DUAL BACHELOR OF SCIENCE
WITH A MAJOR IN COMPUTER
ENGINEERING AND MASTER
OF SCIENCE IN THE FIELD
OF TELECOMMUNICATIONS
ENGINEERING

The School of Engineering and Applied Science offers
a dual bachelor of science with a major in computer
engineering (http://bulletin.gwu.edu/engineering-
applied-science/electrical-computer-engineering/bs-
computer-engineering/)and master of science in the field of
telecommunications engineering (http://bulletin.gwu.edu/
engineering-applied-science/electrical-computer-engineering/
telecommunications-engineering/) degree program. The
program allows students to take 6 graduate credits as part
of their undergraduate program, thereby decreasing the
number of credits normally required for the master’s degree.
All requirements for both degrees must be fulfilled.

If a student has already taken the undergraduate equivalent
(i.e., the cross-listed) course of a graduate course required
for the MS degree, the graduate course must be substituted
by another course with the advisor’s consent, except if the
undergraduate equivalent course is one of two courses that
are double counted, once toward BS degree and second time
toward MS degree.

Students interested in the dual degree program should
confer with the department’s graduate adviser early
in their junior year. Visit the program website (https://
graduate.seas.gwu.edu/five-year-program/) for additional
information.
