GRADUATE CERTIFICATE IN PROJECT MANAGEMENT

Project management is an established management discipline used extensively in every sector of the economy, including all branches of government, industry, and nonprofit organizations. Project management, as defined by the Project Management Institute (PMI), is the application of knowledge, skills, and techniques to execute projects effectively and efficiently. GW’s graduate certificate program prepares students with the diverse proficiencies and skills required to succeed in a project-based environment.

The graduate certificate in project management program is enhanced by the related master in science in project management (http://bulletin.gwu.edu/business/management/project-management-ms/). The certificate program is designed to provide students with detailed coverage of basic concepts and theories of project management and related skills, preparing students to succeed in a project environment. Up to the total of 12 credits required for the certificate may count toward requirements for the MS degree.

Visit the program website (https://business.gwu.edu/graduate-certificate-project-management/) for additional program information.
