

BACHELOR OF SCIENCE WITH A MAJOR IN INTERNATIONAL BUSINESS

OVERVIEW

The bachelor of science (BS) in international business program provides students with the technical skills and abilities to assess opportunities in and challenges of conducting business in global markets. Students gain the skills needed to identify trends in the global economic environment and weigh the influence of firms, international institutions, governments, and non-governmental organizations. They develop a consultative approach to global business problem-solving, including the ability to build strategic alternatives to creative and logical client recommendations. Graduates leave prepared to tackle ethical and sustainability decision making challenges unique to international business. Teamwork and excellent written and oral communication skills are hallmarks of the program.
