BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The Systems Engineering program at GW is designed to provide a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. In this program, you learn to apply engineering techniques and mathematical methods to assist decision makers in designing and operating systems optimally. You learn to do this by observing, understanding, modeling, and predicting the behavior of the systems that naturally arise in fields as diverse as medicine, defense, manufacturing, and management. Students take part in professional societies—such as GW’s student chapter of INFORMS (Institute for Operations Research and the Management Sciences)—and have multiple opportunities to connect with our alumni network, leading to internships. With a broad array of options open to systems engineers, students have gone on to intern as well as start their careers in many fields, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, or transportation.

Double major

SEAS and non-SEAS students interested in pursuing the BS in systems engineering as a double major should see Double Major under SEAS Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationtext) in this Bulletin.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology/) for additional information.

ADMISSIONS

For more information on the admission process, please visit the Office of Undergraduate Admissions website (https://undergraduate.admissions.gwu.edu/). Applications may be submitted via the Common Application (https://go.gwu.edu/commonapp/).

Supporting documents not submitted online should be mailed to:

Office of Undergraduate Admissions
The George Washington University
800 21st Street NW, Suite 100
Washington DC 20052

Contact for questions:
gwadm@gwu.edu or 202-994-6040

REQUIREMENTS

The following requirements must be fulfilled:

• Completion of a total of 129 credits as outlined below.
• Completion of an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after

### Total Credits

129

---

1 Course satisfies the University General Education (http://bulletin.gwu.edu/university-regulations/general-education/) requirement in math, science, and writing.

2 One 4-credit course selected from the following for a total of 4 credits: BISC 1111, BISC 1112, CHEM 1111, or CHEM 1112.

3 Other programming courses, such as CSCI 1111, CSCI 1112, or ECE 1120, may be substituted with the advisor’s approval.

4 One social and behavioral sciences course and one humanities course must be selected from the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education/) list.

5 In consultation with the faculty advisor, the student selects three approved courses from a single focus area from the Department of Engineering Management and Systems Engineering.

6 Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by taking a sequence of courses leading to a minor from another department of the University. Professional electives are selected with the approval of the student’s academic advisor to satisfy the minor requirements. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

**Internship requirement**—All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15 to 20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (https://career-services.gwu.edu) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.
