

DOCTOR OF PHILOSOPHY IN THE FIELD OF HEALTH POLICY

Program Directors: A. Dor, L. Ku

The PhD in health policy develops scholars who are skilled at critically assessing the political, economic, legal, and social aspects of health policy and management. Students learn to apply innovative research tools to analyze processes and outcomes in healthcare delivery and public health settings to make informed decisions. Special emphasis is placed on the United States' health policies, systems, and population health.

Based in Washington, DC, the PhD in health policy program immerses students in a multidisciplinary scholarly environment working with faculty in the Department of Health Policy and Management and other GW experts conducting research and policy analyses in pursuit of improvements in health access, equity, costs, and outcomes and shaping the health and public health policy debate at national, state, and other levels. Program students benefit from faculty mentorship and proximity to experts and agencies immersed in the most current topics of health policy and public health in the hub of health policy decision-making and debate. The program prepares PhD candidates with the proper training to be an integral part of creating future solutions to public health challenges and a transformed healthcare system.

Visit the program website (<https://publichealth.gwu.edu/programs/health-policy-phd/>) for additional information.

ADMISSIONS

Visit the Milken Institute School of Public Health website (<https://publichealth.gwu.edu/>) for additional information about academic programs and information about GWSPH. Graduate admissions information, including application requirements and deadlines, can be found on the GWSPH Graduate Admissions website (<https://publichealth.gwu.edu/admissions/graduate-admissions/>).

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 10 credits in PhD core courses, 20 credits in program-specific courses, at least 10 credits in elective courses; 8 credits in dissertation research; and successful completion of a comprehensive examination.

| Code | Title | Credits |
|-------------------------------|---|---------|
| Required | | |
| PhD core courses (10 credits) | | |
| PUBH 6080 | Pathways to Public Health | |
| PUBH 8099 | Doctoral Topics (PhD Seminar: Cross Cutting Concepts in Public Health ONLY) | |
