

# MASTER OF BUSINESS ADMINISTRATION, SECURITY TECHNOLOGY TRANSITION CONCENTRATION

In July, 2020, the Department of Homeland Security Science and Technology Directorate selected the George Washington University School of Business to lead a new Center of Excellence to deliver an MBA program focused on security technology transition. The master of business administration, security technology transition program focuses on management of transition of technology from development to commercial and government applications. The program is designed for professionals with backgrounds in cybersecurity, engineering, science, technology, and related fields with an interest in the transition and commercialization of security technology for application in the public and private sectors.

Participants are mentored by security, technology, and innovation experts in a community of practice. During the program, participants develop a professional network through student engagement events with GW alumni, government agencies, and industry partners. Students experience the innovation impact through interactions with other professionals interested in the transition of security technology across organizations.
