DOCTOR OF PHILOSOPHY IN BUSINESS ADMINISTRATION

The doctor of philosophy in business administration is designed to prepare students who wish to pursue academic careers in business. The program consists of two major stages: the pre-candidacy stage and the dissertation stage. During the pre-candidacy stage, students complete coursework and a comprehensive examination, under the guidance of a committee of three faculty members (faculty advisory group). Upon admission to candidacy, students prepare, submit, and defend a dissertation.

Curriculum requirements

The doctoral curriculum involves two years of formal courses established by each Department and approved by the Doctoral Committee. Students take a minimum of 45 credits during their program (including core courses and a summer paper). Students should consult their Faculty Advisory Group about the required courses and electives for which they should register. The following 30 credits constitute the core requirements for the degree:
• Four required courses in research methods and quantitative analysis (12 credits).
• Four required doctoral seminars that cover important studies in the student’s area of interest (12 credits).
• An additional doctoral level seminar from outside the student’s area of interest (3 credits).
• A summer research paper during the first or first and second summer, as required by the student’s area of interest (3 credits).

The remaining 15 elective credits are chosen in consultation with the student’s faculty advisory group. Students should complete at least 39 credits within the first two years from matriculation, and the remaining 6 credits should be completed during the third year.

Policies for core courses

In general, all core courses should be doctoral courses, i.e., those at the 8000 level. All courses must be taken for letter grades. Required courses cannot be waived without substitution except in unusual circumstances as determined on a case-by-case basis. Examples of unusual circumstances include students holding a specialized master’s or doctoral degree where equivalent core courses were taken in a
particular area (such as statistics or mathematics). Students may petition the Associate Dean of Research and Doctoral Programs to substitute up to 12 credits of required courses with alternative courses approved by the faculty advisory group.

Comprehensive examination
After the student completes the coursework and the summer paper requirements, the faculty advisory group and department faculty administer a comprehensive examination. The format of the comprehensive examination is at the discretion of the advisory committee, subject to approval by the doctoral committee when evaluating the study plan. The comprehensive examination establishes the student’s mastery of the current and classic literature. The comprehensive exam can be written, in-class or take-home, and may include an oral component. Failure to pass the comprehensive examination in two attempts leads to termination from the program.

Dissertation
Following successful completion of the comprehensive examination, the student is considered a doctoral candidate, and may form a dissertation committee, and develop a dissertation proposal. During this stage, students prepare, submit, and defend a dissertation.

Other policies
All course work and required comprehensive examination must be completed within five years of matriculation. All program requirements must be completed within seven years of the date of matriculation.

The doctoral program is administered and supervised by the Associate Dean and the committee on doctoral studies. For more detailed information on the program, please see the Doctoral Program Handbook, available in the GWSB Doctoral Program Office.

Visit the program website (https://business.gwu.edu/academics/programs/doctoral) for additional information.

CERTIFICATE PROGRAMS

Post-Master’s Certificate Program for School of Business Alumni

The School of Business offers a post-master’s graduate certificate designed to assist master’s degree alumni of the school in keeping apace of an ever-changing business climate. Participants may undertake a 12-credit program of study in an existing School of Business field or from a series of specially designed program offerings. Further information is available from the Office of the Dean (https://business.gwu.edu/about-gwsb/meet-the-dean).

Graduate Certificate Programs
In addition, the School of Business offers graduate certificate programs of study in the following fields:

- Graduate certificate in accountancy (p. 469)
- Graduate certificate in business analytics (p. 468)
- Graduate certificate in business foundations (p. 470)
- Graduate certificate in business information systems (p. 470)
- Graduate certificate in business communications (p. 470)
- Graduate certificate in business foundations (p. 470)
- Graduate certificate in business analytics (p. 470)
- Graduate certificate in financial management (p. 471)
- Graduate certificate in hospitality management (p. 471)
- Graduate certificate in human capital (p. 472)
- Graduate certificate in innovation, creativity and entrepreneurship (p. 472)
- Graduate certificate in international business (p. 472)
- Graduate certificate in investments and portfolio management (p. 473)
- Graduate certificate in management leadership (p. 473)
- Graduate certificate in management of technology and innovation (p. 476)
- Graduate certificate in marketing and brand management (p. 474)
- Graduate certificate in nonprofit management (p. 474)
- Graduate certificate in project management (p. 475)
- Graduate certificate in responsible management (p. 475)
- Graduate certificate in sports management (p. 476)
- Graduate certificate in walkable urban development (p. 477)

GRADUATE CERTIFICATE IN BUSINESS ANALYTICS

The Master of Science in Business Analytics (MSBA) program offers a stand-alone graduate certificate in business analytics. The graduate certificate is available to current GWSB and GW graduate students as well as interested professionals who are not currently enrolled at the University. The credits earned for this certificate are directly transferable towards earning the MSBA degree for up three years after completion of the certificate.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-business-analytics) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits total, including 10.5 credits in required courses and 1.5 credits in an elective course.

GRADUATE CERTIFICATE IN BUSINESS INFORMATION SYSTEMS

This certificate provides an overview to the field of information systems. By formal definition information systems is “the study, design, development, application, implementation, support or management of computer-based information systems.” Any specific information system aims to support operations, management, and decision-making. An information system is the technology that an organization uses and the way in which people interact with this technology in support of business processes.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-business-information-systems) for additional program information.

GRADUATE CERTIFICATE IN HUMAN CAPITAL

The Graduate Certificate in Human Capital provides deep knowledge of the practices and research based disciplines of Human Capital and Human Resource Management. Participants learn how human capital contributes to the core strategy of an organization. Courses cover key areas associated with human resource competencies as well as knowledge associated with the psychology of people, organizations, and careers. Human capital theory is presented in a practical way, targeted towards HR generalists or non-human resource managers interested in understanding the strategic function of HR in organizations. The program builds on the strengths of GWSB in the areas of human capital development.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-human-capital) for additional program information.

Other Trachtenberg School of Public Policy and Public Administration nonprofit courses may be offered periodically. With prior approval of the field advisor, certain non-Trachtenberg School courses at GW may be counted toward the elective group.
GRADUATE CERTIFICATE IN PROJECT MANAGEMENT

The master of science in project management program (MSPM) is enhanced by its related graduate certificate in project management. The certificate is available to current GWSB students as well as those not enrolled in a graduate degree program. The certificate program is designed to provide students with detailed coverage of basic concepts and theories of project management and related skills, preparing students to succeed in a project environment. Up to the total 12 credits earned for the certificate may count toward requirements for the MSPM degree.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/graduate-certificate-project-management) for additional program information.

GRADUATE CERTIFICATE IN RESPONSIBLE MANAGEMENT

The graduate certificate in responsible management (CRM) program is designed to enhance the preparation of students as responsible leaders. Students participate in seminars, projects, courses, and service in a variety of topic areas, including global strategy, ethics, corporate social responsibility, international development, peace, energy, and the environment. These academic opportunities provide students with the knowledge, proficiencies, and skills needed to succeed as leaders in governmental, industry, and consumer oversight.

The CRM program is open only to GW graduate students. Students often begin the CRM program as early as their first semester and at least one year prior to graduation.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-in-responsible-management) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including one required 3-credit course, one required 0-credit course, and 9 credits in elective courses.

In addition to completing curriculum requirements, students are expected to:

- Attend two seminars, panel discussions, conferences, or other events related to the CRM mission, and write a short summary of each event;

- Complete 20 hours of extracurricular activities by participating in a qualifying student organization and/or performing community service; and,

- Complete a research paper that examines one or more CSR issues as described in a corporation’s sustainability report. The research project is submitted as a 10-page paper and a 10-minute PowerPoint presentation.

**GRADUATE CERTIFICATE IN SPORTS MANAGEMENT**

The sport and recreation industry is estimated to be almost $500 billion with more than $60 billion derived from professional sports alone. The industry includes the management and marketing of youth to professional sport organizations and athletes as well as sport media, sporting goods, health/sport clubs, and venues. The graduate certificate in sport management helps prepare student to enter all areas of the field with a strong understanding of sport marketing, sport media, sport law, and sport facilities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-in-responsible-management) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits in required courses.

**GRADUATE CERTIFICATE IN MANAGEMENT OF TECHNOLOGY AND INNOVATION**

This graduate certificate program provides a broad treatment of the management of science and technology as well as innovation. The curriculum focuses on the management of organizations and the professional workforce involved in conceiving, developing, and delivering products and services involving technology of all kinds.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/graduate-certificate-management-technology-innovation) for additional program information.

**GRADUATE CERTIFICATE IN WALKABLE URBAN DEVELOPMENT**

The graduate certificate in walkable urban development program provides coursework in the practical foundations of walkable urban real estate development and place management. Real estate development in the United States has been transitioning from building and financing single-use properties in the suburbs to building, financing, and managing complex mixed-use projects in walkable urban cores. This program provides students with the tools necessary to finance, develop, and manage these emerging communities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://business.gwu.edu/academics/programs/certificate/walkable-urban-real-estate-development) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits, including one 3-credit required course and 9 credits in selected courses.

**ACCOUNTANCY**

The GW School of Business’ bachelor of accountancy and master of accountancy degree programs prepare students to make significant contributions to both private and public organizations in the global economy. In addition to a rigorous program of study, students gain practical experience through internships and the opportunity to study the stock market in a classroom outfitted like a Wall Street trading venue. The faculty coordinates access to executives in high-profile firms and agencies and government officials to help students further their exposure to, and training in, the discipline.

Visit the department website (p. 477) for more information.

**UNDERGRADUATE**

**Bachelor's program**
- Bachelor of Accountancy (p. 436)
- Bachelor of Business Administration (p. 444)

**Combined programs**
- Combined Bachelor of Accountancy and Master of Accountancy (BAccy/MAccy) (p. 457)
- Combined Bachelor of Business Administration and Master of Accountancy (BBA/MAccy) (p. 457)

**GRADUATE**

**Graduate Certificate**
- Graduate Certificate in accountancy (p. 469)

**Master's program**
- Master of Accountancy (p. 458)

**FACULTY**

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Introduction to Financial Accounting. 3 Credits.
Fundamental concepts underlying financial statements and the informed use of accounting information; analysis and recording of business transactions; preparation and understanding of financial statements; measurement of the profitability and financial position of a business. Restricted to sophomores.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.
The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders’ equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisites: ACCY 3101 or permission of instructor.

ACCY 3106. Financial Statement Analysis. 3 Credits.
Introduction to the analysis and interpretation of corporate financial statements within the context of a company’s industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.
A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.
Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 and ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.
Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.
A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.
Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.
Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.
Assigned topics. Admission by permission of the department chair.
ACCY 6101. Financial Accounting. 3 Credits.
The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.
Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Restricted to School of Business graduate degree students. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.
Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.
Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6110. International Reporting and Control. 1.5 Credit.
International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.
Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisites: ACCY 6101 and MBAD 6211. (Same as IBUS 6310).

ACCY 6201. Cases in Management Accounting I. 1.5 Credit.
Effective use of internal generation, communication and interpretation of information for both operational and strategic decision-making purposes. Prerequisites: ACCY 6101 and MBAD 6211. (Same as MBAD 6213).

ACCY 6202. Cases in Management Accounting II. 1.5 Credit.
Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisites: ACCY 6201 and MBAD 6213.

ACCY 6203. Controls, Alignment and the Organization. 1.5 Credit.
This course looks at the role accounting plays in decision making and control issues within organizations. Good decisions require good information: accounting provides information on budgets, costs, inventory and financial statements. Control involves aligning the interests of employees with interests of the shareholders. Performance measures, compensation and incentive contracts and internal audit constitute important control mechanisms.

ACCY 6204. Managerial Accounting for Government and Nonprofits. 1.5 Credit.
Builds on basic understanding of managerial accounting concepts and examines issues in the government and nonprofit realm; leveraging core concepts to analyze and report on real world scenarios. Prerequisite: None.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.
A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Corequisite: ACCY 6104. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.
Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisites: ACCY 6101 and MBAD 6211. Recommended background: One auditing course.

ACCY 6401. Federal Income Taxation. 3 Credits.
A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.
Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.
Overview of the economics and taxation of financial instruments; transactions in stock, debt instruments, commodities, options, short sales, wash sales, straddles, futures, foreign currency transactions, swaps, hedging, mark to market tax accounting, and time value of money. An equivalent course may be substituted for prerequisite ACCY 6101. Prerequisites: ACCY 6101 and ACCY 6401.
ACCY 6501. Accounting Information Systems and EDP. 3 Credits.
Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.

ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.
The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

ACCY 6900. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.
Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

MASTER OF ACCOUNTANCY

GW’s 30-credit master of accountancy (MAccy) degree program is tailored to the student’s individual interests and career objectives in accounting, financial management, and tax practice. In addition to required courses in accounting, finance, and economics, students can choose from a wide range of specialized accounting subjects and other topics to help them prepare for their professional certification. If not completed prior to matriculation, students might be required to take prerequisite courses while in the program. No business background is necessary prior to joining the program.

The MAccy may be pursued on a full-time or part-time basis. Day and evening classes are available to accommodate working professionals, although prior work experience is not required.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://business.gwu.edu/current-students-2/specialized-masters-programs/macy-degree-requirements) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 15 credits in required courses and 15 credits in elective courses.

In addition, students must fulfill preparatory courses in financial accounting, managerial accounting, micro- or macroeconomics, and statistics.

Electives
15 credits in elective courses, including 9 credits in accountancy (ACCY) courses.

Students who intend to take the C.P.A. examination should be aware that the coursework required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy for the state in which they plan to take the examination and choose electives that meet that state’s requirements.

Preparatory courses may be waived without substitution for other coursework. Required classes, except for ACCY 6201 and ACCY 6202, may be waived with substitution for other coursework for students who:

- Have already completed these courses with a minimum grade of B-
- Have taken these courses at an AACSB - accredited institution
- Have taken these courses within five years prior to the first semester of enrollment into the program

Students should consult with the advisor concerning course substitution.

DECISION SCIENCES

UNDERGRADUATE

Bachelor's program
- Bachelor of Business Administration (p. 444)

Combined programs
- Dual Bachelor of Business Administration and Master of Science in the Field of Business Analytics (p. 457)
- Dual Bachelor of Business Administration with a Major in Project Management and Master of Science in the Field of Project Management (p. 457)

GRADUATE

Master's programs
- Master of Science in Business Analytics (p. 459)
- Master of Science in Project Management (p. 461)

FACULTY

Associate Professors P. Delquie (Teaching), S. Jain (Teaching), H. Khamooshi (Teaching), A. Jarrah, S. Kanungo (Chair), Y.H. Kwak, S.Y. Prasad,

Assistant Professors M. Altug, J.S. Kettunen, M.E. Matta (Teaching)

EXPLANATION OF COURSE NUMBERS

Courses in the 1000s are primarily introductory undergraduate courses.
Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.
Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students.
The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

DNSC 1001. Business Analytics I: Statistics for Descriptive and Predictive Analytics. 3 Credits.
Foundations of probability and statistical methodologies used in business analytics; probability laws, probability models, univariate and bivariate models and their applications, sampling, hypothesis testing, contingency table analysis, simple and multiple linear regression models.

DNSC 2001. Business Analytics II: Predictive and Prescriptive Analytics. 3 Credits.
Builds on the foundations of probability and statistical methodologies covered in DNSC 1001. Categorical data analysis; design of experiments and analysis of variants (ANOVA); multiple regression; parameter estimation and testing; residual analysis; indicator variables; model selection procedures; logistic regression; and applications of optimization models. Prerequisites: DNSC 1001 or STAT 1051 or STAT 1053 or STAT 1111.

DNSC 3401. Introduction to Business Analytics. 3 Credits.
Fundamentals of business analytics: what information it provides, how and when that information is used, and how it affects decision making. Working with uncertainty; understanding the dynamic nature of decision making; using data, regardless of its size; and making decisions with incomplete data. The simulation of real-life scenarios to support optimal decision making. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111.
DNSC 3402. Data Mining. 3 Credits.
The practice of exploring and discovering actionable business intelligence from large amounts of data; concepts, methods, and tools; supervised and unsupervised data mining techniques for discovering relationships in large data sets and building predictive models; regression models, decision trees, neural networks, clustering, and association analysis. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111; Math 1231 or Math 1252.

DNSC 3403. Decision Models. 3 Credits.
Design and develop decision models, using Excel and specialized decision support add-ins, and effectively interpret the models' outputs. Equivalent courses may be substituted for the prerequisites. Prerequisites: DNSC 1001 and DNSC 2001.

DNSC 4211. Programming for Analytics. 3 Credits.
Handling and preparing data for business analytics; descriptive, predictive and prescriptive analytics; creating data stories in collaboration with and for end users and information consumers; scripting, publishing, and collaborating for data products. Prerequisites: DNSC 1001 and DNSC 2001. Recommended background: Some prior knowledge of a programming.

DNSC 4279. Data Mining. 3 Credits.
The practice of exploring and discovering actionable business intelligence from large amounts of data. Equivalent courses may be substituted for prerequisites DNSC 1001 and DNSC 2001. Prerequisites: DNSC 1001 and DNSC 2001; and Math 1231 or Math 1252.

DNSC 4403. Decision Models. 3 Credits.
Design and development of decision models using spreadsheet software with decision support add-ins; interpreting decision model outputs; commonly used classes of models; decision analysis spanning business disciplines. Restricted to juniors and seniors.

DNSC 4404. Essentials of Project Management. 3 Credits.
Theoretical foundations of and practical insights into project management; the role of project management in contemporary business and government organizations; the link between projects and strategy. Project design and development.

DNSC 4900. Special Topics. 0-3 Credits.

DNSC 6201. Introduction to Business Analytics. 1.5 Credit.
An introduction to business analytic concepts, methods, and tools with concrete examples from industry applications; Big Data and the opportunities it has created for businesses to store, organize, and analyze vast amounts of information. Completion of a basic course in statistics prior to enrollment is recommended.

DNSC 6202. Statistics for Managers. 3 Credits.
Mathematical and statistical concepts employed in the solution of managerial problems. Applications of functions, elements of calculus, and linear algebra. Introduction to probability, frequency distributions, statistical inference, and regression and correlation.

DNSC 6203. Statistics for Analytics I. 1.5 Credit.
The foundations of statistical methodologies used in business analytics; statistical inference and probability models; methods of estimation, hypothesis testing, contingency table analysis, analysis of regression models and logit and probit analysis. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission.

DNSC 6206. Stochastic Fndn: Prob Models. 1.5 Credit.

DNSC 6207. Applied Probability Models. 1.5 Credit.

DNSC 6208. Computational Optimization. 3 Credits.

DNSC 6209. Forecasting for Analytics. 1.5 Credit.

DNSC 6210. Decision and Risk Analytics. 1.5 Credit.
Concepts, methods, and practical tools to analyze managerial decisions involving risk and uncertainty. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. DNSC 6206 and DNSC 6203; and DNSC 6202 OR MBAD 6224 Restricted to students in the master of science in business analytics degree program or with program approval. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 OR MBAD 6224.

DNSC 6211. Programming for Analytics. 3 Credits.
Accessing, preparation, handling, and processing data that differ in variety, volume, and velocity. The ability to handle and process data is a core capability in the context of any analytics position in the industry. Development of a theoretical grounding in emerging paradigms like schema-less data. The programming environments typically employed include Python and R.

DNSC 6212. Optimization Methods and Applications. 3 Credits.
Linear, network, integer, and nonlinear models and their fundamental underlying analytic concepts and solution methods; model development, formulation, solution and interpretation of results using powerful commercial software; intuitive understanding of solution methods and their underpinning theoretical paradigms for effective use of optimization models. Restricted to students in the master of science in business analytics degree program or with the permission of the instructor.

DNSC 6213. Statistics for Analytics II. 1.5 Credit.
Statistical methodologies for business analytics in real world scenarios; introduction of high-level analytical techniques such as hierarchical linear modeling and mixed-effects modeling. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with permission of the departmental. Prerequisite: DNSC 6203.

DNSC 6214. Pricing and Revenue Management. 1.5 Credit.
Methodologies for addressing pricing issues; tactical optimization of pricing and capacity allocation decisions; quantitative models of consumer behavior and constrained optimization. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.
DNSC 6215. Social Network Analytics. 1.5 Credit.
Concepts, methods, and applications of network science; Analyzing real networks and related phenomena such as disease propagation, organizational analysis, social power, and fraud detection. Exposure to Python and R scripts prior to enrollment is recommended.

DNSC 6216. Business Analytics Skills Workshops. 0-1.5 Credits.
A series of workshops covering project management techniques for analytics projects, team dynamics skills, communicating quantitative information, and ethics, security, and privacy policies in analytics.

DNSC 6217. Business Analytics Practicum. 1.5 Credit.
Working in small teams, students apply their analytics skills to projects sponsored by public or private institutions. Each team is advised by a faculty member, and the practicum sponsor designates a mentor to provide guidance to the team for the duration of the project. Prerequisite: MSBA degree candidacy.

DNSC 6219. Time Series Forecasting for Analytics. 3 Credits.
Predictive analysis and blackbox models for time series and econometric forecasting; identifying hidden patterns and structures in the univariate and multivariate time series data and exploiting these for forecasting; use of SAS to apply different forecasting models and methodologies to real life time-series data. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Restricted to students in the master of science in business analytics degree program or with program approval. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.

DNSC 6225. Business Process Simulation. 1.5 Credit.
Introduction to the compromises and limitations involved in business process design; basic tools used to analyze and improve processes; simulation models using a powerful discrete-event simulation tool. Restricted to students in the master of science in business analytics degree program; program approval may be substituted. Prerequisites: DNSC 6202.

DNSC 6230. Management of Technology Innovation. 3 Credits.

DNSC 6234. Procurement and Contracting. 3 Credits.
Principles and concepts essential to effecting large procurement programs. Planning, sourcing, and contractual design for diverse acquisitions. Emphasis on federal government policy with comparison of buying at other governmental levels and the private sector.

DNSC 6235. Communication Strategies in Project Management. 3 Credits.
Communication leadership and management practices that facilitate successful project management; strategies and practices related to communication, change management, and performance reporting.

DNSC 6236. Project Quality Management. 3 Credits.
Current theories and practices regarding quality management as applied to manufacturing and the service industry, the application to project systems, and the application to individual projects. Prerequisite: None.

DNSC 6237. International Project Management. 1.5 Credit.
Augments the basics of project management with theory, practice, and methodology related to global project environment; practical investigation of the cultural environment in the context of managing global projects.

DNSC 6238. Project Management and Organizational Context. 1.5 Credit.
Organizational influences on project management practices; definition and classification of organizations; organizational culture; organizational strategy; project management practices that take place during initiation, planning, execution, monitoring and controlling, and closing processes.

DNSC 6239. Project Governance. 1.5 Credit.
An overview of project governance; models, practices and case studies.

DNSC 6247. Organization, Management, and Leadership. 3 Credits.
Fundamentals of human resource management for project managers. Tools and techniques for success in managing and leading people in a project environment.

DNSC 6250. Project Management Finance. 3 Credits.

DNSC 6251. Optimization Models for Decision Making. 1.5 Credit.
Optimization modeling techniques, including linear programming, sensitivity analysis, networks, integer programming, multiple objective optimization, and nonlinear and evolutionary programming. Prerequisites: DNSC 6202 or MBAD 6224.

DNSC 6252. Risk Analysis for Decision Making. 1.5 Credit.
Probabilistic modeling techniques with spreadsheet implementation, focusing on the concept of risk and methods for its analysis; risk attitudes, risk measures, decision trees, simulation models, game theory, real options approach, and risk communication. An equivalent course may be substituted for the prerequisite. Prerequisites: DNSC 6202 or DNSC 6244.

DNSC 6254. Risk Management. 1.5 Credit.
Basic principles of risk management practices. Developing a risk management plan, including identifying, analyzing, mitigating, and monitoring projects risks. Prerequisites: DNSC 6202 or MBAD 6224 or MBAD 6221, MBAD 6222.

DNSC 6257. Cost Estimation and Control. 1.5 Credit.
Methods of developing project estimates during the planning stages and updating the estimates throughout the life of the project; monitoring, reporting, controlling, and managing project cost; relationships between project cost and other parameters, including scope, time, quality, reliability and procurement risk. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.
DNSC 6258. Executive Decision Making. 1.5 Credit.
Concepts and methods for making complex decisions in business and government; identifying objectives and alternatives, setting priorities, and making collaborative decisions.

DNSC 6259. Project Portfolio Management. 1.5 Credit.
Management of an organization's portfolio of projects for the overall success of the enterprise; alignment of projects with an organization's strategy and goals and consistency with values and culture. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6261. Introduction to Project and Program Management. 3 Credits.
Practical examination of how projects can be managed from start to finish, including specific emphasis on planning and controlling to avoid common pitfalls. Identifying needs, defining requirements, project costing, scheduling, resource allocation, and project politics.

DNSC 6262. Directed Computational Project Management. 3 Credits.
Practical examination of project management concepts by quantitative application using various software tools. Research in real cost data to support project calculations. Prerequisite: DNSC 6254, DNSC 6257, DNSC 6261, DNSC 6267.

DNSC 6263. Managing External Projects. 3 Credits.
Fundamentals of contract management from a project manager’s perspective. The outsourcing process, associated project strategies, and legal elements. Acquisition planning, vendor selection, contract formulation, and performance control.

DNSC 6267. Planning and Scheduling. 3 Credits.
Integrated planning, scheduling, and control systems for planning the scope of a project; optimizing time, cost, and resources; and monitoring and controlling schedules, including those for delayed projects. Prerequisites: DNSC 6202 and DNSC 6261.

DNSC 6269. Project Management Application. 3 Credits.
Students are expected to demonstrate integration of the knowledge accumulated in their study plan and apply integrated knowledge and experience to best practices, a project case history, and a handbook. Prerequisites: MSPM candidacy or permission of instructor/advisor.

DNSC 6274. Statistical Modeling and Analysis. 3 Credits.
The process of specifying, analyzing, and testing models of human and systemic behavior. Formalization of models; statistical test comparison and selection; computer implementation of univariate, bivariate, and multivariate tests. General linear model: linear regression, analysis of variance, and analysis of covariance. Prerequisite: MBAD 6221 and MBAD 6222.

DNSC 6275. Advanced Statistical Modeling and Analysis. 3 Credits.
Advanced topics associated with the general linear model. Testing for and remediation of assumption violations. Detection of outliers, influential observations, and multicollinearity. Alternative design strategies in the analysis of variance; latent growth analysis; hierarchical linear modeling; testing for interactions and parallelism. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6276. Exploratory and Multivariate Data Analysis. 3 Credits.
Methods for exploratory and multivariate data analysis. Application and comparison of advanced multivariate analytical procedures. Multivariate and discriminant analysis, LISREL analysis, and canonical correlation. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6277. Applied Forecasting and Time-Series Analysis for Managers. 3 Credits.
Introduction to various forecasting techniques, including time-series regression models, cyclical trends, exponential smoothing methods, seasonal and nonseasonal ARIMA processes, and the Box-Jenkins approach. Application of forecasting methods in economics, finance, and marketing. Prerequisite: MBAD 6222 or permission of instructor.

DNSC 6278. Big Data Analytics. 3 Credits.
Practical workshop focusing on the use of cloud computing resources for analysis and manipulation of datasets; Hadoop ecosystem, Spark and MapReduce, and other tools. Permission of the instructor may substitute for the prerequisites. Prerequisites: DNSC 6211 and ISTM 6212. Recommended background: Understanding and experience with Linux/OSX; programming concepts; R, Python, SQL or other programming language; remote computing via ssh; shell executables; version control tools such as git/github.

DNSC 6279. Data Mining. 3 Credits.
How organizations make better use of the increasing amounts of data they collect and how they convert data into information that is useful for managerial decision making. Examination of several data mining and data analysis methods and tools for exploring and analyzing data sets. State-of-the-art software tools for developing novel applications.

DNSC 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

DNSC 6298. Directed Readings and Research. 0-3 Credits.

DNSC 6300. Thesis Seminar. 3 Credits.

DNSC 6401. Sustainable Supply Chains. 1.5 Credit.
Introduction to integrating environmental management and sustainability concepts into the operations and supply chain management fields.
FINANCE

UNDERGRADUATE

Bachelor's programs
- Bachelor of Business Administration (p. 440)
- Bachelor of Science with a major in finance (p. 452)

GRADUATE

Master's program
- Master of Science in the field of finance (p. 459)

FACULTY

Professors W. Handorf, G.M. Jabbour, G. Jostova, M.S. Klock, R. Van Order

Associate Professors S. Agca, A. Baptista, N.G. Cohen, T. Geurts (Teaching), B.J. Henderson, M. Hwang, R. Savickas (Chair), A.J. Wilson

Assistant Professors V. Bhagwat, Rodney Lake (Teaching), J. Lee, M. Medlej (Teaching), B.K. Renganatharaja

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MBAD 6234 Financial Management is prerequisite to FINA 6221 Financial Decision Making through FINA 6248 Real Estate Development Cases.

FINA 3001. Intermediate Finance. 3 Credits.
Theory and practice of acquiring and using funds. Simulations of business decisions by cases and/or models to assess the risk/return interaction of investment, financing, and dividend decisions. Prerequisite: BADM 3501.

FINA 3101. Investment and Portfolio Management. 3 Credits.
Theory and principles of security analysis and portfolio management, including analysis of the national economy, industry, company, and security markets. Risk-reward and computer-aided analysis. Prerequisite: BADM 3501.
FINA 3201. Exploring Finance with Simulation. 3 Credits.
Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Prerequisite: BADM 3501.

FINA 3201W. Exploring Finance with Simulation. 3 Credits.
Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BADM 3501.

FINA 3301. Money and Capital Markets. 3 Credits.
The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 3401W. A Brief History of Finance. 3 Credits.
History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues.

FINA 3401. A Brief History of Finance. 3 Credits.
History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4001. Advanced Financial Management. 3 Credits.
Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4001W. Advanced Financial Management. 3 Credits.
Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.
Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance with Simulation. 3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4201. Real Estate Investment. 3 Credits.
Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.
The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4995. Independent Study. 1-15 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 6220. Business Financial Management. 3 Credits.
Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm’s market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.
Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6223. Investment Analysis and Portfolio Management. 3 Credits.
Risk-reward analysis of security investments, including analysis of national economy, industry, company, and market; introduction to portfolio management; emphasis on theory and computer methods. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6224. Financial Management. 3 Credits.
Advanced case studies in domestic and international financial management; working capital policy, capital budgeting, financing with debt and equity, dividend policy, valuation, project finance, venture capital, and mergers and acquisitions. Prerequisites: MBAD 6234 or MBAD 6235.
FINA 6230. Urban Development Economics. 3 Credits.
FINA 6231. Seminar: Investment and Portfolio Management. 3 Credits.

FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.
Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

FINA 6236. Options. 3 Credits.
Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.
Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.
Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.
Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: MBAD 6234 or MBAD 6235 and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.
Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.
Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.
Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6245. Land Development Law. 3 Credits.
FINA 6247. Urban Development Economics. 3 Credits.
FINA 6248. Real Estate Development Cases. 3 Credits.
Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6249. Real Estate Valuation and Investment. 3 Credits.
Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.
Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.
Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.
Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.
Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.
FINA 6274. Corporate Financial Management and Modeling. 4 Credits.
Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm’s common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.
Financial markets and instruments viewed from the investor’s perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.
Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.
Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.
Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.
Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.
Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.
Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 0-4 Credits.
Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.
Same as IBUS 6297/MGT 6297/MKTG 6297/SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.
FINA 6299. Thesis Seminar. 3 Credits.
FINA 6999. Thesis Research. 3 Credits.

FINA 8311. Seminar: Public and Private Sector Institutions and Relationships. 3 Credits.
An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

FINA 8321. Seminar: Financial Markets Research. 3 Credits.
Market efficiency, utility testing, the capital asset pricing model, the arbitrage pricing theory, the option pricing model, and aggregate market volatility.
FINA 8322. Seminar: Corporate Finance Research. 3 Credits.
Capital budgeting, capital structure issues, dividend policy, microeconomic foundations, mergers, and agency theory.

FINA 8323. Seminar: Continuous-Time Finance. 3 Credits.
Review of the stochastic calculus methods needed for continuous-time pricing models. The most important continuous-time models, including pricing of derivative securities, consumption-portfolio selection models, continuous-time capital asset pricing models, consumption-based capital asset pricing models, continuous-time arbitrage pricing theory, and different yield curve models.

FINA 8324. Seminar: Financial Markets and Institutions. 3 Credits.
Multi-period asset pricing, term structure of interest rates, market imperfections and institutional factors, auctions, manipulation, derivative markets, market microstructure, and financial institutions.

FINA 8397. Doctoral Seminar. 1-3 Credits.

FINA 8998. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

FINA 8999. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

INFORMATION SYSTEMS AND TECHNOLOGY MANAGEMENT

UNDERGRADUATE

Bachelor's program
• Bachelor of Business Administration with a concentration in information systems and technology management (p. 440)

Combined program
• Dual Bachelor of Business Administration and Master of Science in Information Systems Technology (p. 492)

GRADUATE

Master's program
• Master of Science in Information Systems Technology (p. 460)

Combined program
• Dual Master of Business Administration and Master of Science in Information Systems Technology (p. 492)

FACULTY

Professors  E.G. Carayannis, V. Choudhury, M.J. Granger

Associate Professors  J. Artz, S. Dasgupta, R.G. Donnelly (Chair), W. Duan, R.A. Lumley

Assistant Professors  Y.C. Ho, Y. Lu, Y. Park, Z. Sun

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MSIST candidacy or departmental approval is prerequisite to ISTM 6201 Information Systems Development and Applications-ISTM 6225 Enterprise Architecture.

ISTM 3119. Introduction to Programming. 3 Credits.
Introductory course in writing simple computer programs using Python; data-analytic thinking and business applications through hands-on practices. No prior knowledge or experience in programming is required.

ISTM 4120. Business Systems Development. 3 Credits.
Analysis, design, and implementation of management information systems (MIS). Structured methodologies and techniques for various stages of the MIS development process. Computer-aided software engineering tools. May be taken for graduate credit with permission of the program director and instructor. Prerequisites: CS 1111 or ISTM 3119; or permission of the instructor.

ISTM 4121. Database Principles and Applications. 3 Credits.
Theory, architecture, and implementation of database management systems in corporate and organization information systems; fundamental concepts of database management and processing; hands-on experience with database management packages. Prerequisites: CS 1111 or ISTM 3119; or permission of the instructor.

ISTM 4123. Business Data Communications. 3 Credits.
A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.
ISTM 4123W. Business Data Communications. 3 Credits.
A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BADM 2301.

ISTM 4130W. Writing On The Ethics of Technology. 3 Credits.
Complex ethical dilemmas inherent in the introduction of new technologies and the influence human behavior asserts on these problems. Students write stories to explore and evaluate specific ethical problems relative to technology from various perspectives. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ISTM 4215. Human-Computer Interaction. 3 Credits.
An introduction to and overview of the field of human-computer interaction (HCI), an interdisciplinary field that integrates theories and methodologies from computer science, cognitive psychology, design, and other areas. Readings cover current theory and practice in interface specification, design, and evaluation, and include current and classic research papers in the field.

ISTM 4223. Innovation Ventures. 3 Credits.
Process of innovation entrepreneurship used to launch and build new ventures; technology ventures; organizing for innovation, raising venture capital, wealth creation, managing the growing innovation venture, marketing technology products and services. Students enrolled at the graduate level are expected to do additional work. (Same as ISTM 6223).

ISTM 4233. Emerging Technologies. 3 Credits.
New developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space; forecasting technological advances and assessing their economic and social effects. Students enrolled at the graduate level are expected to do additional work. (Same as ISTM 6233).

ISTM 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ISTM 4995. Independent Study. 3 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

ISTM 6200. Python Program Database Applications. 3 Credits.
Introduction to Python programming language, Structured Query Language (SQL), relational database design, data wrangling, and rudimentary data analysis.

ISTM 6201. Information Systems Development and Applications. 3 Credits.
The information systems life cycle evaluated in terms of technologies, impact, and management. Structured and object-oriented analysis, prototyping, software reuse, testing, life-cycle costs, software development environments, and organizational and behavioral aspects of development projects. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6202. Relational Databases. 3 Credits.
Introduction to the theory of relational databases and commences an in-depth discussion of Relational database theory and design at the conceptual, logical, and physical levels. Structured query language (SQL) is covered in depth. Completion of an undergraduate database course with a grade of B or above may be accepted for the prerequisite. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 4121 or ISTM 6200.

ISTM 6203. Telecommunications and Enterprise Networks. 3 Credits.
The technologies and applications of telecommunication systems in the commercial and public sectors with emphasis on wireless, mobile, and Internet communication protocols. Systems technology and configurations to support business application requirements. Functional characteristics of network technologies. Restricted to students in the MS in information systems technology program or permission of the department.

ISTM 6204. Information Technology Project Management. 3 Credits.
Project and program management practices with an emphasis on information technology projects. The basic tools of project management: work breakdown structure, cost, schedule and performance goal setting, and risk analysis. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6205. Internet Computing. 3 Credits.
Concepts, architectures, frameworks, and technology of web application development; the Internet as hardware and software architecture for creating business applications; web and web application servers, system development methods and techniques, client-side and server-side scripting. Completion of an undergraduate database course with a grade of B or above may be accepted for the prerequisite. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 3119 or ISTM 6200.
ISTM 6206. Information Systems Security. 3 Credits.
Comprehensive examination of computer security issues from the design, management, and business information system ownership perspectives. System security concepts, methods, and policies from the design and planning stages to multi-level system implementation. Design of risk assessment strategies to achieve security goals. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6207. Information Resources Management. 3 Credits.
Information resources management strategically assesses and exploits information technology assets for competitive advantage. The CIO role in information resources management, planning, security, information integration, enterprise model development, and data administration.

ISTM 6209. Web and Social Analytics. 3 Credits.
Concepts, techniques, and tools of collecting, analyzing, and reporting digital data concerning how users interact with organizations through the Internet and social media; business intelligence; key performance indicators; new business models. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6210. Integrated Information Systems Capstone. 3 Credits.
Students apply conceptual and technical knowledge in analyzing, planning, and designing an online information system. Culminates with system proposal/design presentations. Restricted to students in their final semester in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 6201, ISTM 6202, ISTM 6204, ISTM 6205, ISTM 6206 and ISTM 6209.

ISTM 6211. Data Warehousing and Online Analytical Processing. 3 Credits.
Introduction to the theory of data warehousing, dimensional data modeling, and online analytical processing (OLAP) through case studies, technology, and a design project. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisite: ISTM 6202.

ISTM 6212. Data Management for Analytics. 3 Credits.
Relational databases, data warehousing, and dimensional modeling. Practical experience with these and other traditional and contemporary methods for managing and analyzing data at scale, including Unix command line and Apache Spark.

ISTM 6213. Enterprise Web and Database Applications. 3 Credits.
Enterprise applications concepts, architecture, and technologies for emerging technologies and IT frameworks. The Internet as a major resource for globally distributed applications using grid and utility computing. Web servers, development methods and techniques, data stores for massively distributed applications, and client/server side scripting. Restricted to students in the MS in information systems technology program or with permission of the department. Prerequisites: ISTM 6202 and ISTM 6205.

ISTM 6214. Advanced Programming and Business Applications. 3 Credits.
Advanced programming design, development, and analysis topics with an emphasis on business applications. Problem modeling and development of algorithm solutions. Basic data structures and algorithms, such as linked list, stack and tree, graph theory, sorting and searching. Restricted to students in the MS in information systems technology program or with permission of the department.

ISTM 6215. Human-Computer Interaction. 3 Credits.
Human–computer interaction as an interdisciplinary endeavor integrating theories and methodologies from computer science, cognitive psychology, design, and many other areas. Theory and practice in interface specification design and evaluation, and research.

ISTM 6221. Management Perspectives in Electronic Commerce. 3 Credits.
The tools, skills, and business concepts surrounding the emergence of E-commerce and its information technologies from operational and strategic perspectives. E-commerce security, privacy, content selection and rating, encryption, acceptable use policies, intellectual property rights, and legal liabilities.

ISTM 6222. IS/IT Strategy and Implementation. 3 Credits.
The development and implementation of information systems and technology strategies designed to align with and maximize business strategy applications and approaches in a challenging and increasingly global business environment.

ISTM 6223. Technology Entrepreneurship. 3 Credits.
Case studies on the innovation-entrepreneurship processes used to launch and build new ventures based on information technology and on technology more broadly. Organizing for innovation, raising venture capital, managing the small technology-based venture, marketing technology products and services, intellectual property considerations, and new venture proposal development.
ISTM 6224. Management of Technology and Innovation. 3 Credits.
Business, technological, economic, and political factors that influence the development and deployment of new technology products, processes, and services. Concepts and practices useful in managing technology and enhancing corporate innovation, corporate organizational alternatives, new approaches, and sources of competitive advantages.

ISTM 6225. Enterprise Architecture. 3 Credits.
Concepts of enterprise architecture as a management tool for organizations to align their information technology assets, people, operations, and projects with operational characteristics. Service-oriented architectures, performance reference models, configuration management, system development life cycles, and tiered application architectures.

ISTM 6226. Principles of Information Systems. 3 Credits.
Overview of all information systems, including integration of management, information, and systems concepts into a unified framework. Management information systems development, design, implementation, evaluation strategies.

ISTM 6233. Emerging Technologies. 3 Credits.
Exploration of new developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space. Emphasis on forecasting these technological advances and assessing their economic and social effects. The role of advancing technology in driving social change.

ISTM 6234. New Venture Financing. 3 Credits.
Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Same as FINA 6234.

ISTM 6239. Seminar: Competitiveness/Technology. 3 Credits.
Capstone course integrating the field of management of science, technology, and innovation. Commercialization of technology in the private sector and the impact on competitiveness. Implementation of technology in the public sector. Technology development, from new product concept to utilization. Prerequisites: ISTM 6224 or MBAD 6253; and ISTM 6232 or ISTM 6233; or permission of the instructor.

ISTM 6243. Human Factors in Information Systems. 3 Credits.
The user-computer interaction, human factors of online dialogues, interfacing, and various approaches to user-system interaction; development and evaluation of user-computer interfaces.

ISTM 6251. Information Systems Applications. 1.5 Credit.

ISTM 6290. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 6297. International Technology and Innovation. 3 Credits.
Growth and future potential and impact of the technology expansion within international arenas and the global economy. Social, economic, innovative start-ups, multinational firms.

ISTM 6298. Directed Readings and Research. 1-3 Credits.

ISTM 8300. Thesis Seminar. 3 Credits.

ISTM 8333. Seminar: Management of Science, Technology, and Innovation. 3 Credits.
Seminar for doctoral students interested in information systems. Various philosophical traditions and insights from those traditions applied to problems in information systems.

ISTM 8341. Advanced Topics in MIS Research. 3 Credits.
For information systems doctoral students. Seminal papers and leading methods and instruments as applied to MIS research.

ISTM 8385. Special Topics in Research Methods. 3 Credits.
Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

ISTM 8390. Philosophical Foundations of Administrative Research. 3 Credits.
Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

ISTM 8391. Advanced Problems in Research Methodology. 3 Credits.
Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. For doctoral candidates who have completed the general examination and all courses and are preparing for their dissertation.

ISTM 8397. Doctoral Seminar. 1-3 Credits.
Current research and scholarly issues in management science.

ISTM 8398. Advanced Readings and Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ISTM 8399. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

DUAL BACHELOR OF BUSINESS ADMINISTRATION AND MASTER OF SCIENCE IN INFORMATION SYSTEMS TECHNOLOGY

The School of Business offers a dual bachelor of business administration (p. 440) and master of science in the field of information systems technology (p. 460) degree program.
The program allows students to take up to 12 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year.

Visit the program website [https://business.gwu.edu/academics/programs/undergraduate/combined-degree-programs/bba-msist](https://business.gwu.edu/academics/programs/undergraduate/combined-degree-programs/bba-msist) for additional information.

**INTERNATIONAL BUSINESS**

**UNDERGRADUATE**

**Bachelor’s program**

- Bachelor of Business Administration with a concentration in international business (p. 440)

**FACULTY**

*Associate Professors* R.W. Click, F.W. Lindahl, N. Maurer, L.A. Riddle

*Assistant Professors* A. Helm, L. Ballesteros, J. H. Kim

**COURSES**

**Explanation of Course Numbers**

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

**IBUS 3001. Introduction to International Business. 3 Credits.**

The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

**IBUS 3001W. Introduction to International Business. 3 Credits.**

The international business environment, including social, cultural, political, technological, and institutional domains; multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

**IBUS 3101. Global Financial Environment. 3 Credits.**

The international economic, trade, and financial environment in which global business operates and how developments in these areas affect business activity. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

**IBUS 3201. International Marketing Management. 3 Credits.**

Introduction to international marketing analysis and strategy, and the dynamic nature of international markets. Analysis of different types of international markets and formulation of strategies at the entry and global stages. Prerequisites: IBUS 3001.

**IBUS 3301. International Business Finance. 3 Credits.**

Analysis of the international economic environment and its influence on corporate financial management of international operations. Prerequisites: BADM 3501, IBUS 3001 and IBUS 3101.

**IBUS 4202. Regional Strategy for Multinationals. 3 Credits.**

The business, economic, investment, and market environments in different regions of the world; regional strategy framework for responding to business opportunities in regional markets. Prerequisites: IBUS 3001.

**IBUS 4203. Foreign Market Analysis. 3 Credits.**

Project course involving market research for target market selection, market entry strategy, in-country marketing plan, and recommendations for strategy implementation in the target country. Focus on consulting process as ancillary component. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3201.

**IBUS 4302. International Banking. 3 Credits.**

Theory and practice of international banking; analysis of international commercial and investment banking from a management perspective; subjects include current international monetary and financial environment, money and capital markets, and topical problems of international banking from a management perspective. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3301.
IBUS 4303. International Monetary and Financial Issues. 3 Credits.
Risks facing the global financial and the international monetary systems and their macro-economic framework; role of financial oversight institutions, the dollar and of central banks; old and new economic players in the global system. Prerequisite: IBUS 3001 or permission of the instructor.

IBUS 4401. Managing the Multinational Enterprise. 3 Credits.
The changing nature of the international environment and the resulting effects on strategy of U.S. and foreign multinational corporations. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4402. Managing in Developing Countries. 3 Credits.
Challenges of operating in developing countries; cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisites: IBUS 3001 or IBUS 3101.

IBUS 4402W. Managing in Developing Countries. 3 Credits.
Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: IBUS 3001 or IBUS 3002; or permission of the instructor.

IBUS 4403. Oil: Industry, Economy, and Society. 3 Credits.
Multidisciplinary approach, related primarily to political economy and management, to oil and its effects on business, nation-states, and the world economy. Restricted to juniors and seniors who are familiar with economics measures and concepts at the level of ECON 1011 and ECON 1012.

IBUS 4404. Global Energy. 3 Credits.
Fundamental economics and politics of the energy business; effects on business decisions and strategies; conventional energy generation technologies and alternative technologies. Course equivalent or permission of the instructor may be substituted for the prerequisite. Restricted to juniors and seniors. Prerequisite: ECON 1012.

IBUS 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: IBUS 3001, except by permission of instructor.

IBUS 4995. Independent Study. 1-12 Credits.
Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 6201. International Marketing. 3 Credits.
International marketing strategy formulation, including market entry, local market development, and global market integration; strategic challenge of global marketing formulation and local market adaptation, with attention to market conditions in mature, new growth, and emerging market environments; emerging trends.

IBUS 6202. Regional Strategy for Multinationals. 0-3 Credits.
Development of a framework to understand dynamic business, cultural, and economic environments in Asia and Latin America. Regional business strategies of multinational companies from outside and within Asia and Latin America that respond to business opportunities and challenges in these regions.

IBUS 6290. Special Topics. 0-3 Credits.
Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

IBUS 6297. International Management Experience. 1-6 Credits.
May be repeated for credit.

IBUS 6301. International Business Finance. 3 Credits.
Analysis of major issues and developments in the international financial environment and their impact on multinational corporations and financial institutions.

IBUS 6302. Seminar: International Banking. 3 Credits.
Evolution in international banking and other international financial institutions. Functioning of international banking operations, public policy issues and regulatory issues in international banking, and the effect of international banks on national monetary policies.

IBUS 6303. External Development Financing. 3 Credits.
Institutions, instruments, and theory of external development financing; financial flows to developing countries; development finance and the role of international and regional development banks; policies, methods, and practices of the World Bank, the IMF, and others; technical assistance, training, capacity building, and role of institutions in sustained development. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6304. Financial Crises and the Global Economy. 3 Credits.
The causes of a financial crisis and how various countries have responded to their specific crises; the relationship between financial crises and other economic developments, particularly in emerging market and developing economies; how global financial arrangements have evolved to help manage the risks of contagion. Recommended background: graduate-level study in macroeconomics.
IBUS 6305. Global Investment Banking. 3 Credits.
Examination of investment banking as practiced in a global context from a strategic perspective using case studies and readings. Topics covered include securities underwriting and derivatives instruments, risk management, and business development strategies. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6306. International Financial Reporting Standards. 1.5 Credits.
Examination of current issues in international financial reporting. Topics covered include the concept of international financial reporting standards, the role of international accounting firms, and the impact of international accounting standards on business. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6307. International Portfolio Management. 3 Credits.
Theory and practice of international investment. Portfolio construction and optimization. Effects of exchange rate changes on portfolio risk and return. International asset pricing models and trading institutions. Prerequisites: MBAD 6234; and MBAD 6243 or ECON 6284.

IBUS 6308. International Reporting and Control. 1.5 Credit.

IBUS 6309. International Accounting. 1.5 Credit.

IBUS 6310. International Financial Reporting Standards. 1.5 Credit.

IBUS 6400. Oil: Industry, Economy, and Society. 3 Credits.
Multidisciplinary approach to the study of oil and its effects on business, nation-states, and the world economy, based primarily on political economy and management perspectives. Topics include the oil industry, the global oil environment, and the potential effects of oil on a society. (Same as IAFF 6378).

IBUS 6401. International Business Strategy. 3 Credits.
Discussion of the changing nature of the international environment and the resulting impact on strategy of both U.S. and foreign multinational corporations. Various aspects of strategy are considered, including marketing, production, and financial strategy. The focus of discussion is at the company level.

IBUS 6402. Managing in Developing Countries. 3 Credits.
Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards.

IBUS 6403. International Business Negotiations. 3 Credits.
Theories and application in International Business Negotiations (IBN). Formulation of concepts and frameworks; development of systematic approaches to planning for and conducting IBN. Integration of functional, environmental, and institutional contexts facing negotiators internationally. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6404. New Global Competitive Framework. 3 Credits.
How industries develop sustained competitive advantages within the global framework. The European Union's "single market" and the Economic-Monetary Union; the transformation of formerly centrally planned economies; the changing Japanese economy and emerging Pacific Basin, with implications for the U.S. economy, industries, and firms. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6405. Legal Aspects of International and Multinational Business. 3 Credits.
Legal environment of international and multinational business including legal systems, antitrust laws, regulation of direct investment, international arbitration and expropriation; topics of current interest. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283 or ECON 6284.

IBUS 6500. Global Currency and Stock Trading. 1.5-3 Credits.
Linkages of global events and risks and their impact on financial markets; foreign exchange market trading philosophies, techniques, strategies, and rules. Real-time practical training in trading major currencies, stocks, and managing an emerging markets portfolio in the GWSB Capital Markets Trading Room. Restricted to students in the World Executive MBA program.

IBUS 6501. International Finance. 1.5 Credit.
The international financial environment; balance of payments and exchange rate regimes; exchange rate determination; interest rate parity and the foreign exchange market; purchasing power parity and other international parity conditions; fundamental hedging techniques to manage foreign exchange exposure in international transactions. Restricted to students in the World Executive MBA program.

IBUS 6505. Global Currency and Stock Trading. 1.5-3 Credits.
No fixed content.

IBUS 6999. Thesis Seminar. 3 Credits.
No fixed content.

IBUS 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.
An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

IBUS 8361. Colloquium on International Business. 3 Credits.
Examination of selected topics in international business, with emphasis on major new theoretical and empirical developments. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

IBUS 8397. Doctoral Seminar. 1-3 Credits.
No fixed content.

IBUS 8900. Thesis Research. 3 Credits.
No fixed content.

IBUS 8998. Advanced Readings and Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.
IBUS 8999. Dissertation Research. 1-12 Credits.  
May be repeated for credit. Restricted to doctoral candidates.

**MANAGEMENT**

**UNDERGRADUATE**

**Bachelor's program**
- Bachelor of Business Administration (p. 448)

**Combined program**
- Dual Bachelor of Business Administration and Master of Tourism Administration (p. 457)

**Graduate Certificate**
- Graduate Certificate in Innovation, Creativity, and Entrepreneurship (p. 472)

**FACULTY**

*Professors*  
H. Aquinis, J. Bailey, D.C. Kayes (*Chair*), G.T. Solomon, P.M. Swiercz, L. Yu

*Associate Professors*  
L. Delpy Neirotti, N.S. Hill, S. Levy (*Teaching*), P. McHugh, A. El Tarabishy (*Teaching*), M. Ormiston

*Assistant Professors*  
M. Hyman (*Teaching*), K. Sawyer

**COURSES**

**Explanation of Course Numbers**
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

**MGT 3201. Leadership in Action. 3 Credits.**
Leadership in organizations and society. Consideration of whether leadership is a personal trait or a structured behavior and whether it is universal across domains or situation-specific. Modern and historical examples; issues of leadership in popular contexts.

**MGT 3202. Managerial Negotiations. 3 Credits.**
Negotiation concepts, strategies, and tactics as applied to managerial situations. The nature of interdependencies; competitive and collaborative negotiations; negotiations involving third-party dynamics, such as mediation and arbitration. Employee relations, including employee rights; the impact of unions and collective bargaining on management practices.

**MGT 3203. Advanced Human Resource Management. 3 Credits.**
The labor force and labor markets. The legal environment of human resource management. Human resource planning; employee recruiting, selection, training, development, compensation, motivation, discipline, health and safety. Prerequisite: BADM 3101.

**MGT 3204. Contemporary Topics in Management. 3 Credits.**
Contemporary practice in human resource planning, recruitment and selection, training and development, performance management, compensation and benefits, employee relations, and international human resource management. Interaction with practitioners through actual situations, case analyses, and presentations. Prerequisite: BADM 3101.

**MGT 3300. Entrepreneurship. 3 Credits.**
Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

**MGT 3300W. Entrepreneurship. 3 Credits.**
Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

**MGT 3301. Small Business Management. 3 Credits.**
Theory and practice of entrepreneurship. How to start or acquire a new business; effective management, including the essentials of planning, organizing, financing, marketing, and controlling the smaller enterprise. Students consult with a small DC-area company as part of a team research project. Prerequisites: MGT 3300W or permission of the instructor.

**MGT 3302. e-Entrepreneurship. 3 Credits.**
The process of turning a web, mobile, or wearable business idea into a validated, repeatable, and scalable business model using lean startup methodologies; testing and user feedback, technology basics, promotions, and tracking core metrics. Permission of the instructor may be substituted for the prerequisite. Prerequisites: MGT 3300 or MGT 3300W.

**MGT 3303. Women's Entrepreneurial Leadership. 3 Credits.**
Students create and execute a business plan while developing essential skills, mentoring relationships, and self-confidence and self-insight.
MGT 3305. Human Capital Sustainability. 3 Credits.
Managerial challenges associated with creating sustainable employment relationships using concepts from human resource management, labor relations, organizational behavior, and entrepreneurship; how markets, management practices, collective bargaining, and public policy affect human capital sustainability.

MGT 4003. Management of the Growing Entrepreneurial Venture. 3 Credits.
Examination of the data, dilemmas, and decisions that can confront leaders of post-startup entrepreneurial ventures.

MGT 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 4900W. Special Topics. 3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

MGT 4995. Independent Research. 1-6 Credits.
Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit.

MGT 6210. Leading Teams. 3 Credits.
Knowledge and skills for effectively leading teams, including setting teams up for success, promoting effective team dynamics, and other leadership issues for contemporary teams that operate in a global, digital environment.

MGT 6213. Change Management. 3 Credits.
Behavioral and organizational components of individual, team, and firm-wide change. The dynamics that often accompany the change process.

MGT 6215. Conflict Management and Negotiations. 3 Credits.
The nature and sources of conflict and interdependence in social and organizational dynamics. Various means of resolving conflict, including the use of competitive and collaborative negotiations and mediation. Case discussion, exercises, role-playing, and simulation. Managers as mediators and negotiators.

MGT 6216. Cross-Cultural Management. 3 Credits.
The cultural foundations of organizations and institutions, with an emphasis on managerial behavior. Cross-cultural differences as they affect work-related behaviors, such as communication, attitude, teamwork, negotiation, and decision making.

MGT 6252. Global Human Resource Management. 3 Credits.

MGT 6253. Leadership and Executive Development. 3 Credits.
The required skills, knowledge, and abilities for effective executive leadership in organizations. Contemporary and classical leadership theories and research approaches.

MGT 6254. Negotiations and Labor Relations. 3 Credits.
Negotiation theory and practice in the context of labor-management relations in both union and nonunion settings. Emphasis on negotiation and conflict resolution skills, arbitration and grievance procedures, public-sector labor relations, labor laws and public policy, and global labor relations issues.

MGT 6257. Performance Management and Development. 3 Credits.
The design and implementation of effective and successful performance management systems; measuring and developing the performance of individuals and groups and aligning performance with an organization’s strategic objectives.

MGT 6258. Applied Organization Leadership. 3 Credits.
In-depth studies of theories of leadership. Legal and ethical obligations of leadership. The leader in the process of assuming responsibility. Experiential exercises designed to develop the students’ interpersonal abilities and leadership capacities.

MGT 6259. Employment Law and Ethics. 3 Credits.
An examination of the interaction of legal requirements and personal ethics and their influence on managerial decisions affecting the employment exchange. Special emphasis on equal employment opportunity and civil rights, workers’ compensation, occupational health and safety, collective bargaining, and wrongful discharge.

MGT 6270. Consulting Processes. 3 Credits.
Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process.

MGT 6271. Consulting Practicum. 3 Credits.
Instruction in and application of integrative problem solving, team work, client relationship, and communications skills required to be a successful management consultant. Students gain practical experience through a team-based assignment consulting for a client. Prerequisite: MGT 6270.

MGT 6277. Critical Thinking Skills for Executive Leadership. 3 Credits.
Theory and practice of critical thinking; how it differs from other types of thinking and other executive leadership competencies; approaches known to improve thinking skills.

MGT 6280. Entrepreneurship. 3 Credits.
In exploring the "entrepreneur as a phenomenon," students are exposed to the theory and experiences associated with entrepreneurs, entrepreneurial acts, and entrepreneurship in all organizational settings—large, small, public, and private.
MGT 6281. Small Business Management. 3 Credits.
The start-up process and management of small firms. Field projects involve student teams as consultants to local businesses. Case studies. Emphasis on total customer service, international opportunities, and minority and women’s issues.

MGT 6282. New Venture Initiation. 3 Credits.
Essentials of planning a new business venture. Sources of financing, evaluation of alternative new business ventures, and analysis of business functions. Creating and analyzing the business plan.

MGT 6283. Strategic Entrepreneurship. 3 Credits.
Capstone course for the small business/entrepreneurship concentration. Student teams assist companies in upgrading strategies. Prerequisites: MBAD 6265, MGT 6281, MGT 6282 and/or permission of instructor.

MGT 6284. Family Business Management. 3 Credits.
Challenges of managing a family business: risk strategies; successor development and succession planning; stages of family business growth; family motivations and goals. Field projects provide hands-on experience.

MGT 6285. Social Entrepreneurship. 3 Credits.
Theory and practice of social entrepreneurship. The power and limits of social entrepreneurship as a tool for creating sustainable and scalable social impact.

MGT 6286. Creativity and Innovation. 3 Credits.
How organizational culture encourages or discourages creativity in individuals and teams and how organizational policies support or undercut innovation. Methods for developing and strengthening creative ideas and innovative action. Factors such as breakthrough design that encourage creativity and support innovation. Students examine and assess, on both personal and organizational levels, the bases of and propensity for creativity and innovation.

MGT 6290. Special Topics. 0-3 Credits.
Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 6297. International Management Experience. 3 Credits.
Same as FINA 6297/ IBUS 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

MGT 6298. Directed Readings & Research. 1-6 Credits.

MGT 6299. Thesis Seminar. 3 Credits.

MGT 6301. Negotiations. 1.5 Credit.
Major concepts and theories of negotiation; the dynamics of interpersonal and intergroup conflict and its resolution; skill development relevant to a broad range of applied contexts; reflective posture about negotiations specifically and social influence broadly. Restricted to students in the World Executive MBA program.

MGT 6999. Thesis Research. 3 Credits.

MGT 8382. Foundations of Organizational Behavior and Development. 3 Credits.
The individuals and institutions central to the field of organizational behavior and development. Students read about, meet with, and discuss the work of persons central to the development of the field. Restricted to candidates in the PhD in organizational behavior and development program or with permission of the instructor.

MGT 8383. Field Research in Organizational Settings. 3 Credits.
Applications of field research techniques in formal organizational settings. Examination of the logic of inquiry and techniques of qualitative data collection. Intensive interviewing and participant observation in field settings are emphasized.

MGT 8385. Special Topics in Research Methods. 3 Credits.
Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

MGT 8386. Management Ideas in Progress. 3 Credits.
Doctoral students work with a variety of faculty members as they develop new ideas, research projects, and engage in seminal inquiry. The content and structure of the course depends based on the instructor. Restricted to students in the PhD in organizational behavior and development program or with permission of the instructor.

MGT 8390. Philosophical Foundations in Administration Research. 3 Credits.
Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

MGT 8391. Adv Prob-Research Methodology. 3 Credits.
Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. Restricted to doctoral candidates who have completed the general examination and all courses, and are preparing for their dissertation.

MGT 8397. Advanced Special Topics. 1-3 Credits.
Current research and scholarly issues in management science.

MGT 8998. Advanced Reading and Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

MGT 8999. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates.
**MARKETING**

**UNDERGRADUATE**

**Bachelor's program**

- Bachelor of Business Administration (http://bulletin.gwu.edu/business/undergraduate-programs/business-administration/marketing)

**FACULTY**

**Professors** R.S. Achrol, S.S. Hassan, D. Hoffman, L.M. Maddox, T. Novak, V.G. Perry (Chair), P.A. Rau

**Associate Professors** S. Elliott (Teaching), M.L. Liebrenz-Himes

**Assistant Professor** S. Ham, L. Jiang

**COURSES**

**Explanation of Course Numbers**

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: BADM 3401 Basic Marketing Management is prerequisite to all courses in the Marketing Department; additional prerequisites are listed with the courses.

**MKTG 3142. Consumer Behavior. 3 Credits.**

Social, cultural, and psychological factors influencing the behavior of consumers. Models of buyer behavior, consumption patterns, market segmentation, attitude formation and change, brand loyalty, adoption of innovations, and store choice decisions. Marketing management and public policy implications of consumer research. Prerequisite: BADM 3401.

**MKTG 3143. Marketing Research. 3 Credits.**

Basic methods and techniques of market research. Designing a marketing research project: research questions, secondary and syndicated data, primary data collection approaches, data analysis and report presentation. Focus group interviews, questionnaire construction, statistical software packages. Prerequisite: BADM 3401 and STAT 2112 or STAT 2118.

**MKTG 4148. Advertising and Marketing Communications. 3 Credits.**

Executing and measuring the effectiveness of advertising and integrated marketing communications campaigns. Methods for gathering research for a customer-based campaign, defining key target personas, developing a singular message strategy, and reaching consumers through media typically used in marketing communications. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

**MKTG 4149. Advanced Advertising Campaigns. 3 Credits.**

Students conceptualize, support, and execute a marketing communications campaign for entry in the American Advertising Federation’s National Student Advertising Competition. Students must undergo a formal interview process and receive the instructor’s approval prior to enrollment. Prerequisites: BADM 3401 or MKTG 4156.

**MKTG 4150. Salesmanship and Sales Management. 3 Credits.**

Development of personal selling and presentation skills; examination of types of selling situations. Organization of sales department, sales planning and forecasting, quotas, territories, performance standards, and analysis and control of distribution costs. Prerequisites: BADM 3401 and MKTG 3142.

**MKTG 4151W. Marketing Communications Planning. 3 Credits.**

Components of a marketing communications plan; writing, development, and presentation, including executive summary, situation analysis (company, consumer, competitor), target market segmentation, consumer behavior analysis, positioning strategy, and tactics for implementation. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BADM 3401, MKTG 3142 and 3143.

**MKTG 4152. Retailing Management. 3 Credits.**

A study of retailing management and strategy covering the current environment of retailing, retail market and financial analysis, store location and design, inventory management, and non-store and service retailing. Industry executive and student presentations; case analyses. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

**MKTG 4154. Digital Marketing. 3 Credits.**

Using the social Web to leverage a firm’s marketing strategy; developing and improving a company’s electronic marketing strategy for the next evolution in Web commerce. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.
MKTG 4156. Integrated Marketing Communications. 3 Credits.
The ubiquity of advertising and promotion; fundamental shifts in how consumers get information and from whom, and how much trust they place in different sources; strategies to address a rapidly changing media environment; concepts, analyses, and activities that comprise advertising; assessing and solving advertising challenges. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4159. Marketing Strategy. 3 Credits.
The capstone course for marketing majors. Analytical integration of material covered in previous marketing courses. Marketing strategy literature, financial dimensions of marketing decisions, and comprehensive cases. Prerequisites: BADM 3401 or BADM 3401W; and MKTG 3142 and MKTG 3143.

MKTG 4900. Special Topics. 0-3 Credits.
Experimental offering: new course topics and teaching methods. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4900W. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BADM 3401, MKTG 3142 and MKTG 3143.

MKTG 4995. Independent Study. 1-12 Credits.
Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit. Prerequisite: BADM 3401.

MKTG 6241. Advanced Marketing Management. 3 Credits.

MKTG 6242. Buyer Behavior. 3 Credits.
The buyer decision process model and how and why products and services are purchased; synthesis of behavioral sciences applied to understanding individual, family, and organizational decision processes; the impact of consumer decisions on the marketing strategies of business and public organizations; consumer marketing applications in high-tech and services industries and on a global scale.

MKTG 6243. Marketing Research. 3 Credits.
The marketing research process: designing, conducting, and using market research studies. Managing the market research project; qualitative research; survey and experimental designs; data analysis with statistical software packages. Prerequisite: MBAD 6221.

MKTG 6246. Marketing of Services. 3 Credits.

MKTG 6248. Advertising and Marketing Communications Strategy. 3 Credits.
Practical instruction in executing an advertising and integrated marketing communications campaign. Strategic planning, communication theory, planning from a consumer attitudes and behavioral perspective, and campaign execution are covered. Prerequisites: MBAD 6272 and MBAD 6273; or permission of the instructor. Recommended background: MKTG 6242.

MKTG 6250. Selling/Sales Management. 3 Credits.

MKTG 6251. Product Management. 3 Credits.

MKTG 6252. Digital Marketing. 3 Credits.
The impact of technology on sales and marketing strategy. Areas explored include e-branding, customer relationship management, permission e-mail, sales force technology enhancement, mobile commerce, online marketing research, and electronic channels of distributions.

MKTG 6255. Strategic Brand Management. 3 Credits.
Theoretical foundation for branding and brand management and practical application of these concepts in marketing management.

MKTG 6256. Integrated Marketing Communication. 3 Credits.
The ubiquitous nature of advertising and promotion. How and from whom consumers get information and their level of trust in different information sources; concepts, analyses, and activities related to advertising; assessing and solving challenges.

MKTG 6259. Marketing Strategy. 3 Credits.
Required capstone course for marketing students. Analysis of complex marketing problems involving policy and operational decisions; emphasis on creative marketing strategy.

MKTG 6290. Special Topics. 0-3 Credits.

MKTG 6297. International Management Experience. 3 Credits.
Same as FINA 6297/ IBUS 6297/ MGT 6297/ SMPP 6297. May be repeated for credit.

MKTG 6298. Directed Readings and Research. 1-3 Credits.

MKTG 6299. Thesis Seminar. 3 Credits.

MKTG 6999. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

MKTG 8999. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates.
STRATEGIC MANAGEMENT AND PUBLIC POLICY

UNDERGRADUATE Bachelor's program
• Bachelor of Business Administration (p. 445)

FACULTY
Professors J.H. Beales III, H.J. Davis, J. Rivera, J.B. Wade, J. Walter
Associate Professors E.J. Englander, J. Forrer (Research), K. Martin (Chair)
Assistant Professors S. Patnaik, T. Radin (Teaching), G. de los Reyes, D. Halliday (Teaching), V. Pamphile

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SMPP 4900. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods.

SMPP 4900W. Special Topics. 3 Credits.
Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

SMPP 4995. Independent Study. 1-12 Credits.
Assigned topics. Permission of the advisor required prior to enrollment. May be repeated once for credit.

SMPP 6201. Business and Public Policy. 3 Credits.

SMPP 6202. Business-Government Relations. 3 Credits.
Historical and philosophical foundations of the business-government relationship. Regulation, international trade, and corporate political activities. Public policy issues facing business and the business community’s political response. Prerequisite: MBAD 6284.

SMPP 6203. Federal Government Regulation in Society. 3 Credits.

SMPP 6205. Business Representation and Lobbying. 3 Credits.
Strategies, tactics, and techniques used by business in representing itself to the legislative and executive branches and regulatory agencies of the federal government. Legal and practical constraints. Ethical considerations.

SMPP 6206. Applied Microeconomics. 3 Credits.
Applications of economic theory to public and private decisions with emphasis on public policy analysis. Focus on market structure and its implications. Imperfect information, common property, public goods and externalities. Economic analysis of government behavior and legal institutions. Prerequisites: ECON 6217 or ECON 6219; and MBAD 6222.

SMPP 6207. Environment, Energy, Technology, and Society. 3 Credits.
The identification, examination, and evaluation of how environment, energy, and technology are interrelated and how these interactions influence policy formulation and implementation at the international, national, regional, industrial, and organizational levels. Same as PPPA 6067.

SMPP 6208. Macroeconomic Policy and Business. 3 Credits.
Determination of national income, employment, inflation, and interest rates. The role of expectations in the economy. Impact of government purchases, tax policy, and deficits. Monetary policy institutions. The global economy and exchange rates. Prerequisites: ECON 6218 or ECON 6219; and MBAD 6222.

SMPP 6209. Seminar: Business Economics and Public Policy. 3 Credits.
Analysis and discussion of selected issues by students and representatives of government and business. Prerequisite: SMPP 6202 or MBAD 6284.

SMPP 6210. Strategic Environmental Management. 3 Credits.
Examination and analysis of the orientation and actions of private, public, and nonprofit sectors in relation to their natural environments. Emphasis on organizational interaction and effectiveness, particularly regarding business firms and industry, on issues of environmental quality and sustainability.

SMPP 6211. Corporate Environmental Management in Developing Nations. 3 Credits.

SMPP 6212. Business Law: Enterprise Org. 3 Credits.

SMPP 6213. Management of Strategic Issues. 3 Credits.
The body of management theory and practice that has evolved to identify, analyze, and resolve strategic organizational issues. Methodology of the field; applications to critical issues in labor relations, energy and pollution, marketing and consumerism, business-government relations, and the global economy.

GRADUATE SCHOOL OF EDUCATION AND HUMAN DEVELOPMENT

Dean  M.J. Feuer
Academic Dean  C. Green
Associate Dean for Research and External Relations  M.B. Freund
Associate Dean for Doctoral Studies  S.A. Dannels
Assistant Dean for Academic Affairs  R.C. Jakeman

The Graduate School of Education and Human Development (http://gsehd.gwu.edu) is the administrative unit for the departments of Counseling and Human Development, Curriculum and Pedagogy, Educational Leadership, Human and Organizational Learning, and Special Education and Disability Studies. The School offers master of arts in education and human development, master of arts in teaching, master of education, education specialist, doctor of philosophy, and doctor of education degree programs. Academic programs are offered in numerous fields of study.

In addition to its degree programs, the School offers graduate and post-graduate certificate programs; credit and noncredit workshops designed to meet the unique needs of metropolitan area school systems and other clientele in industry and government; and a wide range of courses for teachers who wish to pursue advanced studies and/or additional endorsements and for provisional teachers who wish to prepare for teaching certificates.

All programs are designed to meet the broad needs of individuals who seek the knowledge and skills necessary to provide effective learning and teaching, research, services, and leadership in a variety of settings that cover the entire life span. Special curricula are individually tailored for liberal arts graduates and graduates of other professional schools who are interested in teaching or in other human services areas.

Clinical facilities are provided by the Community Counseling Service Center (http://gsehd.gwu.edu/ccsc), which supports counseling internships as well as outreach services to the community. The Office of Professional Preparation and Accreditation serves as a liaison with schools for clinical experiences required for educator licensure. Field and internship experiences required in master’s and doctoral programs are provided in cooperation with public and private schools, social and health agencies, museums, institutions in the business community, institutions of higher education, nonprofit and professional associations, and the federal government. Some programs and courses are also offered at off-campus locations or via distance education.

The educator preparation programs in the Graduate School of Education and Human Development are accredited by the Council for the Accreditation of Educator Preparation/National Council for Accreditation of Teacher Education (CAEP/NCATE) and the District of Columbia Office of the State Superintendent of Education (DC-OSSE). Programs that prepare students to become eligible for licensure/certification as teachers and other school personnel are state-approved by the DC-OSSE. Programs that prepare students to become eligible for licensure as a professional counselor are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Mission
The Graduate School of Education and Human Development, strategically based in the nation’s capital and serving the global community, develops informed and skilled leaders through innovative teaching and learning. Students engage in scholarly inquiry that links policy, research, and practice across the lifespan and fosters continuous self-examination and critical analysis towards excellence.

Bridging Concepts
The following bridging concepts are central to the unified conceptual framework of the School and weave through the mission, goals, and initiatives of its strategic plan.

• Research and scholarship are prerequisite to the improvement of educational practice.
• Leadership is critical in the transformation of education and human development at all levels.
• Building reflective practitioners through the integration of theory and practice must be a focus of all programs.
• A community of diverse learners is prerequisite to success in the education and human development professions.

GSEHD provides an online Master’s, Education Specialist, and Certificate Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/ma_eds_student_handbook_17-18.pdf) and a Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2017-18_doctoral_handbook.pdf). These online handbooks contain additional updated information on policies, regulations, and other matters of concern to enrolled and admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the appropriate Student Handbook. Students should also consult departmental/program handbooks and guidelines.

Admission Requirements

The Graduate School of Education and Human Development seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor’s degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate coursework, and acceptable test scores on either the Graduate Record Examination or the Miller Analogies Test in some programs. These tests are waived in several master’s programs. All doctoral applicants must have a master’s degree from a regionally accredited institution and submit GRE or MAT scores.

A minimum of two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. For those living outside the Washington metropolitan area, the interview may be waived with permission of the lead faculty of the desired program. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). English language scores are valid for two years. The most recent test scores are used for applicants who submit multiple scores. Specified possible exemptions from this policy can be found on the Graduate Admissions (https://graduate.admissions.gwu.edu/international-student-application-requirements) website. The required minimum score for admission to a program is 80 on the Internet-based or 550 on the paper-based TOEFL, or an overall band score of 6.0 on the IELTS (with no individual band score below 5.0), or a score of 53 on the PTE. Some programs have higher minimum scores. Applicants who have a TOEFL score of at least 70 (but less than 80), or an IELTS overall band score of 5.0 (but less than 6.0) may be considered for admission on the condition that they successfully complete the Applied English Studies program prior to beginning their graduate studies.

Students with the following English language test scores are exempt from taking English for Academic Purposes (EAP) courses: TOEFL, 600 paper-based or 100 Internet-based; IELTS, overall band score of 7.0 with no individual band score below 6.0; PTE, 68. Students with test scores below these minimums must register for an EAP course during their first semester. Students assigned EAP courses should anticipate additional tuition expenses as well as a possible extended period of time required to complete their degree program. EAP courses do not count toward degree requirements.

Students required to take an English for Academic Purposes (EAP) course must earn a minimum grade of B- in the course. Students who do not earn a B- or above in their first course must take an additional EAP course in the subsequent semester. Students who earn an F in an EAP course must repeat the course and are subject to the process described in the Scholarship section.

Grades

Information on grades and computing the grade-point average is found under University Regulations (p. 23).

The symbol I (Incomplete) indicates that a satisfactory explanation of extenuating circumstances has been given to the instructor for the student’s inability to complete the required work of the course during the semester of enrollment. The work must be completed within the designated time period agreed upon by the instructor, student, and School, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will complete a grade change form. The final grade will replace the symbol of I. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of F, Failure, 0 quality points, and the grade-point
Scholarship
An overall grade-point average of 3.0 is required for graduation. Students who have a cumulative GPA below 3.0, or receive a grade of C or below in more than 6 credits, or receive a grade of F will have an academic hold placed on their account and may be subject to program removal. Students must meet with the Senior Associate Dean, the Associate Dean for Doctoral Studies, or the Assistant Dean for Academic Affairs before enrollment in further coursework is allowed. More detailed information can be found in the GSEHD student handbooks.

Comprehensive Examination
A comprehensive examination is required for some master’s and all doctoral programs. Candidates who plan to take the examination must file an application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

Continuous Enrollment and Residency
Students must be continuously enrolled in GSEHD unless the Dean’s Office grants a leave of absence. Failure to register each fall and spring semester will result in lapse of candidacy. Subsequent readmission is subject to whatever new conditions and regulations have been established by the School. See Continuous Enrollment Status under University Regulations.

When master’s degree candidates are sitting for a comprehensive examination and are not otherwise enrolled in coursework, they may prepare for and sit for the exam in continuous enrollment status. If not enrolled in other coursework, doctoral and education specialist students are required to enroll in the examination preparation course, which carries a fee equivalent to 1 credit of tuition. See Comprehensive Examination.

Leave of Absence
Students who, for personal reasons, are temporarily unable to continue their program of studies may request a leave of absence for a specific period of time not to exceed one calendar year during the total period of degree candidacy. If the request is approved, the student must register for leave of absence each semester. If a student fails to register, degree candidacy is terminated. Students who need additional semesters of leave of absence must seek approval from the appropriate appeals committee.

Class Attendance Policy
Attending class and scheduled make-up classes, discussions, and other course meetings is a fundamental student responsibility. Faculty may use class attendance and participation as factors in determining course grades.

MASTER'S

Master's Degree Programs
Admission Requirements
The Graduate School of Education and Human Development seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor’s degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate coursework, and acceptable test scores on either the Graduate Record Examination or the Miller Analogies Test in some programs. These tests are waived in several master’s programs.

Two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. The interview may be waived with permission of the lead faculty of the desired program for those living outside the Washington metropolitan area. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

Plan of Study
The plan of study leading to a master’s degree varies by program, but all require a minimum of 30 graduate credits including a program-approved 3-credit research methods course to satisfy the research requirements. At least 24 credits of this work must be taken in residence at the Graduate School of Education and Human Development. Several programs have additional credit and/or capstone requirements.

All degree requirements must be completed within 6 years, whether study is full time or part time. An additional (or 7th) year is allowed in the case of a student who breaks enrollment and is subsequently readmitted.

Advanced Standing
Advanced standing is granted for approved courses taken at other regionally accredited institutions, but a minimum of 24 credits must be completed in the Graduate School of Education and Human Development as a master’s candidate. One semester (and a maximum of 12 credits) taken in non-degree status may be credited toward the master’s degree. Advanced standing is not granted for work completed five or more years before application for admission or readmission to master’s candidacy. All work accepted for advanced standing must have been earned with a minimum grade of B and must be approved for acceptance by both the advisor and the dean. Credit, Satisfactory, Audit, or other non-letter grades are not acceptable.
Teacher Certification Preparation Programs
Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the Master of Arts in the field of education and human development, and Master of Education degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. Visit the GSEHD website (http://gsehd.gwu.edu) for additional information.

PRAXIS® Teacher Assessments
All degree programs preparing students for initial teacher licensure require completion of the Educational Testing Service PRAXIS® teacher assessments as specified by the Office of the State Superintendent of Education of the District of Columbia.

Master’s Thesis Option
Students in select programs may elect a thesis option. The choice of the thesis subject must be approved in writing by the student’s advisor. Students should consult program faculty for more information.

Second Master’s Degree
Persons seeking a second master’s degree in the Graduate School of Education and Human Development must complete all core and specialization requirements and a minimum residency requirement of 24 credits. Students seeking a second master’s degree must follow the application procedures described above.

Master of Arts in Teaching
• Master of Arts in Teaching in the field of museum education (p. 525)

Master of Education
• Master of Education in the field of elementary education (p. 520)
• Master of Education in the field of secondary education (p. 528)

Master of Arts in Education and Human Development
• Master of Arts in Education and Human Development individualized program (p. 522)
• Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 511)
• Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 511)
• Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 512)
• Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 512)
• Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 513)
• Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 514)
• Master of Arts in Education and Human Development in the field of early childhood special education (p. 517)
• Master of Arts in Education and Human Development in the field of education policy studies (p. 518)
• Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 518)
• Master of Arts in Education and Human Development in the field of educational technology leadership (p. 519)
• Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 520)
• Master of Arts in Education and Human Development in the field of higher education administration (p. 521)
• Master of Arts in Education and Human Development in the field of interdisciplinary secondary transition services (p. 522)
• Master of Arts in Education and Human Development in the field of international education (p. 523)
• Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 525)
• Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 526)

• Master of Arts in Education and Human Development in the field of secondary special education (p. 530)
• Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 531)
• Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners
Combined programs

- Dual Bachelor of Arts with a Major in Spanish and Latin American languages, literatures, and cultures, and Master of Education in Secondary Education with a concentration in foreign language education (p. 530)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Elementary Education and Graduate Certificate in Incorporating International Perspectives in Education (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-curriculum-instruction/elementary-education-iipe)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Secondary Education and Graduate Certificate in TESOL (p. 515)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in Incorporating International Perspectives in Education (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-curriculum-instruction/international-education-iip)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL (p. 514)
- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of higher education administration (p. 463)
- Joint Master of Arts in Education and Human Development in the field of educational policy studies and Juris Doctor (p. 524)
- Joint Master of Arts in Education and Human Development in the field of higher education administration and Juris Doctor (p. 525)

EDUCATION SPECIALIST

Education Specialist Programs

The program of advanced study leading to the degree of education specialist (EdS) is for students with a master’s degree who seek further professional preparation. The program is primarily available in the field of educational leadership and administration, but is also available in the fields of counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education on an individualized basis.

Admission Requirements

The following are required for entrance to the education specialist program in educational leadership and administration: an undergraduate degree and a master of arts in education and human development (MAEd&HD) or its equivalent from a regionally accredited institution, and one year of teaching experience. Two letters of recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor.

Programs of Study and Degree Requirements

A minimum of 30 credits beyond the requirements for an MAEd&HD degree is required. At least 21 credits of this work must be taken in residence at GSEHD. A maximum of five calendar years is allowed for completion of the program.

Comprehensive Examination

A comprehensive examination may be required, depending on field of study.

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 532)
- Education Specialist in the field of special education (p. 533)

DOCTORAL

Doctoral Degree Programs

Plan of Study

All doctoral students must complete at least 36 credits of coursework and at least 12 credits of dissertation research at GSEHD while enrolled in their doctoral program. Individual doctoral programs usually have additional requirements.

For doctoral students, all degree requirements must be completed within eight (8) years from the time of admission to the doctoral program. Any leaves of absence do not count against this time limit. More detailed information can be found in the GSEHD Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2017-18_doctoral_handbook.pdf).

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations and on weekends.
Doctor of Philosophy Degree
The Doctor of Philosophy (PhD) in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

The Doctor of Philosophy (PhD) in the field of education degree program is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address issues, scholars require both a strong foundation in education as well as theoretical and disciplinary grounding in multiple disciplines. The PhD program is distinguished by four characteristics: candidates apply to a cross-disciplinary research team that is focused on a critical problem related to education; approaches to the research problems require a cross-disciplinary lens; students engage in research throughout their program; and candidates aspire to careers in which the production of research is paramount.

All PhD programs require a doctoral dissertation in the major field of study.

Admission Requirements
A master’s degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant’s past achievements, perceived potential, and fit to the goals and mission of the program.

Doctor of Education Degree
The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (EdD). These programs provide major fields of study in curriculum and instruction, special education, education policy, educational leadership and administration, human and organizational learning, and higher education administration. With the approval of a student’s advisor, coursework may be taken in or from other departments of the University and through the Consortium. All programs require a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations and on weekends.

Admission Requirements
A master’s degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), two letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant’s past achievements, perceived potential, and fit to the goals and mission of the program.

