BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY

The bachelor of professional studies in integrated information, science, and technology (IIST) is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor's degree in a technology-related field. The program can be completed within two academic years (four semesters and one summer session). The IIST program provides graduates with a solid foundation in problem solving, analytical thinking, written communication, and technical knowledge in information technology and computing. The knowledge acquired in the program is relevant to a number of fields, such as information technology, technology management and consulting, network administration and network security, health IT, and data analytics.

See the program website (http://cps.gwu.edu/bachelors-completion) for additional information.

REQUIREMENTS

The BPS in integrated information, science, and technology is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits can be transferred from coursework taken at other regionally accredited institutions of higher education. The program is designed for individuals who currently hold an associate's degree or have earned at least 60 credits towards their undergraduate degree.

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

- Mathematics or statistics (3 credits)
- Natural or physical science with lab (4 credits)
- Humanities (3 credits)
- Social and behavioral sciences (6 credits)
- Written communication or composition (6 credits)

*Not all core courses are offered each year. Please see department for course availability.
