MASTER OF SCIENCE IN THE FIELD OF CHEMISTRY (STEM)

GW's graduate chemistry program fosters active learning through a research-based curriculum. Beginning with advanced coursework and training in the discipline as a whole and one or more selected subdisciplines, our award-winning graduate students engage in cutting-edge research alongside expert faculty. Research areas include proteomics, and bioanalytical methods development, synthetic medicinal chemistry and drug design, combustion, battery chemistry and renewable energy sources, laser and molecular spectroscopies, nano- and biomaterials, modeling, coordination chemistry, and novel inorganic framework structures.

The MS program offers thesis and non-thesis tracks to prepare individuals for distinctive career or professional paths. All students take core courses and comprehensive examinations in the fields of analytical, inorganic, organic, and physical chemistry.

This is a STEM designated program.

Visit the program website (https://chemistry.columbian.gwu.edu/ms-chemistry/) for additional information.

ADMISSIONS

Admission deadlines: Fall - February 1: Priority consideration for admission and funding; April 1: Guaranteed review for admission and consideration for funding, if available. (Applications for admission will continue to be accepted after April 1, when space remains available in the program.)

Spring – October 1

Standardized GRE is not required.

Test scores:

The Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the PTE Academic is required of all applicants except those who hold a bachelor’s, master’s, or doctoral degree from a college or university in the United States or from an institution located in a country in which English is the official language, provided English was the language of instruction.

Minimum scores for the program are:

- Academic IELTS: an overall band score of 6.0 with no individual score below 5.0; or
- TOEFL: 550 on paper-based or 80 on Internet-based; or
- PTE Academic: 53

Prerequisite: A bachelor’s degree in chemistry or a related field.

Recommendation: One (1) recommendation required.

International applicants only: Please follow this link - https://columbian.gwu.edu/international-graduate-applicants - to review the International Applicant Information carefully for details on required documents, earlier deadlines for applicants requiring an I-20 or DS-2019 from GW, and English language requirements.

Supporting documents not submitted online should be mailed to:

Columbian College of Arts and Sciences, Office of Graduate Studies
The George Washington University
801 22nd Street NW, Phillips Hall 107
Washington DC 20052

For additional information about the admissions process visit the Columbian College of Arts and Sciences Frequently Asked Questions (https://columbian.gwu.edu/graduate-admissions-faq/) page.

askccas@gwu.edu
202-994-6210 (phone)

Hours: 9:00 am to 5:00 pm, Monday through Friday

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (https://bulletin.gwu.edu/arts-sciences/#degreeeregulationtext).
Thesis option—30 credits, including 15 credits in required courses, 9 credits in elective courses, and 6 credits in thesis research; non-thesis option—30 credits, including 15 credits in required courses and 15 credits of electives, including up to 6 credits of research. All students must successfully complete a comprehensive examination in the fields of analytical, inorganic, organic, and physical chemistry.

**Note:** All entering students in graduate chemistry programs are required to take the American Chemical Society graduate level placement examinations, given by the Department of Chemistry, prior to matriculation. The four placement examinations (in the disciplines of analytical, organic, inorganic, and physical chemistry) are designed to cover the subject matter in the disciplines generally taught in undergraduate programs preparatory for graduate work in chemistry, and the results are used by the department to advise the individual student in planning a program of courses appropriate to the student’s background. All graduate students are required to participate in the seminar and colloquium programs. Upon consultation with course instructors, specific course prerequisites may be waived.

### Code | Title | Credits
--- | --- | ---

#### Required

15 credits, which must include at least one course from each of the following categories and 6 additional credits in non-research CHEM courses taken at the 6000 level:

<table>
<thead>
<tr>
<th>Category A</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6221</td>
<td>Spectrochemical Analysis</td>
</tr>
<tr>
<td>or CHEM 6277</td>
<td>Chemical Bonding</td>
</tr>
<tr>
<td>or CHEM 6278</td>
<td>Molecular Spectroscopy</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Category B</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6233</td>
<td>Organometallic Chemistry and Catalysis</td>
</tr>
<tr>
<td>or CHEM 6235</td>
<td>Advanced Inorganic Chemistry I</td>
</tr>
<tr>
<td>or CHEM 6251</td>
<td>Advanced Organic Chemistry I</td>
</tr>
<tr>
<td>or CHEM 6259</td>
<td>Polymer Chemistry</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Category C</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6222</td>
<td>Biomedical Mass Spectrometry</td>
</tr>
<tr>
<td>or CHEM 6238</td>
<td>Chemistry of Inorganic Materials</td>
</tr>
<tr>
<td>or CHEM 6257</td>
<td>Physical-Organic Chemistry</td>
</tr>
<tr>
<td>or CHEM 6273</td>
<td>Chemical Thermodynamics</td>
</tr>
</tbody>
</table>

#### Electives

- Thesis option: 9 credits through a combination of coursework and Research (CHEM 6395)
- Non-Thesis Option: 15 credits through a combination of coursework and up to 6 credits of Research (CHEM 6395). Up to 9 credits may be taken in other departments related to the student’s area of interest (e.g., Forensic Sciences), subject to the approval of the Department of Chemistry. Students who are or will be employed in organizations dealing with science and technology policy programs may select from specified courses offered by Information Systems and Technology Management, Political Science, Public Policy and Public Administration, and the Elliott School of International Affairs.

#### Thesis research

CHEM 6999 | Thesis Research (taken for a total of 6 credits by students pursuing the thesis option.)

#### Comprehensive examination

Candidates are required to pass a master’s comprehensive examination as described in the department’s Guide for Graduate Students.