Pre-Candidacy and Candidacy
The Doctor of Philosophy and Doctor of Education programs are divided into two stages: pre-candidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master’s degree or the equivalent in part-time study. Coursework and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the doctorate is 36 credits of coursework in the pre-candidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, coursework beyond the minimum is required.

In the pre-candidacy stage, all coursework in the program must be completed and the comprehensive examination passed. Coursework toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed between the doctoral student and a doctoral study advising team, generally consisting of two members of the program faculty.

The comprehensive examination is taken upon completion of all pre-candidacy coursework. Students taking the examination must be registered for at least 1 credit in the semester it is to be taken, and must file an online application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

The candidacy stage of doctoral study begins after successful completion of the content coursework and the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of coursework listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to ProQuest/UMI.
Detailed information on the doctoral programs and their administration is available in the GSEHD Doctoral Student Handbook (https://gsehd.gwu.edu/sites/default/files/documents/2017-18_doctoral_handbook.pdf). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

Doctoral Dissertation
All doctoral students must complete a doctoral dissertation. Additional information is available in the GSEHD Doctoral Student Handbook.

Doctoral Programs
- Doctor of Education in the field of curriculum and instruction (p. 533)
- Doctor of Education in the field of education policy (p. 534)
- Doctor of Education in the field of educational leadership and administration (p. 535)
- Doctor of Education in the field of higher education administration (p. 536)
- Doctor of Education in the field of human and organizational learning (p. 537)
- Doctor of Education in the field of special education (p. 539)
- Doctor of Philosophy in the field of counseling (p. 541)
- Doctor of Philosophy in the field of education (p. 540)

CERTIFICATES

Certificate Programs
The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

If not otherwise indicated, programs below are offered exclusively on campus.

Graduate Certificates
- Assessment, Testing, and Measurement in Education (p. 543)
- Autism Spectrum Disorders (p. 543)
- Brain Injury: Educational and Transition Services (p. 544)
- Counseling and Life Transitions (p. 544)
- Design and Assessment of Adult Learning (p. 545)
- Educational Technology Leadership (http://bulletin.gwu.edu/education-human-development/certificate/ed-tech-leadership)
- Global Leadership in Teams and Organizations (p. 546)

- Improvement Science in Education (p. 548)
- Incorporating International Perspectives in Education (p. 546)
- Instructional Design (p. 547)
- Israel Education (http://bulletin.gwu.edu/education-human-development/certificate/israel-education)
- Job Development and Placement (p. 547)
- Leadership Development (p. 548)
- Organizational Learning and Change (p. 549)
- Special Education for Culturally and Linguistically Diverse Learners (p. 549)
- STEM Master Teacher (p. 550)
- Teaching English to Speakers of Other Languages (p. 550)
- Transition Special Education (p. 549)

Post-Master's Certificates
- Counseling (p. 544)
- Educational Leadership and Administration (p. 545)

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Counseling (CNSL) (p. 1228)
- Curriculum and Pedagogy (CPED) (p. 1231)
- Education (EDUC) (p. 1249)
- Human Development (HDEV) (p. 1350)
- Human and Organizational Learning (HOL) (p. 1350)
- School of Education and Human Development (SEHD) (http://bulletin.gwu.edu/courses/sehd)
- Special Education (SPED) (p. 1526)

MASTER'S PROGRAMS

Master of Arts in Teaching
- Master of Arts in Teaching in the field of museum education (p. 525)
Master of Education
- Master of Education in the field of elementary education (p. 520)
- Master of Education in the field of secondary education (p. 528)

Master of Arts in Education and Human Development
- Master of Arts in Education and Human Development individualized program (p. 522)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 511)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 531)

Combined programs
- Dual Bachelor of Arts with a Major in Spanish and Latin American languages, literatures, and cultures, and Master of Education in Secondary Education (p. 530)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Curriculum and Instruction (p. 513)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Elementary Education (p. 514)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Secondary Education (p. 517)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Special Education (p. 518)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in School Counseling (p. 514)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Educational Leadership (p. 513)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Organizational Leadership and Learning (p. 515)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in International Education and Graduate Certificate in TESOL (p. 517)
- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in International Education and Graduate Certificate in TESOL-iip (p. 519)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL (p. 517)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL-iip (p. 519)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL-iipe (p. 519)
- Dual Master of Arts in Education and Human Development in the field of International Education and Graduate Certificate in TESOL-iip (p. 514)
- Dual Master of Business Administration and Master of Arts in Education and Human Development in the field of Business Administration (p. 463)
- Joint Master of Arts in Education and Human Development in the field of Educational Policy Studies and Juris Doctor (p. 524)
• Joint Master of Arts in Education and Human Development in the field of higher education administration and Juris Doctor (p. 525)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ASSESSMENT, TESTING, AND MEASUREMENT IN EDUCATION

The master of arts in education and human development in the field of assessment, testing, and measurement (ATM) in education degree program is designed for individuals who are entering or advancing in positions associated with assessment, testing, and measurement in diverse settings. This specialized field combines the study of human behavior with statistical analysis, testing theory, educational measurement, and evaluation. ATM is the science of measuring educational factors such as learning, preference, aptitude, and personality. ATM specialists (commonly called psychometricians) design tests that collect empirical data and quantify the personal characteristics of individuals, comparing those results within or across populations. In addition to creating assessment instruments, some psychometricians govern the tests and analyze the results.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/assessment-testing-and-measurement-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in electives, and completion of a written qualifying examination.

A written qualifying exam (administered during the early spring semester by an ATM committee).

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CLINICAL MENTAL HEALTH COUNSELING

The master of arts in education and human development in the field of mental health counseling degree program prepares graduates to be knowledgeable and ethical professional counselors equipped for the practice of individual, couple, family, and group counseling. The program emphasizes working with diverse populations and developing strategies to promote the social, emotional, psychological, and physical health of individuals, families, communities, and organizations in a variety of settings. The program contributes to human development, adjustment, and change by encouraging its diverse faculty and student body to engage in reflective practice, critical inquiry, civic engagement, and responsible social action.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/clinical-mental-health-counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits, including 57 credits in required courses and 3 credits in elective courses, and completion of 600 hours in internships and 100 hours in a practicum.

### MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION

This program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. Students must select from one of the following program specialty concentrations:

- Concentration in elementary education (p. 512)
- Concentration in interdisciplinary studies of literacy and reading education (p. 513)

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.

### REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 15 credits in courses in the concentration, 9 credits in elective courses, and successful completion of the master of arts in education and human development comprehensive examination.

The following requirements must be fulfilled: 30 credits, including 9 credits in core course, 21 credits in courses in
the concentration, successful completion of the master of arts in education and human development comprehensive
examination, and completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia
Educator Licensure Services Office.

### REQUIREMENTS

### MASTERS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN INTERDISCIPLINARY STUDIES OF LITERACY AND READING EDUCATION

The master of arts in education and human development in
the field of curriculum and instruction with a concentration in
interdisciplinary studies of literacy and reading education
degree program prepares teachers, education professionals,
and others with diverse experiences for leadership roles in
school and out-of-school settings. The program incorporates
traditional and novel contemporary aspects of literacy
curriculum and instruction and provides pathways to becoming
reading specialists and literacy coaches. Study in theories
and practices in the arts, humanities, museums and informal
learning environments, and digital technologies prepares
educators for new teaching and learning opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.
MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN SECONDARY EDUCATION

The master of arts in education and human development in the field of curriculum and instruction with a concentration in secondary education degree program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership.

Students enrolled in the master's in curriculum and instruction degree program may enroll concurrently in the graduate certificate in incorporating international perspectives in education. Courses can be double counted toward earning the master's degree and certificate.

Specific admission requirements are shown on the Graduate Program Finder (https://www.programs.gwu.edu/graduate).

Visit the program website (https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 9 credits in core courses, 27 credits in the concentration, and successful completion of a comprehensive examination.

The remaining 21 credits should be selected in consultation with the departmental advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERNATIONAL EDUCATION AND GRADUATE CERTIFICATE IN TESOL

The combined MAEd&HD in the field of international education (p. 523) and graduate certificate in teaching English to speakers of other languages (TESOL) (p. 550) degree program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international understanding. Students acquire knowledge of other countries and cultures, using the education system as a means of interpreting and translating knowledge across cultures, and analysis of the formal and non-formal school systems as they reflect history, culture, development, values, contemporary concerns, and future trends. The addition of the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms within and beyond the United States.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gsehd.gwu.edu/programs/masters-international-education) for more details.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION

The master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education degree program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership.

Students enrolled in the master's in curriculum and instruction program may enroll concurrently in the graduate certificate in the incorporating international perspectives in education (IIPE) or the teaching english to speakers of other languages (TESOL)
program. Courses may be double counted toward earning the master’s degree and certificate.

Specific admission requirements are shown on the Graduate Program Finder. [http://www.gwu.edu/all-graduate-programs](http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 15 credits in courses in the concentration, 9 credits in elective courses, and successful completion of the master of arts in education and human development comprehensive examination.

Successful completion of the master of arts in education and human development comprehensive examination.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION AND GRADUATE CERTIFICATE IN TESOL**

The combined master of arts in education and human development in the field of curriculum and instruction with a concentration in elementary education (p. 512) and graduate certificate in teaching English to speakers of other languages (p. 550) (TESOL) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The 12 credits earned in the certificate program may be applied toward the master’s. The addition of the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms in and beyond the United States.

Specific admission requirements are shown on the Graduate Program Finder [http://www.gwu.edu/all-graduate-programs](http://www.gwu.edu/all-graduate-programs).

Visit the program website [https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction](https://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for more details.

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN INTERDISCIPLINARY STUDIES OF LITERACY AND READING EDUCATION**

The master of arts in education and human development in the field of curriculum and instruction with a concentration in interdisciplinary studies of literacy and reading education degree program prepares teachers, education professionals, and others with diverse experiences for leadership roles in school and out-of-school settings. The program incorporates traditional and novel contemporary aspects of literacy curriculum and instruction and provides pathways to becoming reading specialists and literacy coaches. Study in theories and practices in the arts, humanities, museums and informal
learning environments, and digital technologies prepares educators for new teaching and learning opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-curriculum-and-instruction) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits, including 9 credits in core course, 21 credits in courses in the concentration, successful completion of the master of arts in education and human development comprehensive examination, and completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN SECONDARY EDUCATION AND GRADUATE CERTIFICATE IN TESOL

The combined MAEd&HD in the field of curriculum and instruction with a concentration in secondary education (p. 514) and graduate certificate in teaching English to speakers of other languages (TESOL) (p. 550) program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. The addition of the TESOL certificate is designed to prepare pre-service and in-service teachers for working with English learners in classrooms within and beyond the United States.

The 12 credits required for the certificate may be applied toward the master's degree program requirements. Students in the combined program must complete all requirements for both the MAEd&HD and the certificate.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-early-childhood-special-education) for additional information.

The master of arts in education and human development in the field of education policy studies degree program develops skills to analyze education problems and policies at national, state, and local levels and in the K-12 and higher education sectors. The program is designed for students who wish to develop skills in policy research, program evaluation, and the technical, political, and managerial aspects of education policy. Emphasis is placed on developing understanding of the political, economic, and social environments affecting education policies, and the competencies needed to apply research in order to analyze, effectively implement, or evaluate their impact. Topics covered in this field include school reform, urban education problems, student achievement, school finance and its equity, teacher quality and effectiveness, equal opportunity, access to higher education, and accountability. The 36-credit program includes 12 elective credits that are used to develop expertise and skills in a substantial area of education policy; these courses, with prior arrangement, may involve independent research and internships in federal, state, or professional organizations.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/masters-education-policy-studies) for additional information.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The master of arts in education and human development in the field of educational leadership and administration degree program is for students who seek preparation to lead in a culture of teaching and learning. Pursued either in the classroom or in a distance learning format, students with at least one year of instructional experience are prepared for various school-based and central office positions of increased responsibility in teaching, leadership, and/or supervision. The curriculum addresses management, change, communication, organizational learning, administrative and legal issues, human relations, human resource development, general supervisory principles and responsibilities, and supervision of instruction. Graduates develop and expand their skills in technical, conceptual, political, and leadership arenas while positioning themselves to lead in diverse educational communities.

The program includes courses and PK-12 field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina,
and other states that honor interstate compact agreements. The MAEd&HD is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP), the National Council for Accreditation of Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

MASTEROFArts in Education and Human Development in the Field of Educational Technology Leadership

The master of arts in education and human development in the field of educational technology leadership degree program is designed for individuals who are entering or advancing in positions associated with schools, higher education, alternative educational settings, or other human service occupations in which computers and related information delivery technologies are used. The program of study is delivered online and provides students with opportunities to develop the knowledge, understanding, and skills necessary to provide leadership in the rapidly changing environment of technology in education.

This pioneering program is delivered in an interactive distance learning format to students around the world. The required curriculum covers the theory and practice of educational technology, including the use of computers and other instructional technology systems, technological management systems, policy making, research methods, and leadership.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

MASTER OF EDUCATION IN THE FIELD OF ELEMENTARY EDUCATION

The master of education in the field of elementary education degree program is designed for those with an undergraduate degree in the arts and sciences. The program includes coursework for students who wish to become eligible for licensure/certification for teaching at the elementary school level (grades 1 to 6). Additional coursework in content areas may be needed to meet specific jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/elementary-education) for additional program information.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL EDUCATION AND JEWISH CULTURAL ARTS

The Graduate School of Education and Human Development, in concert with the Columbian College of Arts and Sciences, offers an intensive, interdisciplinary, 13-month degree program combining Jewish cultural arts, experiential education, and Jewish education. Graduates are prepared for leadership in Jewish museums and arts institutions, community centers, college campus organizations, social justice organizations, and other innovative educational and cultural settings.

Partnering theory with practice, and the classroom with fieldwork, the EE/JCA curriculum enables students to become competent, creative, and reflective professionals. The program:

- Inspires students to develop exciting and relevant programming for a range of audiences,
- Offers a year-long series of internships at cultural arts and educational institutions, and
- Develops professional skills including budgeting, grant writing, workplace collaboration, and effective communication.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The master of arts in education and human development in the field of higher education administration (MAEd&HD) degree program is designed to provide students with the skills and knowledge for successful work in entry- and mid-career professional positions in institutions of higher education, associations, national and international government agencies, and related organizations. Students may select a concentration in general administration, student affairs administration, higher education policy and finance, and international education. The program of study includes an introduction to higher education administration, research design and analysis, the concentration (in-depth focus on a particular aspect of higher education and its administration), application electives (including internships and practicums), and leadership integration.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/higher-education-administration-0) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required core courses, 12 credits in one concentration (15 credits in student affairs administration), 6 credits in elective courses (3 in student affairs administration), and a capstone project.

The master of arts in education and human development in the field of interdisciplinary secondary transition services degree program prepares personnel to be a change agent in teaching, leadership and support roles. The master’s program prepares leaders to assist youth with disabilities and at-risk youth to make successful transitions through high school to post-secondary education, competitive-integrated employment, and full citizenship. The curriculum integrates the Council for Exception Children (CEC) Advanced Knowledge and Skills for Transition Specialists. This nationally recognized program provides critical knowledge and experience in the ever-emerging field of secondary transition based on legislative requirements, research, and evidence-based practices. With a strong social justice focus, students are prepared to effectively lead quality transition programs and services for all youth with disabilities in various settings.

This program is designed to a) advance interdisciplinary interaction to encourage shared responsibility to advance positive post-school outcomes for youth, b) prepare the next generation of leading experts in the field, c) provide an evidence-based curriculum that is driven by the most up-to-
date research to prepare scholarly practitioners, and d) bridge the gap in applied research and practice.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/masters-interdisciplinary-secondary-transition-services) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in a field of specialization, and successful completion of a comprehensive examination.

Comprehensive examination

Successful completion of a comprehensive examination is required of all students.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERNATIONAL EDUCATION

The master of arts in education and human development in the field of international education degree program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international understanding. Students acquire knowledge of other countries and cultures, using the education system as a means of interpreting and translating knowledge across cultures, and analysis of the formal and non-formal school systems as they reflect history, culture, development, values, contemporary concerns, and future trends. In addition, students acquire tools, methods, and habits of analysis that enable them to play a variety of roles as leaders and change agents.

Students in this program also can enroll in and receive for a graduate certificate in either Incorporating International Perspectives in Education (p. 546) or Teaching English Speakers of Other Languages (TESOL) (p. 550). Certain credits are applied toward both the master’s degree and the certificate.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/international-education) for additional information.

REQUIREMENTS

Required: 30 credits, including 18 credits in required courses, 9 credits in courses in a specialization, and 3 credits in elective courses.
 Required

EDUC 6112 Foundations of Assessment, Testing, and Measurement in Education

or EDUC 6114 Introduction to Quantitative Research

or

EDUC 6116 Introduction to Educational Statistics

And five of the following:

EDUC 6601 International and Comparative Education

EDUC 6602 Regional Studies in International Education

EDUC 6610 Programs and Policies in International Education

EDUC 6620 Strategies and Analysis in International Education

EDUC 6630 International Experiences

EDUC 6631 Internship: International Education

EDUC 6640 Selected Topics in International Education

EDUC 6660 Capstone in International Education

Specialization

9 credits in a professional, academic, or regional specialization selected in consultation with the program advisor.

Elective

3 credits of approved electives selected in consultation with the program advisor.

Up to 6 additional credits of internship may be required for students who do not have international education related experience.

JOINT JURIS DOCTOR AND MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES

The Graduate School of Education and Human Development (GSEHD) in cooperation with the Law School offers a joint juris doctor (JD) (https://www.law.gwu.edu/juris-doctor) and master of education and human development (MAEd&HD) in the field of education policy studies (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-education-policy-studies) degree program. Students must be admitted separately to each program and must fulfill all requirements for both degrees. GSEHD accepts up to 12 credits of law courses toward requirements for the MAEd&HD and the Law School accepts up to 12 credits in GSEHD courses towards requirements for the JD. The degrees are conferred simultaneously once all requirements have been met.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the Graduate School of Education and Human Development (https://gsehd.gwu.edu/programs/juris-doctor-masters-education-policy) and Law School (https://www.law.gwu.edu/juris-doctor) websites for additional information.
JOINT JURIS DOCTOR AND MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The Graduate School of Education and Human Development (GSEHD) in cooperation with the Law School offers a joint juris doctor (JD) (https://www.law.gwu.edu/juris-doctor) and master of education and human development (MAEd&HD) in the field of higher education administration (p. 521) degree program. Students must be admitted separately to each program and must fulfill all requirements for each degree. GSEHD accepts up to 6 credits of law courses toward requirements for the MAEd&HD and the Law School accepts up to 12 credits in GSEHD courses towards requirements for the JD. The degrees are conferred simultaneously once all requirements have been met.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the Graduate School of Education and Human Development (https://gsehd.gwu.edu/programs/juris-doctoratemasters-higher-education-administration) and Law School (https://www.law.gwu.edu/juris-doctor) websites for additional information.

MASTER OF ARTS IN TEACHING IN THE FIELD OF MUSEUM EDUCATION

The master of arts in teaching (MAT) in the field of museum education degree program is an intensive, interdisciplinary program designed to prepare graduates for work fulfilling the educational mission of art, history or science museums; zoos, aquaria, or nature centers; and historical societies or sites. Graduates also qualify to serve as liaisons between schools and museums and as professionals in museum-related private and public agencies.

Students interested in museum studies more generally should refer to Museum Studies (p. 292).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/museum-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

### Code | Title | Credits
--- | --- | ---
EDUC 6701 | Museums as Institutions I: Fundamentals | 
EDUC 6702 | Facilitating Museum Learning I: Fundamentals | 
EDUC 6703 | Museum Audiences | 
EDUC 6704 | Facilitating Museum Learning II: Field Placement and Seminar (taken for 6 credits) | 
EDUC 6705 | Museums as Institutions II: Field Placement and Seminar (taken for 6 credits) | 
EDUC 6706 | Evaluating Museum Learning | 
EDUC 6707 | Museum Proposal Writing |

**Electives**

6 credits in elective courses.

Elective courses should be selected in consultation with the program advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ORGANIZATIONAL LEADERSHIP AND LEARNING

The master of arts in education and human development in the field of organizational leadership and learning degree program is designed for individuals entering or advancing in positions associated with learning in organizational settings in all sectors of society. Typical careers are in organizational development, internal and external consulting, leadership development, and training and development. The program is interdisciplinary, and students may tailor their programs to individual career needs and objectives.

The required courses in the 30-credit program cover human behavior in organizations, adult learning, group dynamics, research methods, organizational change, strategic change, global leadership, leadership development, and assessing the impact of change efforts. Project work in Washington-area business, industry, government, and community organizations may be a part of the learning experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
Visit the program website (http://gsehd.gwu.edu/programs/organizational-leadership-learning) for additional information.

**requirements**

The following requirements must be fulfilled: 30 credits, including 21 credits in required courses and 9 credits in elective courses.

**master of arts in education and human development in the field of rehabilitation counseling**

The master of arts in education and human development in the field of rehabilitation counseling degree program offers both a 48-credit and a 60-credit track.

The 48-credit master of arts in education and human development in the field of rehabilitation counseling degree program prepares highly knowledgeable students to become professional practitioners assisting persons who are physically, mentally, emotionally, or socially disabled to become empowered and to assume or to resume their place in society. This program leads to licensure and public and private employment opportunities.

The 60-credit program is similar to the 48-credit program, but adds four courses consistent with the requirements for certification as a rehabilitation counselor and licensure eligibility as a professional counselor. This program prepares graduates to design, develop, and evaluate rehabilitation counseling services in order to best meet the needs of persons with disabilities in their professional counseling settings.
Students learn to apply foundational rehabilitation counseling principles and to develop a counseling plan of services. Program graduates are eligible for both certification (certified rehabilitation counselor) and state licensure.

Areas of concentration include autism spectrum disorder, traumatic brain injury, and psychiatric disabilities and substance abuse.

Specific admission requirements are shown on the Graduate Program (http://www.gwu.edu/all-graduate-programs) Finder. Visit the program website (https://gsehd.gwu.edu/programs/masters-rehabilitation-counseling) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: A minimum of 48 credits for the regular program or a minimum of 60 credits for the program with licensure eligibility.

The regular program also offers optional concentrations in autism spectrum disorders, substance abuse and psychiatric disabilities, and traumatic brain injury.

**Regular program**

Minimum 48 credits

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SCHOOL COUNSELING

The master of arts in education and human development in the field of school counseling degree program prepares students to successfully address the social responsibility and diverse critical concerns affecting the personal, academic, and career well-being of K-12 students. The program provides professional preparation for individuals to become certified as counselors in public and private schools. Rigorous coursework explores effective school-based theory, research, interventions and strategies, and is strengthened by practical lab experience in the Community Counseling Services Center (https://gsehd.gwu.edu/ccsc) working with children, teens, and adults from the region.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/school-counseling) for additional information.

MASTER OF EDUCATION IN THE FIELD OF SECONDARY EDUCATION

The master of education (MEd) in the field of secondary education degree program is designed for those individuals with an undergraduate degree in the arts and sciences, or equivalent. Degree candidates may specialize in English, K-12 English as a second language, K-12 foreign languages (Arabic, Chinese, French, German, Italian, Latin, Russian, and Spanish), mathematics, science (biology, chemistry, general science, and physics), or social studies. Required program coursework includes credits leading to eligibility for teacher licensure/certification; specific coursework in the subject area to be taught may be needed to meet jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/secondary-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits (36 credits for the ESL concentration), all required core courses, and all courses and elective credits indicated in one of the concentrations.

In addition, all students are required to complete a teaching portfolio and the relevant teacher licensure assessments, the latter of which are required by the District of Columbia Educator Licensure Services Office.

**BACHELOR OF ARTS WITH A MAJOR IN SPANISH AND LATIN AMERICAN LANGUAGES, LITERATURES, AND CULTURES, AND MASTER OF EDUCATION IN SECONDARY EDUCATION, WITH A CONCENTRATION IN FOREIGN LANGUAGE EDUCATION**

Columbian College’s Department of Romance, German, and Slavic Languages and Literatures and the Graduate School of Education and Human Development offer a combined bachelor of arts with a major in Spanish (p. 385) and master of education in the field of secondary education (p. 528). Undergraduate students take 6 graduate credits as part of their degree program, thereby decreasing the number of credits normally required for the master’s degree. Students in the combined program must complete all requirements for both degrees. By completing the requirements for the MED, students also complete requirements to be eligible for K-12 licensure in foreign language teaching, Spanish.

Students apply for and gain admission to the master’s program in their junior year, assuming they are progressing satisfactorily in meeting Spanish content area requirements. Consult the
The master of arts in education and human development (MAEd&HD) in the field of special education for children with emotional and behavioral disabilities (EBD) is an intensive degree program that prepares its graduates to work with learning and emotional problems of students in grades K-8. The program is designed to develop competencies in the nature and needs of troubled children; assessment, programming, and teaching; and working effectively as an interdisciplinary and interagency team member. Graduate students have the opportunity to work intensively with students with disabilities in a therapeutic school setting, applying their coursework directly to practice while being mentored by school-based cooperating teachers and University faculty and staff.

The program is nationally recognized by the Council for Exceptional Children, is accredited by the Council for the Accreditation of Educator Preparation (CAEP), and has been training exemplary special educators for over twenty years.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS**

This master of arts in education and human development degree program equips current educators with the knowledge and skills needed to understand and address the cultural, linguistic, social, and learning needs of students—including those with special needs—whose diversity impacts their school success. The program is designed for licensed teachers and educators who wish to expand their knowledge to address the changing demographics of the modern classroom. Program coursework and field experiences are built around competencies in the areas of assessment, lesson planning, and teaching, with a focus on culturally and linguistically diverse students. Master’s degree students develop a professional portfolio and sit for the PRAXIS I, SPED PRAXIS, and grade-level Principles of Learning (PLT) exams at the end of the
program. Graduates are prepared to work with students who have disabilities and those in the process of second language acquisition. Course work is offered in both distance learning and on-campus formats.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/special-education-culturally-linguistically-diverse-learners) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses; and successful completion of the master of arts in education and human development comprehensive examination; and completion of the relevant teacher licensure assessments (see below).

EDUCATION SPECIALIST PROGRAMS

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 532)
- Education Specialist in the field of special education (p. 533)

Visit the Graduate School of Education and Human Development website (https://gsehd.gwu.edu/programs/education-specialist-educational-leadership-and-administration) for additional information.

EDUCATION SPECIALIST IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The education specialist in the field of educational leadership and administration degree program is designed for students who have at least one year of instructional experience and seek further professional preparation for specific objectives, including leadership and promotion of high-quality student achievement at the district, sub-district, or school-wide level. This post-master’s program can be pursued either in the classroom or in an online learning format. Graduates are prepared with the skills to become PK-12 leaders who understand curriculum design, instructional excellence, motivation and support of classroom professionals, and the needs of diverse learning communities. Evidence-based coursework emphasizes leadership and management, change, communication, administrative and legal issues, human relations, equality and social justice, supervision of instruction, and curriculum analysis.

The EdS program is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP) the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC). The program includes courses and PK-12 field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**EDUCATION SPECIALIST IN THE FIELD OF SPECIAL EDUCATION**

The educational specialist (EdS) in the field of special education degree program offers advanced study for students with master’s degrees in education who seek further professional preparation in the various subfields of special education and disability studies. Specific programs are developed in concert with faculty advisors and consist of a minimum of 30 graduate credits.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**REQUIREMENTS**

The following requirements must be fulfilled: 30 credits in a program developed in consultation with the advisor. This program must include at least 12 credits in graduate courses in the following general areas:

- background and general principles of the field of study
- an area of specialization
- research methods
- professional internship

**DOCTORAL PROGRAMS**

**Doctoral Programs**

- Doctor of Education in the field of curriculum and instruction (p. 533)
- Doctor of Education in the field of education policy (p. 534)
- Doctor of Education in the field of educational leadership and administration (p. 535)
- Doctor of Education in the field of higher education administration (p. 536)
- Doctor of Education in the field of human and organizational learning (p. 537)
- Doctor of Education in the field of special education (p. 539)
- Doctor of Philosophy in the field of counseling (p. 541)
- Doctor of Philosophy in the field of education (p. 540)

Visit the Graduate School of Education and Human Development website (https://gsehd.gwu.edu/programs) for additional information.

**DOCTOR OF EDUCATION IN THE FIELD OF CURRICULUM AND INSTRUCTION**

The doctor of education in curriculum and instruction degree program prepares education leaders whose objective is to improve pre-K through 16+ education in local, national, and international settings. The program encourages critical thought and creative work through coursework focusing on curriculum, instruction, research, and other learning opportunities that intentionally link teaching and learning, policy, and evaluation to students’ prior experiences.

The program focuses on understanding how curriculum and instruction can be constructed and applied to educational reform and diverse student populations. Doctoral students become part of a community that links scholars with practicing professionals, policy makers, and educational organizations in Washington, DC, and beyond. Students can also use the program to expand their content knowledge or delve into other fields through linkages with Columbian College of Arts and Sciences or other schools at GW.

Graduates of the program can be found working in government agencies, teaching in university settings, or running informal education organizations. They may be curriculum supervisors in school systems or master teacher leaders in schools.
REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (p. 507).

A minimum of 66 credits, successful completion of a master’s comprehensive examination, and an approved dissertation proposal.

Comprehensive Examination

Successful completion of a comprehensive examination is required.

*Prerequisite statistics courses must be taken during the master’s degree or must be completed prior to taking required advanced courses. For students who have not had an introductory statistics course or do not feel confident in their understanding and application of basic statistical techniques (i.e. through one way analysis of variance), EDUC 6116 Introduction to Educational Statistics, should be completed prior to enrolling in EDUC 8120 Group Comparison Designs and Analyses.

DOCTOR OF EDUCATION IN THE FIELD OF EDUCATION POLICY

The doctorate in education policy is offered only on the main campus of GW in the Foggy Bottom area of Washington, D.C. The interdisciplinary program relies on approaches and methods from various social science disciplines to develop skills that are needed to examine and assess education.
problems in the context of their social environments. The program is designed for students who wish to develop advanced skills in policy research and program evaluation that are often essential in analyzing education policies in their formation, conditions, implementation as well as their impact. Emphasis is placed on developing depth of understanding and the technical skills of assessing the political, economic, and social environments that shape education policies and their consequences. Topics covered in this degree include the evaluation of school reform, urban education problems, student achievement, school finance and its equity, equality of educational opportunities, teacher quality and effectiveness, access to higher education, and accountability in educational systems. Graduates of the program pursue careers in research, program evaluation, or academia. Many become policy researchers and analysts in government and non-profit organizations that use research to devise, advocate for, or evaluate education policies. The 54-credit program includes core policy analysis courses, research methods courses, and elective courses that are used to develop expertise and skills in a substantial area of education policy.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gsehd.gwu.edu/programs/doctorate-education-policy) for additional information.

**DOCTOR OF EDUCATION IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION**

The EdD in educational leadership and administration program is designed to establish direct and meaningful connections between students’ professional lives and the knowledge obtained in the program, including the research exploration and implementation process. Program graduates are prepared to be scholar-leaders in PK-12 educational environments, ready to apply findings from educational research and to use local evidence to directly improve learning for students in those settings.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

## DOCTOR OF EDUCATION IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The mission of the doctor of education in higher education administration degree program is to prepare exceptional leaders for administrative, academic, and research positions in two- and four-year higher education institutions, national and international associations, government agencies, and other post-secondary educational settings. The degree provides students with opportunities to integrate theory and research seamlessly with practice.

Program graduates rise rapidly within administrative and scholarly ranks based on their knowledge of critical issues in the field of higher education, ability to conduct independent primary research, and possession of the skills necessary for academic and administrative career development.

Specific admission requirements are shown on the Graduate Program Finder. ([http://www.gwu.edu/all-graduate-programs](http://www.gwu.edu/all-graduate-programs))

Visit the program website ([http://gsehd.gwu.edu/programs/higher-education-administration](http://gsehd.gwu.edu/programs/higher-education-administration)) for additional information.

## DOCTOR OF EDUCATION IN THE FIELD OF HUMAN AND ORGANIZATIONAL LEARNING

The doctor of education (EdD) in human and organizational learning program is designed to provide professionals with a foundation in relevant theories, concepts, and practices towards facilitating change initiatives and in becoming more effective leaders and decision makers.

The program is offered with two distinct focuses at different GW campuses.

### Foggy Bottom Campus-Based Program

The Foggy Bottom campus offers working professionals evening courses on weeknights. The curriculum focuses on organizational issues such as strategic change, transformational leadership, individual and group learning processes, organizational development, global and international issues, the humane organization, virtual organizations, meaning of work, and self-directed learning. In addition to completing the required coursework, students work with an advisor to create an individually designed program around the student’s area of interest. All classes at the Foggy Bottom campus are offered on weeknights.

### Virginia Science and Technology Campus-Based Program: Executive Leadership

The Virginia Science and Technology campus cohort focuses on the interrelationships among people, organizations, and learning, while using systemic change processes. The program encourages students to challenge assumptions through critical reflection and fosters group and self-directed learning. Program students come from a variety of professions including business, health care, the military, education, federal agencies, information technology, and manufacturing, and have a variety of academic backgrounds with degrees in fields such as engineering, psychology, health and medical sciences, the humanities, and business. This diverse population enriches the learning experience for fellow students and provides both local and global networking opportunities. All classes at the Virginia Science and Technology campus are offered over a two-day period—Friday and Saturday—once per month, enabling students to continue working full time while pursuing the degree. In addition to the general requirements for admission to the EdD, applicants must have at least five years of full-time experience in a field related to human and organizational learning.

### Comprehensive examination

Successful completion of a comprehensive examination is required.

### Electives

2 credits selected in consultation with advisor

DOCTOR OF EDUCATION IN THE FIELD OF SPECIAL EDUCATION

Addressing the challenging demands of disability in society through institutional improvements is essential to supporting individuals with disabilities.

The doctor of education in the field of special education degree program prepares individuals determined to transform educational and social institutions into inclusive environments through relevant and rigorous research in order to improve the lives of all persons with disabilities. Included in the course sequence are leadership, policy and research courses, as well as foundational courses in brain development from early childhood through adulthood.

The doctor of education in the field of special education degree program has a unique emphasis on developmental science research and how to interpret and apply it to the field of special education. Students study structural and functional changes in the brain, examine cognitive processing, and consider the implications of those findings for teaching, learning, and educational policy. Graduates leave prepared to have an impact through leadership in academic settings, research communities, policy institutions, and advocacy organizations.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (p. 507).

60 credits, including 15 credits in foundation courses, a minimum 15 credits in research courses including 3 credits in advanced research, 6 credits in internship courses, a minimum 15 credits in dissertation courses, 9 credits in elective courses, and successful completion of a comprehensive examination.

**DOCTOR OF PHILOSOPHY IN EDUCATION**

The doctor of philosophy (PhD) in education degree program is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address issues, scholars require both a strong foundation in education as well as theoretical and disciplinary grounding in multiple disciplines. The PhD program is distinguished by four characteristics: candidates apply to a cross-disciplinary research team that is focused on a critical problem related to education; approaches to the research problems require a cross-disciplinary lens; students engage in research throughout their program; and candidates aspire to careers in which the production of research is paramount.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://gsehd.gwu.edu/programs/#crossdisciplinary) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 60 credits in required courses and successful completion of the comprehensive examination.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COUNSELING

The doctor of philosophy in counseling degree program balances rigorous research with clinical work to create advanced scholar practitioners. Graduates are prepared for a number of roles such as teaching in universities, practicing in a variety of settings from directing high school counseling departments to leading county mental health treatment programs. The program offers challenging coursework and continued development of counseling and counseling supervision skills at the Graduate School of Education and Human Development’s Community Counseling Service Center (https://gsehd.gwu.edu/ccsc). Designed to be completed in four to five years, the program builds students’ knowledge and capacity to conduct research, publish, provide advanced counseling services, develop counseling supervision skills, and teach at the graduate level. Faculty expertise is represented in several areas including trauma, human sexuality, child and adolescent development, ethics and counselor development, grief and loss, substance abuse, and multicultural counseling. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

A minimum of 75 credits, including 33 credits in core courses, 12 credits in research courses, 6 credits in human development courses, 9 credits in an area of specialization, 15 credits in dissertation courses, and successful completion of the comprehensive examination.

Requirements of the Doctor of Philosophy (p. 507) program.

GRADUATE CERTIFICATE IN AUTISM SPECTRUM DISORDERS

The graduate certificate in autism spectrum disorders prepares students to address more effectively the following issues in working with children with autism spectrum disorders: academic achievement and study skills commensurate with their cognitive strength, which provides the widest range of options for college and career choices; social skills for navigating all of the environments in which they live, work, and play; and problem-solving strategies that enable them to respond flexibly and successfully in challenging situations.

The certificate program is designed for individuals with a bachelor’s or master’s degree who are interested in focusing on a multi-intervention approach to instructing students with autism spectrum disorders.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

GRADUATE CERTIFICATE IN BRAIN INJURY: EDUCATIONAL AND TRANSITION SERVICES

Offered online

The graduate certificate in brain injury: educational and transition services is offered through an interdisciplinary program that prepares educators and interdisciplinary personnel to address the needs of youth and young adults with brain injury as they transition from school to postsecondary education, competitive-integrated employment, community engagement, and independent living. The program integrates the roles of relevant disciplines and service agencies, including evidence-based practices and professional knowledge, and skills standards for the fields of brain injury and secondary transition.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**POST-MASTER'S CERTIFICATE IN EDUCATIONAL LEADERSHIP AND ADMINISTRATION**

Offered online and on campus

The post-master’s certificate in educational leadership and administration is designed for students who hold a master’s degree and have at least one year of PK-12 instructional experience. Students are prepared to promote high-quality student achievement and become a leader in various public school-based and central office positions. The academic program includes courses and PK-12 field experiences designed to meet administrative certification requirements in
the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

This accelerated program can be pursued either in the classroom or in an online, distance learning format and is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP), the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

**GRADUATE CERTIFICATE IN INSTRUCTIONAL DESIGN**  
*Offered online*

The graduate certificate in instructional design—offered exclusively online—prepares students to apply the theories, principles, models, tools, and techniques of systematic instructional design in diverse organizational settings. Students have numerous opportunities to integrate their professional experiences into their learning, to apply their course assignments to their current professional activities, and to actively engage with other professionals in the development of valued instructional design proficiencies.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)  
Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-instructional-design) for additional information.

**GRADUATE CERTIFICATE IN JOB DEVELOPMENT AND PLACEMENT**  
*Offered online and on campus*

The graduate certificate in job development and placement is ideal for a variety of professionals in state, federal, nonprofit, and community-based rehabilitation. Students delve into the social and cultural dimensions of rehabilitation counseling, as well as job development and job placement methods and techniques. The curriculum provides specialized experiential learning opportunities by integrating classroom course work with hands-on experience through a required 50-hour practicum.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)  
Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-job-development-job-placement) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 12 credits in required courses.

**Required:**
In addition to the required coursework, students are required to complete a 50-hour supervised practicum in a vocational rehabilitation agency (public or community partner program) to gain job development and job placement experience. The practicum must be completed within one year from date of entry to the program in order for the student to complete all requirements in the allowed period and receive the certificate. Students should consult with the program coordinator and/or academic advisor prior to beginning the practicum.

### GRADUATE CERTIFICATE IN LEADERSHIP DEVELOPMENT

The graduate certificate in leadership development provides in-depth understanding of organizations as human systems and the practical knowledge required to improve organizational effectiveness through leadership and training. Students acquire knowledge and skills in the areas of adult learning, group processes, organizational diagnosis, and consulting strategies.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-leadership-development) for additional information.

### REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in core courses and 12 credits in elective courses chosen on consultation with Master’s coordinator.

### 6 credits from one track

**Track 1: Improvement Science for Teacher Leadership**

- EDUC 6843 | Improvement Science as Educational Change |
- EDUC 6844 | Internship: Teacher Practicum in Improvement Science (taken for 3 credits) |

**Track 2: Administrative Licensure**

- EDUC 6232 | Supervision of Curriculum, Instruction, and Assessment |
- EDUC 6287 | Internship: Administration (taken for 3 credits) |
GRADUATE CERTIFICATE IN ORGANIZATIONAL LEARNING AND CHANGE

The graduate certificate in organizational learning and change provides an in-depth understanding of how a learning focus helps organizations improve their performance and create sustainable change. Students acquire the practical knowledge and skills necessary to assess organizational performance, and help design and lead effective change initiatives.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-organizational-learning-and-change) for additional information.

GRADUATE CERTIFICATE IN TRANSITION SPECIAL EDUCATION

Offered online

The graduate certificate in transition special education prepares interdisciplinary personnel to be a change agent in teaching, leadership and support roles. The certificate program prepares leaders to assist youth with disabilities and at-risk youth to make successful transitions through high school to post-secondary education, competitive-integrated employment and full citizenship. The curriculum integrates the Council for Exceptional Children (CEC) Advanced Knowledge and Skills for Transition Specialists.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-transition-special-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses and 12 credits in electives.

GRADUATE CERTIFICATE IN SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

Offered online and on campus

The graduate certificate in special education for culturally and linguistically diverse learners is designed to enhance skills to meet the needs of students with diverse cultural and linguistic backgrounds and those with varying social and learning abilities. Students focus on the inter-relationships of school, home, and community to improve the quality of education for children with diverse needs. A holistic approach to the curriculum utilizes the latest research, theory, and data-driven best practices to prepare you to empower and improve the quality of learning for children with diverse needs.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-special-education-culturally-and-linguistically-diverse-learners) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses and 12 credits in electives.
GRADUATE CERTIFICATE IN STEM MASTER TEACHER

The graduate certificate in STEM master teacher provides K-12 educators with an opportunity to expand their skills and methods for engaging students in rich, powerful STEM (science, technology, engineering, and mathematics) learning experiences. This 12-credit certificate program develops teacher understanding of curriculum and instruction that is integrated across STEM disciplines, and allows their students to participate in the practices of the STEM disciplines.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-stem-teaching) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and a 3-credit elective course.

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

GRADUATE CERTIFICATE IN TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES

Offered online and on campus

The graduate certificate in teaching English to speakers of other languages is ideal for prospective teachers in both ESL and content areas who wish to teach in the United States and abroad. Students learn to identify and interpret the characteristics and needs of English learners and apply knowledge in the practice of instructional methodology and assessment that develops academic and social English proficiency. The four courses in the TESOL graduate certificate count towards most state licensure or add-on endorsement requirements and provide students with knowledge and skills needed to achieve on the English for Speakers of Other Languages Praxis Test.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
Visit the program website (https://gsehd.gwu.edu/programs/graduate-certificate-teaching-english-speakers-other-languages-tesol) for additional information.

**COUNSELING AND HUMAN DEVELOPMENT**

**GRADUATE**

**Graduate Certificate**
- Post-Master's Certificate in Counseling (p. 544)

**Master's programs**
- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 511)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 526)
- Master of Arts in Education and Human Development in the field of school counseling (p. 528)
- Master of Arts in Education and Human Development individualized program (p. 522)

**Doctoral program**
- Doctor of Philosophy in the field of counseling (p. 541)

**FACULTY**

**Professors** J. Garcia, K. Hergenrather, S. Marotta-Walters (Chair)

**Associate Professors** R. Dedmond, R. Lanthier, M. McGuire-Kuletz

**Assistant Professors** S. Beveridge, E. Crunk, S. Cho Kim, M. Megivern, M. Parker, D. Pittman

**COURSES**

**Explanation of Course Numbers**
- Courses in the 1000s are primarily introductory undergraduate courses.
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students.
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

Programs in counseling are offered at the graduate level by the Graduate School of Education and Human Development (http://gsehd.gwu.edu) through its Department of Counseling and Human Development (http://gsehd.gwu.edu/content/department-counseling-and-human-development).

**CNSL 0920.** Continuing Research - Master's. 1 Credit.

**CNSL 0940.** Continuing Research - Doctoral. 1 Credit.

**CNSL 2102.** Foundations of Counseling. 3 Credits.

**CNSL 2162.** Professional and Ethical Orientation to Counseling. 3 Credits.
- The roles and functions of a professional counselor and the ethical standards that govern the profession.

**CNSL 2163.** Psychosocial Adjustment. 3 Credits.
- Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.

**CNSL 2376.** Introduction to Rehabilitation Counseling. 3 Credits.
- Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.

**CNSL 2378.** Disability Management and Psychosocial Rehabilitation. 3 Credits.
- Case management services for persons with physical, mental, and emotional disabilities.

**CNSL 2381.** Medical and Psychosocial Aspects of Disabilities. 3 Credits.
- Chronic and traumatic disorders; rehabilitation and psychosocial implications.

**CNSL 6100.** Special Workshop. 1-12 Credits.
- Topics to be announced in the Schedule of Classes. May be repeated for credit.

**CNSL 6101.** Research and Independent Study. 1-3 Credits.
- Individual research under guidance of a staff member. Program and conferences arranged with an instructor.
CNSL 6103. Thesis Research. 3 Credits.
CNSL 6104. Thesis Research. 3 Credits.
CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.
CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.
The roles and functions of a professional counselor and the ethical standards that govern the profession.
CNSL 6153. Counseling Interview Skills. 3 Credits.
Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Permission of the instructor required for non-counseling majors. CNSL 6151 may be taken as a corequisite. Material fee. Prerequisites: CNSL 6151 for counseling majors.
CNSL 6154. Theories and Techniques of Counseling. 3 Credits.
An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.
CNSL 6155. Career Counseling. 3 Credits.
A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.
CNSL 6157. Individual Assessment in Counseling. 3 Credits.
Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.
CNSL 6159. Psychosocial Adaptation. 3 Credits.
Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.
CNSL 6161. Group Counseling. 3 Credits.
Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.
CNSL 6163. Social and Cultural Dimensions - CNS. 3 Credits.
Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. CNSL 6153 may be taken as a corequisite. Permission of the instructor required for non-counseling majors. Prerequisites: CNSL 6153 for counseling majors.
CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.
The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.
CNSL 6169. Counseling Substance Abusers. 3 Credits.
Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.
CNSL 6170. Grief and Loss. 3 Credits.
Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.
CNSL 6171. Family Counseling. 3 Credits.
The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.
CNSL 6172. Human Sexuality for Counselors. 3 Credits.
Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.
CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.
For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.
CNSL 6174. Trauma and Crisis Intervention. 3 Credits.
This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course covers the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course provides a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.
CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.
Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver’s grief, spirituality, and cross-cultural issues.
CNSL 6177. Spirituality and Loss. 3 Credits.
Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.
The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Practicum/Internship in Counseling. 3 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting. Material fee.

CNSL 6186. Advanced Internship in Counseling. 3-6 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Material fee. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.
The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.
Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.
Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations/Practicum: Clinical Mental Health Counseling. 3 Credits.
Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6269. Practicum I in Mental Health Counseling. 3 Credits.
First in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision, developing therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisites: CNSL 6151, CNSL 6153, CNSL 6154, CNSL 6157, CNSL 6163, CNSL 6173, CNSL 6174, CNSL 6268, EDUC 6115 and HDEV 6108.

CNSL 6270. Practicum II in Mental Health Counseling. 3 Credits.
Second in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision, developing therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisite: CNSL 6269.

CNSL 6376. Foundations/Practicum: Rehabilitation and Case Management. 3 Credits.
Survey of history, philosophy, basic principles, legislation, roles, and services.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.
Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.
Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.
Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.
Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.
Workers’ compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.
Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.
CNSL 6466. Foundations of School Counseling K-12. 3 Credits.
Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.
CNSL 8100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.
Guided individual research. Program and conferences arranged with an instructor.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.
A post-master's course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisites: CNSL 6161 and permission of the instructor.

CNSL 8251. Advanced Psychopathology and Pharmacology. 3 Credits.
In-depth study of psychopathology and standard pharmacological intervention to psychological dysfunction associated with distress or impaired functioning; the range of child, adolescent, and adult presentations of psychological disorders seen in clinical practice.

CNSL 8252. Leadership and Advocacy in Counseling. 3 Credits.
Exploration of leadership styles as they apply to counseling professionals. Ethical and multicultural issues associated with leadership and advocacy will be presented, consultation models will be introduced.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.
Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Permission of the instructor required prior to enrollment. Prerequisite: CNSL 6163. Recommended background: PhD degree student in the field of counseling; completed a master's degree in counseling.

CNSL 8255. Supervision in Counseling. 3 Credits.
Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Permission of the instructor required prior to enrollment. Restricted to students in the PhD in counseling program.

CNSL 8256. Doctoral Practicum in Counseling. 3 Credits.
Supervised clinical experiences in applied settings. Students receive University-based supervision related to their cases through group supervision and case presentations.

CNSL 8257. Doctoral Internship in Teaching. 3 Credits.
Minimum 300 clock hours of supervised didactic and experiential learning activities relevant to instructional roles and responsibilities in counselor education.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.
Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For EdS and PhD degree candidates in the field of counseling. Permission of the instructor required prior to enrollment.

CNSL 8259. Doctoral Internship in Supervision I. 3 Credits.
Doctoral internship.

CNSL 8260. Doctoral Internship in Supervision II. 3 Credits.
Doctoral internship. Prerequisite: CNSL 8259.

CNSL 8961. Doctoral Internship in Research. 3 Credits.
Critical approach to reading research; practical experience in applied research design; integration of theoretical, research, and applied elements of the profession of counseling.

CNSL 8998. Predissertation Seminar. 3 Credits.
Required of all doctor of philosophy in the field of counseling degree candidates.

CNSL 8999. Dissertation Research. 3,6 Credits.
Prerequisite: CNSL 8998/EDUC 8998.

HDEV 6108. Life Span Human Development. 3 Credits.
Continuity and change in developmental attributes. The developing person in relation to social norms, roles, and stage-graded expectations from birth to death. Interaction between biogenetics and environment.

HDEV 6109. Child Development. 3 Credits.
Typical development and the familial and social antecedents of developmental risk. Environments that foster competent children and developmental sequelae of childhood vulnerability and trauma. For graduate students in counseling, psychology, and related disciplines.

HDEV 6110. Adolescent Development. 3 Credits.
Key attributes and problems in adolescent development. Typical adolescent development and contemporary social problems in relation to stress, risk, and resilience. For graduate students in counseling, psychology, and related areas.

HDEV 6129. Cultural Effects on Human Development. 3 Credits.
Effects of culture on the experience and expression of self, others, space, time, faith systems, norms, and other attributes. Egocentric and sociocentric effects, primitive and technological effects. Group immersion as the basis for prejudice. Developmental consequences as a consequence of cultural context.

HDEV 6161. Practicum in Human Development. 3 Credits.
Permission of the instructor required prior to enrollment.

HDEV 6162. Internship in Human Development. 3 Credits.
Permission of the instructor required prior to enrollment.

HDEV 6701. Adult Learning. 3 Credits.
Same as HOL 6701.
HDEV 8100. Issues and Special Topics in Human Development. 3-6 Credits.
Issues and special contemporary topics related to child, adolescent, and adult development. Applications for professional roles.

HDEV 8241. Emotional and Cognitive Development. 3 Credits.
Emotional and cognitive development as related to self-esteem, social cognition, and interpersonal skills. Relationships among cognitive development, intellectual reasoning, insight, and social development.

HDEV 8244. Adult and Aging Development. 3 Credits.
Theories and research on personality and intelligence in adulthood. Research designs and methods. Implications of developmental data for counseling and selected professional roles.

HDEV 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/ HOL 8742.

CURRICULUM AND PEDAGOGY

GRADUATE

Graduate Certificate

- Graduate Certificate in Teaching English to Speakers of Other Languages (p. 550)
- Graduate Certificate in STEM Master Teacher (p. 550)

Master's programs

- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 512)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 512)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 513)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 514)
- Master of Arts in Education and Human Development individualized program (p. 522)
- Master of Education in the field of elementary education (p. 520)

- Master of Education in the field of secondary education (p. 528)

Combined program

- Dual Master of Arts in Education and Human Development in the field of Curriculum and Instruction with a concentration in Elementary Education and Graduate Certificate in Incorporating International Perspectives in Education (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-curriculum-instruction/elementary-education-iipe)

Doctoral program

- Doctor of Education in the field of curriculum and instruction (p. 533)

FACULTY

Associate Professors E. Brown, C. Green, B. Casemore, S. Beck, J. Eakle (Chair), C. Pyke, P. Tate

Assistant Professors L. Baker, J. Grooms, M. Sheppard, T. Sikorski

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.
CPED 0940. Continuing Research - Doctoral. 1 Credit.
CPED 6100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

CPED 6100W. Special Topics. 1-12 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CPED 6101. Research and Independent Study. 1-3 Credits.
Individual research under the guidance of a staff member; program and conferences arranged with an instructor.

CPED 6131. Teaching Jewish History to Middle and High School Students. 3 Credits.
Concepts for educators surrounding the ways in which Jewish historians interpret primary sources and analyze historiographic debates.
CPED 6132. Strategies for Teaching Biblical Texts. 3 Credits.
Analysis of major biblical narratives using study methods ranging from the historical to the literary; key aspects of biblical interpretation and strategies for teaching Bible effectively.

CPED 6133. Rabbinic Judaism and the Teaching of Rabbinic Texts. 3 Credits.
The development of rabbinic Judaism through a study of its thought and literature using primary texts from 100 to 500 C.E.; best practices for teaching rabbinic texts using different pedagogical approaches; distinctions between a historically-based academic approach and a more imaginative, theological approach.

CPED 6134. Practicum in Jewish Education. 2 Credits.
Field-based experiences and weekly seminar for students seeking to teach in classrooms dedicated to Jewish education; honing disciplinary expertise in the curriculum; lesson planning, instructional strategies, classroom management and intervention, and new methods and tools.

CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.

CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.

CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.

CPED 6199. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.

CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.
The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading-literacy program. 

CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.
Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6224. Diagnostic Teaching of Reading: K-6. 3 Credits.
Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.

CPED 6225. Introduction to International Curricula. 3 Credits.

CPED 6229. Current Issues in Elementary Education. 3 Credits.
Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.

CPED 6236. Analysis of Teaching. 3 Credits.
Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.

CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.
Supervised field experience in curriculum and instruction. Permission of the instructor required prior to enrollment.

CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.
Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and permission of the department.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.
Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.
CPED 6305. Foundations of Curriculum Theory. 3 Credits.
Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6339. Teachers as Researchers. 3 Credits.
Qualitative and quantitative methods of research in teaching and learning with a focus on practitioner-based research. Prepares teachers to develop an inquiry stance towards their practice and provides them with the knowledge, experiences, and skills to systematically examine their own practice and student learning.

CPED 6340. Teacher Leadership in Education. 3 Credits.
From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master's Internship in Curriculum and Instruction. 3-6 Credits.
Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.
The teaching of English in the context of the social and historical foundations of education and through conceptual frameworks from contemporary curriculum theory.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.
Significant trends, findings, and perspectives in science education in the United States from the early nineteenth century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.
Deepens students’ understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.
Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children’s Literature across the Curriculum. 2, 3 Credits.
Participants read and analyze multicultural children’s literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.
A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Permission of the advisor required prior to enrollment.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.
The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.
Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.

CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.
Supervised internship in middle schools; required seminar. Admission by permission of instructor. Material fee.

CPED 6534. Professional Internship in Secondary Education. 0-6 Credits.
Internship seminar providing various means of support related to the field placement and program portfolio, as well as a forum for engaging in academic conversation around the field experiences. Fee applies.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.
Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.
CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.
Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instructional Methods. 3 Credits.
Knowledge and skills related to the instruction and assessment of language students in English and foreign language settings; past second language teaching methods, contemporary instructional approaches and materials, and other considerations in developing academic and social language proficiency. Requires field experience in a classroom. Materials fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6554. Issues, Study, and Practices - ESL. 3 Credits.
A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.
A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.
The science of language and how its different branches may be used for English as a Second Language (ESL) teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.
The nature of first and second language acquisition and development; social, psychological, and linguistic factors affecting language acquisition; implications of language acquisition research and theory on English and foreign language classroom instruction.

CPED 6604. Perspectives in American Education. 3 Credits.
Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.
A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.
Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6622. Foundations of Reading Development. 3 Credits.
Theories of printed text reading acquisition and development; strategic processes of teaching and learning from printed texts; linguistic, cognitive, developmental, sociocultural, and affective dimensions and models of reading; design and implementation of meaningful reading instruction.

CPED 6623. Foundations of Reading Development. 2 Credits.
Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.

CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.
Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.
CPED 6626. Practicum 1: Reading Diagnosis, Assessment, and Solutions. 3 Credits.
Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.
Literacy development for language learners; theories of literacy development in a second or foreign language, strengths and needs of language learners, reading and writing instructional strategies for language and content classrooms. Appropriate for students interested in teaching ESL, foreign languages, or content areas in elementary or secondary schools. Materials fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.
How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.
Supervised internship; required seminar. Permission of the instructor required prior to enrollment. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.
Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.
In-depth coverage of approaches to integrating arts and design into STEM curricula ("STEAM") for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.
Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small "design challenges" to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.
Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a faculty member. Program and conferences arranged with an instructor.

CPED 8199. Federal Education Policy Institute. 3 Credits.

CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.

CPED 8325. Advanced Ideas in Curriculum Theory. 3 Credits.
Examination of reviews and research studies on curriculum theory. Focus on trends, values, interpretations, design systems, and evaluation. Prerequisite: CPED 6305.

CPED 8330. Paradigms of Instruction and Assessment. 3 Credits.
A foundation of theory, models, and variables that have contributed to the fields of instruction and assessment. The major paradigms of instruction and assessment. Material fee.

CPED 8331. Seminar in Instruction. 3 Credits.
Analysis of alternative models of instruction and the factors that influence the instructional process in schools. Connections among learning, instructional theory, research, and practice. Material fee.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.
Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.
Fundamental perspectives of school reform through professional development of educators (K-12); evolution of contemporary professional development models and trends; examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Research in Curriculum and Instruction I. 0-3 Credits.
Models of curriculum and instruction research spanning a variety of methodologies.

CPED 8335. Seminar in Research in Curriculum and Instruction II. 0-3 Credits.
Students develop research skills in curriculum and instruction; create an individual, unique, and focused research study that is feasible for a doctoral student to accomplish; and learn skills and strategies for writing a research proposal. Prerequisite: CPED 8334.
CPED 8340. Education Policy, Reform & Teacher Leadership. 3 Credits.
This online course will engage students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course will examine teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to Doctoral level course; masters students by permission of instructor. Prerequisites: None.

CPED 8341. Evaluation in Curriculum and Instruction. 3 Credits.
This course teaches doctoral and master’s students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; master’s students with approval of instructor.

CPED 8354. Doctoral Internship: Teacher Education. 3-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Permission of the advisor required prior to enrollment.

CPED 8998. Doctoral Seminar in Curriculum and Instruction. 3-6 Credits.
Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Permission of the instructor and major advisor required prior to enrollment. Material fee.

CPED 8999. Dissertation Research. 3-6 Credits.
Prerequisite: CPED 8998.

EDUCATIONAL LEADERSHIP

GRADUATE

Graduate certificates
• Graduate Certificate in Assessment, Measurement, and Teaching in Education (p. 543)
• Graduate Certificate in Educational Technology Leadership (http://bulletin.gwu.edu/education-human-development/certificate/ed-tech-leadership)
• Graduate Certificate in Improvement Science in Education (p. 548)
• Graduate Certificate in Teaching English to Speakers of Other Languages (p. 550)

Master's programs
• Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 511)
• Master of Arts in Education and Human Development in the field of education policy studies (p. 518)
• Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 518)
• Master of Arts in Education and Human Development in the field of educational technology leadership (p. 519)
• Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 520)
• Master of Arts in Education and Human Development in the field of higher education administration (p. 521)
• Master of Arts in Education and Human Development in the field of international education (p. 523)
• Master of Arts in Education and Human Development individualized program (p. 522)
• Master of Arts in Teaching in the field of museum education (p. 525)

Post-master's program
• Education Specialist (p. 507)

Doctoral programs
• Doctor of Education in the field of education policy (p. 534)
• Doctor of Education in the field of educational leadership and administration (p. 535)
• Doctor of Education in the field of higher education administration (p. 536)

FACULTY

Professors M. Corry, M. Feuer, N. Milman, I. Rotberg, R. Watkins, J. Williams

Associate Professors J. Choi, J. Clayton, S. Dannels, L. Engel, J. Glazer, L. Howard (Chair), R. Jakeman, M. Kim, Y. Nakib, C. Stapp, S. Swayze, A. Tekleselassie, B. Weiss
Explanations of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses.
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students.
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

EDUC 0920. Continuing Research - Master's. 1 Credit.
- EDUC 0940. Continuing Research: Doctoral. 1 Credit.

EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.
A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.

EDUC 3002. Special Workshops. 3 Credits.
- EDUC 6100. Experimental Courses. 1-12 Credits.
- Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.
- EDUC 6101. Research and Independent Study. 1-3 Credits.
- Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.

EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.
Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.

EDUC 6114. Introduction to Quantitative Research. 3 Credits.
Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.

EDUC 6116. Introduction to Educational Statistics. 3 Credits.
Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Edu 8120.

EDUC 6232. Supervision of Curriculum, Instruction, and Assessment. 3 Credits.
Preparation to lead and assess curriculum, instruction, and assessment practices in educational settings.

EDUC 6234. Foundations of K-12 Educational Leadership. 3 Credits.

EDUC 6236. School Law and Policy. 3 Credits.
The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.

EDUC 6238. Leadership for Equity and Social Justice. 3 Credits.
Cultural diversity and social justice in the context of teaching, learning, and leadership practice; systemic inequities in schools and how inclusive and socially just leadership practices can address these inequities.

EDUC 6240. Instructional Leadership for School Improvement. 3 Credits.
Introduction to the theory and practice of school improvement with a focus on the role of school leaders in the process.

EDUC 6242. Administrative Issues in Education. 3 Credits.
The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.

EDUC 6244. School, Family, and Community Engagement. 3 Credits.
The purpose, scope, essential elements, and impact of a successful school-community relations program; community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, and evaluation of public relations and marketing for educational institutions.

EDUC 6246. School Finance and Resource Management for School Leaders. 3 Credits.
Theory and practice of personnel and resource management for school administrators; selection, compensation, evaluation, promotion, retention, and removal of staff; principles of effective financial and resource management, including accounting, budgeting, and reporting; technology acquisition, building operations, and facilities management.
EDUC 6252. Human Relations Diversity. 3 Credits.
Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.

EDUC 6256. School Business Management. 3 Credits.
Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.

EDUC 6258. School Finance. 3 Credits.
The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.

EDUC 6260. Practicum in Supervision. 3-6 Credits.
Practical experience in supervision of instruction. Admission by permission of instructor.

EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.
Service in a school situation directed by the University’s faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.
Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6270. Education Policy for School Leaders. 3 Credits.
Overview of education policy for educational leaders; economic and social dimensions of education policy and analysis of the policy process; policy development, planning, implementation, analysis, and evaluation.

EDUC 6272. Leading Evidence-Based Action Research for School Improvement. 3 Credits.
Culminating experience implementing the design and leadership of an action research project at a school or central office location. Gathering and analysis of data, reviewing the literature, developing and implementing a program to address an identified area of need; and measuring the program’s effectiveness and reflecting on/modifying it based on results. Prerequisite: EDUC 6287.

EDUC 6287. Internship: Administration. 1-6 Credits.
Standards-based work in a practical setting, planned and guided cooperatively by GW and personnel in the placement school district.

EDUC 6314. History of American Education Reform. 3 Credits.
An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.
A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.
An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.
Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.
Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.
Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Applying Educational Media and Technology. 3 Credits.
Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Computers in Education and Human Development. 3 Credits.
The research and practice surrounding the use of computers in educational and training settings. Students acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.
Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.
For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.
The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.
EDUC 6406. Instructional Design. 3 Credits.
Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.
Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.
Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Analysis. 3 Credits.
An introduction to the role of instructional needs analysis and assessment. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.
Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.
The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.
Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.

EDUC 6426. Computer Interface Design for Learning. 3 Credits.
Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.
Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.
Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.
Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master’s Project. 1-6 Credits.
Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Introduction to Student Affairs and Higher Education. 3 Credits.
Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.
Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.
College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.
An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Leadership. 3 Credits.
This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course explores how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.
Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.
EDUC 6550. Assessment in Higher Education. 3 Credits.
Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.
Assessment of policies that impact higher education, including the relationship of K-12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.
Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.
Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.
An examination of the planning movement in education: its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.
An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.
Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.

EDUC 6579. Managing Multicultural Environments. 3 Credits.
Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master’s Internship in Higher Education Administration. 3-6 Credits.
Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6590. Capstone in Higher Education Administration. 0 Credits.
The capstone is designed to promote the integration of the core curriculum and practitioner experiences of the Master’s degree program in Higher Education Administration, and to prepare for student transition to a professional student affairs or academic affairs position following completion of the degree. Restricted to students in the MAEd&HD in higher education administration program.

EDUC 6601. International and Comparative Education. 3 Credits.
Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.
In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.
Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.

EDUC 6620. Strategies and Analysis in International Education. 3 Credits.
Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.
Study and research in a foreign country as part of a group program. Admission may require permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.
Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission may require permission of instructor. May be repeated for credit.

EDUC 6640. Selected Topics in International Education. 3 Credits.
Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.
EDUC 6650. Education and National Development. 3 Credits.
The role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.
Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master’s program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.
An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum’s mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.
Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.
A survey of the museum’s diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.
Supervised placement in local educational institutions. On-campus seminar focuses on human development and learning theory. Placement requires a 16 hour per week commitment.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.
Supervised placement in area museums and related organizations where students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners. Placement requires a commitment of 32 hours per week. Restricted to museum education students. Prerequisites: EDUC 6701, 6702, 6703 and 6704.

EDUC 6706. Evaluating Museum Learning. 3 Credits.
Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.
Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.
Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.

EDUC 6710. Museums and Technology. 3 Credits.
Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.
Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience’s engagement with the museum’s resources.

EDUC 6801. Prelude to Experiential Education and Jewish Cultural Arts. 1 Credit.
Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Includes extensive site visits. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6802. Finale in Experiential Education and Jewish Cultural Arts. 1 Credit.
Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Students plan and implement extensive site visits. Restricted to students in their final semester of the experiential education and Jewish cultural arts major. Prerequisite: EDUC 6801.

EDUC 6803. Introduction to Experiential Jewish Education. 4 Credits.
Introduction to the theory and practice of experiential Jewish education in a variety of settings, addressing the relationship of education to identity development. Includes a fieldwork experience.

EDUC 6804. Applied Research in Experiential Jewish Education. 6 Credits.
Overview of research methods employed in experiential Jewish educational settings and their various applications to practice. Includes an extensive fieldwork experience. Prerequisite: EDUC 6803 Introduction to Experiential Jewish Education.

EDUC 6805. Capstone in Experiential Education and Jewish Cultural Arts. 3 Credits.
Six-week, full-time internship at leading Jewish cultural institutions in the United States and abroad. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6810. Paideia and Jewish Education. 2 Credits.
Analysis of the ancient Greek concept of paideia and its implications for the theory and practice of contemporary experiential Israel education.

EDUC 6811. Foundations of Contemporary Israel. 3 Credits.
Key questions and concepts surrounding Israel’s history, and Israeli society, politics, and culture, from 1948 to present. Restricted to students in the graduate certificate in Israel education program.
EDUC 6812. American Jews and Modern Israel. 2 Credits.
The relationships of young American Jews, and the American Jewish community more broadly, to the modern State of Israel, particularly in the context of new political and ideologcal dynamics in the United States and Israel.

EDUC 6813. The Israel Educational Experience. 4 Credits.
Held in Israel over an eight-day period. Students learn about issues that characterize contemporary Israeli society and apply this learning to educational programming. Restricted to students in the graduate certificate in Israel education program.

EDUC 6840. Introduction to Improvement Science in Education. 3 Credits.
The process and application of improvement science to complex educational problems.

EDUC 6841. Inquiry Tools Supporting Improvement Science. 3 Credits.
The means by which improvement science uses and adapts to a range of established qualitative and quantitative tools, processes, and methods to support educator inquiry within the context of K-12 school settings.

EDUC 6842. Teacher Leadership through Improvement Science. 3 Credits.
Improvement science practices that facilitate teacher leadership; dispositions, knowledge, processes, and relationships supportive of teacher leaders working in different school contexts.

EDUC 6843. Improvement Science as Educational Change. 3 Credits.
Improvement science as a staged, interpretive educational change process; diverse role group perspectives; past and current reforms efforts.

EDUC 6998. Thesis Research. 3 Credits.
Thesis research.

EDUC 6999. Thesis Research. 3 Credits.

EDUC 8100. Experimental Courses. 1-12 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.
Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.
For precandidates for the EdD Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.
Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factorial design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.
A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.
Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.
Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.
Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.
Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.
Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.
Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.
Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.
EDUC 8172. Multivariate Analysis. 3 Credits.
Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.
Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.
Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.

EDUC 8175. Item Response Theory. 3 Credits.
Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.
In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment, Testing, and Measurement in Education. 3,6 Credits.
Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Permission of the instructor required prior to enrollment. Prerequisite: EDUC 8170.

EDUC 8268. Leadership Theory for Education. 3 Credits.
Historical and contemporary theories of leadership through the lens of education; leadership, adaptive leadership, and power analysis.

EDUC 8270. Fundamentals of Educational Planning. 3 Credits.
The planning movement in education at the federal, state, division, and building levels; strategic, short-term, and long-term planning processes for school and educational leaders.

EDUC 8271. Education Policy for School Leaders. 3 Credits.
The interactions of policy development, interpretation, and implementation at different levels of the system; how policy actors draw upon different values to advance and critique current problem formulations and related solutions in education.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.

EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.
Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.
The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.
Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.
Application of economic theory and analysis to education problems and policies. Contemporary education reforms that are adopted to improve educational outcomes are analyzed with emphasis on their complexities. Prerequisites: EDUC 6371, EDUC 8120.

EDUC 8322. Education Policy Implementation. 3 Credits.
The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.
Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisite: EDUC 6371.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.
Issues of policy design that underlie the push for greater accountability in education. Students review research articles and conceptual argument, discuss evidence on actual practice, and identify strengths and weaknesses of a range of policy tools. Prerequisite: EDUC 6371.
EDUC 8329. Seminar in Program Evaluation. 3 Credits.
Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.
Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.
Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.
The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.

EDUC 8515. Comparative and International Higher Education. 3 Credits.
An exploration of cultural, theoretical, and disciplinary perspectives of international higher education through a comparative lens.

EDUC 8520. Theories for Research on College Students. 3 Credits.
Theoretical approaches used to study college students; competing frameworks and the contributions of emergent approaches to understanding college students.

EDUC 8525. College and University Curriculum. 3 Credits.
Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.
Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.

EDUC 8540. History of Higher Education. 3 Credits.
History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8555. Policy Analysis in Higher Education. 3 Credits.
The intricacies of major policy debates in higher education, focusing on policy framing, goals, solutions, and implementation.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.
An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.
Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8566. Higher Education Finance. 3 Credits.
Fundamental concepts in higher education finance; state finance and policy issues; and the impact of financial decisions made at the federal, state, and institutional levels on faculty and students.

EDUC 8580. The Community/Junior College. 3 Credits.
The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.
A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.
Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.
Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8701. Education Policy Design. 3 Credits.
Processes and practices of policy planning and design in a system of federal, state and local control; effect of federal actions on the work of state and local educators; the state role in shaping federal education policies.

EDUC 8702. Evidence in Education Policymaking. 3 Credits.
Review of theory and research on evidence-informed policymaking and the practical skills of drafting evidence-informed policy initiatives; integrating research with other types of evidence to understand policy problems and formulate responses.

EDUC 8703. Implementation for Education Policymakers. 3 Credits.
The challenge of designing and implementing policy with attention to implementation. Review of research on the organizational, social, and political factors that influence implementation and case study analyses of successful and unsuccessful policy implementation.
EDUC 8704. Advocacy and Strategic Communications. 3 Credits.
The ways in which public discourse and political advocacy shape policy making and implementation; framing policy issues, advancing policy objectives, and engaging stakeholders and members of the media.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.
Required of all departmental EdD degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.
Prerequisite: EDUC 8998.

HUMAN AND ORGANIZATIONAL LEARNING

GRADUATE

Master's programs

• Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 525)
• Master of Arts in Education and Human Development individualized program (p. 522)

Doctoral program

• Doctor of Education in the field of human and organizational learning (p. 537)

FACULTY

Professors D. Burley, E. Goldman, S. Khilji

Assistant Professors Y. Nakamura

Associate Professors A. Casey, N. Chalofsky, M. Cseh, R. Korte, E. Scully-Russ (Chair), J. Storberg-Walker

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HOL 0920. Continuing Research - Master's. 1 Credit.

HOL 0940. Cont. Res. - Doctoral. 1 Credit.

HOL 6100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 6101. Research and Independent Study. 1-3 Credits.
Preparation of an in-depth project under the guidance of a faculty member. The course is arranged individually with the program advisor.

HOL 6700. Human Behavior and Learning in Organizations. 3 Credits.
How individuals and groups learn and interact within organizations and how organizations function and learn. Motivation, group dynamics, leadership, systems theory, organizational culture, and change.

HOL 6701. Adult Learning. 3 Credits.
Premises and theories used to meet learning needs of adults. Overview of various learning theories and the impact of various stages of adult development on learners. Topics including self-directed learning, accommodating individual learning needs, and creation of effective learning techniques. Same as HDEV 6701.

HOL 6702. Organizational Change I. 3 Credits.
The assessment of organizational conditions, including collection and interpretation of information, operations, and problems (human, structural, and systemic).

HOL 6703. Organizational Change II. 3 Credits.
Introduction to the concepts, methods, and skills required for effective consultation in organizations, as either an internal or an external consultant. Meeting the human needs in organizations, while improving performance and productivity. Students undertake a consulting project in an organization.

HOL 6704. Leadership in Organizations. 3 Credits.
Developments in theory and research centered on organizational leadership. Emphasis on various types of leadership including transformational, responsible, authentic, and ethical.

HOL 6705. Strategic Change. 3 Credits.
Overview of best practices for organizing and managing people and organizations to compete successfully. Leading an organization through a process of self-examination, redesign, and change that results in sustained effectiveness, learning, and high performance.

HOL 6706. Current Issues in Organizational Leadership. 3 Credits.
Current issues and future trends in organizational leadership. Students gather data and analyze key topics associated with areas such as talent management, leading through demographic shifts, leadership in a globalized world, leading global change, and developing new forms of leadership, ethics, and sustainability.
HOL 6707. Organizational Learning. 3 Credits.
Learning in an organizational context. Processes through which the organization as a system learns, unlearns, changes, and disseminates information. Organizational learning theories address the processes and barriers of gathering, using, developing, and retaining knowledge in organizations.

HOL 6708. Global Leadership. 3 Credits.
The changes taking place in organizations due to the process of globalization and the requirements for leadership. The changing global environment, how those changes influence operational and strategic issues within global organizations, and how a leader can better understand the global environment to help organizations meet these new challenges.

HOL 6709. Leadership Development. 3 Credits.
The processes employed to develop leaders/leadership and how individuals change as a result of the process. Examination of the context within which leadership is developed. Prerequisites: HOL 6704.

HOL 6710. Globalization, Change, and Learning. 3 Credits.
With learning as the coping strategy, focus on how policymakers and global leaders can be helped to take advantage of the opportunities and address the challenges that globalization presents.

HOL 6720. Advanced Strategies for Adult Learning. 3 Credits.
Theoretical and practical strategies of adult learning in various settings, including corporate environments. Learning strategies, such as creative thinking and self-directed learning. Critical adult learning issues.

HOL 6721. Assessing the Impact of Organizational Change Using Qualitative and Quantitative Methods. 3 Credits.
Knowledge and skills needed to evaluate the impact and return on investment of change efforts; planning and conducting systematic evaluations of change efforts, including the choice, development, and use of various tools for measuring individual, group, and organizational change; assessing the success of the planned change.

HOL 6724. Increasing the Capacity to Learn. 3 Credits.
Identification of actions that can help increase the capacity to learn. Emphasis on experimental learning and critical reflection.

HOL 6725. Internship in Organizational Leadership and Learning. 3-6 Credits.
Supervised experience in selected areas of leadership, learning, and/or change. Admission by permission of the program advisor.

HOL 6742. Design of Adult Learning Interventions. 3 Credits.
Designing and implementing adult learning programs. Topics include instructional design techniques, designing effective programs, program planning and marketing techniques, and conducting needs assessments and evaluations of adult learning programs.

HOL 6743. Action Learning. 3 Credits.
Processes, principles, and skills necessary to participate in and lead both single- and multiple-problem action learning sets. The six dimensions of action learning; educational psychological, political, sociological, and management theories underlying action learning.

HOL 6744. Meaningful Workplaces. 3 Credits.
Characteristics of the humane organization and of meaningful work. Intrinsic motivation, work-life balance, and the workplace community.

HOL 6745. Technology and Human Resource Development. 3 Credits.
How technology can best be utilized in the HRD environment. Discussion of CBT, use of the Internet for instruction, and distance learning techniques.

HOL 6746. Work Groups and Teams in Organizations. 3 Credits.
Exploration of the nature of work groups and teams as they are utilized in organizational settings. Group and team dynamics, facilitating and leading skills, and group roles and culture.

HOL 6747. International and Multicultural Issues in Organizations. 3 Credits.
The impact of culture and globalization on U.S. and international human and organizational learning programs and practices. Adult learning and organizational change approaches that develop and utilize the synergy of a global workforce.

HOL 6998. Thesis Research. 3 Credits.
Thesis research.

HOL 6999. Thesis Research. 3 Credits.
Thesis research.

HOL 8100. Special Topics in Human and Organizational Learning - Doctoral Studies. 3 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 8101. Research and Independent Study. 1-3 Credits.

HOL 8700. Foundations of Human and Organizational Learning. 3 Credits.
The study of individuals and their interactions within an organizational context. Overview of key theories in leadership, systems theory, group dynamics, learning, organizational culture, and motivational theory. The use of research in human and organizational learning.

HOL 8701. Theory, Research, and Practice in Adult Learning and Development. 3 Credits.
Learning theories as applied to adults in individual and group learning transactions; effect of age on learning; psychological, physical, and social environments in adult education situations.
HOL 8702. Theory and Design of Organizational Diagnosis and Development. 3 Credits.
Focus on various paradigms through which organizations and their functions may be viewed; a variety of analytical models of organizations; techniques for assessing systems; application of analysis techniques.

HOL 8703. Human Systems Change. 3 Credits.
The classical and contemporary ideas related to social systems change; the relation of these ideas to current issues in organizations.

HOL 8704. Leadership Theory, Research, and Practice. 3 Credits.
Leadership in organizations with a focus on transformational leadership. Historical review of leadership theory and research; current developments in understanding leadership. Students examine their own leadership style and plan for continued development as a leader.

HOL 8705. Organizational Culture. 3 Credits.
Theory and research on organizational culture, from the multidisciplinary seminal works in anthropology, psychology, sociology, and management to current day theorizing and empirical research on culture. The rituals, values, and behaviors that differentiate cultural groups and the way cultural identities manifest themselves in organizational practices; and how organizational culture evolves and its relationship to other organizational phenomena such as innovation, strategy, sensemaking, and performance. Current trends in organizational culture theorizing.

HOL 8706. Interdisciplinary Readings in Human and Organizational Learning. 3 Credits.
Seminal works from various disciplines related to current research and practice.

HOL 8707. Advanced Organizational Learning. 3 Credits.
The psychological and sociological paradigms associated with the learning of a collective whole.

HOL 8708. Introduction to Doctoral Research. 3 Credits.
An introduction to scholarly inquiry for doctoral students. The role of the scholar-practitioner; types of scholarly inquiry and their components; diverse paradigms used to frame scholarly inquiry; and critical thinking skills for evaluating research in human and organizational learning.

HOL 8720. Seminar: Applied Research in Human and Organizational Learning. 3 Credits.
Identification of initial constructs and theories that support the identified research interest, with a problem statement and critical analysis of research reports and review of research literature.

HOL 8721. Practicum in Human and Organizational Learning. 3-6 Credits.

HOL 8722. Seminar: Advanced Issues in Human and Organizational Learning. 1-12 Credits.
Forum in which candidates critically examine relevant classic and contemporary literature, with analysis and synthesis to defend their research questions and conceptual frameworks.

HOL 8723. Organizations and Strategy in Human Resource Systems. 3 Credits.
Overview of paradigms, theories, models, and constructs of organizations and strategy to understand organizations and their environments.

HOL 8724. Creating and Planning Doctoral Research. 3 Credits.
Students learn to develop an evidence-based problem statement, design a conceptual framework, craft a research question, and conduct a literature review. Fundamental principles of both qualitative and quantitative research and various research strategies and designs.

HOL 8725. Integration of Theory, Research and Practice. 3 Credits.
Provides students with the opportunity to apply adult learning principles explored in the curriculum towards an integration and synthesis of the knowledge base in human and organizational studies. Aids in preparation for the comprehensive examinations and subsequently, dissertation development.

HOL 8741. Managerial and Organizational Cognition. 3 Credits.
The emerging field of collective cognition in organizations, including theoretical foundations and seminal and current literature on knowledge structures and their role in strategy formation, organizational change, and sensemaking.

HOL 8742. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HDEV 8253.

HOL 8746. Work Groups and Teams in Organizations. 3 Credits.
Theoretical understanding and practical considerations of working with groups and teams. Group dynamics, facilitating and leading groups, and member roles. Group facilitation techniques across different group settings and environments.

HOL 8997. Preparation and Delivery of Doctoral Research. 3 Credits.
Students develop and present a mock dissertation proposal, receiving feedback from faculty and colleagues in order to refine their proposal. Prerequisites: none. Recommended background: Students are expected to have developed a literature review, conceptual framework, and research question for their dissertation research prior to enrolling in this class.
HOL 8998. Predissertation Seminar. 3-6 Credits.
Platform for further development of the dissertation proposal.

HOL 8999. Dissertation Research. 3,6 Credits.
Prerequisite: HOL 8998.

SPECIAL EDUCATION AND DISABILITY STUDIES

GRADUATE

Master's programs
• Master of Arts in Education and Human Development in the field of early childhood special education (p. 517)
• Master of Arts in Education and Human Development in the field of interdisciplinary secondary transition services (p. 522)
• Master of Arts in Education and Human Development in the field of secondary special education (p. 530)
• Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 531)
• Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 522)

Post-master's program
• Education Specialist in the field of Special Education (p. 533)

Doctoral program
• Doctor of Education in the field of special education (p. 539)

FACULTY

Professors M. Freund

Associate Professors J. Frey, L. Rice (Chair)

Assistant Professors D. Gresham, K. Ihrig, J. Kester, B. Tuckwiller

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPED 0920. Continuing Research - Master's. 1 Credit.

SPED 0940. Continuing Research - Doctoral. 1 Credit.

SPED 6100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

SPED 6101. Research and Independent Study. 1-3 Credits.
Individual study or research under guidance of staff member. Permission of the advisor required prior to enrollment. May be repeated for credit.

SPED 6201. Overview and Legal Issues in Educating Exceptional Learners. 3 Credits.
Survey course to acquaint prospective teachers with special education and to help them become aware of the various educational modifications necessary to accommodate children with special needs in a school program.

SPED 6202. Research and Current Trends in Special Education: Teacher Decision Making. 3 Credits.
Using a data-driven framework for assessing evidence-based practices in special education and competency in understanding, collecting, analyzing, and communicating relevant data.

SPED 6203. Research and Practice: Diagnostic Reading for Exceptional Learners. 3 Credits.
Understanding the reading process and knowledge of diagnostic measures and instructional interventions to promote reading competency for students with disabilities.

SPED 6210. Universal Design for Learning and Assessment. 3 Credits.
Overview and introduction to universal design for learning, including contemporary issues, applications of digital and assistive technologies, and tools for developing a comprehensive plan for implementation.

SPED 6214. Applied Research in Secondary Transition Practices. 3 Credits.
Students develop applied research knowledge and skills in the field of secondary transition; evaluate evidence-based transition practices to ensure positive post-school outcomes of youth with disabilities; and conduct, evaluate, and use inquiry to guide professional practices and interventions.

SPED 6221. Accessing Community Systems for Individuals with Disabilities. 3 Credits.
Overview of access to community systems and service delivery for individuals with special needs and their families. Material fee.
SPED 6222. Legal Issues and Public Policy for Individuals With Disabilities. 3 Credits.
Examination, interpretation, and analysis of legislation and policies affecting the education and career development of individuals with disabilities. Emphasis on federal legislation in the context of national policy reform in disability services. Material fee.

SPED 6223. Introduction to Brain Injury: Programs, Policies, and Resources. 3 Credits.
An overview of acquired brain injury and its effects; current trends in the field, related policy, research, and development of new resources.

SPED 6224. Brain Function and Impact of Brain Injury on Learning and Education. 3 Credits.
Provides an in-depth understanding of neuroanatomy related to the impact of brain injury on child and adolescent development and learning to prepare educators to participate in educational assessment and planning.

