

UNDERGRADUATE EDUCATION AT GW

An undergraduate education at GW provides students with a wide range of opportunities to pursue both professional and liberal arts degrees. These degrees ensure that students leave the University with a body of knowledge that shows a depth of understanding in at least one field. In addition, the General Education Requirement that is common to the education of students in all schools of the University ensures that students develop key analytical abilities that transcend disciplinary boundaries. These analytical abilities provide students with cornerstones for their personal development, civic consciousness, and successful careers.

The University General Education Requirement is applicable to the following schools: Columbian College of Arts and Sciences (CCAS), GW School of Business (GWSB), Elliott School of International Affairs (ESIA), School of Engineering and Applied Science (SEAS), and Milken Institute School of Public Health (GWSPH). The School of Medicine and Health Sciences, School of Nursing, and College of Professional Studies offer degree completion programs at the undergraduate level and students are expected to have completed the University General Education Requirement prior to enrolling at GW.

To earn an undergraduate degree, students must:

- Successfully complete at least 120 credits
- Fulfill the University General Education Requirement (Tier One)
- Fulfill school-specific general education and distribution requirements (Tier Two)
- Fulfill the requirements of at least one major in their home school (Tier Three)

Tier One: University General Education Requirement

All undergraduate students at GW are required to fulfill Tier One of the University General Education Requirement. The University General Education curriculum trains students to engage in active intellectual inquiry across a variety of disciplines by developing a range of analytical skills, including critical thinking, quantitative reasoning, and scientific reasoning, and proficiency in written and oral communication. Students are expected to use these skills in pursuit of their major and, upon graduation from the University, in pursuit of their profession and participation in the world around them. Only those courses that are designed specifically to meet the objectives outlined below, and that are assessed for their outcomes in these areas, count for University General Education credit.

To fulfill Tier One requirements, students must successfully complete the following:

- One course in critical thinking in the humanities.
- Two courses in critical thinking, quantitative reasoning, or scientific reasoning in the social sciences.

- One course that has an approved oral communication component.
- One course in quantitative reasoning (must be in mathematics or statistics).
- One course in scientific reasoning (must be in natural and/or physical laboratory sciences).
- UW 1020 (<https://bulletin.gwu.edu/search/?P=UW%201020>) University Writing (4 credits).
- After successful completion of UW 1020, 6 credits distributed over at least two different Writing in the Disciplines (WID) courses taken in separate semesters (summer counts as one semester). WID courses are designated by a "W" appended to the course number.

Note: University General Education courses cannot be taken at another institution and transferred in to GW after a student has matriculated.

Quantitative reasoning refers to the process of modeling problems of the real world within a formal abstract system, solving those problems using systematic numerical methods of analysis, and interpreting the results. Students are required to take one approved course in mathematics or statistics.

Scientific reasoning refers to consistent, logical thought patterns that are employed during the process of scientific inquiry that enables individuals to propose relationships between observed phenomena, design experiments to assess the validity of these relationships, and evaluate the results of these experiments, all using the tools, skills, and techniques of quantitative reasoning. Students are required to take one approved course in natural and/or physical laboratory sciences that includes a laboratory component.

Critical thinking refers to the analysis and evaluation of complex information (systems of theory or thought) as well as the formulation of logical arguments based on that analysis. Students are required to take one approved course in critical thinking in the humanities and two approved courses in critical thinking in the social sciences.

In addition to these elements of inquiry, students are trained to communicate effectively in both written and oral formats, not only in their University General Education course requirement, but in their majors.

- Students are trained to communicate effectively in written formats through a first-year writing course, UW 1020 University Writing, and subsequent Writing in the Disciplines (WID) courses. The written communication requirement trains students in the effective use of language to express critical thinking that evaluates rhetorical situations, identifies significant lines of inquiry, investigates and analyzes available knowledge, and develops rigorous arguments appropriate to the intended audience. Students must complete at least 10 credits in courses to fulfill the written communication requirement, including 4 credits in UW 1020 and at least 6 credits in a combination of WID courses. The 6 WID credits must

be earned after successful completion of UW 1020 and distributed over at least two different WID courses taken in separate semesters (summer counts as one semester). This distribution ensures that students gain focused attention to their writing in at least three different semesters over the course of their undergraduate career. Students can always take more than 6 credits of WID, and many do. WID courses are designated in the curriculum with a 'W' appended to the course number. WID courses can also fulfill general education, distribution, school-specific, or major requirements, if the courses are designated for that purpose. Students should consult with their school and/or department to determine which courses can be double counted.

- The oral communication requirement trains students in the effective interpretation, composition, and presentation of information, ideas, and values to specific audiences. Students are required to take one course that has an approved oral communication component.

Students are expected not only to learn these skills in their University General Education courses, but also to employ them in their pursuit of their majors and, when they leave the University, their pursuit of their professions and participation in the world around them.

