The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in clinical operations and healthcare management and master of science in health sciences in the field of healthcare quality degree program. The program allows students to take 9 graduate credits as part of their undergraduate program in lieu of 9 undergraduate credits in elective coursework, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

The 9 graduate credits students take in lieu of undergraduate electives are: in COHM 6235 Leadership Development in Health Care Systems, HSCI 6263 Biostatistics Translational Research, and HCQ 6200 Introduction to Health Care Quality.

Visit the School of Medicine and Health Sciences website for additional information.