SPED 6227. Technology in Vocational Evaluation. 3 Credits.
Introduction to an array of assistive technology services and products facilitating professional interventions and vocational evaluation procedures; application to the assessment of persons with disabilities. Material fee.

SPED 6228. Community-Based Assessment and Work Sample Development. 3 Credits.
Introduction to community-based vocational appraisal methods; development of job training analysis skills, labor market surveys, work samples; requirements of The Americans with Disabilities Act; incorporation of assistive technology; classroom theory and field work. Material fee.

SPED 6229. Interpretation and Application of Academic and Vocational Assessment Information. 3 Credits.
Specific strategies and techniques to analyze, interpret, and synthesize assessment information for the development of comprehensive academic/vocational profiles for adolescents and adults with disabilities. Observation and recording procedures, report development, and postassessment conferencing are emphasized. Material fee.

SPED 6230. Vocational Assessment of Individuals with Disabilities. 3-6 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as CNSL 6130.

SPED 6231. Curriculum and Instructional Methods in Special Education and Transition. 3 Credits.
Techniques and processes used in programming for the needs of individuals with disabilities as they prepare for inclusion at the secondary level, transition to postsecondary programs, and employment; skills related to professional liaison and support roles in the design of curriculum and instructional strategies for students with disabilities. Material fee.

SPED 6232. Foundations in Special Education, Career Development, and Transition. 3 Credits.
Overview of historical, theoretical, and philosophical foundations of career development and transition. Explores directions for career development/transition practices in the context of educational reform and social and political change. Material fee.

SPED 6233. Curriculum in Special Education. 3 Credits.
Theory and practice in planning, implementing, and evaluating curriculum for individuals with disabilities; techniques for modifying curriculum and materials for individualized programming. Field-site curriculum implementation is required. Materials fee.

SPED 6234. Seminar in Advanced Writing and Professional Presentation. 3-6 Credits.
Analysis and development of advanced professional writing skills, including literature synthesis, persuasive writing, and proposal writing. Material fee.

SPED 6235. Employment Models for Individuals with Disabilities. 3 Credits.
Rationale, occupational resources, and programming strategies for job placement and the development and coordination of employment programs for individuals with disabilities. Material fee.

SPED 6236. Introduction to Career and Career-Technical Education and Transition Services. 3-6 Credits.
Introduction to programs and services that provide career development and transition planning for individuals with disabilities. Material fee.

SPED 6237. Learning Strategies, Assessment, and Instruction for Individuals with Learning Disabilities. 3-6 Credits.
Theory and practice in evidence-based reading interventions. Learning strategies; content enhancement focused on literacy and self-determination. Material fee.

SPED 6238. Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
Introduction to the academic, cognitive, social, and emotional characteristics of individuals with learning disabilities; etiological theories; educational service delivery models, with particular emphasis on the adolescent with learning disabilities. Policy issues, continuum of services, and the transition from school to post-school environments. Material fee.

SPED 6239. Teaching and Collaboration for Professionals Working with Students with Disabilities. 3 Credits.
Attitudes and beliefs regarding team teaching, collaboration, and inclusionary environments; interpersonal communication, the dynamics of collaborative teams, and environments in which special educators work. Materials fee.
SPED 6240. Family Support and Guidance in Special Education. 3 Credits.
The developmental process of parenting and how that process is affected by having a child with developmental delay or disability. Family systems theory, stress and coping mechanisms, and communication and support strategies. Material fee.

SPED 6242. Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities. 3 Credits.
Application of the neurodevelopmental model to techniques for developing and implementing educational programs for infants and toddlers with disabilities. SPED 6263 or SPED 6268 may be taken as a corequisite. Material fee. Prerequisites: SPED 6263 or SPED 6268; or permission of the instructor.

SPED 6243. Developmental Assessment of Infants. 3 Credits.
Theory and current practice in the assessment of infants with or at risk for developmental disabilities. Material fee.

SPED 6244. Ethical Considerations in Neonatal and Infant Intervention. 3 Credits.
Overview of the major ethical issues involved in neonatal and infant intervention. The impact of recent and emerging technological innovations considered from medical, legal, ethical, and psychosocial perspectives. Material fee.

SPED 6245. Developmental Implications of Prematurity and Risk. 3 Credits.
Causes of prematurity. Conditions that place children at developmental and educational risk.

SPED 6253. Introduction to Autism Spectrum Disorders. 3 Credits.
Overview of autism spectrum disorders with a focus on etiology, characteristics, and evidence-based practices. Topics include defining, assessing, accommodating, and instructing students with autism spectrum disorders.

SPED 6254. Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life. 3 Credits.
The policies, principles, models, and processes involved in job development, job accommodations and modifications, and employment and post-secondary placement services for individuals with autism and related disabilities. Legislation is reviewed in terms of its impact on placement of persons with autism who transition into the workplace and/or post-secondary education.

SPED 6255. Collaboration with Systems and Families. 3 Credits.
Overview of models and strategies for coordinating services across disciplines and among school and community agencies for special populations. Emphasis on interdisciplinary team coordination, communication, decision making, planning, and follow-up for individuals with disabilities. Material fee.

SPED 6260. Developmental Assessment in Special Education. 3 Credits.
Key issues of effective collaboration, culture, and school-family partnerships in special education explored through a framework of educational research best practice.

SPED 6261. Practicum: Methods and Materials for Young Children with Disabilities. 3,6 Credits.
Implementation of educational strategies and materials, including designing and developing teaching materials, classroom teaching, feedback and evaluation with professor. A seminar accompanies this clinical experience.

SPED 6262. Formal Assessment of Young Children with Disabilities. 3 Credits.
Weekly seminar designed to prepare early childhood special educators to translate formal assessment data into instructional programming. Requires fieldwork with children. Material fee. Prerequisite: SPED 6260.

SPED 6263. Development of the Infant with Special Needs. 3 Credits.
The processes of normal infant development and interrelationships among areas of development; relationship of these processes to the growth and development of infants with or at risk for developmental disabilities. Material fee.

SPED 6264. Medical and Genetic Conditions of Infants and Children with Developmental Disabilities. 3 Credits.
Introduction to medical and genetic conditions that affect the cognitive, language, and social development of infants and children with developmental disabilities.

SPED 6265. The Development of Language and Literacy. 3 Credits.
Within the context of typical and atypical development, the impact of various disabilities on language and literacy development. Material fee.

SPED 6266. Instructional and Assistive Technology in Early Childhood Special Education. 2,3 Credits.
Instructional strategies and assistive technology and their implications and uses for young children (0 to 5 yrs) in a wide variety of environments. Lectures, laboratory, and demonstrations. Material fee.

SPED 6267. Development of Children and Youth with Disabilities. 3 Credits.
Theories of human growth and development are considered as a framework for examination of typical and atypical development of children and youth. Material fee.

SPED 6268. Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities. 3 Credits.
An in-depth examination of the causes and characteristics of various disabilities. Current principles and approaches to intervention are examined. Material fee.
SPED 6272. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as CPED 6172. Material fee.

SPED 6273. Impact of Culture on Education. 3 Credits.
The impact of culture and ethnicity on educational experiences. The relationship between school culture in the United States, one's own culture(s), and the cultures of diverse populations existing within our schools. Values, norms, rules, ethics, beliefs, attitudes, expectations, and assumptions of various cultures. Material fee.

SPED 6274. In-Service Planning/Programming. 3 Credits.

SPED 6275. The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Same as CPED 6175. Material fee.

SPED 6276. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Same as CPED 6176. Material fee.

SPED 6277. Teaching Culturally and Linguistically Diverse Students with Disabilities. 3 Credits.
Methods and materials for teaching students with disabilities who are English language learners. Classroom management, instructional and assessment strategies, materials and curricula, and collaborating with families and communities to meet the cultural, linguistic, academic, social, and emotional needs of students in various settings. Material fee.

SPED 6280. Developmental Assessment of Adolescents. 3 Credits.
Formal and informal psychoeducational assessment; assessment instruments commonly used with upper-elementary, junior, and senior high school students; the writing of psychoeducational reports. Material fee.

SPED 6283. The Urban Impact on Children and Youth with Disabilities. 3 Credits.
Effects of the total environment in which inner-city children live on their ability to learn and their cognitive, social-behavioral, and physical/health development. Material fee.

SPED 6288. Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
An in-depth examination of typical and atypical growth and development, psychiatric diagnosis and psychosocial development issues, and general and specific characteristics of the student with serious emotional disabilities. May be repeated for credit. Material fee.

SPED 6290. Affective Development and Behavior Management in Special Education. 3 Credits.
Theory, programming, and behavior management strategies from theoretical and practical points of view. Material fee.

SPED 6299. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6990. Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher. 3-6 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6991. Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher. 3-6 Credits.
Continuation of SPED 6990. Graduate students become the primary teaching team in the classroom with ongoing supervision. Graduate students plan and apply psychoeducational teaching strategies with children with emotional and behavioral disabilities. Refinement of instructional and behavior management strategies. Weekly seminar continues. Material fee.

SPED 6992. Behavior Management Practicum: Adolescents with Disabilities. 3 Credits.
Field-based examination of theory of behavior development and techniques for classroom management. Material fee.

SPED 6993. Internship: Teaching Young Children with Disabilities. 3,6 Credits.

SPED 6994. Internship: Early Intervention. 3-6 Credits.
Supervised internship in early intervention. Weekly seminar. Material fee.

SPED 6995. School- and Community-Based Internship in Special Education and Transition. 1-9 Credits.
A 50- to 450-hour supervised internship in school- and community-based settings involved in career, vocational, and transition services.

SPED 6996. Teaching Internship in Transition Special Education. 3-6 Credits.
Supervised teaching internship; seminar required. Permission of the instructor required prior to enrollment. Material fee.
SPED 6997. Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities. 3-6 Credits.
Supervised internship and weekly seminar. A full-time, field-based teaching experience working with students with disabilities who are English language learners. Writing an appropriate IEP, interacting with families and communities, and planning and implementing instructional approaches and strategies. Material fee.

SPED 8100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

SPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with program advisor.

SPED 8301. Research Seminar in Special Education. 1-12 Credits.
Participation in a small group with a selected faculty member; research on and discussion of an area of common interest. Permission of the instructor required prior to enrollment.

SPED 8303. Administration and Supervision of Special Education. 3 Credits.
Philosophy and nature of special education; program organization, administration, and development. Surveying local needs; program evaluation and supervision. Permission of the instructor required prior to enrollment. Material fee.

SPED 8304. Research and Trends in Special Education. 3 Credits.
Emphasis on topical research issues, problems of conducting research, and research syntheses. Material fee.

SPED 8305. Foundations of Neuroscience in Special Education. 3 Credits.
Develops understanding of the neurological bases of sensation and perception, object recognition, control of motor action, learning and memory, emotion and language, attention, consciousness and cognitive control, and social cognition.

SPED 8306. Advanced Study in Development Science and Variance I: The Early Years. 3 Credits.
Consideration of cognitive neuroscience research on developmental issues of infancy and early years; assessment, identification, and related prevention and intervention. Prerequisite: SPED 8305.

SPED 8308. Preparation for the Professoriate in Special Education. 3 Credits.
Philosophical, ethical, and methodological aspects of personnel preparation in university and field-based programs; opportunities for practice in pedagogical design and delivery. Material fee.

SPED 8310. Advanced Study in Development Science and Variance II: The Later Years. 3 Credits.
Consideration of cognitive neuroscience research on adolescent development, including executive functioning, self-regulation, atypicality in learning, social and emotional behavior, motivation, and attention. Prerequisite: SPED 8306.

SPED 8311. Doctoral Proseminar: Scholarly Writing in Applied Settings. 3 Credits.
Professional writing enrichment course that builds upon recent approaches to scholarly writing instruction and adapts them to the level of skill required of graduate and advanced graduate students. Prerequisite: SPED 8310.

SPED 8343. Psychoeducational Diagnosis in Special Education. 3 Credits.
The range of diagnostic and intervention strategies applicable to the student who presents psychosocial and related learning difficulties. Permission of the instructor required prior to enrollment. Material fee.

SPED 8345. Consultation and the Change Process. 3 Credits.
Consultation models from organizational development, organizational psychology, and mental health applied to professional practice in education and special education. Material fee.

SPED 8352. Disability and Public Policy. 3 Credits.
Overview of current legislation and public policy affecting education, employment, and civil rights of individuals with disabilities. The evolution of disability policies and their relationship to principles of social justice. Material fee.

SPED 8353. Post-Master’s Internship in Special Education. 1-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, or policymaking. Internships are individually arranged. Permission of the instructor required prior to enrollment.

SPED 8354. Doctoral Internship: Special Education. 1-6 Credits.
Supervised professional internship in research college teaching, administration, policymaking, or private agency function. Permission of the advisor required prior to enrollment.

SPED 8360. Interdisciplinary Techniques in the Diagnostic Process in Special Education. 3 Credits.
Application of theoretical concepts of assessment; development of assessment programs; interpretation and application of interdisciplinary diagnostic evaluations. Material fee. Prerequisites: SPED 6260 and permission of the instructor.

SPED 8998. Doctoral Seminar in Special Education. 3-6 Credits.
Review of literature in a topical area; preparation of a dissertation proposal and a manuscript of publishable quality. Permission of the instructor and major advisor required prior to enrollment. Material fee.

SPED 8999. Dissertation Research. 3,6 Credits.
Prerequisite: SPED 8998.
The School of Engineering and Applied Science (SEAS) was organized in 1884 as the Corcoran Scientific School of Columbian University, named in honor of William W. Corcoran, president of the University’s Board of Trustees from 1869 to 1888. The School was among the first to accept women for degree candidacy in engineering. While the organization and offerings of the School have evolved over the years, throughout most of its history its programs have been characterized by an emphasis on principles guiding the advancement of technology.

The School offers the bachelor of arts, bachelor of science, master of engineering, master of science, doctor of engineering, doctor of philosophy, and the professional degrees of engineer and applied scientist through its six departments—Biomedical Engineering, Civil and Environmental Engineering, Computer Science, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering. In addition, the School offers several graduate certificate programs, as well as dual bachelor’s/master’s degree programs.

Research centers and institutes provide opportunities for students and faculty to strengthen ties with counterparts in government and industry and contribute to the development and harnessing of emerging technology. Extensive and varied laboratories and computing facilities support the academic programs. The School strongly supports co-curricular activities to broaden and deepen its students’ overall educational programs, including an extensive array of internship opportunities at government laboratories and private companies in the Washington, DC, area and elsewhere. Other co-curricular opportunities include engineering-type team competitions, research projects, and the SEAS student government organization, the Engineers’ Council.

REGULATIONS

Undergraduate Programs (p. 578)
- University Regulations (p. 578)
- Advising (p. 578)
- Mathematics Placement (p. 578)
- Makeup of Credit for Waived Courses (p. 578)
- Scholarship Requirements (p. 578)
- Technical GPA (p. 578)
- Incompletes (p. 578)
- Pass/No Pass Grading System (p. 578)
- Academic Workload (p. 578)

- Humanities and Social Science Requirement (p. 578)
- Bachelor of Science Degree Programs (p. 579)
- Bachelor of Arts Degree Programs (p. 579)
- Special Programs (p. 579)
- Double Major (p. 579)
- Double Degree (p. 580)
- Minors (p. 580)

Graduate Programs (p. 580)
- Degree Programs (p. 580)
- Transfer of Credit (p. 580)
- English Language Requirements for International Students (p. 580)
- Grades (p. 581)
- Incompletes (p. 581)
- Credit/No Credit Grading System (p. 581)
- Educational Planner (p. 581)
- Residence and Continuous Enrollment (p. 581)
- Examination Preparation (p. 581)
- Master of Science (p. 582)
  - Entrance Requirements (p. 582)
  - Special Programs (p. 582)
  - Graduation and Scholarship Requirements (p. 582)
  - Time Limits (p. 582)
  - Master’s Thesis (p. 582)
- Master of Engineering (MEng) (p. 583)
  - Entrance Requirements (p. 583)
  - Graduation and Scholarship Requirements (p. 583)
  - Time Limits (p. 583)

Graduate Certificates (p. 583)
- Entrance Requirements (p. 583)
- Graduation and Scholarship Requirements (p. 584)

Professional Degrees (p. 584)
- Entrance Requirements (p. 584)
- Graduation and Scholarship Requirements (p. 584)
- Time Limits (p. 584)
- Transfer Between Degree Programs (p. 584)

Doctoral Programs (p. 585)
- Doctor of Philosophy (p. 585)
  - Entrance Requirements (p. 585)
  - Graduation and Scholarship Requirements (p. 585)
  - Time Limits (p. 585)
  - Preliminary and Qualifying Examinations (p. 585)
  - The Dissertation and Final Examination (p. 586)
- Doctor of Engineering (p. 586)
- Doctor of Engineering in Engineering Management (p. 587)
Undergraduate Programs

University Regulations

All SEAS students are required to review the University Regulations (http://bulletin.gwu.edu/university-regulations) as outlined in the Bulletin, as they are responsible for understanding and adhering to this document.

Advising

SEAS practices a hybrid advising system. Every entering undergraduate student is assigned a professional advisor to assist with the transition to the University. Faculty advisors are assigned at the end of the first year to counsel students on their programs of study, achievement, and maintenance of satisfactory scholastic performance, professional development, and extracurricular activity as part of the educational process. Until all work required for the degree is completed, students must consult with their faculty advisors in all academic matters, including obtaining the advisor’s approval of their program of study prior to registration for each academic semester and summer session. In addition, a student must consult their faculty advisor before they register for a course at another institution. The faculty advisor represents the student in all cases requiring faculty action. However, the faculty advisor may not deny entry into any course or activity to which the student is entitled under the regulations of the School. Students may consult other members of the faculty on an informal basis.

Mathematics Placement

All incoming first-year students are required to take a math proficiency examination, administered through the mathematics department, which places students in either MATH 1220 or MATH 1231. Visit the math placement exam webpage (https://math.columbian.gwu.edu/gw-mathematics-placement-test) for more information.

Makeup of Credit for Waived Courses

Waiver of a required course requires the approval of the student’s faculty advisor and department chair. If a course required by the SEAS curriculum is waived, the corresponding credits must be earned by satisfactory completion of a university-level academic course, either technical or nontechnical, approved by the student’s faculty advisor. The grade earned will be used in determining the SEAS GPA only if the substituted course would normally be considered part of the student’s curriculum.

Scholarship Requirements

To be eligible for graduation a student in SEAS must have:

- A minimum overall GPA of 2.0.
- A minimum overall GPA of 2.0 in their SEAS program.
- A minimum GPA of 2.2 for technical courses*
- Completed all degree and University General Education requirements.

*See section on Technical GPA for more information about technical courses.

Technical GPA

For applied science and technology, biomedical engineering, civil engineering, computer engineering, electrical engineering, mechanical engineering, and systems engineering majors, all technical courses taken during the fifth through eighth semesters as outlined by the 4-year curriculum sheet respective to each major and approved by the student’s faculty advisor are counted towards the student’s technical GPA.

As of Fall 2014, for Computer Science majors (BA and BS), all CSCI courses are counted towards the student’s technical GPA. See archived SEAS bulletin for prior curriculum year technical GPA requirements for Computer Science majors.

Please note, if a student changes their major or curriculum year this may change the courses applied towards their technical GPA. Students should consult their faculty advisor before making any changes to their academic plans or curriculum.

Incompletes

For more information see Incompletes under University Regulations (http://bulletin.gwu.edu/university-regulations). In addition, SEAS students must get an incomplete agreement in writing by completing a Request for an Incomplete form (http://www.seas.gwu.edu/forms) with the instructor.

Pass/No Pass Grading System

SEAS students may not take required courses on the Pass/No Pass grading system. They may, however, take courses outside their required SEAS academic program on a P/NP basis.

Academic Workload

SEAS adheres to all academic workload regulations outlined under University Regulations (p. 23). In exceptional cases, these limits may be exceeded with the faculty advisor’s approval.

Humanities and Social Science Requirement

All students pursuing the bachelor of science or bachelor of arts degree in SEAS must take a minimum of six courses (18 credits) in non-technical areas of study, with the exception of students in the systems engineering program,* who must take a minimum of 5 courses (15 credits) in non-technical courses. Of these six courses, at least two (6 credits) must be from the Critical Analysis in Social Science list and at least one course (3 credits) from the Critical Analysis in Humanities list of the University General Education Requirement (p. 38). The remaining three courses (9 credits) must be chosen from an approved list satisfying specific departmental requirements. A full list of courses by major is available on the humanities and social science form located on the SEAS forms webpage.
When a foreign language is taken as part of the humanities requirement, the following rules apply:

- The foreign language studied may not be a native language of the student, unless the courses taken are literature courses.
- If the student has studied the language previously, he or she must first take a placement test given by the language department concerned and enroll in a course recommended by that department.
- The advisor must approve the program.

*Students in the systems engineering program must complete all required university general education humanities or social science requirements within this minimum.

**Bachelor of Science Degree Programs**

Students should consult the department concerned for total credit requirements for the degree programs. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

**Bachelor of Arts Degree Programs**

SEAS offers a bachelor of arts degree with majors in applied science and technology and in computer science. Each program provides a strong and level base for students who intend to make their careers in fields allied to science and technology or computer science. The curriculum requirements for these programs can be viewed under the Undergraduate tab in this section of the Bulletin. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

**Special Programs**

A number of combined 5-year degree programs are available to select SEAS students. These include the BS/MS in civil engineering, mechanical engineering, and systems engineering; BA or BS and MS in computer science or in cybersecurity in computer science; BS/MS in biomedical engineering, computer engineering, or electrical engineering; and BS in computer engineering, computer science, electrical engineering, or systems engineering and MS in engineering management. In addition, students may complete a 5-year degree in the following cross disciplines: BS in biomedical engineering and MS in computer engineering, BS in biomedical engineering and MS in electrical engineering, BS in electrical engineering and MS in computer engineering, and BS in computer engineering and MS in electrical engineering, BS in biomedical engineering and MS in telecommunications engineering.

**Double Major**

Students in the School of Engineering and Applied Science (SEAS) who complete the requirements for two SEAS majors may graduate with a double major, provided the majors are in different departments and are both BS degrees.

SEAS students may also pursue a double major (second major) in another school in the University but must also adhere to all requirements outlined by that school or department. SEAS students must consult both their SEAS faculty advisor and an advisor in the department offering the second major. To officially declare a second major, students must complete a Declaration of Second Major form and have it approved by both their SEAS faculty advisor and the second major department advisor.

Additionally, any SEAS student wanting to complete a Double Major within SEAS must fulfill the following requirements:

- Due to ABET accreditation, the completion of a distinct number of major specific credits/courses for each major must be met, and approved by respective major departments.
- Completion of two capstone projects, one for each major, following registration for the two capstone course sequences approved by the major departments.

Any undergraduate student pursuing a Bachelor of Science degree outside of SEAS may declare a double major (second major) in the following fields: biomedical engineering, computer science (BS)*, computer engineering, electrical engineering, mechanical engineering, systems engineering. The student must follow all the degree requirements as those receiving a bachelor of science in engineering/computer discipline, which includes SEAS general, major, technical electives, humanities/social science, and technical GPA requirements. In addition, SEAS does not offer a double major (second major) in Civil Engineering or Applied Science and Technology.

The degree is earned from the homeschool, and students must complete the major in their own school in order to graduate. In no case will a double major result in two degrees. For more information see Double Degrees under University Regulations and the SEAS Regulations for a Double Degree outlined below.

All other scenarios (BBA, BFA, BA, etc.) require the student to complete either a BA in Computer Science or a double degree. Please see the University Bulletin for information about a Double Degree.
Graduation grade-point average criteria:

To satisfactorily complete a double major (second major) in any engineering/computer science discipline, a student must have a minimum grade-point average of 2.20 in all technical engineering/computer science courses and a 2.00 overall in courses required for the double major (second major). See Technical GPA section for more information about how this GPA is calculated.

*SPECIAL NOTE: The Computer Science Department has specific requirements for admission into a double major (second major) before a student will be allowed to declare either a BS or BA degree. However, a student with a BA primary degree must complete all requirements for the BA degree outlined by the computer science department and students with a primary BS degree must complete all the degree requirements as those outlined in the BS in Computer Science degree program.

Double Degree

Any SEAS students pursuing a Double Degree, must meet all eligibility requirements outlined as part of the University Regulations - Double Degree (http://bulletin.gwu.edu/university-regulations/#double) in the bulletin, as well as:

- Complete SEAS Double Degree Application
- Provide a course plan approved by both primary and second-degree departments
- Receive approval from both the primary and second-degree programs’ Dean’s offices.

Additionally, a SEAS student wanting to complete a Double Degree within SEAS must fulfill the following requirements:

- Due to ABET accreditation, the completion of a distinct number of major specific credits/courses for each major must be met, and approved by respective major departments.
- Completion of two capstone projects, one for each major, following registration for the two capstone course sequences approved by the major departments.

Minors

The School of Engineering and Applied Science offers a variety of minors, including biomedical engineering, computer engineering, computer science, electrical engineering, mechanical engineering, operations research, and systems engineering to all students. The School may require students to meet certain eligibility requirements to declare the minor. SEAS students may only declare a minor outside their department and must consult their faculty advisor before enrolling in a minor in another school of the University.

SEAS students who wish to declare a minor officially should complete a Declaration of Minor form, which must be signed by both their SEAS faculty advisor and the minor department advisor. Depending on the student’s major, additional credits beyond the minimum required for the minor may be required. Students from schools other than SEAS, should email seasadvising@gwu.edu for more information about requirements and eligibility criteria, before requesting to declare a minor through the department.

Graduate Programs

Degree Programs

Fields of graduate study offered by SEAS include biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, and (at the MS level only) cybersecurity in computer science, telecommunications engineering, and regulatory biomedical engineering (MEng). Degree requirements and representative areas of focus within each field are listed in this section of the Bulletin. In some fields, students may choose to focus their coursework in other specialties as well. For information on certificate, professional, and doctoral degree studies in a given field students should contact the relevant department.

Entrance requirements are outlined under individual degree programs. The following information pertains to all SEAS graduate and certificate programs.

Transfer of Credit

With the approval of the student’s advisor and department chair, graduate credit earned at a level of study equivalent to that being pursued at GW may be transferred, when applicable, to meet degree requirements of the School. For a master’s or professional degree candidate, or a doctoral candidate whose highest earned degree is a master’s, up to 6 credits may be transferred. For a doctoral candidate whose highest earned degree is a bachelor’s, up to 24 credits may be transferred. In all cases, credits must have been completed with a minimum GPA of 3.0 at another accredited and recognized institution. The professional and doctoral degree programs require that the credit be earned no more than five years prior to admission to the GW program, and some departments require that it be earned more recently. Credit applied toward a previously earned degree may not be transferred. Transfer of credit regulations apply to courses taken as a non-degree student through GW’s Office of Non-Degree Students; that is, up to 6 credits may be taken in non-degree status before applying for admission to degree status. For purposes of transfer of credit, SEAS graduate certificate programs are not considered prior degrees. At the discretion of the department concerned, the credits earned in a SEAS certificate program may be applied to a subsequent master’s degree program.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning...
are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English-Academic (PTE). Visit the SEAS Graduate Admissions website (http://graduate.seas.gwu.edu/admissions-requirements) for possible exemptions from this policy. The required minimum score for admission is 550 paper-based or 80 Internet-based on the TOEFL, an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. The Department of Engineering Management and Systems Engineering requires a TOEFL score of 600 paper-based or 100 Internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Undergraduate and graduate international students whose TOEFL, IELTS, or PTE scores fall below established cut-off points are required to take one or more courses in the English for Academic Purposes (EAP) Program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement, consult the English for Academic Purposes Program website.

Grades
Information on grades and computing the grade-point average (GPA) is found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Incompletes
At the option of the instructor, the symbol of I (Incomplete) may be recorded if a student, for reasons beyond their control, is unable to complete the work of the course and if the instructor is informed of and approves such reasons before the date when grades must be reported. The symbol I may be recorded only if the student’s prior performance and class attendance in the course have been satisfactory. Any course in which a student fails to complete the work of the course and does not provide the instructor with a satisfactory explanation before the date when grades must be turned in will be graded F. If acceptable reasons are later presented, the instructor may initiate an appropriate grade change. Although the I may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work must be made up. The I cannot be removed by the student’s reregistering for the course at GW or taking its equivalent elsewhere. An Incomplete that is not removed within one calendar year or at the time of the student’s graduation, whichever occurs first, is automatically changed to an F. As of fall 2014, when the I is changed to a letter grade the I will be replaced by the letter grade on the transcript.. As of fall 2014, when the I is changed to a letter grade the will by replaced by the letter grade on the transcript. Engineering Management and Systems Engineering students with two or more outstanding Incompletes are barred from further course enrollment; see Incompletes under University Regulations regarding continuous enrollment.

Credit/No Credit Grading System
SEAS students may take SEAS courses under the credit/no credit grading system, but credit for such courses cannot be applied toward any degree program in SEAS.

Educational Planner
In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.

Residence and Continuous Enrollment
All work for the degree must be done in residence unless an exception is granted by the department chair. Students in a degree program are expected to be continuously enrolled in the School until the degree is conferred. To maintain continuous enrollment, students may register in one of the following categories. See Residence and Continuous Enrollment under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Leave of Absence
This status is available to students who, with special permission, are attending classes at another institution; who have temporarily transferred out of the area, e.g., for military TDY; or who are having temporary medical problems. A leave of absence is usually limited to two semesters. See Leave of Absence under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Continuing Research
Students who have completed their research credits, but are not yet ready to defend a thesis or dissertation, must register for 1 credit of SEAS 0920 (Continuing Research–Master’s) or SEAS 0940 (Continuing Research–Doctoral) each semester as appropriate.

Examination Preparation
Students who are studying for a comprehensive or qualifying examination for the current or following semester, and are not taking any courses, must register for 1 credit of SEAS 0930 (Examination Preparation) as appropriate. A student who breaks their registration must apply for readmission to the
degree program under whatever conditions and regulations are in force at that time.

**Master of Science**

The MS degree is offered in the fields of biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, cybersecurity in computer science, and telecommunications engineering. Each field in turn encompasses several areas of focus. The course of study responds to the unique interests of the student, who designs an individual program in close consultation with an assigned advisor. In most areas, students follow a prescribed core and approved elective courses from within SEAS and from other schools of the University. Because engineering expertise includes a broad foundation in technology, engineering students may profit from study in other academic areas to sharpen their focus in practice. Students must satisfy, through undergraduate studies or otherwise, either the prerequisites specified for the desired field or approved equivalents.

**Entrance Requirements**

Admission to the master of science degree program requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student’s advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (https://graduate.admissions.gwu.edu) for more information.

**Special Programs**

Admission to the 5 year BS/MS combined degree program requires an appropriate bachelor’s degree from SEAS undergraduate programs recognized in the Regulations section. In general, a minimum GPA of 3.4 (on a 4.0 scale) is required. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student’s advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (https://graduate.admissions.gwu.edu) for more information.

Completion of the program should occur within two semesters but can take up to four semesters after the conferral of their SEAS undergraduate degree.

**Graduation and Scholarship Requirements**

To meet graduation requirements, courses specified in a student’s Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a minimum grade of C−, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

**Time Limits**

Full-time students in the master’s program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time students in the master’s program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

**Master’s Thesis**

The master’s thesis must demonstrate a student’s ability to make independent use of the knowledge and discipline of thought acquired through graduate study, to undertake constructive work in a given field, and to communicate the results of the work in writing. Suitable work for which the student has professional responsibility may be considered, whether done on or off campus, provided no significant amount of work is completed without faculty supervision. An accepted thesis is the property of the University.

To register for the thesis course sequence, students must submit their advisor-approved thesis area to the appropriate department chair. At the beginning of the semester of expected graduation, students must submit their thesis title to the dean. Both submissions must be made on the appropriate form available in the Graduate Student Services Center. While registered in the thesis course sequence, students are entitled to the advice of the faculty member under whom the thesis is to be written. Students may consult with their advisors, but
they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

The thesis in final form must be submitted by the stated deadline. In the event a thesis is unfinished on the date specified, the student must register for SEAS 0920 (Continuing Research - Master’s). The overall time limit for earning the degree (see Time Limits, above) may not be exceeded. All theses must be submitted electronically and meet the formatting and other requirements set forth on GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Additional information regarding thesis requirements and dates may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Master of Engineering (MEng)
The MEng degree is offered in the fields of cybersecurity policy and compliance (CPC) and regulatory biomedical engineering (rBME). The MEng (CPC) is a cohort program offered online. Its interdisciplinary content comprises courses from SEAS’s departments of computer science, electrical and computer engineering, and engineering management and systems engineering. The degree presents the latest trends in cybersecurity policy to provide the tools needed to stay at the forefront of this fast-changing discipline. Course materials can be absorbed by those with technical and nontechnical bachelor’s degrees. Please visit the program website (http://onlinecybersecurity.seas.gwu.edu) for more information. The master of engineering in regulatory biomedical Engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://bme.seas.gwu.edu) in partnership with GW’s School of Medicine and Health Sciences (http://smhs.gwu.edu). The new program addresses a pressing need for a graduate program to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics and/or relevant industry/government experience study the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to coursework, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

Entrance Requirements
Admission to the master of engineering degree program requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. MEng(CPC) applicants (https://onlinecybersecurity.seas.gwu.edu/admissions) must submit an up-to-date resume; three letters of recommendation, at least one of which must come from a professional reference; and evidence of work experience in an IT field if they do not hold a degree in a technical discipline. MEng(rBME) students must submit a statement of purpose and a minimum of two letters of recommendation. Recommendation letters may be from the student’s advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Graduation and Scholarship Requirements
To meet graduation requirements, courses specified in a student’s Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a minimum grade of C−, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

Time Limits
All MEng (CPC) cohort students must complete the program in three years. Full-time students in the MEng (rBME) program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time rBME students are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Graduate Certificates
Entrance Requirements
Admission to SEAS certificate programs requires an appropriate bachelor’s degree from a recognized institution and evidence of a strong academic background and capacity
for productive work in the field selected. All applicants must provide an online application, statement of purpose, and resume and/or curriculum vitae. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate coursework is recommended. Certificate applicants are not required to submit letters of recommendation. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Graduation and Scholarship Requirements
In order to receive the graduate certificate students must have a minimum GPA in courses specified in their Educational Planner through DegreeMAP. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses, and will not be readmitted as a candidate. Students may not repeat for credit a course in which they have received a minimum grade of C−, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. Additional information regarding graduation requirements may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Professional Degrees
The SEAS professional degree programs are designed for those students who wish to pursue coursework beyond the master’s degree with emphasis on applied subject material rather than on basic research. Successful completion of the professional degree program leads to the degree of engineer or of applied scientist.

For admission to the degree of engineer, an applicant must have earned both a bachelor’s and master’s degree in an area of engineering. For the degree of applied scientist, an applicant must possess a master’s degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance Requirements
For admission to the degree of engineer, an applicant must have earned both a bachelor’s and master’s degree in an area of engineering. For the degree of applied scientist, an applicant must possess a master’s degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance requirements may vary by department within SEAS. A minimum GPA of 3.0 in graduate work is usually required, although individual departments often set higher admission standards. Some programs have specified prerequisites. An applicant who has significant deficiencies in preparation may be required to take prerequisite courses, which do not count toward any part of the requirements for the professional degree. The Departments of Computer Science and Electrical and Computer Engineering require applicants for the professional degree to have had two years of professional experience after receiving the master’s degree. For specific entrance and application requirements see Master’s Degree.

Graduation and Scholarship Requirements
The professional degree programs consist of a minimum of 30 credits in approved graduate-level courses beyond a master’s degree. Programs of study are determined by established prerequisites and the requirements of the department in which the student wishes to enroll. The student’s program must be approved by the faculty advisor and the department chair. Departments may require degree candidates to undertake and defend the results of a technical design project or development problem, or to prepare a comprehensive technical report to demonstrate the candidate’s ability to make independent use of the knowledge and discipline of thought acquired through graduate study. When applicable, the student is informed of this requirement by the faculty advisor at the time when the student’s program is being formulated. The project may not account for more than 6 credits.

If a student studying for the professional degree receives two grades of F or three grades below B−, study is terminated and further enrollment prohibited. A student must have a minimum of GPA of 3.0 in order to receive the degree.

Time Limits
A full-time student in the master’s program is allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. Such students may be readmitted to degree candidate status under conditions specified by the department chair.

Transfer Between Degree Programs
Candidates for the professional or doctor of philosophy degree who are in good academic standing may, with the approval of the faculty advisor and department chair, transfer from one degree program to the other within their department if they meet the qualifications and requirements specified by the department. In the Department of Engineering Management and Systems Engineering, only one such transfer is permitted.
Doctoral Programs

Doctor of Philosophy

The doctoral program is designed to prepare students for careers of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. The program is divided into two stages: the first comprises a study of related fields of learning that support the general area of research concentration and culminates in a qualifying examination; the second, composed of original research and the presentation of findings in a written dissertation, culminates in a final examination.

Entrance Requirements

Admission to the PhD program requires an appropriate bachelor’s or master’s degree from a recognized institution, evidence of a strong academic or relevant professional background, coursework designated by the department as pertinent to the field to be studied, and capacity for research. With the exception of applicants from SEAS BS and M.S programs, applicants must submit scores from the Graduate Record Examination (GRE) general test. All applicants must submit a minimum of three letters of recommendation, at least one of which should be from the advisor and/or faculty members at the institution(s) from which a degree was earned. Students for whom the bachelor’s is the highest earned degree must have a minimum GPA of 3.3 (on a 4.0 scale) in undergraduate work. Students for whom the master’s is the highest earned degree, departmental requirements for the GPA in coursework leading to that degree are as follows (on a 4.0 scale): Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Aerospace Engineering—3.4; Computer Science, and Engineering Management and Systems Engineering—3.5. Consult the department concerned for field-specific admission requirements.

Graduation and Scholarship Requirements

Upon admission to the first stage of the program—study of related fields culminating in the qualifying examination—students are assigned a faculty advisor who directs their studies. In some departments, a faculty committee may be appointed instead of a single advisor. Programs of study are structured to include a major field and two minor or supporting fields. Consult the department concerned for requirements.

For students who enter the program with a master’s degree, the formal program of study consists of a minimum of 30 graduate-level credits. For students who enter with a bachelor’s degree only, the program of study consists of a minimum of 54 graduate-level credits. These credits include both course and dissertation research credit. Individual requirements may vary by department. In many cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits stated above. Departments may establish a tool requirement, such as an examination in a computer language. Consult the department concerned for specific curriculum requirements.

If a doctoral student receives two grades of F or three grades below B−, graduate study is terminated and further enrollment is prohibited. Courses in which the student earned grades below B− are not included in the total credit requirement for the degree. Students who receive any grade below B− are required to review their programs of study with their advisors. Visit the Doctor of Engineering in Engineering Management (https://emse.offcampus.gwu.edu/doctoral-degrees/doctor-of-engineering) and Doctor of Philosophy in Systems Engineering (https://emse.offcampus.gwu.edu/doctoral-degrees/doctor-of-philosophy) program websites for graduation and scholarship information for those distance learning doctorates.

Time Limits

In general, one year of full-time study is the minimum amount of time needed to prepare for the qualifying examination. Students should consult the individual department for specific timelines and regulations. In general, the qualifying examination must be completed within five years of the date of admission, unless specified otherwise by the department. The entire degree program must be completed within seven years, unless the department grants an extension. Approval of an extension is conditional on satisfactory progress. The time period for completion of the degree may be adjusted by the department for an approved leave of absence. A minimum of two years of full-time study and research should be expected. All time periods indicated here are increased by two years for students entering the doctoral program without a master’s degree.

Full-time doctoral students must register for a minimum of 9 credits per semester until the minimum number of credits are completed, and 1 credit of SEAS 0940 (Continuing Research – Doctoral) each semester thereafter until satisfactory completion of the final examination. Part-time doctoral students usually register for a minimum of 6 credits per semester until the minimum number of credits is completed, and 1 credit of Continuing Research each semester thereafter until satisfactory completion of the final examination. No minimum workload is required during the summer session.

Preliminary and Qualifying Examinations

The Department of Computer Science requires a preliminary examination that must be passed within four semesters of starting the program. It comprises material from the areas of algorithms and theory, and software and systems.

The Department of Electrical and Computer Engineering requires a preliminary examination that must be taken before completing 18 credits after initial registration. The examination is guided by, but not limited to, the core material of the GW master’s program. Specific details regarding the structure of the exam are available in the department.
To be admitted to the qualifying examination that is required of all doctoral students, students must have a minimum cumulative GPA of 3.2 in the Departments of Civil and Environmental Engineering and Computer Science, and of 3.4 in the Departments of Mechanical and Aerospace Engineering, Engineering Management and Systems Engineering, and Electrical and Computer Engineering.

The qualifying examination is the principal means of determining whether a student will qualify as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain whether the student's background and intellectual development are adequate to support doctoral research in the central field.

Preliminary and qualifying examinations may be written or oral or both. Students should consult the departments for specific guidelines. The examinations are conducted on dates established by the departments and are administered by a faculty committee. Upon favorable report of the examiners following the qualifying examination, students are admitted to candidacy for the degree. Students then begin specialized study and research under the supervision of a designated member of the full-time faculty. At the discretion of the faculty committee that prepared the examination, students who fail any part of the qualifying examination may be given a second opportunity to qualify for candidacy. Usually, the entire examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School will be considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

The Dissertation and Final Examination

Students admitted to candidacy for the degree of Doctor of Philosophy choose the faculty member under whom they wish to conduct research. The faculty member may accept or reject the request to serve as the student’s director of research. The research area must be approved by the director, under whom the candidate conducts dissertation research throughout the remainder of the doctoral program. Students may consult other members of the faculty on an informal basis. In the Departments of Engineering Management and Systems Engineering and Civil and Environmental Engineering, students are required to present a written dissertation proposal to a committee of three full-time faculty members and to successfully defend the proposal in an oral defense prior to performing the bulk of their dissertation research. Work on the dissertation encompasses a minimum of 12 to 24 credits, depending on the department.

The dissertation should embody the results of extended original study and include material deemed worthy of publication in recognized scientific and engineering journals. Students are expected to attempt to have the results of the research published as soon as possible after they receive the degree and to submit copies of the published material to the dean. The Department of Computer Science requires that at least one article be accepted for publication by a refereed conference or journal prior to completion of degree requirements. The Department of Engineering Management and Systems Engineering requires that an article be accepted for review by a refereed journal prior to completion of degree requirements; see the Doctor of Philosophy in Systems Engineering program (p. 578) website. The Department of Electrical and Computer Engineering requires the submission of a paper to a refereed journal and its acceptance for publication prior to the completion of degree requirements. Credit must be given in the publication to the fact that the material is abstracted, summarized, or developed from a dissertation submitted to The George Washington University in partial fulfillment of the requirements for the PhD.

All dissertations must be submitted electronically and meet the formatting and other requirements set forth at GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Regulations regarding the form of the dissertation and preparation of the abstract are available in department offices. The dissertation, with accompanying files, becomes the property of the University.

Upon acceptance of the dissertation by the research committee, the candidate is presented for the final examination. The final examination is oral and is open to the public. The candidate must demonstrate a mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee and scheduling of the examination. When the examining committee is convinced of the quality and originality of the candidate’s contribution to knowledge as well as his or her mastery of the scholarship and research techniques of the field, the committee recommends the candidate for the degree of doctor of philosophy. Students completing their degree program should refer to the sections on Eligibility for Graduation and Participation in the Commencement Ceremony under University Regulations (p. 23).

Doctor of Engineering

The School of Engineering and Applied Science offers an off-campus doctor of engineering (DEng) degree program. The doctor of engineering program addresses the widespread need for practitioners who can apply the knowledge they gain in the program of study within a business or technical environment, wherein the constant challenge is to create useful applications of the latest engineering principles and lead organizations that are occupied in this work.

The doctor of engineering degree currently is offered only in engineering management.
Doctor of Engineering in Engineering Management

The DEng (EM) program demands that research be applied to the solution of a real-world problem using the latest engineering concepts and tools—in other words, research toward the DEng program is applied, rather than basic. Its purpose is to empower students, who are likely to be practicing engineers, to create advanced, practice-based solutions.

Admission to the DEng (EM) program requires: (1) bachelor’s and master’s degrees from accredited institutions in engineering, applied science, mathematics, computer science, business administration, or information technology; (2) a minimum of two college-level calculus courses passed with grades of B- or above; and (3) a minimum graduate-level GPA of 3.2 (on a 4.0 scale).

The DEng (EM) program consists of 45 credits divided into a classroom phase of 10 graduate-level, three-credit courses, and a research phase during which a practice-based case study is undertaken on a topic related to engineering management, chosen by the student and approved by the adviser. Research for the case study comprises 15 credits. Prospective students are advised to contact the Engineering Management and Systems Engineering Department for additional information.

Visit the program website (http://emse.offcampus.gwu.edu/doctor-engineering-degree-program) for additional information.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 669)
- Bachelor of Arts with a major in computer science (p. 634)
- Bachelor of Science with a major in biomedical engineering (p. 593)
- Bachelor of Science with a major in civil engineering (p. 607)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 609)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 611)
- Bachelor of Science with a major in civil engineering, transportation and sustainability engineering option (p. 613)
- Bachelor of Science with a major in computer engineering (p. 658)
- Bachelor of Science with a major in computer science (p. 636)
- Bachelor of Science with a major in electrical engineering (p. 659)
- Bachelor of Science with a major in electrical engineering, energy option (p. 661)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 663)
- Bachelor of Science with a major in mechanical engineering (p. 693)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 695)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 696)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 698)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 699)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 701)
- Bachelor of Science with a major in systems engineering (p. 671)

Combined programs

- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-ba-ms-computer-science)
- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of cybersecurity in computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-ba-ms-cybersecurity)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Engineering in the field of regulatory biomedical engineering (p. 595)
- Dual Bachelor of Science with a major in biomedical engineering and Master of Science in the field of biomedical engineering (http://bulletin.gwu.edu/
GRADUATE

Master's programs

- Master of Engineering in the field of climate change engineering and policy (http://bulletin.gwu.edu/engineering-applied-science/climate-change-engineering-policy-meng)
- Master of Engineering in the field of construction engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/construction-engineering-meng)
- Master of Engineering in the field of cybersecurity policy and compliance (p. 674)
- Master of Engineering in the field of regulatory biomedical engineering (p. 595)
- Master of Science in the field of biomedical engineering (p. 596)
- Master of Science in the field of civil and environmental engineering (p. 621)
- Master of Science in the field of computer engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/computer-engineering)
- Master of Science in the field of computer science (p. 640)
- Master of Science in the field of cybersecurity in computer science (p. 642)
- Master of Science in the field of data analytics (p. 674)
- Master of Science in the field of electrical engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/electrical-engineering)
- Master of Science in the field of engineering management (p. 675)
- Master of Science in the field of mechanical and aerospace engineering (p. 702)
- Master of Science in the field of systems engineering (p. 678)
- Master of Science in the field of telecommunications engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/telecommunications-engineering)

Doctoral programs

- Doctor of Engineering in the field of engineering management (p. 679)
- Doctor of Philosophy in the field of biomedical engineering (p. 597)
- Doctor of Philosophy in the field of civil and environmental engineering (p. 622)
- Doctor of Philosophy in the field of computer engineering (p. 665)
- Doctor of Philosophy in the field of computer science (p. 644)
- Doctor of Philosophy in the field of electrical engineering (p. 666)
- Doctor of Philosophy in the field of engineering management (p. 681)
- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 704)
- Doctor of Philosophy in the field of systems engineering (p. 680)
CERTIFICATES

At the discretion of the respective departments, credit earned in a certificate program may be applied to a subsequent master's degree program. Scholarship requirements are the same as those for the master's degree program. Details are available in the Office of the Dean.

- Gateway to computer science graduate certificate (http://bulletin.gwu.edu/engineering-applied-science/computer-science/certificate-gateway-to-cs)
- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 707)
- Graduate certificate in computer security and information assurance (p. 645)
- Graduate certificate in emergency management and public health (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/emergency-management-public-health-certificate)
- Graduate certificate in energy engineering and management (http://bulletin.gwu.edu/engineering-applied-science/mechanical-aerospace-engineering/energy-engineering-management)
- Graduate certificate in engineering and technology management (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/engineering-technology-management)
- Graduate certificate in environmental engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/environmental-engineering)
- Graduate certificate in environmental and energy systems management (http://bulletin.gwu.edu/engineering-applied-science/environmental-energy-systems-management/environmental-and-energy-systems-management-certificate)
- Graduate certificate in geoenvironmental engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/geoenvironmental-engineering)
- Graduate certificate in greenhouse gas management (p. 683)
- Graduate certificate in high-performance computing (p. 667)
- Graduate certificate in homeland security emergency preparedness and response (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/homeland-security-emergency-preparedness-response-certificate)
- Graduate certificate in structural engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/structural-engineering)
- Graduate certificate in systems engineering (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/systems-engineering-certificate)

- Graduate certificate in systems management (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/systems-management-certificate)
- Graduate certificate in transportation engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/transportation-engineering)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Applied Sciences (APSC) (p. 1113)
- Biomedical Engineering (BME) (http://bulletin.gwu.edu/courses/bme)
- Civil Engineering (CE) (p. 1143)
- Computer Science (CSCI) (p. 1158)
- Electrical and Computer Engineering (ECE (p. 1257)) (p. 1257)
- Engineering Management and Systems Engineering (p. 1271)EMSE (p. 1271)
- Mechanical and Aerospace Engineering (p. 1391)MAE (p. 1391)
- School of Engineering and Applied Sciences (p. 1510)SEAS (p. 1510)

BIOMEDICAL ENGINEERING

OVERVIEW

Mission

The mission of the Department of Biomedical Engineering is to motivate and inspire students by providing high-caliber, fully integrated programs to prepare them to lead and participate in advancing the state of the art in health care technologies. In addition, graduates earn advanced degrees and further knowledge in the discipline by actively pursuing scholarly research for publication and dissemination.

Biomedical Engineering Program Educational Objectives

The biomedical engineering program prepares graduates who achieve employment in biomedical and related industry, government, or organizational fields using skills and
knowledge learned while an undergraduate student. This is evidenced by their:

- Employment history and/or career advancement.
- Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers and other publications, and involvement in professional associations).
- Entrepreneurial activities.

Student Outcomes
The Department of Biomedical Engineering aims to produce graduates who have the ability to:

- Apply knowledge of mathematics, science, and engineering.
- Design and conduct experiments, as well as to analyze and interpret data.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- Function on multidisciplinary teams.
- Identify, formulate, and solve engineering problems.
- Understand professional and ethical responsibility.
- Communicate effectively.
- Understand the impact of engineering solutions in a global, economic environment.
- Engage in life-long learning necessary to thrive in the profession.
- Keep abreast of contemporary issues while maintaining breadth and depth of knowledge.
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE
Bachelor's program

- Bachelor of Science with a major in biomedical engineering (p. 593)
- Bachelor of Science with a Second Major in Biomedical Engineering.

Any undergraduate student who is enrolled at GW, may declare a second major in biomedical engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in biomedical engineering which including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students pursuing other bachelor’s degrees (e.g., BA, BBA, BFA) must complete a double degree (p. ).

GRADUATION GRADE-POINT AVERAGE CRITERIA
To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Minor
- Minor in biomedical engineering (http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/minor)

Combined programs
- Dual Bachelor of Science with a Major in Biomedical Engineering and Master of Engineering in the Field of Regulatory Biomedical Engineering (p. 595)
- Dual Bachelor of Science with a Major in Biomedical Engineering and Master of Science in the Field of Biomedical Engineering (http://bulletin.gwu.edu/engineering-applied-science/biomedical-engineering/combined-bs-ms-biomedical-engineering)

GRADUATE
Master's programs
- Master of Engineering in the field of regulatory biomedical engineering (p. 595)
- Master of Science in the field of biomedical engineering (p. 596)

Doctoral program
- Doctor of Philosophy in the field of biomedical engineering (p. 597)

FACULTY

Professors I. Efimov (Chair), E. Entcheva, M. Kay, D. Lee, Z. Li, M. Loew, C. Park, J. Zara, V. Zderic

Assistant Professor C. Park

Associate Teaching Professor D.T. Lee

COURSES

Explanation of Course Numbers
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
BME 1010. Introduction to Biomedical Engineering. 1 Credit.
Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall, Every Year).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.
Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering; practical experiments and projects; introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Spring, Every Year).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.
Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are covered; manipulation of vectors and matrices and the use of vectorized code. (Fall, Every Year).

BME 2825. Biomedical Engineering Programming II. 3 Credits.
Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisites: BME 2820 or permission of the instructor. (Fall, Every Year).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.
Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomedical Engineering. 3 Credits.
Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. (Fall, spring, and summer, Every Year).

BME 3910. Capstone Design Preparation. 1 Credit.
Elements of project design; formulation of project ideas. Prerequisites: BME 2810 and BME 2815. (Fall, Every Year).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same as ECE 3915W. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring, Every Year).

BME 4488. Cell and Molecular Imaging. 3 Credits.
Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Restricted to juniors and seniors. Prerequisites: BME 2825 and ECE 3220. (Same as BME 6488) (Fall, Every Year).

BME 4489. Socially Assistive Robotics and Interactive Learning. 3 Credits.
Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisite: BME 2825. Recommended background: Experience with computer programming. (Fall, Every Year).

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.
Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).
BME 4830. Introduction to Medical Imaging Methods. 3 Credits.
Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Prerequisites: BME 3820 and ECE 3220. (Spring, Every Year).

BME 4835. Introduction to Assistive Robotics. 3 Credits.
Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Restricted to junior and seniors. (Fall and spring, Every Year).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3915W. (Same as ECE 4920W) (Fall, Every Year).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

BME 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

BME 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit. (Spring, Every Year).

BME 6065. Colloquium. 3 Credits.
Seminars and meetings featuring visiting scholars in biomedical engineering. Topics vary. See department for details. Restricted to graduate students in biomedical engineering. (Fall and spring, Every Year).

BME 6481. Regulatory Law for Medical Devices. 3 Credits.
An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.
Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.
The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 4842. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.
Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.
Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.
Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. Prerequisites: BME 6482. (Spring, even years).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.
Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6488. Cell and Molecular Imaging. 3 Credits.
Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Students taking this course for graduate credit complete additional work. Restricted to graduate students. Recommended background: Computer Programming. (Fall, Every Year).
BME 6489. Socially Assistive Robotics and Interactive Learning. 3 Credits.
Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Restricted to graduate students. Recommended background: Experience with computer programming. (Fall, Every Year).

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6830. Introduction to Medical Imaging Methods. 3 Credits.
Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Recommended background: Knowledge of signal processing. (Same as BME 4830) (Spring, Every Year).

BME 6840. Digital Image Processing. 3 Credits.
Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.
Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010 and ECE 6015. (Same as BME 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.
Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).

BME 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.
First part of the BME 6994 and BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer, Every Year).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.
Second part of the BME 6994 and BME 6995 practicum sequence. Prerequisite: BME 6994. (Fall, spring, and summer, Every Year).

BME 6998. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.
Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates. (Fall, spring, and summer, Every Year).

BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering offers bachelor’s degree in biomedical engineering that is accredited by the Accreditation Board for Engineering and Technology (ABET). The curriculum provides students the opportunity to select a subset of courses to suit their interests and needs
through a variety of technical electives. These electives include courses in leading-edge biomedical engineering topics, as well as advanced courses in computer science, electrical engineering, mechanical engineering, cell biology, physiology, the physical sciences, and mathematics.

Visit the program website (http://www.bme.seas.gwu.edu/programs-degrees) for additional information.

Technical elective  

Science Elective  

1 Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

2 Course satisfies the University General Education Requirement (p. 38) in math, science, and writing.

3 Programming elective pairs (take one pair)
   a) BME 2820 Biomedical Engineering Programming I and BME 2825 Biomedical Engineering Programming II
   b) CSCI 1111 Introduction to Software Development and CSCI 1112 Algorithms and Data Structures
   c) ECE 1120 C Programming for Electrical and Computer Engineering and ECE 1125 Data Structures and Algorithms for ECE

4 Potential restricted engineering electives (take 2):
   MAE 2131 Thermodynamics
   APSC 2057 Analytical Mechanics I
   APSC 2058 Analytical Mechanics II
   CE 2220 Introduction to the Mechanics of Solids
   ECE 2115 Engineering Electronics
   ECE 2140 Design of Logic Systems I
   ECE 3310 Introduction to Electromagnetics

5 At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining two courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

6 All technical electives must be approved by the academic advisor and must include at least three courses approved by the advisor as having engineering content.

7 Science electives (take one):
   PHYS 3128 Biophysics: Microscopic Physics in the Life Sciences
   CHEM 3165 Biochemistry I

---

**DUAL BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING**

The School of Engineering and Applied Science offers a dual bachelor of science with a major in biomedical engineering (p. 593) and master of engineering in the field of regulatory biomedical engineering (p. 595) degree program. The program allows students to take up to 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year. Visit the program website (https://graduate.seas.gwu.edu/five-year-program) for additional information.

**MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING**

The master of engineering in the field of regulatory biomedical engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://www.bme.seas.gwu.edu) in partnership with the School of Medicine and Health Sciences (http://smhs.gwu.edu). The program is designed to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics, and/or relevant experience in government and industry, learn the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to coursework, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.bme.seas.gwu.edu) for additional information.
REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in elective courses.

MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The degree of master of science in the field of biomedical engineering degree program is designed to prepare students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to synthesize biomedical systems and devices. Students choose between two areas of focus: medical imaging or medical instrumentation. Thesis and non-thesis options are available. The program is offered on GW’s main campus in Foggy Bottom, where the School of Engineering and Applied Science (http://www.seas.gwu.edu), the School of Medicine and Health Sciences (http://smhs.gwu.edu), and GW Hospital (http://www.gwhospital.com) are separated by one city block.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.bme.seas.gwu.edu/master-science-biomedical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 18 credits in required courses and 12 credits in elective courses (non-thesis option) or 6 credits in thesis and 6 credits in elective courses (thesis option).

Required of students who have selected the thesis option

For students with a BS degree, a minimum of 54 credits, of which at least 36 must be from courses available for graduate credit, and at least 12 must be in dissertation research is required. The remaining 6 credits may be in undergraduate courses, graduate courses, dissertation research credits, or a combination of all. Course selections must be approved by the student’s advisor.

**Preliminary/Qualifying Exams**

All PhD in BME students are required to take a doctoral preliminary examination, which are held at the beginning of each semester. The goal of the exam is to determine the student’s aptitude and ability to complete original and independent research at the doctoral level, to assess the student’s ability to review previous work from the literature, and to determine the student’s ability to understand and apply fundamental concepts in their technical area. A written proposal and an oral presentation of the predetermined question are required. All students should take the exam as early as possible after they complete at least 6 credits in core courses and 6 credits in elective courses and maintain a minimum average GPA of 3.4. The exam typically should be completed no later than the beginning of a student’s fourth semester.

**Dissertation**

After successful completion of the preliminary examination the student is admitted to be a candidate for the PhD degree program and begins specialized research under the supervision of his/her dissertation advisor. Research direction may be shared by a full-time faculty member and an outstanding external scientist or engineer, but the final responsibility for the academic aspects of the dissertation work lies with the BME faculty advisor.

**Dissertation research proposal**

During the research phase, each doctoral candidate is required to give a research proposal presentation to the Dissertation Committee. The student’s research progress is assessed by the committee and appropriate suggestions for continuing research directions are solicited from those in attendance. Scheduling of the research proposal presentation will be done at a minimum of one year before the final dissertation defense by the student’s dissertation advisor. The committee helps the student to define the research topic, and ultimately approves the research proposal. The dissertation advisor should propose the membership of the dissertation research committee, which must be approved by the Associate Chair for Research and Graduate Affairs. At least four individuals should serve on the research proposal committee; the research advisor is the dissertation director (also called the advocate) and three others. Two of the committee members must be full-time BME faculty. Students are required to present the written dissertation proposal to the committee and to successfully defend the proposal in an oral defense subsequent to performing the bulk of their dissertation research. After the

**Electives**

For non-thesis option, students select four elective courses (12 credits). For thesis option, students select two elective courses (6 credits). All electives must be approved by the advisor.

---

**DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOMEDICAL ENGINEERING**

**Program Overview**

The PhD in biomedical engineering (BME) is designed to prepare rising scholars and researchers to apply engineering principles to problems in medicine and biology; to understand and model attributes of living systems; and to synthesize biomedical systems and devices to produce original research. Students work closely with a faculty advisor in their chosen research area to create a curriculum plan and to receive guidance for the doctoral dissertation. Students may focus their dissertation research in areas such as cardiac electrophysiology, therapeutic ultrasound, drug delivery, image analysis and image processing, medical imaging and computer-aided diagnosis, assistive robotics, optogenetics, microfluidics, and lab-on-a-chip technologies. Research partnerships between departmental faculty and the School of Medicine and Health Sciences, George Washington University Hospital, Children’s National Health System, U.S. Food and Drug Administration, and National Institutes of Health offer valuable synergistic research experiences for BME doctoral trainees.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

More information is available on the departmental website (https://www.bme.seas.gwu.edu).

**REQUIREMENTS**

**Credit Requirements**

The following requirements must be fulfilled:

General requirements are stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Credit requirements—For students with an MS degree, a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be in dissertation research is required. Course selections must be approved by the student’s advisor.
proposal defense, the student submits the revised proposal, complying with all suggestions, clarifications, and corrections, as required by the dissertation committee.

Dissertation Defense: The dissertation advisor may decide that the research achieved by the doctoral student is sufficient to satisfy the requirement of the degree. The advisor proposes an examining committee for the purpose of administering the final dissertation examination (dissertation defense). The committee of examiners must consist of no fewer than five members, at least three of whom normally are full-time BME faculty members with scholarly specialties within the area of concentration; at least one member normally is from an academic specialty outside the area of concentration. An external examiner must be invited. The dissertation advisor serves on the examining committee both as advocate and as a non-voting committee member. As its first order of business, the committee elects its own chairman, who should not be the dissertation advisor or the student’s faculty advisor. The dissertation examining committee must be approved by the Associate Chair for Research and Graduate Affairs prior to the date of the defense. Each member of the examination committee, no later than three weeks prior to the defense, should receive a copy of the dissertation document. At the same time, the candidate must provide a 350-word abstract and other information to the department for the purpose of preparing an announcement of the defense. The dissertation defense is an oral examination, which is open to the public. When the dissertation is accepted as complete, it should be submitted electronically no later than the date specified by the Office of the Registrar.

Publication Requirements

Before the doctoral defense, the PhD student must publish at least one manuscript in a peer-reviewed journal on original work related to the topic of the doctoral dissertation.

Graduation and Scholarship Requirements

Students are responsible for adhering to the university’s minimum GPA requirement for graduation and scholarships. Consult SEAS Regulations (p. 577) section of this Bulletin. Students should contact the department for additional information and requirements.

CIVIL AND ENVIRONMENTAL ENGINEERING

Mission Statement

The mission of the Department of Civil and Environmental Engineering is to provide an academic environment where professional education can be pursued, scholarly research in science and technology can be conducted, and the interest of the public can be served through the advancement of knowledge.

In pursuit of this mission, the administration, faculty, and staff join to provide a broad-based, rigorous professional education in civil engineering at the undergraduate level; a graduate education at the master’s level in major areas of civil engineering; and doctoral programs in selective areas of excellence within civil engineering.

Educational Objectives of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional accomplishments:

• Technical knowledge: students are able to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications;

• Team skills: students develop leadership skills, demonstrate proficiency in all forms of communication, and perform well in a multidisciplinary team environment;

• Continuous education: students recognize the need for continuing their education through graduate studies, continuous education opportunities, and/or self-education;

• Professionalism: students are prepared to exercise the highest standards of personal and professional integrity, demonstrate an understanding of the ethical and professional issues related to the procurement of work, and provide coordination between the design and construction aspects of the civil engineering profession.

These objectives are accomplished through a rigorous curriculum that emphasizes fundamentals in basic sciences, mathematics, humanities, and engineering in five major areas of civil engineering: environmental engineering, geotechnical engineering, structural engineering, water resources engineering, and transportation engineering. The curriculum enables students to use modern engineering tools to work individually and in teams. The curriculum contains a well-structured set of courses that enable students to develop the required analytical, experimental, and design skills.

Educational Outcomes of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates to have the following capabilities for career and professional advancement:

• Apply knowledge of mathematics, science, and engineering; design and conduct experiments; and analyze and interpret data;

• Design a system, component, or process to meet desired needs within realistic constraints such as economic,
environmental, social, political, health and safety, manufacturability, and sustainability constraints;
• Identify, formulate, and solve engineering problems;
• Use the techniques, skills, and modern engineering tools necessary for engineering practice;
• Function on multidisciplinary teams; and
• Communicate effectively.

Students are provided with the broad education necessary to understand the impact of engineering solutions in a global economic, environmental, and social context; a knowledge of contemporary issues; an understanding of professional and ethical responsibility; and a recognition of the need for and ability to engage in lifelong learning.

The civil engineering undergraduate program curriculum includes coverage of proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; proficiency in a minimum of four recognized major civil engineering areas; the ability to conduct laboratory experiments and to critically analyze and interpret data in more than one of the recognized major civil engineering areas; the ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum; and an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project, the importance of professional licensure and continuing education, and/or other professional practice issues.

UNDERGRADUATE

Bachelor's programs
• Bachelor of Science with a major in civil engineering (p. 607)
• Bachelor of Science with a major in civil engineering, environmental engineering option (p. 609)
• Bachelor of Science with a major in civil engineering, medical preparation option (p. 611)
• Bachelor of Science with a major in civil engineering, transportation and sustainability option (p. 613)
• Bachelor of Science in Civil Engineering and Physics (5-year program)

Combined programs
• Dual Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 616)
• Dual Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 617)

• Dual Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 618)

GRADUATE

Master's program
• Master of Engineering in the field of construction engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/construction-engineering-meng)
• Master of Science in the field of civil and environmental engineering (p. 621)

Doctoral program
• Doctor of Philosophy in the field of civil and environmental engineering (p. 622)

CERTIFICATE
• Graduate certificate in environmental engineering
• Graduate certificate in geoenvironmental engineering
• Graduate certificate in structural engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/structural-engineering)
• Graduate certificate in transportation engineering (http://bulletin.gwu.edu/engineering-applied-science/civil-environmental-engineering/transportation-engineering)

FACULTY

Professors S.S. Badie, K.H. Digges (Research), M.I. Haque, S. Lerman, M.T. Manzari (Chair), R. Riffat, K. Roddis, S.S. Badie

Associate Professors P.F. Silva

Assistant Professors E. Angoshtari, L. Farhadi, S.H. Hamdar, T. Li, D. Shuai

Research Professor K.H. Digges

Professorial Lecturers M.O. Critchfield, D. Rigby, K. Garrahan, K. Ghavami, F. Sadek, C. Tin

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.
An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.
The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 2210. Engineering Computations. 3 Credits.

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.
Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisites: APSC 2057 and APSC 2113. (Fall, Every Year).

CE 2510. Environmental Sustainability. 3 Credits.
An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.
Transportation system components; roadway traffic capacity and network performance measures; signalized and unsignalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisite: MATH 2233. (Spring, Every Year).

CE 3110W. Civil Engineering Materials. 2 Credits.
Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: CE 2220. (Fall, Every Year).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.
Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. CE 3110W may be taken as a corequisite. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.
Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. (Fall and spring, Every Year).

CE 3230. Structural Theory I. 3 Credits.
Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210 and CE 2220. (Fall, Every Year).

CE 3240. Structural Theory II. 3 Credits.
Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230. (Spring, Every Year).

CE 3310. Reinforced Concrete Structures. 3 Credits.
Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. CE 3240 may be taken as a corequisite. Prerequisite: CE 3240. (Fall and spring, Every Year).

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.
Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisite or corequisite: CE 3610.
CE 3521. Environmental Engineering Laboratory. 1 Credit. Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits. Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisite: MAE 3126.

CE 3611. Hydraulics Laboratory. 1 Credit. Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli’s theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits. Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. APSC 3115 and CE 2220 may be taken as a corequisite. Prerequisites: APSC 3115, CE 2220 and MATH 2233. (Fall and spring, Every Year).

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits. Human and physical processes shaping urban environments; human–environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits. Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits. Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. (Spring, Every Year).

CE 4341. Senior Design Project I. 1 Credit. First in a two-course sequence for the senior design project in civil and environmental engineering. Outcomes include team formation, project selection, task formulation and assignments, preliminary design validation and/or prototyping. Restricted to students in the civil engineering program with senior standing. (Fall, Every Year).

CE 4342. Senior Design Project II. 3 Credits. Second in a two-course sequence for the senior design project in civil and environmental engineering. Application of civil and environmental engineering concepts in the design of a project that integrates the concepts and technical knowledge learned in two or more of the following disciplines: engineering mechanics, materials, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Restricted to students in the civil engineering program with senior standing. Prerequisite: CE 4341. Recommended background: Knowledge of structural analysis of indeterminate structures, reinforced concrete and structural steel design, and soil mechanics. (Spring, Every Year).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits. Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisites: CE 2220 and MAE 3126. (Fall, Every Year).

CE 4411. Geotechnical Engineering Laboratory. 1 Credit. Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. CE 4410 may be taken as a corequisite. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits. Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520 and CE 4410. (Spring, Every Year).

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits. Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits. Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. APSC 3115 and CE 3610 may be taken as a corequisite. Prerequisites: APSC 3115 and CE 3610. (Fall and spring, Every Year).
CE 4810. Research. 1-8 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status. (Fall and spring, Every Year).

CE 4820. Special Topics. 1-6 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 6101. Numerical Methods in Engineering. 3 Credits.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.
Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6110. Contracts and Specifications In Construction Engineering. 3 Credits.
Overview of contracts, specifications, and the legal environment for engineers; construction contracts, specifications, bidding, contract administration, bonds and securities, dispute resolution. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6111. Project Management For Construction. 3 Credits.
Principles of project management in construction industry. Elements of project management such as structural organization, planning, scheduling, communications, bidding, change orders, contractual relationship, and labor relations and related activities in construction. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6112. Construction Project Acquisition. 3 Credits.
Basic principles used in the procurement and tendering stages of projects up to delivery; construction management activities, financial activities, and cost estimating software and techniques. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6113. Construction Contracts, Insurance, and Bonds. 3 Credits.
Common laws used in construction such as contract, tort and statutory/regulatory laws. Elements of project dispute avoidance, subcontracts, project delivery, and insurance and performance and payment bonds. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6114. Construction Methods, Materials, Equipment, and Systems. 3 Credits.
Principles of construction methods, machinery and equipment selection, and production estimation. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6115. Project Planning and Scheduling. 3 Credits.
Fundamentals of project planning and scheduling, scoping estimation risk analysis with a focus on the tools and techniques available to a project planner for mitigation of project risks. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6116. Green Building Design and Construction. 3 Credits.
Sustainability issues and green building design and delivery with a focus on development of commercial and institutional high performance green buildings; LEED ratings and accreditation. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6117. Construction Finance and Engineering Economics. 3 Credits.
Fundamentals of financing construction projects. Commonly used business models, life cycle cost analysis, and software tools for construction project cost control. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6118. Advanced Construction and Computer-Aided Design. 3 Credits.
Integration of construction techniques and computer-aided design; building information modeling and other technologies in various phases of construction management. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall, Every Year).
CE 6119. Construction Safety And Quality Control. 3 Credits.
Principles and importance of construction quality assurance and contractor quality control. Quality control methods to assess design activities in design-build contracts. Overview of hazardous situations that may arise in the construction jobsite and methods for mitigation these dangerous situations. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6121. Construction Project Control. 3 Credits.
Basic principles of scope, cost, schedule, risk, and quality management; the organization of construction firms at the general corporate level and the project level, flow of information between parties in the project, scheduling software. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6122. Introduction to Project Management. 3 Credits.
Introduction to project management, the construction project delivery methods, infrastructure, and the general corporate level and the project level, flow of information between parties in the project, scheduling software. Restricted to graduate students or with approval of the department. Recommended background: bachelor’s degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6201. Advanced Strength of Materials. 3 Credits.
Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220 and CE 3240. (Spring, Every Year).

CE 6202. Methods of Structural Analysis. 3 Credits.
Modern methods of analysis of statically indeterminate structures, matrix analysis based on flexibility, stiffness, energy and variational methods, substructuring techniques; consideration of plastic collapse of structures; introduction to the finite element method. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.
Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates and Shells. 3 Credits.
Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220 and CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.
General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6206. Continuum Mechanics. 3 Credits.
Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.
Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.
Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 2220. (Same as MAE 6207) (Spring).

CE 6209. Mechanics of Composite Materials. 3 Credits.

CE 6210. Introduction to Finite Element Analysis. 3 Credits.
Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: Proficiency in one computer language; and CE 2220 and CE 3240. (Fall, Every Year).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.
Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.
Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.
CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.
Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.
Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.
Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.
Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.
Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058 and CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.
Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115 and CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.
Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240 and CE 4340; and CE 6340 or CE 6701. (Spring, Every Year).

CE 6350. Introduction to Biomechanics. 3 Credits.
Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220. (Fall, Every Year).

CE 6401. Fundamentals of Soil Behavior. 3 Credits.
Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410. (Fall, even years).

CE 6402. Theoretical Geomechanics. 3 Credits.
Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Foundation Engineering. 3 Credits.
Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410. (Spring, Every Year).

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.
Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.
Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.
Principles of thermodynamics and kinetics, acid-base chemistry, alkalinity, coordination chemistry, precipitation, adsorption, redox chemistry. Prerequisites: CHEM 1111 and CHEM 1112. (Fall, Every Year).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.
Elements of design, including basic parameters and hydraulic requirements; layout and design of water supply and wastewater systems, pumping stations, and treatment plants; plant expansions and modifications. Prerequisite: CE 4530. (Spring, Every Year).

CE 6503. Principles of Environmental Engineering. 3 Credits.
Principles of chemical equilibrium and reaction kinetics, acid-base and redox reactions, chemical transport, and reactors. Reactor design of ozone contactor, air stripping tower, activated carbon adsorption, and membrane filtration by the principle of mass balance. Prerequisite: CE 3520. (Fall, Every Year).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.
Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Nanotechnology and water reuse systems. Prerequisite: CE 3520. (Spring, Every Year).
CE 6505. Environmental Impact Assessment. 3 Credits.

CE 6506. Microbiology for Environmental Engineers. 3 Credits.
Principles of microbiology and their applications to biological processes in the natural environment and engineered systems. Engineering applications, principles of biochemistry and microbiology of drinking water quality, waste and wastewater treatment, and bioremediation. Prerequisite: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.
Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504. (Fall and spring, Every Year).

CE 6508. Industrial Waste Treatment. 3 Credits.
Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall, Every Year).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.
Regulations, including RCRA and Superfund; transport and fate of hazardous substances; elements of environmental toxicology, risk assessment, and hazard ranking; monitoring, data collection, and evaluation; waste minimization. Prerequisite: CE 3520. (Spring, Every Year).

CE 6601. Open Channel Flow. 3 Credits.
Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

CE 6603. Design of Dams. 3 Credits.

CE 6604. Advanced Hydrology. 3 Credits.
Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.
Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.
Irrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisites: APSC 6213 and permission of the instructor. (Fall and spring, Every Year).

CE 6607. Water Resources Planning and Control. 3 Credits.
The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 6608. Hydraulic Modeling. 3 Credits.
Dimensional analysis and similarity. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.
Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 6610. Pollution Transport Systems. 3 Credits.
Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisites: CE 3610 and MAE 2131. (Fall and spring, Every Year).

CE 6701. Analytical Mechanics. 3 Credits.
Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange’s equations, nonholonomic systems, Hamilton’s equations, theory of small oscillations. Prerequisites: APSC 2058 and APSC 2113. (Fall, Every Year).
CE 6702. Vehicle Dynamics. 3 Credits.
Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. CE 6701 may be taken as a corequisite. prerequisite: CE 6701. (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

CE 6706. Pavement and Runway Design. 3 Credits.
Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.
Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.
Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.
Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. Recommended background: Basic knowledge of transportation engineering. (Spring, Every Year).

CE 6730. Sustainable Urban Planning. 3 Credits.
Human and physical processes shaping urban ecologies and environments; human-environment interactions in the context of an urban region; urban land use, transport and planning. Restricted to students with departmental approval. Prerequisite: CE 2710. (Spring, Every Year).

CE 6800. Special Topics. 1-6 Credits.
Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.
May be repeated once for credit. Additional prerequisites may be required for a specific internship as determined by the research supervisor. Restricted to graduate students in the civil and environmental engineering program. Prerequisites: Required courses in the area of focus and permission of the department. (Fall and spring, Every Year).

CE 6808. Research. 1-12 Credits.
Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.

CE 6999. Thesis Research. 3 Credits.

CE 8320. Theory of Elasticity II. 3 Credits.
Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisites: APSC 6211 and CE 6207. (Spring, Every Year).

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.
Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Prerequisites: CE 6206 and 6210; or MAE 6210 and MAE 6286. (Same as MAE 6288) (Fall and spring, Every Year).

CE 8350. Sedimentation Engineering. 3 Credits.
Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8351. Mechanics of Alluvial Channels. 3 Credits.
Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8352. Advanced Hydraulics. 3 Credits.
Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).
CE 8370. Intelligent Systems Theory and Applications. 3 Credits.
Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.
Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206. (Fall and spring, Every Year).

CE 8998. Advanced Reading and Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CE 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and of the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

Bachelor of Science With a Second Major in Civil Engineering
Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p. 607).

Graduation grade-point average criteria:
To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 38) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%2021_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; (p. 38) the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/)

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, ENVIRONMENTAL ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, environmental engineering option, can identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications. The program of study prepares students to understand the impact of engineering solutions in a global economic, environmental, and social context. The well-structured curriculum enables students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p. ).

Graduation grade-point average criteria:
To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, MEDICAL PREPARATION OPTION

The degree program for the bachelor of science in civil engineering, medical preparation option, focuses on proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; and the ability to conduct laboratory experiments and to critically analyze and interpret data. The curriculum prepares students to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil
engineering applications with special emphasis on the medical field.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

**Bachelor of Science With a Second Major in Civil Engineering**

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p. ).

**Graduation grade-point average criteria:**
To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, TRANSPORTATION AND SUSTAINABILITY ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, transportation and sustainability engineering option, have an in-depth understanding of traffic engineering concepts, analysis and design methods related to traffic flow, highway capacity, and measurement and control. Students gain basic understanding of human processes and interactions dictating urban demand for space and modes of movements of passengers and goods and how to plan urban transportation infrastructure to answer such demand in a sustainable manner.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

Bachelor of Science With a Second Major in Civil Engineering

Any undergraduate student who is enrolled at GW, may declare a second major in civil engineering only if their primary degree is a bachelor of science and the student must follow all the same degree requirements as those receiving a bachelor of science in civil engineering which include SEAS general, major, engineering electives, humanities/social science, and SEAS/technical GPA requirements. See the University Bulletin for more information on BS in Civil Engineering curriculum requirements for all the courses needed to complete the second major.

All other scenarios (BA, BBA, BFA, etc.) require the student to complete a double degree (p. 613).

Graduation grade-point average criteria:

To satisfactorily complete a second major in civil engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

DUAL BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL ENGINEERING

The School of Engineering and Applied Science offers a dual bachelor of science with a major in civil engineering (p. 607) and master of science in the field of environmental engineering (p. 621) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year. Visit the program website (https://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering) for additional information.

**MASTER OF SCIENCE IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING**

The master of science program in civil and environmental engineering is designed to provide students with in-depth knowledge and training in various areas of specializations within civil and environmental engineering. Environmental engineering students use one of the world’s largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed using advanced treatment technologies with reduced energy footprint, production of renewable energy, and resource recovery from the waste. Geotechnical and Structural engineering students study earthquake engineering and extreme event design of civil infrastructure systems on a state-of-the-art, six-degrees-of-freedom earthquake simulator. Transportation engineering students learn about vehicular and pedestrian traffic dynamics at GW’s Traffic and Networks Research Laboratory. Water resources engineering students learn about modeling of land surface and land-atmosphere interaction and exchange processes by utilizing innovative remote sensing, optimization and numerical modeling techniques.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.cee.seas.gwu.edu/degree-programs) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: Non-thesis option—33 credits; thesis option—30 credits, including 6 credits of thesis. In either option, the student must select one focus area from below and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

Students should consult with the advisor concerning their program of study.

**DOCTOR OF PHILOSOPHY IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING**

**REQUIREMENTS**

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be from graduate courses, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 42 must be graduate course credits, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student’s needs and goals.

**Other requirements**
- Qualifying examination—Administered twice a year, the examination covers subject matters at both the master’s and doctoral levels. Students should prepare for comprehensive questioning on all subject matters regardless of any particular course included in the actual doctoral coursework load.

Student should contact the department for additional information and requirements

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.cee.seas.gwu.edu/doctor-philosophy-program) for additional program information.

**COMPUTER SCIENCE**

**Mission Statement**

The mission of the Department of Computer Science is to serve the global community by providing high-quality computer science education, research, and professional services and to advance computer technology in selective areas while upholding standards of excellence.

**Educational Objectives**

The undergraduate program of study is designed to prepare graduates to earn an advanced degree in computer science or related disciplines; for a professional degree such as law, business, or medicine; or for employment in the computer or IT industry, where they apply the skills and knowledge learned in the program. Graduates conduct themselves professionally and ethically, work effectively in teams, and communicate effectively with both technical and non-technical audiences.

**Educational Outcomes**

A graduate in computer science has the ability to do the following:

- Apply knowledge of computing and mathematics appropriate to the discipline;
- Analyze a problem and identify and define the computing requirements appropriate to its solution;
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
- Function effectively on teams to accomplish a common goal;
- Understand professional, ethical, legal, security, and social issues and responsibilities;
- Communicate effectively with a range of audiences;
- Analyze the local and global impact of computing on individuals, organizations, and society;
- Recognize the need to engage in continuing professional development;
- Use current techniques, skills, and tools necessary for computing practice;
- Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
- Apply design and development principles in the construction of software systems of varying complexity.

**UNDERGRADUATE**

**Bachelor’s programs**

- Bachelor of Arts with a major in computer science (p. 634)
- Bachelor of Science with a major in computer science (p. 636)

**Minor**

- Minor in computer science (p. 639)

**Combined programs**

- Dual Bachelor of Arts with a major in computer science and Master of Science in the field of computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-ba-ms-computer-science)

• Dual Bachelor of Arts with a major in computer science and Master of Science in the field of cybersecurity in computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-ba-ms-cybersecurity)

• Dual Bachelor of Science with a major in computer science and Master of Science in the field of computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-bs-ms-computer-science)

• Dual Bachelor of Science with a major in computer science and Master of Science in the field of cybersecurity in computer science (http://bulletin.gwu.edu/engineering-applied-science/computer-science/combined-bs-ms-cybersecurity)

GRADUATE

Master's programs

• Master of Science in the field of applied computer science (http://bulletin.gwu.edu/engineering-applied-science/applied-computer-science)

• Master of Science in the field of computer science (p. 640)

• Master of Science in the field of cybersecurity in computer science (p. 642)

• Master of Science in the field of data analytics (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/data-analytics-ms)

Doctoral program

• Doctor of Philosophy in the field of computer science (p. 644)

CERTIFICATES

• Gateway to computer science graduate certificate (http://bulletin.gwu.edu/engineering-applied-science/computer-science/certificate-gateway-to-cs) Offered online

• Graduate certificate in computer security and information assurance (p. 645)

FACULTY

Associate Professors G. Parmer, T. Wood

Assistant Professors A. Caliskan, A. Yerukhimovich

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses

• Those in the 2000-4000s are upper-division undergraduate courses; computer science courses in this numerical range may only be taken for graduate credit with permission of the course instructor, permission of the student’s academic advisor, and by completing additional work in the course

• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students

• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: With the exception of CSCI 1010, CSCI courses numbered CSCI 1041 and below normally may not be counted toward degree requirements for computer science majors, unless approved by a departmental advisor.

CSCI 1010. Computer Science Orientation. 1 Credit.

Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.

An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1012. Introduction to Programming with Python. 3 Credits.

Introduction to programming a computer using the Python language; variables, types, assignment, conditionals, loops, lists, and program units. (Fall, spring, and summer, Every Year).

CSCI 1020. Applications Software. 3 Credits.

Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

CSCI 1022. Introduction to Internet Technology. 3 Credits.

An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.

Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).
CSCI 1030. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall and spring, Every Year).

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.
Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. MATH 1220 or MATH 1231 may be taken as a corequisite. Prerequisites: MATH 1220 or MATH 1231. (Fall and spring, Every Year).

CSCI 1111. Introduction to Software Development. 3 Credits.
Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.
Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a minimum grade of C; and MATH 1220 or MATH 1231. (Spring, Every Year).