In some cases, University General Education courses may be used to satisfy school-specific requirements and/or major requirements. Students should consult with their schools and/or departments to determine which courses may be double counted. Students who are contemplating transferring from one school to another should carefully review the Tier One requirements for the school of origin and the school of transfer to ensure that the University General Education courses selected for one school also count for the other school.

While students learn these analytical and communicative skills in a range of disciplines, not all courses in each discipline are designed to teach these skills. Many courses are focused more on content or on other intellectual goals. Only those courses that are designed specifically to meet the objectives outlined above, and that are assessed for their outcomes in these areas, count for University General Education credit. A complete list of approved University General Education courses (<https://advising.columbian.gwu.edu/general-education-curriculum-gpac/#general-gw-requirements>) can be found on the Columbian College of Arts and Sciences Undergraduate Academic Advising website. Approved courses are subject to change during the academic year.

Tier Two: School-Specific Distribution Requirements

In each school, students must fulfill additional general education or distribution requirements. These Tier Two requirements differ by school. Columbian College of Arts and Sciences (<https://advising.columbian.gwu.edu/general-education-curriculum-gpac/#ccas-specific-gpac>) provides a liberal arts education, and as such, requires additional, school-specific general education courses that lead students to deepen the skills developed in Tier One

courses. The GW School of Business (<https://business.gwu.edu/current-students/undergraduate/advising-center/>), Elliott School of International Affairs (<https://elliott.gwu.edu/undergraduate-academic-advising/>), and School of Engineering and Applied Science (<https://www.seas.gwu.edu/undergraduate-student-services-advising/>) are professional schools and as such, they require different courses in Tier Two compared to those of a general liberal arts education, focusing on courses appropriate to the professional development of their students as outlined in Tier Three. The Milken Institute School of Public Health (<https://publichealth.gwu.edu/academics/undergraduate-advising/>) (GWSPH) offers both liberal arts and professional majors. As a result, GWSPH has limited Tier Two courses and, instead, differentiates additional requirements at the Tier Three level.

Tier Three: Major Requirements for the Degree

Major requirements differ by school:

- CCAS: Students in the Columbian College of Arts and Sciences must select a major and successfully complete the courses needed to fulfill degree requirements for that major. Bachelor of arts and bachelor of science requirements vary by major. Information about program-specific Tier Three requirements can be found in the CCAS section of this Bulletin (<https://bulletin.gwu.edu/arts-sciences/>).
- GWSB: Students in the GW School of Business must select a major and successfully complete courses needed to fulfill degree requirements for that major. Information about program-specific Tier Three requirements can be found in the GWSB section of this Bulletin (<https://bulletin.gwu.edu/business/>).
- ESIA: Students in the Elliott School of International Affairs must demonstrate third-year proficiency in a foreign language and take school-specific regional foundations courses to develop an understanding of diverse international cultures. The specific means of fulfilling language and regional foundations requirements differ across regional and non-regional programs. Information about program-specific Tier Three requirements can be found in the ESIA section of this Bulletin (<https://bulletin.gwu.edu/international-affairs/>).
- SEAS: Students in the School of Engineering and Applied Science must select a major and successfully complete courses needed to fulfill degree requirements for that major. All students are required to complete a capstone project. Information about program-specific Tier Three requirements and recommended program of study for each major can be found in the SEAS section of this Bulletin (<https://bulletin.gwu.edu/engineering-applied-science/>).
- GWSPH: Students in the GW Milken Institute School of Public Health must select a major and successfully complete the courses needed to fulfill degree requirements for that major. Exercise science students also have the option to select a concentration. Requirements differ across majors and concentrations. In addition, students may have non-GWSPH prerequisites attached to courses required for their major or concentration. Information about program-specific Tier Three

requirements can be found in the GWSPH section of this Bulletin (<https://bulletin.gwu.edu/public-health/>).

UNIVERSITY GENERAL EDUCATION COURSES

University General Education Courses

- Quantitative reasoning in mathematics or statistics (p. 3) (CAMS)
- Scientific reasoning in natural and/or physical lab sciences (p. 3) (CSCI)
- Critical thinking in the humanities (p. 4) (CAH)
- Critical thinking, quantitative reasoning, or scientific reasoning in the social sciences (p. 12) (CASS)
- Oral communication (p. 14) (CCOM)

Quantitative reasoning in mathematics or statistics (CAMS)

Code	Title	Credits
------	-------	---------

Must be either a Mathematics (MATH) or Statistics (STAT) course.

