The demands of globalization are dramatically changing career and employment practices for individuals and organizations in international affairs. Professionals who want to excel in the international arena must have knowledge of international economic, political, and social trends. They must possess the analytical and management skills necessary to formulate and advocate policies on key international issues, as well as the ability to negotiate and work effectively in cross-cultural settings.

The international policy and practice program (MIPP) enhances the capacities of mid-career students to lead change and take on the challenges of the 21st century by providing them with the tools and insights of cutting-edge scholarship.

The program’s interdisciplinary curriculum combines three foundation courses with a wide variety of course options that are selected to suit the student’s professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals. Cohort events throughout the year provide additional venues for professional networking with other students, faculty, and guest speakers.

Students in the MIPP program also benefit from the events and programs sponsored by the Elliott School’s exceptional research centers and institutes. The Elliott School’s active calendar of lectures, conferences, and workshops feature leading scholars and practitioners from the national and international policy communities.

Visit the program website (https://online.gwu.edu/master-international-policy-and-practice/) for additional information.
