

GRADUATE CERTIFICATE IN HUMAN CAPITAL

The graduate certificate in human capital provides rich knowledge in the practices and research-based disciplines of human capital and human resource management. Participants learn how human capital contributes to the core strategy of an organization. Courses cover key areas associated with human resource competencies as well as knowledge associated with the psychology of people, organizations, and careers. Human capital theory is presented in a practical way, targeted towards HR generalists or non-human resource managers interested in understanding the strategic function of HR in organizations. The program builds on the strengths of the School of Business in the areas of human capital development.
