**CCAS ADMISSION REQUIREMENTS**

**Admission Criteria**

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have a strong academic background, usually with a major, or equivalent, in the field in which they intend to study for an advanced degree. Normally, a B average or equivalent from an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a B average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments may, and often do, set higher admission standards. Undergraduates who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration is permitted. Graduate courses taken prior to admission while in nondegree status are not used in assessing admissibility to degree programs and may not be transferable into those programs.

**Readmission**

A student who wishes to resume a graduate program that had been interrupted for a period of two years or more must file a new application form and provide supporting documentation to be considered for readmission. Readmission is not guaranteed, and the application is subject to review by the department concerned and/or the dean. The student may be required to take additional course work and qualifying examinations on the course work completed.

**CCAS GENERAL EDUCATION REQUIREMENTS**

In addition to the University General Education Requirement, undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication, or G-PAC. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework for the University General Education Requirement is distributed as follows:

- Writing—one approved course in university writing and two approved writing in the disciplines (WID) courses.
- Humanities—one approved course in the humanities that involves critical or creative thinking skills.
Mathematics or Statistics—one approved course in either mathematics or statistics.

Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry.

Social Sciences—two approved courses in the social sciences.

Coursework for the Columbian College general education curriculum is distributed as follows:

- Arts—one approved course in the arts that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.
- Global or Cross-Cultural Perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- Humanities—one approved course in the humanities that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- Local or Civic Engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- Natural or Physical Science—one approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- Oral Communication—one course in oral communication.

Certain courses are approved to fulfill the requirement in more than one of these categories.

Courses taken in fulfillment of G-PAC also may be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University may count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

In addition to the courses listed below, several G-PAC approved Dean’s Seminars and Colloquia may be available for registration as listed on the CCAS Advising website (https://advising.columbian.gwu.edu/general-education-courses).

ESIA GRADUATE CERTIFICATE PROGRAMS

Graduate certificate programs

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs also are open to graduate students from other universities, individuals who already have earned a graduate degree, and individuals with a bachelor’s degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other MA degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

Skills I

Students are encouraged, and in some cases required, to take leave of absence each semester. In exceptional circumstances, but the student will be required to complete the required course work, an acceptable capstone project, and satisfied the foreign language requirement (if relevant).

Students with sufficient academic backgrounds may waive a core course with approval of a designated faculty member from the department concerned. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses may be counted toward the master’s degree; registration for graduate credit must be approved at the beginning of the course by the program director, the instructor, and the Office of Academic Advising. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate course work may be taken for credit toward a graduate degree. Academic credit counted toward a previous degree may not be counted toward the master’s degree.

All master’s degree candidates must complete degree requirements within five years of their admission to the program. Students who are unable temporarily to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student will be required to register for Leave of Absence each semester.

Students are encouraged, and in some cases required, to take professional skills-based courses (IAFF 6502 Professional Skills I-IAFF 6503 Professional Skills II) and should consult their program guidelines for limits on the number of credits in these courses that can count toward their degree program. The maximum allowed by the Elliott School is 4 credits.

No more than a combined total of 6 graduate credits may be transferred from other accredited institutions or from non-degree status; these may be accepted only under limited conditions of time, grades earned, and relevance to the student’s program. Foreign language course credit is not eligible for transfer.

Foreign Language Requirements

In most degree programs, a candidate for the master of arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, academic credit, and options for fulfilling the language requirement.

Capstone/Thesis Option

Every student must successfully complete a capstone or, with approval of the program director, a thesis near the conclusion of the master’s program. For the capstone, the student must have a 3.0 grade-point average and must have completed or registered for 30 credits. If there is a lapse of time between completion of other course work and the capstone, the student must be continuously enrolled during this period. A student who fails to complete successfully the capstone may repeat it with the permission of the dean. If the student fails a second time, no further opportunity to complete the capstone will be permitted and the degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis, in addition to the capstone, if they qualify by having a minimum 3.5 grade-point average for at least 20 credits of course work or a minimum of 40 credits of graduate course work, which includes a capstone project. By the end of the first semester in residence, candidates for the degree are required to submit to the Office of Academic Advising and Student Services for final approval a plan of study that includes fields, supporting course work, and any other required information as endorsed by the program director. Degrees are awarded after the student has completed the required course work, an acceptable capstone project, and satisfied the foreign language requirement (if relevant).

The thesis subject should be selected as early as possible so as to permit effective integration with the student’s course work. A student will not be permitted to register for (IAFF 6998 Thesis-IAFF 6999 Thesis) until the thesis subject has been formally submitted to the Office of Academic Advising. The subject must be approved by the member of the full-time faculty under whom the thesis is to be written, a second member of the faculty who will serve as a reader, and the student’s program director. The thesis in its final form must have the approval of the thesis director and one other reader. All theses must be submitted electronically by May 1 prior to the student’s final academic year and meet the formatting and other requirements set forth at GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds).
Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

GSEHD DOCTORAL PROGRAMS

The Degree of Doctor of Philosophy

A PhD in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

The doctor of philosophy (PhD) in education degree program is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address issues, scholars require both a strong foundation in education as well as theoretical and disciplinary grounding in multiple disciplines. The PhD program is distinguished by four characteristics: candidates apply to a cross-disciplinary research team that is focused on a critical problem related to education; approaches to the research problems require a cross-disciplinary lens; students engage in research throughout their program; and candidates aspire to careers in which the production of research is paramount.

