

DOCTOR OF NURSING PRACTICE IN THE FIELD OF ADULT- GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The DNP adult-gerontology primary care nurse practitioner option prepares graduates to function as doctorally prepared nurses at the highest level of clinical practice, to translate knowledge into practice, to apply policy, as well as design, implement and evaluate innovations to improve health care systems and patient centered outcomes.

This option provides the theoretical and practical foundations necessary for nurses to become advanced practice nurses, specifically in working with adolescent (ages 13 and older) and adult patients. As the United States population ages, adult-gerontology is an expanding area that offers abundant opportunities in palliative care, home health, long-term care, assisted living and others. Students who complete this program option will be eligible to sit for the ANCC and AANP certification exams.
