MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

Administered jointly through the Department of Computer Science and the Department of Engineering Management and Systems Engineering, the master of science in data analytics aims to address the growing demand for professionals skilled in big data and data analytics in government, industry and research organizations.

Through courses led by top faculty members at the School of Engineering and Applied Science and the School of Business, this program is conducted in small cohorts and covers topics in computer science, business analytics and systems engineering while focusing on the foundations of analytics from a technical engineering perspective.

As part of their program requirements, students choose either the computer science or the engineering management and systems engineering track.

Students in the program should expect the following program outcomes:

- Apply data science and analytics techniques in the decision-making process of a wide range of organizations.
- Demonstrate the ability to store, clean and transform data.
- Demonstrate improvements in the decision-making process by using and applying analytics techniques to interpret results
- Design and implement computing infrastructure and algorithmic techniques for big data analytics.
- Explore the engineering foundations that propel the fields of data science and analytics.
- Gain hands-on experience with analytical tools for big data.
- Pursue or enhance careers as data analysts or data scientists.

ADMISSIONS

Admission deadlines:

- Fall - January 15
- Spring - September 1

Standardized test scores:

- The Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the PTE Academic is required of all applicants except those who hold a bachelor’s, master’s, or doctoral degree from a college or university in the United States or from an institution located in a country in which English is the official language, provided English was the language of instruction. Minimum scores:
  - Academic IELTS: an overall band score of 7.0 with no individual score below 6.0;
  - TOEFL: applicants must have 600 on paper-based; or 100 on Internet-based; or
  - PTE Academic: applicants a score of 68.

Recommendations:

Two (2) recommendations required for M.S. applicants. If possible, one recommendation should be from your advisor at the institution from which you earned your highest degree.

Prior academic records:

Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended must be uploaded to your online application. Official transcripts are required only of applicants who are offered admission.

If academic records are in a language other than English, a copy in the original language and an English language translation must be uploaded. Transcript evaluations should not be uploaded. Applicants who have earned a degree from an Indian university are required to submit individual semester marksheets.

Statement of purpose:

In an essay of 250 to 500 words, state your purpose in undertaking graduate study at The George Washington University; describe your academic objectives, research interests, and career plans; and discuss your related qualifications, including collegiate, professional, and community activities, and any other substantial accomplishments not already mentioned.

Additional requirements:

Bachelor's degree with a GPA of at least 3.0 on a 4.0 scale for the last 60 hours of coursework; two courses in mathematics beyond pre-calculus; one year of science with laboratory; courses in computer science using a structured language, discrete structures, data structures, and computer architecture.

International applicants only:

Please follow this link - https://graduate.admissions.gwu.edu/international-student-application-requirements/ - to review the International Applicant Information carefully for details on required documents, earlier deadlines for applicants requiring an I-20 or DS-2019 from GW.

For more information on the admission process, please visit the SEAS Frequently Asked Questions page. (http://graduate.seas.gwu.edu/apply/faq/)

REQUIREMENTS

Credit Requirements
The following requirements must be fulfilled: 33 credits, including 18 credits in required courses and 15 credits in elective courses.

<table>
<thead>

Additional coursework

Five additional courses are required. At least three of these courses (two required and one elective) must be in either the computer science track or in the engineering management and systems engineering track, effectively constituting a concentration in one of the two tracks. With the advisor’s approval, the remaining elective course may be taken outside of the selected track and may include courses outside SEAS.

Computer science track

If the computer science track is selected, students must take CSCI 6212 and CSCI 6364 and one elective course from the list below.

<table>

Electives

| CSCI 6312 | Graph Theory and Applications |         |
| CSCI 6341 | Continuous Algorithms |         |
| CSCI 6342 | Computational Linear Algebra and Applications |         |
| CSCI 6351 | Data Compression |         |

Graduation and Scholarship Requirements
Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

Program Restrictions
Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.
