Master of Science in Health Sciences in the Field of Immunohematology

Please note: The Immunohematology program is open to military contract students only.

The MSHS program in immunohematology is designed for clinical laboratory scientists currently enrolled in Specialist in Blood Banking Technology Programs accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) or who have been certified as a Specialist in Blood Banking (S.B.B.) within the last seven years. The program incorporates aspects of blood transfusion medicine at the graduate level with research methods, current topics in transfusion medicine, immunology, biochemistry and research in an area of immunohematology. The goal of the Immunohematology program is to prepare individuals who will be competitive for careers in management, research and education in the area of immunohematology.

Students take 22 hours of online courses through the health sciences programs at The George Washington University. The program culminates in a research project.

Visit the program website (https://smhs.gwu.edu/military-affiliated-programs/immunohematology/) for additional program information.

Admissions

This is a military contract program and only open to service members selected for the Specialized Blood Bankers program at Walter Reed Military Hospital.

An undergraduate degree in a chemistry/biological science from an accredited college or university, certification as a Medical Technologist by the American Society of Clinical Pathologists, MT(ASCP), or other recognized national certifying body and/or previous clinical laboratory experience are required for admission.

Please visit the program website (https://smhs.gwu.edu/military-affiliated-programs/immunohematology/) for more details.

Requirements

The following requirements must be fulfilled: 55 credits in required courses.