CSCI 1131. Introduction to Programming with C. 3 Credits.
Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and non-numerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232.

CSCI 1132. Data Structures and Software Design. 3 Credits.
Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.
Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.
Programming techniques and software development in one or more programming languages; application development with GUs, database access, threads, web programming. Prerequisites: CSCI 1112 with a minimum grade of C; and MATH 1221 or MATH 1231. (Fall and spring, Every Year).

CSCI 2312. Discrete Structures II. 3 Credits.
Basic discrete techniques in computer science; proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Students must have received a minimum grade of C in CSCI 1311. Prerequisites: CSCI 1311; and MATH 1220 or MATH 1231; and MATH 1221. (Fall, Every Year).

CSCI 2441. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441 taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. Corequisite: CSCI 2113. (Fall and spring, Every Year).
CSCI 2441W. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2441W and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. (Spring, Every Year).

CSCI 2461. Computer Architecture I. 3 Credits.
Number representation, computer arithmetic, digital logic, and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware–software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112 and CSCI 1311. (Fall, Every Year).

CSCI 2501. Ethical Issues in Computing. 1 Credit.
Introduction and analysis of the ethical issues of the technological age; ethical principles and skills and social analysis skills needed to evaluate future consequences of the design and implementation of complex computer systems; application of professional ethics codes in decision-making in professional practice. Restricted to computer science majors. Prerequisites: CSCI 1010 and CSCI 1011. (Fall and spring, Every Year).

CSCI 2541W. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, Introduction to Not just SQL (NoSQL) database systems, normal forms, and design of database applications. Team software development, integration, and testing. Students cannot receive credit for both CSCI 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. Prerequisite: CSCI 1311. (Spring, Every Year).

CSCI 3212. Algorithms. 4 Credits.
Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisites: CSCI 1311 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3221. Programming Languages. 3 Credits.
Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.
For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisites: CSCI 3212, CSCI 3313, CSCI 3411 and permission of the instructor. (Fall and spring, Every Year).

CSCI 3313. Foundations of Computing. 4 Credits.
Theoretical foundations. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Compiler construction. Lexical and syntax analysis; parsing and parsing techniques; lexical and parsing tools. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3362. Probability for Computer Science. 3 Credits.
Introduction to probability and statistics for computer scientists; random variables; conditional probability, independence, correlation; applications to computer science, including information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. Prerequisites: CSCI 1311 and MATH 1232. (Spring, Every Year).

CSCI 3410. Systems Programming. 3 Credits.
Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer’s perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3411. Operating Systems. 4 Credits.
Process management, process state, concurrent processing, synchronization, events. Operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads. System management, memory management, process loading, communication with peripherals. File systems. Socket programming, packets, Internet protocols. Prerequisite: CSCI 2461, CSCI 2113.
CSCI 3462. Computer Architecture II. 3 Credits.
Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113 and CSCI 2461. (Spring, Every Year).

CSCI 3571. Introduction to Bioinformatics. 3 Credits.
An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126 or permission of the instructor. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CSCI 4222. Theory of Computer Translators. 3 Credits.
Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisites: CSCI 3313 and CSCI 3462. (Fall and spring, Every Year).

CSCI 4223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Students cannot receive credit for both CSCI 4223 taken while an undergraduate and CSCI 6223 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, odd years).

CSCI 4235. Development of Open-Source Software. 3 Credits.
Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.
Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.
Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.
Planning, design, and construction of the capstone project; economic analysis of the project; application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 3212 and CSCI 3411. (Fall, Every Year).

CSCI 4244. Capstone Design Project II. 4 Credits.
Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Restricted to seniors. Prerequisites: CSCI 4243W or CSCI 4243. (Spring, Every Year).

CSCI 4314. Discrete Analysis-Computer Science. 3 Credits.
Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisites: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.
Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisites: CSCI 2312, CSCI 3212 and CSCI 3313. (Spring, Every Year).
CSCI 4341. Continuous Algorithms. 3 Credits.
Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, Every Year).

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.
Application of linear algebra to computer science and engineering, with a computational perspective; points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4361. Simulation Methods. 3 Credits.
Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.
Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184. (Fall, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.
Development of software for real-time control of physical systems; reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4417. UNIX System Programming. 3 Credits.
Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.
System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Students cannot receive credit for both CSCI 4431 taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431 and CSCI 6431. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 4431W. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 2113 and CSCI 2461. (Fall and spring, Every Year).

CSCI 4432. Computer Networks II. 3 Credits.

CSCI 4455. Computer Game Design and Programming. 3 Credits.
Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.
Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming; search, game trees, backtracking; planning. May be taken for graduate credit. Prerequisites: CSCI 3212 and CSCI 3221. (Spring, Every Year).
CSCI 4521. Introduction to Mobile Robotics. 3 Credits.
Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.
Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisites: Permission of the instructor. (Fall and spring, Every Year).

CSCI 4527. Introduction to Computer Vision. 3 Credits.
Introduction and overview of computer vision. Image formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure form motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Spring, Every Year).

CSCI 4531. Computer Security. 3 Credits.
Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Corequisite: CSCI 4331. Prerequisite: CSCI 3411. (Spring, Every Year).

CSCI 4532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 4541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 4531. (Spring, Every Year).

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.
Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.
Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. (Fall, Every Year).

CSCI 4553. Design of Computer Animation II. 3 Credits.
Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics I. 3 Credits.
Graphics primitives; 2D, 3D, and viewing transformations; hierarchical modeling and animation; illumination and shading; texture mapping; shaders; visibility and collision detection; sampling and anti-aliasing; global illumination; projects using OpenGL graphics API. May be taken for graduate credit. Prerequisites: CSCI 2113 or CSCI 6221. (Spring, Every Year).

CSCI 4561. Design of User-Interface Programs. 3 Credits.
Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.
CSCI 4577. Biomedical Computing. 3 Credits.
Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Corequisite: CSCI 2441. Restricted to graduate students. Prerequisites: CSCI 2113 and CSCI 4576. (Spring, Every Year).

CSCI 6001. Introduction to Computer Programming and Software Development. 3 Credits.
Introduction to concepts and skill development in programming and software development, including problem solving on a digital computer and writing, debugging, and executing programs. Restricted to students in select programs. Departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6002. Introduction to Data Structures and Their Applications. 3 Credits.
Introduction to core computer science data structures including: arrays, lists, linked structures, stacks, queues, and trees. Sorting, searching, and comparison of algorithmic performance. Restricted to students in select programs. Departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6003. Introduction to Software Design and Engineering. 3 Credits.
Introduction to objects and object-oriented programming. Software development for applications including development with GUIs, database access, threads, web programming. Restricted to students in select programs. Departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.
Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6011. Introduction to Computer Systems. 3 Credits.
Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Students must have completed one year of coursework in programming in C, C++, or Java prior to registration. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6012. Cybersecurity and Privacy. 3 Credits.
Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.
Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6114. Introduction to Computer Systems and Systems Programming. 3 Credits.
Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer’s perspective. Software development with the C programming language. Students cannot receive credit for this course and CSCI 6011. Restricted to students in select programs. Departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6115. Application Development I. 3 Credits.
Client-server programming, web development, front end design, back-end server development, introduction to databases. Front and back-end languages, server administration and tools. Students cannot get credit for this course and CSCI 2441, CSCI 2441W, CSCI 2541, or CSCI 2541W. Restricted to students in select programs. Departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6116. Advanced Application Development. 3 Credits.
Design of large software systems and installable applications, development frameworks, integration of components and services, cloud and web programming, and mobile device development; software specification and testing. Prerequisites: CSCI 6115, CSCI 6431 and CSCI 6441. (Fall, spring, and summer, Every Year).
CSCI 6212. Design and Analysis of Algorithms. 3 Credits.
Design and analysis of algorithms; Turing machines; NP-complete theory; algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound; applications include sorting and searching, graph algorithms, and optimization. Students are expected to know data structures and possess general programming skills in one or more procedural/OOP language such as C/C++/Java, and to have a good mathematical background such as discrete math and some calculus, prior to registration. (Fall, spring, and summer, Every Year).

CSCI 6221. Advanced Software Paradigms. 3 Credits.
Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life cycle concepts; tadeoffs between compiled and interpreted languages; examples from Java, C, C++ and Perl. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages; detailed study of functional and object-oriented computational models; types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Students cannot receive credit for both CSCI 6223 taken while a graduate and CSCI 4223 taken while an undergraduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. (Spring, odd years).

CSCI 6231. Software Engineering. 3 Credits.

CSCI 6232. Software Engineering Development. 3 Credits.
Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisites: CSCI 6461 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6233. Software Testing and Quality. 3 Credits.
Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231. (Fall and spring, Every Year).

CSCI 6234. Object-Oriented Design. 3 Credits.
Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.
Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.
Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory and Applications. 3 Credits.
Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski’s theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212. (Fall and spring, Every Year).

CSCI 6318. Complex Systems. 3 Credits.
The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.
Review of mathematical theory for cryptography; classical ciphers; modern block and stream ciphers; symmetric and asymmetric systems; digital signatures; public key infrastructure; authentication. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6341. Continuous Algorithms. 3 Credits.
Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. (Spring, Every Year).
CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.
Linear algebra applied to computational problems in computer science and engineering; points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. (Spring, Every Year).

CSCI 6351. Data Compression. 3 Credits.

CSCI 6362. Probability for Computer Science. 3 Credits.
Concepts of probability and statistics used in computer science; random variables; conditional probability, independence, correlation; law of large numbers, central limit theorem; applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. (Spring, Every Year).

CSCI 6364. Machine Learning. 3 Credits.
Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 6212 and CSCI 6362. (Fall, Every Year).

CSCI 6365. Advanced Machine Learning. 3 Credits.
Theory and algorithms for machine learning research; in-depth focus on advanced machine learning topics such as clustering, learning from data streams, and climate informatics. Prerequisite: CSCI 6364. (Spring, Every Year).

CSCI 6411. Advanced Operating Systems. 3 Credits.
Fundamentals of operating system design and structure, resource management, and system support for multicore. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multicore architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design and Implementation. 3 Credits.
Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which is studied and motivated from the viewpoint of practical design and implementation. Students learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411. (Fall and spring, Every Year).

CSCI 6418. Unix Systems Administration. 3 Credits.
System administration for the stand-alone system or small networks; installation of two or more UNIX variants (Linux, FreeBSD, Solaris) hardware platforms; configuration of mail, name services, and other network utilities; backup and recovery, security and ethics. Students cannot receive credit for both CSCI 4418 taken while an undergraduate and CSCI 6418 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4418 and CSCI 6418. Prerequisites: CSCI 6114; or CSCI 6010 and CSCI 6011. (Fall, spring, and summer, Every Year).

CSCI 6419. Advanced Systems Administration. 3 Credits.
Administration of large systems, non-UNIX platforms, web document systems, website administration, cloud and web services, user and IT personnel components, and economics of IT support. Prerequisite: CSCI 6418. (Fall, spring, and summer, Every Year).

CSCI 6421. Distributed and Cluster Computing. 3 Credits.
Algorithmic and implementation challenges in building large scale distributed applications; distributed coordination, scheduling, consistency issues, and fault tolerance algorithms; fundamental distributed systems concepts applied to both high performance computing and cloud computing environments. Prerequisite: CSCI 6212. Recommended background: Substantial programming experience. (Fall, Every Year).
CSCI 6431. Computer Networks. 3 Credits.
Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications; layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Students cannot receive credit for both CSCI 4431/CSCI 4431W taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431/CSCI 4431W and CSCI 6431. Prerequisite: CSCI 6212. (Fall, Every Year).

CSCI 6433. Internet Protocols. 3 Credits.
Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisites: CSCI 6212 and CSCI 6431. (Fall and spring, Every Year).

CSCI 6434. Design of Internet Protocols. 3 Credits.
Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisites: CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 6441. Database Management Systems. 3 Credits.
Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Students cannot receive credit for CSCI 2441W or 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for CSCI 2441W or CSCI 2541W and CSCI 6441. Prerequisites: CSCI 6221 and CSCI 6461. (Spring, Every Year).

CSCI 6442. Database Systems II. 3 Credits.

CSCI 6443. Data Mining. 3 Credits.
Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisites: CSCI 6441 or permission of the instructor. (Fall and spring, Every Year).

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.
Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.
Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisites: CSCI 6221 and CSCI 6461. (Fall and spring, Every Year).

CSCI 6461. Computer System Architecture. 3 Credits.
Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks; cache coherence and memory subsystem design for multiprocessor architectures; parallel and distributed system architecture; internetworking. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6511. Artificial Intelligence. 3 Credits.
Representation and space search; heuristic search; predicate calculus; knowledge representation and knowledge engineering for expert systems; rule-based, hybrid, and O-O systems; semantic nets, frames, and natural language; theorem provers; planning, learning, neural nets; use of AI languages. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6515. Natural Language Understanding. 3 Credits.
The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.
Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.
Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisites: CSCI 6362 and MATH 2184; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6527. Introduction to Computer Vision. 3 Credits.
Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure form motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 6341. (Fall and spring, Every Year).
CSCI 6531. Computer Security. 3 Credits.
Functional description of cryptographic primitives; risk analysis; policy models; design principles; assurance; malicious logic. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Prerequisite: CSCI 6461. (Spring, Every Year).

CSCI 6532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 6534. Information Security in Government. 3 Credits.
CSCI 6541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 6531. (Spring, Every Year).

CSCI 6542. Computer Network Defense. 3 Credits.
Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.
Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisites: CSCI 6461 or CSCI 6411; and CSCI 6531 or EMSE 6540; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6547. Wireless and Mobile Security. 3 Credits.
Mobile agents, wireless Web, WAP, WEP, peer-to-peer computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisites: CSCI 6431 and CSCI 6531. (Spring, Every Year).

CSCI 6548. E-Commerce Security. 3 Credits.
Advanced technical topics in e-commerce security. X.500 registration systems, X.509/PKIX certification systems, secure payment methods, smart cards, authorization models in open distributed environments. Secure web systems, technologies, and applications. Prerequisite: CSCI 6541.

CSCI 6554. Computer Graphics II. 3 Credits.
Algorithmic aspects of computer graphics; 3D viewing transformation; shape modeling; shading and illumination models; visible-surface determination; curves and surfaces; sampling and aliasing; global illumination, ray tracing and radiosity; shadows; image manipulation and texture mapping; procedural models. (Spring, Every Year).

CSCI 6555. Computer Animation. 3 Credits.
Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; character animation; motion capture; temporal aliasing; sound synthesis and synchronization. (Fall, Every Year).

CSCI 6561. Design of Human–Computer Interface. 3 Credits.
Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.
History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.
Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisites: CSCI 6212; and programming experience in C/C++ or Java. (Spring, Every Year).

CSCI 6900. Colloquium. 0 Credits.
Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 3 Credits.
Topics vary by semester. May be repeated for credit if the topic differs. See department for details. (Fall and spring, Every Year).

CSCI 6908. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.
CSCI 6998. Thesis Research. 3 Credits.
CSCI 6999. Thesis Research. 3 Credits.

CSCI 8211. Advanced Topics in Algorithms. 3 Credits.
Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.
Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisites: CSCI 6232 and CSCI 6233. (Fall and spring, Every Year).

CSCI 8331. Advanced Cryptography. 3 Credits.

CSCI 8401. Advanced Topics in Systems. 3 Credits.
Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.
Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 8440. Advanced Topics in Data Management. 3 Credits.
Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.
Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.
Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms; illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.
Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.
Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the qualifying examination. (Fall and spring, Every Year).

CSCI 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

**BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE**

**Bachelor of Arts Degree Program**
The bachelor of arts with a major in computer science degree program provides a broad-based liberal arts curriculum for students who wish to augment technical knowledge with humanities, social sciences, business, communication, or management skills. Foundation courses focus on mathematics, science, software design and programming, computer systems and architecture, and algorithm design. Additional breadth or depth is afforded by selection of technical track courses that build on the foundations to provide in-depth exposure to a specific field in computer science. The program is designed for those with interests in two or more disciplines; students complete a second major or two minors in another academic department.

The minimum number of credits required for the BA with a major in computer science is 121; the credit total depends on the second major or minors chosen by the student. Students interested in pursuing a computer science major with preparation for application to medical school can also choose the medical preparation option. Students select a technical track in which at least three technical track elective courses are selected in consultation with the advisor.

Additional information about the Bachelor of Arts with a major in computer science is available on the program website (http://www.cs.seas.gwu.edu/bachelor-arts-program).

**Second Major in Computer Science**
Students who are not enrolled in the School of Engineering and Applied Science (SEAS), who are enrolled in a bachelor of arts program and wish to declare a second major in computer science, must apply and be admitted to the computer science program.

**Criteria for admission**
To be considered for admission to the second major in computer science, a student must satisfy the following criteria:
• Complete CSCI 1111 Introduction to Software Development or CSCI 1011 Introduction to Programming with Java or CSCI 1121 Introduction to C Programming with a minimum grade of B or CSCI 1112 Algorithms and Data Structures with a minimum grade of B; and complete MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II, or MATH 1231 Single-Variable Calculus I, with a minimum grade of B–.

• A minimum overall grade-point average of 3.0 at the time of application to the major.

Application Deadline
The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for specific application deadlines.

Credits in residence requirement
• For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria
• To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department website (http://www.seas.gwu.edu/department-computer-science) for more information about curriculum requirements for the second major in computer science.

REQUIREMENTS

Residency Requirement
As part of a residency requirement, all computer science majors must take a minimum of 30 credits in computer science courses at GW. Should a student pursue an approved study abroad program, credits earned in that program count toward this requirement. For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Creative arts elective

Three Second Major Elective Courses (3 or more credits each)

Sixth semester

Technical track elective

Humanities elective **

Foreign languages and culture elective

Three Second Major Elective Courses (3 or more credits each)

Seventh semester

One of the following Computer Science restricted electives: (if not taken above)

- CSCI 3212 Algorithms
- CSCI 3313 Foundations of Computing
- CSCI 3410 Systems Programming
- CSCI 3411 Operating Systems
- CSCI 4223 Principles of Programming Languages

Technical track elective

Foreign languages and culture elective

Two Second Major Elective Courses (3 or more credits each)

Eighth semester

Technical track elective

Humanities elective **

Unrestricted elective

Two Second Major Elective Courses (3 or more credits each)

*Course satisfies the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) in math, science, and writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W or CSCI 2541W.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (http://bulletin.gwu.edu/university-regulations/general-education); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).

Technical Track Requirement

All students in the BA in computer science program are required to take three technical courses (for a minimum of 9 credits) of computer science coursework for their technical track. The computer science courses selected must have a common theme and must have CSCI 2113 as a prerequisite or within the prerequisite chain. The faculty advisor’s documented approval is required before these courses may be applied toward degree completion. The Department of Computer Science website lists choices for the technical track in more detail.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE

The program combines software development, computer systems and architecture, algorithms, project design, science, and mathematics to provide a strong foundation in the underpinnings of computer science. Students are prepared to design and implement software needed for Internet operations, computer graphics and animation, secure systems, and applications for small, large, and embedded systems. In consultation with the advisor, students choose a technical track and a non-technical track. The technical track provides depth in a particular area of computer science, while the non-technical track enables students to stay current with the rapidly evolving field and to establish the relevance of their studies in the ever-changing global environment. The BS in computer science degree program is accredited by ABET.

Medical Preparation Option in Computer Science

This option is for students interested in pursuing a computer science major as they prepare to apply to a medical school. The degree program combines additional natural science course work with computer science course requirements.

Visit the program website (http://www.cs.seas.gwu.edu/bachelor-science-program) for additional information.

Bachelor of Science With a Second Major in Computer Science

Students enrolled in a BS program outside of the School of Engineering and Applied Sciences (SEAS) who wish to declare a second major in computer science must apply and be admitted to the second major program in computer science. Students in this program must follow the same degree requirements as those receiving a BS in computer science as their primary major.

Criteria for admission:

To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- Prior completion of CSCI 1011, or CSCI 1111, or CSCI 1121 with a minimum grade of B; or, CSCI 1112 with a minimum grade of B.
Prior completion of MATH 1220 and MATH 1221, or MATH 1231, with a minimum grade of B-.

A minimum overall grade-point average of 3.0 at the time of application to the major.

The application is due no later than the start of the fifth semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for current application deadlines for the second major in computer science.

Credits in residence requirement:
- For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria:
- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all courses taken that count towards the degree. See the department webpage (http://www.seas.gwu.edu/department-computer-science) for additional information.

REQUIREMENTS

Residency Requirement
As part of a residency requirement, all computer science majors must take a minimum of 30 credits in computer science courses at GW. Should a student pursue an approved study abroad program, credits earned in that program count toward this requirement. For a second major (p. 636), at least 24 credits in computer science courses must be completed in SEAS.

### Mathematics or science elective

Can be met with one course in mathematics or science in addition to the courses taken to fulfill the mathematics and science requirements. APSC 3115, CSCI 4314 or CSCI 4341, CSCI 3362 or CSCI 6362, EMSE 2705, MATH 2233, MATH 3125, or PHIL 3121 may be taken as a mathematics elective. Students who choose to take a science elective may select an additional course from the list under science requirements, above, or they may choose another natural science, such as astronomy, earth science, or forensic science.

### Non-technical track requirement

All BS in computer science students must complete a non-technical track that consists of at least three non-technical courses (for a minimum of 9 credits) with prior approval of the faculty advisor. To satisfy this requirement, students may choose one of the following:

- **Technology and law**—three pre-law related courses, for a minimum total of 9 credits, from the following: CSCI 4532, EMSE 6018, MAE 3171, and MAE 4172. Additional courses may be included with prior approval of the faculty advisor.

- **Business**—three courses, for a minimum total of 9 credits, in Business Administration (BADM) coursework. Courses that may be taken as part of this track include ACCY 2001, ACCY 2002, BADM 3401, and BADM 3501. Other BADM courses may be included with prior approval of the faculty advisor.

- **Pre-medical**—three courses, for a minimum total of 9 credits, from the following: BISC 1111 and BISC 1112, CHEM 1111 and CHEM 1112, CHEM 2151, CHEM 2152, CHEM 2153, CHEM 2154, PHYS 1011 and PHYS 1012, or PHYS 1021 and PHYS 1022. Additional courses may be included with prior approval of the faculty advisor.

- **Project management and leadership**—three courses, for a minimum total of 9 credits, of project management, communication, leadership, or engineering management coursework, including COMM 1041, COMM 1042, COMM 3174, EMSE 4410, EMSE 6001, EMSE 6005, MGT 3201, NSC 2175, NSC 4176, ORSC 1109, and ORSC 2116. Additional courses may be included with prior approval of the faculty advisor.

- **Global engineering**—three non-technical courses, for a minimum total of 9 credits, in one of the follow options with prior approval the faculty advisor: (1) while studying abroad; (2) in a single foreign language; (3) in International Affairs; or, (4) in aspects of non-English speaking cultures from the fields of anthropology, history, literatures, geography, political science, or religion.

- **Environment and climate change**—three courses, for a minimum total of 9 credits, related to the environment and climate change which may include BISC 2454, BISC 3460, CE 6503, CHEM 2085, ECON 2136, EMSE 6200, etc.

### Humanities and social science requirements

All BS in computer science students must take one humanities course and two social science courses from the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) list and three additional humanities, social science, and/or non-technical courses from a list of courses pre-approved by SEAS or the Department of Computer Science. All courses selected to satisfy this requirement must be at least 3 credits and approved by the faculty advisor.

### Mathematics requirement

Can be met by taking MATH 1220 and MATH 1221 and MATH 1232 or by taking MATH 1231 and MATH 1232. All students must take two MATH courses not counting MATH 1220; students who take MATH 1220 must take it as one of their unrestricted electives.

### Science requirement

Can be met by choosing from BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; CHEM 1111 and CHEM 1112; and PHYS 1021 and PHYS 1022. The three science requirement courses must include a two-course sequence.

### Statistics requirement

Can be met by choosing from APSC 3115, CSCI 3362 or CSCI 6362, CSCI 4341, or STAT 4157. CSCI 4341 and CSCI 3362/CSCI 6362 may count toward the statistics requirement or the mathematics or science elective, but not both. Students who were admitted prior to fall 2014 may count STAT 1051 and STAT 1053 toward the statistics requirement, if they took the course prior to the spring 2015 semester.

### Computer science elective

Can be met with one computer science course numbered 3000 or above.
EMSE 6220, EMSE 6260, EMSE 6225, EMSE 6235, EMSE 6230, GEOG 2108, GEOG 2134, GEOG 3130, GEOG 3132. Additional courses may be included with prior approval of the faculty advisor.

Public health—three courses, for a minimum total of 9 credits, in public health coursework that may include PUBH 1101, PUBH 1102, PUBH 2114, PUBH 2115, and PUBH 3133. Additional courses may be included with prior approval of the faculty advisor.

Individually designed—students select a series of related three non-technical courses (for a minimum of 9 credits). Any course completed for this track must be approved by the faculty advisor prior to completing the course.

Special option: minor or second major—students can combine at least three non-technical courses (for a minimum total of 9 credits), not closely related to the discipline of computing allotted to their non-technical track with their unrestricted electives to complete a non-technical minor or second major.

Technical Track Requirements
All students in the BS in computer science program are required to take three technical courses (for a minimum of 9 credits) of computer science coursework for their technical track. The computer science courses selected must have a common theme and must have CSCI 2113 as a prerequisite or within the prerequisite chain. The faculty advisor’s documented approval is required before these courses may be applied towards degree completion. The Department of Computer Science website lists choices for the technical track in more detail.

Unrestricted electives
All students in the BS in Computer Science are required to complete four unrestricted elective courses. All courses used to fulfill this requirement must have the explicit, documented approval from the faculty adviser, even when such courses are required for a minor or have transferred to the University as Advanced Placement (AP) credit.

The following guidelines and/or restrictions apply to selecting courses to satisfy this requirement:

1. Additional CSCI courses numbered above 2461 may count toward this requirement. Students may take a maximum of two research and independent study courses, for which the student must provide documentation of output, such as papers, presentations, or software. For courses from other departments, the student must obtain the approval of the faculty advisor.
2. Approved courses from the SEAS Humanities and Social Science Electives lists may count toward this requirement.
3. Approved courses listed in non-technical track lists count may toward this requirement.
4. Computer science course taught by another department generally do not count toward this requirement.

MINOR IN COMPUTER SCIENCE
This minor, offered by the Department of Computer Science, is for students in other GW schools as well as other majors within the School of Engineering and Applied Science. The curriculum consists of two segments: core courses and electives whose purpose is to provide the student with depth in an area of computer science. The total number of credits for the minor is 18.

To be considered for admission to the minor in computer science, a student must satisfy the following criteria:

- A minimum grade of B or above in CSCI 1111 Introduction to Software Development, CSCI 1011 Introduction to Programming with Java, or CSCI 1121 Introduction to C Programming, and a B- or above in MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II or a B- in MATH 1231 Single-Variable Calculus I;
- A minimum overall grade-point average of 3.0 at the time of application to the minor.
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the Department of Computer Science (https://www.cs.seas.gwu.edu) for current application deadlines for the minor in computer science.

Credits in residence requirement:
- For students pursuing a minor, at least 15 credits in computer science courses must be completed at GW.

Graduation grade-point average criteria:
To satisfactorily complete a minor in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses.

Visit the program website (https://www.cs.seas.gwu.edu/minor-computer-science) for additional information.

**MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE**

Program Overview

The Department of Computer Science offers a graduate degree program leading to the master of science in the field of computer science. After completing core requirements, students select electives in subject areas such as computer security and information assurance, database and information retrieval systems, software engineering and systems, biomedical computing, digital media and computer graphics, networking and mobile computing, computer architecture, pervasive computing and embedded systems, machine intelligence, robotics, and algorithms and theory. Students are not required to take elective courses in a particular subject area or across subject areas. Both thesis and non-thesis options are available.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.cs.seas.gwu.edu/master-science-computer-science) for additional information.

**Prerequisites:**

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students are also expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

**Educational Planner:**

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.
REQUIREMENTS

The following requirements must be fulfilled: Thesis option—30 credits, including 9 credits in required courses and 15 credits in elective courses, and 6 credits in thesis; non-thesis option—30 credits, including 9 credits in required courses and 21 credits in elective courses.

At least 24 of the 30 credits required for the degree must be taken at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a CSCI course and must be eligible to be taken for graduate credit according to the course description in this Bulletin. Any course below the 6000 level must receive the prior written approval of the student’s faculty advisor.

Program restrictions:

If a student’s admission letter states that they are required to take CSCI 6010 and CSCI 6011 they will be limited to EMSE 6540 Management of Information Systems and Security as their only non-CSCI course. Students required to take CSCI 6010 and CSCI 6011 must take these courses in their first semester. Students not required to take 6010 and 6011 may take up to three non-CSCI courses (9 credits) towards their degree with the prior written approval of the advisor.

If a student’s admission letter states that they are required to take CSCI 6010 and CSCI 6011 they will be limited to EMSE 6540 as their only non-computer science (CSCI) course. Students required to take CSCI 6010 and CSCI 6011 must take these courses in their first semester. Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-(CSCI) courses (9 credits) towards their degree with prior written approval from their advisor.

At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a computer science course and must be eligible to be taken for graduate credit according to the course description in this Bulletin. Exceptions may be made if a course will enhance an aspect of the student’s degree program. If a student wishes to count a course numbered below 6000 toward the degree, they must obtain prior written approval from their advisor.

**MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE**

**Program Overview**

The master of science in the field of cybersecurity in computer science degree program was created in response to the significant and fast-growing need for technical cybersecurity experts, both nationally and internationally. Students in the program acquire up-to-date knowledge and skills in cybersecurity, a field with increasing importance to national security, the economy, and private citizens. Students take courses in computer security, software security, network security, cryptography, and security management, among others. They also gain a firm grounding in computer science and take courses in related disciplines such as cybersecurity law and digital forensics.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.cs.seas.gwu.edu/master-science-cybersecurity-computer-science) for additional information.

**Prerequisites:**

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students are also expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

**Educational Planner:**

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor.

**REQUIREMENTS**

**Credit Requirements:**

- Thesis option: 30 credits are required for graduation; 6 of these credits are thesis credits
- Non-thesis option: 30 credits are required for graduation
- With departmental approval, students who complete the MS in the field of computer science and then enroll in the MS in the field of cybersecurity in computer science degree or vice versa can count the following core courses towards both degrees: CSCI 6212 Design and Analysis of Algorithms, CSCI 6221 Advanced Software Paradigms, and CSCI 6461 Computer System Architecture.

**Graduation and Scholarship Requirements:**

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

**Program Restrictions:**

- Student's whose admission letters state that they are required to take CSCI 6010 and CSCI 6011 are limited to EMSE 6540 Management of Information Systems and Security as their only non-CS course.
- Students required to take CSCI 6010 and CSCI 6011 must take these courses in their first semester.
- Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-CS courses (9 credits) towards their degree with prior written approval from their faculty advisor.
- At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a Computer Science course and must be eligible to be taken for graduate credit according to the course description. Exceptions may be chosen to enhance an aspect of the student’s degree program. Any course taken that is below the 6000 level must receive prior written approval from the student’s faculty advisor.

</tr>
</tbody>
</table>

Any special topics course taken for credit towards the degree must focus on security or cryptography and be approved by the faculty advisor.

Two additional security courses (6 credits) from across the university*.

All computer science security courses listed above not used to meet the applied cryptography or computer science security course requirements as well as the following courses may be used:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>EMSE 6537</td>
<td>Information Operations</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

EMSE 6543 Managing the Protection of Information Assets and Systems

EMSE 6545 Internet and Online Law for Security Managers

Any other cybersecurity-related course from across the university must be reviewed and approved by the student's advisor to ensure that it is sufficiently advanced and rigorous before it can be taken for credit towards the degree.

Electives

Students who are not taking the thesis option and are not required to take CSCI 6010 or CSCI 6011 can choose any two additional courses (6 credits) numbered 6000 or higher.

Students who choose the thesis option must obtain the written approval of their thesis advisor before registering for the following courses:

<table>
<thead>
<tr>
<th>Code</th>

<td>Thesis Research</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSCI 6999</td>
<td>Thesis Research</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If the admissions letter states that students are required to take CSCI 6010 and CSCI 6011, they will be limited to EMSE 6540 Management of Information Systems and Security as their only non-computer science course. Students required to take CSCI 6010 and CSCI 6011 are required to take these courses in their first semester. Students not required to take CSCI 6010 and CSCI 6011 may take up to three non-computer science courses (9 credits) towards their degree with prior written approval from their advisor.

At least 24 of the 30 credits required for the degree must be at the 6000 level or above. As a general rule, any course taken below the 6000 level must be a computer science course and must be eligible to be taken for graduate credit according to the course description. Exceptions may be chosen to enhance an aspect of the student's degree program. Any course taken that is below the 6000 level must receive prior written approval from the student's advisor.

With department approval, students who complete the Master of Science in Computer Science and then enroll in the Master of Science in the field of Cybersecurity in Computer Science or vice versa can count the following core courses towards both degrees:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 6212</td>
<td>Design and Analysis of Algorithms</td>
<td></td>
<td></td>
</tr>

<td>Advanced Software Paradigms</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSCI 6461</td>
<td>Computer System Architecture</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Any special topics course taken for credit toward the degree must be approved by the faculty advisor and it must focus on security or cryptography.

**Any cybersecurity-related course not specifically listed here must be approved in advance by the student’s advisor to
ensure it is sufficiently advanced and rigorous to count toward credit for the degree.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER SCIENCE

Program Overview

The doctoral degree is based on coursework as well as research that leads to a dissertation. It is recommended that students interested in the doctoral degree contact the faculty member whose research interests best align with their own interest. Areas of research focus center around these topics: computer security and information assurance, software engineering and systems, bioinformatics and biomedical computing, networking and mobile computing, pervasive computing and embedded systems, machine intelligence, robotics, and algorithms and theory.

Specific admission requirements are shown on the Graduate Program Finder (https://www.programs.gwu.edu/graduate/computer-science).

More information is available on the department website (https://www.cs.seas.gwu.edu/phd-computer-science).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree—A minimum of 30 credits, at least 18 of which must be in courses taken for graduate credit and at least 12 credits in dissertation research. Courses must be approved by the student’s advisor.

Students with a BS degree—A minimum of 54 credits, at least 18 of which must be in courses taken for graduate credit and at least 12 credits in dissertation research. Courses must be approved by the advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits. No specific courses are required; the student and advisor design the curriculum to meet the student’s needs and goals.

Preliminary Examination

Failure to pass the preliminary examination by the end of the fourth semester will lead to dismissal from the PhD program.

Students must demonstrate competency in two areas, one course per area:

- Algorithms and Theory: CSci 6212 Design and Analysis of Algorithms; CSci 6311 Theory of Computation
- Software and Systems: CSci 6221 Advanced Software Paradigms; CSci 6431 Computer Networks; CSci 6461 Computer Architectures

Students may demonstrate competency in a course in one of two ways:

- By completing the course with a minimum grade of A-.
- By taking only the written, in-class examinations in the course. With this option, students must pass all exams given during a semester, earning a minimum grade of A- in each.

Students who prove, via their official transcript that they earned the requisite grades as part of their master’s degree may apply that result to the preliminary exam requirement.

Students must fill out and submit to the Department of Computer Science a Preliminary Examination Form (https://www.cs.seas.gwu.edu/forms) after completing the requirements for the preliminary exam.

Publication Requirements

Students must have at least one peer-reviewed conference or journal paper accepted for publication at the time of the dissertation defense.

As a guideline, students are expected to have at least two or three conference or journal papers accepted for publication by the time of their dissertation defense, and the material from those papers should be the core of the dissertation.

Dissertation

Forming a dissertation committee:

- The dissertation committee must consist of at least three members including the major advisor (additional advisor(s) and co-advisors are optional and additional to the three members).
- The committee must have a presiding chair who must be a regular full-time faculty member in the Department of Computer Science. The committee chair may not be the student’s research advisor or co-advisor.
- At least one member of the committee must be an external reviewer. The external reviewer can be any person who holds a Doctoral degree, and may not be a faculty member in the Computer Science department, but may be a researcher or faculty member from another GW department or from outside the University.
- The other members of the committee, not including advisor(s) and co-advisors, shall be regular full-time faculty of the Department of Computer Science or a doctorate-bearing researcher or faculty member from another GW department or from outside of the University.
- The dissertation committee must be approved by the chair of the Department of Computer Science.
- The committee membership is normally the same for the dissertation proposal exam and the dissertation defense.
However, the membership may change with the approval of the advisor and department chair.

**Dissertation proposal defense:**
- The defense may not take place before the student has passed the preliminary examination.
- The student’s advisor must approve the scheduling of the dissertation proposal defense.
- The student submits a written proposal, in the style of a dissertation, to the members of the dissertation committee. The proposal should contain preliminary results.
- The dissertation committee evaluates the proposal and conduct an oral examination of the student. The committee conveys its recommendation of pass/fail to the Department of Computer Science.

**Dissertation defense:**
- The dissertation defense may not be scheduled before the student has passed the dissertation proposal defense.
- The student’s advisor must approve the scheduling of the dissertation defense.
- The committee evaluates the dissertation and conducts an oral examination of the student. The committee conveys its recommendation of pass/fail to the Department of Computer Science.

**Colloquium Expectation**
All full-time PhD students are expected to regularly attend department colloquia.

**Graduation and Scholarship Requirements**
Students are responsible for knowing the University’s requirements for graduation and scholarships. Consult the University Regulations (p. ) section of this Bulletin. Students should consult the department for additional information and requirements.

**GRADUATE CERTIFICATE IN COMPUTER SECURITY AND INFORMATION ASSURANCE**
The graduate certificate in computer security and information assurance provides a strong technical education in the security of computer systems and networks, as well as training in related policy issues. The program emphasizes concepts in computer security, augmented with current industry standard techniques and challenges. It provides an alternative to the full master of science degree program for practicing computer scientists and other information technology personnel who wish to extend their education beyond the bachelor of science level, and to those who wish to acquire up-to-date knowledge in the burgeoning field of computer and network security.

Applicants are expected to have a bachelor’s degree in computer science or a related field. Applicants not adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond pre-calculus) and those who have not taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents may be required to take additional proficiency courses before taking courses toward the completion of the certificate.

The George Washington University has been recognized as a Center of Academic Excellence in Education-Research by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

Students who are currently enrolled in the master of science in the field of computer science or master of science in the field of cybersecurity in computer science must apply for, and accept admission to, the certificate program prior to enrolling in their first graduate certificate in computer security and information assurance course.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.cs.seas.gwu.edu/graduate-certificate-computer-security-and-information-assurance) for additional program information.

**REQUIREMENTS**
The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses chosen from the list below.

645 School of Engineering and Applied Science
ELECTRICAL AND COMPUTER ENGINEERING

OVERVIEW

Mission Statement
The mission of the department is to motivate and inspire students by providing high caliber, fully integrated programs in electrical and computer engineering. These programs prepare graduates to provide leadership in a rapidly evolving global information society and to serve the greater good. The programs are also designed to allow students to advance the state of knowledge in our disciplines by actively pursuing scholarly research for publication and dissemination.

Educational Objectives
The objectives of the electrical and computer engineering undergraduate program of study are to educate students in the principles of engineering, as well as ensure awareness of their social responsibilities. The engineering education is based on the sciences and the principles of design. A balanced program in the humanities and social sciences as well as coverage of specific topics in professional ethics and social responsibilities, further instills a sense of social responsibilities. The programs provide students with a solid foundation in electrical and computer engineering through a balanced curriculum integrating the underlying scientific and mathematical knowledge with the latest technological developments. The curriculum is designed to produce engineers capable of functioning in the present technological environment and of adapting to future directions of the profession. Specifically, the programs aim to teach students how to analyze and implement complex interdisciplinary engineering projects; to give students a strong foundation for graduate study in their field; to prepare students for competitive and challenging industrial applications; to teach students how to use state-of-the-art computer tools for solving engineering problems; to expose students to hands-on engineering experience through laboratory courses; to cultivate students’ abilities to communicate and work effectively in teams; and to help students develop an understanding of the ethical issues and global perspectives arising in the practice of the engineering profession.

Educational Outcomes
The Department of Electrical and Computer Engineering aims to produce graduates who have the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context, as well as professional and ethical responsibility; and a recognition of the need for, and an ability to engage in, life-long learning.

Graduates also have the ability to:

- Apply knowledge of mathematics, science, and engineering;
- Design and conduct experiments, as well as analyze and interpret data;
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- Function on multidisciplinary teams;
- Identify, formulate, and solve engineering problems;
- Communicate effectively; and
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE

Bachelor's programs
- Bachelor of Science with a major in computer engineering (p. 658)
- Bachelor of Science with a major in electrical engineering (p. 659)
- Bachelor of Science with a major in electrical engineering, energy option (p. 661)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 663)

Minors
- Minor in computer engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/minor-computer-engineering)
- Minor in electrical engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/minor-electrical-engineering)

Combined programs
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of computer engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/combined-bs-ms-computer-engineering)
- Dual Bachelor of Science with a major in computer engineering and Master of Science in the field of electrical engineering (http://bulletin.gwu.edu/engineering-applied-
science/electrical-computer-engineering/combined-bs-computer-engineering-ms-electrical-engineering)

- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of computer engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/combined-bs-electrical-engineering-ms-computer-engineering)

- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of electrical engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/combined-bs-electrical-engineering-ms-electrical-engineering)

GRADUATE

Master's programs

- Master of Science in the field of computer engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/computer-engineering)

- Master of Science in the field of electrical engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/electrical-engineering)

- Master of Science in the field of telecommunications engineering (http://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/telecommunications-engineering)

Professional programs

See the School of Engineering and Applied Science (https://www.seas.gwu.edu) for programs leading to the professional degree.

Doctoral programs

- Doctor of Philosophy in the field of computer engineering (p. 665)
- Doctor of Philosophy in the field of electrical engineering (p. 666)

CERTIFICATES

- Graduate certificate in high-performance computing (p. 667)

FACULTY

Professors S. Ahmadi (Teaching), L. Bennett (Research), R.L. Carroll, E. Della Torre, T. El-Ghazawi, K.B. Eom, R.J. Harrington, H.J. Helgert, H. Huang, C.E. Korman, R.H. Lang, A. Louri, D. Nagel (Research), S. Subramaniam (Chair), M.E. Zaghloul

Associate Professors M. Doroslovacki, T. Lan, V. Sorger, G.P. Venkataraman

Assistant Professors A. Aslani, P. Dehghanian, O. Ozel

Lecturer E. Kayraklioglu

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical and Computer Engineering I. 1 Credit.

Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Fall, Every Year).

ECE 1020. Introduction to Electrical and Computer Engineering II. 1 Credit.

Continuation of ECE 1010. Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Spring, Every Year).

ECE 1120. C Programming for Electrical and Computer Engineering. 3 Credits.

Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization; concurrency and multithreaded programming using threads, processes as well as parallel C programming paradigms; controlling hardware devices and fine control via interfacing with assembly language. Credit cannot be earned for both this course and CSCI 1121. (Spring, Every Year).

ECE 1125. Data Structures and Algorithms for ECE. 3 Credits.

Fundamentals of algorithms and data structures for electrical and computer engineering; techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. Prerequisite: ECE 1120. (Fall, Every Year).
ECE 2110. Circuit Theory. 4 Credits.
Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasors; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisites: APSC 2113, and either PHYS 1022 or PHYS 1026. (Fall and spring, Every Year).

ECE 2115. Engineering Electronics. 4 Credits.
Solid state devices used in electronic engineering; physics of their operation; application to electronic circuits. Application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110. (Spring, Every Year).

ECE 2120. Engineering Seminar. 1 Credit.
A detailed view of the electrical and computer engineering professions. Departmental and other speakers discuss facets of ECE, engineering education, and other department, college, or university topics of interest. (Fall, Every Year).

ECE 2140. Design of Logic Systems I. 4 Credits.
Boolean algebra; combinational and sequential circuits; minimization techniques; design and build logic subsystems, such as decoders, multiplexers, adders, and multipliers. Use of CAD tools. Corequisite: ECE 2115. Prerequisite: ECE 2110. (Fall, Every Year).

ECE 2210. Circuits, Signals, and Systems. 3 Credits.
Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters; CAD tools used in design of projects. Prerequisite: ECE 2110. (Spring, Every Year).

ECE 3125. Analog Electronics Design. 4 Credits.
Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers; output stages and power amplifiers; frequency response of amplifiers, high-frequency models of FETs and BJTs; introduction to feedback circuit topologies; use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115. (Fall, Every Year).

ECE 3130. Digital Electronics and Design. 4 Credits.
Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Students must have completed a course in logic systems, such as ECE 2140 or equivalent, prior to enrollment. Consult the instructor if uncertain whether this requirement has been met. Prerequisite: ECE 2140. (Fall, Every Year).

ECE 3135. Design of Logic Systems II. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140. (Spring, Every Year).

ECE 3220. Introduction to Digital Signal Processing. 3 Credits.
Signal representation, sampling, discrete-time signals, z-transforms and spectra, difference equations; Fourier analysis; discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210. (Fall, Every Year).

ECE 3225. Signal and Image Analysis. 3 Credits.
Introduction to digital filters and digital image processing, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Offered as arranged. Prerequisites: APSC 3115 and ECE 2110. (Summer, Every Year).

ECE 3310. Introduction to Electromagnetics. 3 Credits.
Maxwell’s equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Spring, Every Year).

ECE 3315. Fields and Waves I. 3 Credits.
Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching; review of vector analysis and numerical methods; electrostatics, generalizations of Coulomb’s law, Gauss’s law, potential, conductors, dielectrics, capacitance, energy; Magnetostatics, Biot-Savart Law, Maxwell’s equations, vector magnetic potential, inductance, magnetic energy, boundary conditions. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Fall, Every Year).

ECE 3410. Communications Engineering. 3 Credits.
Fourier series and Fourier transform in relation to signal analysis. Convolution and linear filtering. Signal bandwidth and sampling theorem. Analog modulation. Random variables and stochastic processes; power spectrum. Digital modulation: BPSK, QPSK, MSK. Pulse code modulation, DPCM and delta modulation. Prerequisites: APSC 3115; and ECE 2210. Recommended background: Students in this course should have taken APSC 3115 (Engineering Analysis III) and ECE 2210 (Circuits, Signals, and Systems) or an equivalent course. If unsure, please contact the instructor, and discuss the prerequisite requirements. (Spring, Every Year).

ECE 3420. Communications Laboratory. 1 Credit.
Experiments supporting communications systems. Fourier analysis and Fourier transform. Sampling theorem, filtering, and aliasing. Amplitude modulation (AM), frequency modulation (FM), quantization, and pulse code modulation (PCM). Delta modulation. Binary phase shift keying (BPSK). Quadrature phase shift keying (QPSK). Offered As Arranged. Prerequisite: ECE 3410. (Summer, Every Year).
ECE 3515. Computer Organization. 3 Credits.
Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. Prerequisite: ECE 2140. Recommended background: Students should have taken at least one prior course in logic design (ECE 2140 or equivalent). (Fall, Every Year).

ECE 3520. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.
Microprocessor architecture, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience using laboratory facilities is an integral part of this course. Prerequisites: ECE 1120 and ECE 2140. (Fall, Every Year).

ECE 3525. Introduction to Embedded Systems. 3 Credits.
Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisites: ECE 1120 and ECE 3520. (Spring, Every Year).

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.

ECE 3915W. Electrical and Computer Engineering Capstone Project Lab I. 1 Credit.
Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

ECE 4140. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. Prerequisites: ECE 3130 and ECE 3135. (Same as ECE 6240) (Fall, Every Year).

ECE 4145. Micro- and Nanofabrication Techniques. 3 Credits.
Introduction to the basic fabrication principles at the micro and nano scale; students practice and fabricate simple devices. Prerequisite: ECE 2110. (Fall, Every Year).

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. Prerequisite: ECE 4140. (Same as ECE 6250) (Spring, Every Year).

ECE 4155. Modern Measurements and Sensors. 3 Credits.
Sensor technologies for measurement of mechanical, optical, magnetic, electromagnetic, thermal, and acoustic signals; interface electronic components, calibration, noise, and nonlinearity in addition to main modern sensors and sensor networks. May be taken for graduate credit. Prerequisite: ECE 3125. (Spring, Every Year).

ECE 4160. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps, and techniques to build devices such as carbon nanotubes, Graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). Prerequisite: ECE 2115. (Same as ECE 6260) (Fall, Every Year).

ECE 4320. Fields and Waves II. 3 Credits.
Magnetostatic fields, Lorentz force torques, Biot-Savart law, Ampere’s law, magnetic materials, inductance, magnetic energy; Maxwell’s equations, Faraday’s law, charge-current continuity, vector potential; time-harmonic fields, plane waves, polarization, skin effect, dielectric boundaries, and fiber optics; radiation, dipole, gain, effective area. Prerequisites: APSC 2114; and ECE 3315. (Spring, Every Year).
ECE 4325. Microwave and Optics Laboratory. 1 Credit.
Experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4415. Introduction to Computer Networks. 3 Credits.
Layered protocol architectures; digital transmission and fundamental limits; error detection and ARQ protocols; data link layer and control; multiple access protocols; circuit and packet switching; multiplexing; routing; flow and congestion control and queue management; LAN standards; TCP/IP; Next-generation Internet. Prerequisite: APSC 3115. (Spring).

ECE 4425. Data Communications Laboratory. 1 Credit.
Experiments in support of the analysis and design of communications systems with emphasis on network protocols. Time and frequency division multiplexing, flow control, automatic repeat request, interfacing, token ring, token bus, multiple access for Ethernet, routing, packet switching. Prerequisite: ECE 4415. (Spring, Every Year).

ECE 4435. Fiber Optical Communications. 3 Credits.
Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations, including energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Students should have completed at least one undergraduate-level course in electromagnetism and semiconductors prior to enrollment. Prerequisites: APSC 2114; ECE 3310 or ECE 4320. (Spring, even years).

ECE 4535. Computer Architecture and Design. 3 Credits.
Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. Prerequisite: ECE 3515. (Fall, Every Year).

ECE 4610. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. Prerequisites: ECE 2210 and ECE 3315. (Same as ECE 6610) (Spring, Every Year).

ECE 4615. Electrical Power Laboratory. 1 Credit.
Experiments in support of the analysis and design of electrical power systems. Measurements of the characteristics of devices to generate electric power. Rectification and inversion processes for power systems and drives. Prerequisite or corequisite: ECE 4610.

ECE 4620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall, Every Year).

ECE 4662. Power Electronics. 3 Credits.
The application of electronics to energy conversion; principles of operation, analysis, and control of circuits; methods of solving power electronic circuits and finding the steady-state values of important quantities; deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. Restricted to undergraduate students. (Same as ECE 6662) (Spring, Every Year).

ECE 4710. Control Systems Design. 3 Credits.
Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisites: APSC 2114; and ECE 2210 or MAE 3134. (Fall, Every Year).

ECE 4715. Control Systems Laboratory. 1 Credit.
Experiments in support of control theory, involving the use of the digital computer for process control in real time. Design of feedback and compensation with computer implementation. Digital simulation of linear and nonlinear systems. Prerequisite or corequisite: ECE 4710.

ECE 4730. Robotic Systems. 3 Credits.

ECE 4735. Robotics Laboratory. 1 Credit.
Experiments illustrating basic principles and programming of robots and other automated machinery. Design and writing of computer programs to use a robot’s arm, vision, and data files to accomplish tasks. Prerequisite or corequisite: ECE 4730/MAE 3197.

ECE 4920W. Electrical and Computer Engineering Capstone Project Lab II. 3 Credits.
Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall, Every Year).
ECE 4925W. Electrical and Computer Engineering Capstone Project Lab III. 3 Credits.
Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ECE 4920W. (Spring, Every Year).

ECE 4980. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Computer Architecture and Design. 3 Credits.
Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. (Fall, Every Year).

ECE 6010. Linear Systems Theory. 3 Credits.
Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. (Fall, Spring, Every Year).

ECE 6015. Stochastic Processes in Engineering. 3 Credits.
Axioms of probability; conditional probability; independent events; sequential experiments. Single and multiple random variables. Discrete-valued and continuous-valued stochastic processes; discrete-time and continuous-time stochastic processes; mean, auto-correlation and autocovariance functions; multiple random processes; stationary stochastic processes and linear time-invariant systems; ergodicity; Markov chains. Examples from engineering applications. (Fall, spring, and summer, Every Year).

ECE 6020. Applied Electromagnetics. 3 Credits.
Vector algebra and calculus, Divergence and Stokes theorems, Maxwell’s equations, Boundary conditions, Poynting vector theorem, Time harmonic waves, Wave equation, Propagation in lossy media, Skin depth, Plane waves in an arbitrary direction, Polarization, Snell’s law, Transmission line equations, Propagation constant, Characteristic impedance, Average power, Waveguides, TEM, TM and TE modes, cutoff frequencies, Vector and scalar potentials, scalar Green’s function, Near and far fields from a dipole, radiated power and Antenna fundamentals Recommended background: ECE 4320 or similar course. (Fall, Every Year).

ECE 6025. Signals and Transforms in Engineering. 3 Credits.

ECE 6030. Device Electronics. 3 Credits.
Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. (Spring, Every Year).

ECE 6035. Introduction to Computer Networks. 3 Credits.

ECE 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

ECE 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.
Primary traditional/conventional and alternative/renewable energy sources and energy storage applications. Large generation plants and distributed small generation units and impact on transmission and distribution systems operation and infrastructure. Review of applicable schemes of hybrid generation. Evaluate smart grid objectives on long and short term stability of large power networks. (Fall, Every Year).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.
Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Restricted to graduate students in science or engineering or permission of the instructor. (Fall, Every Year).
ECE 6120. Advanced Microarchitecture. 3 Credits.
Review of computer architecture fundamentals performance and power; pipeline design and hazards; superscalar pipelines, speculation and recovery; fetch logic and instruction caches; branch prediction; decoder logic for CISC and RISC; scheduling and instruction issue; ALUs and register files; memory optimizations; commit logic. Prerequisite: ECE 6005. Recommended background: Students should have taken at least one course in computer architecture, such as ECE 6005 or equivalent, prior to enrollment. (Spring, Every Year).

ECE 6125. Parallel Computer Architecture. 3 Credits.
Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6130. Big Data and Cloud Computing. 3 Credits.
This course covers a wide range of research topics related to big data and cloud computing, including data centers, virtualization, hardware and software architecture, as well as system-level issues on performance, energy efficiency, reliability, scalability and security. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6132. Secure Cloud Computing. 3 Credits.
The course provides a comprehensive guide to security concerns and best practices for cloud computing and cloud services. Topics discussed include cloud computing architectures, risk issues and legal topics, data security, internal and external clouds, information security frameworks and operational guidelines. Offered as arranged. Restricted to students in the MEng in cybersecurity policy and compliance program. (Summer, Every Year).

ECE 6140. Embedded Systems. 3 Credits.
Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005. (Fall, Every Year).

ECE 6150. Design of Interconnection Networks for Parallel Computer Architectures. 3 Credits.
The course is intended to provide students with an in-depth study and fundamental design principles of interconnection networks for parallel computing architectures including Network-on-Chips for multicores & Chip Multiprocessors (CMPs), interconnection networks for multiprocessors, multi-computers, and datacenters. Topics include interconnect topologies, routing protocols & algorithms, switching techniques, flow control protocols, router design, modeling and simulation tools, interconnect reliability, scalability, security, emerging technologies for interconnects (Optical, Wireless, Radio Frequency), emerging applications (neuromorphic, quantum, and approximate computing), case studies covering modern commercial examples. Restricted to SEAS Graduate Students. Prerequisites: ECE 6005 or equivalent course. Recommended background: Students in this course should have taken a prior course in computer organization or computer architecture. Acceptable courses include ECE 3515 (Computer Organization) or ECE 6005 (Microcomputer Systems Architecture) or an equivalent course. If unsure, please contact the instructor, and discuss the pre-requisite requirements. (Spring, Every Year).

ECE 6213. Design of VLSI Circuits. 3 Credits.
This class covers top-down ASIC/FPGA design methodology; Modeling of VLSI circuits using HDL; Behavioral, Structural, and RTL modeling techniques; Logic synthesis techniques; Design verification plan and techniques; Students design and verify a final project using state-of-the-art commercial VLSI CAD tools for ASIC and FPGA (Altera). (Fall, Every Year).

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.
This class covers advanced ASIC-FPGA design methodology including: synthesis methodology for both ASIC and FPGA design flow, DSP design for mobile device and implementation to ASIC and FPGA, low-power SOC design, CPF implementation, area/delay/power optimization and trade-offs, DFT, DFM, Low-Power design for mobile device, and Hardware/Software co-design. Advanced low power design for multi-core CPU architecture, LP top-down design flow with CPF implementation/verification. Students design and verify a final project using ASIC CAD tools and FPGA demo board with built-in LA. Prerequisite: ECE 6213. (Spring, Every Year).

ECE 6215. Introduction to MEMS. 3 Credits.
Introduction to microelectromechanical and nanoelectromechanical systems (MEMS/NEMS). Basic principles of simulating, designing, and fabricating MEMS/NEMS. Prerequisite: ECE 6240. Recommended background: Students in this course should have taken at least one prior course in ECE 6240. If unsure, contact the instructor, and discuss the pre-requisite requirements. (Spring, Every Year).
ECE 6216. RF/VLSI Circuit Design. 3 Credits.
Introduction to radio frequency systems: RF design, specifications, S-parameters, gain, noise, stability, matching concepts, small signal amplifiers, low noise amplifiers, power amplifiers, system-level design. In this course students use CAD tools such as ADS and other industrial tools to design class project. Prerequisite: ECE 6240. (Spring, odd years).

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.
CMOS technology, CMOS analog building blocks, current sinks, current sources, current mirrors, voltage references, CMOS amplifier design, feedback circuits, frequency response, compensation. Analysis of circuit variants: cascoding, active replacement elements - non-linear circuits. A/D converter design, examples of CMOS A/Ds. Mixed-signal layout techniques. Students are required to design CMOS Analog Circuit project, and submit final design Layout together with simulation using CAD (CADENCE analog design) simulation tools. Final report is required. Prerequisite: ECE 6240. (Spring, even years).

ECE 6221. Introduction to Physical Electronics. 3 Credits.
Theoretical principles underlying the operation of electronic devices; postulates of quantum mechanics: wave-particle duality, uncertainty relations, electronic band structure; free-carrier statistics; electron-photon interaction; physical principles of semiconductor and optoelectronic devices. (Fall, Every Year).

ECE 6240. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall, Every Year).

ECE 6245. Micro- and Nanofabrication Technology. 3 Credits.
Introduction to the basic fabrication principles at the micro- and nanoscale; practical experience and fabrication of simple devices. Restricted to graduate students. Prerequisite: ECE 2150. (Fall, Every Year).

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140/6240 or equivalent chips. Prerequisite: ECE 6240. (Spring, Every Year).

ECE 6260. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall, Every Year).

ECE 6500. Information Theory. 3 Credits.
Introduction to the mathematical representation of information, including the concepts of entropy, mutual information and information transfer over noisy media; mathematical representation of information sources; entropy and mutual information; noiseless and noisy coding theorems; data compression; communication channels and their capacity to convey information; and rate distortion theory. Prerequisite: ECE 6015. (Spring, odd years).

ECE 6505. Error Control Coding. 3 Credits.
Introduction to the principles governing the mathematical theory of error detecting and correcting errors occurring in the transfer of information over digital communication channels. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6510. Communication Theory. 3 Credits.
Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6520. Mobile and Wireless Communication Systems. 3 Credits.

ECE 6525. Satellite Communication Systems. 3 Credits.
Low earth orbit and geostationary satellite systems; transmission systems; RF link budgets; modulation and multiplexing; multiple access techniques, including FDMA, TDMA, and CDMA; satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510. (Fall, Every Year).

ECE 6530. Electronic Warfare. 3 Credits.
Electronic attack and protection of information; countermeasures and counter-countermeasures; attacks on ranging and tracking radar systems; jamming and jamming defense; attacks on communications systems; defensive techniques, signal design, spread spectrum; attack and defense of optical and high-energy systems. Offered as arranged. Prerequisite: ECE 6510. (Summer, Every Year).
ECE 6550. Network Architectures and Protocols. 3 Credits.
The course covers network topologies and control structures; Switching and routing of information streams; Internet transmission protocols; Data representations and codes; Application protocols; Mail and file transfer protocols; and Network management systems. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6560. Network Performance Analysis. 3 Credits.
Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisites: ECE 6015 and ECE 6035. (Fall, Every Year).

ECE 6565. Telecommunications Security. 3 Credits.
Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Restricted to Students with graduate standing in science or engineering or with the permission of the instructor. (Fall, Every Year).

ECE 6570. Telecommunications Security Protocols. 3 Credits.
The OSI security architecture: services and mechanisms; risk analysis; Internet protocol security mechanisms; IPv4 and IPv6 security; security associations, authentication, MD5; encapsulating security payload (ESP); e-mail security: PGP, S/MIME, PEM, MSP; secure voice communications algorithms; security in Internet commerce: SSL, SET. Offered as arranged. Prerequisites: ECE 6035 and ECE 6565. (Fall and spring, Every Year).

ECE 6575. Optical Communication Networks. 3 Credits.
Wave propagation through fiber, dispersion, polarization. Multiplexing techniques, WDM. Optical networking components. Optical transmission systems design. All-optical networking, broadcast star and wavelength routing networks. Performance analysis, survivability, control and management. Optical access networks. (Fall, Every Year).

ECE 6580. Wireless Networks. 3 Credits.
The course introduces students to the principles governing the design and implementation of various types of wireless networks; mathematical analysis of telecommunications traffic; technology of wireless information transmission systems; first, second and third generation cellular networks based on circuit and packet switching principles; capacity sharing and duplex transmission; Time Division and Code Division Multiplex system; fourth and fifth generation cellular networks; wireless local and personal area networks; performance evaluation of wireless cellular and local area networks. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6590. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. (Spring, Every Year).

ECE 6620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall, Every Year).

ECE 6662. Power Electronics. 3 Credits.
The application of electronics to energy conversion. Principles of operation, analysis, and control of circuits including solid-state electronic switches. Methods of solving power electronic circuits and finding the steady-state values of important quantities. Deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. (Spring, Every Year).
ECE 6669. Smart Power Grids. 3 Credits.

ECE 6670. Power System Protection. 3 Credits.
Main philosophy for protection of power systems. Protection systems and approaches. Reliability and security of protection systems. Protection of Generators, Transformers, Motors and Transmission Lines. Requirements for Distributed Source Generation (DSG’s). Requirements for system protection, to prevent grid blackouts and to enhance power system security. Prerequisite: ECE 6620. (Spring, even years).

ECE 6690. Power Systems Economics. 3 Credits.
Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Offered as Arranged. (Fall and spring, Every Year).

ECE 6691. Power Systems Reliability. 3 Credits.
Overview of probability theory. Overview of basic power market reliability modeling and evaluation. Generation supply reliability techniques, modeling and evaluation. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages and impact on system reliability. Load forecasting and probability of interconnected systems. Risk evaluation in power system operation. Operating reserve techniques and indices. Distribution system reliability including substations. Composite system reliability modeling. Reliability worth and value. (Spring, even years).

ECE 6699. Energy and Sustainability. 3 Credits.
Energy sources; consumptions; societal and environmental impacts; energy generation and harvesting technology; thermodynamics and efficiency limits; nanotechnology for sustainability; emission and pollution; growth models; learning curves; life-cycle-analysis; energy in an international perspective. Offered as arranged. Recommended background: A basic understanding of energy and thermodynamics such as material covered in ECE 4620 and MAE 2131. (Fall and spring, Every Year).

ECE 6710. Microwave Engineering. 3 Credits.
Graduate level elective course open to Electrical Engineering graduate students. Topics include transmission line theory, transmission lines and waveguides, waveguide discontinuities, microwave networks, impedance matching and tuning, microwave resonators, power dividers and directional couplers, and microwave filters and active microwave circuits. Prerequisite: ECE 6020. (Fall, even years).

ECE 6715. Antennas. 3 Credits.
Graduate level elective course open to Electrical Engineering graduate students. Topics include antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays; polarization; radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Restricted to graduate students in electrical engineering. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6720. Remote Sensing. 3 Credits.
Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of remote sensing at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Prerequisite: ECE 6020. (Spring, even years).

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.
Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principle, dyadic Green’s functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6730. Waves in Random Media. 3 Credits.
Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered As Arranged. Prerequisite: ECE 6725. (Summer, Every Year).
ECE 6735. Numerical Electromagnetics. 3 Credits.
Systematic discussion of useful numerical methods in computational electromagnetics including integral equation techniques and differential equation techniques, both in the frequency and time domains. Hands-on experience with numerical techniques, including the method of moments, finite element and finite difference time-domain methods, and spectral integral methods. Related numerical issues such as accuracy, stability and dispersion are discussed. Examples are drawn from various electromagnetic applications such as nanowires, waveguides, and antenna radiation. Prerequisites: ECE 6020, ECE 6025, and ECE 6800. (Fall, odd years).

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.
Numerical techniques for modeling semiconductor and magnetic devices; modeling multivalued behavior of memory materials; optimization of geometry. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6750. Modern Radar Systems. 3 Credits.
The radar range equation. Radar cross section of targets, target detection and parameter estimation, detection in clutter. Resolution, ambiguities, and signal design. Moving-target indicators. Pulse Doppler radar. Radar antennas, phased arrays. Synthetic aperture and space-based radar. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered as arranged. Prerequisite: ECE 6015. (Fall and spring, Every Year).

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.
Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, mobile satellite systems, macrocells, fading models, microcells, picocells, diversity, equalizers. Specific applications to 3G, 4G and 5G mobile systems. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6765. Photonics and Fiber Optics. 3 Credits.
Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications discussed: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations include: energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Recommended background: Students should have taken at least one prior course in electromagnetism and semiconductors at the undergraduate level. (Spring, even years).

ECE 6770. Applied Magnetism. 3 Credits.
Classification of magnetic materials. Magnetic measurements. Soft and hard magnetic materials. Applications to microwave, magnetic recording, permanent magnets, magneto-optics, magnetic refrigeration, sensors, magnetostrictive devices. Electric power. Superconducting devices. Offered as arranged. Prerequisite: ECE 6020. (Summer, Every Year).

ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.
The objective of this course is to introduce computer processing of speech and audio. Topics include: acoustic sensor technologies and characteristics, direction finding, speech analysis and synthesis, audio formats and compression standards, time-varying autoregressive models, speech recognition, automatic target recognition. Restricted to graduate students. (Fall, Every Year).

ECE 6815. Multimedia Processing. 3 Credits.
Introduction to multimedia. Formats, conversion and combinations; delivery and trends; servers and networks; hardware and architecture; enduser devices; digital libraries, video conferencing and collaboration; and educational and health applications. Case studies and trials. Offered as arranged. Restricted to graduate students with programming experience in C, C++ or Java. Prerequisite: ECE 6005. (Fall and spring, Every Year).

ECE 6820. Real-Time Digital Signal Processing. 3 Credits.
Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Development of real-time signal processing software. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Offered as arranged. Prerequisite: ECE 6005. Recommended background: Students in this course should have taken at least one prior course in ECE 6005 Computer Architecture and Design and have a basic knowledge of computer architecture and DSP algorithms. Knowledge of C programming language, assembly language and MATLAB is desirable. If unsure, contact the instructor, and discuss the pre-requisite requirements. (Fall and spring, Every Year).

ECE 6825. Computer Control Systems. 3 Credits.
Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multi-rate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite: ECE 6010. (Fall, odd years).

ECE 6830. System Optimization. 3 Credits.
Parameter optimization problems, theory of minima and maxima. Optimization problems for dynamic systems, calculus of variations, the maximum principle and the Hamilton–Jacobi equation. Optimization problems with constraints, optimal feedback systems. Numerical solution of optimal problems. Prerequisite: ECE 6010. (Spring, Every Year).
ECE 6835. Nonlinear Systems. 3 Credits.
Definition of linear and nonlinear systems; introduction to approximate analysis of nonlinear systems: describing functions, Krylov and Bogoliubov asymptotical method, and Tsypkin locus. Forced oscillations: jump resonance. Stability analysis: Liapunov criterion. Luré problem and Popov's method. Prerequisite: ECE 6010. (Fall, even years).

ECE 6840. Digital Image Processing. 3 Credits.
Properties of images and visual systems; image acquisition, sampling, quantization; one- and two-dimensional image transform techniques; enhancement and restoration; image coding and data compression; segmentation, representation, boundary and shape, texture, matching. Image understanding. Students should have completed at least one prior course in computational methods or signal processing, such as ECE 6800 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6800. (Spring, odd years).

ECE 6842. Image Engineering. 3 Credits.
Solid-state imaging devices and image engineering; basic understanding of the detection and noise processes underlying the sensing of optical radiation and the engineering and physics of image formation; radiometry, optics and image formation, and imaging devices; image quality metrics and system design trades. Students should have completed at least one course in linear systems and stochastic processes prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. (Fall, even years).

ECE 6845. Image Synthesis. 3 Credits.
The objective of this course is to introduce techniques for synthesizing images using mathematical models and other reconstruction techniques. The course starts with introduction to image formation process, then other techniques for synthesizing color textures and three-dimensional scenes are covered. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6850. Pattern Recognition. 3 Credits.
Random vectors, transformations; hypothesis testing, error probability, sequential methods. Bayes, other linear classifiers; discriminant functions, parameter estimation, learning, and dimensionality reduction; nonparametric methods; clustering; feature selection and ordering; computer applications and projects. Students should have completed at least one prior course in probability and statistics, such as ECE 6015 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6015. (Fall, odd years).

ECE 6855. Digital Signal Processing Techniques. 3 Credits.
Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisite: ECE 6015. (Fall, Every Year).

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.

ECE 6865. Statistical Signal Estimation. 3 Credits.

ECE 6875. Wavelets and Their Applications. 3 Credits.

ECE 6880. Adaptive Signal Processing. 3 Credits.

ECE 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: CSCI 6511; and ECE 6850. Recommended background: Students in this course should have taken at least one prior course in artificial intelligence and/or pattern recognition. Acceptable courses include ECE 6850 (Pattern Recognition), or an equivalent course. If unsure, contact the instructor, and discuss the prerequisite requirements. (Spring, even years).
ECE 6998. Thesis Research. 3 Credits.
ECE 6999. Thesis Research. 3 Credits.
ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.
Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.
ECE 8999. Dissertation Research. 0-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING

Computer engineering combines electronic design, computer architecture, programming of computing systems, computer networks, and applied mathematics. The bachelor of science with a major in computer engineering degree program prepares students in the theory and application of hardware and software design, computer networks, embedded systems, and very large scale integrated (VLSI) circuit design and applications. Students may take electives in advanced topics such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Bachelor of Science With a Second Major in Computer Engineering

An undergraduate student enrolled at GW whose primary degree is a bachelor of science may declare a second major in computer engineering. The student must meet all degree requirements for the bachelor of science in computer engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students receiving other bachelor’s degrees (e.g., BBA, BFA, BA) must meet the requirements for a double degree (p. ).

Graduation grade-point average criteria:
To satisfactorily complete a second major in computer engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum. Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

All computer engineering majors must fulfill the following requirements:

A total of 133 credits hours as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student’s technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study
The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

PHIL 2135 Ethics in Business and the Professions
two technical electives ³

¹ Course satisfies the university general education requirement in math, science, and writing.

² To satisfy the SEAS Humanities and Social Science requirement, all Electrical and Computer Engineering students must take three (3) humanities courses, one of which must be PHIL 2135 Ethics in Business and the Professions (or NSC 4176 Leadership and Ethics for students in the NROTC Program) and three (3) social science courses including two social science courses in the same discipline and one social science course from a different discipline from the SEAS/ECE Department’s pre-approved Humanities and Social Science lists (https://www.seas.gwu.edu/humanities-and-social-science-requirement), respectively. Additionally, embedded into the above requirement at least one (1) humanities course and two (2) social science courses must be from the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) list. All courses selected to satisfy this requirement must be offered for at least 3 credits.

³ Three 3-credit technical elective courses must be chosen with the approval of the advisor from upper division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. At least one of the technical electives must be math or science course at the 2000-level or above. Exceptions from the rule must be approved by the advisor.

⁴ ECE students not having prerequisite courses CSCI 2113 Software Engineering and CSCI 2461 Computer Architecture I must use RTFs to register for the course through the ECE Department.

### Bachelor of Science with a Major in Electrical Engineering

Electrical engineers design the enabling technology for all applications of electricity; examples include energy, telecommunications, the Internet, biomedical instrumentation, and electromagnetic applications. The bachelor of science with a major in electrical engineering degree program focuses on signal processing; communication theory and practice; voice, data, video and multimedia communication networks; very large scale integrated (VLSI) circuit design and applications; and control and power systems. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.
Bachelor of Science With a Second Major in Electrical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a Bachelor of Science. The student must meet the degree requirements for Bachelor of Science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students in other bachelor’s degree programs (e.g., BA, BBA, BFA) are required to complete a double degree.

Graduation grade-point average criteria:
To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

All electrical engineering majors must fulfill the following requirements:

A total of 132 credits hours outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student's technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study
The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

The two ECE-restricted electives must be selected from upper level ECE courses with approval of the advisor. Three 3-credit technical elective courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

### BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, ENERGY OPTION

The bachelor of science with a major in electrical engineering, energy option prepares students to work in technical energy fields such as electric utility companies and in research into improved methods of generation, transmission, and distribution of electrical energy.

**Bachelor of Science With a Second Major in Electrical Engineering**

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a bachelor of science. The student must meet the degree requirements for bachelor of science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor degrees (e.g., BA, BBA, BFA) must complete a double degree (p. ).

**Graduation grade-point average criteria:**

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum. 

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.
REQUIREMENTS

Additional graduation requirements that all electrical engineering–energy option majors must fulfill:

A total of 131 credits hours outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student's technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, MEDICAL PREPARATION OPTION

The bachelor of science with a major in electrical engineering, medical option degree program prepares students for application to medical school. Students are prepared to work in various health sciences fields, to conduct research toward development of electronic equipment to assist in diagnosing and treating disease, or to continue as a graduate student in engineering with exceptional qualifications for biomedical engineering.

Bachelor of Science With a Second Major in Electrical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in electrical engineering only if their primary degree is a Bachelor of Science. The student must meet the degree requirements for bachelor of science in electrical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor degrees (e.g., BA, BBA, BFA) must complete a double degree (p. 38).

Graduation grade-point average criteria:

To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

Electrical engineering–medical prep option majors must fulfill the following requirements:

A total of 134 credits hours as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. A student’s technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester of curriculum.

Recommended program of study

The plan of study lists all course requirements in sequence for the degree. Students should review this information carefully and consult their advisor before changing the sequence of any courses.

1 Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

2 Course satisfies the University General Education Requirement (p. 38) in math, science, and writing.

3 To satisfy the SEAS humanities and social science requirement, all electrical and computer engineering (ECE) students must take three humanities courses, one of which must be PHIL 2135 (or NSC 4176 for students in the NROTC Program) and three social science courses, including two courses in the same discipline and one course from a different discipline. These courses are selected from the SEAS/Electrical and Computer Engineering Department’s pre-approved humanities and social science lists (https://www.seas.gwu.edu/humanities-and-social-science-requirement), but at least one humanities course and two social science courses must also be on the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) list. All courses selected to satisfy this requirement must be taken for a minimum of 3 credits.

4 Three 3-credit technical elective courses must be selected with the approval of the advisor from upper-division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical...
The doctor of philosophy in the field of computer engineering is designed to involve students in leading-edge research in the areas of computer architecture and high-performance computing, or microelectronics and very-large-scale integration VLSI systems. The research interests of the faculty in the computer architecture and high-performance computing area span computer architecture, parallel processing, cloud computing, and high-performance and grid computing. In the microelectronics and VLSI design area, the faculty’s interests include the design, modeling, and fabrication of electronic and nanoelectronic devices and systems, microfluidic devices integrated with electronic devices, the design of microelectromechanical systems (MEMS) for sensors and for radio frequency (RFMEMS) devices, micro and nanoelectronic circuits with applications to sensors and biosensors, and techniques to develop complementary metal-oxide-semiconductor (CMOS) integrated sensors and their interface circuits using analog and digital circuits. Students choose one of two areas of focus: computer architecture and high performance computing or MEMS, electronics, and photonics.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

More information is available on the departmental website (https://www.ece.seas.gwu.edu/doctor-philosophy-computer-engineering).

**Requirements**

**Credit Requirements:**

The following requirements must be fulfilled:

1. The general requirements stated under School of Engineering and Applied Science, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).
2. Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. Students with a BS degree must take a minimum of 54 credits, of which at least 36 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s faculty advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study may exceed the minimum number of credits. No specific courses are required; the student and faculty advisor design the curriculum to meet the student’s needs and goals.

**Preliminary Examination:**

The Department of Electrical and Computer Engineering requires students to pass a Preliminary Examination. Doctoral students who received their MS prior to admission to the doctoral program and direct entry PhD students should take the Preliminary Examination before the completion of 18 and 27 credits, respectively. The examination, which is offered every Spring and Fall semester, is guided by, but not limited to, the core material in the ECE master’s programs. Specific details regarding the exam are available on the department’s website. Normally a student is allowed two attempts to pass the preliminary examination. The student selects a research advisor (also called dissertation director) by the end of the semester in which the student passes the Preliminary Examination.

**Doctoral Qualifying Examination:**

After passing the preliminary exam, in consultation with the research advisor, a student prepares for the Doctoral Qualifying Examination (also known as Proposal Defense). The Doctoral Qualifying Examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the next stage of the program. For the Doctoral Qualifying Examination, a written proposal of the doctoral dissertation research is presented to a committee which also conducts an oral examination of the student. Details on the structure of the proposal and the composition of the committee can be found on the departmental website (https://www.ece.seas.gwu.edu/graduate-resources).

**Publication Requirements:**

Every doctoral student is required to have a paper based on the student’s dissertation research published or accepted in a scientific journal before the student’s Doctoral Final Examination.

**Doctoral Final Examination:**

Once the dissertation has been completed, the student schedules the Doctoral Final Examination (also known as dissertation defense) in consultation with the research advisor. The Doctoral Final Examination Form must be filed and approved by the department chair at least three weeks prior to the Doctoral Final Examination date. Approval is granted only when all required materials have been submitted to the department. The required materials include a completed form, a copy of the journal article or final acceptance letter, resumes of any outside examination committee members, and electronic and printed copies of the dissertation. Details on the structure of the dissertation and the composition of the examination committee can be found on the departmental website (https://www.ece.seas.gwu.edu/graduate-resources).
The Doctoral Final Examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The research advisor usually serves as advocate for the candidate. The committee will assess the quality and originality of the candidate’s contribution to knowledge as well as the student’s mastery of the scholarship and research techniques of the field. Upon decision to pass the student, the committee recommends the candidate for the degree of Doctor of Philosophy. The decision to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional work, writing, or clarifications.

Seminar and Colloquium Requirements:

- Seminar Requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium Requirement—Students are required to attend five colloquia during their time in the program. Each attended colloquium is verified by a faculty member in attendance. Upon the attendance of five colloquia, the student must submit to the department the Colloquium Attendance Form signed by the faculty advisor prior to applying for graduation.

Graduation and Scholarship Requirements:

Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on the GW Bulletin to read the requirements.

Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ELECTRICAL ENGINEERING

The doctor of philosophy in the field of electrical engineering degree program is designed to engage students in leading-edge research in a variety of areas, including wireless, optical, and data center networking; network security; photonics and nanotechnology; sensors and analog electronics; remote sensing; magnetics; image processing and synthesis; signal processing for communications; and power systems. Within this degree program, students choose one of the following five areas of focus: communications and networks; electrical power and energy; applied electromagnetics; electronics, photonics, and MEMS; or signal and image processing, systems, and controls.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

More information is available on the departmental website (https://www.ece.seas.gwu.edu/doctor-philosophy-electrical-engineering).

Contact the department for additional information and requirements.

GRADUATE CERTIFICATE IN HIGH-PERFORMANCE COMPUTING

The graduate certificate in the field of high-performance computing (HPC) program provides a mechanism for practicing interdisciplinary computational engineers and scientists to acquire up-to-date knowledge in the advances of computer systems, in particular, the rapidly growing use of multicore processors, parallel computers, hardware accelerators, and networked computing platforms in applications. The program is tailored to provide students with necessary knowledge in all aspects of high performance computing including programming, applications, performance, architectures, and systems.

The certificate program may serve as an alternative to a Master of Science degree program for professionals who may not have the time to commit to a full graduate degree program, but who wish to align their background with the rapid changes in computing technologies and to expand their education beyond the bachelor’s degree. All courses taken as part of this program may be transferred to the Department of Electrical and Computer Engineering’s MS and/or PhD programs. While the HPC certificate can be coupled with a graduate degree program, interested students must be admitted to and complete the HPC certificate program separately.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://www.ece.seas.gwu.edu/graduate-certificate-high-performance-computing) for additional information.

**ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING**

**Mission Statement**
The mission of the Department of Engineering Management and Systems Engineering is to deliver an integrated program of research, teaching, and public service to the technology community. The department develops creative leadership to bridge dynamic, complex technologies, and societal needs. This includes delivering instruction in the management of technology and in systems engineering, operations research, and allied fields to undergraduate and graduate students who are preparing to assume leadership roles as technology professionals. The department's programs provide an understanding of the managerial role, analysis of the diverse functions of technology-based organizations, and instruction in modern management and mathematical analysis and modeling tools as they apply to formulating and executing decisions in engineering and scientific organizations. In addition, research programs feature the study of the management of technology; fundamental and applied research in systems engineering and operations, with a particularly strong interest in stochastic analysis and system optimization; sponsorship from government, industry, and the technology community; and a strong presence in refereed professional journals and leadership in professional societies.

**UNDERGRADUATE**

**Bachelor's programs**
- Bachelor of Arts with a major in applied science and technology (p. 669)
- Bachelor of Science with a major in systems engineering (p. 671)

**Minor**
- Minor in operations research (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/minor-operations-research)
- Minor in systems engineering (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/minor-systems-engineering)

**GRADUATE**

**Master's programs**
- Master of Engineering in the field of cybersecurity policy and compliance (p. 674) **Online**
- Master of Science in the field of data analytics (p. 674)
- Master of Science in the field of engineering management (p. 675) **Online or on campus**
- Master of Science in the field of systems engineering (p. 678) **Online or on campus**

**Doctoral program**
- Doctor of Engineering in the field of engineering management (p. 679)
- Doctor of Philosophy in the field of engineering management (p. 681)
• Doctor of Philosophy in the field of systems engineering (p. 680)

CERTIFICATES
• Graduate certificate in emergency management and public health (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/emergency-management-public-health-certificate)
• Graduate certificate in energy engineering and management (http://bulletin.gwu.edu/engineering-applied-science/mechanical-aerospace-engineering/energy-engineering-management)
• Graduate certificate in engineering and technology management (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/engineering-technology-management)
• Graduate certificate in environmental and energy systems management (p. 683)
• Graduate certificate in homeland security emergency preparedness and response (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/homeland-security-emergency-preparedness-response-certificate)
• Graduate certificate in systems engineering (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/systems-engineering-certificate)
• Graduate certificate in systems management (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/systems-management-certificate)

FACULTY
Professors J.P. Deason, J.R. van Dorp, T.A. Mazzuchi (Chair), B. Narahari, S. Sarkani

Associate Professors H. Abeledo, J.A. Barbera, J.R. Santos, R.A. Francis, Z. Szajnfarber,

Assistant Professors D. Broniatowski, E. Gralla, J.P. Helveston, E. Shittu,

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
• Applied Sciences (APSC) (p. 1113)
• Engineering Management and Systems Engineering (p. 1271)

BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY

The bachelor of arts with a major in applied science and technology is a broad-based, engineering-oriented degree program that includes significant exposure to the liberal arts. It is designed for students who intend to make their careers in fields allied to science and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media.

The program can be enhanced with a second major in the Columbian College of Arts and Sciences (p. 75), Elliott School of International Affairs (p. 708), or GW School of Business (p. 430). The Department of Engineering Management and Systems Engineering does not offer a second major in applied science and technology.

Bachelor of Arts with a Second Major in Applied Science and Technology

The Department of Engineering Management and Systems Engineering does not offer a second major in applied science and technology.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology) for additional informational.

REQUIREMENTS

The following requirements must be fulfilled:
A total of 128 credits taken as outlined below.

A minimum technical GPA of 2.20 and SEAS GPA of 2.00. All technical courses taken during the fifth through eighth semesters as outlined by the four-year curriculum sheet
respective to each major and approved by the student’s faculty advisor are counted towards the student’s technical GPA.

**Plan of Study**
The plan of study lists in sequence all course requirements for the degree. Students should review this information carefully and speak to their advisor before changing the sequence of any of these courses.

