DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER ENGINEERING

The PhD in computer engineering prepares aspiring scholars and researchers to explore key areas within the computer engineering field, including computer architecture, integrated circuit design, photonic computing, high-performance computing, and network computing.

Students can expect to work closely with a faculty advisor in their chosen research area to create a curriculum plan and guidance for the doctoral dissertation. Students may also be expected to teach introductory-level courses to undergraduates, present conference papers, and work with faculty on research grant applications.

Visit the program website (https://www.ece.seas.gwu.edu/phd-computer-engineering/) for additional information.

Standardized test scores: The Graduate Record Examination (GRE) is required of all applicants. (Institution code 5246).

The Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the PTE Academic is required of all applicants except those who hold a bachelor's, master's, or doctoral degree from a college or university in the United States or from an institution located in a country in which English is the official language, provided English was the language of instruction. Minimum scores:

- Academic IELTS: an overall band score of 6.0 with no individual score below 5.0; applicants requesting funding consideration must have an overall band score of 7.0 with no individual score below 6.0; or
- TOEFL: 550 on paper-based or 80 on Internet-based; applicants requesting funding consideration must have 600 on paper-based; or 100 on Internet-based; or
- PTE Academic: 53; applicants requesting funding consideration must have 68.

Recommendations required: 3 recommendations required. If possible, one recommendation should be from your advisor at the institution from which you earned your highest degree.

Prior academic records: Transcripts are required from all colleges and universities attended, whether or not credit was earned, the program was completed, or the credit appears as transfer credit on another transcript. Unofficial transcripts from all colleges and universities attended must be uploaded to your online application. Official transcripts are required only of applicants who are offered admission.

If academic records are in a language other than English, a copy in the original language and an English language translation must be uploaded. Transcript evaluations should not be uploaded. Applicants who have earned a degree from an Indian university are required to submit individual semester marksheets.

Statement of purpose: Please write a comprehensive essay of 400 to 600 words, indicating your fields of study, your specialized interests, and the general subject area of your planned dissertation or professional project.

Additional requirements: Applicant must possess a bachelor's or master's degree in an appropriate area from an accredited institution. Applicants must also show evidence of a strong academic or relevant professional background pertinent to the field of study and must demonstrate a capacity for original scholarship. Students whose highest degree is a bachelor's must have a grade point average of at least 3.3 (on a scale of 4.0); students whose highest degree is a master's must have a grade point average of at least 3.4 (on a scale of 4.0).

All applicants must choose an area of focus that most closely matches their interests and note this on the online application. All applicants must submit a resume or CV.

International applicants: Please follow this link - https://graduate.admissions.gwu.edu/international-student-application-requirements/ - to review the International Applicant Information carefully for details on required documents, earlier deadlines for applicants requiring an I-20 or DS-2019 from GW, and English language requirements.

* A limited number of doctoral applicants are accepted for the summer. Please contact the admissions office for details. International applicants who require a visa from GW are eligible to apply for admission in fall and spring only (not summer).

For additional information about the admissions process visit the SEAS Admissions Frequently Asked Questions (https://graduate.engineering.gwu.edu/admissions-frequently-asked-questions/) page.

Doctor of Philosophy in the Field of Computer Engineering

Doctoral Qualifying Examination

A student may attempt the doctoral qualifying examination after passing the preliminary examination. The qualifying examination is a written proposal of the doctoral degree and progresses to the next stage of the program. For the qualifying examination, a written proposal of the doctoral research is presented to a committee which also conducts an oral examination of the student. Details on the structure of the proposal and the composition of the committee can be found on the departmental website (https://www.ece.seas.gwu.edu/graduate-resources/).

Publication Requirements

Every doctoral student is required to have a paper based on the student's dissertation research published or accepted in a scientific journal before the student's doctoral final examination. Doctoral candidates in the area of computer architecture and high-performance computing (CAHPC) may petition the department to have one or more full-length papers published in highly selective peer-refereed conferences to satisfy the journal paper requirement. Such a petition must be submitted by the student's dissertation advisor on behalf of the student, and requires the approval of the dissertation committee, CAHPC faculty, and the ECE department chair.

Doctoral Final Examination

Once the dissertation has been completed, the student schedules the doctoral final examination (also known as dissertation defense) in consultation with the research advisor. The doctoral final examination Form must be filed and approved by the department chair at least three weeks prior to the doctoral final examination date. Approval is granted only when all required materials have been submitted to the department. The required materials include a completed form, a copy of the journal article or final acceptance letter, resumes of any outside examination committee members, and electronic and printed copies of the dissertation. Details on the structure of the dissertation and the composition of the examination committee can be found on the departmental website (https://www.ece.seas.gwu.edu/graduate-resources/).

The doctoral final examination is oral and open to the public. The candidate must demonstrate mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University specially to participate in the examination. The research advisor usually serves as advocate for the candidate. The committee will assess the quality and originality of the candidate's contribution to knowledge as well as the student's mastery of the scholarship and research techniques of the field. Upon decision to pass the student, the committee recommends the candidate for the degree of doctor of philosophy. The decision to pass may be provisional based on committee recommendations for changes to the dissertation in terms of additional work, writing, or clarifications.

Seminar and Colloquium Requirements

- Seminar requirement—Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement—Students are required to attend 10 in-person colloquia during their time in the program. Each attended colloquium is verified by a faculty member in attendance. Upon the attendance of five colloquia, the student...
must submit to the department the colloquium attendance form signed by the faculty advisor prior to applying for graduation.

**Graduation and Scholarship Requirements**

Students are responsible for knowing the University’s minimum GPA requirement for graduation and scholarships. See School of Engineering and Applied Science Regulations, Graduation and Scholarship Requirements (https://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext).

Students should contact the department for additional information and requirements.