ECON 1001	Principles of Mathematics for Economics (effective Spring 2024)	
-----------	---	--

MATH 1007	Mathematics and Politics	
-----------	--------------------------	--

MATH 1008	History of Mathematics (effective Summer 2017) (ends effective Spring 2025)	
-----------	---	--

MATH 1009	Mathematical Ideas I	
-----------	----------------------	--

MATH 1051	Finite Mathematics for the Social and Management Sciences	
-----------	---	--

MATH 1221	Calculus with Precalculus II	
-----------	------------------------------	--

MATH 1231	Single-Variable Calculus I	
-----------	----------------------------	--

MATH 1232	Single-Variable Calculus II	
-----------	-----------------------------	--

MATH 1252	Calculus for the Social and Management Sciences	
-----------	---	--

MATH 2233	Multivariable Calculus	
-----------	------------------------	--

STAT 1000	Dean's Seminar (Statistically Speaking (effective Fall 2022))	
-----------	---	--

STAT 1000	Dean's Seminar (The Science of Uncertainty (effective Fall 2021))	
-----------	---	--

STAT 1051	Introduction to Business and Economic Statistics	
-----------	--	--

STAT 1053	Introduction to Statistics in Social Science	
-----------	--	--

STAT 1111	Business and Economic Statistics I	
-----------	------------------------------------	--

STAT 1127	Statistics for the Biological Sciences	
-----------	--	--

STAT 2112	Business and Economic Statistics II (ends effective Spring 2019)	
-----------	--	--

STAT 2118	Regression Analysis (ends effective Fall 2019)	
-----------	--	--

Notes:

MATH 1221, MATH 1231, and MATH 1252 are equivalent courses; therefore, credit cannot be earned for more than one.

STAT 1051, STAT 1053, STAT 1111, and STAT 1127 are equivalent courses; therefore, credit cannot be earned for more than one.

The ALEKS math placement test is mandatory for students who wish to take any of these courses. Additional information is available on the Department of Mathematics (<https://math.columbian.gwu.edu/aleks-math-placement-test/>) website.

Scientific reasoning in natural and/or physical lab sciences (CSCI)

Code	Title	Credits
------	-------	---------

Must be a natural or physical science course with lab.

ANTH 1001	Biological Anthropology	
-----------	-------------------------	--

ANTH 3412	Hominin Evolution	
-----------	-------------------	--

ASTR 1001	Stars, Planets, and Life in the Universe	
-----------	--	--

ASTR 1002	Origins of the Cosmos	
-----------	-----------------------	--

BISC 1005	The Biology of Nutrition and Health	
-----------	-------------------------------------	--

BISC 1006	The Ecology and Evolution of Organisms	
-----------	--	--

BISC 1007	Food, Nutrition, and Service	
-----------	------------------------------	--

BISC 1008	Understanding Organisms through Service Learning	
-----------	--	--

BISC 1111	Introductory Biology: Cells and Molecules	
-----------	---	--

BISC 1112	Introductory Biology: The Biology of Organisms	
-----------	--	--

or BISC 1112W	Introductory Biology: The Biology of Organisms	
---------------	--	--

BISC 1334	Bird Behavior (effective Summer 2023)	
-----------	---------------------------------------	--

CHEM 1003	Energy, Environment, and Society: Current Issues and Future Outlook	
-----------	---	--

CHEM 1004	Medicinal Chemistry: from Atoms to Vaccines	
-----------	---	--

CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II
CHEM 2151	Organic Chemistry I (Must be taken with CHEM 2153 to receive GPAC credit (effective Fall 2015) (ends effective Fall 2017))
CHEM 2152	Organic Chemistry II (Must be taken with CHEM 2154 to receive GPAC credit (effective Fall 2015) (ends effective Fall 2017))
CHEM 2153	Organic Chemistry Laboratory I (Must be taken with CHEM 2151 to receive GPAC credit (effective Fall 2015) (ends effective Fall 2017))
CHEM 2154	Organic Chemistry Laboratory II (Must be taken with CHEM 2152 to receive GPAC credit (effective Fall 2015) (ends effective Fall 2017))
FORS 2107	Fundamentals of Forensic Science (effective Summer 2022)
GEOG 1002	Introduction to Physical Geography
GEOL 1001	Physical Geology
GEOL 1002	Historical Geology
GEOL 1005	Environmental Geology
GTCH 3202	Research Methods in Mathematics and Science
HONR 1033	Honors Seminar: Scientific Reasoning and Discovery
HONR 1034	Honors Seminar: Scientific Reasoning and Discovery
PHYS 1003	Physics for Future Presidents (ends effective Spring 2025)
PHYS 1007	Music and Physics (ends effective Spring 2025)
PHYS 1011	General Physics I
PHYS 1012	General Physics II
PHYS 1021	University Physics I
PHYS 1022	University Physics II
PHYS 1025	University Physics I with Biological Applications

PHYS 1026 University Physics II with Biological Applications

Notes:

BISC 1005 and BISC 1007 are equivalent courses; therefore, credit cannot be earned for both.

BISC 1006 and BISC 1008 are equivalent courses; therefore, credit cannot be earned for both.

Students who wish to take CHEM 1111 must complete the ALEKS chemistry prep course. Additional information is available on the Department of Chemistry (<https://chemistry.columbian.gwu.edu/aleks-chemistry-prep-course/>) website.

Critical thinking in the humanities (CAH)

Meets humanities distribution requirement.