Students choose electives in specified categories from lists of courses available from the advisor. Allied minor electives are selected, with the approval of the advisor, to form a coherent and meaningful program of 15 credits. Popular selections include biology, communication, computer science, design, economics, engineering, environmental studies, finance, international business, management, mathematics, medical preparation, psychology, statistics, and operations research.

1 Course satisfies the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) in either mathematics or statistics, natural or physical laboratory sciences, or writing.

2 Writing (10 credits). UW 1020 (a required freshman writing course) and COMM 1040, COMM 1041, or COMM 1042. In addition to UW 1020, the student's academic program must include two writing-intensive courses to satisfy the GW Writing in the Disciplines (WID) requirement; two such courses are CE 4330W and EMSE 3740W.

3 Humanities (6 credits) and Social Sciences (6 credits). Two two-course sequences selected from the SEAS list of electives in the humanities and social sciences.

4 Creative and performing arts (3 credits). One of the following: ENGL 1210; FA 1014, FA 1017, FA 1021, or FA 1041; MUS 1103, MUS 1104, MUS 1107, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1017, TRDA 1025, TRDA 1150, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other choices are possible.

5 Literature (6 credits). One two-course sequence selected from among CHIN 3111 and CHIN 3112; ENGL 1410 and ENGL 1411, ENGL 1510 and ENGL 1511, ENGL 1710 and ENGL 1711, or ENGL 1830 and ENGL 1840; FREN 3210 and FREN 3220; GER 2091 and GER 2092; JAPN 3111 and JAPN 3112; REL 1009 and REL 1010; SLAV 1391 and SLAV 1392; SPAN 3210 and SPAN 3220. Other choices are possible.

6 Unrestricted (or “free”) electives (18 credit). The academic advisor must approve the student’s selection of unrestricted electives. If necessary, unrestricted electives may be used to satisfy prerequisite requirements for the allied minor. Such electives also may be used to convert the allied minor into an official minor or second major. Exercise and sport activities courses may not be used as unrestricted electives.

7 Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

8 Allied minor (15 credits). The student constructs a coherent program with the assistance of the academic advisor. Popular selections include biology, chemistry, business, communication, design, economics, engineering, environmental studies, finance, international business, management, mathematics, media, medical preparation, physics, psychology, public health, statistics, and operations research. The allied minor may be part of a second major in CCAS, ESIA, or SEAS, part of the concentration in general business, or part of an official minor.

9 See the advisor for details.

Humanities and Social Sciences 4 courses/ 12 credits

All APSC majors must take the following 2 humanities and 2 social science. Social and behavioral sciences courses must be selected from the University General Education Requirement list (http://bulletin.gwu.edu/university-regulations/general-education); At least one Humanities course must be selected from the University General Education Requirement list (http://bulletin.gwu.edu/university-regulations/general-education); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

(A) Art Elective 1 courses/ 3 credits

All Applied Science and Technology majors must choose one of the following: ENGL 1210; FA 1014, FA 1017, FA 1021, or FA 1041; MUS 1103, MUS 1104, MUS 1107, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1017, TRDA 1025, TRDA 1150, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other choices are possible. Additional choices are possible with Faculty Advisor prior approval

(B) Literature Elective 2 courses/ 6 credits

All Applied Science and Technology majors must choose one two-course sequence selected from among CHIN 3111 and CHIN 3112; ENGL 1410 and ENGL 1411, ENGL 1510 and ENGL 1511, ENGL 1710 and ENGL 1711, or ENGL 1830 and ENGL 1840; FREN 3210 and FREN 3220; GER 2091 and GER 2092; JAPN 3111 and JAPN 3112; REL 1009 and REL 1010; SLAV 1391 and SLAV 1392; SPAN 3210 and SPAN 3220. Additional choices are possible with Faculty Advisor prior approval.

BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The bachelor of science with a major in systems engineering degree program provides students with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Systems engineering can be applied in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and
transportation. The program emphasizes analytical thinking and fosters communication skills and awareness of the current professional world in order to prepare students for graduate education or productive professional employment.

**Bachelor of Science with a Second Major in Systems Engineering**

Any undergraduate student who is enrolled at GW may declare a second major in systems engineering only if their primary degree is a Bachelor of Science. The student must complete all degree requirements for the Bachelor of Science in systems engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students enrolled in other bachelor's degree programs (e.g., BA, BBA, BFA) are required to complete the major as a double degree.

Graduation grade-point average criteria:
To satisfactorily complete a second major in electrical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-science-systems-engineering) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled:

- Completion of a total of 129 credits as outlined below.
- Completion of an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours of work per week during two of the final four semesters. The position may be paid or unpaid. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) usually is acceptable. Consult the faculty advisor for approval.
- A minimum technical GPA of 2.2 and SEAS GPA of 2.0. All technical courses taken during the fifth through eighth semesters, as outlined by the 4-year curriculum sheet respective to each major and approved by the student's faculty advisor, are counted towards the student's technical GPA.
- Completion of an approved technical minor that uses the five professional electives courses built into the curriculum.

**Plan of Study**

The plan of study lists in sequence all course requirements for the degree. Students should review this information carefully and speak to their advisor before changing the sequence of any of these courses.

1 Course satisfies the university general education requirement in math, science, and writing.

2 One course, or pair of courses, from the following for a total of 4 credits: BISC 1115 and BISC 1125; or BISC 1116 and BISC 1126; or CHEM 1111; or CHEM 1112. Note that Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 instead of BISC 1125 for the lab component.

3 Computing track elective requirements may be met with the courses in either option in the list directly above.

4 One social and behavioral sciences course and one humanities course must be selected from the University General Education Requirement (p. 38) list.

5 In consultation with the faculty advisor, the student selects two approved courses with engineering topics, both offered by the same SEAS department.

6 Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by taking a five-course sequence leading to a minor from another department of the University. Technical electives are selected with the approval of the student’s academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

**Internship requirement**—All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.
MASTER OF ENGINEERING IN THE FIELD OF CYBERSECURITY POLICY AND COMPLIANCE

Online
The master of engineering in cybersecurity policy and compliance is an interdisciplinary program that draws courses from three areas of study across SEAS: computer science, electrical and computer engineering, and engineering management and systems engineering. The purpose of the MEng (CPC) degree is to capture the latest trends and issues from the field of cybersecurity to provide students the tools and skills necessary to stay in the forefront of this fast-changing discipline. The program is expected to attract prospective students with technical degrees, as well as those with nontechnical degrees who wish to study the complex issues of cybersecurity policy and compliance.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Please visit the program website (https://onlinecybersecurity.seas.gwu.edu) for more information.

MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

Administered jointly through the Department of Computer Science (http://cs.seas.gwu.edu) and the Department of Engineering Management & Systems Engineering (http://emse.seas.gwu.edu), the program seeks to address the growing demand for professionals skilled in big data and data analytics in government, industry and research organizations. Through courses led by top faculty members at SEAS and the GW School of Business, this program covers topics in computer science, business analytics, and systems engineering while focusing on the foundations of analytics from a technical, engineering perspective.

This program is ideal for those seeking to learn in a small, tight-knit cohort about the engineering foundations that propel the fields of data science and analytics; pursue or enhance careers as data analysts or data scientists; lead interdisciplinary teams; or apply data science and analytics techniques in the decision-making process of a wide range of organizations.

Prerequisites
In addition to the entrance requirements, students are expected to be adequately prepared in calculus and probability/statistics concepts. The MS program requires students to have completed MATH 1231 and MATH 1232 (Calculus 1 and Calculus II), and APSC 3115 (Engineering Analysis III), or their equivalents. Background in linear algebra is strongly recommended but not required.

Educational Planner
In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor.

REQUIREMENTS

Credit Requirements
The program of study consists of graduate-level courses totaling 33 credits. Thesis is not a requirement for the completion of the program. The details of the required courses and electives are shown below.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Electives

Students take six elective courses, at least four of which must be in either the computer science track or in the engineering management and systems engineering track, effectively constituting a concentration in one of the two tracks. Up to two courses may be taken outside of SEAS; courses in the business analytics program are recommended.

### Graduation and Scholarship Requirements

Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

### Program Restrictions

Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.

**MASTER OF SCIENCE IN THE FIELD OF ENGINEERING MANAGEMENT**

**Online or on campus**

The master of science in engineering management is designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors. The program provides graduate education in the most current management techniques for technological and scientific organizations. Students can pursue their degree by selecting electives in one of five areas of focus: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

For additional on campus program information, visit the on campus program website (http://www.emse.seas.gwu.edu/master-science-engineering-management).

For additional online program information, visit the online program website (https://engineering.gwu.edu/online-programs/ms-in-engineering-management).

**Prerequisites**

In addition to the entrance requirements, students are expected to be adequately prepared in calculus and probability/statistics concepts. The MS program requires students to have completed MATH 1231 and MATH 1232 (Calculus I and Calculus II), and APSC 3115 (Engineering Analysis III). Students who do not meet the MATH 1231 and
MATH 1232 prerequisites are required to take these courses, or their equivalents, in addition to the MS degree requirements. Students who do not meet the APSC 3115 prerequisite are required to take EMSE 6115, which can be credited towards the MS degree requirements.

Educational Planner
In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor.

REQUIREMENTS
Credit Requirements

Non-Thesis Option: The program of study consists of 12 graduate-level courses totaling 36 credits. Three types of course requirements are included in the curriculum: common course requirements, focus course requirements, and approved electives. Common course requirements are taken by all students in the MS program in engineering management. Focus course requirements are taken by all students within the area of focus. Approved elective requirements are courses that require the approval of the student's individual academic advisor.

Thesis Option: To register in the thesis option, students must submit their advisor-approved plan of study and thesis area to the department chair. In addition to the course requirements below, students should take the thesis course sequence: EMSE 6998 (Thesis Research) and EMSE 6999 (Thesis Research), ideally in the last two semesters prior to graduation. Note that such thesis credits may be used in lieu of the electives. Hence, the program of study requires a minimum of 36 credit hours. While registered in the thesis course sequence, students shall work with the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members. The course requirements for the program are detailed below.

## Graduation and Scholarship Requirements

Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.
Students should contact the department for additional information and requirements.

Program Restrictions
Normally, only 6000 level courses (or higher) may be counted toward the requirements for the graduate degree.

MASTER OF SCIENCE IN THE FIELD OF SYSTEMS ENGINEERING

Online or on campus
The master of science in systems engineering program provides broad knowledge of the systems approach for designing and managing large-scale engineering systems throughout the lifecycle, with faculty and students exploring case studies and methodologies from NASA, the U.S. Department of Defense, and domestic corporations. Students can pursue the degree by selecting electives in one of two areas of focus: operations research and management science or systems engineering.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

For additional on campus program information, visit on campus program website (http://www.emse.seas.gwu.edu/master-science-systems-engineering).

For additional online program information, visit the online program website (https://onlineemse.seas.gwu.edu/online-programs/ms-in-systems-engineering).

Prerequisites
In addition to the entrance requirements, students are expected to be adequately prepared in calculus and probability/statistics concepts. The MS program requires students to have completed MATH 1231 and MATH 1232 (Calculus I and Calculus II), and APSC 3115 (Engineering Analysis III). Students who do not meet the MATH 1231 and MATH 1232 prerequisites will be required to take these courses, or their equivalents, in addition to the MS degree requirements. Students who do not meet the APSC 3115 prerequisite will be required to take EMSE 6115, which can be credited towards the MS degree requirements.

Educational Planner
In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.

REQUIREMENTS

Curriculum requirements
Non-thesis option—36 credits in coursework. Three types of course requirements are included in the curriculum: common course requirements, focus course requirements, and approved electives. Common course requirements are taken by all students in the MS program in systems engineering. Focus course requirements are taken by all students within the area of focus. Elective courses require the approval of the student’s academic advisor.

Thesis option—36 credits, including the thesis. To register in the thesis option, students must submit their advisor-approved plan of study and thesis area to the department chair. In addition to the course requirements, students take the thesis course sequence, EMSE 6998 and EMSE 6999, ideally in the final two semesters of the program. Thesis credits may be used in lieu of electives. Hence, the program of study requires a minimum of 36 credits. While registered in the thesis course sequence, students work with the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

Three of the following:
The Doctor of Engineering (DEng) in the field of Engineering Management (EM) is designed for students who seek a practice- or praxis-oriented doctoral degree. Such students typically have professional needs that the traditional PhD degree does not meet. The DEng (EM) focuses on solutions to real-world problems. Unlike the PhD, for which fundamental research leads to foundational work that is published and contributes to the basic understanding of a field, the DEng (EM) is applied, not basic research.

In a broad-based program of study, the DEng (EM) course work culminates in the student’s production of a praxis for use by practicing engineers. The DEng (EM) is ideal for individuals doing advanced engineering in the workplace, who want to update their knowledge with cutting-edge techniques from the engineering disciplines, and cap it with a formal degree that recognizes their contributions to the field.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://emse.offcampus.gwu.edu/doctor-engineering-degree-program) for additional information.

### REQUIREMENTS

**Credit Requirements**

The following requirements must be fulfilled: 45 credits, including 30 credits in required courses and 15 credits in research culminating in a practice-based case study.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SYSTEMS ENGINEERING

The doctor of philosophy in the field of systems engineering provides advanced knowledge on the theory and applications of systems approach methods to efficiently design and manage large-scale engineering systems throughout the life cycle. The program is divided into two stages. The first stage comprises a study of related fields of learning that support the general area of research focus and culminates in the qualifying examination. The second stage, composed of original research and the presentation of findings in a written dissertation, culminates in the final examination. Upon admission to the first stage of the program, the student meets with their assigned advisor to structure the program of study. Students can pursue the degree by selecting electives in one of the two areas of focus: operations research and management science or systems engineering.

Specific admission requirements are shown on the Graduate Program Finder (https://www.programs.gwu.edu/graduate). More information is available on the program website (https://www.emse.seas.gwu.edu/doctor-philosophy).

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. The courses to be taken by the student must be approved by the student’s advisor. Students with a BS degree must take a minimum of 78 credits, including 54 credits of graduate coursework and at least 24 credits of dissertation research. The courses to be taken by the student must be approved by the student’s advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

Curriculum

No specific courses are required beyond the preparatory courses. The student and advisor design the curriculum to meet the student’s needs and goals.

Preliminary/qualifying examinations
The qualifying examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain that the student’s background and intellectual development are adequate to support doctoral research in the central field. The DQE will be offered in January (both parts) and September (only data analysis). Before taking the examination, students must have completed the core courses and 27 credits (nine courses) of their required coursework and have the DegreeMap finalized. Students must also submit a doctoral qualifying examination checklist to the doctoral coordinator.

The qualifying examination consists of two parts: a two-part written examination and a focus area exam.

Written examination (Part I)
This examination consists of a two-hour, in-class examination covering EMSE 6765 and an eight-hour, take-home exam covering EMSE 8000 and EMSE 8001. Both examinations are offered during the last week in January. The EMSE 6765-based exam is also offered during the last week in January. Students should apply to take this examination before the end of the preceding semester.

Focus area exam (Part II)
The focus area examination is both written and oral. Students must take this examination by the end of the semester following the successful completion of DQE part I (i.e., student nominally completes Part I in January, and must take Part II in the third week of May). Students should register for EMSE 8999 for the semester in which they are taking the exam.

Students have three options for the basis for their oral defense:

- A conference or journal paper, on which they are the lead author. If it is a conference paper, the full paper must have been peer-reviewed.
- A seminal journal paper in their focus area. Their advisor and examining committee must approve the paper.
A ten-page literature review on a topic in their focus area. They have two weeks to complete the review.

In all cases, students are required to defend the work in front of a committee. The committee must consist of three faculty members, at least two of which are full-time in EMSE. Oral exams are approximately one hour long.

At the discretion of the committee a student who fails any part of the qualifying examination may be given a second opportunity to attempt qualification for candidacy. Usually, only the failed portion of the examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School are considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

After successful completion of the DQE, the candidate’s advisor presents the academic record of the candidate and request the formation of a research committee. The Department votes on (provisional) admission to candidacy and the research committee. The research committee must be formed before the proposal defense (described below) and must consist of the student’s advisor and two other faculty members, at least one of whom must be full-time. Once the student is admitted to candidacy for the degree, they begin specialized study and research under the supervision of their research committee. At this point the research committee remains fixed unless a change is formally requested and approved by the department chair and advisor.

Publication Requirements
Students are given 18 months from completion of DQE Part II to be accepted into a pre-approved conference for presentation on a topic relevant to their research. This presentation must be co-authored by their adviser. Failure to do so will result in termination of their candidacy in the doctoral program.

Dissertation
Proposal defense—After acceptance to a conference, students are required to present a written dissertation proposal to their research committee and to successfully defend the proposal in an oral defense. This proposal should consist of, at a minimum, an introductory chapter, a review of the literature chapter, a methodology chapter, and a chapter on potential results. The Request for Proposal Defense form must be filed and approved two weeks prior to the defense. The Form 5 Doctor of Science Dissertation form is present at the proposal defense and, after a successful defense, is signed by all committee members. After the defense, the advisor in collaboration with the student submits, in writing, a copy (signed by student and adviser) of all suggestions, clarifications, and corrections to the proposal along with the signed Form 5 to the doctoral coordinator within four weeks of the defense. Failure to do so will void the defense. The doctoral coordinator forwards the Form 5 to the department chair for signature. Students are given a maximum of two attempts and a maximum time limit of two years past the semester in which they pass their DQE to successfully defend their proposal. Failure to do so will result in termination of their candidacy in the doctoral program.

Final examination/doctoral defense—Once the dissertation has been completed and accepted by the faculty advisor and research committee, students may file a Request for final examination form with the doctoral coordinator. This form must be filed and approved by the department chair at least two weeks prior to the final examination date. Approval is granted only when all required materials have been presented to the doctoral coordinator. The required materials include a completely filed Request for Final Examination Form, a copy of the journal article with reviews, resumes of outside evaluators and electronic and written copies of the dissertation. The final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University specially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee. The committee votes on the quality and originality of the candidate’s contribution to knowledge as well as their mastery of the scholarship and research techniques of the field. Upon a majority vote for pass, the committee recommends the candidate for the degree of doctor of philosophy. The vote to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional analysis, writing or clarifications.

Seminar and colloquia requirements
As described in the “Publication Requirements” section above, students are required to present in a pre-approved conference on a topic relevant to their research. In addition, students are also encouraged to present and participate in departmental research seminars.

Graduation and scholarship requirements
Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_phd) section in this Bulletin to read the requirements. Students should contact the department for additional information and requirements.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ENGINEERING MANAGEMENT

Program Overview
The Doctor of Philosophy in the field of engineering management is designed for the technical manager who seeks to pursue advanced education and research methods to keep an organization operating efficiently and working ahead of its competitors. The program provides graduate education in
the most current management techniques for technological and scientific organizations. The program is divided into two stages. The first comprises a study of related fields of learning that supports the general area of research focus and culminates in the qualifying examination. The second, composed of original research and the presentation of findings in a written dissertation, culminates in the final examination. Upon admission to the first stage of the program, the student meets with their assigned advisor to structure the program of study. Programs of study include a focus area: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Specific admission requirements are shown on the Graduate Program Finder (https://www.programs.gwu.edu/graduate). More information is available on the program website (https://www.emse.seas.gwu.edu/doctor-philosophy).

Post-graduate survey

Preliminary/Qualifying Exams
The Qualifying Examination is the principal means of determining whether a student qualifies as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain that the student’s background and intellectual development are adequate to support doctoral research in the central field. The DQE will be offered in January (both parts) and September (only data analysis). Before taking the examination, students must have completed the core courses and 27 credits (nine courses) of their required coursework and have the DegreeMap finalized. Students must also submit a Doctoral Qualifying Exam Checklist to the doctoral coordinator.

The Qualifying Examination consists of two parts: a two-part written examination and a focus area exam.

Written Exam (Part I)
This exam consists of a two-hour, in-class exam covering EMSE 6765 and an eight-hour, take-home exam covering EMSE 8000 and EMSE 8001. Both exams are offered during the last week in January. The EMSE 6765-based exam is also offered during the last week in January. Students should apply to take this exam before the end of the preceding semester.

Focus Area Exam (Part II)
The Focus Area Exam is both a written and oral exam. Students must take this exam by the end of the semester following the successful completion of DQE part I (i.e., student will nominally complete Part I in January, and must take Part II in the third week of May). Students should register for EMSE 8999 for the semester in which they are taking the exam.

Students have three options for the basis for their oral defense:

- A conference or journal paper, on which they are the lead author. If it is a conference paper, the full paper must have been peer-reviewed.
- A seminal journal paper in their focus area. Their advisor and examining committee must approve the paper.
- A 10-page literature review on a topic in their focus area. They have two weeks to complete the review.

In all cases, students are required to defend the work in front of a committee. The committee must consist of three faculty members, at least two of which are full-time in EMSE. Oral exams are approximately one hour long.
At the discretion of the committee a student who fails any part of the qualifying examination may be given a second opportunity to attempt qualification for candidacy. Usually, only the failed portion of the examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School are considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

After successful completion of the DQE, the candidate’s advisor will present the academic record of the candidate and request the formation of a research committee. The Department votes on (provisional) admission to candidacy and the research committee. The research committee must be formed before the proposal defense (described below) and must consist of the student’s advisor and two other faculty members, at least one of which must be full-time. Once the student is admitted to candidacy for the degree, he/she begins specialized study and research under the supervision of their research committee. At this point the research committee remains fixed unless a change is formally requested and approved by the department chair and advisor.

Publication Requirements

Students are given 18 months from completion of DQE Part II to be accepted into a pre-approved conference for presentation on a topic relevant to their research. This presentation must be co-authored by their advisor. Failure to do so will result in termination of their candidacy in the doctoral program.

Dissertation

- Proposal defense: After acceptance to a conference, students are required to present a written dissertation proposal to their research committee and to successfully defend the proposal in an oral defense. This proposal should consist of, at a minimum, an introductory chapter, a review of the literature chapter, a methodology chapter, and a chapter on potential results. The Request for Proposal Defense form must be filed and approved two weeks prior to the defense. The Form 5 Doctor of Science Dissertation form is present at the proposal defense and, after a successful defense, is signed by all committee members. After the defense, the advisor in collaboration with the student submits, in writing, a copy (signed by student and adviser) of all suggestions, clarifications, and corrections to the proposal along with the signed Form 5 to the doctoral coordinator within four weeks of the defense. Failure to do so will void the defense. The doctoral coordinator forwards the Form 5 to the department chair for signature. Students are given a maximum of two attempts and a maximum time limit of two years past the semester in which they pass their DQEs to successfully defend their proposal. Failure to do so will result in termination of their candidacy in the doctoral program.
- Final examination/doctoral defense: Once the dissertation has been completed and accepted by the faculty advisor and research committee, students may file a Request for Final Examination form with the Doctoral Coordinator. This form must be filed and approved by the department chair at least two weeks prior to the final examination date. Approval is granted only when all required materials have been presented to the doctoral coordinator. The required materials include a completely filed Request for Final Examination Form, a copy of the journal article with reviews, resumes of outside evaluators and electronic and written copies of the dissertation. The final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee. The committee votes on the quality and originality of the candidate’s contribution to knowledge as well as their mastery of the scholarship and research techniques of the field. Upon a majority vote for pass, the committee recommends the candidate for the degree of Doctor of Philosophy. The vote to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional analysis, writing or clarifications.

Seminar and Colloquia Requirements

- As described in the Publication Requirements section above, students are required to present in a pre-approved conference on a topic relevant to their research. In addition, students are also encouraged to present and participate in departmental research seminars.

Graduation and Scholarship Requirements

Students are responsible for knowing the university’s minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_phd) section on the GW Bulletin to read the requirements.

Students should contact the department for additional information and requirements.

GRADUATE CERTIFICATE IN GREENHOUSE GAS MANAGEMENT

The graduate certificate in greenhouse gas (GHG) management, which was developed in cooperation with experts at the Greenhouse Gas Management Institute, provides an alternative for professionals who wish to expand their knowledge in the field without committing to the requirements of a master’s degree program. The program addresses the engineering, economic, legal, and logistical considerations for
implementing GHG management in compliance with existing and planned GHG mitigation. The focus is on managing GHG emissions from energy-related activities in a business setting, through the measurement, reporting, analysis, reduction, trading, and verification of GHG emissions from these activities.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://graduate.seas.gwu.edu/greenhouse-gas-management) for additional information.

**MECHANICAL AND AEROSPACE ENGINEERING**

**Mission Statement**

The mission of the Department of Mechanical and Aerospace Engineering is to educate students to become professional mechanical and aerospace engineers who are confident in their understanding of science and technology and creative in the face of new challenges. Graduates of the program have the analytical skill and thirst for lifelong learning that will expand career horizons. The program prepares students to conduct relevant research at the forefront of mechanical and aerospace engineering knowledge. Students learn through faculty mentoring and go on to practice mechanical engineering as skilled, responsible, and ethical professionals.

**Educational Objectives**

The mechanical engineering program provides an integrated curriculum designed to produce graduates who develop successful careers in mechanical engineering or in science and technology. Graduates are prepared to accomplish the following objectives within a few years after graduation:

1. Practice mechanical engineering in industry or government, applying knowledge and skills acquired in the program to the design of engineering systems and devices, and the analysis and solution of engineering problems of complex scope; and/or
2. Succeed in advanced education, research and development, or other creative efforts in engineering, science, and technology; and/or
3. Apply engineering skills while pursuing careers in other professions, such as law, medicine, business, or public policy (this objective reflects the program’s patent law and medical preparation options and applies to a selected group of graduates);
4. Conduct themselves in a responsible and ethical manner, cognizant of the social, environmental, and economic impact of engineering and technology on society;
5. Embark upon a process of lifelong learning in their profession; and
6. Enter into leadership roles in technological development or local, national, or global economic development.

**Student Outcomes**

Students acquire knowledge of the following disciplines:

Chemistry and calculus-based physics with depth in at least:

- Advanced mathematics through multivariate calculus and differential equations; familiarity with statistics and linear algebra;
- Thermal, fluid, and mechanical systems areas.

In addition, students gain the ability to fulfill the following professional responsibilities:

- Understand professional and ethical responsibility;
- Apply knowledge of mathematics, science, and engineering, and familiarity with materials science, electrical circuits, and electromechanical control theory;
- Design and conduct experiments, as well as analyze and interpret data;
- Design a mechanical engineering system, component, or process to meet desired needs within realistic constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Use computer systems and knowledge of computer programming;
- Apply computer software used in engineering practice, such as computer-aided engineering packages and mathematical software, to the solution of mechanical engineering problems;
- Apply manufacturing techniques to realize mechanical engineering designs;
- Communicate effectively both orally and graphically;
- Write technical reports in a professional manner; and
- Function on multidisciplinary teams.
The program prepares graduates who have the broad education necessary to practice mechanical engineering, including the following fundamentals:

• An understanding of the impact of engineering solutions in a global, economic, environmental, and societal context;
• Recognition of the need for, and an ability to engage in life-long learning; and
• Knowledge of contemporary issues.

For more information contact the Department of Mechanical and Aerospace Engineering. (http://www.mae.seas.gwu.edu)

UNDERGRADUATE

Bachelor's programs
• Bachelor of Science with a major in mechanical engineering (p. 693)
• Bachelor of Science with a major in mechanical engineering, aerospace option (p. 695)
• Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 696)
• Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 698)
• Bachelor of Science with a major in mechanical engineering, patent law option (p. 699)
• Bachelor of Science with a major in mechanical engineering, robotics option (p. 701)

Combined program
• Dual Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (http://bulletin.gwu.edu/engineering-applied-science/mechanical-aerospace-engineering/combined-bs-ms-mechanical-engineering)

Minor
• Minor in mechanical engineering (http://bulletin.gwu.edu/engineering-applied-science/mechanical-aerospace-engineering/minimum-mechanical-engineering)

GRADUATE

Master's program
• Master of Science in the field of mechanical and aerospace engineering (p. 702)

Doctoral program
• Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 704)

CERTIFICATE
• Graduate certificate in energy engineering and management (http://bulletin.gwu.edu/engineering-applied-science/mechanical-aerospace-engineering/energy-engineering-management)
• Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 707)

FACULTY

Professors  E. Balaras, A.D. Cutler, D.S. Dolling, C.A. Garris, S.M. Hsu, M. Keidar, J.D.-Y. Lee, M.W. Plesniak (Chair), K. Sarkar, Y.-L. Shen, M. Snyder

Associate Professors L. Barba, P.M. Bardet, T. Lee, Y. Leng, C. Liang, S. Solares, L. Zhang

Assistant Professors S. LeBlanc, M. Leftwich, A.M. Wickenheiser

Assistant Research Professors K. Bulusu

EXPLANATION OF COURSE NUMBERS
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MAE 1001. Introduction to Mechanical and Aerospace Engineering. 1 Credit.
Careers in mechanical and aerospace engineering and the necessary academic program. Teamworking and problem-solving skills for solution of design problems. Analytical and design problems and correlations between academic skills and the mechanical and aerospace engineering professions. Basic aspects of engineering ethics. (Fall).

MAE 1004. Engineering Drawing and Computer Graphics. 0-3 Credits.
Introduction to technical drawing, including use of instruments, lettering, geometric construction, sketching, orthographic projection, section view, dimensioning, tolerancing, and pictorial drawing. Introduction to computer graphics, including topics covered in manual drawing and computer-aided drafting. (Fall and spring).
MAE 2117. Engineering Computations. 3 Credits.

MAE 2124. Linear Systems Analysis for Robotics. 3 Credits.

MAE 2131. Thermodynamics. 3 Credits.
Fundamentals of equilibrium thermodynamics; Zeroth, First, and Second Laws. Work, heat, internal energy, enthalpy, thermodynamic potential functions; heat transfer mechanisms, phase diagrams, equations of state and property tables, power systems, refrigeration, heat pump systems. Reversible and irreversible processes, Carnot cycle, entropy, exergy. Prerequisite: PHYS 1021. (Spring, Every Year).

MAE 2170. History and Impact of the U.S. Patent System. 3 Credits.
Economic systems and emergence of the free market; role of the patent system in the industrial development of the United States; constitutional foundations; evolution of the U.S. patent system; landmark litigation; impact on future innovation; international aspects; the likely future of the patent system.

MAE 3120. Methods of Engineering Experimentation. 0-3 Credits.

MAE 3126. Fluid Mechanics I. 0-3 Credits.
Fluid properties, fluid statics, integral and differential formulations of conservation of mass, momentum, and energy. Bernoulli’s equation. Dimensional analysis and similitude. Inviscid flow. Viscous flow. Experimental and computational methods in fluid mechanics. Prerequisite: APSC 2058. (Fall, Every Year).

MAE 3128. Biomechanics I. 3 Credits.
Mechanical analysis of biological systems. Characterization of living tissue. Applications of statics, solid mechanics, kinematics, and elementary dynamics to the human musculoskeletal system. May be taken for graduate credit with permission of the department. Prerequisites: APSC 2057 and CE 2220. (Spring, Every Year).

MAE 3134. Linear System Dynamics. 3 Credits.

MAE 3145. Orbital Mechanics and Spacecraft Dynamics. 3 Credits.
Coordinate systems and transformations, rocket equation, two-body problem, orbit transfers, orbit perturbations, attitude dynamics and stability of symmetric spacecraft, environmental and control torques. Prerequisite: APSC 2058. (Fall).

MAE 3155. Aerodynamics. 3 Credits.
Subsonic and supersonic aerodynamics: potential flow, lift and form drag, viscous effects, compressible flow. Prerequisite: MAE 3126.

MAE 3162. Aerospace Structures. 3 Credits.
Basic structural theory of lightweight aerospace structures; analysis of typical monocoque structures; load transfer in stiffened panel structures; virtual work and energy methods of structural analysis, bending of open and closed, thin walled beams, shear and torsion of beams, and structural idealization. Restricted to juniors and seniors; permission of the instructor may be substituted. Prerequisites: APSC 2057 and CE 2220. (Fall, Every Year).

MAE 3166W. Materials Science and Engineering. 3 Credits.
Mechanical properties, plastic deformation dislocation theory, yielding, strengthening mechanisms, microstructure and properties, heat treatment of steel, composites, amorphous materials, viscoelastic deformation, creep, fracture, fatigue, fatigue crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CHEM 1111 and PHYS 1022. (Fall, Every Year).

MAE 3167W. Mechanics of Materials Lab. 1 Credit.
Measurement of strains and study of failure resulting from applied forces in ductile, brittle, anisotropic, elastomeric, plastic, and composite materials. Tension, compression, bending, impact, and shear failures. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. MAE 3166W may be taken as a corequisite. Prerequisite: MAE 3166W. (Spring, Every Year).

MAE 3171. Patent Law for Engineers. 3 Credits.
Types of patents; international patents; inventorship; prosecution process; basic references for patents; detailed structure of a patent; patentability requirements; reexamination and reissue; litigation; infringement and invalidity; copyrights, trademarks, and trade dress. May be taken for graduate credit with approval of department.
MAE 3184. Robotics Lab. 1 Credit.
Forward and inverse kinematics modeling of robots, control design, trajectory planning, and force rendering. Corequisite: MAE 3197.

MAE 3187. Heat Transfer. 3 Credits.
Steady- and unsteady-state heat conduction problems. Analytical and numerical solution methods. Convective heat transfer, boundary-layer approach, analogy between heat and momentum transfer. Thermal radiation; fundamental concepts and laws. Heat-exchanger design. Prerequisites: MAE 2131 and MAE 3126. (Fall and spring, Every Year).

MAE 3190. Analysis and Synthesis of Mechanisms. 3 Credits.
Kinematics and dynamics of mechanisms. Displacements, velocities, and accelerations in linkage, cam, and gear systems by analytical, graphical, and computer methods. Synthesis of linkages to meet prescribed performance requirements. Prerequisite: APSC 2058. (Fall).

MAE 3191. Mechanical Design of Machine Elements. 3 Credits.
Strength of materials in a design context; stresses and deflections in engineering structures; theories of failure; design of mechanical components, such as fasteners, shafts, and springs; the use of computers in mechanical engineering design. Prerequisite: CE 2220. (Fall, Every Year).

MAE 3192. Manufacturing Processes and Systems. 3 Credits.
Introduction to manufacturing techniques for metals, polymers, ceramics, and composites. Relationships between properties of materials and techniques for processing them. Process selection, design, control, and integration. Computer-integrated manufacturing, robotics and assembly automation. MAE 1004 may be taken as a corequisite. Prerequisite: MAE 1004. (Fall and spring, Every Year).

MAE 3193. Mechanical Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation; design of mechanisms and mechanical systems; safety, reliability, manufacturability, material selections, cost, and integration in the design process; finite element analysis of mechanical systems, computer-aided design, and optimization. Prerequisite: MAE 3191. (Spring, Every Year).

MAE 3195. Computer-Aided Engineering of Mechanical Systems. 3 Credits.
Presentation of the major elements of computer-aided engineering systems: interactive computer graphics, finite element analysis, and design optimization. Consideration of economics, safety, and reliability factors. MAE 3196 may be taken as a corequisite. Prerequisite: MAE 4193. (Fall and spring, Every Year).

MAE 3196. Computer-Aided Engineering Laboratory. 1 Credit.
Instruction and hands-on applications of computer-aided engineering systems to the design, analysis, and optimization of mechanical engineering components and systems. MAE 3195 may be taken as a corequisite. (Fall and spring, Every Year).

MAE 3197. Robotic Systems Design and Applications. 3 Credits.

MAE 4129. Biomechanics II. 3 Credits.
Application of fluid flow analysis techniques to cardiovascular, pulmonary, respiratory, and phonatory flows. Introduction to biomedical devices that manipulate physiological flows. May be taken for graduate credit with approval of department. Prerequisite: MAE 3187.

MAE 4149. Thermal Systems Design. 3 Credits.
Completion of a thermal systems design project that requires integration of engineering science, economics, reliability, safety, ethics, professional responsibility, and social considerations. Development and use of design methodology, optimization, feasibility considerations, detailed system descriptions, and presentation of results. Prerequisite: MAE 3187.

MAE 4151. Capstone Design Project I. 1 Credit.
First of a two-semester sequence. Integration and application of skills and knowledge acquired in the mechanical engineering curriculum. Students define objectives and an approach for a mechanical engineering project involving experimentation and apply mechanical engineering design, engineering, and laboratory skills in team project implementation. Prerequisite: MAE 3193. (Fall, Every Year).

MAE 4152W. Capstone Design Project II. 3 Credits.
Second of a two-semester sequence. Integration and application of skills and knowledge acquired in the mechanical engineering curriculum. Students define objectives and an approach for a mechanical engineering project involving experimentation and apply mechanical engineering design, engineering, and laboratory skills in team project implementation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

MAE 4157. Aerodynamics Laboratory. 1 Credit.
Subsonic and supersonic wind tunnel experiments and simulations. Prerequisite: MAE 3155. (Fall).
MAE 4163. Airplane Performance. 3 Credits.
Lift and drag estimation methods. Airplane performance measures, such as range and endurance, turning flight, specific excess power and acceleration, takeoff and landing performance. Longitudinal and lateral-directional static and dynamic stability. Control surface effectiveness. Prerequisites: MAE 3134. (Fall).

MAE 4168. Introduction to Biomaterials. 3 Credits.
Fundamentals of materials science and engineering applied to artificial materials in the human body. Topics include biocompatibility, techniques to minimize corrosion or other degradation of implant materials, and the use of artificial materials in various tissues and organs. Course not open to MAE students. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 4172. Engineering Design and the Patent System. 3 Credits.
Design experience in group projects involving following precisely the teachings of a licensed patent; or avoiding infringement of a provided patent while offering a competitive alternative; or evaluating a provided patent in light of prior art or by attempting to design a competitive product. May be taken for graduate credit with approval of department. Prerequisite: MAE 3171 and senior status.

MAE 4182. Electromechanical Control System Design. 3 Credits.
Application of control theory to the design of electromechanical systems. Transducers, valves, and other control components. Mathematical models of open- and closed-loop electromechanical systems. Root locus and frequency response methods; application to the synthesis of feedback systems by both manual and computer-aided techniques. Prerequisites: MAE 2117 and MAE 3134. (Fall and spring, Every Year).

MAE 4183. Controls Lab. 1 Credit.
Modeling, control design, simulation, implementation, tuning, and operation of a control system. Corequisite: MAE 4182.

MAE 4193. Engineering Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation. Design of journal and roller element bearings, fasteners and permanent joints, and springs. Design project incorporating design selection, and optimization. Project presentation using graphical and computer resources. Prerequisite: MAE 3191. (Fall, Every Year).

MAE 4194. Mechatronics Design. 3 Credits.

MAE 4195. Mechatronics Lab. 1 Credit.
Corequisite: MAE 4194.

MAE 4198. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

MAE 4199. Student Design Project. 1-3 Credits.
Student projects involving extensive design of various mechanical engineering systems. May be taken for graduate credit with the expectation that additional work is required. Prerequisites: seniors. (Fall and spring, Every Year).

MAE 6194. Mechatronics Design. 3 Credits.
Review of data acquisition and digital signal processing; mathematical models, design, and applications of sensors and actuators in mechatronic systems; theory and applications of mechanism design; microprocessor-based design integration, motor drives, and digital logic/circuits. Corequisite: MAE 6195. Restricted to graduate students. (Same as MAE 4194) (Spring, Every Year).

MAE 6195. Mechatronics Lab. 0 Credits.
Designing and building a mechatronic system based around a programmable microcontroller; using sensors and actuators to create devices capable of sensing their surrounding environment and reacting to stimuli from that environment. Corequisite: MAE 6194. Restricted to graduate students. (Same as MAE 4195) (Spring, Every Year).

MAE 6201. Introduction to Manufacturing. 3 Credits.
Fundamentals of modern manufacturing. Processes for manufacturing mechanical and electronic components from metals, polymers, ceramics, and silicon. Manufacturing systems, CAD, robotics, and design for assembly. Current capabilities, technological needs, and competitiveness. Examples from high-tech industries. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6203. Advanced Experimentation Technology. 3 Credits.
Sensors; measurement of displacement, temperature, pressure and velocity. Optical methods. Signal conditioning. Computer data acquisition. Uncertainty analysis. Case studies of instrumentation systems such as hot-wire anemometers, laser-doppler anemometers, schlieren/shadowgraph and interferometers. Laboratory projects. (As arranged) (Fall and spring, Every Year).

MAE 6204. Tissue Engineering. 3 Credits.
MAE 6207. Theory of Elasticity I. 3 Credits.
Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Permission of the department required prior to enrollment. (Fall, Every Year).
MAE 6210. Continuum Mechanics. 3 Credits.
Tensor analysis; fundamental concepts of continuum mechanics; kinematics of continuum; derivation of balance laws of mass, linear momentum, angular momentum, energy and entropy; axioms of constitutive theory; formulation of constitutive theories; Onsager’s principle; objectivity; representation theorem for isotropic functions; plasticity, including concepts of internal variables, yield surface, return mapping algorithm. Permission of the department required prior to enrollment. (Fall, Every Year).

MAE 6220. Applied Computational Fluid Dynamics. 3 Credits.
Basic principles of fluid dynamics and aerodynamics. Finite difference and finite volume methods. Fluid flow and heat transfer analysis of thermo-fluid mechanical systems. Computational aerodynamics codes. Individual hands-on experience with a commercial CFD code such as FLUENT. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6221. Fluid Mechanics. 3 Credits.
Continuum, kinematics of fluids; stress and strain rate tensors; fundamental equations of viscous compressible flows. Irrotational flows; sources, sinks, doubletts, and vortices. Laminar flow of viscous incompressible fluids; boundary-layer concept. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6222. Applied Aerodynamics. 3 Credits.
Introduction to practical and computational methods for solving two-dimensional and three-dimensional aerodynamics problems. Linear methods, nonlinear potential methods, coordinate transforms, and boundary-layer methods. Prerequisites: MAE 6221 and MAE 6286. (Fall and spring, Every Year).

MAE 6223. Turbomachinery. 3 Credits.
Turbine, compressor, and pump types and uses; dimensional analysis of turbomachines; cycle analysis of gas and steam turbines; energy interchange in fluid machinery; design, characteristics, and performance of turbines, compressors, and pumps; comparison of types of turbines, compressors, and pumps. Prerequisite: MAE 6221.

MAE 6224. Viscous Flow. 3 Credits.
Exact solutions of Navier-Stokes equations; the laminar boundary-layer theory. Reynolds stresses and turbulence; internal, boundary-layer, and mixing flows. Applications to heat and mass transfer and to reacting flows. Prerequisites: APSC 6213 and MAE 6221. (Fall and spring, Every Year).

MAE 6225. Computational Fluid Dynamics. 3 Credits.
Theory of discrete methods for solving the governing equations of fluid dynamics. Potential flow, Euler equations, Navier-Stokes equations. Emphasis on algorithm development appropriate to modern supercomputers. Prerequisites: MAE 6221 and MAE 6286. (Fall and spring, Every Year).

MAE 6226. Aero- and Hydrodynamics. 3 Credits.
Inviscid flows in two and three dimensions and irrotational flow theory; conformal mapping and applications. Helmholtz theorems and vorticity dynamics. Applications such as airfoil theory, finite wing theory, panel methods, instabilities, free surface flow. Prerequisite: MAE 6221. (Fall and spring, Every Year).

MAE 6227. Aeroelasticity. 3 Credits.
Static and dynamic structural deformations; static aeroelasticity (structural deformation, divergence, control effectiveness, and reversal); dynamic aeroelasticity (flutter, response to gusts and turbulence); unsteady aerodynamics for 2-D wings; strip theory for 3-D lifting surfaces; piston and Newtonian-flow theories. Prerequisites: MAE 6221 and MAE 6257. (Fall and spring, Every Year).

MAE 6228. Compressible Flow. 3 Credits.
Thermodynamics and equations of compressible inviscid flow. One-dimensional flow. Isentropic flow. Normal and oblique shock waves. Quasi-one-dimensional flow. Unsteady one-dimensional and steady two-dimensional flow. Introduction to transonic flow. Prerequisites: APSC 6213 and MAE 6221. (Fall and spring, Every Year).

MAE 6229. Propulsion. 3 Credits.
Basic concepts of propulsion: energy transformations in propulsive flows, gas dynamics of combustion. Thermal and propulsive efficiencies. Cycle and engine component analysis. Intake, nozzle performance. Drag and thrust generation. Augmentation. Propellers, turbojets, turbofans, ramjets, and rockets. Prerequisites: Graduate standing; or MAE 2131 and MAE 3126. (Spring, Every Year).

MAE 6230. Space Propulsion. 3 Credits.

MAE 6231. Structure and Transformations in Materials. 3 Credits.
Structure of crystals, crystal binding, crystal defects, dislocations, solid solutions, phases, diffusion, phase transformations, deformation twinning, and martensite. Prerequisite: APSC 2130.

MAE 6232. Fracture Mechanics. 3 Credits.
Concepts, history, and recent developments of fracture mechanics. Singularity at the crack tip; solutions around crack tip; stress intensity factors; energy release rate; J-integral; direction of crack extension; Plasticity and slow crack growth; dynamic crack propagation; molecular dynamics simulation of fracture. Prerequisite: approval of department.
MAE 6233. Mechanics of Composite Materials. 3 Credits.

MAE 6234. Composite Materials. 3 Credits.

MAE 6235. Deformation and Failure of Materials. 3 Credits.
Elastic and plastic deformation, yield, dislocation theory, strengthening mechanisms, creep, polymers, fracture, transition temperature, microstructure, fatigue. (Spring, odd years).

MAE 6237. Applied Electrochemistry. 3 Credits.
Charged interfaces, electrochemical cells, corrosion thermodynamics, electrode kinetics, general corrosion, crevice corrosion, pitting, stress-corrosion cracking, corrosion protection, batteries and fuel cells, energy storage. May include current and potential distribution in electrochemical cells and scaling effects in modeling. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6238. Biomaterials. 3 Credits.
Applications of materials science and engineering to artificial materials in the human body with the objective of detailed understanding of synthetic materials and biopolymers. Biocompatibility and its consequences on tissue-implant interfaces. Design and development of new implant materials, drug delivery systems, and biosensors. Prerequisite: MAE 3166 or MAE 4168.

MAE 6239. Computational Nanosciences. 3 Credits.
Introduction to surface force measurements in nanosciences; continuum contact mechanics in nanoscience research; intermolecular forces; empirical potentials for transition metals; surface forces in liquids; large-scale atomic/molecular massively parallel simulator; force field development from quantum mechanical density-functional theory for organic/metal molecular systems. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6240. Kinematic Synthesis. 3 Credits.
Techniques for the analysis and synthesis of function, path, and motion generating mechanisms. Methods for the dimensional design of mechanisms. Computer-aided techniques for the optimal design of planar linkages. Review of recent developments and current research. Term project. Prerequisite: MAE 3190.

MAE 6241. Computer Models of Physical and Engineering Systems. 3 Credits.

MAE 6242. Advanced Mechanisms. 3 Credits.
Emphasis on spatial kinematics. Analysis and synthesis of mechanisms. Analytical techniques using matrices, dual numbers, quaternion algebra, finite and instantaneous screws, theory of envelopes. Applications to design of linkages, cams, gears. Use of digital computers in mechanism analysis and design. (Spring, even years).

MAE 6243. Advanced Mechanical Engineering Design. 3 Credits.
Design of mechanical engineering components and systems emphasizing computer-aided engineering (CAE), including interactive computer graphics, finite element analysis, and design optimization. Creation of a complete design on an engineering workstation. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6244. Computer-Integrated Engineering Design. 3 Credits.
Design of engineering components and systems on engineering workstations using I-DEAS. Interactive computer graphics, finite element analysis, computer-based design optimization, and other relevant computer-based tools. Students apply design concepts in a computer-aided engineering environment to a selected project. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6245. Robotic Systems. 3 Credits.
Classification, features, and applications of industrial robots. Spatial descriptions and transformations, forward and inverse kinematics. Jacobian matrix, velocities and static forces, manipulator dynamics and controls. Robot actuators, transmissions, sensors, end effectors, and programming. Prerequisite: MAE 4182.

MAE 6246. Electromechanical Control Systems. 3 Credits.
State-space representations of dynamic systems; dynamics of linear systems; controllability and observability; linear observers; compensator design by separation principle; linear-quadratic optimal control; Riccati equations; random processes; Kalman filter; applications of optimal stochastic control theory to robotics and earthquake engineering. Prerequisite: Permission of the department. (Fall and spring, Every Year).
MAE 6247. Aircraft Design I. 3 Credits.
Conceptual design methods used in response to prescribed mission and performance requirements, alternate configuration concepts. Configuration general arrangement and empennage sizing. Estimation of aircraft size, weight, and balance; lift, thrust and drag; system level tradeoff and sensitivity studies. Prerequisites: Graduate standing or MAE 4163. (Spring, Every Year).

MAE 6249. Spacecraft Design. 3 Credits.
Computer-aided design of spacecraft and satellites to meet specific mission requirements. Environment, propulsion, structure, heat transfer, orbital mechanics, control considerations. Use of modern computer codes for design studies. Prerequisites: MAE 3145 or graduate standing. (Spring, Every Year).

MAE 6251. Computer-Integrated Manufacturing. 3 Credits.

MAE 6252. Projects in Computer-Integrated Design and Manufacturing. 3 Credits.
Applications of the concepts of computer-integrated manufacturing to group projects, culminating in written and oral presentations. Robot programming, vision-guided assembly, force sensing, fixtureing, and end-effector design for practical applications. Factory simulation, part scheduling, and NC program-verification algorithms. Prerequisite: MAE 6251.

MAE 6253. Aircraft Structures. 3 Credits.
Statics of thin-walled beams and panels, force interplay between stiffeners and skin in the analysis and design of stiffened thin-walled structures. Strength and stiffness of locally buckled stiffened structures. Design considerations. Critical evaluation of various design procedures. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6254. Applied Nonlinear Control. 3 Credits.
Dynamic characteristics of nonlinear systems. State stability and input-output stability. Lyapunov stability theory and invariance principle. Nonlinear control systems, including feedback linearization, back-stepping, sliding mode control, and passivity-based design. Applications to robotics, aircraft, and spacecraft control systems. Geometric controls and hybrid systems. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6255. Plasma Engineering in Aerospace and Nanotechnology. 3 Credits.
Plasma fundamentals, electromagnetic waves in plasma, plasma-wall interactions, modeling and experimental techniques in plasmas, electrical discharge, plasma propulsion, plasma-based nanotechnology. Prerequisite: MAE 3126.

MAE 6257. Theory of Vibration. 3 Credits.
Damped and undamped natural vibration, response of single- and multiple-degrees-of-freedom systems to steady-state and transient excitations, modal analysis, nonproportional damping and complex modes, variation formulation of equations of motion, discretization of structural systems for vibrational analysis. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6258. Advanced Vibration Analysis and Control. 3 Credits.
Passive and active vibration control of discrete and continuous systems, dynamic vibration absorbers, random vibrations, failure analysis, modal analysis, nonlinear vibrations. Prerequisites: MAE 3134 and MAE 4182 or graduate standing. (Spring).

MAE 6260. Nanomechanics. 3 Credits.
Introduction to crystallography; interatomic potentials; phonon dispersion relations; molecular dynamics simulation; Nose-Hoover thermostat; coarse grained non-equilibrium molecular dynamics; multiple length/time scale theory of multi-physics; microcontinuum field theories; applications to nano materials/structures. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6261. Air Pollution. 3 Credits.
Introductory course on the generation, monitoring, and control of air pollution. Atmospheric pollutants; current levels and health problems. Combustion chemistry and mixing. Photochemical processes; smog and measurements. Atmospheric dispersion; inversion and acid rain. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6262. Energy Systems Analysis I. 3 Credits.
Analysis of energy resources and conversion devices. Statistical data analysis, forecasting, I/O, and net energy analyses, mathematical modeling. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6263. Advances in Energy Engineering. 3 Credits.
Review of thermodynamics, heat transfer, fluid dynamics, and materials technology used in the energy industries. New energy-efficient technologies in transportation and buildings; renewable energy (wind, solar, and biomass). Climate change and sustainability issues, such as carbon capture, cap and trade, carbon sequestration.

MAE 6270. Theoretical Acoustics. 3 Credits.
Basic acoustic theory in stationary and uniformly moving media; waves in infinite space; sound transmission through interfaces; sound radiation from simple solid boundaries, source and dipole fields; propagation in ducts and enclosures; elements of classical absorption of sound. Prerequisites: APSC 6213 and MAE 6221. (Fall and spring, Every Year).

691 School of Engineering and Applied Science
MAE 6271. Time Series Analysis. 3 Credits.
Harmonic analysis of random signals; auto- and cross-correlations and spectra; coherence; modern techniques for spectral estimation, including fast Fourier transform, maximum entropy, and maximum likelihood; bias and variability; randomly sampled data; digital filtering; applications. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6274. Dynamics and Control of Spacecraft. 3 Credits.
Fundamentals of satellite attitude dynamics and passive stabilization. Spacecraft attitude representation, rotational kinematics and kinetics. External torques. Dynamics of gyroscopes. Gravity gradient stabilization. Effect of internal energy dissipation on stability of spinning bodies and methods of despin. Dual spin satellites. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6275. Dynamics and Control of Aircraft. 3 Credits.
Derivation of equations of motion, Euler transformations and direction cosines, stability derivatives and linearization of equations of motion, stability of linear systems with application to longitudinal and lateral dynamics, Laplace transform techniques, and frequency-response analysis. Permission of the department required prior to enrollment. (Fall, even years).

MAE 6276. Mechanics of Space Flight. 3 Credits.
Coordinate and time systems. Newton’s laws; 2-, 3-, and n-body problems, Lagrange points, gravity-assisted trajectories, variation of parameters and orbit perturbations, non-central gravity effects, drag, sun-synchronous, and formation orbits. Numerical applications using MatLab. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6277. Spacecraft Attitude Control. 3 Credits.

MAE 6280. Thermodynamics. 3 Credits.
Review of First and Second Laws of Thermodynamics and combining the two through exergy; entropy generation minimization and applications. Single phase systems, exergy analyses, multiphase systems, phase diagrams and the corresponding states principle. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6281. Advanced Thermodynamics. 3 Credits.
Development of classical and quantum statistical mechanics, including Maxwell-Boltzman distributions and microscopic origins of entropy and other thermodynamic variables. Partition functions and micro- and grand-canonical ensembles; Fermi-Dirac, Bose-Einstein, and intermediate statistics. Einstein and Debye models of solids. Prerequisite: MAE 6280.

MAE 6282. Convective Heat/Mass Transfer. 3 Credits.

MAE 6283. Radiative Heat Transfer. 3 Credits.
Basic concepts of heat transfer by thermal radiation starting from Planck’s equation for blackbody radiation. Realistic engineering problems are addressed, some involving radiative heat transfer with a variety of surfaces, geometries, and enclosures. Radiative heat flow combined with conduction and convection boundaries. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6284. Combustion. 3 Credits.
Basic combustion phenomena. Rate processes and chemical kinetics. Chain reaction theory. Detonation, deflagration, diffusion flames, heterogeneous combustion. Experimental measurements. Impact of pollution regulations and alternate fuels. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6285. Finite Element Methods. 3 Credits.
Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity. Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6286. Numerical Solution Techniques in Mechanical and Aerospace Engineering. 3 Credits.
Development of finite difference and finite element techniques for solving elliptic, parabolic, and hyperbolic partial differential equations. (Fall, Every Year).

MAE 6287. Applied Finite Element Methods. 3 Credits.
Review of theory of elasticity. Basic aspects of theory and application of finite element methods. Utilization of MSC/NASTRAN for static, dynamic, linear, and nonlinear analyses of problems in mechanical, aeronautical, and astronautical engineering. Course emphasizes individual hands-on experience with the MSC/NASTRAN code. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6288. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity. Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

MAE 6290. Special Topics in Materials Science. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include experimental methods in materials science and nondestructive inspection of materials. Permission of the department required prior to enrollment. (Fall and spring, Every Year).
MAE 6291. Special Topics in Mechanical Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include tribology, power systems design, solar heating systems, HVAC, and plasticity theory. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6292. Special Topics in Aerospace Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include environmental noise control, aeroacoustics, hypersonic flow, and flight vehicle aerodynamics. May be repeated for credit. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 6298. Research. 1-6 Credits.
Basic research projects as arranged. May be repeated for credit.

MAE 6998. MS Thesis Research. 3 Credits.
(Fall and spring, Every Year).

MAE 6999. MS Thesis Research. 3 Credits.
(Fall and spring, Every Year).

MAE 8350. Advanced Topics in Materials Science. 3 Credits.
Topics such as surface science that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8351. Advanced Topics in Mechanical Engineering. 3 Credits.
Topics such as advanced analytical mechanics, advanced mechanics of continua, and advanced theory of elasticity that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8352. Advanced Topics in Aerospace Engineering. 3 Credits.
Topics such as nonsteady flow, physical gas dynamics, turbulence, and nonlinear wave propagation that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: Permission of the department. (Fall and spring, Every Year).

MAE 8998. Advanced Reading and Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates preparing for the general examination. (Fall and spring, Every Year).

MAE 8999. Dissertation Research. 1-12 Credits.
May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The Department of Mechanical and Aerospace Engineering offers the bachelor of science with a major in mechanical engineering degree program to prepare students for work in these fields. The program is accredited by ABET (Accreditation Board for Engineering and Technology).

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

Bachelor of Sciences with a Second Major in Mechanical Engineering

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if their primary degree is a bachelor of science. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other bachelor’s degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree.

Graduation grade-point average criteria:
To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Bachelor of Science with a Major in Mechanical Engineering, Aerospace Option

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, aerospace option degree program prepares students to work in the aerospace industry or to pursue graduate study in aerospace engineering. It provides a strong foundation in aerodynamics, airplane performance, propulsion, aerospace structures, orbital mechanics, spacecraft dynamics, and aircraft and spacecraft design.

Visit the program website (https://www.mae.seas.gwu.edu/programs-degrees) for more information.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Aerospace Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p. ).

Graduation grade-point average criteria:
To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

---

1. Course satisfies the university general education requirement in math, science, and writing.

2. To satisfy the SEAS humanities and social science requirement, all mechanical engineering students must take one (1) humanities course and two (2) social sciences courses from the University General Education Requirement (p. 38); PHIL 2135 Ethics in Business and the Professions; and two (2) additional humanities or social science or non-technical courses from the MAE Department’s pre-approved list of electives. Each course selected to satisfy this requirement must be taken for at least 3 credits. NOTE: Students in the patent law concentration must take MAE 2170 History and Impact of the U.S. Patent System in lieu of one of the additional humanities or social science or non-technical course.

3. Space: Students take MAE 3145 Orbital Mechanics and Spacecraft Dynamics in the fifth semester and MAE 6249 Spacecraft Design in the eighth semester.

4. Aero: Students take MAE 4163 Airplane Performance in the seventh semester and MAE 6247 Aircraft Design I in the eighth semester.

4. All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research, and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

**BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, BIOMECHANICAL OPTION**

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, biomechanical option degree program prepares students to work in the biomedical industry or to pursue graduate study in biomedical engineering. It provides a strong foundation in human anatomy and physiology, biomechanics, biomaterials, and design of biomedical devices.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

**Bachelor of Sciences with a Second Major in Mechanical Engineering, Biomedical Option**

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p. ).

**Graduation grade-point average criteria:**

To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point
average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

---

1. Course satisfies the university general education requirement in math, science, and writing.

2. To satisfy the SEAS humanities and social science requirement, all mechanical engineering students must take one humanities course and two social science courses from the University General Education Requirement (p. 38); PHIL 2135 Ethics in Business and the Professions, and two additional humanities or social science or non-technical courses from the MAE Department’s pre-approved list of electives. Each course selected to satisfy this requirement must be taken for at least 3 credits. NOTE: Students in the patent law concentration must take MAE 2170 History and Impact of the U.S. Patent System in lieu of one of the additional humanities or social science or non-technical course.

3. All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers MAE 3171 Patent Law for Engineers , MAE 4172 Engineering Design and the Patent System , MAE 6298 Research , MAE 6998 MS Thesis Research MAE 6998 MS Thesis Research , and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

4. Honors Program students and those who have been invited to join the Scholars in Quantitative and Natural Sciences (SQNS) Program take BISC 1120 Laboratory Introduction to Biomolecular Research instead of BISC 1125 Introduction to Cells and Molecules Laboratory for the lab component.

---

**BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, PATENT LAW OPTION**

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, patent law option degree program provides a strong foundation in fundamental principles of patent law and the influences of the U.S. patent system on modern engineering design. Students in this option obtain skills and knowledge that can lead to work as a technical specialist in a patent law firm or in the patent department of an industrial employer. The option provides excellent preparation for pursuit of a law degree that may focus on intellectual property law.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.
Bachelor of Sciences with a Second Major in Mechanical Engineering, Patent Law Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p. ).

Graduation grade-point average criteria:
To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

Bachelor of Sciences with a Second Major in Mechanical Engineering, Robotics Option

Any undergraduate student who is enrolled at GW may declare a second major in mechanical engineering only if his or her primary degree is a BS. The student must meet the degree requirements for a bachelor of science in mechanical engineering, including SEAS general, major, technical electives, humanities/social science, and SEAS/technical GPA requirements. Students earning other degrees (e.g., BA, BBA, BFA) must meet the requirements for a double degree (p. ).

Graduation grade-point average criteria:
To satisfactorily complete a second major in biomedical engineering, a student must have a minimum grade-point average of 2.2 in all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semesters of the curriculum.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, ROBOTICS OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, robotics option degree program prepares students to work in the robotics industry or to pursue graduate study in robotics engineering. It provides a strong foundation in robotic mechanisms design, analysis, and integration; kinematics, dynamics, and control of robots; mechatronics design; sensing, actuation, and measurement; microprocessors for robotic systems; robotic haptics; and topics on artificial intelligence.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.
MASTER OF SCIENCE IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

The master of science in the field of mechanical and aerospace engineering degree program offers a rigorous course of study that helps prepare students for leadership roles in government and industry. Students have the opportunity to work across disciplines in emerging areas of technology. The program is designed to build a solid background on the fundamentals of the related discipline, and at the same time it can be tailored to meet individual needs under the guidance of an academic advisor. Students can tailor their program to meet their interests and goals by choosing from the following focus areas: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences, and energy; industrial engineering; solid mechanics and materials science; and structures and dynamics; and robotics.
mechatronics, and controls. Thesis and non-thesis options are available.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

More information is available on the departmental website (https://www.mae.seas.gwu.edu).

**Educational Planner:**

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student’s degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student’s first semester. The Educational Planner must be approved by the advisor.

**REQUIREMENTS**

**Credit Requirements:**

- Thesis option: 30 credits are required for graduation; 6 of these credits are thesis credits
- Non-thesis option: 33 credits are required for graduation
- In either option, the student must select one focus area from the chart below and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

**Graduation and Scholarship Requirements:**

Students are responsible for knowing the university's minimum GPA requirement for graduation and scholarships. Please visit the Graduation and Scholarship Requirements (http://bulletin.gwu.edu/engineering-applied-science/#graduation_requirements_ms) section on this site to read the requirements.

Students should contact the department for additional information and requirements.

**Program Restrictions:**

Normally, no more than two courses taken outside the Department of Mechanical and Aerospace Engineering may be counted toward the requirements for the graduate degree. In special circumstances this may be changed with the approval of the advisor.

### DOCTOR OF PHILOSOPHY IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

#### Program Overview

The PhD in mechanical and aerospace engineering is a research-focused degree program with the objective of preparing students for a life of scholarship in their field of interest. Central to the program is original thesis research, which substantially advances the state-of-the-art in the field. Coursework to strengthen the command of the chosen discipline and enhance mathematical skills is also required. Thesis research is directed by the thesis advisor, with input from a small committee of faculty members who are selected for their expertise in the chosen field of study. Students have the opportunity to work on leading edge research and contribute to efforts to advance basic and applied sciences.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the Department of Mechanical and Aerospace Engineering website (https://www.mae.seas.gwu.edu) for more information.

#### REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering and Applied Science, Doctoral Program Regulations
Direct-to-PhD students should complete a minimum of 36 credits of coursework and 18 credits of research. Students who enter the program with an MS degree should complete a minimum of 12 credits of coursework and 18 credits of research. The student and advisor design the curriculum to meet the student’s needs and goals and can choose from the following areas of focus: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences, and energy; industrial engineering; solid mechanics and materials science; structures and dynamics; robotics, mechatronics, and controls.

**Academic Procedures for MAE Doctoral Students**

There are three distinct phases in the program of doctoral study in mechanical and aerospace engineering (MAE): 1) the period of preparation for the qualifying examination; 2) the qualifying examination; and, 3) the period after admission to candidacy for the PhD degree during which the student performs research leading to the doctoral dissertation. After admission to doctoral study, students in MAE are subject to specific procedures as outlined below in each of these program phases.

**A. Period of preparation for the qualifying examination:**

As early as possible after their admission students should identify the faculty member who will serve as their coursework and research advisor. For research assistants, the faculty member providing the financial support is also the advisor. At the beginning of each semester, the doctoral student meets with the MAE faculty advisor to evaluate the progress towards taking the qualifying examination. Coursework consists of core courses and electives that are specific to the major area of research. The qualifying examination is given twice each year, once during the first two weeks of the fall semester and once during the first two weeks of the spring semester. All students should take the examination as early as possible after they complete at least 6 credits of core courses and 6 credits of electives and maintain a minimum GPA of 3.4 Students are recommended to take the examination no later than the beginning of their third semester. In case a student does not fulfill the above requirements, they should develop a plan of action with the academic advisor, which needs to be approved by the department chair. The student should be advised of any additional coursework to be undertaken, or any additional preparation.

**B. The doctoral qualifying examination:**

All PhD students are required to take the doctoral qualifying examination (DQE) held in the first two weeks of each semester. They must submit the DQE notification form provided by the department by the end of the preceding semester. The examination is distributed electronically. A written proposal and an oral presentation of the chosen problem are required. The goals of the examination include the following:

1. To determine the student’s aptitude and ability to do original and independent research at the doctoral level;
2. To assess the student’s ability to review previous work from the literature; and,
3. To determine the student’s ability to understand and apply fundamental concepts in their technical area.

Participation and subject areas—In consultation with their advisor (or faculty sponsor) the graduate student should notify the Graduate Curriculum Committee that they are taking the DQE before the end of the preceding semester by filling the DQE Notification form. The student also selects a major subject area that reflect their background and dissertation fields. The date/time of the examination will be announced by the end of the preceding semester.

Examination committee selection—The committee comprises the student’s advisor (or faculty sponsor), an examination committee chair, and a third member. Co-advisors may participate as silent observers during the first attempt. The members of this committee are selected by the graduate curriculum committee in consultation with the student’s advisor (or faculty sponsor). At least two out of three members of the committee should be regular faculty of the MAE department.

Topic selection—Ten calendar days before the date of the qualifying examination, each student will be assigned a research topic and one to two references related to one or more of the subject areas selected by the student. The topic is selected by the chair of the examination committee in consultation with both the student’s advisor (or faculty sponsor) and the third committee member. The topic may be relevant to the student’s future doctoral work but is different for each student. The topic cannot be directly related to or be part of the student’s ongoing doctoral work.

Written proposal—The objective of the written proposal is to communicate how a specific research problem may be investigated. The proposal is not to exceed five pages using an 11pt Arial font, 1-inch margins, and 1.0 line spacing. The five-page limitation covers the proposal body text, as well as any figures and tables. The title page and cited references are the only sections that do not count toward the 5-page limitation. A typical written proposal has the following structure (the proposal format has been adapted from the required standard NSF proposal format):

**Title page**—The first page should include your name, title of your proposal, and signed academic integrity pledge (one page).

**Motivation and objectives**—Explain the importance of the problem, review the state of the art, and discuss critical barrier to progress in the field that the proposed project addresses. Outline the objectives of the proposed work.
Technical approach—This is the core of the proposal, where you describe the overall methodology and analyses to be used to accomplish the objectives of the project. Include how the data will be collected, analyzed.

Cited references—Cite sources for background information and technical plan (does not count towards the 5-page limit).

Oral examination—The student prepares a brief PowerPoint presentation describing their proposed approach. The examination begins with a 20-minute presentation by the student, which will be the starting point for the oral examination discussion. The presentation may lead to questions (based on the chosen subject areas and sometimes unrelated to the assigned topic and of a broader nature) related to the goals of the exam. The duration of the examination is two hours.

Exam outcome—Immediately after the end of the oral examination the committee deliberates and reach a decision on the examination outcome and convey it by email to the Graduate Curriculum Committee. All students are notified in writing of the outcome of the examination by the chair of the Graduate Curriculum Committee, one week after all exams have been completed. The notification may include conditions that the student must fulfill prior to attaining candidacy or suggestions on certain skills or areas that may need strengthening. Passing the examination requires a unanimous decision from all three committee members. Students who fail the examination in their first attempt may, upon recommendation of the examination committee and review by the Graduate Curriculum Committee, take it again later in the semester.

C. Period of Dissertation Research

After successful completion of the qualifying examination the student is admitted as a candidate for the PhD degree program and begins specialized research under the supervision of their thesis advisor. Research direction may be shared by a full-time faculty member and an outstanding external scientist or engineer, but the final responsibility for the academic aspects of the dissertation work lies with the MAE faculty thesis advisor.

Dissertation Research Proposal—During the research phase, each doctoral candidate is required to give a research proposal presentation to the Dissertation Committee. The student’s research progress is assessed by the committee and appropriate suggestions for continuing research directions are solicited from those in attendance. Scheduling of the research proposal presentation is done at a minimum of one year before the final PhD defense by the student’s director of research in consultation with the MAE chairperson. Under no circumstances is a doctoral thesis defense allowed to proceed prior to one year after the research proposal presentation. The committee helps the student to define the research topic, and ultimately approves the research proposal. The dissertation advisor should propose the membership of the dissertation research committee, which must be approved by the department chair. Final approval rests with the Dean's office. At least three individuals should serve on the committee; the research advisor is the dissertation director (also called the advocate) and two others. Two of the committee members must be full-time faculty. Students are required to present the written dissertation proposal to the committee (two of the members must be full-time faculty) and to successfully defend the proposal in an oral defense after performing the bulk of their dissertation research. The request for proposal defense form must be filed and approved two weeks prior to the defense. The Form 5 dissertation form is presented at the proposal defense and, after a successful defense, is signed by all committee members. After the proposal defense, the student submits the revised proposal, complying with all suggestions, clarifications, and corrections, as required by the dissertation committee, along with the signed Form 5 to the director of doctoral research, i.e. thesis advisor and to the departmental advanced degree program coordinator for the PhD program. They forward the Form 5 to the department chair for signature.

Dissertation Defense: The research advisor may decide that the research achieved by the doctoral student is sufficient to satisfy the requirement of the degree. They propose an examining committee for the purpose of administering the final dissertation examination (dissertation defense). The committee of examiners must consist of a minimum of five members, at least three of whom are normally full-time faculty members with scholarly specialties within the area of concentration; at least one member will normally be from an academic specialty outside the area of concentration. It is required that an external examiner be invited. The research advisor serves on the examining committee both as advocate and as a non-voting committee member. The committee elects its own chairman, who should not be the research advisor, or if different, the student’s faculty advisor, as its first order of business. The dissertation examining committee must be approved by the department chairperson prior to the date of the defense. Each member of the examination committee, no later than 3 weeks prior to the defense, should receive a copy of the dissertation. At the same time, the candidate must provide a 350-word abstract and other information to the department office for the purpose of preparing an announcement of the defense.

The dissertation defense is an oral examination, which is open to the public. When the dissertation is accepted as complete, it should be submitted electronically no later than the date specified by the Office of the Registrar.

Seminar and Colloquia Requirements—Prior to graduation, doctoral students must complete the Department of Mechanical and Aerospace Engineering MAE seminar attendance requirement, whereby the student must attend at least 80 percent of the MAE seminars offered during any two semesters of the student’s enrollment. For a seminar to count toward the requirement, the student must be present for the duration of the seminar. To track attendance, the student must obtain a certification signature on the MAE Seminar Attendance Form from an MAE faculty member present at the seminar and
submit the completed form to the MAE departmental office at
the end of the semester. The student may attempt to fulfill this
requirement in as many semesters as needed. This requirement
is applicable to doctoral students who matriculate during the
2016-2017 academic year or later.

Graduation and scholarship requirements—Students
are responsible for knowing the University’s minimum
GPA requirement for graduation and scholarships
available in the Graduation and Scholarship Requirements
(http://bulletin.gwu.edu/engineering-applied-science/
#graduation_requirements_phd) section of this Bulletin.
Students should contact the department for additional
information and requirements.

GRADUATE CERTIFICATE IN
COMPUTER-INTEGRATED
DESIGN IN MECHANICAL AND
AEROSPACE ENGINEERING

The graduate certificate in computer-integrated design in
mechanical and aerospace engineering program offers an
alternative to a master of science degree (MS) degree program
for professionals who wish to expand their education beyond
the bachelor’s degree but might not have the time to commit
to a full graduate degree program. The graduate certificate
may serve as a path towards a master’s degree as all certificate
courses are transferable to an MS program.

Specific admission requirements are shown on the Graduate
Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.mae.seas.gwu.edu/
computer-integrated-design-graduate-certificate) for additional
program information.

The Elliott School of International Affairs offers undergraduate and graduate programs to prepare individuals to understand and work in an increasingly globalized world. The historical roots of the Elliott School extend back to the establishment of the School of Comparative Jurisprudence and Diplomacy in 1898. In 1966, the School separated from the School of Government, Business, and International Affairs to become an independent unit, the School of Public and International Affairs. In 1987, the name was changed to the School of International Affairs, and in 1988 the School was renamed in honor of Evelyn E. and Lloyd H. Elliott. Lloyd Elliott was the president of George Washington University from 1965 to 1988.

The Elliott School offers the bachelor of arts degree in international affairs, Asian studies, Latin American and hemispheric studies, and Middle East studies; the master of arts degree in the fields of international affairs, Asian studies, European and Eurasian studies, global communication, international development studies, international science and technology policy, international trade and investment policy, Latin American and hemispheric studies, Middle East studies, and security policy studies; the master of international policy and practice degree for mid-career professionals; and the master of international studies degree for students enrolled in master’s degree programs at international universities with which the Elliott School has a special partnership.

These programs provide advanced academic and professional training in international affairs as preparation for employment in public, private, and nonprofit sectors. Focusing on major historical and contemporary issues in international affairs, the programs are both interdisciplinary and multidisciplinary, combining courses offered through the School with courses offered by other schools and departments of the University.

REGULATIONS

Undergraduate Degree Requirements (p. 708)
- Graduation (p. 708)
- Scholarship Performance in the Major (p. 708)
- Incompletes (p. 708)
- Pass/No Pass Option (p. 708)
- Study Abroad (p. 709)
- Internships (p. 709)
- Double Majors (p. 709)
- Special Honors (p. 709)

Graduate Degree Requirements (p. 709)
- Scholarship Requirements (p. 709)
- Readmission (p. 709)
- General Requirements for Master of Arts Degree Programs (p. 710)
- Capstone/Thesis Option (p. 710)
- Foreign Language Requirements (p. 710)

Undergraduate Degree Requirements

Graduation
To earn a bachelor’s degree, students must complete 120 credits, meet the University General Education Requirement (p. 38), major requirements, and have a minimum cumulative grade-point average of 2.0. Courses in lifestyle, sport, and physical activity do not count toward the degree.

Scholarship Performance in the Major
All courses indicated as requirements for the major, including courses taken to fulfill the third-year language proficiency requirement, must be completed with a minimum grade of C–. If a student receives a grade of D+, D, or D– in any of these courses, the credit will count toward the degree, but the student must either repeat the course or, with approval of the academic advisor, substitute another course; in either case, the student must earn a minimum grade of C–. If the student must repeat the course, credit for the repetition does not count toward the degree, and grades for both the initial course and the repeated course are used to compute the GPA. If the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Office of Academic Advising and Student Services in all matters affecting the program of study, such as changes, substitutions, withdrawals, or transfer of credit from other institutions.

Incompletes
Conditions under which the symbol I (Incomplete) may be assigned in a course are described under University Regulations (p. 23).

Pass/No Pass Option
A student who has a cumulative grade-point average of 2.5 or above may, with the approval of the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising), take one course per semester and receive a grade of Pass, P, or No Pass, NP, which will be recorded on the student’s transcript but will not be reflected in the cumulative grade average. A student must sign up for such an option at the Office of Academic Advising and Student Services within the first eight weeks of classes. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of the semester. Foreign language courses and required courses in the student’s degree program (except those in which the
grade of \( P \) or \( NP \) is normally assigned) may not be taken on a \( P/NP \) basis. Freshmen may not elect to take a course on a \( P/NP \) basis. A transfer student may not elect to take a course on a \( P/NP \) basis until the second semester of enrollment in the University. No more than six courses in which the grade of \( P \) or \( NP \) is assigned will apply toward the degree, including courses in which the grade of \( P \) or \( NP \) is normally given.

**Study Abroad**

Students are encouraged to study abroad. Those wishing to study abroad must consult their academic advisor and the University’s Office for Study Abroad (http://studyabroad.gwu.edu). Students must secure prior approval from the Office of Academic Advising and Student Services for any plan of study abroad in order for the credit to apply toward the student’s degree requirements. Students must apply to a program from the University’s list of approved study abroad programs.

**Internships**

Internships offer students the opportunity to make practical use of the knowledge they acquire in the classroom. Elliott School undergraduates who have completed at least 24 credits in residence, have a minimum cumulative grade-point average of 2.5, and have no more than one incomplete on their transcript, are eligible to arrange internships for credit or zero-credit, to a total maximum of 6 credits toward the degree. Academic work in the field of the internship is required. A zero-credit internship, which requires no additional academic work outside of the internship itself, is also available. Internships are available in the private, nonprofit, and public sectors. Students must register for internships (even if for zero-credit) through the Office of Academic Advising and Student Services but are responsible for locating their own internships.

**Double Majors**

Students who complete the requirements of two majors in the Elliott School (such as international affairs and Asian studies) may graduate with a double major. Consult the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) to officially declare both majors on the appropriate form.

Students in the Elliott School may declare a second major offered by Columbian College of Arts and Sciences (excluding communication, creative writing and English, journalism and mass communication, and political communication), School of Engineering and Applied Science, Milken Institute School of Public Health, or School of Business (finance major only). Permission for the second major must be obtained from the appropriate administrative office of the other school.

Students in Columbian College of Arts and Sciences, School of Engineering and Applied Science, Milken Institute School of Public Health, and the School of Business may declare a second major in the Elliott School. Students wishing to pursue these options must request approval through the Elliott School’s Office of Academic Advising and Student Services. Students must complete all degree requirements for their major in their home school in order to graduate with a second major from the other school.

In all cases, double majors do not result in two degrees. See Double Majors and Double Degrees in the University Regulations (p. 23).

**Special Honors**

Students who complete a senior thesis or research seminar with a minimum grade of \( A- \), earn a cumulative GPA of 3.7, and complete 60 credits in residence at GW are awarded Special Honors.

**Graduate Degree Requirements**

**Scholarship Requirements**

Information on grades and computing the grade-point average can be found under University Regulations (p. 23). Courses taken to satisfy degree requirements cannot be taken on a \( CR/NC \) basis, with the exception of some capstone courses.

Graduate students are required to maintain a minimum cumulative grade-point average of 3.0. A student whose grade-point average falls below 3.0 or who receives a grade of \( F \) in a course at any point after completing 9 credits is placed on academic probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. The student’s academic advisor meets with the program director and/or academic dean to review the student’s record. The student’s account is put on hold until the student has met with the program director and/or academic dean to discuss the terms of probation. A student’s program may be restricted by the program director if deemed necessary.

During the probation period, the student’s performance will be monitored to determine suitability for continued study. The Office of Academic Advising and Student Services informs the program director and/or academic dean if the student is no longer on probation or is eligible for dismissal. Incomplete grades are not allowed during the probation period and are grounds for dismissal. A student who fails to raise the cumulative grade-point average to 3.0 or above by the end of the period of probation or who is subject to probation for a second time at any point during the academic program is eligible for dismissal. If a student is eligible for dismissal, the academic dean in consultation with the program director will decide whether the student is to be dismissed from the Elliott School.

**Readmission**

A graduate student who has not been continuously enrolled or on approved leave of absence must file an application for readmission the semester before planning to return to school.
General Requirements for Master of Arts Degree Programs

Programs leading to the master of arts degree require a minimum of 40 credits of graduate coursework, which includes a capstone project. By the end of the first semester in residence, candidates for the degree are required to submit to the Office of Academic Advising and Student Services for final approval a plan of study that includes fields, supporting coursework, and any other required information as endorsed by the program director. Degrees are awarded after the student has completed the required coursework, an acceptable capstone project, and satisfied the foreign language requirement (if relevant).

Students with sufficient academic backgrounds may waive a core course with approval of a designated faculty member from the department concerned. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses may be counted toward the master’s degree; registration for graduate credit must be approved at the beginning of the course by the program director, the instructor, and the Office of Academic Advising and Student Services. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate coursework may be taken for credit toward a graduate degree. Academic credit counted toward a previous degree may not be counted toward the master’s degree.

All master’s degree candidates must complete degree requirements within five years of their admission to the program. Students who are unable temporarily to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student is required to register for Leave of Absence each semester.

Students are encouraged, and in some cases required, to take professional skills-based courses (IAFF 6502 Professional Skills I and IAFF 6503 Professional Skills II) and should consult their program guidelines for limits on the number of credits in these courses that can count toward their degree program. The maximum allowed by the Elliott School is 4 credits.

No more than a combined total of 6 graduate credits may be transferred from other accredited institutions or from non-degree status; these may be accepted only under limited conditions of time, grades earned, and relevance to the student’s program. Foreign language course credit is not eligible for transfer.

Capstone/Thesis Option

Every student must successfully complete a capstone near the conclusion of the master’s program. For the capstone, the student must have a 3.0 grade-point average and must have completed or registered for 30 credits. If there is a lapse of time between completion of other coursework and the capstone, the student must be continuously enrolled during this period. A student who fails to complete successfully the capstone may repeat it with the permission of the dean. If the student fails a second time, no further opportunity to complete the capstone will be permitted and the degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis, in addition to the capstone, if they qualify by having a minimum 3.5 grade-point average for a minimum of 20 credits of coursework in their program. Students also must develop a formal thesis proposal approved by their prospective thesis advisor and the program director.

The thesis subject should be selected as early as possible to permit effective integration with the student’s coursework. A student is not permitted to register for (IAFF 6998 Thesis and IAFF 6999 Thesis) until the thesis subject formally has been submitted to the Office of Academic Advising and Student Services. The subject must be approved by the member of the full-time faculty under whom the thesis is to be written, a second member of the faculty who serves as a reader, and the student’s program director. The thesis in its final form must have the approval of the thesis director and one other reader. Thesis proposals must be submitted electronically by May 1 of the year preceding anticipated submission of the thesis in a fall-spring sequence. For a spring-fall sequence, thesis proposals must be submitted electronically by September 1 of the year preceding anticipated submission of the thesis. All theses must meet the formatting and other requirements set forth at GW’s Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds).

Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

Foreign Language Requirements

In most degree programs, a candidate for the master of arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, academic credit, and options for fulfilling the language requirement.
UNDERGRADUATE

Bachelor's programs
• Bachelor of Arts with a major in Asian studies (p. 717)
• Bachelor of Arts with a major in international affairs (p. 724)
• Bachelor of Arts with a major in Latin American and hemispheric studies (p. 735)
• Bachelor of Arts with a major in Middle East studies (p. 742)

Minors
• Minors (p. 749)

GRADUATE

Master's programs
• Master of Arts in the field of Asian studies (p. 754)
• Master of Arts in the field of European and Eurasian studies (p. 762)
• Master of Arts in the field of global communication (p. 769)
• Master of Arts in the field of international affairs (p. 779)
• Master of Arts in the field of international development studies (p. 781)
• Master of Arts in the field of international science and technology policy (p. 795)
• Master of Arts in the field of international trade and investment policy (p. 798)
• Master of Arts in the field of Latin American and hemispheric studies (p. 800)
• Master of Arts in the field of Middle East studies (p. 806)
• Master of Arts in the field of security policy studies (p. 815)
• Master of International Policy and Practice (p. 818)
• Master of International Policy and Practice - Online (http://bulletin.gwu.edu/international-affairs/graduate-programs/international-policy-practice-online)
• Master of International Studies (p. 819)

Combined programs
• Dual Master of Arts in any ESIA graduate program and Master of Public Health (http://bulletin.gwu.edu/public-health/dual-ma-esia-mph)
• Joint Master of Arts and Juris Doctor (p. 835)
• Joint Master of Arts in Elliott School programs and Master of Business Administration (p. 835)

CERTIFICATES

Graduate certificate programs
The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs also are open to graduate students from other universities, individuals who already have earned a graduate degree, and individuals with a bachelor’s degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other MA degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate coursework taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).
• Graduate certificate in global gender policy (p. 835)
• Graduate certificate in international science and technology policy (p. 836)
• Graduate certificate in nuclear policy (p. 837)

FACULTY

Professors

Associate Professors

Assistant Professors
C. Arrington, E. Kramon, N. Kelsey, O. Timoshenko

Professors of Practice
C. Fink, E. Gnehm, C. Kojm, S. Pace, R. Sutter

Associate Professors of Practice
S. Graham, S. Roberts

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work.

Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students.

The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office.

IAFF 1001. First-Year Experience. 1 Credit.
First-Year Experience assists students in developing their personal, academic, and career goals. Restricted to students in the Elliott School.

IAFF 1005. Introduction to International Affairs. 3 Credits.
Introduction to the field of international affairs; the challenge of promoting cooperation and order in a world where competition, conflict, and disorder are common; interstate relations, intrastate conflicts, regional problems, and old and new global challenges.

IAFF 2040. Basic Topics in International Affairs. 0-3 Credits.
Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Primarily for Elliott School freshmen and sophomores.

IAFF 2090. Latin America: Problems and Promise. 3 Credits.
An interdisciplinary course in Latin American studies designed to introduce undergraduates to the diverse, rich, and complex history, politics, economy, culture, and society of Latin America.

IAFF 2091. East Asia-Past and Present. 3 Credits.
An interdisciplinary course offering a comprehensive and integrated introduction to the civilizations and present problems of East Asia.

IAFF 2092. Russia and Eastern Europe: An Introduction. 3 Credits.
A multidisciplinary introduction to the lands and cultures of the former Soviet Union and Central and Eastern Europe. The main emphasis is on history and politics, with attention also given to economics, trade, geography, military matters, literature, and the media.

IAFF 2093. Africa: Problems and Prospects. 3 Credits.
Aspects of the environment, culture, and politics as they affect the present and anticipated future of Africa.

IAFF 2094. Europe: International and Domestic Interactions. 3 Credits.
A multidisciplinary view of contemporary Europe, including the E.U. states, other states of Eastern Europe, and Turkey. The widening processes of political, judicial, economic, cultural, and security integration. Prerequisites: IAFF 1005 and PSC 1001.

IAFF 2190. Special Topics. 3 Credits.
IAFF 2190W. Special Topics. 3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3155. Spain in the Modern World. 3 Credits.
IAFF 3171. U.S. Foreign Policy Summer Program. 3-4 Credits.
The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues. The program has special admission criteria.

IAFF 3179. Special Topics in Science and Technology Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3180. Special Topics in Security Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3180W. Spec Topics in Security Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3181. Special Topics in Conflict Resolution. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3182. Special Topics in Foreign Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3183. Special Topics in Development Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3184. Special Topics in Trade and International Economic Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3185. Special Topics in European and Eurasian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3186. Special Topics in Asian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.
IAFF 3186W. Special Topics in Asian Studies. 0-3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3187. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3188. Special Topics in Middle East Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3189. Special Topics in African Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3190. Special Topics in International Affairs. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Restricted to juniors and seniors. Prerequisites: IAFF 1005 or PSC 1003.

IAFF 3190W. Special Topics. 0-3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3191W. Latin American Populism in Global Context. 3 Credits.
Theoretical frameworks for thinking about classical and contemporary examples of Latin American populism in the twentieth and twenty-first centuries; examining these theories and interpretations as they pertain to the origins, process, and outcomes of selected cases. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to . Recommended background: Latin America, upper-level political science/international affairs coursework, and writing experience.

IAFF 3192. ESIA Undergraduate Scholars Workshop. 1 Credit.
For Elliott School juniors and seniors who have applied to and been accepted into the ESIA Undergraduate Scholars Program. Students fine-tune their research questions, conduct the bulk of their research, draft abstracts, and outline their papers. See http://elliott.gwu.edu/academics/ugrad/scholars/index.cfm for more information.

IAFF 3193W. ESIA Undergraduate Scholars Course. 3 Credits.
Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

IAFF 3195. Internship. 0-3 Credits.
Internships in public, private, and nonprofit organizations concerned with international affairs. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for up to 6 credits with permission.

IAFF 3198. Independent Study and Research. 1-3 Credits.
For juniors and seniors with a minimum grade-point average of 3.0. Students must find a sponsoring faculty member and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for credit with permission of the dean.

IAFF 4191. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. Restricted to juniors and seniors in the Elliott School.

IAFF 4191W. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only.

IAFF 4199. Senior Thesis. 3 Credits.
Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. Restricted to seniors in the Elliott School.

IAFF 5700. Special Topics. 3 Credits.

IAFF 6101. International Affairs Cornerstone. 3 Credits.
Political, economic, and social theories of international relations and their applications to practice.

IAFF 6102. Global Gender Policy. 3 Credits.
An interdisciplinary and comparative approach to examination of policies targeted at achieving gender equality and of the costs of policies that are not gender-specific. Topics include poverty reduction, environmental sustainability, social justice, global and personal security, and prevention of and responses to extreme calamities and crises. How global gender policies are rationalized, adopted, implemented, and assessed. Focus on “what works” and why it works; gaps that remain in achieving global gender equality.

IAFF 6106. Nuclear Weapons. 3 Credits.
The technology and politics associated with nuclear weapons. Strategy and deterrence, force planning and operations, and the prospect of nuclear terrorism.

IAFF 6118. Special Topics in International Affairs. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6121. International Development Studies Cornerstone. 3 Credits.
Introduction to the concepts and methods of international development. Prerequisite: students in the MA in international development studies program.
IAFF 6122. Development Policy and Practice. 3 Credits.
An overview of economic development in developing countries; key challenges of economic growth, poverty alleviation, and development.

IAFF 6136. Gender and Development. 3 Credits.
Theoretical approaches to gender and development and debates over how to promote gender equity and rights across the gender spectrum. Key issues in gender and development and the range of actors who are involved in promoting gender equality. General patterns, lessons with broader applications, and challenges and differences within and between societies.

IAFF 6137. Development Studies Pre-Capstone Workshop. 1 Credit.
Students work in teams to find a suitable client and negotiate a project, with detailed terms of reference and a work plan to be carried out in the spring semester. Restricted to students in the MA in international development studies program.

IAFF 6138. Special Topics in International Development Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6139. International Development Studies Capstone. 3 Credits.
A project-oriented development course abroad, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in international development studies program.

IAFF 6141. International Science and Technology Policy Cornerstone. 3 Credits.
Introduction to the study of international science and technology policy; focus on policy issues that arise from interactions between scientific and technological developments and government activity.

IAFF 6142. Technology Creation/Diffusion. 3 Credits.
Examination of the relationship between invention (inception), innovation (first application), and dissemination (diffusion) of technological knowledge; focus on the technological environment prevailing in the major developed market economies.

IAFF 6145. U.S. Space Policy. 3 Credits.

IAFF 6146. Space Law. 3 Credits.
The underlying principles of international space law, with emphasis on issues of particular concern as the uses of space increase for exploration, commerce, and security.

IAFF 6148. Space and National Security. 3 Credits.
Topic announced in the Schedule of Classes.

IAFF 6151. Environmental Policy. 3 Credits.
Examination of public policies designed to protect the human and physical environment; focus on the ways science and technology can simultaneously create new environmental problems and contribute to their mitigation and prevention.

IAFF 6153. Science, Technology, and National Security. 3 Credits.
The contributions of science and technology to U.S. security in military, intelligence, and homeland security activities.

IAFF 6157. International Science and Technology Policy Capstone Workshop. 1 Credit.
First course in a two-semester sequence. Second-year students in the MA in international science and technology policy program work in groups on a project addressing a policy problem or issue in international affairs. Restricted to students in the international science and technology policy program.

IAFF 6158. Special Topics in International Science and Technology Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6159. ISTP Capstone Project. 3 Credits.
A seminar designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to MA candidates in science and technology policy.

IAFF 6160. Defense Policy and Program Analysis. 3 Credits.
Examination of how national security policy is formulated and translated into a defense budget, program priorities, and force structure. Focus on nuclear forces.

IAFF 6161. International Security. 3 Credits.
Survey of the field of international security studies; overview of key concepts, theories, and approaches; inter-state, intra-state, and transnational security problems and the interrelated nature of these categories; analysis of security topics such as great-power relations, arms racing and arms control, crisis management, civil wars, terrorism, and gender, combined with a review of regional developments; non-military issues that have major security implications, including poverty, health, population movements, energy consumption, and climate change; the role of international organizations in promoting international security, and prospects for the future. Restricted to students in the MA in security policy studies program.

IAFF 6162. Security Policy Analysis. 3 Credits.
Key components of security policy and the decision making behind them. Restricted to students in the MA in security policy studies program.

IAFF 6163. Transnational Security. 3 Credits.
Overview of security concerns that transcend state borders, including terrorism, drug trafficking, organized crime, weapons proliferation, migration, and environmental degradation.

IAFF 6165. Fundamentals of Intelligence. 3 Credits.
The institutional structure of the intelligence community; the intelligence production cycle, including tasking, collection, analysis, covert action, and counterintelligence; and relations between the intelligence and policy communities.
IAFF 6167. Defense Policy and Program Analysis II. 3 Credits.
Analysis of the development of national security policy and analytic techniques to derive a defense program and force structure from it. Special attention to general-purpose forces.

IAFF 6169. Homeland Security. 3 Credits.
The central missions of a homeland security agency: domestic security, emergency preparedness, technology policy, timely intelligence, counterintelligence, and preemptive actions. How the U.S. has dealt historically with internal security matters; contemporary approaches to security problems.

IAFF 6171. Introduction to Conflict Resolution. 3 Credits.
Interstate disputes, contemporary civil wars, complex political emergencies, and other forms of organized violence.

IAFF 6173. Security and Development. 3 Credits.
Consideration of the relationship between security and development reflecting the growing interest from the security field in issues that have traditionally been the purview of development, and vice versa.

IAFF 6186. Special Topics in Security Policy Studies. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6189. Security Policy Studies Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Prerequisite: students in the MA in security policy studies program.

IAFF 6198. Special Topics in International Trade and Investment Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6199. International Trade and Investment Policy Capstone. 1 Credit.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in international trade and investment policy program.

IAFF 6208. Special Topics in Global Communication. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6209. Global Communication Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in global communication program.

IAFF 6211. Master of International Policy and Practice Leadership Practicum. 3 Credits.
Major issues in international affairs confronting policymakers in the United States and around the world; the evolving nature of international leadership; how diverse actors exercise power in the international realm. Restricted to MIPP degree candidates.

IAFF 6222. Special Topics in International Policy and Practice. 3 Credits.
Topics vary by semester. May be repeated for credit provided the topic differs. See school for more details.

IAFF 6302. Taiwan: Internal Development and Foreign Policy. 3 Credits.
The social, political, and economic development in Taiwan since World War II; Taiwan's foreign affairs.

IAFF 6305. U.S.-South Asia Relations. 3 Credits.
The nature of challenges and opportunities facing the South Asia region and the U.S. policy response. The rise of India as a global actor; relations between India and Pakistan; political transformation in the countries of the region, including Nepal and Sri Lanka.

IAFF 6308. International Relations of South Asia. 3 Credits.

IAFF 6318. Special Topics in Asian Studies. 0-3 Credits.
Topics announced in Schedule of Classes.

IAFF 6321. European and Eurasian Studies Cornerstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Restricted to students in the MA in European and Eurasian studies program or with permission of the instructor.

IAFF 6339. European and Eurasian Studies Capstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Restricted to students in the MA in European and Eurasian studies program or with permission of the instructor.

IAFF 6341. Latin American and Hemispheric Studies Cornerstone. 3 Credits.
Multidisciplinary foundation course for the Latin American and hemispheric studies program.

IAFF 6342. Drug Trafficking in the Americas. 3 Credits.
A historical, comparative, and contemporary picture of drug trafficking in the Americas and the anti-narcotics policies to combat this trade.

IAFF 6343. Indigenous Social Movements. 3 Credits.

IAFF 6357. Pre-Capstone Workshop. 1 Credit.

IAFF 6358. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6359. Latin American and Hemispheric Studies Capstone. 3 Credits.
A project-oriented course, designed to apply the skills and synthesize the knowledge that students have acquired in their graduate study. Restricted to students in the MA in Latin American and hemispheric studies program.
IAFF 6361. Middle East Studies Cornerstone. 3 Credits. 
Multidisciplinary foundation course for the Middle East studies program. Introduction to key issues.

IAFF 6362. Regional Security in Middle East. 3 Credits. 
The nature, elements, and future of security in the Middle East region. Various analytical frameworks are examined to consider the interplay of national interests, ideology, and regionalism. Issues in regional security.

IAFF 6363. Political Economy of the Middle East. 3 Credits. 
Current political economy of the Middle East, including an overview of Islamic economic concepts and political organizations.

IAFF 6364. Religion and Society in the Modern Middle East. 3 Credits. 
Comparative overview, both historical and current, of religious and social trends in the Middle East.

IAFF 6377. Middle East Studies Program Capstone Workshop. 1 Credit. 
First course in a two-semester sequence. Second-year students in the MA in the Middle East studies program work in groups on a project addressing a policy problem or issue in international affairs. Restricted to students in the MA in Middle East studies program.

IAFF 6378. Special Topics in Middle East Studies. 0-3 Credits. 
Topics announced in the Schedule of Classes.

IAFF 6379. Middle East Studies Capstone. 3 Credits. 
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Restricted to students in the MA in Middle East studies program.

IAFF 6501. Quantitative Analysis for International Affairs Practitioners. 3 Credits. 
Overview of quantitative measurement, data summary, statistical inference, and elementary modeling such as linear regression.

IAFF 6502. Professional Skills I. 1 Credit. 
Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6503. Professional Skills II. 1 Credit. 
Continuation of IAFF 6502. Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6504. Intermediate Conversation. 1 Credit. 
Short courses designed to develop professional language skills for international affairs students. Specific languages announced in the Schedule of Classes.

IAFF 6505. Elliott School Seminars. 0-3 Credits. 
Topics announced in the Schedule of Classes.

IAFF 6515. Graduate Internship in International Affairs. 0 Credits. 
Internship and research paper involving experience at an international organization or with international issues. Restricted to MA candidates in the Elliott School.

IAFF 6516. Independent Study and Research. 1-3 Credits. 
Limited to Elliott School M.A. degree candidates. Written permission of instructor required.

IAFF 6517. Independent Study and Research. 1-3 Credits.

IAFF 6521. U.S. Foreign Policy Summer Program. 3-4 Credits. 
The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues.

IAFF 6898. Capstone Workshop. 2 Credits. 
First part of two-semester sequence that addresses a concrete policy problem or issue in international affairs. In small teams, students refine the policy question of the capstone project, develop a research strategy, select appropriate research methods, and begin research. Continued in IAFF 6899.

IAFF 6899. Capstone Course. 2 Credits. 
Second part of a two-semester sequence. Completion of the capstone sequence by conduct of the group’s research, completion of the capstone report, and oral presentation of research findings and recommendations. Prerequisite: IAFF 6898.

IAFF 6998. Thesis. 3 Credits. 
Restricted to MA candidates in the Elliott School who have selected the thesis option.

IAFF 6999. Thesis. 3 Credits. 
Open to Elliott School MA candidates who have selected the thesis option.

UNDERGRADUATE PROGRAMS

Bachelor’s programs

- Bachelor of Arts with a major in Asian studies (p. 717)
- Bachelor of Arts with a major in international affairs (p. 724)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 735)
- Bachelor of Arts with a major in Middle East studies (p. 742)

Minors

- Minors (p. 749)
BACHELOR OF ARTS WITH A MAJOR IN ASIAN STUDIES

GENERAL REQUIREMENTS

General Requirements
Elliott School bachelor’s degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor’s degree in a timely manner.

**Humanities/creative Arts (9 credits)**

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

- Humanities–two or three of the following:
  - Any Art History (AH) course except AH 4199.
  - CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts
  - Any non-language Classical Studies (CLAS) course.
  - Any Film Studies (FILM) course.
  - IAFF 2190W Special Topics (Dissent: A Study in Memoirs)
  - MUS 1103 Music in the Western World
  - MUS 1104 Topics in Music
  - MUS 1105 Introduction to Musical Thought and Practice
  - MUS 1107 Music of the World
  - MUS 1108 History of Jazz
  - MUS 2101 Harmony
  - MUS 2105 Introduction to Ethnomusicology
  - MUS 2106 Music History III: Twentieth-Century Art Traditions
  - MUS 2122 Music in the U.S.
  - MUS 2123 Musical Cultures of Black Americans

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 708).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language .

Related coursework (9 credits)

Three courses related to Asia from any discipline, including International Affairs (IAFF), selected with the approval of the program director.

**Study abroad**

Students are encouraged to study in Asia through one of GW’s formal partnerships with a regional university or an approved self-designed study abroad program.

---

**BACHELOR OF ARTS WITH A MAJOR IN INTERNATIONAL AFFAIRS**

**GENERAL REQUIREMENTS**

**General Requirements**

Elliott School bachelor’s degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor’s degree in a timely manner.

**Introduction to the major**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IAFF 1001</td>
<td>First-Year Experience</td>
<td></td>
</tr>
</tbody>
</table>

**Prerequisite core (19 credits)**

**Required**

The following courses must be taken in the first year. With the exception of ECON 1011 (fall) and ECON 1012 (spring), courses may be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

<table>
<thead>
<tr>

<tr>
<td>GEOG 1001</td>
<td>Introduction to Human Geography</td>
<td></td>
</tr>
</tbody>
</table>

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student’s academic pursuits. Examples of courses that might be accepted include ANTH 1004, GEOG 1003.

### Supporting courses in the liberal arts

#### Code | Title                                                      | Credits |
--- |------------------------------------------------------------|---------|
**Writing (10 credits)**

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student’s major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a "W" appended to the course number, e.g., HIST 2340W.

**Required**

- UW 1020 University Writing

**Two WID courses (6 credits)**

#### Mathematics or statistics (3 credits)

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see “Major Requirements.”)

**One of the following:**

- MATH 1007 Mathematics and Politics
- MATH 1009 Mathematical Ideas I
- MATH 1010 Mathematical Ideas II
- MATH 1051 Finite Mathematics for the Social and Management Sciences
- MATH 1221 Calculus with Precalculus II
- MATH 1231 Single-Variable Calculus I
- MATH 1232 Single-Variable Calculus II
- MATH 1252 Calculus for the Social and Management Sciences
- MATH 2233 Multivariable Calculus
- STAT 1051 Introduction to Business and Economic Statistics
- STAT 1053 Introduction to Statistics in Social Science
- STAT 1111 Business and Economic Statistics I
- STAT 1127 Statistics for the Biological Sciences
- STAT 2112 Business and Economic Statistics II
- STAT 2118 Regression Analysis

**Science (3 to 4 credits), lab required**

One of the following:

- ANTH 1001 Biological Anthropology
- ANTH 3412 Hominin Evolution
- ASTR 1001 Stars, Planets, and Life in the Universe
- ASTR 1002 Origins of the Cosmos
- BISC 1005 The Biology of Nutrition and Health
- BISC 1006 The Ecology and Evolution of Organisms
- BISC 1007 Food, Nutrition, and Service
- BISC 1008 Understanding Organisms through Service Learning
- BISC 1115 & BISC 1125 Introductory Biology: Cells and Molecules and Introduction to Cells and Molecules Laboratory
- BISC 1116 & BISC 1126 Introductory Biology: The Biology of Organisms and Introduction to Organisms Laboratory
- CHEM 1003 Contemporary Science for Nonscience Majors

**Humanities/creative Arts (9 credits)**

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

**Humanities—two or three of the following:**

- Any Art History (AH) course except AH 4199.
- CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts
- Any non-language Classical Studies (CLAS) course.
- Any Film Studies (FILM) course.
- IAFF 2190W Special Topics (Dissent: A Study in Memoirs)
Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.

Creative Arts—a maximum of 3 credits from the following:

<table>

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Programs (p. 708).

Advanced Fundamentals

Advanced Fundamentals build on the Introduction to the Major (p. 724) and continue the student's education in the basic
Skills of international affairs. Fundamentals focus on central disciplines, such as economics, history, and political science, and relevant disciplines, such as anthropology and geography. In addition, students gain a broader understanding of at least two regions of the world outside of the United States.

A minimum grade of C- must be earned in all international affairs major courses. This includes advanced fundamentals, regional foundations, concentrations, and foreign language (the last course used to prove third-year proficiency.)

With the exception of WID courses, courses may not be double-counted between any international affairs requirements.

Advanced fundamental courses are divided into the following areas. Course options for each are listed below.

Research methods (3 credits)
International economics (3 or 6 credits)
Historical analysis: U.S. foreign policy (3 credits)
International and comparative politics (3 credits)
Anthropology or geography (3 credits)

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>ECON 2182 &amp; ECON 3181</td>
<td>International Macroeconomic Theory and Policy and International Trade Theory</td>
<td></td>
</tr>
</tbody>
</table>

*Students pursuing the international economics concentration must select either option two or option three.

The following courses are required as prerequisites for ECON 3181: ECON 2101 or ECON 2103; and MATH 1221 or MATH 1231 or MATH 1252.

Credit cannot be earned for both ECON 2181 and ECON 3181.

Historical Analysis: U.S. Foreign Policy (3 credits)

One of the following courses pertaining to the history of the U.S. approach to contemporary international affairs:

<table>
<thead>
<tr>

Concentration

A concentration represents an academic and professional specialization within the field of international affairs. Students select and complete one of the functional or regional concentrations listed below.

- Concentrations consist of five courses (15 credits) relating to the functional or regional themes below.
- Concentrations must consist of courses from at least two different academic departments (e.g., students cannot take five PSC courses in one concentration).
- Concentrations must be declared by completing the online Concentration Declaration Form (https://form.jotform.us/ESIA/concentration-declaration) no later than the end of second semester of the student’s sophomore year.
- With the exception of WID courses, courses may not be double-counted between any international affairs requirements.
- A minimum grade of C- must be earned in all concentration courses.

Functional Concentrations

- Conflict Resolution (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/conflict-resolution)
- Contemporary Cultures and Societies (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/contemporary-cultures-and-societies)
- Global Public Health (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/global-public-health)
- International Development (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/international-development)
- International Economics (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/international-economics)
- International Environmental Studies (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/international-environmental-studies)
- International Politics (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/international-politics)
- Security Policy (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/security-policy)

Regional Concentrations

- Africa (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/africa)
- Asia (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/asia)
- Europe and Eurasia (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/europe-and-eurasia)
- Latin America (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/latin-america)
- Middle East (http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/middle-east)

Foreign Language Requirement

Students must demonstrate third-year proficiency in a modern foreign language by examination or coursework. Additional information regarding the Elliott School foreign language examinations is available from the academic advisor. This requirement is waived automatically for students who were required to take the TOEFL or IELTS examination as part of GW’s admissions process.

**BACHELOR OF ARTS WITH A MAJOR IN LATIN AMERICAN AND HEMISPHERIC STUDIES**

**GENERAL REQUIREMENTS**

**General Requirements**

Elliott School bachelor’s degrees engage students with global issues through multidisciplinary and interdisciplinary approaches. Students begin their studies in the first year with foundational courses in political science, economics, history, and anthropology or geography. They supplement these courses with others in the traditional liberal arts categories of writing, natural or physical science, mathematics or statistics, and the humanities/creative arts, plus two writing in the disciplines courses. Foreign language study also is emphasized early in each program to enable students to satisfy the third-year language proficiency requirement of the bachelor’s degree in a timely manner.
### Introduction to the major

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>

**Prerequisite core (19 credits)**

**Required**

The following courses must be taken in the first year. With the exception of ECON 1011 (fall) and ECON 1012 (spring), courses may be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

- IAFF 1001 First-Year Experience
- IAFF 1005 Introduction to International Affairs
- ECON 1011 Principles of Economics I
- ECON 1012 Principles of Economics II
- HIST 1011 World History, 1500-Present
- PSC 1001 Introduction to Comparative Politics

One of the following (not required in the first year):

- ANTH 1002 Sociocultural Anthropology
- GEOG 1001 Introduction to Human Geography

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student’s academic pursuits. Examples of courses that might be accepted include ANTH 1004, GEOG 1003.

### Supporting courses in the liberal arts

<table>
<thead>
<tr>
<th>Code</th>

</thead>
</table>

**Writing (10 credits)**

Writing requirements are established by the University Writing Program. Students must complete UW 1020 in their first year before enrolling in a Writing in the Discipline (WID) course for WID credit. The two required WID courses should be taken in the student’s major, minor, or a related field, and must be completed in separate semesters to receive WID credit. WID courses are designated in this Bulletin with a “W” appended to the course number, e.g., HIST 2340W.

**Required**

- UW 1020 University Writing

Two WID courses (6 credits)

**Mathematics or statistics (3 credits)**

MATH courses numbered 1051 and above require a placement test. Credit for only one of the following MATH courses may be applied toward a degree: MATH 1221, MATH 1231, or MATH 1252. Credit for only one of the following STAT courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127. STAT courses may not be double-counted between the Mathematics requirement and the Research Methods requirement (see “Major Requirements.”)

**One of the following:**

- MATH 1007 Mathematics and Politics
- MATH 1009 Mathematical Ideas I
- MATH 1010 Mathematical Ideas II
- MATH 1051 Finite Mathematics for the Social and Management Sciences
- MATH 1221 Calculus with Precalculus II
- MATH 1231 Single-Variable Calculus I
- MATH 1232 Single-Variable Calculus II
- MATH 1252 Calculus for the Social and Management Sciences
- MATH 2233 Multivariable Calculus
- STAT 1051 Introduction to Business and Economic Statistics
- STAT 1053 Introduction to Statistics in Social Science
- STAT 1111 Business and Economic Statistics I
- STAT 1127 Statistics for the Biological Sciences
- STAT 2112 Business and Economic Statistics II
- STAT 2118 Regression Analysis

**Science (3 to 4 credits), lab required**

**One of the following:**

- ANTH 1001 Biological Anthropology
- ANTH 3412 Hominin Evolution
- ASTR 1001 Stars, Planets, and Life in the Universe
- ASTR 1002 Origins of the Cosmos
- BISC 1005 The Biology of Nutrition and Health
- BISC 1006 The Ecology and Evolution of Organisms
- BISC 1007 Food, Nutrition, and Service
- BISC 1008 Understanding Organisms through Service Learning

**TRDA 1015** | Understanding the Dance |
| **TRDA 1020** | Women and the Creative Process |
| **TRDA 1025** | Understanding the Theatre |
Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.

Creative Arts—a maximum of 3 credits from the following:

ENGL 1210 Introduction to Creative Writing
ENGL 2460 Fiction Writing
ENGL 2560 Intermediate Fiction Writing
ENGL 3390 Topics in Creative Writing
Any Fine Arts (FA) course.

Non-ensemble performance study (MUS) courses, including:

MUS 1101 Elements of Music Theory
MUS 1102 Comprehensive Musicianship I
MUS 1106 Introduction to Musical Performance and Experience
MUS 2102 Comprehensive Musicianship II
MUS 2134 Composition
MUS 2173 Comprehensive Musicianship for Jazz
MUS 4184 Advanced Composition

Performance Study Courses (TRDA), including:

TRDA 1035 Theatre Production
TRDA 1151 Beginning/Intermediate Ballet
TRDA 1152 Beginning Modern/Postmodern Dance
TRDA 1153 Beginning/Intermediate Modern/Postmodern Dance
TRDA 1170 & TRDA 1171 Intermediate Modern/Postmodern Dance I and Intermediate Modern/Postmodern Dance II
TRDA 1214 Beginning Acting
TRDA 1330 Basics of Production Design
TRDA 2160 Intermediate Ballet
TRDA 2172 Intermediate/Advanced Modern/Postmodern Dance I
TRDA 2173 Intermediate/Advanced Modern/Postmodern Dance II
TRDA 2179 Contact Improvisation
TRDA 2180 Movement Improvisation/Performance
TRDA 2192 Repertory/Performance
TRDA 2193 & TRDA 2194 Dance Styles I and Dance Styles II
TRDA 2215 Intermediate Acting
TRDA 2250 Dramatic Writing
TRDA 2339 Theatre Practicum
TRDA 3174 Advanced Modern/Postmodern Dance I
TRDA 3175 Advanced Modern/Postmodern Dance II
TRDA 3182 & TRDA 3183 Dance Composition I and Dance Composition II
TRDA 3186 Embodied Kinesis for Dance
TRDA 3222 Topics in Advanced Acting
TRDA 3240 Introduction to Dramaturgy
TRDA 3250 Intermediate Dramatic Writing
TRDA 3331 Introduction to Lighting
TRDA 3332 Theatrical Makeup Design
TRDA 3333 Stage Management
TRDA 3335 Introduction to Scene Design
TRDA 3336 Introduction to Costuming
TRDA 4184 Choreography and Performance
TRDA 4275 Directing for the Theatre
TRDA 4338 Scene Painting

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**Note that MUS 2661 is a prerequisite to MUS 2662.
**MAJOR REQUIREMENTS**

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 708).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language.

**Major Requirements**

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 708).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language.

If a student wishes to take any course not listed here, prior approval of the Program Director is required.

</table>

*Credit for only one of the following courses may be applied toward a degree: STAT 1051, STAT 1053, STAT 1111, or STAT 1127.

STAT courses may not be double-counted between the Math requirement and the research methods requirement.

**Latin American Literature (3 credits)**

One course from the following. Another literature course at the 3000- or 4000-level may be substituted with the approval of the Program Director.

<table>

</tbody>
</table>
Multi-disciplinary core (21 credits)

History (3 credits)
One course from the following:

HIST 3701  Topics in Latin American History
HIST 3710  History of Latin America I
HIST 3711  History of Latin America II

Political Science (3 credits)
One course from the following:

PSC 2383  Comparative Politics of Latin America
PSC 2484  International Relations of Latin America

Economics (3 credits)
Required:

ECON 2151  Economic Development

Geography (3 credits)
Required:

GEOG 3161  Geography of Latin America

Anthropology (3 credits)

ANTH 3702  Anthropology of Latin America

Students may request to use other 3000-level anthropology courses with Latin American content but this must be approved by the Program Director

International Affairs (6 credits)
Two courses from the following:

IAFF 3183  Special Topics in Development Policy (Post Disaster Development: Haiti)
IAFF 3187  Special Topics in Latin American and Hemispheric Studies

Undergraduate students may be able to enroll in Latin American and Hemispheric Studies graduate courses with instructor approval.

Related Coursework (6 credits)

Two courses related to Latin America from any discipline, including International Affairs (IAFF), selected with the approval of the Program Director.

Study abroad

Students are encouraged to study in Latin America through one of GW’s formal partnerships with a regional university or an approved self-designed study abroad program.

*B Program Director approval is required for PORT 4800 or SPAN 4800 Independent Study courses.

BACHELOR OF ARTS WITH A MAJOR IN MIDDLE EAST STUDIES

GENERAL REQUIREMENTS

Introduction to the major

Prerequisite core (19 credits)

Required

The following courses must be taken in the first year. With the exception of ECON 1011 (fall) and ECON 1012 (spring), courses may be taken in fall or spring. IAFF 1001 is not required for internal or external transfer students.

IAFF 1001  First-Year Experience
IAFF 1005  Introduction to International Affairs
ECON 1011  Principles of Economics I
ECON 1012 Principles of Economics II
HIST 1011 World History, 1500-Present
PSC 1001 Introduction to Comparative Politics
One of the following (not required in the first year):
ANTH 1002 Sociocultural Anthropology
GEOG 1001 Introduction to Human Geography

With advisor approval, a student may select another introductory social science course if s/he can demonstrate why it is relevant to the student's academic pursuits. Examples of courses that might be accepted include ANTH 1004, GEOG 1003.

**Humanities/creative Arts (9 credits)**

This requirement can be satisfied by completing 9 credits in humanities courses, or 6 credits in humanities courses and 3 credits in creative arts courses.

Humanities—two or three of the following:

- Any Art History (AH) course except AH 4199.
- CAH 1090 Art History I: Art Now, Contemporary Perspectives in the Visual Arts
- Any non-language Classical Studies (CLAS) course.
- Any Film Studies (FILM) course.
- IAFF 2190W Special Topics (Dissent: A Study in Memoirs)
- MUS 1103 Music in the Western World
- MUS 1104 Topics in Music
- MUS 1105 Introduction to Musical Thought and Practice
- MUS 1107 Music of the World
- MUS 1108 History of Jazz
- MUS 2101 Harmony
- MUS 2105 Introduction to Ethnomusicology
- MUS 2106 Music History III: Twentieth-Century Art Traditions
- MUS 2122 Music in the U.S.
- MUS 2123 Musical Cultures of Black Americans
- MUS 2174 Introduction to Jazz Harmony
- MUS 2661 Electronic and Computer Music I
- MUS 2662 Electronic and Computer Music II
- MUS 3126 Music History I: Antiquity through Early Baroque
- MUS 3127 Music History II: The Tonal Era
- MUS 3139 Form and Analysis
- MUS 3174 Topics in Music Theory and Composition
- MUS 3175 Topics in Music History and Literature
- Any Philosophy (PHIL) course except PHIL 2045 and PHIL 3121.
- Any Religion (REL) course.
- TRDA 1015 Understanding the Dance
- TRDA 1020 Women and the Creative Process
- TRDA 1025 Understanding the Theatre
- TRDA 2185 Trends in Performance
- TRDA 2191 Dance History
- TRDA 2240 Play Analysis
- TRDA 3245 History of the Theatre I
- TRDA 3246 History of the Theatre II

Literature and film classes in the Departments of Classical and Near Eastern Languages and Civilizations; English; and Romance, German, Slavic Languages and Literatures also fulfill this requirement.

Creative Arts—a maximum of 3 credits from the following:
**ENGL 1210** Introduction to Creative Writing
**ENGL 2460** Fiction Writing
**ENGL 2560** Intermediate Fiction Writing
**ENGL 3390** Topics in Creative Writing

Any Fine Arts (FA) course.

Non-ensemble performance study (MUS) courses, including:
**MUS 1101** Elements of Music Theory
**MUS 1102** Comprehensive Musicianship I
**MUS 1106** Introduction to Musical Performance and Experience
**MUS 2102** Comprehensive Musicianship II
**MUS 2134** Composition
**MUS 2173** Comprehensive Musicianship for Jazz
**MUS 4184** Advanced Composition

Performance Study Courses (TRDA), including:
**TRDA 1035** Theatre Production
**TRDA 1151** Beginning/Intermediate Ballet
**TRDA 1152** Beginning Modern/Postmodern Dance
**TRDA 1153** Beginning/Intermediate Modern/Postmodern Dance
**TRDA 1170** Intermediate Modern/Postmodern Dance I
**TRDA 1171** Intermediate Modern/Postmodern Dance II
**TRDA 1214** Beginning Acting
**TRDA 1330** Basics of Production Design
**TRDA 2160** Intermediate Ballet
**TRDA 2172** Intermediate/Advanced Modern/Postmodern Dance I
**TRDA 2173** Intermediate/Advanced Modern/Postmodern Dance II
**TRDA 2179** Contact Improvisation
**TRDA 2180** Movement Improvisation/Performance
**TRDA 2192** Repertory/Performance
**TRDA 2193** Dance Styles I
**TRDA 2194** Dance Styles II

**TRDA 2215** Intermediate Acting
**TRDA 2250** Dramatic Writing
**TRDA 2339** Theatre Practicum
**TRDA 3174** Advanced Modern/Postmodern Dance I
**TRDA 3175** Advanced Modern/Postmodern Dance II
**TRDA 3182 & TRDA 3183** Dance Composition I and Dance Composition II
**TRDA 3186** Embodied Kinesis for Dance
**TRDA 3222** Topics in Advanced Acting
**TRDA 3240** Introduction to Dramaturgy
**TRDA 3250** Intermediate Dramatic Writing
**TRDA 3311** Introduction to Lighting
**TRDA 3332** Theatrical Makeup Design
**TRDA 3333** Stage Management
**TRDA 3335** Introduction to Scene Design
**TRDA 3336** Introduction to Costuming
**TRDA 4184** Choreography and Performance
**TRDA 4275** Directing for the Theatre
**TRDA 4338** Scene Painting

*Some MUS and TRDA courses may be repeated for credit. Consult course descriptions in this Bulletin for additional information. All courses must be taken for a letter grade to fulfill this requirement. Courses taken Pass/No Pass are not accepted.

**MAJOR REQUIREMENTS**

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 708).

A minimum grade of C- must be earned in all major requirement courses, to include the last course used to prove third-year proficiency in a modern regional language.

If a student wishes to take any course not listed here, prior approval of the Program Director is required.

</tr>
</tbody>
</table>

**Related Coursework (6 credits)**

Two courses related to the Middle East from any discipline, including International Affairs (IAFF), selected with the approval of the Middle East Studies program director.

**Study abroad**

Students are encouraged to study in the Middle East through one of GW’s formal partnerships with a regional university or an approved self-designed study abroad program.

**MINORS**

**Requirements for the minor**

The following requirements must be fulfilled: 18 to 21 credits and 0 to 8 credits of foreign language, as outlined below.

A minimum grade of C- is required in all courses taken to satisfy the minor.

**Foreign language**

Students must prove first-year proficiency in a modern foreign language through coursework or examination. Additional
information regarding the Elliott School foreign language examinations is available from the academic advisor.

**Advanced fundamentals**

**International Economics (3 or 6 credits)**

One or two of the following courses pertaining to the theory of international economics:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>option one (3 credits):</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 2180</td>
<td>Survey of International Economics</td>
<td></td>
</tr>
<tr>
<td>option three (6 credits):</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 2181 &amp; ECON 2182</td>
<td>International Trade Theory and Policy and International Macroeconomic Theory and Policy</td>
<td></td>
</tr>
<tr>
<td>option three (6 credits)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 2182 &amp; 2182</td>
<td>International Macroeconomic Theory and Policy</td>
<td></td>
</tr>
</tbody>
</table>

*Students pursuing the international economics concentration must select either Option Two or Option Three.

The following courses are required as prerequisites for ECON 3181: ECON 2101 or ECON 2103; and MATH 1221 or MATH 1231 or MATH 1252.

Credit cannot be earned for both ECON 2181 and ECON 3181.

**Historical Analysis: U.S. Foreign Policy (3 credits)**

One of the following courses pertaining to the history of the U.S. approach to contemporary international affairs.
<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 2340</td>

GRADUATE PROGRAMS

Master's programs

• Master of Arts in the field of Asian studies (p. 754)
• Master of Arts in the field of European and Eurasian studies (p. 762)
• Master of Arts in the field of global communication (p. 769)
• Master of Arts in the field of international affairs (p. 779)
• Master of Arts in the field of international development studies (p. 781)
• Master of Arts in the field of international science and technology policy (p. 795)
• Master of Arts in the field of international trade and investment policy (p. 798)
• Master of Arts in the field of Latin American and hemispheric studies (p. 800)
• Master of Arts in the field of Middle East studies (p. 806)
• Master of Arts in the field of security policy studies (p. 815)
• Master of International Policy and Practice (p. 818)
• Master of International Policy and Practice - Online (http://bulletin.gwu.edu/international-affairs/graduate-programs/international-policy-practice-online)
• Master of International Studies (p. 819)

Combined programs

• Dual Master of Arts in any ESIA graduate program and Master of Public Health (http://bulletin.gwu.edu/public-health/dual-ma-esia-mph)
• Joint Master of Arts and Juris Doctor (p. 835)
• Joint Master of Arts in Elliott School programs and Master of Business Administration (p. 835)

MASTER OF ARTS IN THE FIELD OF ASIAN STUDIES

The master of arts in Asian studies curriculum prepares students to keep pace with a region on the path to sustained economic development as urban migration and international trade are exploding. Graduates of the program are equipped to address complex diplomatic, economic, security, and cultural issues coupled with an unprecedented rate of growth.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
9 credits in elective courses. Students may use elective credits for foreign language, background coursework, or 1-credit skills courses.

Skills courses

Skills courses are designed to supplement substantive graduate coursework with practical skills and knowledge that students need to perform effectively in the workplace. A maximum of three one-credit skills courses may be taken as electives.

<table>

</tr>
</tbody>
</table>

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may, with permission of the Program Director, be used to fulfill program requirements.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses), the capstone (https://elliott.gwu.edu/global-capstone), and the thesis (https://elliott.gwu.edu/thesis) is available on the Elliott School website.
**Foreign language proficiency requirement**

Students in the Asian studies program are required to demonstrate proficiency in a modern language other than English by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.

**MASTER OF ARTS IN THE FIELD OF EUROPEAN AND EURASIAN STUDIES**

The master of arts in European and Eurasian Studies (EES) program provides an interdisciplinary approach to understanding these important regions. The EES curriculum combines several required courses with a wide variety of additional courses and optional fields that can be selected to suit an individual student’s professional goals and intellectual interests. This multifaceted program encompasses academic approaches to European and Eurasian affairs and develops practical analytical skills that are essential in the professional world of international affairs.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://elliott.gwu.edu/european-and-eurasian-studies) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 40 credits, including 15 credits in core courses, a 3-credit cornerstone course, a 3-credit capstone sequence, a 3-credit course in international economics, a 1-credit skills workshop, 9 credits in a professional specialization, and 6 credits in elective courses. In addition, all students must fulfill a language requirement (see below).

See note regarding special topics, professional skills, and LAW courses.1

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

1 Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses) and the capstone
is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (http://www.law.gwu.edu) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in LAW courses.

2 Consult the Graduate School of Education and Human Development (https://gsehd.gwu.edu) for course availability and additional courses.

3 Consult the Milken Institute School of Public Health (https://publichealth.gwu.edu) for course availability and additional courses.

Foreign language proficiency requirement
Students in the European and Eurasian studies program are required to demonstrate proficiency in a modern language other than English by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.

MASTER OF ARTS IN THE FIELD OF GLOBAL COMMUNICATION

Offered jointly by GW’s Elliott School of International Affairs and the Columbian College of Arts and Sciences’ School of Media and Public Affairs (http://www.gwu.edu/~smpa) (SMPA), the master of arts in the field of global communication degree program combines the Elliott School’s academic excellence in international affairs with SMPA’s strengths as a school of communication and journalism. The graduate program trains students to understand the complex global information environment; its implications for governance, security, and business; and how to communicate effectively to global audiences.

A core curriculum focuses on communication, international politics, international economics, and research methods. Required skills courses cover topics such as developing communication strategies, cross-cultural communication, public speaking, and editing. Students also choose one of twelve specializations to build expertise on a major world region or global issue. In the final year, a capstone course tests students’ ability to address a real-world problem using the skills and knowledge acquired during their course of study. The rigorous academic program prepares students both intellectually and professionally for careers in the public, private, and nonprofit sectors.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/global-communication) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 15 credits in core field courses, a 4-credit capstone course sequence, 3 credits in skills courses, 9 credits in a specialization, and 9 credits in elective courses. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics and skills courses, the capstone, the additional thesis option, and LAW courses.*

Electives (9 credits)

9 credits in elective courses relating to international affairs or communication selected with approval of the Program Director. With Program Director approval, graduate students can apply a maximum of 6 credits of language courses toward the electives.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credit is counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998  
Thesis

IAFF 6999  
Thesis

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses), the capstone (https://elliott.gwu.edu/global-capstone), and the thesis (https://elliott.gwu.edu/thesis) is available on the Elliott School website.

Law School courses—Students may, with permission of their advisor, include courses in the Law School (http://www.law.gwu.edu) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in LAW courses.

Foreign language proficiency requirement

Students in the master of arts in the field of global communication program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School’s master’s degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student’s expense, while enrolled in the Elliott School’s Master’s Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (https://elliott.drupal.gwu.edu/international-affairs-masters/foreign-language/#skills) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School’s non-regional studies master’s programs with a foreign language requirement. Consult the Program Director for more information.
MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS

The Elliott School’s master of arts in the field of international affairs degree program is designed to provide students with a broad understanding of the contemporary issues in international affairs as they develop in-depth knowledge of at least one or more areas of specialization. For their concentration, students may choose from among several fields of global issues or one of the regions of the world. Graduates of the program have pursued exciting careers in diplomacy and public service, business, security, conflict resolution, development, and public health.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://elliott.gwu.edu/international-affairs-masters) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 9 to 12 credits in core field courses, 3 credits in skills courses, 12 credits in a thematic or regional concentration, a 4-credit capstone course sequence, and 9 to 12 credits in elective courses. In addition, students must fulfill a foreign language proficiency requirement (see below).

See note regarding skills courses, the capstone, and the additional thesis option.*

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

ECON 6280 is designed for students who have little background in economics. Those with a stronger prior background in economics may wish to substitute ECON 6280 with the ECON 6283 and ECON 6284 sequence for 6 credits. The ECON 6283 and ECON 6284 sequence is required for the international economic affairs concentration.

Skills courses (3 credits)

Three 1-credit professional skills courses in any combination from the following:

<table>

<td>Professional Skills II</td>
<td></td>
</tr>
</tbody>
</table>

Concentration (12 credits)

Students must complete a thematic or regional concentration in consultation with the Program Director.

Capstone (4 credits)

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. Students must have completed at least 18 credits of coursework prior to starting the capstone sequence. The two 2-credit capstone courses must be taken consecutively.

</tbody>
</table>

Electives (9 to 12 credits)

Three to four elective courses, which may include up to 6 credits of foreign language study, a second field of expertise, or other relevant coursework. Students are strongly encouraged to take IAFF 6501 or its equivalent.

*Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses), the capstone (https://elliott.gwu.edu/global-capstone), and the thesis
Concentrations

Students in the master of arts in the field of international affairs program must complete a concentration by taking at least four courses (12 credits) selected from one of thematic or regional concentrations listed below. Specific requirements are listed under the "Concentrations" tab. Students are encouraged to discuss their course selections with their faculty adviser.

Thematic concentrations:

- Conflict and Conflict Resolution (http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/conflict-and-conflict-resolution)
- Global Energy and Environmental Policy (GEEP) (http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-energy-and-environmental-policy)
- Global Gender Policy (http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-gender-policy)
- Global Health (http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/global-health)

- Middle East (http://bulletin.gwu.edu/international-affairs/graduate-programs/ma-international-affairs/middle-east)

Foreign language proficiency requirement

Students in the master of arts in the field of international affairs program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School’s master’s degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master’s program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student’s expense, while enrolled in the Elliott School’s Master’s Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (https://elliott.drupal.gwu.edu/international-affairs-masters/foreign-language/#skills) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School’s non-regional studies master’s programs with a foreign language requirement. Consult the Program Director for more information.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL DEVELOPMENT STUDIES

The master of arts in the field of international development studies (IDS) degree program prepares students for professional careers in the field of international development through interdisciplinary coursework that includes the study of economics, research methods, policy analysis, and management. Students focus their studies by choosing from a list of specialization options or by creating their own area of specialization in coordination with the program director.

The IDS program culminates in a capstone project where students work on a real-world consulting experience with a development organization. In past years, capstone projects have addressed a broad range of topics, including private sector development, rural education, microfinance, HIV/AIDS, environmental conservation, gender-based violence, municipal planning, and many others. Teams have pursued these projects and conducted fieldwork in Africa, Asia, Latin America, and Eastern Europe.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://elliott.gwu.edu/international-development-studies) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credit capstone course sequence, 12 credits in analytical courses, 18 credits in an area of specialization. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See notes regarding special topics and professional skills courses, the capstone, and the thesis option.*

</tbody>
</table>
Area of specialization (18 credits—see below for potential areas of specialization and associated courses)

Capstone (4 credits)

Students are required to complete a two-semester capstone sequence that involves collaboration on a project of mutual interest and research in international development with sponsoring institutions outside the University. The capstone sequence includes a 1-credit pre-capstone course that must be taken in the fall of the student's second or third year and a 3-credit capstone course that must be taken in the spring of the student's second or third year. Both courses in the capstone sequence must be taken consecutively.

IAFF 6137 Development Studies Pre-Capstone Workshop

IAFF 6139 International Development Studies Capstone

Professional skills courses

The Elliott School offers a series of one-credit workshops on a variety of topics. Students are encouraged to consider taking up to three of these skills courses. Up to 3 credits of professional skills courses can be applied to the specialization.

Additional thesis option

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

IAFF 6998 Thesis

IAFF 6999 Thesis

Analytical courses (12 credits)

<table>

</table>

Students must take one course in each of the four following areas to fulfill this requirement. All courses for this requirement must be completed by the end of the third semester to fully prepare students for the capstone project in their final semester.

Economics (taken during the first semester)

Management

Research methods

A choice between policy analysis or a second course in research methods

### Areas of specialization (18 credits)

In consultation with the program director, students choose from a list of pre-designed specializations or design their own area of specialization based on their interests and career goals. Courses and areas of specialization listed should be treated as illustrative examples, not requirements. Up to 3 credits of professional skills courses can be applied to the specialization. Students are strongly encouraged to select courses offered by schools throughout the University as well as approved courses offered by other institutions through the Consortium of Universities of the Washington Metropolitan Area.“

Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses), the capstone (https://elliott.gwu.edu/global-capstone), and the thesis (https://elliott.gwu.edu/thesis) is available on the Elliott School website.

**IAFF 6138 (Monitoring and Evaluation for Foreign Assistance) may be used as the second research methods course only in cases where a student has opted to take two research methods courses instead of one research methods and one policy analysis course.

Foreign language proficiency requirement

Students in the master of arts in the field of international development studies program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School’s master’s degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master’s program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign-language assessment institution, at the student’s expense, while enrolled in the Elliott School’s Master’s Degree Program.

- Demonstrating the required foreign language proficiency level in a foreign language professional skills course (https://elliott.gwu.edu/foreign-language-proficiency-requirement) offered through the Elliott School. The instructor tests the student during the course to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School’s non-regional studies master’s programs with a foreign language requirement. Consult the Program Director for more information.

**MASTER OF ARTS IN THE FIELD OF INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY**

Scientific and technological advances lay the platform for international competitiveness, driving the bulk of national growth and improvements in the quality of life around the world. In today’s global environment, innovation is essential for solving societal problems and staying ahead of competition. Developments in information technology, space exploration, and genetic modification, as well as advances in material science, are governed and shaped by institutions that set science and technology policy. This program equips its students to work at the forefront of policy affecting the science and technology arena.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-science-and-technology-policy) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credit capstone course sequence, 15 credits in a concentration, 6 credits in analytical competency courses, and 9 credits in elective courses.

See note regarding special topics and skills courses, the capstone, and LAW courses.*

Capstone (4 credits)

Students are required to complete a two-semester capstone sequence that involves collaboration on a project of mutual interest and research in science and technology policy. The capstone sequence includes a 1-credit pre-capstone course that must be taken in the fall of the student’s second or third year and a 3-credit capstone course that must be taken in the spring of the student’s second or third year. Both courses in the capstone sequence must be taken consecutively.

IAFF 6157 International Science and Technology Policy Capstone Workshop

IAFF 6159 ISTP Capstone Project

Concentration (15 credits)

At least five courses in one concentration. Students may choose from the following concentrations or they may design a personalized concentration in consultation with the Program Director.

A. Space Policy

EHS 6227 Introduction to Human Health in Space

IAFF 6145 U.S. Space Policy

IAFF 6146 Space Law

IAFF 6148 Space and National Security

IAFF 6153 Science, Technology, and National Security

IAFF 6158 Special Topics in International Science and Technology Policy (Issues in Space Policy)

B. Energy Policy

EMSE 6260 Energy Management

EMSE 6290 Climate Change: Policy, Impacts, and Response

IAFF 6151 Environmental Policy

IAFF 6158 Special Topics in International Science and Technology Policy (Energy Policy)

IAFF 6158 Special Topics in International Science and Technology Policy (Renewable Energy in a Decarbonizing World)

IAFF 6186 Special Topics in Security Policy Studies (Energy Security)

IAFF 6198 Special Topics in International Trade and Investment Policy (International Climate Change Policy)

C. National Security

IAFF 6118 Special Topics in International Affairs (Science of Nuclear Materials)

IAFF 6118 Special Topics in International Affairs (U.S. Foreign Policy and International Organizations)

IAFF 6118 Special Topics in International Affairs (Nuclear Weapons)

IAFF 6153 Science, Technology, and National Security

IAFF 6158 Special Topics in International Science and Technology Policy (Cybersecurity)

IAFF 6186 Special Topics in Security Policy Studies (Cyber Threats, Policy, and Strategy)

IAFF 6186 Special Topics in Security Policy Studies (Methods for Defense Analysis)

IAFF 6186 Special Topics in Security Policy Studies (Military Technology Assessment)

IAFF 6186 Special Topics in Security Policy Studies (Nuclear Security)

D. Environmental Policy

ENRP 6140 Introduction to Environmental Law

EMSE 6200 Policy Factors in Environmental and Energy Management

EMSE 6220 Environmental Management

EMSE 6240 Environmental Hazard Management

EMSE 6290 Climate Change: Policy, Impacts, and Response

GEOG 6219 Seminar: Climatology

GEOG 6220 Seminar: Climatic Change

GEOG 6222 Seminar: Resources and the Environment

</tr>
</tbody>
</table>

Other relevant courses not listed above may be substituted with the approval of the Program Director.

### Electives (9 credits)

9 credits in elective courses. Elective courses may include graduate-level courses offered through other Elliott School programs, departments in other GW schools, or a combination of the two. Up to 3 credits may be taken as professional skills courses (IAFF 6502 or IAFF 6503).

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses) and the capstone
Law School courses—Students may, with permission of their advisor, include courses in the Law School (http://www.law.gwu.edu) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in LAW courses.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL TRADE AND INVESTMENT POLICY

The master of arts (MA) in international trade and investment policy (ITIP) degree program trains students in critical areas of the economics, politics, and history of international trade as well as econometrics. The program provides additional specialized training in international economics or international business. Course work in these fields focuses on U.S. trade policy, the effects of international trade on developing countries, emerging market financial crises, and managing firms in developing countries. The program culminates in a one-semester capstone project in which students work in small teams on a contemporary policy problem.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-trade-and-investment-policy) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including 12 credits in core field courses, a 1-credit capstone course, 15 credits in elective courses, and 12 credits in a concentration. In addition, students must satisfy the program’s intermediate economics theory requirement.

Intermediate economic theory requirement

Students in the international trade and investment policy program must complete a course in both intermediate micro- and macroeconomics theory with a minimum grade of B. This requirement may be fulfilled in one of the following ways:

- Using a course completed at the undergraduate intermediate level with a minimum grade of B within 5 years of matriculation in the program. Such courses typically have titles that include microeconomics, price theory, or macroeconomics. Course titles with “principles of” or “introduction to” will not be at the required level of instruction.

- Completing ECON 6217 (https://www.gwu.edu/~bulletin/grad/econ.html#6217) or PPPA 6014 (http://bulletin.gwu.edu/arts-sciences/public-policy-administration/#coursestext), and ECON 6218 (http://bulletin.gwu.edu/arts-sciences/economics/#coursestext) at GW.

- Passing the intermediate proficiency examinations offered during the Elliott School’s fall orientation.

Ideally, students complete intermediate microeconomics before taking ECON 6283 (https://www.gwu.edu/~bulletin/grad/econ.html#6283) and intermediate macroeconomics before taking ECON 6284 (https://www.gwu.edu/~bulletin/grad/econ.html#6284).

See notes regarding special topics courses and the capstone.*

**PPPA 6014** Microeconomics for Public Policy II

**PPPA 6015** Benefit-Cost Analysis

**PPPA 6052** Tax Policy Analysis

**PPPA 6085** Special Topics in Public Policy

**PUBH 6340** Health Economics and Finance

**PUBH 6443** Global Health Agreements and Conventions

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding the capstone (https://elliott.gwu.edu/global-capstone) is available on the Elliott School website.

---

**MASTER OF ARTS IN THE FIELD OF LATIN AMERICAN AND HEMISPHERIC STUDIES**

The master of arts in Latin American and hemispheric studies (LAHS) is an interdisciplinary program which prepares students to develop innovative approaches to the enduring problems and emerging challenges of the hemisphere. This training allows graduates to grapple with an often contradictory blend of political and economic successes and failures throughout the region.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)
Visit the program website (https://elliott.gwu.edu/latin-american-studies) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 40 credits, including a 3-credit cornerstone course, 9 credits in core field courses, a 3-credit research methods course, a 4-credit capstone sequence, 12 credits in specialized field courses, and 9 credits in electives. In addition, all students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics courses, the capstone sequence, and the additional thesis option.*

**Electives (9 credits)**

9 credits in elective course, which may include up to 6 credits of Spanish language coursework (other foreign languages spoken in Latin America will be considered on a case-by-case basis) and up to 4 credits of 1-credit skills courses. Additional electives may be selected from any of the specialized fields or in other relevant areas or disciplines. Elective courses must be approved in advance by the Program Director.

**Additional thesis option**

Students who wish to complete a thesis do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum GPA of 3.5 and approval from the faculty member who will serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval. The two 3-credit thesis courses must be taken consecutively.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director. Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses), the capstone (https://elliott.gwu.edu/global-capstone), and the thesis (https://elliott.gwu.edu/thesis) is available on the Elliott School website.

**Foreign language proficiency requirement**

Students in the Latin American and hemispheric studies program are required to demonstrate proficiency in Spanish or Portuguese by passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
MASTER OF ARTS IN THE FIELD OF MIDDLE EAST STUDIES

The master of arts in the field of Middle East studies degree program combines a rigorous academic foundation with a strong professional orientation. Bridging the theory and practice of international affairs, the program prepares students for careers in government, the private sector, and international and nongovernmental organizations.

The curriculum includes a range of courses covering the history, politics, economics, international relations, and cultures of the societies and nations of the Middle East. In consultation with the program director, each student develops a program of study that, through a set of core courses, combines a broad overview of the region along with a more specialized field based on the student's specific academic and career interests. In addition, completion of the program requires demonstrated oral and reading proficiency in a language of the Middle East region.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/middle-east-studies) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including a 3-credit cornerstone course, 9 credits in core field courses, 3 credits in skills courses, a 4-credit capstone sequence, 12 credits in one professional specialization, and 9 credits in elective courses. In addition, students must fulfill a foreign language proficiency requirement (see below).

See note regarding special topics and skills courses, the capstone sequence, and LAW courses.*

12 credits from the following:

Courses are grouped into issues subcategories to help guide students in choosing appropriate coursework; students do not necessarily need to select one subcategory; however, what is important is that there is a logic and believable narrative to their course choices. Students should consult their major field faculty advisor to help with this determination.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses) and the capstone (https://elliott.gwu.edu/global-capstone) is available on the Elliott School website.

Law School courses--Students may, with permission of their advisor, include courses in the Law School (http://www.law.gwu.edu) in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School Office of Academic Advising and Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in LAW courses.

Foreign language proficiency requirement
Students in the Middle East studies program are required to demonstrate the currently-required level of proficiency in one of the following languages by passing a reading and speaking proficiency examination administered by the Elliott School: Modern Standard Arabic (taught at GW); Persian; Hebrew (taught at GW); Kurdish; or Turkish. The Elliott School administers foreign language proficiency examinations (https://elliott.gwu.edu/foreign-language-proficiency-requirement) once in the fall and once in the spring semesters. Students may take the examination at any point during their academic program. Students have three opportunities to pass the examination. Consult the Program Director for more information.

**MASTER OF ARTS IN THE FIELD OF SECURITY POLICY STUDIES**

The master of arts in the field of security policy studies (SPS) degree program is policy-oriented, focusing on international security issues, with a particular emphasis on the security challenges for the 21st century and how to respond to them. These challenges include, but are not limited to, weapons of mass destruction proliferation, transnational threats, terrorism, changing regional power dynamics, weak and failing states, international crime, effectively linking security and development, and ensuring U.S. national security.

The curriculum provides a strong grounding in the national security and defense policy making process. Students choose two specific concentrations, which can range from transnational security issues to conflict resolution to defense analysis. Students also have the option of emphasizing a particular region, such as East Asia, the Middle East, or Latin America, by selecting a regional field as one of their two concentrations.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/academics/graduate/sps) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 40 credits, including 6 credits in core field courses, a 4-credits capstone sequence, 0 to 3 credits in research tool courses, 15 credits in a specialization, 3 credits in professional skills courses, and 9 to 12 credits in electives. In addition, all students must fulfill a foreign language proficiency requirement (see below).

*See notes regarding special topics and skills courses, the capstone sequence, and the thesis option.

Research tool courses (0 to 3 credits)

Students may choose either a language or a statistical skills option to fulfill the tool requirement.

Language option–This option may be fulfilled by any of ESIA’s non-regional programs language proficiency requirements.** Students should contact their academic advisors for more information about the language proficiency requirements. Students who test out of a language have three extra credits to apply to their electives.

Statistics option–This option may be fulfilled by demonstrating proficiency with a minimum grade of B in a graduate-level statistics course. It may be met by taking one of the following:

IAFF 6198  Special Topics in International Trade and Investment Policy (Corruption, Development and Governance)

Professional skills courses (3 credits)

Three 1-credit skills courses from the following:

IAFF 6502  Professional Skills I
IAFF 6503  Professional Skills II

Electives (9 to 12 credits)

At least three substantive 3-credit courses. Students that have tested out of the tools requirement through fulfilling the language proficiency requirement will have to take a fourth 3-credit elective course.

Additional thesis option

Students wishing to continue to a PhD program or pursue a research-oriented job may consider writing a thesis, which is an independent, in-depth research project that takes a year or more to complete. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Thesis credits will be counted as elective or specialization credits with Program Director approval. Students pursuing a thesis need a minimum 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course.

IAFF 6998  Thesis
IAFF 6999  Thesis

* Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may, with permission of the Program Director, be used to fulfill program requirements.

** Foreign language proficiency requirement

Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School’s master’s degree program.
- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master’s program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student’s expense, while enrolled in the Elliott School’s Master’s Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (https://elliott.drupal.gwu.edu/international-affairs-masters/foreign-language/#skills) to determine if the required proficiency level has been achieved.

MASTER OF INTERNATIONAL POLICY AND PRACTICE

The Elliott School’s master of international policy and practice (MIPP) degree program helps international mid-career professionals develop highly marketable analytical and management skills to formulate and advocate policies on key international issues and to negotiate and work effectively in cross-cultural settings. The program also enhances knowledge of international economic, political, and social trends.

The interdisciplinary curriculum combines three core courses with a wide variety of course options that cover relevant national and international policies and provides insight into a wide range of international issues. Courses are selected to suit the student’s professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-policy-and-practice) for additional information.
REQUIREMENTS

The following requirements must be fulfilled: 27 credits, including 9 credits in required courses and 18 credits in elective courses.

Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses do not count toward the master’s degree. Students who do not have prior coursework should consult with the Program Director regarding available options.

</tr>
</tbody>
</table>

Electives

18 credits tailored to the individual student’s needs and selected in consultation with an advisor and the Program Director. May include up to 3 credits of one-credit, skills-based workshops.

Students must complete degree requirements within three years of their admission to the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the three-year period may be granted in exceptional circumstances, but the student is required to register and pay for Continuous Enrollment.

No transfer credit is accepted into the MIPP program. No more than 6 credits of graduate coursework taken at GW before matriculation in the program, while in degree or nondegree status, including courses taken in the Elliott School, may be included in the MIPP program.

Visit the MIPP program page (http://elliott.gwu.edu/international-policy-and-practice) for additional information, including a complete list of elective courses (http://elliott.gwu.edu/international-policy-and-practice/electives).

MASTER OF INTERNATIONAL STUDIES

The master of international studies is a special program open only to students who have completed or are currently enrolled in an approved master’s degree program at one of the Elliott School’s international partner schools. Students in the program take core courses in economics, history, and political science, three credits in an elective field designed with the approval of the Program Director, and a capstone sequence. Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs) Visit the program website (https://elliott.gwu.edu/international-studies-masters) for additional information.

The following requirements must be fulfilled: 28 credits, including 9 to 12 credits in core field courses, a 4-credit capstone sequence, 12 credits in a major field, and 0 to 3 credits in elective courses. In addition, all students are required to fulfill a foreign language proficiency requirement.*

See notes regarding special topics, skills, and LAW courses**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Core field (9-12 credits)</td>
<td></td>
</tr>
</tbody>
</table>
Three or four required courses in economics, history, and international affairs/political science, as described below. If the MIS candidate has taken an equivalent course at the partner institution, the student may transfer credit to satisfy that core field requirement with approval of the Program Director.

**3 credits in political science**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>IAFF 6101</td>
<td>International Affairs Cornerstone (Fall)</td>
</tr>
</tbody>
</table>

**3 credits in history**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 6030</td>
<td>History and Its Uses in International Affairs</td>
</tr>
</tbody>
</table>

**3-6 credits in economics using one of the following options:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 6280</td>
<td>Survey of International Economics</td>
</tr>
<tr>
<td>ECON 6283 &amp; ECON 6284</td>
<td>Survey of International Trade Theory and Policy and Survey of International Macroeconomics and Finance Theory</td>
</tr>
</tbody>
</table>

ECON 6280 is designed for students who have little background in economics. Those with a stronger prior background in economics may wish to substitute ECON 6280 with the ECON 6283 and ECON 6284 sequence for 6 credits. The ECON 6283 and ECON 6284 sequence is required for the international economic affairs concentration.

**Capstone (4 credits)**

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. The two 2-credit capstone courses must be taken consecutively.

**Major field (12 credits)**

Major fields in the MIS program consist of four courses (12 credits) selected from one of the global issues or regional areas listed below. Students should choose courses from more than one academic discipline to complete their major field and are encouraged to discuss these choices with the MIS Program Director. Subject matter covered in special topics courses may vary each semester. If the student has taken a related course at the partner institution, this may be transferred to satisfy as a major field course, with approval of the MIS Program Director. Requirements for the major fields are outlined below. Note that the focus of special topics courses varies by semester. Consult the Schedule of Classes for each semester’s offerings. With permission of the Program Director, other topics courses not listed here may be used to fulfill program requirements.

**Electives (0 to 3 credits)**

Students who take ECON 6280 to fulfill the core requirement must take 3 credits in elective courses, which may be selected from disciplines including anthropology; business, economics, education, history, public administration, political sciences, among others. Up to 3 credits may be taken in skills courses.

**Major fields**

**Global issues fields**

1. **Conflict and Conflict Resolution**
   - **Required course:**
     - IAFF 6171   Introduction to Conflict Resolution
   - **Supporting courses**
     - Three from the following:
       - IAFF 6118 Special Topics in International Affairs (International Law and Use of Force)
       - IAFF 6118 Special Topics in International Affairs (Nation Building: Theory and Practice)
       - IAFF 6118 Special Topics in International Affairs (Reinventing the United Nations)
       - IAFF 6118 Special Topics in International Affairs (Theory and Practice of International Negotiation)
       - IAFF 6118 Special Topics in International Affairs (US Foreign Policy and International Organizations)
       - IAFF 6138 Special Topics in International Development Studies (Culture, Violence, and Conflict Resolution)
       - IAFF 6138 Special Topics in International Development Studies (Food, Globalization, and Conflict)
       - IAFF 6186 Special Topics in Security Policy Studies (Conflict Mitigation and Resolution in Africa)
       - IAFF 6186 Special Topics in Security Policy Studies (Conflict Resolution in Divided Societies)
       - IAFF 6186 Special Topics in Security Policy Studies (Insurgency and Counterinsurgency )
       - IAFF 6186 Special Topics in Security Policy Studies (International Peacekeeping)

</tr>
</tbody>
</table>

A full listing of Middle East courses is posted in advance of each semester on the Institute for Middle East Studies website.

*Foreign language proficiency requirement*

Students in the master of international studies program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of B in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (https://elliott.gwu.edu/foreign-language-proficiency-requirement). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student’s expense, while enrolled in the Elliott School’s Master’s Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (https://elliott.drupal.gwu.edu/international-affairs-masters/foreign-language/#skills) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School’s non-regional studies master’s programs with a foreign language requirement. Consult the Program Director for more information.

**Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.**

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses) is available on the Elliott School website.

Students may, with permission of their advisor, include courses offered by the Law School in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School’s Office of Academic Advising and Student Service before enrolling in LAW courses.
JOINT MASTER OF ARTS IN THE ELLIOTT SCHOOL AND JURIS DOCTOR DEGREE

The Elliott School of International Affairs cooperates with the Law School in offering a program of study leading to the joint master of arts and juris doctor degree. A student must be accepted for admission by both the Elliott School and the Law School. Applications should be made separately to each school, with a notice of interest in the joint program. The Law School stipulates that the first year of coursework for the Juris Doctor degree must be taken as a unit; students should consult with the Law School's Associate Dean for Student Affairs.

As part of this program, each school accepts up to 12 credits of coursework from the other school in fulfillment of its degree requirements. The Elliott School MA portion of the program may not include a thesis. The joint program takes approximately four years of full-time study for completion. Joint degree students must meet all requirements for both programs and apply for graduation from both schools prior to receiving either diploma. All work for this joint degree program must be completed in five years, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS IN ELLIOTT SCHOOL PROGRAMS AND MASTER OF BUSINESS ADMINISTRATION

The Elliott School of International Affairs cooperates with the School of Business in offering a program of study leading to the degrees of master of arts (MA) and master of business administration (MBA) with a field of study in international business. The joint degree program is offered in all Elliott School MA fields (https://elliott.gwu.edu/graduate-programs), and the MBA is taken with a focus on international business (http://business.gwu.edu/programs/masters-of-business-administration). The student must be accepted for admission by both the Elliott School and the School of Business. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the joint degree program after they have begun either program.

As part of this program, each school accepts up to 12 credits of coursework from the other school in fulfillment of its degree requirements. The joint program takes approximately three years of full-time study for completion. Joint degree students must meet all requirements for each program and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in six years, unless an extension of time is granted by the respective deans.

CERTIFICATE PROGRAMS

Graduate certificate programs

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs also are open to graduate students from other universities, individuals who already have earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other MA degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate coursework taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

- Graduate certificate in global gender policy (p. 835)
- Graduate certificate in international science and technology policy (p. 836)
- Graduate certificate in nuclear policy (p. 837)

GRADUATE CERTIFICATE IN GLOBAL GENDER POLICY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://elliott.gwu.edu/graduate-certificates/global-gender-policy) for additional program information.

The following requirements must be fulfilled: 15 credits, including 3 credits in required courses and 12 credits in supporting courses. Up to 3 credits of skills courses may be applied to the supporting course requirements.

*Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (http://my.gwu.edu/mod/pws) for each semester’s offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (https://elliott.gwu.edu/professional-skills-courses) is available on the Elliott School website.

**GRADUATE CERTIFICATE IN INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY**

The graduate certificate in international science and technology policy allows students to understand the role of science and technology in policymaking and how governmental policies, laws, and regulations influence science and technology production from an international perspective. The program is designed for graduate students in related fields or professionals in government, industry, and nonprofits who wish to develop a background in science and technology policy. Students develop basic analytical skills as well as focus on a particular theme, including technology innovation, internet policy, space policy, energy policy, and environmental policy.
Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). Visit the program website (https://elliott.gwu.edu/graduate-certificates/international-science-technology-policy) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: a minimum of 15 credits, including a 3-credit cornerstone course, 6 to 9 credits in courses taught by the faculty of the Institute for International Science and Technology Policy (https://www.gwu.edu/~cistp) (IISTP), 3 to 6 credits in analytical competency courses, and 0 to 3 credits in elective courses.

<td></td>
</tr>
<tr>
<td>IAFF 6158</td>
<td>Special Topics in International Science and Technology Policy (Issues in Space Policy)</td>
<td>1</td>
</tr>
</tbody>
</table>

Elective (0-3 credits)

*Students who take the minimum number of courses to fulfill the science and technology policy and analytical competency requirements must take a 3-credit elective course selected with Program Director approval to fulfill the 15-credit total credit requirement.

1 Topics offered under IAFF 6158 may vary by year. Consult the IISTP website (http://www.gwu.edu/~cistp) for current listings.

2 Some analytical competency courses have prerequisites that do not count toward the certificate requirements.

**GRADUATE CERTIFICATE IN NUCLEAR POLICY**

The graduate certificate in nuclear policy provides a foundation of knowledge and analytical skills relevant to contemporary challenges related to nuclear security, deterrence, arms control, nonproliferation, and nuclear energy.

Specific admission requirements are shown on the Graduate Program Finder. Visit the program website (https://elliott.gwu.edu/graduate-certificates/nuclear-policy) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 15 credits, including a 3-credit core course and 12 credits in supporting courses.

<table>

*If not used as the core course.
The George Washington University School of Medicine and Health Sciences (SMHS) is dedicated to improving the health of local, national, and global communities by:

- Educating a diverse workforce of tomorrow’s leaders in medicine, science, and health sciences.
- Healing through innovative and compassionate care.
- Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
- Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Medical Programs
For information about GW medical programs, please refer to the medicine and health sciences website (http://smhs.gwu.edu).

Health Sciences
GW Health Sciences (http://smhs.gwu.edu/academics/health-sciences) comprises four academic departments: Clinical Research and Leadership (http://smhs.gwu.edu/crl), Health, Human Function, and Rehabilitation Sciences (https://smhs.gwu.edu/academics/health-sciences-programs/departments), Integrated Health Sciences (https://smhs.gwu.edu/academics/health-sciences-programs/departments/ihs-programs), and Physician Assistant Studies (http://smhs.gwu.edu/pas). SMHS Health Sciences Programs prepare professionals for roles in selected specialties within health care. These programs emphasize the interdependent roles and responsibilities of professionals in health care practice, research, and leadership.

The mission of GW Health Sciences is built upon five tenets:

- Interdisciplinary education provides a foundation for the future of health care delivery and generates collaborative structures and models for benchmarking and improvement.
- Clinical training is a foundation for professional development in clinical practice.
- Community service learning applies to communities broadly and is an important component of education for the transformation of communities of practice, research, and access in health care.
- Cultivating leadership capacity development within the health sciences, medical, and scientific communities that we serve.
- Scholarship among faculty, staff, and students alike contribute to the process of new knowledge creation and are a foundation for advancing translational science in health care.

General Information
Vision
The George Washington University School of Medicine and Health Sciences (SMHS) is dedicated to improving the health of local, national, and global communities by:

- Educating a diverse workforce of tomorrow’s leaders in medicine, science, and health sciences.
- Healing through innovative and compassionate care.
- Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
- Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, the George Washington University embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Health Sciences Campus Locations
GW Health Sciences is a vibrant community of faculty, staff, and students representing four academic departments, the GW Biomedical Informatics Center, the GWO Office of Integrative Medicine and Health, and the IMPACT Initiative. The GW Health Sciences departments include Clinical Research and Leadership; Health, Human Function, and Rehabilitation Sciences; Integrated Health Sciences; and Physician Assistant Studies.
Studies. Numerous faculty and academic programs within GW Health Sciences also are affiliated with the GW Center for Healthcare Innovation and Policy Research (CHIPR).

GW Health Sciences is part of the School of Medicine and Health Sciences (SMHS) with academic programs offered on two GW campuses (e.g. the Foggy Bottom campus in D.C. and the Virginia Science and Technology Campus in Ashburn, Virginia) as well as in blended and online formats. Our team represents numerous professions and specialties within health care, clinical research and leadership.

Health Sciences Mission and Vision
The Health Science programs are a center of excellence in interdisciplinary education, clinical training, community service learning, scholarship, and leadership. Faculty members are recognized as leaders in their fields and are dedicated to scholarly activities and educating students to improve the health and well-being of local, regional, national, and international communities. Our graduates continue the tradition of excellence by working as members of collaborative, interprofessional teams that provide compassionate, client-centered, and culturally competent care to individuals, families, and communities in a variety of settings and roles; by engaging in lifelong scholarship; and by becoming leaders in their areas of specialization and interest. The five pillars of our mission are interdisciplinary education, clinical training, community service learning, scholarship, and leadership.

Preamble
Students enrolled in GW Health Sciences are required to conform to all rules, regulations, and policies with University-wide applicability, including those contained in the Guide to Student Rights and Responsibilities (https://studentconduct.gwu.edu/guide-student-rights-responsibilities) (hereinafter “the Guide”). The Guide is the university’s primary document concerning student behavior, and it includes ten sections which address the following issues:

- # Student Rights and Responsibilities
- # Equal Opportunity
- # Sexual Harassment and Sexual Violence
- # Student Grievance Procedures
- # Student Conduct
- # Additional Conduct Regulations
- # Academic Integrity
- # Privacy of Student Records
- # Other University Policies
- # Security

Because of the unique curricular and degree-related requirements of health care professional and clinical research training programs, GW Health Sciences imposes higher standards than the university describes in the Guide. Therefore, the following GW Health Sciences Regulations (hereinafter “Regulations”) have been adopted. In the event, GW Health Sciences simply adopts University policy as published within the Guide, this is reiterated within the Regulations.

GW Health Sciences publishes its bulletin and Regulations on the SMHS bulletin website (http://bulletin.gwu.edu/medicine-health-sciences). Additionally, select programs of study produce supplemental program handbooks (hereinafter “Handbooks”) with additional guidance, policies, and resources for students. Handbooks, as applicable, are also published online and can be found within the Student Resources section available from the program’s primary website. A full list of program primary websites can be found on the GW Health Sciences programs website (https://smhs.gwu.edu/programs).

To the extent these Regulations or Handbooks are silent as to a particular right or procedure, such right or procedure is not intended to be afforded under these Regulations or Handbooks. In the case of any inconsistency or ambiguity between these Regulations and University-wide rules, regulations, and policies, including the Guide, these Regulations shall govern. Students are expected to comply with all University and GW Health Sciences policies and regulations; failure to do so may result in disciplinary action, including dismissal.

Admission
To be considered for admission, applicants must submit a completed application form online, together with all required supporting documentation and a non-refundable application fee. All applicants should review the technical standards and effective functions policies prior to application. Students applying to programs that require completion of clinical rotations or a supervised clinical experience should review Background Check and Drug Screen (https://smhs.gwu.edu/sites/default/files/Background%20Check%20Drug%20Screen%20Policy%20(mlr%20redline%202-22-18)-1_RB%20FINAL(mlr%20redline%203-1-18)-1_RB%203_1_18(1).pdf) prior to application.

Bachelor of Science in Health Sciences (BSHS) programs are designed for transfer students; applicants are expected to have completed a minimum of 45 credits of coursework from a regionally accredited post-secondary institution prior to entry. Applicants to the post-baccalaureate and graduate programs must hold a bachelor’s degree from a regionally accredited college or university, with the exception of the doctoral programs which require a master’s degree or entry-level professional doctorate. Official transcripts must be submitted from each academic institution attended, regardless of whether credit was earned or is desired. The transcript(s) must indicate a minimum cumulative grade-point average of 2.5 on a scale of 4.0 for undergraduate and post-baccalaureate applicants, and a 3.0 on a scale of 4.0 for graduate students. The applicant must be in good standing and eligible to return to the academic institution most recently attended. Dual degree applicants may have increased higher cumulative grade-point average requirements beyond these posted minimums; dual
degree applicants should refer to the respective program website under “Admissions” for guidance.

With evidence of special promise, an applicant whose academic record falls short of the minimum GPA may be accepted on a conditional basis; see Conditional Admission, below. Students who have been suspended or dismissed academically from GW will not be considered for admission for at least one year from the date of their last suspension or dismissal.

Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas are not accepted. All records become the property of the University and will not be returned.

**Conditional Admission**—Admission with conditions to GW Health Sciences may be offered at the discretion of the senior associate dean for health sciences (or delegate) and/or the respective program director. The terms of admission will be outlined in a letter of acceptance from GW. When any conditions of admission have not been satisfied, notification is sent from the Health Sciences Dean’s Office regarding the student’s academic standing and eligibility to continue in the program of study, which may include dismissal. Students dismissed for not meeting the conditions of their admission from non-clinical programs must sit out one calendar year before re-applying. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

**Advance Tuition Deposit**—Upon notification of acceptance to GW Health Sciences, an orientation fee and/or advance tuition deposit may be required (including readmission). Programs requiring an orientation fee and/or advance tuition deposit may publish this requirement on their website and notify students in writing of this deposit requirement at the time of acceptance. Advance tuition deposits are credited toward tuition and are non-refundable. An orientation fee, if required by the program, must be submitted along with the tuition deposit and is also non-refundable.

**Readmission**—Students who were previously registered in GW Health Sciences but who did not register during the immediate preceding semester (summer sessions excluded) and who did not receive an approved leave of absence, must apply for readmission. In some cases, an abbreviated process for applying for readmission is available and students are notified of this option by their advisor. Otherwise, readmission requires completion of a new application. Students seeking to enroll in a different degree or field of study should complete a new application to the respective program. An abbreviated process for applying for readmission is not available for the following disciplines: Physician Assistant, Physical Therapy, Pre-Medicine, or Translational Health Sciences. Students who have subsequently earned academic credit from another academic institution while not enrolled at GW must submit complete official transcripts to the Health Sciences Dean’s Office as a requirement for readmission. Readmission is not guaranteed.

**Transfer Credit for Graduate Students**—A maximum of one quarter of the credits of graduate coursework required for a degree may be approved for transfer to a graduate program in GW Health Sciences. These credits may come from enrollment in non-degree coursework at GW, or from another degree-granting school or college of GW, or another regionally accredited college or university. Eligible coursework must: be graduate-level credit, not be applied toward completion of requirements for another degree, and earned with a minimum acceptable grade of a B (grades of B- and below do not transfer). Requests for transfer credit must be submitted in writing and approved by the program director and the Health Sciences Dean’s Office after admission to the program. The University reserves the right to determine course equivalency and degree applicability. Students in the Medical Laboratory Sciences, Occupational Therapy, Physician Assistant, Physical Therapy, and Translational Health Sciences programs should refer to the respective program handbook for specific transfer credit policies and procedures.

**Transfer Credit/Advanced Standing for Undergraduates**—Transfer credit may be awarded for appropriate coursework completed at other regionally accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is C for coursework to be applied toward an undergraduate degree (grades of C- and below do not transfer). Transfer credit may also be considered from Advanced Placement (AP) and International Baccalaureate Credit (IB) credit, as well as the College Level Examination Program (CLEP exams). Please refer to GW undergraduate admissions (https://undergraduate.admissions.gwu.edu) for information on maximum credits, minimum scores, and GW course equivalents for AP and IB credits. Advanced standing may also be awarded for non-traditional classroom or clinical experience as determined by the individual programs. The University reserves the right to determine course equivalency and degree applicability. Health sciences degree programs vary in the amount of advanced standing they award. For bachelor’s programs, no more than 60 credits are accepted as advanced standing from another institution. Degree candidates who are currently enrolled at the University and plan to take courses at other regionally accredited institutions for transfer credit must first obtain program approval.

**International Applicants**—The following additional requirements pertain to international applicants. Additional guidance is available from the GW International Services Office (https://internationalservices.gwu.edu).

Required Records—Official copies of all required documentation (transcripts, diplomas, and certificates as well
as any other records listing subjects studied, grades received, examinations taken, the results of state examinations, and degrees received) must be submitted in the language in which the institution keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether or not the official record is in English.

Language Tests—Applicants whose native language is not English or who are not citizens of countries where English is the official language must submit official test scores for either academic IELTS, TOEFL, or PTE. The following are the minimum scores for admission consideration.

- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0.
- TOEFL: 600 paper-based or 100 Internet-based.
- PTE: overall score of 68

The IELTS/TOEFL/PTE requirement may be waived for applicants who hold a bachelor's degree or higher from a regionally accredited U.S. college or university; applicants who hold a bachelor’s degree or higher from an international higher education institution must demonstrate through an evaluation that the institution is equivalent to a U.S. regionally accredited college or university, and the language of instruction at the institution where the degree was completed in English. Waivers may exist for citizens of countries where the official language is English, as determined by the GW International Services Office.

Financial Certificate—A Financial Certificate must be completed and submitted with the application for admission by all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66. Please note that for online learners the financial certificate is not required.

Unclassified Students—A student who wishes to take individual courses in GW Health Sciences must obtain permission to register as an unclassified student by Health Sciences Dean's Office. If permission is granted, application is made with the Office of Non-Degree Students. Permission to take individual courses, if granted, is generally limited to a total of 6 credits. Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. This should not exceed 6 credits. Successful completion of coursework taken as an unclassified student does not guarantee admission to a degree program.

Student Progress and Records

Complete Withdrawal from the University—A student who wishes to withdraw from all courses, and the University, must complete a Complete Withdrawal Form (https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/downloads/completewithdrawal.pdf) and submit it to the Office of the Registrar. The deadline for complete withdrawal from all courses without academic penalty is the end of the tenth week of classes, with the exception of summer and accelerated courses, which may have different deadlines. Complete withdrawal after the tenth week requires a petition to the appropriate dean. A student who wishes to withdraw from one or all courses, but not the University, should submit a Registration Transaction Form (https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/downloads/registration_transaction_form.pdf).

