The master of arts in international economic policy (MIEP) STEM Track program provides students with a firm understanding of international trade, international finance, and development economics. Students pursuing the STEM track complete a more quantitatively oriented program of study, culminating in a two-semester capstone sequence utilizing econometric and mathematical economic models under the direction of the MIEP program director.

Once admitted to the MIEP program, students may petition the program director to pursue the STEM track, which focuses on econometrics and quantitative methods. Students pursuing this track must have completed at least one semester of calculus, intermediate microeconomics, and intermediate macroeconomics within two academic years before beginning the STEM track.

Visit the program website (https://elliott.gwu.edu/international-economic-policy/) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 40 credits, including 21 credits in core courses, a 4-credit capstone course sequence, and 15 credits in elective courses.

Students in the MA in international economic policy (MIEP) and the MIEP STEM Track programs must demonstrate proficiency in intermediate microeconomics and intermediate macroeconomics before taking any Economics (ECON) course, including required economics coursework*. Students admitted without this proficiency may take courses in other departments, including those with an IAFF designation. Students pursuing the MIEP STEM Track must have completed a minimum of one course in calculus.

Visit the program website (https://elliott.gwu.edu/international-economic-policy/) for additional information.
