

BACHELOR OF SCIENCE WITH A MAJOR IN POLITICAL SCIENCE

The bachelor of science in political science degree provides training for active citizenship and the intensive development of quantitative analysis skills. Students in the BS program complete six courses in statistics, mathematics, and computer science. Inside the classroom, students learn from leading experts in social science research techniques, while outside the classroom they benefit from ample opportunities to intern on the Hill, on political campaigns, or at government agencies. Students also complete a required proseminar as juniors or seniors, in which they examine a political issue and develop scholarly writing on the topic. Through intensive development of research skills, graduates are well-prepared to enter a variety of careers in research in the public and private sectors. Some program graduates continue their education through graduate work or law school.

Many students supplement their classwork with study abroad (<https://politicalscience.columbian.gwu.edu/undergraduate-student-resources-opportunities/#study-abroad>) and internships (<https://politicalscience.columbian.gwu.edu/internships/>) for credit.

Visit the program website (<https://politicalscience.columbian.gwu.edu/bs-political-science/>) for additional information.

GENERAL EDUCATION

In addition to the University General Education Requirement (<https://bulletin.gwu.edu/university-regulations/general-education/>), undergraduate students in Columbian College must complete a further, College-specific general education curriculum—Perspective, Analysis, Communication (G-PAC) (<https://advising.columbian.gwu.edu/general-education-curriculum-gpac/>) as well as the course CCAS 1001 First-Year Experience. Together with the University General Education Requirement, G-PAC engages students in active intellectual inquiry across the liberal arts. Students achieve a set of learning outcomes that enhance their analytical skills, develop their communication competencies, and invite them to participate as responsible citizens who are attentive to issues of culture, diversity, and privilege.

Coursework (<https://bulletin.gwu.edu/university-regulations/general-education/#generaleducationtext>) for the University General Education Requirement is distributed as follows:

- One course in critical thinking in the humanities.
- Two courses in critical thinking, quantitative reasoning, or scientific reasoning in the social sciences.
- One course that has an approved oral communication component.
- One course in quantitative reasoning (must be in mathematics or statistics).

- One course in scientific reasoning (must be in natural and/or physical laboratory sciences).
- UW 1020 University Writing
- After successful completion of UW 1020, 6 credits distributed over at least two writing in the discipline (WID) courses taken in separate semesters. WID courses are designated by a "W" appended to the course number.

Coursework for the CCAS G-PAC requirement is distributed as follows:

- Arts—one approved arts course that involves the study or creation of artwork based on an understanding or interpretation of artistic traditions or knowledge of art in a contemporary context.
- Global or cross-cultural perspective—one approved course that analyzes the ways in which institutions, practices, and problems transcend national and regional boundaries.
- Local or civic engagement—one approved course that develops the values, ethics, disciplines, and commitment to pursue responsible public action.
- Natural or physical science—one additional approved laboratory course that employs the process of scientific inquiry (in addition to the one course in this category required by the University General Education Requirement).
- Humanities—one additional approved humanities course that involves critical thinking skills (in addition to the one course in this category required by the University General Education Requirement).
- CCAS 1001 First-Year Experience

Certain courses are approved to fulfill GPAC requirements in more than one category.

Courses taken in fulfillment of G-PAC requirements can also be counted toward majors or minors. Transfer courses taken prior to, but not after, admission to George Washington University can count toward the University General Education Requirement and G-PAC, if those transfer courses are equivalent to GW courses that have been approved by the University and the College.

Lists of approved courses in the above categories are included on each undergraduate major's (<https://bulletin.gwu.edu/arts-sciences/#majorstext>) page in this Bulletin.

SPECIAL HONORS

In addition to the general requirements stated under University Regulations (<https://bulletin.gwu.edu/university-regulations/>), to be considered for graduation with Special Honors a student must have a minimum GPA of 3.8 in all upper-level Political Science (PSC) courses. The GPA is calculated using only PSC courses taken at the 2000, 3000, and 4000 levels; GW courses other than those specified and transfer courses are not included.

The designation of Honors appears on the student's transcript, not on the diploma.

COMBINED PROGRAM

Combined program

- Dual Bachelor of Science with a major in political science and Master of Public Policy (<https://bulletin.gwu.edu/arts-sciences/political-science/dual-bs-political-science-mpp/>)