A student who wishes to withdraw from the University upon completion of currently registered courses should notify their program director and the Health Sciences Dean's Office. It is highly recommended that before doing anything a student should contact their advisor to discuss their options.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to complete a Complete Withdrawal Form can result in an extended financial obligation and the recording of grades of F (Failure) or notations of Z (Unauthorized Withdrawal). There is no automatic drop for non-payment or no show.

Course Withdrawal—GW Health Sciences offers courses in many formats, including those that follow the traditional academic calendar, and those that have an alternative format (e.g. summer term, accelerated course). Course start date and end dates may be found on the Schedule of Classes (https://my.gwu.edu/mod/pws). For a course following the traditional academic calendar, after the fourth week of classes, a dropped course is considered a withdrawal and a notation of 'W' will appear on the transcript. Students may withdraw through the end of the eighth week of classes (tenth week of classes for undergraduate students only). Withdrawals after the eighth week of classes (tenth week of classes for undergraduate students only) require a petition to the Health Sciences Dean’s Office. For courses that do not follow the traditional academic calendar (e.g. summer term, accelerated courses), withdrawal dates vary. Information related to the course withdrawal dates for courses that do not follow the traditional academic calendar may be found on the Health Sciences Student Services Course/ Drop Refund Schedule (http://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule).

Leave of Absence—A student who must interrupt active pursuit of the degree or certificate may petition the senior associate dean for health sciences (or delegate) through the respective program director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for leave of absence in each fall and spring semester, following regular registration procedures. The request should be made using the Leave of Absence/Continuous Enrollment (https://registrar.gwu.edu/forms) form. Students who discontinue their studies without
being granted a leave of absence, and students granted leaves who do not return to active study at the close of the period of approved absence, must apply for readmission and are subject to the regulations and requirements then in force. The right to use University facilities is suspended while the leave is in effect.

Privacy of Student Records (academic records) – The University and its faculty and staff protect the privacy of students’ education records as required by federal law and regulations and as set forth in this policy. Refer to Privacy of Student Records (https://studentconduct.gwu.edu/privacy-student-records) within the Guide.

Privacy of Records (student health and wellness records) – The University is committed to implementing the best practices associated with privacy and security of health information for the protection of its students, faculty, staff, and those served by University clinics, counseling centers, and other programs or departments that provide health or health-related services. For students enrolled in programs that require completion of clinical rotations or a supervised clinical experience, additional requirements or procedures may apply; refer to the GW Health Sciences Health Screening and Immunization Policy (https://smhs.gwu.edu/sites/default/files/Health%20Screening%20and%20Immunization%20Policy_rb%20(1)(1).pdf).

Request for Accommodation for Students with Disabilities – GW is committed to providing an inclusive and welcoming environment that is accessible for everyone, including individuals with disabilities. Accessibility is an essential part of a positive experience and a critical component of the University’s academic environment for students with disabilities, as well as for faculty, staff and visitors who have disabilities. Refer to Technical Standards and Essential Functions within the Regulations. Refer also to program-specific technical standards and essential functions published within the respective Handbook. Additional guidance for students is available from GW Disability Support Services (https://disabilitysupport.gwu.edu).

Students Called to Active Military Duty – Refer to the Policy Regarding Student Called to Active Military Service published within the University Bulletin (http://bulletin.gwu.edu/university-regulations/#military).

Tuition Refund – It is the policy of the GW Health Sciences to refund student tuition if notified of the class change, or dropped classes, within an appropriate period of time. Courses dropped prior to the first day of the semester will have 100% of the tuition charges cancelled. Courses dropped on or after the first day of the semester are subject to Refund Schedules (https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule) which govern the prorated cancellation of semester tuition charges in cases of program adjustment or withdrawal. Refer to the Health Sciences Student Services Course/Drop Refund Schedule (https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule).

Student Expectations

Student Conduct – In addition to complying with the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities), student enrolled in GW Health Sciences must adhere to additional Regulations regarding student conduct. Students enrolled in a program which publishes a separate Handbook, must also comply with the additional conduct requirements stated in the handbook. Violation of conduct standards described in the Guide, the Regulations, or the Handbook may result in disciplinary action, including dismissal. All students must be familiar with and abide by published conduct standards. Student orientation for and the assignment of a program advisor to each GW Health Sciences student provide additional means to support student understanding of and compliance with these standards.

Computer-Based Exams – Students in GW Health Sciences Programs, either online or on campus, who are required to take computer-based exams must utilize the remote proctoring system Remote Proctor NOW (RPNOW) by Software Secure. Students are expected to follow all remote testing requirements before and during each quiz/exam. Each session is reviewed by Software Secure, Inc. (SSI) and GW Health Sciences program faculty/administration for violations and/or suspicious activity. GW SMHS expects that all students will demonstrate academic honesty in all academic endeavors, including but not limited to computer-based testing, as identified in the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities). Refer to the Computer-Based Exam (https://smhs.gwu.edu/sites/default/files/Computer-Based%20Exam%20Policy.pdf) Policy.

Criminal Background Check and Drug Screens – Some criminal offenses preclude students from participating in patient care. In addition, some professional licensure boards prohibit licensure for those convicted of specific offenses. Thus, students from professional programs are subject to the statutory and/or regulatory requirements independently imposed by law, or as required by affiliating entities. Students must meet any and all requirements of the clinical facilities to which they are assigned for clinical rotations or supervised clinical experiences. Such requirements may be more extensive than referenced herein. Inability to participate in patient care or being subject to any other exclusion prescribed by law will preclude successful completion of the requisite curriculum. As such, affected students may not be eligible for matriculation, continuation in the program, or graduation. Refer to Background Check and Drug Screening (https://smhs.gwu.edu/sites/default/files/Background%20Check%20Drug%20Screening%20Policy%20(mlr%20redline%2022-18)-1_RB%20FINAL(mlr%20redline%203-1-18)-1_RB%203_1_18(1).pdf).

Dress Code in Patient Care (or Simulated) Settings – All students must dress in a professional manner. Jeans, shorts, cutoffs, t-shirts, recreational clothing, clothing that obstructs movement required to meet training functions, or clothing
that exposes areas of the chest, abdomen, midriff or back are unacceptable attire. Only closed toes shoes are allowed in the clinical setting. Avoid wearing perfumes, scented lotions, or colognes in all clinical settings. With the exception of small, non-dangling earrings, no body piercings are acceptable in the clinical setting. For specific dress code requirements related to your program of study, please refer to your respective Handbook.

**Ethical Behavior and Professionalism**—GW Health Sciences encourages its faculty, staff, and students to engage in ethical behavior and demonstrate professionalism in all aspects of their academic life. Refer to Ethical Behavior and Professionalism (https://smhs.gwu.edu/sites/default/files/Ethical%20Behavior%20and%20Professionalism%20Policy_MLR%20redlined.pdf). This regulation provides expectations that exceed conduct standards published within the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities).

**Social Media**—Refer to the University Social Media Policy. (http://my.gwu.edu/files/policies/SocialMediaPolicyFINAL.pdf)

**Student Documentation in the Medical Record**—It is the policy of GW SMHS to permit students in select clinical programs (e.g. Physician Assistant, Physical Therapy) to document in the medical record for educational purposes consistent with the policies of clinical facilities in which students rotate. Refer to the Student Documentation in the Medical Record Policy (https://smhs.gwu.edu/sites/default/files/Student%20Documentation%20in%20the%20Medical%20Record%20Policy%20(mlr%20redlined%20202-22-18)-1.2%20(1)%20RB%20FINAL.pdf).

**Technical Standards and Essential Functions** - Regardless of the specific discipline of study, students within GW Health Sciences must demonstrate competency in the intellectual, physical and social tasks that cumulatively represent the essential functions of professional practice within health science-related careers. Further, GW Health Sciences expects every graduate of its programs of study to demonstrate the capacity and a personal commitment to address the challenge of eliminating health inequities and transforming health care to enrich and improve the lives of those we serve. Refer to Technical Standards and Essential Functions (https://smhs.gwu.edu/sites/default/files/TECHNICAL%20STANDARDS%20and%20ESSENTIAL%20FUNCTIONS%20FINAL%20030618.pdf). Students within select clinical programs (e.g. Medical Laboratory Sciences, Physician Assistant, Physical Therapy) must also comply with program-specific technical standards and essential functions, which may be found in the respective Handbook.

**Campus Life and Safety**

**Exposure to Infectious and Environmental Hazards (Potential Health Risks)**—For students in programs of study who are at risk of exposure to Bloodborne Pathogens or Environmental Hazards, GW Health Sciences adopts the University Policy on Bloodborne Pathogens Exposure Control (http://my.gwu.edu/files/policies/BloodbornePathogensFINAL.pdf). The University’s Bloodborne Pathogens Exposure Control Plan (ECP) serves as the standard for all individuals who may come into contact with blood and other potentially infectious material while training or performing their duties.

**Right to Change Rules and Programs**—The University reserves the right to modify or change requirements, rules, and fees as well as make changes in programs without notice whenever circumstances warrant such changes. Such regulations shall go into force whenever the proper authorities may determine. It is the practice of GW Health Sciences to communicate in writing (e.g. email, digital newsletters) to students should a change occur to the Health Sciences Bulletin and Regulations outside of the routine annual Bulletin revision process.

**Sexual Harassment and Sexual Violence**—Refer to the University’s Sexual Harassment and Sexual Violence Policy in the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities).

**Student Health Insurance**—All on-campus and international students (holding a J1 or F1 visa) enrolled in GW Health Sciences are required to carry student health insurance while they study at GW. These students are automatically enrolled in the GW Student Health Insurance Plan (SHIP) and must submit an opt-out waiver if they have another insurance plan that meets required waiver criteria. Please see Colonial Health Center (https://healthcenter.gwu.edu/student-health-insurance) for more information, including how to waive GW student health insurance.

**Substance Use**—GW expects its community to support a “drug free” campus and abide by published regulations on the possession and/or use of alcohol and other substances that have the capacity to produce impairment. Refer to the University’s Code of Student Conduct and Alcoholic Beverage Consumption & Distribution Policy in the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities). The Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities) also includes a copy of the most current Drug-Free Schools Disclosure Statement. GW Health Sciences provides additional guidance and student conduct expectations related to substance use which also includes resources for any individual affected by a substance use disorder.
Academic Standing
An enrolled student is considered to be in good academic standing provided that they are not on academic probation or suspension. The information outlined below applies to all GW Health Sciences students. Students are also expected to comply with any program-specific guidelines as detailed in the respective Handbook, including higher standards and additional requirements related to student academic progress and academic standing.

Evaluation of Academic Performance—Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. Official grades for coursework may be obtained from the Office of the Registrar. Unofficial grades for coursework are available via the GWeb Information System.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Satisfactory; D, Low Pass; F, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition for credit is permitted, a student enrolled in a program for an undergraduate degree or undergraduate-level certificate (including post-baccalaureate certificate) may not repeat a course in which a minimum grade of C was received, unless a petition to do so is approved by the senior associate dean for health sciences (or delegate) upon recommendation of the respective program director. If a course is repeated, the first grade remains on the student’s record and is included in the cumulative GPA. GW Health Sciences is excluded from the First-Year Academic Forgiveness Policy. Symbols that may appear on the transcript include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs—The following grading system is used: A, Excellent; B, Good; C, Minimum Pass; F, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition is permitted, a student enrolled in a program for a graduate degree or certificate may not repeat a course in which a minimum grade of C was received, unless a petition to do so is approved by the senior associate dean for health sciences (or delegate) upon recommendation of the respective program director. For graduate courses where a grade of C- or below was received, the course must be repeated for credit. If a course is repeated, the first grade remains on the student’s record and is included in the cumulative GPA. Symbols that may appear on the transcript include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress—The symbol of I indicates that the instructor has received a satisfactory explanation for the student’s inability to complete the required work of the course and an extension has been granted. The grade may be used only if the student’s prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned will result in the grade of F for the course. Incomplete work must be made up by a date agreed upon by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the notation of I is assigned. An extension of one additional semester can be requested by the student and may be approved by the program director. When work for the course is completed, the grade earned replaces the symbol I on the transcript. An Incomplete that is not changed within the allotted time reverts to an F.

The symbol of IPG is reserved for courses (such as special projects) in which the final class date extends beyond the official University deadline for submitting grades. Once the course has been completed, the IPG is removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal—The symbol of Z is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students’ records are reviewed; if there is more than one Z per semester, a student’s record may be encumbered until released by the student’s advisor or academic dean. The symbol Z is not a grade, but an administrative notation.

The Grade-Point Average—Scholarship is computed in terms of the grade-point average, based only on the student’s record in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit for which the student has registered in a degree program. In undergraduate courses, grades of F will be computed in the grade-point average but will not be considered as fulfilling degree requirements. In graduate programs, final course grades below C- are recorded as F.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation—Students who believe that a grade or evaluation is unjust or inaccurate may use the following appeal procedures:

• The student must submit a written appeal to the relevant faculty member within ten calendar days of the time the grade is posted, with a copy to the program director.
• Resolution should be sought first with the program director. A review shall be conducted by the program director with consultation with the student and respective faculty member(s) involved with the grade or evaluation under review. If the program director is the faculty member who
assigned the grade or evaluation under review, then a senior academic official (e.g. department chair, associate dean) conducts the review process.

• If a mutually satisfactory resolution is not achieved, the student may, within five calendar days of the decision of the program director being rendered, submit a written letter of appeal* to the senior associate dean for health sciences. Appeal requests are reviewed by the Health Sciences Student Evaluation Committee, who determine whether the grading procedures employed were fair, equitable, objective, and consistent. The committee offers a recommendation to the senior associate dean (or delegate), who subsequently renders a decision in writing to the student. The decision of the senior associate dean is final.

*The Grade Appeal Form (https://smhs.gwu.edu/academics/health-sciences-programs/student-services/policies-forms) should be used to submit an appeal to the Senior Associate Dean.

Warning—An undergraduate whose GPA falls at or above 2.5 but below 2.7, and a graduate student whose GPA falls at or above 3.0 but below 3.2 will receive a warning notification from the program. The warning may be delivered to the student the form of an email. A record of warning notifications is maintained by the Health Sciences Dean’s Office.

Academic Probation—Undergraduate Program: A full- or part-time student in an undergraduate degree program whose cumulative GPA falls below 2.5 will be placed on academic probation, and that status will be noted on the student’s transcript. This probation extends over the period during which the student attempts an additional 12 credits of coursework. While on probation, students are allowed to register for no more than 12 credits per semester, unless approved by the program director and the senior associate dean for health sciences (or delegate). Graduate Program: A full- or part-time graduate degree candidate whose cumulative GPA falls below 3.0 will be placed on academic probation. For full-time students, probation extends for 9 credits as defined by the program; for part-time students, probation during the period in which the student attempts 9 credits of coursework. While on probation, full-time students may register for no more than a total of 9 credits unless an exception is approved by the program director and the appropriate dean; part-time students may register for a combination of 9 credits, but may not register for additional credits, e.g. a part-time student who attempts 6 credits in one semester would be restricted to 3 credits in the following semester of enrollment.

If the program director determines that extenuating and valid circumstances exist, a student may be granted an extension of the probationary period. If granted, the student will be notified by the program director outlining conditions to be met by the student. The student must return a statement to the program director by mail or email confirming that he/she has read, understands, and agrees to the conditions.

If the student fails to attain the conditions in the time specified, the student will be suspended (see Suspension, below). If the student succeeds in raising his/her cumulative GPA to the minimum scholarship requirements, academic probation is lifted. A student who has been placed on probation more than one time will be recommended for dismissal.

Suspension—Students on probation who have not raised their cumulative GPA within the allowed number of credits (12 for undergraduate and 9 for graduate students) may be suspended. A student suspended for poor scholarship may not register for any coursework at the University, even as an auditor. The Health Sciences Dean’s Office mails or emails a Letter of Suspension notifying the student of suspension.

A student who is suspended for failure to raise the cumulative GPA may apply for readmission after one calendar year. Evidence must be presented to the student’s program director, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted. If the student fails to achieve the minimum GPA at the end of the semester following readmission, the program director may recommend that the student be dismissed and further enrollment prohibited; such a recommendation is reviewed by the appropriate dean, whose recommendation is reviewed by the Health Sciences Dean’s Office.

Dismissal—A dismissal represents a summary determination of program faculty that a student has failed to attain and apply the necessary knowledge, skills and behaviors within a program of study, or that the conduct of the student is inconsistent with published standards of ethical conduct and professionalism. Each program of study designates a faculty coordinator or faculty committee to continuously monitor and evaluate student academic progress and conduct. This coordinator or committee provides recommendations to the program director regarding individual student academic progress, including dismissal. The program director is responsible for making final determinations of student academic progress, including dismissal from a program of study.

The faculty and director of an academic program are responsible for ensuring students meet minimum performance expectations and demonstrate the competencies as defined for the respective program of study. The most common reason for a student dismissal is failure of the student to maintain minimum academic standards. Reasons for a student dismissal include, but are not limited to, the following:

• Academic dishonesty.
• Failure to comply with University or Program policies, procedures, or requirements.
• Failure to maintain minimum academic standards.
• Failure to make satisfactory progress in completing program requirements.
• Failure to support a safe, healthy learning environment.
• Inability to meet essential functions or technical standards required for a program of study.
• Performance in a patient care setting that threatens the delivery of safe, high quality, patient-centered care.
• Unethical or unprofessional behavior.

A dismissal is generally the final outcome of numerous informal and formal communications with the student regarding their unsatisfactory progress in the program. A program director informs any student subject to dismissal of this action in writing, which includes guidance on exit procedures. A student who is dismissed from a program of study may apply for readmission after the lapse of one calendar year. Readmission is not guaranteed. Students should refer to the respective Handbook, if applicable, for more details on academic progress policies and procedures.

Dismissal Appeal – If a student believes they have been unfairly or unjustly dismissed from a program of study, an opportunity for appeal exists. A student who wishes to appeal a program dismissal decision must submit a request in writing within ten (10) calendar days of notification of the dismissal to senior associate dean for health sciences. The student’s written appeal must clearly state which of the following conditions applies and set forth specific facts and relevant supporting materials to justify the merits of the appeal request:

• Procedural error as set forth in policy,
• Dismissal decision was inappropriate based on the circumstance, and/or
• Evidence is available now that was not available at the time of the dismissal to warrant an appeal.

Upon receipt of a dismissal appeal process that demonstrates at least one of the conditions stated above, the senior associate dean for health sciences refers the request to the Health Sciences Student Evaluation Committee, which is a SMHS standing committee (http://smhs.gwu.edu/faculty/faculty-assembly/standing-committees). This committee investigates the dismissal decision and applicable policies, in consultation with the student and program faculty. After adequate investigation, the committee makes a recommendation to the senior associate dean, who subsequently renders a decision to uphold or reject the program dismissal decision. The decision of the senior associate dean is final.

During the dismissal appeals process, the student does not actively participate in his/her program and follows the dismissal policy and/or University exit procedures.

The student may address the Committee and provide information to support the appeal. Should the student choose not to meet with the Committee, the student may submit a written statement and any supporting documentation to the committee chair no later than the date the appeal is scheduled to be heard. While the student may have advisors, counsel, or other individuals available to lend support throughout the process, only the student who is appealing the dismissal is permitted to meet with the Student Evaluation Committee. The committee may seek further information, testimony, or witnesses at their discretion during the appeals process. Students who provide testimony at the request of the committee abide by the Student Code of Conduct in the Guide (https://studentconduct.gwu.edu/guide-student-rights-responsibilities) and the Ethical Behavior and Professionalism Policy.

Programs of Study

Undergraduate Programs and Advisement – Students enrolled in undergraduate degree or undergraduate-level certificate programs (including post-baccalaureate certificates) must meet with their academic advisor (in person or electronically) to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program, and changes may require approval by the senior associate dean for health sciences (or delegate).

Transfer within GW Health Sciences – To apply for a transfer from one health sciences program to another, a written request must be submitted to the senior associate dean for health sciences, along with the necessary supporting documentation required by the program. To change from certificate to degree program may require an admissions application.

Transfer outside Health Sciences Programs – No internal transfers are permitted from a program of study within GW Health Sciences to another GW school or college. To transfer outside of GW Health Sciences, a student must follow the full admission processes for the other GW program.

Changes within GW Health Sciences – A student may not substitute one course for another without approval of the program director, the department chair, and the appropriate dean. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the appropriate dean to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses – During the registration period (typically before the end of the second week of classes) students may add or drop courses using GWeb. There is no automatic drop for non-payment or no show. After the second week of classes, students who wish to add a course must complete a Registration Transaction Form and submit the form to the senior associate dean for health sciences. Adding a course after the second week requires a signature of the instructor or other authorized member of the department. For accelerated courses, adds may be restricted to the first week of classes given the compressed nature of the course format.

For courses following the traditional academic calendar, a course dropped during the first four weeks of classes does not appear on the student’s transcript. Students may drop a course via GWeb through the end of the fourth week of classes.
A course dropped after the fourth week but before the end of the eighth week (tenth week for undergraduate students only) is assigned a notation of W (Authorized Withdrawal). Deadlines for summer or accelerated courses may vary. Refer to the Health Sciences Student Services Course/Drop Refund Schedule (https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule).

For courses following the traditional academic calendar, the deadline for dropping a course without academic penalty is the end of the eighth week of classes (tenth week for undergraduate students only). After the end of the eighth week of classes (tenth week for undergraduate students only), dropping a course without academic penalty is only possible after the student presents a petition to the senior associate dean for health sciences (or delegate) and receives written permission. Deadlines for summer or accelerated courses may vary. Refer to the Health Sciences Student Services Course/Drop Refund Schedule (https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule).

All charges for courses which the student drops or withdraws from are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Students taking summer or accelerated courses should refer to the Health Sciences Student Services Course/Drop Refund Schedule for additional information. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

**Graduation Requirements**

Degrees and certificates are conferred in January, May, and August. Degree-seeking students graduating from GW Health Sciences may participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for coursework or for continuous enrollment, is required for the semester or summer session of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

**Undergraduate Residence Requirements**—Bachelor of Science in Health Sciences programs follow the Residence Requirement under University Regulations.

**Graduate and Doctoral Residence Requirements**—Graduate and doctoral programs may set higher residency requirements; students should consult the program office or program handbook, if applicable.

**Honors**—Bachelor’s degrees with honors are awarded to students whose academic records give evidence of particular merit. The student’s grade-point average determines the level of honors as follows: *cum laude*, 3.4 to 3.59; *magna cum laude*, 3.6 to 3.79; *summa cum laude*, 3.8 to 4.0. The grade-point average includes all coursework completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 credits of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status is determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credits required for the degree. Honors indicated on the diploma are calculated on the basis of all coursework completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

**Certificate Completion**—Students planning to complete a certificate by the end of a semester must submit a certificate completion form by April 1 for spring semester, July 1 for summer sessions, and December 1 for fall semester. Students completing a certificate are not recognized at the University Commencement and are not issued tickets to the ceremony.

**Financial Aid**

Financial assistance for undergraduate students at GW is described in the Financial Aid Sourcebook from The George Washington University Office of Student Financial Assistance (https://financialaid.gwu.edu). Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need. All undergraduate gift aid (institutional scholarships and grants, and federal grants) requires that the recipient be working on the first undergraduate degree and be registered for a full-time workload at GW. Students are limited to ten semesters of institutional aid. Institutional aid is not available for online programs nor graduate programs. Loans and resident assistantships not based on financial need are available.

Several offices on campus provide information on financial assistance for graduate and certificate students. Information about funding opportunities is provided by the Office of Graduate Student Assistantships and Fellowships. Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center. Gift aid (scholarships,
grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid is adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session is entitled to a full refund of all tuition and fees that they have paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student has the option of either taking a full refund of tuition and fees or taking an Incomplete in their courses with the privilege of returning to complete all required coursework at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of their activation to the Health Sciences Dean’s Office and the Office of Student Accounts and to request the appropriate refund.

All students on active duty are automatically exempted from the request for a $50 voluntary library contribution without requiring any communication from them or their initials on the bill. Students can opt out of the fee with a button click on the Student Accounts bill pay site.

Students not meeting financial aid satisfactory academic progress (SAP) requirements may appeal to the Office of Financial Aid for review. The Office of Financial Aid notifies the student if they must complete the appeal process for reinstatement of aid. The appeal must state the reasons for failing to meet SAP requirements, such as special circumstances that contributed to the student’s failure to make satisfactory academic progress (e.g., the death of a relative, an injury or illness of the student, or other special circumstances). All appeals must be submitted to the Office of Financial Aid within two weeks of the date of notification that a student has not passed financial aid SAP.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Policies and Definitions

Academic Residency—To earn a bachelor’s degree, students must earn at least 60 credits at or through GW, which may include a University-authorized study abroad and study away program. At least 30 of the 60 credits earned at or through GW must be in upper-level courses (numbered 2000 or above); at least 12 credits in upper-level courses must be in the major field, and at least 6 credits in upper-level courses must be in the minor field, if sought.

Attendance—Students may attend only those classes for which they are officially registered. Regular attendance is expected. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all absences must be excused by the instructor before provision is made to make up the work missed.

Auditing—A student who has been admitted to GW Health Sciences may register as an auditor in a class only with the permission of the instructor, the faculty advisor, and the appropriate dean. An auditor receives no academic credit and is not required to take active part in the class or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. The regular program tuition rate is charged for audited courses.

Continuous Enrollment—Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. Students who break continuous enrollment at the University and do not request and receive a leave of absence (see below) must apply for readmission and, if granted, are subject to the requirements and regulations then in force. Students who plan to attend other institutions and apply credit earned toward graduation from this University must first obtain written approval from the program director and the appropriate dean.

Credit—Credit is awarded only after registration for a course and satisfactory completion of the required work, or upon assignment of advanced standing.

Transcripts of Record—Official transcripts of student records are issued by the Office of the Registrar (https://registrar.gwu.edu) and may be requested through GWeb (https://banweb.gwu.edu/PRODCartridge/twbkwbis.PWWWLogin) or TranscriptsPlus (https://www.credentials-inc.com/CGI-BIN/dvcgtp.pgm?ALUMTRO001444) by any student or former student who has paid all charges, including any outstanding student loan installments, due the University at the time of the request. A fee is charged for each transcript. Partial transcripts are not
issued. Unofficial transcripts can be obtained via the Office of the Registrar and through the GWeb Information System.

UNDERGRADUATE

Associate's programs
- Associate in Science in the field of histotechnology (p. 852) (military contract)
- Associate in Science in the field of health sciences (p. 853) (military contract affiliated)
- Associate in Science in the field of health sciences laboratory technology (p. 853) (military contract affiliated)

Bachelor's programs
- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 854)
- Bachelor of Science in Health Sciences with a major in biomedical informatics (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-biomedical-informatics)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 855) (military contract)
- Bachelor of Science in Health Sciences with a major in clinical operations and health care management (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-clinical-operations-healthcare-management)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences with a major in cytotechnology (p. 858)(military contract)
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in global leadership in disaster response
- Bachelor of Science in Health Sciences with a major in leadership for emergency action and disaster response (military contract)
- Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical research administration
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Dual Bachelor of Science in Health Sciences with a major in medical laboratory sciences and Master of Science in Health Sciences in the field of molecular diagnostic sciences (p. 867)

Minors
- Minor in anatomy (p. 868)
- Minor in blood banking for medical laboratory science (p. 868)
- Minor in emergency health services

GRADUATE

Master's programs
- Master of Science in Health Sciences in the field of biomedical informatics (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/mshs-biomedical-informatics)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 869)
- Master of Science in Health Sciences in the field of clinical operations and health care management (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/mshs-clinical-operations-healthcare-management)
- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of health care quality (p. 871)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 873)
- Master of Science in Health Sciences in the field of integrative medicine (p. 873)
- Master of Science in Health Sciences in the field of laboratory medicine (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/mshs-laboratory-medicine)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 874)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 874)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 876)
- Master of Science in Health Sciences in the field of physician assistant (p. 875)
- Master of Science in Health Sciences in the field of translational microbiology (p. 877)

Joint degree programs
- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 877)
Military contract program
• Master of Science in Health Sciences in the field of immunohematology (p. 872)

Doctoral programs
• Doctor of Philosophy in the field of translational health sciences (p. 883)
• Doctor of Physical Therapy (p. 883)
• Advanced Practice Clinical Doctorate in Occupational Therapy (p. 885)

CERTIFICATES

Post-baccalaureate certificates
• Post-baccalaureate certificate in medical laboratory science (p. 887)
• Post-baccalaureate certificate in blood banking for medical laboratory science (p. 886)
• Post-baccalaureate certificate in chemistry for medical laboratory science (p. 887)
• Post-baccalaureate certificate in hematology for medical laboratory science (p. 887)
• Post-baccalaureate certificate in microbiology for medical laboratory science (p. 888)
• Post-baccalaureate certificate in pre-medicine (p. 888)

Graduate certificates
• Graduate certificate in biomedical informatics (http://bulletin.gwu.edu/medicine-health-sciences/certificate/biomedical-informatics)
• Graduate certificate in clinical operations and health care management (http://bulletin.gwu.edu/medicine-health-sciences/certificate/clinical-operations-healthcare-management)
• Graduate certificate in clinical research administration (p. 889)
• Graduate certificate in clinical and translational research (p. 890)
• Graduate certificate in clinical research practice (p. 889)
• Graduate certificate in correctional health administration (http://bulletin.gwu.edu/medicine-health-sciences/certificate/correctional-health-administration)
• Graduate certificate in health care quality (p. 890)
• Graduate certificate in health services and outcome research (http://bulletin.gwu.edu/medicine-health-sciences/certificate/health-services-outcome-research)
• Graduate certificate in integrative medicine (p. 890)
• Graduate certificate in regulatory affairs (p. 891)

Undergraduate certificate (military contract)
• Undergraduate certificate in the field of health sciences laboratory science (http://bulletin.gwu.edu/medicine-health-sciences/certificate/health-sciences-laboratory-science)

COURSES

Explanation of Course Numbers
• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

• Anatomy & Regenerative Biology (ANAT) (p. 1103)
• Clinical Management Leadership (CML) (p. 1151)
• Clinical Research and Administration (CRA) (p. 1153)
• Clinical Translational Science (CTS) (http://bulletin.gwu.edu/courses/cts)
• Emergency Health Services (EHS) (p. 1268)
• Health Care Quality (HCQ) (p. 1323)
• Health Sciences (HSCI) (p. 1325)
• Informatics (INFR) (p. 1354)
• Integrative Medicine (INTM) (p. 1360)
• Medical Laboratory Science (MLS) (p. 1399)
• Occupational Therapy (OT) (http://bulletin.gwu.edu/courses/ot)
• Pharmacogenomics (PHRG) (p. 1424)
• Physician Assistant (PA) (p. 1435)
• Physical Therapy (PT) (p. 1431)
• Regulatory Affairs (RAFF) (p. 1504)
• Translational Health Sciences (THS) (http://bulletin.gwu.edu/courses/ths)

UNDERGRADUATE PROGRAMS

Associate's programs
• Associate in Science in the field of histotechnology (p. 852) (military contract)
• Associate in Science in the field of health sciences (p. 853) (military contract affiliated)
• Associate in Science in the field of health sciences laboratory technology (p. 853) (military contract affiliated)
Bachelor’s programs
• Bachelor of Science in Health Sciences with a major in bioinformatics (p. 854)
• Bachelor of Science in Health Sciences with a major in biomedical informatics (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-biomedical-informatics)
• Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 855) (military contract)
• Bachelor of Science in Health Sciences with a major in clinical operations and health care management (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-clinical-operations-health-care-management)
• Bachelor of Science in Health Sciences with a major in global leadership in disaster response
• Bachelor of Science in Health Sciences with a major in leadership for emergency action and disaster response (military contract)
• Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs
• Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical research administration
• Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Science in the field of regulatory affairs
• Dual Bachelor of Science in Health Sciences with a major in medical laboratory sciences and Master of Science in Health Sciences in the field of molecular diagnostic sciences (p. 867)

Minors
• Minor in anatomy (p. 868)
• Minor in blood banking for medical laboratory science (p. 868)
• Minor in emergency health services

ASSOCIATE IN SCIENCE IN THE FIELD OF HISTOTECHNOLOGY

The associate in science in the field of histotechnology program provides formal training for histopathology technicians who are assigned to a medical treatment facility (MTF). The course combines didactic classroom instruction, hands-on experience and clinical rotations in an MTF. The instruction also assists graduates in preparing for the histotechnician (HT) certification examination. Instruction is presented in the following major areas: introduction to histotechnology, basic scientific information, specimen processing for histological study, routine technical procedures, special stains for histologic study, anatomy and tissue identification, autopsy procedures, cytopreparatory techniques, immunohistochemistry, practical histotechnician training, and clinical practicum.

Visit the program website (https://smhs.gwu.edu/military-affiliated-program/histotechnology) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 63 credits, including 18 credits in general education courses, and 45 credits from courses in the major. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES

The associate in science (AS) in health sciences (http://smhs.gwu.edu/military-affiliated-programs/health-sciences) is a degree completion program restricted to current and former Army or Navy MLTs who have completed the undergraduate certificate in HSLT but are ineligible for the AS in HSLT because of the 5-year limit.

Visit the program website (http://smhs.gwu.edu/military-affiliated-programs/health-sciences/admissions) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 69 credits, including 44 credits in advanced standing, 19 credits in general education, and 6 credits in health sciences courses.

</tr>
</tbody>
</table>

**English composition**
- HSCI 2100 Writing and Composition in the Health Sciences

**Mathematics or statistics**
- HSCI 2117 Introduction to Statistics for Health Sciences

**Humanities**
- HSCI 2107 Health Care in Literature

**Social sciences**
- HSCI 2103 Health Policy and the Health Care System
- HSCI 2111 Development of the Health Care Professions

**Required GW health sciences distance learning courses**
- Two of the following:
  - HSCI 2101 Psychosocial Aspects of Health and Illness
  - HSCI 2105 Current Issues in Bioethics
  - HSCI 2110 Disease Prevention and Health Promotion Concepts
  - or HSCI 2114 Health Care in Developing Nations

**Transfer of credit**

For an assessment on the transferability of your previous coursework contact the program office (http://smhs.gwu.edu/crl/programs/chs/curriculum/as). To be eligible for transfer, courses must be:
- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY

Admission to the associate in science (AS) in health science laboratory technology (HSLT) (http://smhs.gwu.edu/military-affiliated-programs/as-mlt) program is restricted to students who have completed the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-
programs/cert-mlt) at GW within the past five years. The program offers Army and Navy medical laboratory technicians (MLTs) the opportunity to enhance their skills, obtain the credentials to pursue advanced study, and be eligible for promotion within the military.

Visit the military affiliated programs website (http://smhs.gwu.edu/military-affiliated-programs) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 75 credits, 60 of which are awarded for completion of the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-programs/cert-mlt), and 15 credits in general education courses. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

Recommended general education courses at GW that fulfill these requirements:

- English composition
- HSCI 2100 Writing and Composition in the Health Sciences
- Statistics
- HSCI 2115 Introduction to Biostatistics for Health Sciences
- HSCI 2117 Introduction to Statistics for Health Sciences
- Social sciences
- HSCI 2101 Psychosocial Aspects of Health and Illness
- HSCI 2103 Health Policy and the Health Care System
- Humanities
- HSCI 2105 Current Issues in Bioethics

Transferring credits

For an assessment on the transferability of your previous coursework, please contact the program office (http://smhs.gwu.edu/crl/programs/military/as-mlt). Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN BIOINFORMATICS

Bioinformaticists use computers to analyze, organize, and visualize biological data in ways that increase the understanding of this data and lead to new discoveries. Graduates of this program will be well-qualified for many rewarding careers, including those in bioinformatics software development, biomedical research, biotechnology, comparative genomics, genomics, molecular imaging, pharmaceutical research and development, proteomics, and vaccine development.

Visit the program website (https://smhs.gwu.edu/bioinformatics) for more information.

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL HEALTH SCIENCES**

The bachelor of science in health sciences (BSHS) with a major in clinical health sciences degree program is available only to active-duty Navy IDCs, Army 18Ds, and Air Force IDMTs. Coast Guardsmen who completed a Navy IDC School may be eligible, depending on their current duty assignment.

This distance learning program offers active-duty Navy IDCs, Army Special Forces Medical Sergeants (18Ds), and Air Force Independent Medical Technicians (IDMTs) a way to formalize their specialized military training with a GW degree. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment. The clinical rotations are arranged by students in their current duty station or location, and must be completed while on active-duty.

Visit the program website [here](https://online.gwu.edu/bachelor-science-health-sciences-clinical-health-sciences) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits divided into three degree components.

**Code** | **Title**                                               | **Credits** |
---------|---------------------------------------------------------|-------------|

**Advanced standing and electives (60 credits):**

During the first semester the student is enrolled in the program, advanced standing for eligible military courses will be noted on the student’s record and applied towards the bachelor’s degree.

**General education (24 credits):**

- 3 credits of English composition
- 4 credits of natural or physical science with lab
- 8 credits of mathematics, science, or statistics
- 6 credits of social sciences
- 3 credits of humanities
If a student still needs general education coursework, GW offers online coursework for some of these requirements.

*Must be completed while on active-duty. Students arrange rotations at their current duty stations. All rotations require a MD or PA preceptor.

Students who complete HSCI 2117 to meet the “Science and Statistics” general education requirement, must then take HSCI 3117 to meet the major requirement.

Students may choose to take either HSCI 2110 or HSCI 2114 to meet a major requirement; the alternate course may be used towards the elective requirement. One course cannot not meet two different degree requirements simultaneously.

**Transferable Coursework (84 credits maximum)**

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:
BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION

Offered in a distance learning format, the bachelor of science in health sciences with a major in clinical research administration prepares students for meeting the increasing global needs for a highly qualified workforce within the clinical research arena. This program creates a learning environment that supports student and faculty excellence in clinical research competencies such as scientific concepts and research design, ethical and patient safety considerations, drug development, clinical trial operations, human subject protection, Good Clinical Practice (GCP), regulatory requirements, and key business components. To achieve this mission, the program draws upon its diverse, multidisciplinary student body; outstanding, collaborative, practice-based faculty; and the vast resources available at the university.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, 60 credits of which must be completed at GW. Up to 60 credits from coursework taken elsewhere may be transferable.

**Code** | **Title** | **Credits**
--- | --- | ---
**60 credits of general education and advanced standing including:**

<table>
<thead>
<tr>
<th>Credits</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>credits of English composition</td>

*Transferring credits*

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

---

**School of Medicine and Health Sciences**

857
• College-level
• Academic in nature
• Completed at a regionally accredited institution
• Earned with a minimum grade of C (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CYTOTECHNOLOGY

Established between GW and the Medical Education Training Campus (METC), the bachelor of science in health sciences with a major in cytotechnology degree program (http://smhs.gwu.edu/military-affiliated-programs/cytotechnology) is restricted to pre-selected military service members.

This one-year contract program provides GW educational services to eligible active duty U.S. Army service members, including:

• Academic advising for students who have outstanding prerequisites for eligibility.
• Application and registration services.
• Academic record maintenance.
• Conferral of a bachelor of science in health sciences degree to students upon successful completion of 126 credits in the required program.

Visit the program website (https://smhs.gwu.edu/military-affiliated-programs/cytotechnology) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 126 credits, including 49 credits in general education, 27 credits in advanced standing and electives, and 50 credits in distance education clinical laboratory sciences and health sciences courses.

**General education (49 credits)**

Biology* (20 credits)
Chemistry* (8 credits)
College algebra, statistics, or higher (3 credits)
Humanities (3 credits)

Social sciences (6 credits)
Additional humanities or social sciences (3 credits)

English composition (6 credits)

**Electives (27 credits)**

Previously earned college-level coursework are evaluated for transfer as elective credit. Acceptable transfer coursework must be college-level, academic in nature, completed at a regionally accredited institution, and earned with a C or above (C- grades do not transfer).

*If a student has completed the MLT I: Certificate in Health Sciences Laboratory Technology (https://smhs.gwu.edu/military-affiliated-programs/cert-mlt) all credits from that program are transferred in and fulfill the biology, chemistry, and elective requirements for the degree.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN EMERGENCY MEDICAL SERVICES MANAGEMENT

Emergency medical services (EMS) is a challenging and rapidly emerging discipline at the intersection of traditional EMS, public health, public safety, and health care. The bachelor of science in health sciences in emergency medical services management (EMSM) is designed to prepare students for leadership positions in the field and to improve the quality of out-of-hospital care domestically and internationally.

Visit the program website (https://smhs.gwu.edu/emergency-medical-services/programs/undergraduate/bshs) for more information.
REQUIREMENTS

The following requirements must be fulfilled: 120 credits, at least 60 of which must be completed at GW. Up to 60 credits from coursework completed elsewhere may be transferable.

**Transferring credits**

Up to 60 credits of coursework may be transferable from coursework taken elsewhere provided it is:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN GLOBAL LEADERSHIP IN DISASTER RESPONSE**

Offered in a distance learning format, the bachelor of science in health sciences (BSHS) in global leadership disaster response degree program is available to active-duty and veteran service members from the civil affairs medic community or related health care fields and to civilians in the health care fields with international experience and interest. All courses are offered online in a flexible, asynchronous format allowing students
to pursue their degree, regardless of time zone, station, or overseas assignment.

Drawing heavily from both civilian and military challenges and successes experienced during natural as well as man-made disaster and crisis events, both domestically and internationally, the program allows civil affairs medics to build on their existing academic, military, and training experiences. Students are called upon to work individually as well as collaboratively in the development of broadened view of and holistic approach to delivery of aid and relief to the individuals, families, and communities affected by catastrophic events.

Visit the program website (https://smhs.gwu.edu/health-intervention-disaster-response) for more information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits, 60 of which must be completed at GW. Up to 60 credits from coursework taken elsewhere may be transferable.

**BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN LEADERSHIP FOR EMERGENCY ACTION AND DISASTER RESPONSE**

The BSHS in leadership for emergency action and disaster response (LEADR) is 120-credit hour degree-completion program. This is a military partnership program, and only current or former SOF operators and enablers across the Army, Navy, Air Force, and Marines are considered for admission. As a closed admission military program established via military partnership, additional coursework above 60 credits may be considered for equivalency to courses in the major at the discretion of the program director. On a case-by-case basis, up to 75 credits may be transferred from traditional and non-traditional learning.

Upon completion of the bachelor of science in health sciences with a major in leadership for emergency action and disaster response degree program, the graduate is prepared in the following areas:

• Leadership: Compare leadership approaches for implementation and execution of complex projects in diverse, interagency environments;
• Technology: Analyze methods of technology application in asymmetric conditions;
• Resources: Appraise resource utilization and management in emergency and disaster settings;
• AEM/CEM: Analyze four phases of the disaster activity (i.e., mitigation, preparedness, response, and recovery) for all risks (i.e., attack, man-made, and natural) and the role of actors and stakeholders in the cycle;
• Management: Synthesize key agency roles and collaboration throughout critical incident responses; and
• Communication: Communicate effectively with diverse stakeholders, individually and in group settings, using verbal, written, and electronic modes of communication.

Visit the program website (https://smhs.gwu.edu/military-affiliated-programs/bshs-leadership-emergency-action-disaster-response) for more information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits, 60 credits of which may be considered for equivalency to courses in the major; at the discretion of the program director, additional coursework above 60 credits may be considered. On a case-by-case basis, up to 75 credits may be transferred from traditional and non-traditional learning.

### BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL LABORATORY SCIENCE

**Online or hybrid online/on campus**

Medical laboratory science combines medicine, basic sciences, and clinical sciences. Professionals in the field investigate and determine the causes of disease, using the latest biomedical instruments and molecular techniques to perform both routine and complex testing.

The bachelor of science in health sciences (BSHS) with a major in medical laboratory science (MLS) is a degree completion program offered in two formats: online or a hybrid of online and on-campus study. Both program formats also are offered as a second bachelor’s degree.

**BSHS in Medical Laboratory Science—Fully Online** (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/fully-online-mlt/mlt-mls-bshs-medical-laboratory-science-fully-online) The online BSHS in MLS is for students who have successfully completed a medical laboratory technician (MLT) program and currently are board certified MLTs.

**BSHS in Medical Laboratory Science—Hybrid** (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/curriculum) The hybrid BSHS in MLS is for students who have completed 60 credits towards an associate’s degree or who have earned an associate’s degree along with the required prerequisite science and general education courses.

**Second bachelor's degree program**

The BSHS in MLS program is offered in both formats as a second bachelor’s degree to students who already hold a baccalaureate degree from a regionally accredited college or university with the required prerequisite and general education coursework. For the online program, students also must have completed a medical laboratory technician (MLT) program and currently be board certified MLTs.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (http://www.naacls.org).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits, including a minimum of 60 credits in required courses completed at GW and up to 60 transfer credits in courses taken elsewhere. Eligible students admitted through approved SMHS Guaranteed Admission Agreements (http://smhs.gwu.edu/academics/health-sciences-programs/guaranteed-admission-agreements) partnerships must complete a minimum of 52 required credits at GW; eligibility is reviewed on a case-by-case basis.

**Completion of the following prerequisite coursework from a regionally accredited college or university with a grade of C or above:**

<table>
<thead>
<tr>

</tbody>
</table>

Completion of the following prerequisite coursework from a regionally accredited college or university with a grade of C or above:

- 3 credits of English composition
- 8 credits of biology with lab \(^1,^3\)
- 8 credits of general or inorganic chemistry with lab \(^1,^3\)
- 4 credits of microbiology with lab \(^1,^3\)
- 3 credits of organic chemistry or biochemistry \(^1\)
- 3 credits of college math (algebra, statistics, or higher)
- 3 credits of humanities
- 6 credits of social sciences

A minimum of 22 credits in elective coursework. Elective coursework should include courses in pathophysiology or anatomy and physiology, ethics or values, and global/cross-cultural perspectives. \(^2\)

Required for the major
Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.

Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Hands-on lab required. Online lab not acceptable.

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION AND MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

Clinical research administration continues to evolve into a more global and complex set of integrated research and business processes. The online dual degree program provides students with the knowledge, abilities, and vision to move health sciences organizations effectively into the future. This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the online bachelor of science in health sciences and the online master of science in health sciences programs.

Visit the program website (https://smhs.gwu.edu/clinical-research-administration/programs/dual-degrees/curriculum/dual-degree-bshs-mshs-clinical-research-administration) for additional information.

REQUIREMENTS

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the bachelor of science in health sciences (BSHS) in clinical research administration and the master of science in health sciences (MSHS) in clinical research administration (CRA) (http://smhs.gwu.edu/crl/programs/cra). Undergraduate and graduate degrees are conferred sequentially, with the BSHS awarded upon completion of 120 credits (9 of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate coursework.
BSHS in Clinical Research Administration
The BSHS with a major in clinical research administration is a degree completion program that requires successful completion of 120 credits, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

- Completed at a regionally accredited institution
- Earned with a minimum grade of C (credits earned with a grade of C- do not transfer)

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL LABORATORY SCIENCES AND MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCES

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in medical laboratory sciences (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-medical-laboratory-science) and master of science in health sciences in the field molecular diagnostic sciences (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-molecular-diagnostics)
engineering-applied-science/computer-science/ms) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year. Visit the program website (https://smhs.gwu.edu/academics/health-sciences-programs) for additional information.

**MINOR IN ANATOMY**

The Department of Anatomy and Regenerative Biology (http://smhs.gwu.edu/anatomy) in the School of Medicine and Health Sciences (http://smhs.gwu.edu) offers courses required for the 12-credit minor in human anatomy.

- Master of Science in Health Sciences in the field of medical laboratory science (p. 874)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 874)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 876)
- Master of Science in Health Sciences in the field of physician assistant (p. 875)
- Master of Science in Health Sciences in the field of translational microbiology (p. 877)

**Joint degree programs**

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 877)

**Military contract program**

- Master of Science in Health Sciences in the field of immunohematology (p. 872)

**Doctoral programs**

- Doctor of Philosophy in the field of translational health sciences (p. 883)
- Doctor of Physical Therapy (p. 883)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 885)

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MICROBIOLOGY**

**Offered online**

The master of science in health sciences in the field of clinical microbiology degree program, which is offered in a distance learning format, provides students with clinical microbiology and laboratory science coursework, a hands-on microbiology practicum that prepares students for a diagnostic microbiology laboratory position, and eligibility for national certification examinations in clinical microbiology. The program includes additional graduate coursework to prepare students for careers in research institutions, public health laboratories, biotechnology firms, pharmaceutical companies, or governmental agencies.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/clinical-microbiology) for additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits in required courses.
MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

The master of science in health sciences in the field of clinical research administration is designed to prepare health sciences professionals to participate in the science and business of the development process. Our rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

Upon completion of the graduate CRA program, the Program Student Learning Outcomes are:

- Apply effective leadership and management practices to effectively lead and/or manage inter-disciplinary teams/projects by applying critical thinking and problem solving skill sets
- Demonstrate a solid grasp of the clinical, regulatory and business requirements in the planning and conduct of a clinical trial.
- Demonstrate research design principles through integrating scientific, medical, regulatory and commercial requirements and creating clinical development plan sections that provide for benefit to risk assessments in the development of a new investigational product.
- Discuss the importance of assuring data integrity in a clinical trial and in the preparation of various clinical/regulatory documents.
- Formulate strategies to address ethical and cultural considerations for effective and compliant domestic or international clinical trial conduct, in relation to key areas such as human subjects’ protection, subject recruitment/retention, data integrity and risk assessment.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/clinical-research-administration) for additional program information.

REQUIREMENTS

The MSHS in the field of clinical research administration (CRA (http://smhs.gwu.edu/crl/programs/cra)) requires successful completion of 36 credits, including: 18 credits in clinical research administration, 9 credits of strategic leadership courses, 6 credits of graduate research coursework, and a 3-credit elective course.
### Master of Science in Health Sciences in the Field of Clinical and Translational Research

The master of science in health sciences in the field of clinical and translational research program provides graduates with the knowledge to lead broad interdisciplinary research initiatives. Students develop an effective approach to research that integrates basic, biomedical, clinical, and health policy research.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://smhs.gwu.edu/clinical-translational-research/programs) for additional program information.

**Requirements**

The following requirements must be fulfilled: 36 credits in required courses, including 27 credits in required courses and 9 credits in elective courses.

### Master of Science in Health Sciences in the Field of Health Care Quality

The master of science in health sciences in the field of health care quality program is designed to meet an emerging demand for quality and patient safety specialists who have the capacity and competence to grow and sustain a culture of continuous improvement at all levels and within every sector of the health care delivery system. The program helps prepare graduates for quality and patient safety leadership, management, and research positions within health care organizations or policy agencies. Upon completion of this program, students are able to:

- Develop, implement, and evaluate quality and patient safety improvement initiatives;
- Cultivate strategies to lead organizational change toward a quality-focused culture;
- Translate national quality expectations into daily operations;
- Apply processes and tools to measure, analyze, and interpret quality improvement data;
- Design and implement information technology systems to support quality assurance;
- Conduct research to drive clinical and operational decision-making.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/health-care-quality) for additional program information.

**Requirements**

The following requirements must be fulfilled: 36 credits in required courses.
The master of science (MS) in health sciences in the field of immunohematology (http://smhs.gwu.edu/crl/programs/military/immunohematology) degree program is a military contract program and open only to service members enrolled in the Military Specialist in Blood Banking Technology program at Walter Reed Army Medical Center, which is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The goal of the program is to prepare individuals to be competitive for careers in management, research and education in the area of immunohematology.

The MS program includes all aspects of blood transfusion medicine at the graduate level, including research methods, current topics in transfusion medicine, immunology, biochemistry, and genetics of all blood cell markers, as well as the indications, contraindications, and function of all blood components and therapeutic procedures. In addition to this didactic material, practical training in the areas of compatibility testing, donor collection, viral marker testing, component production and distribution, apheresis, education and research methods, histocompatibility testing, progenitor cell preservation, and quality assurance is also provided. Research in an area of immunohematology, culminating in a research project, is an integral part of the program.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/immunohematology) for additional program information.

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY**

The master of science (MS) in health sciences in the field of immunohematology degree program is a military contract program and open only to service members enrolled in the Military Specialist in Blood Banking Technology program at Walter Reed Army Medical Center, which is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The goal of the program is to prepare individuals to be competitive for careers in management, research and education in the area of immunohematology.
MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY AND BIOTECHNOLOGY

The master of science in health sciences in the field of immunohematology and biotechnology degree program is designed to provide certified blood bankers with a strong foundation in Immunohematology as well as molecular biology and biotechnology. Students develop the theoretical knowledge and practical skills for transfusion medicine research positions within hospital labs or blood centers or to become supervisors or managers in a blood banking laboratory.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/immunohematology-biotechnology) for additional information.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF INTEGRATIVE MEDICINE

The online master of science in health sciences (MSHS) in the field of integrative medicine (INTM) degree program provides a curriculum that represents the most progressive, scientifically rigorous, and forward thinking platform for medical wellness. Students develop a foundation and explore various intersections of INTM that contribute to patient wellness. Biostatistics and epidemiology courses provide an opportunity for students to collaborate with professionals from various disciplines, exploring philosophies and practices of translational research in human health. Through a series of practical application courses, students develop patient care plans, conduct case analyses, and evaluate practice standards to demonstrate competence of integrative medicine practice. Additional research coursework provides graduates requisite skills needed to participate in evidence-based research of clinical practice and outcomes research as part of a larger INTM network.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/immunohematology-biotechnology) for additional program information.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MEDICAL LABORATORY SCIENCE

The master of science in health sciences in the field of medical laboratory science (MLS) program, offered in a distance learning format, is a non-clinical program open only to students who are currently MLT or MLS/MT/CLS certified, specialist certified (e.g., SBB), or with subject technologist certification.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/medical-laboratory-sciences) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 15 credits in courses in the field and a mentored research project, 6 credits in strategic leadership courses, 12 credits in graduate research courses, and one 3-credit elective course.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCE

The master of science in health sciences in the field of molecular diagnostic science program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for positions in diagnostic clinical laboratories, public health laboratories, biotechnology companies, government agencies, law enforcement agencies, and research institutes. In addition, students who complete this program are eligible to take the Molecular Biology Board of Certification examination offered by the American Society for Clinical Pathology (ASCP).
Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/molecular-diagnostic-science) for additional information.

**Elective**

One MLS or HSCI course selected in consultation with the academic advisor.

* May be substituted with an elective course for students with current clinical molecular laboratory experience.

**MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT**

The master of science in health sciences in the field of physician assistant studies prepares individuals to practice medicine on health care teams with physicians and other providers. Students are prepared to provide care across the lifespan to patients from diverse populations in various clinical settings. It prepares individuals to work collaboratively in interprofessional patient centered teams.

The curriculum consists of 104 credits of professional coursework over twenty-four months of full-time study beginning in the summer session. The program curriculum emphasizes a scholarly approach to medicine, development of organizational and critical-thinking skills, and evidence-based medicine. The professional curriculum for PA education includes applied medical, behavioral and social sciences; patient assessment, clinical medicine, clinical specialties, health policy, professional practice issues, professional conduct and supervised clinical practice. The first twelve months are devoted to classroom and laboratory instruction including standardized patients, simulation activities and pre-clinical experiences. The final twelve months consist of six-week full time clerkships in seven areas of medicine plus an elective clerkship at regionally and nationally located clinical sites.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/physician-assistant) for additional program information.

The master of science in health sciences in the field of regulatory affairs degree program is designed to prepare graduates to facilitate and lead change and innovation in regulatory practice. Throughout the program, students develop strategies for integrating business needs into regulatory strategic planning and learn to evaluate the scientific and economic value of bringing new health care products to the global market.

The program helps prepare its graduates to:

- Lead and collaborate with all involved functions and stakeholders for effective development of medical products;
- Develop a broad understanding of the philosophies and roles of the domestic and international regulatory agencies that oversee drug, biologic, device and diagnostic development;
- Provide strategic direction, integrating business needs in matters of regulatory science and affairs.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/regulatory-affairs) for additional program information.

REQUIREMENTS

The Master of Science in Health Sciences in the field of Regulatory Affairs (RAFF) requires successful completion of 36 credits, including: 9 credits of the research coursework, 6 credits of strategic leadership courses, 18 credits in the field of regulatory affairs, and a 3-credit elective course.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF TRANSLATIONAL MICROBIOLOGY

The master of science in health sciences in the field of translational microbiology program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for research positions in public health microbiology laboratories, biotechnology companies, government agencies, and research institutes. This program is ideal for students who already have microbiology or medical laboratory sciences (MLS) certification, or for individuals who do not have an interest in becoming certified microbiologists.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/translational-microbiology) for additional program information.

JOINT MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Applicants with a strong interest in public health may wish to consider the joint master of science in health sciences (MSHS) in the field of physician assistant and master of public health (MPH) degree program. The three-year program provides both clinical and academic preparation for careers in medicine and public health. Students receive advanced training in the design of health studies, epidemiological methods, application of computers to public health, community medicine, and techniques of health promotion. Students also design a special research project in collaboration with faculty of the Milken Institute School of Public Health and local, national, or international public health organizations.

For the MPH degree, students choose from among the following tracks: community-oriented primary care, environmental health science and policy, epidemiology, global environmental health, and health policy.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the master of science in health sciences in the field of physician assistant (https://smhs.gwu.edu/physician-assistant) and the master of science in health sciences (http://publichealth.gwu.edu/academics/graduate/masters-programs/#joint) program websites for additional information.

COMMUNITY-ORIENTED PRIMARY CARE

Community-Oriented Primary Care Track

The following requirements must be fulfilled: 137 credits, including 100 credits in physician assistant courses, 13 credits in MPH core, 10 credits in prevention and community health courses, and 14 credits in community-oriented primary care track courses.

DOCTOR OF PHILOSOPHY IN THE FIELD OF TRANSLATIONAL HEALTH SCIENCES

The doctor of philosophy in the field of translational health sciences degree program helps prepare graduates to address complex health care challenges by conceptualizing health systems broadly in terms of transitions between basic scientific discovery, clinical insights, implications for practice, implications for population health, and improved global health.

The PhD requires 54 credits beyond a master’s degree, successful completion of three comprehensive examinations, a proposal defense, and a defended dissertation. The curriculum is blended, integrating didactic and facilitated learning activities from content. It is delivered via distance learning and on campus (two weekends per semester for a total of 32 hours per semester) at the Virginia Science and Technology (VSTC) campus in Ashburn, VA.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/translational-health-sciences) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 54 credits, successful completion of three comprehensive examinations, a proposal defense, and a defended dissertation.

DOCTOR OF PHYSICAL THERAPY

The doctor of physical therapy degree program provides quality graduate education committed to preparing highly skilled physical therapist who are able to practice in an evidence-based, and ethical manner, respectful of patients and clients from all backgrounds, across the lifespan, throughout the continuum of care, and at all levels of wellness and health. Graduates are respected practitioners who are able to meet the
multi-faceted role of a physical therapist with a commitment to service to the profession and the community and dedicated to life-long learning and scholarly inquiry.

The curriculum consists of 109 credits of professional coursework requiring thirty-three months of full-time study beginning in the fall semester. It combines content from the foundational sciences, behavioral sciences, clinical sciences, professional practice expectations, practice management expectations, and critical inquiry. Students develop the skills needed to examine, evaluate, diagnose, prognose, develop a plan of care, and implement and re-evaluate that plan of care for patients with dysfunction in the cardiopulmonary, musculoskeletal, neuromotor, and integumentary systems across the lifespan.

The curriculum is built on the overarching principles of integration and application. Information is integrated and applied throughout the curriculum using “standardized patients”, simulation and experiential learning activities. Clinical experiences are introduced early in the curriculum, in the second and fourth semesters. Three full-time clinical internships occur in semesters six, seven, and eight for a total of 34 weeks of full time clinical experience. Internships are located regionally, nationally, and internationally providing depth and breadth to each student’s unique educational experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/physical-therapy/dpt-program) for additional program information.

REQUIREMENTS

# DOCTORATE IN OCCUPATIONAL THERAPY

The School of Medicine and Health Sciences’ (SMHS) advanced-practice doctoral degree program in occupational therapy (OTD) is designed for registered occupational therapists who are seeking to advance their clinical reasoning and practice skills. The program enables graduates to transition from the level of generalist to that of a translational occupational therapy clinical scholar. After obtaining this degree, graduates are able to develop, evaluate, and promote new occupational therapy approaches to assessment and treatment in post-acute and chronic care that are grounded in neuroscience and reflect a transdisciplinary perspective.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/occupational-therapy) for additional program information.

## REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the Health Sciences program website (http://smhs.gwu.edu/academics/health-sciences) for additional information.

- Undergraduate certificate in the field of health sciences laboratory science (http://bulletin.gwu.edu/medicine-health-sciences/certificate/health-sciences-laboratory-science)

POST-BACCALAUREATE CERTIFICATE IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student’s foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum. The clinical practicum usually is taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Students must be able to fulfill the necessary time requirement for the practicum.* Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/blood-banking) for additional program information.

Completion of the certificate qualifies the graduate to take the Technologist in Blood Banking examination offered by national certifying agencies.

The following requirements must be fulfilled: 16 credits in required courses, including the clinical practicum.

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/microbiology) for additional program information.

**POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE**

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

The post-baccalaureate certificate in pre-medicine is designed to provide students with the foundational coursework, standardized test preparation, and access to real-world experience necessary for a successful medical school application. This full-time program, which can be completed in 12 months, is offered at GW’s Virginia Science and Technology Campus (VSTC). Visit the program website (https://smhs.gwu.edu/postbac-premed) for additional program information.

The following requirements must be fulfilled: 36 credits in required courses.
**GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION**

**REQUIREMENTS**

The following requirements must be fulfilled: 18 credits, including 15 hours in required courses and one 3-credit elective course. Courses successfully completed in this program are transferable to the master of science in health sciences (MSHS) in clinical research administration degree program.

**GRADUATE CERTIFICATE IN CLINICAL RESEARCH PRACTICE**

The graduate certificate in clinical research practice capitalizes on the foundational courses of clinical research, health informatics, epidemiology, and biostatistics to prepare the graduate with the requisite knowledge and skills to conduct clinical research in collaboration with sponsored research programs. The program of study has been drawn from the core program of study of the Master of Science in Health Sciences program (http://smhs.gwu.edu/crl/programs/ctr/curriculum/mshs).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

GRADUATE CERTIFICATE IN INTEGRATIVE MEDICINE

THE ONLINE GRADUATE CERTIFICATE IN INTEGRATIVE MEDICINE (INTM) RETAINS THE CORE CONCEPTS AND APPROACHES OF GW’S MASTER OF SCIENCE IN THE FIELD OF HEALTH SCIENCE IN INTM PROGRAM WHILE STILL OFFERING THE STUDENT A SCIENTIFICALLY RIGOROUS, CLINICALLY ORIENTED AND PROGRESSIVE CURRICULUM. THE CERTIFICATE PROGRAM REQUIRES SUCCESSFUL COMPLETION OF 18 CREDITS. GRADUATES ARE EQUIPPED TO EMBRACE THE CHANGING DEMANDS AND INNOVATIONS OF THE HEALTH CARE LANDSCAPE.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://smhs.gwu.edu/integrative-medicine/integrative-medicine-programs/graduate-certificate) for additional program information.

SCHOOL OF NURSING

Dean  P. Jeffries
Senior Associate Dean for Academic Affairs  J. Hoffman
Assistant/Associate Deans for Programs  M. Echevarria, K. Griffin, P. Slaven-Lee

Established in 2010, the George Washington University School of Nursing (GW Nursing) has a proven record of innovation, entrepreneurship and leadership. GW Nursing educates and inspires nurses to provide high-quality, compassionate, person-centered health care. It develops leaders who actively engage in health promotion, patient advocacy, and health care innovation, and prepares nurse educators to pursue quality and advance the profession.

GW Nursing programs include the bachelor of science in nursing (BSN), master of science in nursing (MSN), doctor of nursing practice (DNP), doctor of philosophy in the field of nursing (PhD), and post-master’s and graduate certificates. These programs emphasize the integration of nursing practice, research and policy with a strong focus on solving practical problems. This approach promotes strong nursing practice and leadership skills in GW Nursing graduates.

Vision
Compelled by the belief that all people deserve quality health care, we aspire to be trusted advocates for the advancement of societal well-being in the clinic, community and statehouse.

Mission
Prepare leaders and providers to improve the health of all people by leveraging our presence in the nation’s capital.

Diversity Statement
We cultivate excellence in teaching, learning, research and service through equal access to resources, opportunities and advancement for all members of our community. We foster a culture in which we acknowledge, discuss and address privilege to increase success among marginalized people. Our community is committed to the promotion of equity and social justice.

Values
GW Nursing supports and upholds GW’s values, which guide our students, faculty and staff to strengthen and improve our community.

- Excellence - We commit ourselves to the highest standards in all endeavors.
- Respect - We treat others with courtesy and dignity.
- Service - We embrace our responsibility to exceed the expectations of others who depend on our actions.
- Sustainability - We value and engage in sustainable practices that enhance current and future resources for our campus, our community and our world.
- Teamwork - We encourage collaboration to meet common goals and produce a sense of shared responsibility.

Accreditation
The George Washington University is accredited by its regional accrediting agency, the Middle States Association of Colleges and Schools. The BSN, MSN, DNP and post-graduate Advanced Practice Registered Nurse certificate programs at GW Nursing are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791. The BSN program has been granted full approval by the Virginia Board of Nursing (BON) and is currently in compliance with all regulations.

REGULATIONS

Admission
- Conditional Admission (p. 893)
- Advance Tuition Deposit (p. 893)
- International Applicants (p. 893)
- U.S. Citizens Living Abroad (p. 893)
- Non-Degree Seeking Students (p. 893)
- Readmission (p. 894)
- Change of Specialty (p. 894)
- Leave of Absence (p. 894)
- Transfer Credit (p. 894)
- Gap Analysis (p. 895)

Financial Regulations
- Drop-Refund Schedule (p. 895)
- Financial Aid (p. 895)
- Health and Safety (p. 896)
- Health and Accident Insurance (p. 896)
- Verification of Health Status (p. 896)
- Compliance with HIPAA and OSHA Guidelines (p. 896)
- Immunization Requirements (p. 896)

Academic Regulations
- Accommodations for Disability (p. 896)
- Technical and Academic Standards for Nursing Students (p. 897)
- Scholarship Requirements (p. 898)
- Time to Program Completion (p. 898)
- Academic Probation (p. 898)
Conditional Admission

Admission with conditions may be offered at the discretion of the admissions committee and the assistant/associate dean for the program. The terms of admission are outlined in the letter of admission from GW Nursing. Students enrolled in clinical-based programs must complete a criminal background check and drug screen prior to enrollment in a clinical course. Criminal background checks and drug screens are conducted through CastleBranch® (https://www.castlebranch.com). Students matriculating in clinical programs must also complete the pre-clinical requirements outlined in the Clinical Compliance Management section of the GW Nursing Bulletin.

Advance Tuition Deposit

Upon notification of admission, the student is required to officially accept the offer of admission on the TargetX platform (https://gw.force.com) and submit an advance tuition deposit of $500.00. The deposit is credited toward tuition and is nonrefundable. Failure to pay this deposit may result in the revocation of a student’s offer of admission.

International Applicants

International applicants should refer to related policies on the GW Bulletin. Applicants whose native language is not English or who are not citizens of countries where English is an official language must submit test scores from either Test of English as a Foreign Language (TOEFL) or academic International English Language Testing System (IELTS). The following are the minimum scores for admission consideration:

- TOEFL: 600 on paper-based; 100 on Internet-based
- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0

The language test requirement may be waived for applicants who hold a degree from an accredited college or university located in a country in which English is the official language and also the language of instruction at the institution.

U.S. Citizens Living Abroad

GW Nursing welcomes applications from citizens of the United States who are living abroad. Students living abroad are required to attend all simulation-based learning events on campus that are included in the plan of study. Nurse practitioner students living abroad are expected to complete required clinical hours with a minimum of three different clinical preceptors. Clinical and practicum placements must be approved by the program director and the assistant dean for the MSN or DNP program. Students who fail to meet clinical objectives may be required to travel to the U.S. for additional remediation and supervision prior to program completion.

Non-Degree Seeking Students

A student who wishes to take individual courses at GW Nursing must obtain permission to register as a non-degree seeking student. The application should be submitted on the TargetX platform (https://gw.force.com). The Assistant Dean of Student

Admission

To be considered for admission to any GW Nursing program, an applicant must complete the online application and pay an $80 fee on the TargetX (http://gwforce.com) platform application. Unofficial transcripts must be submitted from each academic institution attended, regardless of whether credit was earned. Detailed application information is available on the school website at nursing.gwu.edu. Applicants should refer to the individual program descriptions for details on prerequisites and supporting documentation, which varies by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Official copies of all transcripts are required upon matriculation. All records become the property of GW Nursing and are not returned. In addition, admitted applicants may need to submit information from a criminal background check, drug screen, physical examination and evidence of required immunizations and health insurance coverage depending on the program option.

Graduate Student Clinical and Practicum Policies

- Licensure (p. 902)
- Clinical Compliance Management (p. 902)
- Clinical Site Specific Requirements (p. 902)
- Clinical Rotation Data Forms and Deadlines (p. 902)
- Delay in Clinical Placement (p. 903)
- Notification of Clearance to Begin a Clinical Rotation (p. 903)
- Required Components of a Clinical Placement (p. 903)
- Clinical Site Withdrawal (p. 903)
- Change of Preceptor (p. 903)

Non-Academic Grievance Policy

- Resolving a Non-Academic Informal Complaint (p. 904)
- Initiating a Grievance (p. 904)
Leave of Absence

A leave of absence (LOA) is a temporary period of non-attendance available to continuing students. A student who must interrupt active pursuit of the degree may petition the Senior Associate Dean for Academic Affairs, through the assistant/associate dean of the respective program, for an LOA for a specified period of time, limited to a maximum of one calendar year. The LOA must be requested and approved by submitting the Leave of Absence and Continuous Enrollment Registration form (http://nursing.gwu.edu/forms) to the program director and assistant dean of the respective program on or before the first day of the term in which the leave of absence is to be taken, and the date of return from the LOA must also be recorded on this form. The period of time designated as an LOA does not count toward the time of completion of the respective program. If the request is approved, the student must register for absence LOA in each semester, following regular registration procedures.

Degree candidates who discontinue their studies without being granted an LOA and students granted leave who do not return to active study at the close of the period of approved absence must reapply for admission and are subject to the regulations and requirements currently in effect. The right to use university facilities is suspended while the leave is in effect. If required courses are not available at the time of a student’s return from an LOA, the student will be placed on continuous enrollment status for the semester.

Return from Leave of Absence

Students returning from LOA must complete a Return from Leave of Absence (http://nursing.gwu.edu/forms) form. If the program director imposes any conditions on the student’s return from an LOA, they communicate the conditions to the student in writing and send copies to the Senior Associate Dean for Academic Affairs and the Director of Student Services. A hold is placed on the student’s registration until the program director confirms in writing to the Director of Student Services that all conditions have been met for the student’s return. If no conditions have been imposed by the program director for return from an LOA, students are not required to receive approval to return if they are returning within the predetermined period. Upon return from an LOA, the student must meet the graduation requirements in effect for the class in which they will graduate. Exceptions to this LOA policy must be approved by the assistant/associate program dean in consultation with the Senior Associate Dean for Academic Affairs and the Assistant Dean of Student Affairs.

Change of Specialty

A change of specialty request is treated like a new application for admission. The student must complete the same application process and meet the same deadlines as other prospective students. Requests are considered during the normal admission cycle and occur only during the specialties’ regular admission term. There may be circumstances when the program director can make an exception to the timeline, in consultation with the program dean and Assistant Dean of Student Affairs. All deadlines for program- or track-specific clinical placement deadlines apply. Students already enrolled at GW Nursing do not receive preferential treatment in the selection process; their applications are considered along with all other applicants. The student’s current advisor must complete a Change of Specialty Recommendation (http://nursing.gwu.edu/forms) form to be included with the student’s application. The student remains in the original specialty with the assigned advisor until they are officially accepted into the new specialty. Students may not request a change of specialty from an MSN program into a DNP program. The DNP is a separate degree and not a change of specialty. MSN students must apply and receive an offer of admission for the DNP program if they want to pursue that degree.

Readmission

Students who were previously registered in a GW Nursing program but did not register during the immediately preceding semester (summer sessions excluded) must apply for readmission. Students who have attended other academic institutions while not enrolled at GW Nursing must have official transcripts sent directly to the GW Nursing Office of Student Affairs from each institution attended. Applications for readmission are considered based on regulations currently in effect. Upon readmission, the student is subject to the regulations and requirements in place at the time of readmission.
conferral. BSN students may not transfer any nursing course to GW Nursing. Applicants or admitted students are counseled by the program dean and/or student affairs staff that nursing courses completed at other academic institutions are not eligible for transfer into their GW Nursing program of study. Up to nine 9 credits in the BSN program are eligible to be applied to the MSN or DNP program at GW Nursing. The completed credits are eligible to be used for these graduate programs within five years of graduation. Students completing the registered nurse to bachelor of science in nursing option may have up to nine 9 credits applied to the MSN or DNP program at GW Nursing.

Graduate Students
Up to 6 credits of coursework may be accepted as transfer credit for graduate students, provided the coursework was completed within the past five years at an accredited college or university with a minimum grade of B. A limited amount of additional transfer credit may be approved upon petition to the assistant dean for the MSN or DNP program. GW Nursing reserves the right to determine course equivalency and degree applicability.

Degree candidates who are currently enrolled at this institution and plan to take courses at other accredited institutions for transfer credit must secure prior approval from the assistant dean for the MSN or DNP program and the Senior Associate Dean for Academic Affairs.

Gap Analysis
Applicants to certificate and graduate programs should request a gap analysis at the time of their application. GW Nursing gap analysis is performed by the director of the certificate, MSN or DNP specialty in which the student is enrolled to determine courses necessary to complete the degree or certification requirements. The gap analysis is part of the student’s permanent record.

Financial Regulations
GW Nursing adopted the following financial regulations for the academic year 2018-2019. Costs are expected to increase in subsequent years. Visit the University Financial Fees and Regulations website (http://bulletin.gwu.edu/fees-financial-regulations) for additional information.

Drop-Refund Schedule for Oregon Residents (Online Courses Only)
Oregon residents enrolled in an online education course are allowed a modified tuition refund policy in order to meet Oregon State Mandate OAR 583-030-0035(18)(c). An Oregon student who withdraws from an online course is eligible for a partial refund through the middle week of the term. Refunds are based on unused instructional time and are prorated on a weekly basis. Students must be current residents of Oregon at the time of course registration and withdrawal to be eligible for this modified refund policy.

Refund policies of the university are in conformity with guidelines for refunds adopted by the American Council on Education. Federal regulations require that financial aid recipients use such refunds to repay financial aid received for attendance that semester. This policy applies to institutional aid as well.

In no case is tuition reduced or refunded because of absence from classes. Authorization to withdraw and certification for work done is not given to a student who does not have a clear financial record.
Financial Aid
GW offers financial assistance to all eligible students from a variety of resources. Financial aid consists of awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans and employment based on academic achievement and demonstrated financial need. GW Nursing scholarships are only applicable to tuition and must be accepted for the term in which they were offered. Scholarships cannot be deferred to future semesters.

Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants or awards from more than one source, the combined amount may not exceed tuition charges; institutional aid is adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who are at least half-time, meet the minimum grade-point average for particular awards and are not financially encumbered by any other office of the university. Applications for institutional or federal aid may not be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of GW and may not be returned. Federal regulations require that GW report suspected cases of fraud or misrepresentation to the appropriate federal, state and local authorities.

Information on financial aid is assumed to be accurate at the time the current academic year GW Bulletin is published. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Health and Safety
Health and Accident Insurance
All GW students are required to have health and accident insurance. Students who fail to maintain such insurance may be placed on LOA without tuition refund. Undergraduate students are automatically enrolled in GW’s student health insurance program through Aetna. Students who have acquired their own insurance must waive the GW student health insurance each academic year and have this item removed from their bill. Graduate students must submit verification of health insurance coverage to the GW Nursing Clinical Placement Team. (https://nursing.gwu.edu/directory)

Verification of Health Status
GW Nursing requires all students to complete a full physical examination within twelve months prior to the beginning of clinical courses.

Compliance with HIPAA and OSHA Guidelines
The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of bloodborne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Students must complete the required university module on HIPAA.

Immunization Requirements
It is the law in the District of Columbia that all students under the age of 26 have a record on file with GW Medical Services (https://studenthealth.gwu.edu) documenting immunity to measles, mumps, and rubella (two immunizations with the initial dose given after the first birthday or positive titers), varicella (chickenpox—by immunization, documented history of disease, or positive titers), hepatitis B series, meningococcal vaccine (or meningitis waiver), and a current tetanus/diphtheria booster (within 10 years prior to the beginning of the semester).

In addition, the School of Nursing requires all clinical students to submit verification of health and immunization status prior to commencing any clinical coursework. All undergraduate and graduate students in clinical programs must submit the required documentation to Castle Branch (https://www.castlebranch.com). All students must have a hepatitis screening test (see immunization policy (https://registrar.gwu.edu/vaccination-requirements)). Students are responsible for providing proof of immunity to measles, mumps, rubella, and varicella by titer. Students must show documentation of TdAP (Tetanus, diphtheria, acellular pertussis) within the past seven years. Skin testing for tuberculosis exposure (PPD) is required on an annual basis. Annual influenza Immunization is required. GW Medical Services is available to provide any needed inoculations on a fee-for-service basis.

Undergraduate students who have not provided proof of necessary immunization by the end of the second week of classes may be removed from classes and are not permitted to register for the subsequent semester until such proof is provided. Graduate students are not permitted to enroll in clinical courses without completion of immunization requirements.

The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of blood borne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Students must complete the required university module on HIPAA.

Academic Regulations
Accommodations for Disability
Reasonable accommodations are made for applicants with disabilities who can meet the requirements noted above.
after review by the GW Office of Disabilities Services. These accommodations must be accomplished without altering the essential requirements of the nursing curriculum. Inability to meet the technical standards throughout program enrollment necessitates further review which may delay or terminate progression and/or enrollment in the program.

Any need for special accommodations must be addressed specifically by the student with the GW Office of Disability Services. Only the GW Office of Disability Services can recommend accommodations or state the specific accommodations that faculty members will provide. Coursework undertaken prior to the student’s application and approval for special accommodation is not subject to special accommodation. Such accommodations are not applied retroactively to completion of that process.

Technical and Academic Standards for Nursing Students

GW Nursing is committed to preparing knowledgeable, safe and ethical registered nurses and nurse practitioners who think critically. These individuals must be able to possess the necessary skills to provide high-quality, effective and efficient care for patients in a rapidly evolving health care system across a variety of practice environments. Students at all levels are required to master the essential competencies for practice as enumerated via the relevant professional national standards. In addition, all students must have sufficient capabilities and abilities in the following: Communication, Observation, Motor/tactile Function, Cognitive/Intellectual Function, and Behavioral and Social Attributes.

Communication

Communication includes the ability to speak, hear, read, write and document sufficiently to achieve an accurate and adequate exchange of information with other health care professionals, patients and their support network. The student must:

- Have the ability to receive and process auditory information and speak and write clearly in English in all communications with patients, their families and other health care professionals.
- Be able to communicate effectively through written, phone and electronic media.
- Be able to communicate sensitively with patients and their families.
- Be able to read sufficiently to comprehend complex medical literature and convey this information in easy-to-understand terms.
- Possess the ability to perceive forms of non-verbal interpersonal communications including facial expressions, body language and affect.

Observation

Observation includes the ability to perceive, using senses and mental abilities, the information presented in educational and clinical settings. Educational information will be presented in lectures, small groups and one-on-one interactions, as well as in written and audiovisual materials. The student must:

- Possess sufficient sensory (visual, auditory, tactile and olfactory) and mental abilities to accurately perceive information provided in the educational settings. This includes written and audiovisual materials, diagnostic images, microscopic images and physical examination.
- Be able to accurately observe (using visual, auditory, tactile, and/or olfactory senses) a patient’s medical condition, including patient affect, up close and at a distance, with and without medical instrumentation. This includes but is not limited to direct physical examination, radiography, electrocardiograms, sonograms, monitors and other graphic images.
- Be able to accurately perceive pain, pressure, temperature, position, vibration and movement relevant to the patient’s condition.

Motor/Tactile Function

Motor/tactile function includes the ability to physically move in close proximity at multiple heights around the patient in order to fully and accurately employ tactile and other sensory capacities. The student must:

- Possess sufficient motor function to directly perform palpation, percussion, auscultation and other diagnostic and therapeutic maneuvers.
- Be able to execute movements reasonably required to provide general and emergency medical care to patients. These skills require coordination of fine and gross motor skills, equilibrium and functional sensation.
- Possess the capability to manipulate equipment and instruments for the performance of basic examination and laboratory tests and procedures.
- Be able to move oneself from one setting to another and negotiate the patient care environment in a timely fashion that is safe for both patient and student.
- Be able to lift a minimum of 10 pounds, sufficient to assess a newborn, lift or provide a range of motion to a patient’s extremity, or ascertain patient’s motor reflexes
- Possess sufficient physical stamina to perform the rigorous course of didactic and clinical study. This includes long periods of sitting, standing and moving which are required for the classroom, laboratory and clinical experiences. Programs requiring high numbers of clinical hours expect students to provide 8-12 hour spans of time working with patients with minimal periods of inactivity.

Cognitive/Intellectual Function

Cognitive/intellectual function includes the capacity to seek and process information sensitively, accurately and efficiently from patients, their families and other health providers. The student must:
• Be able to retain and recall through short- and long-term memory the details of the patient’s history, physical and presenting complaint.
• Possess the ability to process and synthesize patient information in an accurate and timely way to assess, diagnose, identify and initiate next steps in the patient’s treatment and management.

Demonstrate cognitive and problem-solving skills in an efficient and timely manner in order to meet Program Competencies. Problem-solving is one of the critical skills demanded of nurses and advanced practice registered nurses. It includes the following abilities:

• Comprehension of visual-spatial relationships.
• Reading and understanding the medical literature and the patient’s chart.
• Learning, measuring, calculating, retrieving, prioritizing, analyzing, organizing, assimilating, integrating and synthesizing technically detailed and complex information and appropriately applying this information.

Behavioral and Social Attributes
Behavioral and social attributes includes sufficient awareness, insight and emotional self-control to place the needs of the patients and their families first. The student must:

• Possess emotional stability for full utilization of their intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to both didactic studies and patient care.
• Be able to develop mature, sensitive and effective relationships with patients and their family members, staff and colleagues.
• Demonstrate being able to work collaboratively and effectively as a small group member, as a health team member and as a team leader.
• Possess sufficient interpersonal skills to relate positively to people across society, including all ethnic backgrounds, economic levels, sexual orientations and belief systems.
• Possess compassion and concern for others, interest in and motivation for service, and integrity.
• Be able to put the patient, their family and the health care team ahead of their own needs, values and beliefs to accommodate the patient’s beliefs, values and preferences.
• Be able to function effectively in mentally and emotionally stressful situations.
• Demonstrate the ability to adapt to changing environments, to display flexibility and function in the face of uncertainties inherent in the clinical problems of many patients.
• Behave in an ethical and moral manner that is consistent with professional values, rather than allowing their own needs and beliefs to restrict the patient’s options.
• Be able to accept constructive criticism and appropriately respond through modification of their behavior.

Scholarship Requirements
All students must maintain satisfactory academic progress in attempted coursework to be eligible to continue enrollment in their program. GW Nursing students must maintain a minimum grade-point average of 3.0 during their degree program and receive no more than one notation of Z or W in any given semester. A minimum grade of B is required in clinical courses and a minimum grade of C is required in didactic courses. Graduate students must also earn a minimum grade of B in NURS 6220, NURS 6234, and NURS 6222. Although transfer credit may be assigned, courses taken at other institutions are not considered in computing the grade-point average. CR (Credit); AU (Audit) P (Pass); NP (No Pass); I (Incomplete); IPG (In Progress); W (Authorized Withdrawal); and Z (Unauthorized Withdrawal). A student who earns a grade below a B in a clinical course cannot progress in the clinical portion of the program until that course is successfully completed. Both grades remain on the student’s transcript and are calculated in the final grade-point average.

Time to Program Completion
Students admitted to a GW Nursing BSN program are allowed no more than six semesters (including summers) from the point of matriculation to complete all degree requirements and graduate.

