

MICROBIOLOGY, IMMUNOLOGY, AND TROPICAL MEDICINE

OVERVIEW

George Washington University's department of microbiology, immunology, and tropical medicine (MITM) conducts innovative, fundamental, basic, and translational research for HIV/AIDS and neglected tropical diseases. MITM has a strong tradition of training and policy advocacy for these infectious and parasitic diseases, which initiate and perpetuate poverty and suffering worldwide.

Visit the department's website (<https://microbiology.smhs.gwu.edu/>) for more information.

DOCTORAL

Doctoral program

- Ph.D. Program in Microbiology, Immunology and Tropical Medicine
