GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION

Clinical research administration is a vast and expanding field that involves the processes in which products—drugs, devices, biological and treatment protocols are developed for patient care. Both the master’s degree and graduate certificate programs prepare health sciences professionals to participate in the science and business of the development process. Our rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

The certificate requires 12 semester hours in clinical research administration course work which are transferable to the MSHS degree.
