

MASTER OF PUBLIC HEALTH IN THE FIELD OF MATERNAL AND CHILD HEALTH

Program Director: A. Vyas

The Maternal and Child Health (MCH) program is committed to improving the health and well-being of women, children, adolescents, and families through teaching, research, practice, policy, and service. The MCH Master of Public Health (MPH) program is grounded in a life course perspective as an organizing framework that acknowledges distinct periods in human development and presents both risks and opportunities for interventions. Further, the academic program explores MCH from an interdisciplinary perspective that integrates the biological, demographic, epidemiological, developmental, environmental, behavioral, and social characteristics unique to the health and well-being of women, children, adolescents, and families in the United States and around the world.