Admission Requirements

A master’s degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant’s past achievements, perceived potential, and fit to the goals and mission of the program.

The Degree of Doctor of Education

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (EdD). These programs provide major fields of study in curriculum and instruction, special education, education policy, educational administration, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student’s program planning committee, coursework may be taken in or from other departments of the University and through the Consortium. All programs require a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations and on weekends.

Admission Requirements

The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the content area that supports his or her objective. This graduate work must be comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master’s degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy

The Doctor of Education program is divided into two stages: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master’s degree or the equivalent in part-time study.
coursework and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the EdD is 36 credits of coursework in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, coursework beyond the minimum is required.

In the precandidacy stage, all coursework in the program must be completed and the comprehensive examination passed. Coursework toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed between the doctoral student and a doctoral study advising team, generally consisting of two members of the program faculty.

The comprehensive examination is generally a two-day examination held each semester and taken upon completion of all precandidacy coursework. Students taking the examination must be registered for at least 1 credit in the semester it is to be taken, and must file an online application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

The candidacy stage of doctoral study begins after successful completion of the content coursework and the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of coursework listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to Proquest/UMI.

Detailed information on the EdD program and its administration is available in the GSEHD Doctoral Student Handbook (https://gsehd.gwu.edu/students). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

The George Washington University 2017-2018 Academic Bulletin
• Part I, is a written comprehensive examination based on the course content of STAT 6202 Mathematical Statistics II STAT 6213 Intermediate Probability and Stochastic Processes (administered by faculty of the Department of Statistics), and PUBH 6266 Biostatistical Methods (administered by the faculty of the Department of Epidemiology and Biostatistics). Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master’s-level courses as needed. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt will result in termination from the PhD program.

• Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student’s Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student’s readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation level research.

Upon successful completion of the required course work and both parts of the General Examination, the candidate will generally be recommended to the Associate Dean for Graduate Affairs of The Columbian College of Arts and Sciences (CCAS) for promotion to PhD Candidacy: the dissertation research. A candidate must file an approved dissertation research plan with the CCAS before being admitted to PhD Candidacy. Prior to completion of the General Examination, a student may register for at most 6 credits of BIOS 8999 Dissertation Research.

Consult with the Biostatistics program director or academic advisor for the dissertation guidelines.

Professional enhancement requirement (8 hours)

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student’s specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer’s Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through your department or advisor.

Students must submit documentation of professional enhancement activities to the Biostatistics academic advisor, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

PHD EPI GRADUATION REQUIREMENTS

Graduation Requirements

1. Program options: Students may choose either curriculum Plan A or curriculum Plan B for the Doctor of Philosophy degree in the field of epidemiology.

2. Graduate credit requirement: 72 graduate credits are required.

3. Prerequisites: Review official program guide for minimum prerequisite requirements for admission.

4. Comprehensive (General) exam
   a. A written comprehensive exam will be administered within 24 months from date of matriculation based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods, and PUBH 8419 Measurement in Public Health and Health Services. The exam is administered once per year in August.
   b. An oral presentation of the proposal for dissertation is made to the students’ Dissertation Research Committee. The Committee will determine the student’s readiness to pursue and complete the proposed research.

5. Dissertation: 12-21 credits of dissertation research are required. Students may register for up to 6 credits of PUBH 8999 Dissertation Research.

6. Grade point requirements: An overall GPA of 3.0 (B average) is required.

7. Time limit requirement: The degree must be completed in 8 years.

8. Transfer credit policy: Up to 24 credits from an applicable master’s program may be approved to be transferred to the doctoral program. Credits must have been earned from an accredited institution with a grade point average of B or better.

**SPH - GLOBAL ENVIRONMENTAL HEALTH OVERVIEW**

**Program Director** G. Gray  
**Practicum Director** S. McCormick

**Mission**

The mission of the master of public health (MPH) in the field of global environmental health degree program—a joint program between the Departments of Global Health and Environmental and Occupational Health—is to prepare students to work in resource-poor settings and apply analytic skills to prevent or lessen problems associated with environmental hazards for human health. The program has a particular focus on traditional environmental health hazards—a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://publichealth.gwu.edu/programs/global-environmental-health-mph) for additional information.
**SPH DRPH Core Competencies**

The Doctor of Public Health (DrPH) Program prepares professionals to assume national and international leadership positions in environmental and occupational health, global health, health behavior, and health policy. The field of public health provides unique insights into the complex interrelationships between health, politics, and human development. It enables professionals to address public health issues by marshaling research and analytic skills to develop innovative approaches to understand health and to promote and advocate for improved health outcomes. Upon completion of the Doctor of Public Health (DrPH), students will demonstrate ability in these core competencies:

- Analyze a public health problem and determine appropriate sources of data and methods for problem identification, program planning, implementation, monitoring, and evaluation
