GRADUATE CERTIFICATE IN REGULATORY AFFAIRS

The regulation of clinical research is, in and of itself, a dynamic and emergent field. It brings together the science in which products—drugs, devices, biologics, and vaccines—and treatment protocols are developed for improved global healthcare. The program prepare scientists and regulatory professionals to manage the key elements of the clinical research regulatory process.

The certificate program is ideal for the scientist with an advanced degree who may be at the starting point of entering the regulatory affairs profession within the industry or the government sector. The certificate requires the completion of 12 credits in regulatory affairs coursework, all of which may be counted toward the MSHS degree.

Visit the program website (https://smhs.gwu.edu/bulletin/smhs/certificate/regulatory-affairs/) for additional information.
