BACHELOR OF SCIENCE
WITH A MAJOR IN SYSTEMS
ENGINEERING

The bachelor of science with a major in systems engineering degree program provides students with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Systems engineering can be applied in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and transportation. The program emphasizes analytical thinking and fosters communication skills and awareness of the current professional world in order to prepare students for graduate education or productive professional employment.

Bachelor of Science with a Second Major in Systems Engineering

Any undergraduate student who is enrolled at GW may declare a second major in systems engineering only if his or her primary degree is a Bachelor of Science. The student must complete all degree requirements for the Bachelor of Science in systems engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students completing other degrees (e.g., BA, BBA, BFA) are required to complete the major as a double degree (http://bulletin.gwu.edu/university-regulations/#DDegrees).

Graduation grade-point average criteria:
To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Bachelor of Arts with a Second Major in Applied Science and Technology

The Department of Engineering Management and Systems Engineering does not offer a second major in applied science and technology.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-science-systems-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

- A total of 129 credits taken as outlined below.
- Completion of an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours of work per week during two of the final four semesters. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) will usually be acceptable; the position may be either paid or unpaid. Consult the faculty advisor for approval.

- A minimum technical GPA of 2.2 and SEAS GPA of 2.0. All technical courses taken during the fifth through eighth semesters, as outlined by the 4-year curriculum sheet respective to each major and approved by the student’s faculty advisor, are counted towards the student’s technical GPA.
- Completion of an approved technical minor which utilizes the five (5) professional electives built into the curriculum.

Plan of Study

The plan of study lists in sequence all course requirements for the degree. Students should review this information carefully and speak to their advisor before changing the sequence of any of these courses.

### Fourth semester
- **EMSE 2705** Mathematics in Operations Research 3
- **EMSE 3815** Requirements Analysis and Elicitation 3
- **EMSE 4765** Data Analysis for Engineers and Scientists 3

### Humanities or social sciences elective 4 3

### Option One
- Taken sequentially:
  - **CSCI 1111** Introduction to Software Development 3
  - **CSCI 1121** Introduction to C Programming
  - **CSCI 2113** Software Engineering 3
  - **CSCI 2441W** Database Systems and Team Projects 3

### Fifth semester
- **APSC 2113** Engineering Analysis I 3
- **EMSE 3740W** Systems Thinking and Policy Modeling 3
- **EMSE 3850** Quantitative Models in Systems Engineering 3
- **EMSE 4755** Quality Control and Acceptance Sampling 3

### Humanities or social sciences elective 4 3

### Option Two
- Taken sequentially:
  - **CSCI 1111** Introduction to Software Development 3
  - or **CSCI 1121** Introduction to C Programming
  - or **CSCI 1131** Introduction to Programming with C
  - **EMSE 6574** Programming for Analytics 3

### Sixth semester
- **EMSE 3820** Project Management for Engineering Systems 3
- **EMSE 3855W** Critical Infrastructure Systems 3
- **EMSE 4410** Engineering Economic Analysis 3
- **EMSE 4770** Techniques of Risk Analysis and Management 3
- **PHIL 2135** Ethics in Business and the Professions 3

### Engineering elective 5 3

### Seventh semester
- **EMSE 3760** Discrete Systems Simulation 3
- **EMSE 4190** Senior Project in Systems Engineering I 3
- **EMSE 4710** Applied Optimization Modeling 3

### Two professional electives 6 6

### Eighth semester
- **EMSE 4191** Senior Project in Systems Engineering II 3
- **STAT 2183W** Intermediate Statistical Laboratory: Statistical Computing Packages 3

### Computing track electives: 3

### Three professional electives 6 9

### Total Credits 129

---

1. Course satisfies the university general education requirement in math, science, and writing.

2. One course, or pair of courses, from the following for a total of 4 credits: BISC 1115 and BISC 1125; or BISC 1116 and BISC 1126; or CHEM 1111; or CHEM 1112. Note that Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

3. Computing track elective requirements may be met with the courses in either option in the list directly above.

4. One social and behavioral sciences course and one humanities course must be selected from the University General Education Requirement list.

5. In consultation with the faculty advisor, the student selects two approved courses with engineering topics, both offered by the same SEAS department.

6. Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by taking a five-course sequence leading to a minor from another department.
department of the University. Technical electives are selected with the approval of the student's academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

**Internship requirement**—All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.
