BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING (STEM)

Electrical engineering provides the technological foundation for the modern information society. Almost every modern technological advance made today can be traced to the work of electrical engineers. Students in George Washington University’s electrical engineering program discover the basics of electrical engineering design, allowing them to take their place alongside the engineers who make daily advances in sustainable energy, telecommunications, healthcare, defense, and other sectors. The program’s contemporary curriculum is complemented by well-staffed and well-equipped laboratories. Students can access real-world projects through internships and gain practical design sequence experiences by being prepared in a wide variety of technical fields. Graduates have gone on to have careers at Tesla, Intel, Google, AT&T, Qualcomm, NASA, and Cisco.

Double major
SEAS and non-SEAS students interested in pursuing the BS in electrical engineering as a double major should see the requirements under SEAS Regulations (https://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext) in this Bulletin.

This is a STEM designated program.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering/) for additional information.

ADMISSIONS
For more information on the admission process, please visit the Office of Undergraduate Admissions website. Applications may be submitted via the Common Application.

Supporting documents not submitted online should be mailed to: Office of Undergraduate Admissions The George Washington University 800 21st Street NW, Suite 100 Washington DC 20052

Contact for questions: gwadm@gwu.edu or 202-994-6040

REQUIREMENTS
The following requirements must be fulfilled:

129 credits as outlined below in required and elective courses, including completion of a 3-course, 9-credit specialized track.

A minimum technical GPA of 2.2 and SEAS GPA of 2.0. A student’s technical GPA is calculated using all technical engineering courses outlined in the fifth, sixth, seventh, and eighth semester curriculum.

### Fifth semester
- **ECE 2210** Circuits, Signals, and Systems
- Humanities, social science, or non-technical elective

### Sixth semester
- **APSC 3115** Engineering Analysis III
- **ECE 3130** Digital Electronics and Design
- **ECE 3220** Introduction to Digital Signal Processing
- **ECE 3315** Fields and Waves I
- **ECE 3520** Microprocessors: Software, Hardware, and Interfacing

### Seventh semester
- **ECE 3125** Analog Electronics Design
- **ECE 3135** Digital Design with Field-Programmable Gate Arrays
- **ECE 3410** Communications Engineering
- **ECE 3915W** Electrical and Computer Engineering Capstone Project Lab I
- **ECE 4320** Fields and Waves II

### Eighth semester
- **ECE 4710** Control Systems Design
- **ECE 4920W** Electrical and Computer Engineering Capstone Project Lab II

Track requirement

Students complete one specialized track of three courses (for a minimum of 9 credits) from the options listed below. Requirements for the track can be completed using technical elective courses or ECE restricted elective courses.

**Artificial intelligence and robotics track**
- **ECE 6210** Machine Intelligence

**Electronics, nanotechnology, and CHIP design track**
- **ECE 4730** Robotic Systems
- **ECE 6210** Machine Intelligence
- **ECE 6217** Neural Networks and Hardware Implementations
- **ECE 6850** Pattern Recognition and Machine Learning
  or **BME 4835** Introduction to Assistive Robotics

**Sustainable energy and power systems track**
- **ECE 4662** Power Electronics
- **ECE 6699** Energy and Sustainability
- **MAE 2131** Thermodynamics

**Telecommunication and network security track**
- **ECE 4576** Electrical Power Systems
- **ECE 5620** VLSI Design and Simulation
- **ECE 6521** Microfabrication and Nanofabrication Technology
- **ECE 6540** ASIC Design and Testing of VLSI Circuits
- **ECE 6545** Introduction to Nanoengineering
- **ECE 6555** Photonics and Fiber Optics
- **ECE 6560** Introduction to Physical Electronics

General track
- **ECE 4610** Electrical Energy Conversion
- **ECE 4925W** Electrical and Computer Engineering Capstone Project Lab III
- Humanities, social science, or non-technical elective
- Two technical electives

And two technical elective courses selected from the following with the advisor’s approval:

- **ECE 4662** Power Electronics
- **ECE 6699** Energy and Sustainability
- **MAE 2131** Thermodynamics

Bachelor of Science with a Major in Electrical Engineering (STEM)
Three technical elective courses selected with the advisor’s approval to align with track’s overall academic goals.

1 Course satisfies the University general education requirement (https://bulletin.gwu.edu/university-regulations/general-education/) in math, science, and writing.

2 All electrical and computer engineering students take five courses to satisfy the ECE humanities and social science/non-technical requirement. Three of these courses—one in humanities and two in social sciences—must be on the University general education requirement list; one course must be PHIL 2135 (or NSC 4176 for students in the NROTC Program); and one course can be in the humanities/social sciences, or a non-technical course related to public health, safety, and welfare; global cultural, social, environmental, and economic factors; or innovation, entrepreneurship, and creativity. For the last category, students can consider taking DNSC 1051, DNSC 4404, EMSE 4410, ISTM 4223 MGT 3300, MGT 3301, MGT 3302, MGT 3303, or MGT 4003. The non-technical course cannot focus on scientific/mathematical approaches or technology. All courses selected to satisfy this requirement must be taken for a minimum of 3 credits and approved by the advisor.

3 Three 3-credit technical elective courses must be selected with the approval of the advisor from upper-division undergraduate (2000 to 4000 level) or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. Exceptions must be approved by the advisor. Technical elective courses can be used to fulfill the track requirement. See above.

4 The two ECE restricted electives must be selected with the approval of the advisor from ECE courses at the 3000 level or above. Exceptions must be approved by the advisor. ECE elective courses can be used to fulfill the track requirement. See above.

**COMBINED PROGRAMS**

**Combined programs**
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of computer engineering (https://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/combined-bs-electrical-engineering-ms-computer-engineering/)
- Dual Bachelor of Science with a major in electrical engineering and Master of Science in the field of electrical engineering (https://bulletin.gwu.edu/engineering-applied-science/electrical-computer-engineering/combined-bs-ms-electrical-engineering/)