Students admitted to a GW Nursing MSN program are allowed no more than four-and-a-half years [thirteen semesters (including summers)] from the point of matriculation to complete all degree requirements and graduate. Students admitted to a GW Nursing DNP program who entered through the post-BSN to DNP pathway are allowed no more seven years [twenty-one semesters including summers] from the point of matriculation to complete all degree requirements and graduate. If it becomes apparent that a student will not complete all degree requirements and graduate within the time allowed, the student may petition GW Nursing for an extension of time to complete their degree. To request an extension of time, students must complete a Policy Exception Request and submit the form to their program dean for review. If approved, the student must maintain appropriate registration during the authorized period of extension. An LOA is not permitted during the approved extension period.

Academic Probation
Students who fail to achieve a cumulative grade-point average of 3.0, or who have more than one notation of Z or W in each semester, are placed on academic probation for a period of one semester. Students on academic probation are required to meet with their academic advisor to develop an Academic Success Plan. Students must submit the Academic Success Plan to their appropriate program assistant dean and meet with their academic advisor prior to registration for the next semester.
to ensure progress is being made. While on probation, a student must achieve at least a 3.0 term grade-point average in each subsequent semester, be continuously enrolled or on an approved leave of absence or continuous enrollment, and not receive any unsatisfactory course grades as outlined in the Scholarship Requirements outlined previously. While on probation, undergraduate students are allowed to register for no more than 13 credits per semester, unless approved by the program director and associate dean for the BSN Program.

**Dismissal**

A student who fails a required course must repeat the course. Students are only allowed to repeat a required course once. When a student earns an unsatisfactory grade in a required course a second time, earn two or more unsatisfactory grades in one term, and/or violates the professional comportment standards outlined below, the student is academically dismissed from the program. Notification of academic dismissal is communicated to the student in writing by the assistant dean of the program, with copies to the Senior Associate Dean for Academic Affairs and the Assistant Dean of Student Affairs. The dismissal notification letter will be maintained in the official student record. It is the student’s responsibility to maintain current information (address, phone number, email address, emergency contact, etc.) with GW Nursing and the university. Students on probation who fail to adhere to the requirements of academic probation outlined previously are also subject to dismissal.

**Procedures on the Evaluation of Professional Comportment**

Students enrolled in GW Nursing programs are required to conform to all rules, regulations and policies outlined in the GW Bulletin. In addition to the GW Bulletin, GW Nursing students must adhere to the regulations outlined below.

As members of the health care community, GW Nursing students are expected to behave in a manner consistent with the principles and obligations inherent to professional practice. Some behaviors or patterns, either during the didactic or clinical phase, may raise concerns as to the student’s suitability to continue in the program of study. Inappropriate behaviors for a nursing student may include, but are not limited to, breaching patient confidentiality, using illegal drugs or abusing controlled substances, becoming sexually involved with a patient, undertaking a procedure or scope of practice beyond that of a student, disobeying or showing disrespect for others, threatening verbal or physical behavior toward others—including students, faculty or patients—showing a judgmental attitude toward patients, or revealing a lack of concern or compassion in practice. The process described below is intended to address behaviors that are unacceptable to GW Nursing and raise questions about the student’s fitness for the practice of nursing.

When a problem with professional comportment (other than academic dishonesty) regarding a student is perceived, the observer communicates this concern to the relevant program director. If the communication is verbal, it must be confirmed immediately by a signed written statement or else it is not pursued further. Upon receiving such a communication, the program director creates a confidential file in which all documents pertaining to the matter will be placed. The contents of the file are preserved for a period of time not less than five years from the date of separation or graduation from GW Nursing. Access to this file is restricted to the student under consideration, the program director, the assistant dean for the program, the Senior Associate Dean for Academic Affairs, the Dean, the Assistant Dean of Student Affairs and their staff, the GW Nursing Ad Hoc Committee, if one is constituted, and attorneys for GW and the student.

The assistant dean for the program notifies the student in writing that they have received a communication from an individual who perceives that the student has a problem with professional comportment. The notice includes a copy of these procedures. The assistant dean for the program meets informally with the student as soon as possible. At that meeting, or as soon thereafter as possible, the assistant dean for the program may do one or more of the following:

- Advise the student.
- Recommend that the student seek professional assistance, at the student’s expense.
- Gather additional information through contacts with the student, their peers, faculty, professional consultants, and/ or any other source deemed to have relevant information. With the student’s concurrence, they may be referred for a medical, psychiatric, and/or psychological evaluation. With student consent, the written report from the health care provider will be included in the student case file.
- Refer the case to a GW Nursing Ad Hoc Committee (“Ad Hoc Committee”).

An Ad Hoc Committee and its Chair is named by the assistant dean for the program. The Ad Hoc Committee, including the Chair, consists of three GW Nursing faculty members and the assistant dean of student affairs. The assistant dean for the program notifies the student, in writing, of the composition of the Ad Hoc Committee. The student is allowed ten calendar days from the mailing of this notice to object to any faculty member appointed to the Ad Hoc Committee. Such objection must be sent to the assistant dean for the program in writing. The assistant dean for the program, at their sole discretion, determines whether an objection warrants the appointment of one or more different persons to the Ad Hoc Committee. The Ad Hoc Committee investigates the allegation. The Ad Hoc Committee reviews the student’s confidential file and interviews him or her.

The student under review and/or the student’s advisor may attend the information gathering sessions. The information gathering sessions are transcribed. The student and/or their advisor may submit written questions to be answered by
persons interviewed by the Ad Hoc Committee, but the procedure regarding their questioning is left to the sole discretion of the Ad Hoc Committee, including whether the questions submitted by the student and/or their advisor are modified and/or posed to the persons interviewed. The student also may suggest persons be interviewed by the Ad Hoc Committee, but the decision to interview such persons is left to the sole discretion of the Ad Hoc Committee. The student may speak on their behalf and may submit other material. The student’s advisor may not speak. The materials and/or testimony to be considered and the weight to be given to them are left to the sole discretion of the Ad Hoc Committee. The student and the student’s advisor cannot be present when the Ad Hoc Committee meets in executive session.

Meetings of the Ad Hoc Committee are confidential. Minutes of the Ad Hoc Committee are placed in the student’s confidential file upon the completion of the Ad Hoc Committee’s review. The Chair and all members are required to be present for all meetings of the Ad Hoc Committee. The Ad Hoc Committee makes its final recommendation(s) to the assistant dean for the program. Such recommendation(s) are in writing and shall include findings of fact and the reasons for the recommendation(s). There is no required format for the recommendation(s). The content of the recommendation(s), including the nature and specificity of the findings and reasons, is left to the sole discretion of the Ad Hoc Committee. The Chair may review and sign the final recommendation(s) on behalf of the Ad Hoc Committee. The recommendation(s) could include, but is (are) not limited to, one or more of the following:

• Advising the student.
• Recommending that the student seek professional assistance, at the student’s expense.
• Recommending conditions with which the student must comply in order to continue in GW Nursing.
• Recommending suspension from GW Nursing.
• Recommending dismissal from GW Nursing.

The Ad Hoc Committee must agree that its recommendation(s) is (are) supported by a preponderance of the evidence (more likely than not). The Ad Hoc Committee shall make an additional recommendation regarding whether the confidential file will be made part of the student’s permanent academic record. The Ad Hoc Committee forwards its recommendation(s) to the Senior Associate Dean for Academic Affairs.

The Senior Associate Dean for Academic Affairs reviews the student’s confidential file and the recommendation(s) of the Ad Hoc Committee. The Senior Associate Dean for Academic Affairs, at their sole discretion, may meet with the student prior to making their determination. The Senior Associate Dean for Academic Affairs takes whatever action they deem appropriate, including dismissal of the student from GW Nursing. The Senior Associate Dean for Academic Affairs informs the student in writing of their decision.

The student shall have fifteen calendar days in which to appeal the decision of the Senior Associate Dean for Academic Affairs. Such appeal shall be in writing sent to the GW Nursing Dean. The scope of this appeal is limited to the Dean or their designee’s determination as to whether the procedures set forth in these procedures have been complied with. Failure to appeal the decision shall be deemed a waiver of any and all rights to challenge the Senior Associate Dean for Academic Affairs decision and shall be deemed an acceptance of the decision.

The Dean or their designee make a decision in the written record of the proceedings. Their decision is final. At any time during the process, if the student in question selects an attorney as their advisor, GW will have its attorney present. The student, therefore, is required to inform the assistant dean for the program seven days in advance of the hearing if counsel is to be present.

**Evaluation of Academic Performance**

Faculty members are responsible for evaluating the performance of students in a meaningful, useful and timely manner and for assigning grades on a basis that is rational, just and unbiased. The authority for assignment of grades rests with the faculty members in the respective programs.

**Appeal Procedures for Cases of Alleged Improper Academic Evaluation**

The only grounds for a grade appeal request, is arbitrary and capricious grading, meaning that the grading standard was not properly applied. Arbitrary and capricious grading is considered in the event the assignment of the course grade is based upon something other than performance in the course; the assignment of the course grade is made based upon the unreasonable application of standards different from the standards that were applied to other students in that course; or when the assignment of the course grade is based upon a substantial and unreasonable departure from the written academic standards for that course. In the event a student believes the grade has been assigned in an arbitrary or capricious manner, a Grade Appeal Form may be submitted to the appropriate program director. If a mutually satisfactory resolution is not achieved, the student may use the following appeal procedures:

• The student must submit a written appeal along with the Grade Appeal Form to the associate/assistant dean for the program within five business days of notification of decision from the program director.
• The assistant dean for the program meets with the student to attempt to resolve the issue.
• If the issue cannot be resolved, the assistant dean for the program forms a three-person special committee Grade Appeal Committee). The Grade Appeal Committee consists of three members of the GW Nursing faculty, including at least one faculty familiar with the course, one faculty from
the same program (preferably from the other community, and the Assistant Dean for Diversity and Inclusion).

- The Grade Appeal Committee conducts a hearing at which the student and the faculty member have an opportunity to state their views on the academic evaluation at issue.
- The Grade Appeal Committee makes a recommendation to the assistant dean for the program regarding how the issue should be resolved. The assistant dean for the program makes the final decision regarding the grade appeal and advises the student and the faculty member in writing of his or her decision.

Prerequisites and Corequisites

Students who want to take courses that have prerequisites must successfully complete prerequisites before the term in which they take the next course. When taking a course with a co-requisite, students must take the co-requisite during the same term as the course that requires it. Students should consult their plan of study and/or their syllabi for course-specific prerequisites and/or co-requisites.

Independent Study

The purpose of an independent study is to increase the student’s exposure to and involvement in nursing research or practice under the direction of a faculty mentor. The student is responsible for identifying and initiating a contract with a faculty member involved in, or who has expertise in, their practice or research project area. Input from the student’s advisor is required before the plan for independent study is finalized. The faculty mentor for an independent study must be qualified to teach at the appropriate level (doctoral for doctoral degrees), have expertise in the area of the independent study focus, and be an associate or regular member of the faculty. The faculty mentor can academically supervise the independent study while the student works with the non-regular faculty. The student and faculty mentor must establish mutually agreed upon objectives and evaluation criteria. The agreement is recorded in an Independent Study Contract, and a signed copy is forwarded to the assistant dean of the student’s program with a copy to the Assistant Dean of Student Affairs. Credit for independent study can vary from 1 to 3 credits per semester, depending on the program, the nature of the objectives, and requirements. Credit value is calculated as fifty to seventy clinical hours equaling 1 semester credit for practicum/clinical. One hour per week, for fifteen weeks in a semester, equals 1 semester credit for didactic coursework.

At the completion of the independent study, students must meet with their faculty mentor for a final evaluation. The faculty mentor submits a grade when the student is deemed to have satisfactorily completed the independent study objectives. Independent studies may not extend beyond the semester of enrollment.

Audit

GW Nursing undergraduate students who have a cumulative grade-point average of at least 3.0 may take graduate-level non-clinical courses for audit. Written approval from the course instructor, advisor and associate deans for the MSN and DNP programs is required. Enrollment in a graduate-level course does not in any way imply subsequent GW Nursing approval for credit toward a graduate degree. Graduate-level tuition and fees apply. Students are responsible for additional costs.

Course Waiver

If a student takes a course at an institution other than GW, they must apply for a waiver to substitute a course if the course is in a GW Nursing required plan of study. The number of credits is not transferred to GW Nursing and the student will need to make up the waived number of credits. A course waiver must be requested in writing and must include justification for the request from the student’s program director, who meets with the student to discuss how the waiver may affect their plan of study. For undergraduate students, the course waiver must be requested upon admission to the program, and can only be for a pre-nursing course. No nursing courses can be waived based upon coursework at another institution. The student must have earned a grade of “B” or better in the course to be eligible for a waiver. MSN and DNP students must provide the program director with a course description or syllabus of the previously taken course, along with a transcript showing the grade the student received. The program director will make a recommendation regarding the waiver request. The student must then submit the program director’s recommendation, waiver request, official transcript and course description to the assistant dean of their program. The advisor, the student, and program director are notified of the decision in writing. All students receiving course waivers will be required, with advisement, to take another course that will provide the appropriate number of credits to compensate for the waived course.

Relocation During Program of Study

Graduate students relocating during their program of study must contact their GW Nursing program director to discuss ramifications of moving to a state where GW Nursing does not operate or operates on a restricted basis. Students planning to relocate to a state where GW Nursing does not operate or operates on a restricted basis (LA, ND, AL, NY, TN), will not be able to complete their program of study as planned. Students should inform their program director and program associate of any planned relocation as soon as possible.

Advising

Each GW Nursing student is assigned an academic advisor. The relationship is established to assure that the student is progressing satisfactorily in the program. Students enrolled in undergraduate, graduate or certificate programs must meet with their advisor, in person or electronically, to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program director. Advisors provide office hours and opportunities for advising by appointment. Should any
other non-academic concerns (i.e., personal bereavement or medical issues) arise that hinders a student's academic success in their degree program, the student should first discuss the issue with their assigned advisor. The advisor may refer the student to the program director, assistant dean for the program, the Assistant Dean of Student Affairs, or to one of the university services for consultation.

Changes in Course Enrollment
A student may not substitute one course for another without the approval of the program director and the assistant dean for the program. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the assistant dean for the program to withdraw from a course. Students are subject to all GW financial regulations with respect to change in course enrollment as outlined in the GW Bulletin. Any refunds of tuition follow the guidelines related to Tuition Refunds described above.

Honor Society
The GW Nursing Phi Epsilon chapter is a chartered member of Sigma Theta Tau International, the national honor society of nursing. GW Nursing students who meet the qualifications specified by the constitution of Sigma Theta Tau are eligible for membership and may be nominated by an assistant dean for the program, faculty member or a Sigma Theta Tau member.

Graduate Student Clinical and Practicum Policies
Licensure
Graduate students, as well as RN to MSN students, must hold an active, unencumbered RN license in the state where they are completing their clinical rotation. This may require students to obtain additional RN licensure during their GW Nursing program. Students are responsible for understanding the terms and limitations of their RN license. Some states participate in the Nurse Licensure Compact (NLC) which gives multistate rights to RNs residing in a member state.

The GW Nursing Clinical Placement Team does not search the State Board of Nursing websites or NURSYS to obtain or verify a student’s license. Students are not permitted to complete clinical hours in the states where GW Nursing does not operate. Students must allow adequate time before a clinical rotation to obtain any additional RN licenses for a clinical rotation and are responsible for submitting documentation to the GW Nursing Clinical Placement Team.

Students planning to complete clinical rotations outside of the United States must contact the GW Nursing Clinical Placement Team to verify licensure requirements. Any clinical hours accrued in the absence of the appropriate licensure are not counted toward the total number of hours required in the program of study.

Clinical Compliance Management
GW Nursing partners with a thorough background screening program called CastleBranch®. This service, in collaboration with the GW Nursing Clinical Placement Team, facilitates drug testing services. This service provides GW Nursing with the ability to assure safe student clinicians and keeps our clinical programs in compliance with the necessary regulations, accreditations and standards. Documentation of the following is required prior to starting clinical rotations:

- Criminal background check
- Urine drug test
- Proof of current RN license if applicable (in any and all states where you intend to complete clinical)
- Proof of current CPR certification (AHA or ARC)
- Proof of current personal health insurance (copy of health insurance card)
- Physical examination
- Immunization records: HepB, MMR, Varicella, TDaP, Seasonal flu, Meningococcal
- Annual TB test (PPD, QFT or chest X-ray if positive PPD or allergic)
- Verification of OSHA training
- Verification of HIPAA training
- Digital Photo

Students are not permitted to enter the clinical setting until all required items have been submitted to CastleBranch®. Entering the clinical setting prior to completing CastleBranch® requirements may be grounds for dismissal dismissed from their program of study. Any clinical hours accrued in the absence of required documentation are not counted toward the total number of hours required in the program of study.

Clinical Site Specific Requirements
In addition to GW Nursing clinical requirements, clinical sites may have additional requirements. Students are responsible for meeting these requirements prior to starting the clinical rotation. Students are expected to notify the GW Nursing Clinical Placement Team when all additional requirements have been met. Students are not permitted to start the clinical rotation until all site-specific requirements have been met and reported to the placement team. Any clinical hours accrued prior to meeting these requirements are not counted toward the total number of hours required in the program of study.

Clinical Rotation Data Forms and Deadlines
All nurse practitioner (NP) students are expected to submit a Clinical Rotation Data form (http://nursing.gwu.edu/forms) indicating where and when they intend to start a clinical rotation, the clinical preceptor and other site-specific information. A new data form must be submitted for each rotation, regardless if the student has been with the preceptor or at the clinical site previously. Rotation data forms must be submitted by the semester deadlines posted in the Blackboard
nurse practitioner community. Delay in form submission may result in a delay in the clinical placement or inability to place a student in time to meet course requirements.

**Delay in Clinical Placement**

Students who have not submitted a rotation data form 30 days in advance of the start of the semester are not permitted to enroll in the clinical course. Students who have not met clinical requirements and/or have not been cleared for clinical placement due to failure to secure a clinical site by the mid-semester [week five of a ten-week term; week seven of a fifteen-week term] are required to withdraw from the clinical course. A grade of “W” is awarded and the student is expected to repeat the course.

**Notification of Clearance to Begin a Clinical Rotation**

Once clinical requirements have been met and all required legal documents have been processed, students are notified by the GW Nursing Clinical Placement Team via email that they have been cleared to begin the clinical rotation. Clearance is sent to the student’s GW email account. Permission to begin clinical may only be granted by the GW Nursing Clinical Placement Team. Students who enter the clinical setting prior to receiving clearance from the GW Nursing Clinical Placement Team may be dismissed from their program of study. Any clinical hours accrued prior to receiving clearance from the GW Nursing Clinical Placement Team are not counted toward the total number of hours required in the program of study.

**Required Components of a Clinical Placement**

Prior to submitting a Clinical Rotation Data form (http://nursing.gwu.edu/forms), students are expected to discuss their plans for completing clinical hours with their clinical advisor. Students who have not yet been assigned a clinical advisor (those preparing to enter their first clinical course) should review the clinical requirements that can be found in the Blackboard GW Nursing nurse practitioner community. All Clinical Rotation Data forms are reviewed by faculty prior to initiation of the placement process to ensure appropriateness of the site. Clinical clearance includes the following:

- Faculty approval of site and preceptor
- A fully executed clinical affiliation agreement between GW Nursing and the clinical site
- Receipt of preceptor information
- An active, unencumbered RN license for the student in the state of the clinical site
- All GW Nursing preclinical requirements have been completed and uploaded to CastleBranch©
- All state regulatory requirements
- All site-specific requirements

**Clinical Site Withdrawal**

All nurse practitioner (NP) students are expected to submit a Clinical Rotation Data form indicating where and when they intend to start a clinical rotation, the clinical preceptor data, and other site-specific information. Once a student submits a Clinical Rotation Data form (http://nursing.gwu.edu/forms) to the GW Nursing Clinical Placement Team, it is the student’s responsibility to notify the GW Nursing Clinical Placement Team if they no longer intend to complete clinical hours at that clinical site. In order to do so, students must complete the Clinical Site Withdrawal form (http://nursing.gwu.edu/forms). Completion of this form informs the GW Nursing Clinical Placement Team that they should no longer devote resources to securing the clinical placement. GW Nursing works to enhance relationships with clinical site administrators and preceptors. Students are therefore required to notify the clinical site directly if they no longer intend to complete clinical hours at that site. If the clinical site notifies GW Nursing that the site can no longer accept the student, a member of the GW Nursing Clinical Placement Team contacts the student directly.

**Change of Preceptor**

All GW Nursing graduate students must work with a licensed preceptor at an approved clinical site. The GW Nursing Clinical Placement Team reviews and verifies the credentials of all preceptors. When a student is notified of a change in the preceptor by a clinical site, they are required to complete the Preceptor Change form (http://nursing.gwu.edu/forms). This form is required to:

- Change preceptor - This form should be used when the submitted preceptor can no longer precept a student and has been replaced by another preceptor at the same site.
- Add another preceptor - This form should be used when a student has more than one preceptor at the same site.
- Remove preceptor - This form should be used when the submitted preceptor can no longer precept a student and another preceptor has not yet been assigned.

The Preceptor Change form is to be used only after a Clinical Rotation Data form (http://nursing.gwu.edu/forms) has been submitted for a clinical placement. Students must complete this form for any and all preceptor changes. Students may not begin working with a new preceptor until the form is reviewed and verified by the GW Nursing Clinical Placement Team. Preceptors are also required to submit information to the school. It is imperative that students notify the GW Nursing Clinical Placement Team of all preceptor changes to ensure timely and accurate clinical placement.

**Non-Academic Grievance Policy**

If a student has a non-academic complaint, the student may seek resolution through the process outlined below.
Resolving a Non-Academic Informal Complaint
The student must first discuss and attempt to resolve the issue with whomever the issue arose. If such an informal discussion is not possible, or the issue is not resolved, then the student should file the Informal Complaint form with the Office of Student Services. The student must initiate a complaint no later than ten business days after the alleged incident. The Director of Student Services collaborates with the appropriate administrator or designee and shall attempt to resolve the matter and report the decision, in writing, to the complainant(s) and respondent(s) via their GW email address(es) within five business days of receiving the complaint.

Initiating a Grievance
If the complaint is not resolved informally and the student wishes to continue the process, the student must present a completed Non-Academic Grievance Petition form to the Assistant Dean of Student Affairs. A non-academic grievance must meet the definition in order to be reviewed and/or heard and not be covered by any other GW Nursing or university policy, procedure or administrative rule (i.e., student code of conduct). The Assistant Dean of Student Affairs shall attempt to resolve the matter and is required to report the decision, in writing, to the complainant(s) and respondent(s) via their GW email addresses within five business days of receiving the grievance petition.

Prior to any grievance action, the complainant(s) must attempt to obtain a satisfactory resolution through the Informal Complaint process. A grievance petition must be filed no later than five business days after the notice of informal complaint resolution decision, or if no decision was issued, no later than ten business days after the applicable decision deadline.

UNDERGRADUATE
Bachelor's programs
• Bachelor of Science in Nursing (p. 913)
• Registered Nurse to Bachelor of Science in Nursing

Registered Nurse to Master of Science in Nursing programs
• Registered Nurse to Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner
• Bachelor of Science in Nursing to Master of Science in Nursing, Family Nurse Practitioner
• Registered Nurse to Master of Science in Nursing, Nurse Midwifery

GRADUATE
Master's programs
• Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner (p. 919)
• Master of Science in Nursing in the field of family nurse practitioner (p. 921)
• Master of Science in Nursing in the field of nurse-midwifery (p. 921) (collaborative program between GW School of Nursing and Shenandoah University (http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs))
• Master of Science in Nursing in the field of nursing leadership and management (p. 922)
• Master of Science in Nursing in the field of psychiatric mental health nurse practitioner (http://bulletin.gwu.edu/nursing/msn-psychiatric-mental-health-nurse-practitioner)

Combined programs
• Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 919)
• Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (http://bulletin.gwu.edu/nursing/msn-dnp-adult-gerontology-primary-care-nurse-practitioner)
• Dual Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (http://bulletin.gwu.edu/nursing/msn-dnp-family-nurse-practitioner)

Doctoral programs
• Doctor of Nursing Practice in the field of Executive Leadership (http://bulletin.gwu.edu/nursing/dnp-executive-leadership)
• Doctor of Nursing Practice in the field of Health Care Quality (http://bulletin.gwu.edu/nursing/dnp-health-care-quality) (not accepting applications)
• Doctor of Nursing Practice in the field of Nursing Practice (http://bulletin.gwu.edu/nursing/dnp-nursing-practice)
• Doctor of Philosophy in the field of Nursing (http://bulletin.gwu.edu/nursing/phd-nursing)

CERTIFICATES
Certificate programs
Post-Master’s Certificates
• Adult-Gerontology Acute Care Nurse Practitioner (p. 923)
• Adult-Gerontology Primary Care Nurse Practitioner (p. 924)
• Family Nurse Practitioner (p. 924)
• Psychiatric Mental Health Nurse Practitioner (p. 925)

Graduate Certificates
• Health Policy and Media Engagement (p. 923)
• Nursing Education (p. 924)
FACULTY

Associate Research Professor  D. Lupu

Assistant Research Professor  E. Athey

Clinical Professor  K. Wyche

Clinical Associate Professor  P. Slaven-Lee

Assistant Clinical Professors  C. Reisenberg

Clinical Education Instructors  C. Farina, R. Mance, C. Seaton, J. Wavelet

Clinical Instructors in Nursing  J. Clarke, K. Stevens

Lecturers in Nursing  M. Brown, C. Cummings

Research Instructors  E. Salsberg, L. Wilson

Instructor  W. Shanley

Visiting Instructor  E. Choma

Adjunct Clinical Professor  L. Henrikson

Adjunct Clinical Instructor  J. Walsh

COURSES

Explanation of Course Numbers

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

NURS 3101. Ethical Foundations of Nursing. 3 Credits.
Ethical theory and principles as they relate to a variety of common ethical and moral dilemmas that challenge nursing professionals in their clinical practice.

NURS 3102. Nutrition for Health Professionals. 3 Credits.
Human nutrition fundamentals and the scientific foundation; nutritional requirements related to changing individual and family needs, food choices, health behaviors, food safety, prevention of chronic disease and nutrition-related public health in the United States and other countries.

NURS 3103. Human Anatomy and Physiology I. 4 Credits.
Fundamental structures and functions as they relate to the human body: homeostasis, anatomical language and body organization, tissues and histology, integumentary; skeletal; muscular; nervous, and endocrine systems. Students should have a basic background in introductory cell/molecular biology before enrolling.

NURS 3104. Human Anatomy and Physiology II. 4 Credits.
Fundamental structures and functions as they relate to the human body: homeostasis, anatomical language and body organization, tissues and histology, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Students should have a basic background in introductory cell/molecular biology before enrolling. Prerequisite: NURS 3103.

NURS 3105. Microbiology for Health Professionals. 4 Credits.
The structural and functional characteristics of microbes; prokaryotic, eukaryotic, and viruses, in the context of human health.

NURS 3110W. Transition into the Nursing Profession. 2 Credits.
Values and characteristics of the nursing profession in the context of history and current legal, regulatory, and ethical contexts. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

NURS 3111. Health Assessment. 3 Credits.
Knowledge and skills necessary for conducting comprehensive and need-specific health assessments for individuals in both family and community contexts and determining areas in which health promotion activities should be implemented or reinforced. Corequisites: NURS 3112, NURS 3113, NURS 3118 and NURS 3119. Restricted to students enrolled in the bachelor of science in nursing program.
NURS 3112. Nursing Practice and Clinical Reasoning I: Adult and Aging Acute and Chronic Illness. 3 Credits.
Values, knowledge, and competencies at the foundation of safe, evidence-based, and professional holistic nursing care of adults with common medical and surgical needs. Corequisites: NURS 3110W, NURS 3111, NURS 3113, NURS 3118 and NURS 3119 Restricted to students in the bachelor of science in nursing program.

NURS 3113. Clinical and Nursing Skills Lab: Adult Medical-Surgical I. 6 Credits.
Introduction and application of values, knowledge, skills and competencies through critical thinking and effective communication to provide safe, evidence-based, professional and holistic nursing care of adults with common medical and surgical needs. Corequisites: NURSE 3110W, NURS 3111 and NURS 3118.

NURS 3114. Nursing Practice and Clinical Reasoning II: Advanced Adult Medical-Surgical. 3 Credits.
Builds on the basic concepts introduced in NURS 3112, incorporating complex, multi-system disease processes; assessing and managing clients/patients in a hospital environment; providing safe, evidence-based professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs. Corequisite: NURS 3116. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3112 and NURS 3113.

NURS 3115. Clinical and Nursing Skills Lab: Adult Medical-Surgical II. 4 Credits.
Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Restricted to students enrolled in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3118 and NURS 3119.

NURS 3116. Nursing Practice and Clinical Reasoning III: Psychiatric Mental Health Nursing. 3 Credits.
Theoretical principles, concepts, and skills needed to provide safe and effective nursing interventions to clients across the lifespan who are experiencing psychiatric and mental health conditions. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3118 and NURS 3119.

NURS 3117. Nursing Practice and Clinical Reasoning IV: Maternity and Women’s Health Care. 3 Credits.
Nursing interventions used in health promotion, risk reduction, clinical decision making and management of women’s health issues, perinatal care of mothers and infants, gynecological health, and men’s reproductive health. Includes clinical experiences. Corequisites: NURS 4116, NURS 4119 and NURS 6203 Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3114, NURS 3115, NURS 3116, NURS 3118, NURS 3119 and NURS 4118.

NURS 3118. Pharmacology I. 2 Credits.
The underlying principles of pharmacology and medication administration. Corequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113 and NURS 3119. Restricted to students in the bachelor of science in nursing program.

NURS 3119. Pathophysiology. 3 Credits.
Pathophysiology and diagnostic assessments of common disease conditions affecting individuals across the lifespan. Corequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113 and NURS 3118 Restricted to students in the bachelor of science in nursing program.

NURS 3213. Adult Medical-Surgical Lab I. 4 Credits.
Values, knowledge, skills, and competencies at the foundation of safe, evidence-based, professional, holistic nursing care of adults with common medical and surgical needs; critical thinking and effective communication skills used in clinical and lab environments to deliver safe, evidence-based care. Laboratory fee. Corequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3118 and NURS 3119.

NURS 4099. Variable Topics. 1-6 Credits.
Assigned topics determined by the School of Nursing. Restricted to students with prior permission of the undergraduate division of the School of Nursing.

NURS 4109. Introduction to Perioperative Nursing. 3 Credits.
The role of and fundamental knowledge, skills, and competencies needed by the perioperative nurse.

NURS 4116. Children and Families. 3 Credits.
Focus on families with usual childhood issues and with children who require acute and chronic care. Working with persons of diverse backgrounds, nursing colleagues, and other members of the interdisciplinary team, students prioritize and provide nursing care in hospital and community-based settings. Includes clinical experiences. Corequisites: NURS 3114 and NURS 3115 Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112 NURS 3113 and NURS 3118.

NURS 4117. Nursing Practice and Clinical Reasoning V: Community and Public Health Nursing. 3 Credits.
Principles of community and public health nursing with an emphasis on vulnerable populations; epidemiologic, demographic, economic, and environmental health factors used to identify community-oriented strategies aimed at primary, secondary, and tertiary levels of prevention. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 3119, NURS 4116, NURS 4118, NURS 4119, NURS 6203 and NURS 6207.

NURS 4118. Pharmacology II. 1 Credit.
Principles of pharmacology and mechanisms of action of drug prototypes used in clinical practice. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3118 and NURS 3119.
NURS 4119. Patient Safety and Health Care Quality. 3 Credits.
Processes and skills needed to provide safe, quality nursing care, encompassing the five critical competencies: providing safe, patient-centered care; working in interdisciplinary teams; employing evidence-based practice; applying quality improvement; and using informatics. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3114, NURS 3115, NURS 3116 and NURS 4118.

NURS 4120. Capstone: Transition to Practice. 6 Credits.
Preparation for the transition from nursing student to graduate nurse. Students critically analyze, synthesize, and apply knowledge, skills, theories, and concepts learned in the program in a precepted clinical area of special interest. Focuses in part on preparation for the National Council Licensure Examination–RN (NCLEX–RN) with emphasis on test-taking strategies, problem solving, critical thinking, and computer assisted instruction; comprehensive assessment/readiness test and secure predictor tests for the NCLEX–RN are administered at the end of the program. Prerequisites: NURS 3110, NURS 3111, NURS 3113, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 4116, NURS 4119, NURS 6201, NURS 6203 and NURS 6204.

NURS 4121. Nursing Advancement Portfolio. 0-15 Credits.
Review of the student’s professional portfolio for the purpose of verifying competencies in three essential areas of knowledge and clinical skills required for the bachelor’s-level nursing student.

NURS 4122. Capstone: Transition Into Professional Practice. 2 Credits.
Critically analyze, synthesize, and apply knowledge, theories, and concepts learned in the program to make the transition from nursing student to graduate nurse. Corequisites: NURS 4117 and NURS 4123. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 4116, NURS 4119, NURS 6203 and NURS 6205.

NURS 4123. Senior Practicum: Transition Into Clinical Practice. 5 Credits.
Students partner with a registered nurse in a clinical setting to synthesize and apply concepts and skills learned in previous coursework in professional practice. Corequisites: NURS 4122 and NURS 4417. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3113, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 4116, NURS 4119, NURS 6203 and NURS 6205.

NURS 4207. Principles of Nursing Research and Evidence-Based Practice. 3 Credits.
Development of student skills in research and practice-related knowledge necessary to implement evidence-based practice. May be repeated for credit.

NURS 4417. Community and Public Health Nursing. 3 Credits.
Introduction to the roles and responsibilities of nurses in community and population-based health. Restricted to students in the RN to BSN program.

NURS 6001. Clinical Experience in San Jose, Costa Rica. 0 Credits.
GW students work with nursing students and faculty from Universidad Hispanoamericana to provide basic health care, health screening, and patient education to children and adults in various community facilities and homes in San Jose, Costa Rica. Restricted to students enrolled in the School of Nursing.

NURS 6002. Clinical Experience in Quito, Ecuador. 0 Credits.
In collaboration with Universidad San Francisco de Quito, GW students work with local communities to provide basic health services and health education programs for adults and children in Quito and neighboring areas. Graduate students may have an opportunity to work with local physicians. Restricted to students enrolled in the School of Nursing who are fluent Spanish speakers.

NURS 6003. Clinical Experience in Mukono District, Uganda. 0 Credits.
In collaboration with GW partner Omni Med, students will focus on training volunteer community health workers to screen for hypertension and provide health education programs on topics such as maternal - child health, sanitation and nutrition in Mukono District, Uganda. Restricted to students enrolled in the School of Nursing.

NURS 6004. Clinical Experience in Thomonde, Haiti. 0 Credits.
Students and faculty from the GW’s medical, physician assistant, and public health programs work in collaboration with partner organization Project Medishare to provide health services and education and disease prevention programs in rural clinics, schools, and villages in Thomonde, Haiti.

NURS 6005. Clinical Experience in Caracol, Haiti. 0 Credits.
In collaboration with health care providers from GW School of Nursing partner institution Pusan National University Yangsan Hospital, South Korea, and SAE-A Trading Company Ltd., students provide basic health services, health screening and education, and disease prevention programs to individuals and communities attending the medical mission clinic in Caracol, Haiti. Restricted to students enrolled in the School of Nursing.

NURS 6181. Creativity and Innovation in Health Care. 3 Credits.
The theoretical conceptualizations and practical applications to promote creativity and innovation in generating ideas, identifying opportunities, and solving problems.
NURS 6202. Concepts in Population Health. 3 Credits.
Students integrate and synthesize concepts associated with quality, health promotion, disease prevention, and chronic health problems within communities, the general population, and specific population groups; issues related to culturally diverse and vulnerable populations.

NURS 6203. Nursing Leadership. 3 Credits.
Evidence-based leadership skills as a core competency in nursing to improve quality in patient care and strengthen nursing as a profession. Emphasis on theories of leadership, personal leadership, skill building, team-building techniques, change, conflict resolution, motivation, and communication skills.

NURS 6204. Health Information and Technology. 3 Credits.
Key issues and concepts related to the use of technology and information management to support the provision of high quality health care and outcomes.

NURS 6205. Health Policy, Quality, and Political Process. 3 Credits.
Health policy process and analysis relevant to the three main components of policy: cost, quality, and access.

NURS 6207. Evidence-Based Practice for Health Care Researchers. 3 Credits.
Methodological issues of health care research; knowledge and skills needed to critically appraise and synthesize research results and evidence-based methods.

NURS 6208. Biostatistics for Health Care Research. 3 Credits.
Basic concepts and modeling approaches used in biostatistics through the use of health care research data.

NURS 6212. Quality Improvement Science. 3 Credits.
Introduction to quality improvement and patient safety theories, models, methods, and tools and their application in health care settings.

NURS 6213. Health Care Quality Analysis. 3 Credits.
Application of the principles of measurement development, specialized statistical analyses and data management processes to quality improvement and patient safety initiatives.

NURS 6214. Patient Safety Systems. 3 Credits.

NURS 6215. Pediatric Adversity and Early Childhood Development and Health. 3 Credits.
How major adversity in childhood can weaken developing brain architecture and impact physical and mental health; the impact of poverty and other social determinants of health on child well-being over the life cycle.

NURS 6220. Advanced Physiology and Pathophysiology. 3 Credits.
System-focused advanced physiology and pathophysiology for analysis of health deviations across the life span. Interpretation of changes in normal function that result in symptoms indicative of illness. This systematic assessment is foundational to clinical decision making and management of health deviations.

NURS 6222. Advanced Health Assessment and Diagnostic Reasoning. 4 Credits.
Nurse Practitioner and nurse-midwifery students will acquire the knowledge, skills and clinical foundation for advanced health assessment and diagnostic reasoning in the ambulatory health care setting. This course is a prerequisite to all other clinical courses and includes a fifteen-week online didactic course, a 75-hour clinical practicum and a three day, on-campus skills training session.

NURS 6224. Adult/Gerontology Primary Care Nurse Practitioner I, Practice Introduction. 4 Credits.
Theoretical and practical foundations of common primary care conditions in the adult patient. Assessment, diagnosis, and management of culturally diverse adults. Advanced decision making and clinical judgment, evidence-based practice, health promotion and disease prevention. Concurrent clinical practicum in a primary care setting under the supervision of preceptors and faculty. Prerequisites: NURS 6220, NURS 6222, NURS 6234.

NURS 6225. Adult/Gerontology Primary Care Nurse Practitioner II, Adolescent & Adult. 8 Credits.
Theoretical and practical foundations of primary care of culturally diverse adolescents, adults, and older adults with chronic health problems. Synthesis and integration of advanced decision-making skills, including diagnostic reasoning and clinical judgment, health assessment, health promotion, technology, and evidence-based practice. Concurrent clinical practicum in which students manage patients in a primary care setting under the supervision of preceptors and faculty. A two- to three-day on-campus session is required. Prerequisites: NURS 6224.

NURS 6227. Family Nurse Practitioner Clinical Practicum. 1-7 Credits.
Clinical practicum providing foundations of family primary care; focus on chronic health problems faced by families from culturally diverse backgrounds. Corequisites: NURS 6250, NURS 6251 and NURS 6252 Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6229. Adult/Gerontology Primary Care Nurse Practitioner III: Adult, Older/Frail. 8 Credits.
Theoretical and evidence-based practice foundations for assessment and management of patients across the aging continuum. The physiologic, psychological, socioeconomic, emotional, cultural, and spiritual dimensions of the older adult in relationship to self, family, care-givers, and the health-care system are emphasized. Concurrent clinical practicum in which the student manages patients across the older-age spectrum under the supervision of preceptors and faculty. An on-campus visit is required in which students participate in a Standardized Patient final examination test-out. Prerequisite: NURS 6225.
NURS 6230. Family Nurse Practitioner 1, Lifespan Primary Care/Diagnosis/Management. 4 Credits.
First clinically based course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: NURS 6220 Advanced Pathophysiology, NURS 6222 Advanced Health Assessment, NURS 6234 Advanced Pharmacology.

NURS 6231. Family Nurse Practitioner II: Lifespan Primary Care/Diagnosis/Management. 8 Credits.
Second clinically based course for family nurse practitioner students. Didactic and clinical experiences in family nurse practitioner care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: NURS 6220, NURS 6222, NURS 6230 and NURS 6234.

NURS 6232. Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management. 8 Credits.
Third course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Consideration of professional issues for FNP: Role development, certification, ethical issues in practice, interprofessional collaboration, and health care reimbursement issues are discussed and related to current clinical experiences. Prerequisites: NURS 6220 Advanced Pathophysiology, NURS 6222 Advanced Health Assessment, NURS 6234 Pharmacology, NURS 6230 FNP I, NURS 6231 FNP 2.

NURS 6233. Genetics for Health Care Providers. 3 Credits.
Basic scientific principles of genetics and their clinical applications.

NURS 6234. Advanced Pharm for Nursing. 3 Credits.
This course will cover an introduction to pharmaco therapeutics as it primarily applied to Advanced practice Nurses in Primary Care settings. The course will briefly review key pathophyslogic points, and then will discuss the pharmacotherapeutic interventions that may be considered in the treatment of disease. The course will begin with a general introduction to the foundations for professional practice and the concepts of pharmaco economics, pharmacokinetics, pharmacodynamics, and pharmacogenetics will be introduced. Issues surrounding community practices in pharmaco therapeutics will be explored. The course will then focus on pharmacological interventions in the spectrum of disease states seen in primary care practices involving the Nervous system, Immune System, Cardiovascular system, Hematologic system, Genitourinary system, Gastrointestinal system, Respiratory system, Endocrine system, Sensory systems, and the Skin.

NURS 6235. Adult-Gerontology Acute Care Nurse Practitioner 1: Introduction to Practice. 4 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; advanced decision making and clinical judgment in the application of evidence-based practice, health promotion, and disease prevention; acute and chronic conditions most commonly encountered across the spectrum of care delivery settings; theoretical, academic, and political elements involved in the evolution of the AGACNP role. In the required clinical practicum students manage patients’ acute, chronic, and critical conditions under the supervision of preceptors and faculty. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6236. Adult-Gerontology Acute Care Nurse Practitioner 2: Complex and Acute Illness. 8 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. Management of complex, acute stable and unstable conditions experienced by a variety of age groups from adolescents to middle-aged adults, to the elderly; application of advanced assessment techniques and technology for the diagnosis and management of patients. Both clinical and simulation experiences provide students with opportunities to provide advanced evidence-based interventions. Prerequisites: NURS 6235. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6237. Adult-Gerontology Acute Care Nurse Practitioner 3: Complex and Chronic Disease Mgt Adolesc/ Elderly. 8 Credits.
The third clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and the practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; the scope of practice of the AGACNP is not setting specific; rather, it is based on the needs of patients. Special issues for adolescents and the frail elderly and evaluation of care for adolescents, adults, and the elderly. Prerequisites: NURS 6235 and NURS 6236. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6241. The Health Care Enterprise. 3 Credits.
Overview of general management business principles related to health care systems. Management of patient-centered care delivery; strategic health care leadership; organizational, marketing, and fiscal management principles. Same as HSCI 6241.
NURS 6242. Psychopharmacology. 3 Credits.
Overview of the neurobiological and psychopharmacological principles for the clinical management of psychotropic medications in the treatment of mental illnesses across the lifespan; integrates neuroanatomy, pharmacogenomics, neurophysiology, pathophysiology, biochemistry, pharmacology and behavioral science. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6243. Addiction and Change. 3 Credits.
Principles of addiction and change with a focus on correlating how changes in behavior lead to recovery in addictions. Models of addiction and change, the neurobiology of addiction, behavior change theories and models, and treating addictions through behavioral mechanisms.

NURS 6244. Psychiatric/Mental Health Nursing with Families and Groups Across the Lifespan. 3 Credits.
Theoretical and conceptual models related to the developmental and functional processes within family systems, therapy groups, and psychoeducation groups; the PMHNP’s scope of practice as it relates to conducting family and group psychotherapy. Concurrent clinical practicum under preceptor and faculty supervision for a minimum of 75 hours over the course of the semester. Prerequisites: NURS 6242 and NURS 6245.

NURS 6245. Psychiatric/Mental Health Diagnostic Assessment Across the Lifespan. 4 Credits.
Theoretical and foundational knowledge for assessing, diagnosing, treating, and managing mental illnesses across the lifespan. Concurrent clinical practicum under the supervision of preceptors and faculty. Students must complete a minimum of 150 clinical hours. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6246. Psychiatric/Mental Health Advanced Practice Nursing with Individuals Across the Lifespan. 3 Credits.
Examines, analyzes, and evaluates treatment models and evidence-based interventions for the care of individuals living with acute and chronic mental illnesses across the lifespan. Concurrent clinical practicum under the supervision of preceptors and faculty. Students must complete a minimum of 75 clinical hours. Prerequisites: NURS 6242 and NURS 6245.

NURS 6247. Population-based Psychiatric/Mental Health Advanced Practice Nursing Across the Lifespan. 2-3 Credits.
Clinical practicum designed to build psychiatric mental health nurse practitioner skills in a variety of clinical settings. Students integrate foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: NURS 6242 and NURS 6245.

NURS 6248. Integrated Application of Psychiatric/Mental Health Advanced Practice Nursing. 3 Credits.
Developing competency in the PMHNP role; integration of foundational knowledge from coursework to provide safe and competent behavioral health care to individuals across the lifespan. Restricted to students in the post-master’s certificate in psychiatric/mental health nurse practitioner program. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6242, NURS 6244, NURS 6245, NURS 6246 and NURS 6247.

NURS 6250. Family Nurse Practitioner I for Nurse Practitioners: Adult Primary Care Diagnosis Management. 2 Credits.
First theory course for family nurse practitioner students who are nationally certified in another APRN population. Focus is on prevention, screening, and the diagnosis and management of acute and chronic health problems across the lifespan. Corequisite: NURS 6227. Prerequisite: NURS 6222.

NURS 6251. Family Nurse Practitioner II for Nurse Practitioners: Lifespan Primary Care Diagnosis Management. 4 Credits.
Second theory course for family nurse practitioner students nationally certified in another APRN population; prevention, screening, and the diagnosis and management of acute and chronic health problems across the lifespan. Corequisite: NURS 6227. Prerequisite: NURS 6250.

NURS 6252. Family Nurse Practitioner III for Nurse Practitioners: Lifespan Primary Care Diagnosis Management. 4 Credits.
Third theory course for family nurse practitioner students nationally certified in another APRN population; common acute and chronic problems across the lifespan; professional issues, role development, certification, ethical issues in practice, interprofessional collaboration, and health care reimbursement issues. Corequisite: NURS 6227. Prerequisite: NURS 6251.

NURS 6258. Leadership Capstone Pract I. 3 Credits.
Nursing 6258 is the first of a two-semester capstone course designed to provide a mentored practicum that offers the opportunity to apply leadership content and refine leadership abilities in a setting and practice area mutually agreed upon by the student and course faculty.

NURS 6259. Leadership Capstone Pract II. 3 Credits.
Nursing 6259 is a continuation of NURS 6258 and is designed to provide a mentored internship practicum, the opportunity to apply leadership content, and refine leadership abilities.

NURS 6262. Leadership Coaching in Nursing. 3 Credits.
Theoretical foundations and evidence for leadership coaching in nursing; the different applications of coaching in nursing management. Executive coaching, team coaching, peer coaching, and personal career coaching. Application and evaluation of multiple models, competencies, and methodologies for nursing leadership coaching through learning activities and live demonstration. Creation of a complete evidence-based coaching strategy for a case study.
NURS 6274. Health Economics & Finance. 3 Credits.

NURS 6282. Teaching and Learning in Health Care I: Foundations of Instructional Design. 3 Credits.
Principles of instructional design with an emphasis on the use of active, authentic learning and assessment methods in academic and health care delivery settings; analyzing learning needs, defining learning objectives, planning and sequencing strategies to support learner mastery, and assessing learning outcomes.

NURS 6283. Teaching and Learning in Health Care II: Learner Engagement. 3 Credits.
Theory- and evidence-based strategies and techniques to promote learner engagement, interactivity, and deep levels of learning; theories and principles of learner-centered teaching to facilitate learning in didactic and clinical settings.

NURS 6284. Teaching and Learning in Health Care III: Program and Curriculum Development. 3 Credits.
Design, development, implementation and evaluation of academic, clinical, and professional educational programs in nursing and other health professions; analysis and integration of national, professional and institutional policies, requirements, and standards to develop an outcomes-based curriculum.

NURS 6285. Overview of Health Care Policy. 3 Credits.
Federal, state, and local legislative, regulatory, electoral, and judicial structures and processes; applications to health care problem identification, policy decision making and implementation.

NURS 6286. Problem Analysis and Health Policy Formulation. 3 Credits.
Major health problems in the United States from within the framework of policy analysis; problem identification, agenda setting, policymaking, budgeting, implementation, and evaluation.

NURS 6287. Policy and Politics of Health Care Financing and Reimbursement. 3 Credits.
Perspectives on health care financing and reimbursement; the role of health professionals; direct and indirect influences of current health policies and reimbursement on cost, quality, access, and patient experience of care. Prerequisites: NURS 6285 and NURS 6286.

NURS 6288. Influencing Health Care Regulatory Policy. 3 Credits.
Analysis of rulemaking and regulatory processes that have an impact on health-related issues; workforce scopes of practice; public safety; and roles and influence of federal agencies and private organizations charged with implementing legislation. Prerequisites: NURS 6285 and NURS 6286.

NURS 6289. Influencing Health Care Legislative Policy. 3 Credits.
Constituent representation and fiduciary roles and responsibilities through participation on boards and committees; preparation of briefing materials, testimony, public comments regarding proposed rules. Corequisite: NURS 6287. Prerequisites: NURS 6285 and NURS 6286.

NURS 6290. Global Health for Health Care Professionals. 3 Credits.
Global health problems and issues from an interdisciplinary perspective; social determinants of health, health disparities, disease burden measurement and trends; possible policy solutions; and key ethical and human rights concerns.

NURS 6291. Advanced Topics. 1-9 Credits.

NURS 6292. Teachw/Tech.inHealthProfession. 3 Credits.

NURS 6295. Health Care Quality Process. 3 Credits.

NURS 6297. Independent Study. 1-9 Credits.

NURS 6298. NP Clinical Completion. 1-5 Credits.

NURS 8401. Org Concepts in Nursing. 3 Credits.

NURS 8402. Knowledge Management in Nursing. 3 Credits.
The use of knowledge management and information technology as it applies to health care; strategies to improve the efficiency and effectiveness of health care with the use of technology.

NURS 8403. Translating Research into Practice. 3 Credits.
Models and processes of evidence-based practice, strategies to translate evidence into practice, and tools useful for promoting practices in health care settings.

NURS 8404. Health Services Research and Policy for Nurses. 3 Credits.
Data and methods for health services research, policy analysis, health care policy making, and the relationships among them; linkages between nursing, health care policies, and related health services research. Prerequisite: NURS 6202.

NURS 8405. Healthcare Quality Improvement. 3 Credits.

NURS 8407. Grant Writing. 3 Credits.

NURS 8409. Health Care Quality Practicum. 3 Credits.
Application of quality improvement processes and patient safety theories, models, methods, and tools in health care settings to conceive and execute a quality improvement (QI) project in an organizational setting. The final deliverable is a comprehensive QI project report.
NURS 8410. Executive Presence I. 2 Credits.
NURS 8411. Executive Presence II. 2 Credits.
This is a continuation of Executive Presence I. In this course, the student will examine power shifts in leadership, revisit change as a stimulus for innovation, participate in an interactive session for individuals who can practice communicating their practicum proposals and receiving friendly feedback and constructive input from their peers, and re-evaluate the leadership development plan designed in Executive Presence I.

NURS 8412. HC Finance for Nurse Leaders. 3 Credits.
NURS 8413. Adult-Gerontology Acute Care Nurse Practitioner: Advanced Role Immersion. 3 Credits.
Students develop and integrate bedside with systems and population level competencies; role development, leadership, interdisciplinary collaboration, systems management, and evidenced-based practice are discussed and applied to concurrent clinical experiences; independent practice skills in the context of interdisciplinary teams. Prerequisites: NURS 6235, NURS 6236 and NURS 6237. Recommended background: prior enrollment in NURS 6220, NURS 6234 and NURS 6222.

NURS 8414. DNP Residency. 3 Credits.
NURS 8416. Entrepreneurship for Nurse Leaders. 3 Credits.
Concepts and methods of the entrepreneurial process for the nursing professional; the initial step of identifying and exploring an issue through pitching a final product.

NURS 8440. Philosophy of Science and Theories. 4 Credits.
Philosophy of science and scientific methodology in historical context; competing philosophical viewpoints about the nature of scientific knowledge and the implication for knowledge development in nursing science; theoretical foundations of research studies. Restricted to Majors Only.

NURS 8441. Statistics for Health Care Research I. 3 Credits.
Intermediate-level statistics applicable to the analysis of health care data.

NURS 8442. Statistics for Health Care Research II. 3 Credits.
Advanced-level statistics applicable to the analysis of health care data.

NURS 8443. Research Program Development Seminar I. 2 Credits.
Application of ethical principles to the conduct of research; ethical influences and perspectives related to the development and implementation of the research dissertation.

NURS 8444. Research Program Development Seminar II. 1 Credit.
Introduction to select professional roles and guidance on preparation for associated responsibilities; forming an effective research team; generating meaningful and impactful scholarship.

NURS 8445. Experimental and Quasi-Experimental Research Designs. 3 Credits.
Formulation of research questions, hypotheses, measurement, sampling, data collection, and statistical approaches for various experimental and quasi-experimental research designs.

NURS 8447. Measurement for Health Care Research. 3 Credits.
Measurement theories, principles, and techniques essential for the development and analysis of assessment instruments used in health care research; reliability and validity analysis, generalizability theory, item analysis, linking and scaling procedures, and adjustments for measurement error.

NURS 8448. Systematic Review and Meta-Analysis. 3 Credits.
Systematic reviews and meta-analyses, and their relative utility in answering research questions; formulating questions, defining criteria for including or excluding studies, methods for data extraction, grading the risk for various kinds of bias, and performing a meta-analysis.

NURS 8449. Non-Experimental Research Design. 3 Credits.
Evaluation of secondary data analysis, surveys, case-control studies, cohort studies, and mixed methods approaches.

NURS 8455. Dissertation. 10 Credits.
Culminating research experience for students in the doctoral program in nursing. Following defense of the dissertation proposal, students work with the research advisor and dissertation committee to design and implement a research study, analyze data, and interpret and contextualize findings using the study framework and current state of the science.

NURS 8498. Research Project Proposal. 3 Credits.
NURS 8499. Clinical Research Project. 3 Credits.
Individual investigation of a clinical problem with relevance to the student's practice setting. Students work under the direction of a faculty committee to prepare a written and oral report of their findings. Prerequisite: NURS 8498.

UNDERGRADUATE PROGRAMS

Bachelor's programs
- Bachelor of Science in Nursing (p. 913)
- Registered Nurse to Bachelor of Science in Nursing

Registered Nurse to Master of Science in Nursing programs
- Registered Nurse to Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner
- Bachelor of Science in Nursing to Master of Science in Nursing, Family Nurse Practitioner
- Registered Nurse to Master of Science in Nursing, Nurse Midwifery
BACHELOR OF SCIENCE IN NURSING

The bachelor of science in nursing (BSN) is an accelerated, 15-month program for second-degree or eligible military students. The program is offered at the Virginia Science and Technology Campus in Ashburn, Virginia, where students put theory into practice through the school’s Simulation Learning and Innovation Center (https://nursing.gwu.edu/simulation).

Second-degree students must hold a bachelor’s degree in a non-nursing discipline from an accredited institution of higher learning and have taken all prerequisite courses to qualify for the program. Veterans may use their military experience to count toward the minimum of 60 college-level credits and prerequisites. All branches of the military are accepted, no prior medical experience is necessary.

Students earn up to 9 graduate credits that may be applied toward the master of science in nursing (MSN) and BSN to doctor of nursing practice (DNP) programs within five years of receiving the BSN degree.

- Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).
- Visit the GW Nursing (https://nursing.gwu.edu) website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The followed requirements must be fulfilled: 60 credits including the required curriculum and at least 700 clinical hours; clinical hours are a component of some required courses.

General Education and advanced standing

3 credits in ethics
8 credits in human anatomy and physiology
3 credits in microbiology
3 credits in nutrition
3 credits in statistics
3 credits in English composition
12 credits in humanities/social sciences
3 credits in mathematics
12 credits in natural sciences

Students must complete 60 credits of coursework, including core requirements and electives, in addition to the required curriculum and at least 700 clinical hours.

The following requirements are applicable to students who matriculated prior to fall 2018:

REGISTERED NURSE TO BACHELOR OF SCIENCE IN NURSING

The online registered nurse (RN) to bachelor of science in nursing (BSN) degree program is available to students with an associate’s degree who are eligible to take the National Council Licensure Examination-Registered Nurse (NCLEX-RN). Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses.

Students must become licensed as a registered nurse within the first semester of matriculation in the program. Students earn 15 graduate credits as part of the program, up to 9 of which may be applied toward the master of science in nursing (MSN) program or the BSN to doctor of nursing practice (DNP) program within five years of the BSN being conferred.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing (https://nursing.gwu.edu) website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

General Education and Advanced Standing

3 credits in ethics
8 credits in human anatomy and physiology
3 credits in microbiology
3 credits in nutrition
3 credits in statistics
3 credits in English composition
12 credits in humanities/social sciences
3 credits in mathematics
12 credits in natural sciences
The following requirements must be fulfilled by all students in the registered nurse to bachelor of science in nursing program: 36 credits, including 33 credits in required courses (including 15 credits awarded for portfolio review) and one 3-credit elective course.

The following requirements apply to students who matriculated prior to fall 2018:

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The online registered nurse (RN) to master of science in nursing (MSN) in adult-gerontology primary care nurse practitioner is appropriate for both recent and experienced nurses with an associate degree. The program leads to the completion of bachelor of science in nursing (BSN) and MSN degrees. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of enrolling into this program and are required to attend three on-campus experiences related to MSN courses (NURS 6222, NURS 6225 and NURS 6229).

Upon completion of the program, students are eligible to sit for the nationally recognized American Association of Nurse Practitioners or American Nurses Credentialing Center certification examination for adult-gerontology primary care nurse practitioner.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, FAMILY NURSE PRACTITIONER

The online registered nurse (RN) to master of science in nursing (MSN), family nurse practitioner degree program is appropriate for both recent and experienced nurses with an associate’s degree. The program leads to the completion of bachelor of science in nursing (BSN) and MSN degrees. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of matriculation in the program and must attend three on-campus experiences related to MSN courses (NURS 6222, NURS 6231, and NURS 6232).

Upon completion of this program, students will be eligible to sit for the nationally recognized American Association of Nurse Practitioners or American Nurses Credentialing Center certification examination for family primary care nurse practitioner.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, NURSE MIDWIFERY

A collaboration between the School of Nursing and Shenandoah University (SU), the online registered nurse (RN) to master of science in nursing (MSN), nurse midwifery program is appropriate for both recent and experienced nurses with an associate’s degree. The program leads to the completion of the bachelor science in nursing (BSN), MSN, and postgraduate certificate in nurse-midwifery. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits...
from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of matriculation in the program. In addition, students attend four on-campus experiences related to MSN courses, one at GW (NURS 6222) and three at SU (NM 610, NM 620, and NM 660). Core requirements for the BSN and MSN are completed through GW, which confers both degrees. Nurse-midwifery didactic and clinical components of the curriculum are fulfilled through SU, which awards the post-graduate certificate in nurse-midwifery.

Upon completion of the program, students are eligible to sit for the nationally recognized American Midwifery Certification Board examination for nurse-midwifery.

Shenandoah University School of Nursing (https://www.su.edu/nursing) is fully accredited by the Accreditation Commission for Midwifery Education.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

GRADUATE PROGRAMS

Master's programs

• Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner (p. 919)
• Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner (p. 920)
• Master of Science in Nursing in the field of family nurse practitioner (p. 921)
• Master of Science in Nursing in the field of family nurse practitioner (p. 921) (collaborative program between GW School of Nursing and Shenandoah University)
• Master of Science in Nursing in the field of nursing leadership and management (p. 922)
• Master of Science in Nursing in the field of psychiatric mental health nurse practitioner (http://bulletin.gwu.edu/nursing/msn-psychiatric-mental-health-nurse-practitioner)

Combined programs

• Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 919)
• Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (http://bulletin.gwu.edu/nursing/msn-dnp-adult-gerontology-primary-care-nurse-practitioner)

• Dual Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (http://bulletin.gwu.edu/nursing/msn-dnp-family-nurse-practitioner)

Doctoral programs

• Doctor of Nursing Practice in the field of Executive Leadership (http://bulletin.gwu.edu/nursing/dnp-executive-leadership)
• Doctor of Nursing Practice in the field of Health Care Quality (http://bulletin.gwu.edu/nursing/dnp-health-care-quality) (not accepting applications)
• Doctor of Nursing Practice in the field of Nursing Practice (http://bulletin.gwu.edu/nursing/dnp-nursing-practice)
• Doctor of Philosophy in the field of Nursing (http://bulletin.gwu.edu/nursing/phd-nursing)

DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The dual Master of Science in Nursing (MSN) in the field of Adult-Gerontology Acute Care Nurse Practitioner (http://bulletin.gwu.edu/nursing/msn-adult-gerontology-acute-care-nurse-practitioner) and Doctor of Nursing Practice (DNP) (http://bulletin.gwu.edu/nursing/doctor-nursing-practice) program allows students to earn the MSN and DNP sequentially with 3 credits shared between programs, thereby decreasing the number of credits normally required for the DNP degree. All requirements for both degrees must be fulfilled.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.
clinical settings, including urgent care centers, critical care units and inpatient medical-surgical or specialty units.

Students are prepared to be eligible to sit for the nationally recognized American Nurses Credentialing Center certification examination for adult-gerontology acute care nurse practitioner. Clinical placements are selected by the program director and carried out in Northern Virginia, Maryland, or Washington, DC. All students attend several on-campus experiences related to MSN coursework and clinical skills development and assessment.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 33 credits in field-specific courses, and completion of 625 clinical hours.

Students will complete 650 clinical hours.

**MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER**

The master of science in nursing in the field of adult-gerontology primary care nurse practitioner program prepares registered nurses to be advanced practice leaders and inter-professional team members providing care for acute and critically ill patients and their families. Acute care nurse practitioners attend to adolescents and adults across the continuum of care, including in urgent care centers, critical care units, and inpatient medical-surgical or specialty units. Acute care offers a high-intensity environment that requires the fast-paced critical thinking skills developed in this program.

Clinical placements are arranged by the program director and take place in Northern Virginia, Maryland, or Washington, DC. At this time, this program is available only to applicants who are able to carry out their clinical rotations in those areas.

Students may choose to enroll in the program on a full- or part-time basis.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 30 credits in field-specific courses, a 3-credit elective course, and completion of 625 clinical hours.

Students will complete 625 Clinical hours.

A 3-credit elective course.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER

The master of science in nursing in family nurse practitioner (FNP) program prepares registered nurses for leadership in primary care for families and individuals of all ages. This specialty stresses the integration of research and nursing practice with a strong emphasis on solving real-world problems. The curriculum provides the theoretical and practical foundations for nurses to expand their scope of practice. Simultaneous clinical experiences ensure that students meet all criteria to sit for the nationally recognized American Association of Nurse Practitioners or American Nurse Credentialing Center certification examination for the family nurse practitioner. Students may choose to enroll in the program on a full- or part-time basis. Students in the FNP option are required to complete three on-campus components related to courses NURS 6222, NURS 6230 and NURS 6232. Students complete 700 clinical hours with an approved preceptor.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSE-MIDWIFERY

The master of science (MSN) in nursing in nurse-midwifery is a collaboration with Shenandoah University (SU). The program prepares graduates to be eligible to take the American Midwifery Certification Board’s national certification examination. The nurse-midwifery degree program at SU is fully accredited by the Accreditation Commission for Midwifery Education.

921

School of Nursing
Core courses required for the MSN are completed at GW, which awards the MSN degree, while the nurse-midwifery didactic and clinical components of the curriculum are fulfilled through SU, which awards the post-graduate certificate in midwifery. Students have access to the resources and experts at both institutions. Offered in a versatile distance learning format, the program allows professional nurses to advance their education while continuing to work. In addition, there are selected on-campus sessions for skills training and education as well as clinical practicums in sites across the country. Students may choose to enroll in the program on a full- or part-time basis.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 47 credits, including 9 credits in professional core, 6 credits in research, and 13 credits in field-specific courses at GW and 19 credits in nurse-midwifery courses at Shenandoah University.

**MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSING LEADERSHIP AND MANAGEMENT**

The master of science in nursing in nursing leadership and management program, offered online, is designed to prepare graduates for upper-level positions in the field by enhancing the depth and breadth of the practicing clinical professional’s knowledge and skills. The program focuses on leadership development by training nurses to think and act strategically, participate in policy decisions, and lead organizations through change and improvement. Students may choose to enroll in the program on a full- or part-time basis.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

**REQUIREMENTS**

The following requirements must be fulfilled: 36 credits including 9 credits in professional core courses, 6 credits in research courses, and 21 credits in field-specific courses.

Students will complete 300 practicum hours in this program.

CERTIFICATE PROGRAMS

Certificate programs

Post-Master’s Certificates

• Adult-Gerontology Acute Care Nurse Practitioner (p. 923)
• Adult-Gerontology Primary Care Nurse Practitioner (p. 924)
• Family Nurse Practitioner (p. 924)
• Psychiatric Mental Health Nurse Practitioner (p. 925)

Graduate Certificates

• Health Policy and Media Engagement (p. 923)
• Nursing Education (p. 924)

GRADUATE CERTIFICATE IN HEALTH POLICY AND MEDIA ENGAGEMENT

The graduate certificate in health policy and media engagement is available online for health-related professionals from various disciplines, including nursing, public health, medicine, law, business and public administration. Students expand knowledge of media, legislative, executive, judicial and financial reimbursement processes to then analyze issues, propose policy and regulatory solutions, and advocate for policies and their relevant stakeholders.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

POST-MASTER’S CERTIFICATE IN ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The post-master’s certificate in adult-gerontology acute care nurse practitioner program prepares registered nurses to be advanced practice leaders and interprofessional team members to provide care for acute and critically ill patients and their families in settings such as urgent care centers, critical care units, and inpatient medical-surgical or specialty units. Offered on a part-time basis, the certificate can be completed in five semesters.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

**POST-MASTER'S CERTIFICATE IN ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER**

The post-master’s certificate in adult-gerontology primary care nurse practitioner is designed for advanced practice nurses who wish to expand their scope of practice. Coursework includes didactic and clinical experiences that focus on the primary care needs of patients, families, and communities from adolescence through adulthood.

Specific admission requirements are shown on the [Graduate Program Finder](http://www.gwu.edu/all-graduate-programs). Visit the [GW Nursing website](https://nursing.gwu.edu) for additional information.

**POST-MASTER'S CERTIFICATE IN PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER**

The post-master’s certificate in psychiatric mental health nurse practitioner is a part-time, online program designed to give advanced practice registered nurses the opportunity to expand their scope of practice to include the care of individuals, families, and groups with psychiatric and mental health needs.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the GW Nursing website (https://nursing.gwu.edu) for additional information.

**REQUIREMENTS**

Up to 10 credits in advanced standing may be granted for graduate-level coursework taken within five years of application to the program. Eligible courses must demonstrate content addressing patients across the lifespan and must have been earned with a minimum grade of B.

The following requirements must be fulfilled: 22 credits in required courses and 600 clinical hours.

Students must complete 600 clinical hours.

COLLEGE OF PROFESSIONAL STUDIES

Dean C. Deering (interim)
Associate Deans A. Ashkar, J. Prostko, K.Cyrus Homayounpour

The College of Professional Studies (CPS) offers an expanding range of degree programs leading to associate’s, bachelor’s, and master’s degrees in professional studies, along with a variety of certificate programs.

CPS’s innovative programs are typically co-developed through collaboration among University content specialists and outside partners—government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face on campus, through distance learning, or a blend of both.

By combining University faculty experts with accomplished practitioners, CPS is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University’s rigorous standards of academic excellence and respond to the needs of a wide variety of professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (https://cps.gwu.edu).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

REGULATIONS

- Enrollment Status (p. 926)
- Time Limits (p. 926)
- Scholarship Requirements (p. 926)
- Grade of F (p. 927)
- Incompletes (p. 927)
- Transfer Credits (p. 927)
- Provisional Admission (p. 927)
- Readmission (p. 928)
- Withdrawing From a Course (p. 928)
- Academic Integrity (p. 928)

Enrollment Status

Once a student begins a degree or certificate program, he or she is expected to be enrolled continuously and actively engaged in fulfilling the requirements for the degree each semester of the academic year until the degree is conferred or certificate completed. For the fall and spring semesters, students must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the Dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for Leave of Absence in each fall and spring semester, following regular registration procedures. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits

A full-time student is allowed a maximum of three calendar years from the date of the first registration as a degree student (excluding time spent enrolled exclusively in English for Academic Purposes courses) to complete all degree requirements; a part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as a non-degree student before admission to degree candidacy or any period spent on approved leave of absence. Students who do not complete degree requirements within the time allowed will have their degree candidate status terminated; such students may be readmitted to degree candidate status under conditions specified by the Program Director and approved by the Dean.

Scholarship Requirements

Undergraduate students must maintain a minimum cumulative grade-point average of 2.0. and graduate students must maintain a minimum grade-point average of 3.0. If a student’s GPA falls below the required minimum, they are placed on academic probation and allowed one semester in which to raise the GPA to the required minimum; any such student who does not raise their GPA to the required minimum in one semester will be dismissed from the program. If it is mathematically impossible for the student’s GPA to reach the required minimum in one semester, they are dismissed from the program without a probationary period.

See Grades under University Regulations (p. 23) for undergraduate and graduate grading systems.
Grade of F
A student who receives a grade of F is subject to dismissal from the program. If the student wishes to remain enrolled, they must present cause for consideration by the Program Director and to the Dean as to why continued study should be permitted. A student who receives a grade of F, if permitted to remain in the program, must repeat the course and achieve a passing grade as well as maintain the minimum required GPA; however, once a grade of F has been received it remains a part of the student’s permanent record and is calculated into the grade-point average. Students may only be granted to repeat a failed course once. Failure to receive permission to remain in the program and retake the failed course or achieve a passing grade after having been permitted to repeat a failed course will result in dismissal from the program.

Incompletes
The symbol I (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student’s inability to complete the required coursework during the semester in which the course was taken. At the discretion of the instructor, the symbol I may be recorded if a student, for reasons beyond the student’s control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student’s prior performance and class attendance in the course have been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be reported will be graded F. Failure. If acceptable reasons are later presented to the instructor, that instructor may initiate an appropriate grade change. The instructor and student must sign an Incomplete Agreement, available through the Office of the Dean, which sets forth the requirements and due dates for successful completion of the course. The coursework must be completed within the designated time period agreed upon by the instructor and student in the Incomplete Agreement, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the coursework is being completed. If not registered in other courses during this period, the student must register for Continuous Enrollment.

When work for the course is completed, the instructor completes a grade change form and submit it to the Office of the Registrar. Beginning with the fall 2014 semester, the final grade replaces the symbol of I. If work for the course is not completed within the designated time period, the grade is converted automatically to a grade of F, Failure, 0 quality points, and the grade-point average and academic standing recalculated. For courses taken prior to the fall 2014 semester, the grade earned is indicated in the form of I, followed by the grade. The symbol I cannot be removed and remains on the student’s permanent academic record, even after the course has been completed successfully.

Transfer Credits
Transfer credit that is accepted and applied to a student’s GW academic record counts toward the number of credits completed only. The grades from these courses are not used in calculating a student’s GW grade-point average. Once enrolled in the College of Professional Studies, students are not permitted to transfer coursework taken outside the University, except under extraordinary circumstances, and permission must be obtained in advance from the Dean.

Undergraduate students
Subject to individual program requirements, transfer credit may be awarded for coursework completed at other accredited institutions provided minimum grade requirements have been met and the coursework is appropriate to the degree. No more than 60 credits from a regionally accredited institution may be accepted for transfer. Coursework completed at another institution must have received a grade of C or above to be accepted for transfer credit.

The College of Professional Studies reserves the right to determine course equivalency and degree applicability. Once enrolled, CPS students are not permitted to transfer credit from coursework taken outside the University, except under extraordinary circumstances and with the advance permission of the Dean.

Graduate students
A maximum of one-quarter of the credits required for the degree may be approved for transfer to a graduate program in the College of Professional Studies from credit earned while enrolled as a non-degree student at GW or from another degree-granting school of this University or another accredited college or university. For transfer credit to be approved, all of the following conditions must be met: the coursework must be from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student’s program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level coursework; and the student must have received a minimum grade of B in each course for which transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the Program Director and the Dean during the student’s first year in the program. An official transcript of the coursework must be on file before the request can be considered.

Provisional Admission
Applicants with credentials that do not meet the minimum standards for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the Program Director/admissions committee. During the period of provisional status, students must meet the requirements set forth in their admission letter.
Students who do not meet these requirements are dismissed from the program.

Readmission
The College of Professional Studies does not review any application for readmission to a program by a student who was dismissed from the same or any other program at the College or course of study at the University until at least one year after the student was dismissed. Students unable to achieve the required minimum GPA in one semester are not considered for readmission to the program.

Withdrawing From a Course
Undergraduate Students
Undergraduate students in the College of Professional Studies may withdraw from any or all undergraduate courses in the College through the last day of scheduled classes in a specific course in the fall or spring semester of enrollment in the course. In order to withdraw from a course the student must submit a Registration Transaction Form (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/reg_transaction_form.pdf) (RTF) to their student services office, but no supporting documentation is required. The student services office will process the RTF unless dropping the course would result in the student taking fewer credits that they are required to take. A course from which a student successfully withdraws will be assigned a notation of W (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

Graduate Students
After the end of the eighth week of classes in a fifteen-week semester, or after the end of the third week of classes in a course scheduled over eight or fewer weeks, graduate students who wish to withdraw from a course must obtain the written permission of the Program Director and the Dean by submitting a petition for academic exception. A course from which a student successfully withdraws will be assigned a notation of W (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

See Adding, Dropping, and Withdrawing from Courses under University Regulations (http://bulletin.gwu.edu/university-regulations) for additional information governing all CPS students.

Academic Integrity
The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other University sanctions. The University Code of Academic Integrity (https://studentconduct.gwu.edu/code-academic-integrity) can be found at the Office of Academic Integrity (http://studentconduct.gwu.edu).

UNDERGRADUATE
Bachelor's completion programs
- Bachelor of Professional Studies with a major in cybersecurity (p. 930)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 931)
- Bachelor of Professional Studies with a major in police and security studies (p. 931)

Combined programs
- Dual Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 932)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 932)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 933)

Undergraduate Certificate
- Undergraduate Certificate in Cyber Attacks and Cyber Threats Analysis (p. 958)
- Undergraduate Certificate in Investigation of Cyber Security Incidents (p. 958)

GRADUATE
Master's programs

Admission Requirements
Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a grade-point average of B or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).
- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 933)
• Master of Professional Studies in the field of homeland security (p. 936)
• Master of Professional Studies in the field of landscape design (p. 938)
• Master of Professional Studies in the field of law firm management (p. 939)
• Master of Professional Studies in the field of publishing (p. 942)
• Master of Professional Studies in the field of sustainable urban planning (p. 944)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

• Master of Professional Studies in the field of legislative affairs (p. 948)
• Master of Professional Studies in the field of political management (p. 949)
• Master of Professional Studies in the field of political communication and governance (p. 955) Offered in Spanish only
• Master of Professional Studies in the field of strategic public relations (p. 955)
• Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 957)

CERTIFICATES

Graduate certificates

The College of Professional Studies offers the following graduate certificates. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

• Climate Change Management and Policy (p. 959)
• Digital Politics (p. 959)
• Global Public Relations (p. 960)
• Health Care Corporate Compliance (p. 960)
• PACs and Political Management (p. 961)
• Paralegal Studies (p. 961)
• Strategic Management and Executive Leadership for Law Enforcement
• Sustainable Landscapes (p. 962)
• Sustainable Urban Planning (p. 962) (p. 962)

Undergraduate certificates

• Cyber Attacks and Cyber Threats Analysis (p. 958)
• Investigation of Cyber Security Incidents (p. 958)
• Protection and Defense of Computer Networks (https://current.bulletin.gwu.edu/professional-studies/certificate-programs/protection-defense-computer-networks)

For more information visit the College of Professional Studies website (https://cps.gwu.edu).

EXPLANATION OF COURSE NUMBERS

• Courses in the 1000s are primarily introductory undergraduate courses
• Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
• Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
• The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

• College of Professional Studies (CPS) (p. 1154)
• Advocacy in the Global Environment (PSAD) (p. 1456)
• Cybersecurity Strategy and Information Management (PSCS) (p. 1457)
• Health Care Corporate Compliance (PSHC) (p. 1460)
• Homeland Security (PSHS) (p. 1460)
• Landscape Design (PSLD) (p. 1462)
• Law Firm Management (PSLM) (p. 1463)
• Legislative Affairs (LGAF) (p. 1375)
• Molecular Biology (PSMB) (p. 1463)
• Paralegal Studies (PSLX) (p. 1464)
• Political Management (PMGT) (p. 1442)
• Publishing (PSPB) (p. 1468)
• Public Leadership (PSPL) (p. 1465)
• Public Relations (PSPR) (p. 1467)
• Security and Safety Leadership (PSSL) (http://bulletin.gwu.edu/courses/pssl)
• Urban Sustainability (PSUS) (p. 1469)

UNDERGRADUATE PROGRAMS

Bachelor’s completion programs
• Bachelor of Professional Studies with a major in cybersecurity (p. 930)
• Bachelor of Professional Studies with a major in integrated information science and technology (p. 931)
• Bachelor of Professional Studies with a major in police and security studies (p. 931)

Combined programs
• Dual Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 932)
• Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 932)
• Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 933)

Undergraduate Certificate
• Undergraduate Certificate in Cyber Attacks and Cyber Threats Analysis (p. 958)
• Undergraduate Certificate in Investigation of Cyber Security Incidents (p. 958)

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

The bachelor of professional studies with a major in cybersecurity program is intended for students with associate’s or non-technical bachelor’s degrees who are looking for entry-level positions and advancement in the field of cybersecurity. The program consists of a core curriculum and two concentrations that focus on protection and defense of computer networks and cyber attacks and cyber threats analysis. Upon completion of the program, students are able to understand and implement cybersecurity requirements, protect and effectively defend computer networks against malicious activities, and correct computer network vulnerabilities through penetration testing and hacking techniques.

The program’s core curriculum includes courses related primarily to specialty areas identified by the National Initiative for Cybersecurity Education (NICE). Coursework in program subject areas culminates in a practicum that focuses on preparing students to obtain professional certification combined with practical exercises.

Visit the program website (https://cps.gwu.edu/cybersecurity-bachelors) for more information.

REQUIREMENTS

Students completing this program will have satisfied GW’s university-wide general education requirement, which includes 22 credits in the following areas:

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, students take a minimum of 60 credits at GW, comprising 15 required courses.

FACULTY

Director: S. White
Bachelor of Professional Studies with a Major in Integrated Information, Science, and Technology

The bachelor of professional studies in integrated information, science, and technology (IIST) is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor’s degree in a technology-related field. The program can be completed within two academic years (four semesters and one summer session). The IIST program provides graduates with a solid foundation in problem solving, analytical thinking, written communication, and technical knowledge in information technology and computing. The knowledge acquired in the program is relevant to a number of fields, such as information technology, technology management and consulting, network administration and network security, health IT, and data analytics.

See the program website (http://cps.gwu.edu/bachelors-completion) for additional information.

Requirements

The BPS in integrated information, science, and technology is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits can be transferred from coursework taken at other regionally accredited institutions of higher education. The program is designed for individuals who currently hold an associate’s degree or have earned at least 60 credits towards their undergraduate degree.

Students completing this program will have satisfied GW’s university-wide general education requirement, which includes 22 credits in the following areas:

- Mathematics or statistics (3 credits)
- Natural or physical science with lab (4 credits)
- Humanities (3 credits)
- Social and behavioral sciences (6 credits)
- Written communication or composition (6 credits)

Core Requirements *

Five courses selected from the following:

- PSIS 4137 Alternative Energy Sources
- PSIS 4138 Introduction to Health Information Technology
- PSIS 4141 Computer and Telecommunication Networks
- PSIS 4144 Information and Network Security
- PSIS 4145 Software Systems Development Processes
- PSIS 4161 Data Visualization
- PSIS 4195 Undergraduate Research
- PSIS 4199 Special Topics

*Not all core courses are offered each year. Please see department for course availability.

Faculty

Director S. Hooshangi

Bachelor of Professional Studies with a Major in Police and Security Studies

The bachelor of professional studies with a major in police and security studies degree program helps students acquire the knowledge and skills needed to work more effectively as...
police professionals. Developed by faculty in consultation with metropolitan area law enforcement and police specialists, the core coursework is designed to develop three central areas of competency: intelligence and criminal analysis; forensic science; and leadership and management. Elective courses are offered in a variety of disciplines, including sociology, leadership, public health, and international affairs.

Visit the program website (http://cps.gwu.edu/police-security-studies) for admissions and additional program information.

**REQUIREMENTS**

The following requirements must be fulfilled: 120 credits, including 30 credits in general education courses, 60 credits in required courses, and 30 credits in elective courses.

*General education and elective courses may be completed at any regionally accredited institution. A minimum grade of C is required for transfer credit to be approved. General education and elective coursework may be completed before, during, or within five years of completing the other requirements for the bachelor’s degree.

**FACULTY**

**Director** J. Delinski

**DUAL BACHELOR OF ARTS WITH A MAJOR IN POLITICAL COMMUNICATION AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT**

**OVERVIEW**

The School of Media and Public Affairs (https://smpa.gwu.edu) (SMPA) and the Graduate School of Political Management (https://gspm.gwu.edu) (GSPM) offer a combined BA/MPS degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the combined program must meet all requirements of their respective SMPA program. To meet the requirements of the combined program, students take 6 credits in graduate-level courses as part of their BA program of study.

Consult the School of Media and Public Affairs (https://smpa.gwu.edu) for admissions requirements and more details.

**DUAL BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN LEGISLATIVE AFFAIRS**

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 338) and
master of professional studies in the field of legislative affairs (p. 948) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year. Visit the program website (https://gspm.gwu.edu/dual-degree-programs) for additional information.

DUAL BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 338) and master of professional studies in political management (p. 949) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master’s degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department’s graduate adviser early in their junior year. Visit the program website (https://politicscience.columbian.gwu.edu/dual-degree-political-science-political-management) for additional information.

GRADUATE PROGRAMS

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a grade-point average of B or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 933)
- Master of Professional Studies in the field of homeland security (p. 936)
- Master of Professional Studies in the field of landscape design (p. 938)
- Master of Professional Studies in the field of law firm management (p. 939)
- Master of Professional Studies in the field of publishing (p. 942)
- Master of Professional Studies in the field of sustainable urban planning (p. 944)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of legislative affairs (p. 948)
- Master of Professional Studies in the field of political management (p. 949)
- Master of Professional Studies in the field of political communication and governance (p. 955) Offered in Spanish only
- Master of Professional Studies in the field of strategic public relations (p. 955)
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 957)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

The MPS in the field of cybersecurity strategy and information management degree program is for working professionals from the military, homeland security, and private sectors who wish to gain the expertise to address current and emerging challenges in information technology security. Students learn strategies and practices that empower them to manage critical information in the fight against hackers, terrorists, and cyber criminals. The program also enhances the skills of current homeland security and criminal justice professionals, preparing leaders to secure the country’s digital infrastructure.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://cps.gwu.edu/masters-cybersecurity-strategy-information-management) for additional information.

**COURSES**

**Explanation of Course Numbers**
- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

**PSCS 2101. Writing and Communication in a Technical Field. 4 Credits.**
The fundamentals of reading and writing with a clear sense of purpose and audience. How academic writing in virtually any subject area and on virtually any topic represents a formal engagement with larger scholarly debates. The writing process, including prewriting, drafting, and revision as well as basic research methods. Making clear oral presentations. (Same as PSIS 2101).

**PSCS 2102. Fundamentals of Information Technology and Computing. 4 Credits.**
Basic concepts of programming including elementary data types (numeric types, strings, lists, and files), control flow, functions, objects, loops, and methods are covered. Designing, maintaining, and implementing programs in a modern programming language. (Same as PSIS 2105).

**PSCS 2301. Cyber Investigation. 4 Credits.**
