills in cybersecurity, a field of ever-increasing importance to national security, the economy, and individual users. They also receive a firm grounding in requisite core knowledge in computer science, as well as the ability to take courses in related disciplines.

In this program, students receive individualized attention from world-class faculty, are able to take advanced topics courses along with PhD students, and benefit from evening classes that accommodate the schedules of working professionals. Thesis and non-thesis options are available.

Credit and course sharing with the MS in the field of computer science

With department approval, students who complete the MS in the field of cybersecurity in computer science program, and subsequently enroll in the MS in the field of computer science (p. 1) program, or vice versa, may count the following core courses toward both degrees: CSCI 6212, CSCI 6221, and CSCI 6461

ADMISSIONS

Standardized test scores: The Graduate Record Examination (GRE) is required of all applicants. (Institution code 5246). The Test of English as a Foreign Language (TOEFL) or the Academic International English Language Testing System (IELTS) is required of all applicants except those who hold a bachelor's, master's, or doctoral degree from a college or university in the United States or from an institution located in a country in which English is the official language, provided English was the language of instruction. Minimum scores:

- TOEFL: 550 on paper-based or 80 on Internet-based; applicants requesting funding consideration must have 600 on paper-based; or 100 on Internet-based
- Academic IELTS: an overall band score of 6.0 with no individual score below 5.0; applicants requesting funding consideration must have an overall band score of 7.0 with no individual score below 6.0
- PTE Academic: 53; applicants requesting funding consideration must have 68.

Recommendations: 3 recommendations required of applicants. If possible, one recommendation should be from your advisor at the institution from which you earned your highest degree.

Prior academic records: Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended must be uploaded to your online application. Official transcripts are required only of applicants who are offered admission.

If academic records are in a language other than English, a copy in the original language and an English language translation must be uploaded. Transcript evaluations should not be uploaded. Applicants who have earned a degree from an Indian university are required to submit individual semester marksheets.

Statement of purpose: In an essay of 250 to 500 words, state your purpose in undertaking graduate study at The George Washington University; describe your academic objectives, research interests, and career plans; and discuss your related qualifications, including collegiate, professional, and community activities, and any other substantial accomplishments not already mentioned.

Additional requirements: Bachelor's degree with a grade point average of at least 3.0 (on a 4.0 scale) in the last 60 hours of coursework. All applicants must choose an area of focus that most closely matches their interests and note this on the online application. All applicants must submit a résumé or CV.

International applicants only: Please follow this link - https://graduate.admissions.gwu.edu/international-student-application-requirements/ - to review the International Applicant Information carefully for details on required documents, earlier deadlines for applicants requiring an I-20 or DS-2019 from GW.
For more information on the admission process, please visit the SEAS Frequently Asked Questions page. ([http://graduate.seas.gwu.edu/apply/faq/](http://graduate.seas.gwu.edu/apply/faq/))

9:00 - 5:00 pm, Monday through Friday

**REQUIREMENTS**

The following requirements must be fulfilled: Thesis option—30 credits, including 12 credits in required courses and 12 credits in elective courses, and 6 credits in thesis; non-thesis option—30 credits, including 12 credits in required courses and 18 credits in elective courses.

At least 24 of the 30 credits required for the degree must be taken at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a CSCI course and must be eligible to be taken for graduate credit according to the course description in this Bulletin. Any course below the 6000 level must receive the prior written approval of the student's faculty advisor.

**Credit Requirements:**

- Thesis option: 30 credits are required for graduation; 6 of these credits are thesis credits
- Non-thesis option: 30 credits are required for graduation
- With department approval, students who complete the MS in the field of computer science and then enroll in the MS in the field of cybersecurity in computer science degree or vice versa can count the following core courses towards both degrees: CSCI 6212, CSCI 6221, and CSCI 6461.

**Program Restrictions:**

- Students whose admission letters state that they are required to take CSCI 6010 and CSCI 6011 are limited to EMSE 6540 as their only non-CS course.
- Students required to take CSCI 6010 and CSCI 6011 must take these courses in their first semester.
- Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-CS courses (9 credits) towards their degree with prior written approval from their faculty advisor.
- At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a rule, any course taken below the 6000 level must be a Computer Science course and must be eligible to be taken for graduate credit according to the course description. Exceptions may be chosen to enhance an aspect of the student's degree program. Any course taken below the 6000 level must receive prior written approval from the student's faculty advisor.

</tbody>
</table>

Any special topics course taken for credit towards the degree must focus on security or cryptography and be approved by the faculty advisor.

Two additional security courses (6 credits) from across the university*.

All computer science security courses listed above not used to meet the applied cryptography or computer science security course requirements as well as the following courses may be used:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

<tbody>
<tr>
<td>EMSE 6537</td>
<td>Information Operations</td>
<td></td>
</tr>
</tbody>
</table>
EMSE 6543  
Managing the Protection of Information  
Assets and Systems

EMSE 6545  
Internet and Online Law for Security  
Managers

Any other cybersecurity-related course from across the  
university must be reviewed and approved by the student’s  
advisor to ensure that it is sufficiently advanced and rigorous  
before it can be taken for credit towards the degree.

**Electives**

Students who are not taking the thesis option and are not  
required to take CSCI 6010 or CSCI 6011 can choose any two  
additional courses (6 credits) numbered 6000 or higher.

Students who choose the thesis option must obtain the  
written approval of their thesis advisor before registering for  
the following courses:

CSCI 6998  
Thesis Research

CSCI 6999  
Thesis Research

If the admissions letter states that students are required  
to take CSCI 6010 and CSCI 6011, they will be limited to  
EMSE 6540 Management of Information Systems and Security  
as their only non-computer science course. Students required  
to take CSCI 6010 and CSCI 6011 are required to take these  
courses in their first semester. Students not required to  
take CSCI 6010 and CSCI 6011 may take up to three non-  
computer science courses (9 credits) towards their degree  
with prior written approval from their advisor.

At least 24 of the 30 credits required for the degree must  
be at the 6000 level or above. As a general rule, any course  
taken below the 6000 level must be a computer science  
course and must be eligible to be taken for graduate credit  
according to the course description. Exceptions may be  
chosen to enhance an aspect of the student’s degree  
program. Any course taken that is below the 6000 level must  
receive prior written approval from the student’s advisor.

With department approval, students who complete the  
Master of Science in Computer Science and then enroll in the  
Master of Science in the field of Cybersecurity in Computer  
Science or vice versa can count the following core courses  
towards both degrees:

CSCI 6212  
Design and Analysis of Algorithms

CSCI 6221  
Advanced Software Paradigms

CSCI 6461  
Computer System Architecture

*Any special topics course taken for credit toward the degree  
must be approved by the faculty advisor and it must focus on  
security or cryptography.

**Any cybersecurity-related course not specifically listed here  
must be approved in advance by the student’s advisor to  
ensure it is sufficiently advanced and rigorous to count toward  
credit for the degree.

**Graduation and Scholarship Requirements**

Students are responsible for knowing the university’s  
minimum GPA requirement for graduation and scholarships.  
Please visit the Graduation and Scholarship Requirements  
(http://bulletin.gwu.edu/engineering-applied-science/  
#graduation_requirements_ms) section on this site to read the  
requirements.

Students should contact the department for additional  
information and requirements.
