DOCTOR OF PHILOSOPHY IN THE FIELD OF ENVIRONMENTAL HEALTH

Program Directors: K. Applebaum and L. Price

The mission of the doctor of philosophy (PhD) in the field of environmental health program is to educate individuals focused on developing new knowledge in the methods or applications of environmental health sciences that translates to environmental public health policy and practice. Program scholars will advance knowledge in analysis and laboratory sciences.

Graduates can expect to be able to:

• Demonstrate skills across a wide range of epidemiologic and biostatistical theories and methods.
• Use knowledge in environmental public health risk sciences.
• Understand general and specialized concepts and methodologies for scientific research in environmental health.
• Understand and identify data that scientifically addresses environmental health disparity issues related to environmental justice, occupational exposures, and global inequities in exposures and susceptibilities.
• Demonstrate ability to work in interprofessional settings, such as in collaboration with quantitative, environmental, physical, and social scientists.
• Understand and abide by guidelines for ethical research practice and responsible conduct of research.
• Understand how to identify and appropriately work with communities from which research subjects are drawn and/or those who are most impacted by the conduct and results of the research.
• Conduct independent research, analyze data, and communicate results.
• Disseminate research findings to scientific and lay audiences.

Visit the program website (https://publichealth.gwu.edu/environmental-health-phd/) for additional information.

ADMISSIONS

Visit the Milken Institute School of Public Health website (https://publichealth.gwu.edu/) for additional information about academic programs and information about GWSPH. Graduate admissions information, including application requirements and deadlines, can be found on the GWSPH Graduate Admissions website (https://publichealth.gwu.edu/admissions/graduate-admissions/).

REQUIREMENTS

The following requirements must be fulfilled: 48 total credits, including 8 credits in PhD foundational core courses, 14 credits in program-specific courses, 12 to 18 credits in elective courses, and 8 to 14 credits in proposal writing and dissertation research.
