

MASTER OF ARTS IN THE FIELD OF INTERACTION DESIGN (STEM)

From designing smart devices to reimagining educational environments, interaction design seeks solutions to complex human and environmental challenges. A unique and growing field, it explores the ways people engage with technology and their environments in their daily lives.

The master of arts in interaction design, offered by the Corcoran School of the Arts and Design, trains leaders who can analyze and create meaningful digital and physical design solutions. Students have the opportunity to develop their design practice in a real-world context by working with community organizations through the program's innovative Engagement Lab. This curricular component enables students to embrace a human-centered collaborative approach to design that is mindful of social and environmental impact.

With the program's focus on human services and the role of interaction design in public policy, graduates are equipped to make a difference across the nonprofit, government, and business sectors.

This is a STEM designated program.

Visit the program website (<https://corcoran.gwu.edu/interaction-design-graduate/>) for additional information.
