

MINOR IN FOOD LEADERSHIP

The minor in food leadership is designed to support a student's exploration of food, from learning the science of various types of agricultural approaches, to valuing the people who make our food, to understanding the policies that have shaped our food systems. The goal of the program is for students to recognize the sustainability and climate change challenges around food, while acknowledging the historic injustices that cause food systems to be stagnant.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses; one 3-credit course in nutrition; and one 3-credits course taken in each of the policy, innovation, and humanity course groups for a total of 9 credits.
